The presence of a Pilot on board a vessel shall not relieve the Master of his responsibility regarding the safety of the vessel. The Port Authority shall have the right to claim against a vessel for any damage caused by that vessel to berths, shore installations, tugs, buoys, etc.

The Harbour Master or his deputy may order a vessel to leave the berth at short notice in the case of emergency, bad weather, etc.

Vessels carrying explosives or dangerous cargoes must declare quantities and categories of same when they report their ETA.

Crew members are prohibited from swimming within the harbour.

Lowering into the water of ship's life-boats, launches or life-rafts is prohibited without the written approval of the Harbour Master or his deputy.

Mooring of ship's life-boats, launches or life-rafts to navigational marks and buoys is prohibited.

Due regard shall be given to the safety of divers when they are working within the Port Limits. Engines should be stopped when approaching their working area at a circle of 150 m. The launch attending divers displays the International flag letter "ALFA" during diving operations.

SHIPMASTER'S REPORT: May 1980. Vessel loading Ammonia.

Approaches: Charts BA:3773 and BAP1223. The complex lies about 1.5 miles South of the port of Mina Al-Ahmadi.

At the time of call the Decca chain was not operating. Approach is fairly straightforward with good positions being obtained by radar and from the various light floats and buoys that abound.

Currents appear to follow the trend of the coastline.

Anchorage: There is no night berthing allowed on the ammonia berth. Vessels arriving during the hours of darkness are asked to anchor about 2 miles due East of the berth.

Pilotage: Pilots will board the vessel about 1.5 miles due East of the berth, usually from a tug.

Call Port and Pilots on Channel 16 VHF, usually work 13 or 14 thereafter. Communication was good, fluent English. Vessel has the option of berthing either side alongside and, if not heavily loaded, would suggest starboard side to with the head out.

Two powerful tugs available for berthing, usually only one required for sailing. Tugs lines, lying alongside.

Length of pilotage about one and a half hours to being secured.

Berth: Consists of a "T" jetty, the head of which lies about 340°/160°.

The stem of the "T" is 1,000 m. long and the head about 800 m. long.

The ammonia berth lies on the Northern side of the "T" and inside.

Quoted depth is 40 ft. which was borne out by soundings. The Pilots however quoted a max. sailing draft of 36 ft.

The ammonia berth itself is about 350 m. long. The concrete sections of the jetty are currently undergoing repair and this affected the mooring arrangements. Besides this there are lamp standards which may interfere with lines in the future.

Usual mooring arrangements, 3 headlines, 2 breastlines and 2 springs.

Gangway: It is only possible to use ship's gangway when lying starboard side to as it fouls the chicksan area when head in. Careful positioning and tending is required.

There is a group of chicksans which handle oil products about halfway along the jetty and the ammonia chicksans lie just South of these.

No. VRL. No venting.

Shore personnel connected the chicksan (bolted) and no reducer was necessary.

Cooldown: Charterers asked us to limit the amount of coolant taken to 300 tonnes.

Petrochemical Industries Company (who operate the berth) would have allowed us to take this coolant into more than one tank had it been possible or necessary. They were very conscious of us having to vent excess pressure (using 'cascade' system for atmospheres) and went to great lenghts to ensure no ammonia vapour was discharged to atmosphere.

Control of cargo rate was very good.

Vessel has to anchor at least three miles off berth to complete cooling.

Notice of Readiness: Was tendered on arrival and again on completion of purging/cooling operations. Cable "Ammoniaship". This was not accepted until secured in the loading berth and ready to load.

Loading: Despite the length of pipe-line from the refinery the product was reasonably cold and they have a recirculating system which enables stopping cargo at very little notice.

Berth operators were quite happy with bottom temperatures only at −32°. Loading rate is quoted at 1,000 t.p.h. but our overall average was only 605 t.p.h. at which the operators expressed themselves as satisfied.

Throughout the whole cooling and loading programme the vessel was under continual close scrutiny from shore personnel. The technical ability of these people was very high indeed (although very fair and practical minded). Pressure graphs and temperatures were checked and noted hourly together with hourly rates.

Redwoods attended as surveyors throughout. Bills of Lading are presented before sailing and are usually claused "Freight Prepaid".

Output of the plant is quoted as about 700 tonnes of liquid per day, but the fertiliser division apparently has first call on product which may result in short loading.

Note: The port office, which is situated at the junction of the "T", is very sensitive to ammonia smells and the personnel there test the atmosphere using Draeger tubes.

Bunkers: Diesel oil taken at this call and vessel has to position under the oil chicksans. This requires shifting ship to or from the loading chicksans.

Bunker suppliers, KNPC, will NOT accept bills signed over Time Charterer's stamp. Ask Owner for permission to sign the bills 'clean' prior to arrival.

General: Shore passes required, available at Immigration office on shore.

Transport is necessary to get from jetty to shore. This is provided on a continual basis.

Alcohol: Customs will allow alcohol to be issued to bars. It is better to arrive with these emptied and ask for an allowance. As usual, it is a very grave offence to offer alcohol to shore personnel.

Fresh Water: Available but none taken.

Medical: There is a medical centre ashore which provides a very efficient service for vaccinations.

General: Service is available for radars and Decca Navigator.

No stores taken.

Items may be landed for despatch to UK after informing the Customs and providing a description of the packages, etc.

Personnel may be repatriated (no alcohol in baggage) and there is a frequent service to UK.

Agents: Kuwait Oil Tanker Company, cables 'Minatank Kuwait'.

In case of emergencies they have an office on the shore which is manned 24 hours. If necessary to telephone UK one has to go to the head office at Ahmadi. Agents usually work Channel 26 VHF.

Departure: About four hours should be allowed for completion of paperwork before sailing. Vessel may leave the berth at night.

AUTHORITY: Director, Shuaiba Area Authority.

AGENT: For dry cargo vessels: International Shipping Agency Limited, POB Safat No. 20637, KIC Building, 1st Floor, Safat Square, Kuwait, State of Kuwait. Tel. 441860 to 441864. After office hours: 313898, 313887, 432663, 512147, 440608. Telex: 2208 (Answerback "ISASHIP KWT") and 2396 (answerback "ISATUG KT"). Cables: "SHIPAGENT, Kuwait").

In the case of tankers agency services are provided by the Kuwait Oil Tanker Company.

SHUWAIKH (Kuwait Harbour): 29.21 N. 47.56 E.

(See Plan Book)

PORT LIMITS: According to the General Port Rules (1959) the Seaward Limits comprise all waters in the area confined by line drawn in direction 000° from Ras Al Ajuza, (Lat. 29° 23′ 27″ N., Long. 48° 00′ 24″ E.) to the parallel of Lat. 29° 30′ 00″ N. Hence in direction 230° to Ras Al Ashairij Lat. 29° 23′ 15″ N., Long. 47° 51′ 00″ E. For the seaward boundaries of the Port within which a vessel is considered to be on "arrived ship", refer to "Anchorage".

DOCUMENTS:

Customs:

2 copies of Crew List and passengers, with their nationalities.
1 copy of Store List.
1 copy of Crew Personal Property List.
Deck Log Book (if vessel calling first time, then all the log books which are available on board).
1 copy of Customs form (which will be given by Customs).

Immigration:

2 copies of Crew List with their nationality.
2 copies of Passenger List (if passengers on board), with their nationality.
All seamen's books or Crew/Passengers Passports.
A certificate signed by the Master, stating that there are no Stowaways on board.

Quarantine:

1 copy of Crew List.
1 copy of Vaccination List.
All Vaccination Books.
1 set Quarantine Forms (which will be given by Quarantine Officer).

Port Clearance:

Ship's Registry.
Load Line.
Safety Equipment Certificate.
Safety Radio Certificate.

Port Surveyor:

Valid Liferaft Certificate (with annual renewal and survey).

Co-ordination Office: The listed documents below, should be handed to the Co-ordination Office, at least 48 hours before the ship's arrival.

6 copies of the Cargo Manifest, 3 copies duly signed by the Agent at loading Port.
1 copy of the Cargo Stowage Plan.
2 copies of Cargo List, in detail.
2 copies of Dangerous Cargo List.
1 copy of Transit List.

Copies of L.C.L. container manifests also required for the container terminal.

PILOTAGE: Pilotage service available and request for Pilot should be made to Port Signals Station, or to look-out Signal Station when in use. Ships proceeding through the dredged channel to Shuwaikh are boarded by the Pilot in the anchorage. Pilotage not compulsory in the outer anchorage.

ANCHORAGE: Ships may take up anchor berth in the outer anchorage, without the Pilot.

Because of congested anchorage, and for the benefit of all concerned, the outer anchorage (BA Chart 1214) was divided in the areas, and the approach waterway of three quarters of a mile in width from Ras Al Ardh to anchorage and vice versa, is left free for navigation.

Ships bound for Kuwait, in order to *discharge their cargo* should anchor in the area marked by the following co-ordinates, and in the depth of water, according to their drafts.

Lat. 29° 25.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 27.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 27.0′ N.	Long. 48° 02.5′ E.
Lat. 29° 25.0′ N.	Long. 48° 02.5′ E.

Ships which have *no cargo* for Kuwait, and calling only for fresh water, provisions, crew changing, transhipments or any other reason, but discharging cargo, should anchor:

North of Parallel 29° 25.0′ N. and East of meridian 48° 03.0′ E.

If mentioned anchorage area described is congested the ship could take temporary anchorage:

North of Parallel 29° 24.0′ N. and East of Meridian 48° 05.5′ E.

But change their position to the area described, immediately as opportunity occurs.

The ship should leave the anchorage immediately after they have received the facilities, and proceed to the anchorage of the Port, they are bound for.

Ships which have received instructions of possibility of berthing in the morning, should change their position to the area reserved, marked by the following co-ordinates:

Lat. 29° 25.0′ N.	Long. 47° 57.6′ E.
Lat. 29° 27.0′ N.	Long. 47° 57.6′ E.
Lat. 29° 27.0′ N.	Long. 47° 58.7′ E.
Lat. 29° 25.0′ N.	Long. 47° 58.7′ E.

When the movement is confirmed the vessel should hoist:

By Day: "G" Flag over a Black Ball or Shape.
By Night: A White Light over a Red Light, visible all round.

Note: (1) The Master shall advise the Harbour Master and/or the Pilot for any damage or disability to the ship under his command, *before berthing.*

Ship unable to comply with the berthing instructions, should notify the Harbour Master in ample time of their inability to do so, by VHF, Visual Signals or via Kuwait Radio:

500 kHz 9 KK 4 – 6381 kHz
450 kHz 9 KK 6 – 8525 kHz

Any ship sailing from the outer anchorage for any reason, should notify the Kuwait Harbour Control that she is sailing and give the reason *and not adhering to any instructions from the Agent.*

The Area North of Parallel 29° 25.0′ N. and West of Meridian 47° 57.6′ E., is reserved for ships of *National Fleet*, who require repairs, waiting for orders, changing the crews, etc.

(2) The Harbour Master may direct any vessel to move from one berth to another, or vacate a berth as circumstances demand.

(3) a. A ship whose turn is defined in the Morning Meeting, and whose Agent is notified, and upon calling her no reply is received shall be prohibited from her turn for *3 days*, and after its elapse will be given another turn.

b. A ship which is defined as a temporary one on the record in the Morning Meeting, and upon calling, is not ready shall be prohibited from taking her turn for *2 days*, after which it will be given a normal turn.

c. A ship which is registered and then sails, if she delays her return for her specified turn for berthing will be prohibited for *15 days*, as delay penalty.

MAX. SIZE: Max. draft at berth Nos. 1 to 14, 31 ft. 6 in., and berth Nos. 15 to 18, and dolphin berths, 26 ft. 6 in. These drafts allow 1.5 ft. of water under the keel. Tidal range is about 2.8 m. (9 ft.). Berthing draft dependent upon tidal conditions at time of arrival, and vessels exceeding 27 ft. have to wait for tide.

HEALTH: Vessels calling at Shuwaikh Port must send the following information to "Health Port Shuwaikh" by cable:

(1) Name of vessel
(2) Last port of call
(3) Health condition Crew members
(4) Validity of Smallpox and Cholera Certificates
(5) Request for Free Pratique

Vessels arriving at outer anchorage must hoist "Q" Flag, and keep it hoisted until Free Pratique is granted.

Free pratique will be granted usually at anchorage, and in some cases alongside, at the discretion of the Quarantine Officer.

No person, except the Pilot, shall board the vessel, before Pratique is granted.

RADIO: *Signal Station:* (Call Kuwait Harbour Control)
There is Lookout Signal Station at Ras Al Ajuza (Lat. 29° 23.3′ N., Long. 47° 59.8′ E.) and a Port Operation VHF/RT Service at the same position. The VHF/RT is a Single Frequency Simplex Service, operating on Channel 13 (156.650 mc/s), 12 (156.600 mc/s) and 11 (156.550 mc/s) working restricted to messages relating to the Movements and Safety of Ships.

All Vessels arriving, should establish contact with either one of these Stations as soon as possible by VHF or Visual Signals:

Tel: 443785, 443788, 443796 and 435873 Telex: 2733

Kuwait Coastal Station (9 KK) operates from 0600 hrs. up to 2400 hrs.

Radio Station:

2182 kHz	8802.4 kHz
2765 kHz	13182.5 kHz
2750 kHz	17328.5 kHz
4434.9 kHz	22699.0 kHz
6518.6 kHz	

Radio Telegraphy – 9 KK:

9 KK	9 KK 2 — 4299 kHz
500 kHz	9 KK 4 — 6381 kHz
450 kHz	9 KK 6 — 8525 kHz
	9 KK 8 — 12895 kHz
	9 KK20 — 12925 kHz
	9 KK22 — 16995 kHz
	9 KK23 — 22304 kHz

For Kuwait: Only English and French languages are accepted, for the other countries all languages are accepted.

Charges per word for Kuwait

Telex: 2230, 3286 and 3771. Tel: 449151, 449154 and 449157

Marine Communications
This Service links the ship directly with their Agent or Principal in Kuwait and the Call for this Branch is "Kuwait Maritime".

The "Kuwait Maritime" Service covers all the ship's calls with Kuwait and abroad.

The procedure is as follows:

Agent to Ship
Call by telephone No. 108 Kuwait Maritime, asking for connection, giving the Name of the Ship, and her Call Sign.

The Kuwait Maritime operator will contact the ship for you on Channel 16 (156.800 mc/s) and then transfer to vessel's frequency for communication.

Ship to Agent or Abroad
Call "Kuwait Maritime" on VHF Channel 16 (156.800 mc/s) and ask to be connected to Agent or abroad.

HARBOUR MASTER'S REQUIREMENTS:
Masters of all vessels calling to Shuwaikh Port (Kuwait) are requested to notify the Harbour Master by cable, 24 hours prior of their arrival via Kuwait Radio, in addition to their ETA and draft, the following:

Ship's Discharging Gear in order (most important).
Cargo which cannot be handled by Ship's Gear (if any).
Any Explosives, Inflammable or Hazardous Cargo.

If such cable is not received a questionnaire issued by the Harbour Master, should be duly filled and signed by the Master of the vessel, prior to berthing, which will be presented by the Ship's Agent, after the "Free Pratique" is granted.

This could cause delays in List Turn.

When approaching "Anchorage" the vessel should hoist the ship's "Call Sign" and "Quarantine Flag".

Masters should advise the Harbour Master of any special damage of disability to the ship under his command before berthing. A ship when entering or navigating the Dredged Channel, shall have both anchors ready for immediate use.

Also see "General".

REGISTRATION PROCEDURE: (To register turn for berth, before proceeding to another Port).

On arrival at Kuwait Anchorage, Master to contact Kuwait Harbour Control by VHF or Visual Signals stating his wish to register.

The vessel should not leave until the registration is confirmed by Kuwait Harbour Control, which accepts registration 24 hours a day.

A stowage plan and manifest must be shown to the Port Authority before Registration.

TUGS: Join vessel entering dredged channel, Tug's lines used. The use of tugs by ships manoeuvring within Shuwaikh port limits under direction of Harbour Master or Pilots. Number of tugs used for each movement: *(a)* 2 tugs for ships exceeding 400 ft. in length. *(b)* 1 tug for ships between 250 ft. and 400 ft. in length.

16 tugs available, 8 of 1,000-2,400 h.p. and 8 of 300-600 h.p. Use of tugs is compulsory.

BERTHING: The present Port consists of 18 deep water wharfs each 190–200 m. long.

14 of these berths have −10 m. depth (B.A. Chart Datum), and remaining 3.35 −8.53 m.

2 dolphin berths with depth alongside of −8.50 m. below B.A. Chart Datum, and capable to take ships up to 185.0 m. in length.

3 shallow berths with depth alongside of 6.71 m. below B.A. Chart Datum, and capable of taking ships up to (1 × 182 m., 1 × 156 m. and 1 × 200 m.).

Ships may under certain circumstances and at the Port Authority discretion, divert to Shuaiba Port, during the congestion periods.

There are 3 basins known as:—

Small Craft Harbour:	431.58 m. × 91.43 m.
Yacht Basin:	76.19 m. × 76.19 m.
Maintenance Basin:	118.86 m. × 82.90 m.

The entrance to Small Craft Harbour and Yacht Basin is 60.95 m., and to Maintenance Basin is 41.45 m.

These Basins are dredged to a depth of −3.35 m., and are used at present mainly by Barges, Tugs, Launches, Yachts, Security Boats and Navigational Aids Craft.

Berth turn is decided at a port meeting, held in the morning on all port-working days. With the exception of the dolphin berths, berthing takes place any hour, day or night.

1. Notification of vessels arrival. According to port regulations a questionnaire issued by the Harbour Master, duly filled in and signed by the Captain of the vessel, is to be submitted to the port prior to berthing. In many cases vessels arrive and obtain berth immediately and thus there is no possibility of presenting the questionnaire to Authorities in time. In order avoid berthing delays Masters should cable following information to the Harbour Master directly, 48 hours before arrival:
   (a) ETA.
   (b) Total cargo for discharging Kuwait.
   (c) Distribution quantity each hatch.
   (d) Declaration hazardous, inflammable and explosives cargo, and guns and ammunition.
   (e) Declaration all vessels winches in good working condition and cargo clear for discharging at Kuwait.
   (f) Draft fore and aft.

We quote below specimen cable covering the above:
"Vessel XXX ETA Kuwait 21/8 0600 local quantity discharging 1,400 tons general hatch one 300 hatch two 300 hatch three 250 hatch four 300 hatch five 250 no hazardous, inflammable explosives guns ammunition stop All winches derricks good working condition draft fore 24 ft. Aft 27 ft.".

The above cable sent to the Harbour Master will facilitate berthing vessel on time. ETA to be reconfirmed before 24 hours, if any change.

2. Vessels with a cargo of up to 400 measurement tons will be given priority alongside pier.
3. Vessels carrying up to 500 tons weight will be given priority to discharge at the buoys providing heavy lifts do not exceed 20 tons, or vessel does not carry reefer cargo.
4. A vessel that intends to stay in the anchorage in Kuwait until her turn will be allowed to shift over-stowed cargo while waiting.
5. Liners carrying cement in bags will still be considered as liner ships. Thus they will not be taken out to wait their turn at the cement berth.

CRANES:

Berth		*3 Tons*	*6 Tons*	*Grain Elevator*

No. 13	General Cargo and Containers	2	1	
No. 14	General Cargo and Ro-Ro	3	1	—
No. 15	Perishable Goods	2	—	—
No. 16	Refrigerated Cargo	2	—	—
No. 17	Refrigerated Cargo and Cattle	2	—	—
No. 18	Cattle and Transhipment	2	—	—

Maximum Loads on Wharves:

Berth No. 1	3 tons per sq.m.
Berth No. 2-8	600 lbs. per sq.ft.
Berth No. 9-18	3 tons per sq.m.
Fishing Piers	1.5 tons per sq.m.

STEVEDORES: All stevedoring and transport inside the port is performed by an authorized contractor.

Container work is handled by Shuwaikh Container Terminal (SCT). There is at present a total area of 193,000 sq.m. allocated to container storage. Plans are under consideration for specialized container berth facilities.

There are three Cement Silos of capacity 14,000 tons each adjacent to berth No. 8. Discharging rate is 350 tons per hour.

Working Hours: 0600-1300, 1500–2230; Overtime 1300-1500, 2200-2400 hrs. Overtime is compulsory for all vessels. On Fridays, only work on vessels which are to be completed during the day.

MEDICAL: Masters to radio prior arrival if medical attendance required on board. Hospital facilities available.

A rescue vessel, 90 ft. and 20 knots speed, equipped with surgery, operating theatre and all medical appliances is maintained by the Ministry of Health.

DENSITY: 1.028 (Winter); 1.036 (Summer).

FRESH WATER: Berths Nos. 1–18 have fresh water connections and water can be supplied by pipe-line. Rate 20/25 t.p.h.

In addition to water available alongside the berths by pipe-line and hose, water may be supplied by water carriers to ships alongside dolphin berths.

FUEL: No coal bunkers are available.

In addition to the full facilities afforded at Mina Al-Ahmadi and Shuwaiba, light bunker fuel oil specific gravity 0.9339 – viscosity 570 sec. (300 t.p.h.), and marine diesel oil, specific gravity 0.8448 (200 t.p.h.), can be supplied alongside the deep water berths Nos. 1 to 7, while vessels are discharging, and provided nomination for supply has been made to K.N.P.C. London Office, B.P. Trading Ltd., or Gulf Eastern Co., London.

Gas oil, specific gravity 6.83, (25 t.p.h.) available on No. 6 and No. 7 berths.

Small quantities of gas oil may be supplied by tanker truck to the berths and lubrication oils are available.

FIRE PRECAUTIONS: Shuwaikh Fire Brigade is responsible for all fire fighting in port areas and storage areas. There is also a fire station situated near the Small Boat Harbour, where the 3 fire fighting tenders are berthed. A salt water main for the fighting services is laid at all berths. There are two 90 ft. fire fighting tenders capable of pumping 5,000 gallons of water per minute from 4 nozzles. In addition they can pump 900 gallons of foam per minute. The 98 ft. fire fighting tender is capable of pumping 9,000 litres of water per minute and 650 litres of foam, and the capacity of her pump is 4,500 litres of water or 143.5 litres of oil. The tender has 8 nozzles for water and 2 nozzles for foam. These modern fire-fighting units are equipped with radio, radio-telephone, radar etc.

DEVELOPMENTS: The first stage of the North East Extension plan will add 9 berths to the existing berths, three of which will be container berths, one for ro-ro ships and the remaining five for general and bulk cargo vessels.

GANGWAY/DECK WATCHMEN: Available, but not necessary in port area.

OPENING/CLOSING HATCHES: Opening and closing of hatches is normally carried out by the stevedores on liners, and by ship's crew on charter vessels.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirit allowance: Alcoholic beverage is strictly prohibited to be held out of bond. Master allowed to keep limited quantity in his cabin.

CERTIFICATES: A survey of life rafts may be carried out unless vessel's safety certificates indicate that life rafts were surveyed less than 12 months previously.

CARGO GEAR: Ship's gear and cranes used for discharging. Slings can be hired from the port.

IDENTIFICATION CARDS: Passport or seaman's book necessary.

REPAIRS: Small repairs can be arranged if sufficient notice is given. Repair facilities available for Gyro, Radar and electronics.

DRY DOCK: Floating dock lifting capacity 14,000 tons (approx. 35,000 d.w.t.). Syncrolift, capacity 2,000 tons.

SURVEYORS: Lloyds Register of Shipping (Kuwait): American Bureau of Shipping (Kuwait); Bureau Veritas (Kuwait); Norske Veritas (Bahrain).

REPATRIATION: Can be arranged. Seamen arriving at Kuwait Airport to join vessels at Kuwait ports can obtain transit visa at the airport, if Agents arrange to submit the necessary guarantee to the Immigration Authorities, confirming that they are in-transit and joining vessels calling at Kuwait.

In order to meet the crew at airport and arrange transit visa, cables confirming their arrivals and flight numbers are to be sent to Agents to reach them at least 24 hours before arrival of crew. Marine Superintendent of Owners, or Owners' Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

AIRPORT: Served by regular airlines. Airport 17 km. from town.

HOLIDAYS: New Year's Day, Id Al Fitr, National Day (February 25), Mount Arafat Day (Wakfa), Id Al Adha, New Hijra Year, Birthday of Prophet Mohammad, Isra walma'raj. The above days are subject to alteration.

No overtime work allowed on holidays and Fridays.

EMERGENCY CALLS:

TELEPHONES: Cannot be arranged on board.

PROVISIONS: All kinds of food available at reasonable prices.

SERVICES: Swedish Welfare for Seamen. Lloyd's Surveyor. Butterworth Tank Cleaning Machines and Equipment and also under-water cleaning.

SHORE LEAVE: Permitted.

GENERAL: The following is required from all vessels calling at Kuwaiti ports for the first time:

> *Quote:*
>
> The Harbour Master Department of the Ports Public Authority, with immediate effect, request that Masters of vessels calling for the first time at Shuwaikh Port should give in their ETA cables, details of cargo on board, the length, width, number and condition of hatches, discharging facilities, and any other information which they may consider necessary in assisting the Ports Authority to allocate the vessels the best berth possible.
>
> Such information will considerably help all concerned and at the same time prevent unnecessary delay and unjustified extra charges to owners, since in the event that the allocated berth is not suitable, the Harbour Master shall have no alternative but to shift that particular vessel to another suitable berth, or take it out to anchorage.
>
> Futhermore, it has been observed some Masters of vessels are not indicating in their ETA cables to the Harbour Master the word "Kuwait" when indicating the tonnage figures of cargo onboard,

clear and ready for discharging. It is imperative that the Master should say in his cable 'ETA . . . hours. Cargo for Kuwait . . . tons clear and ready for discharging draft . . . ft.
Unquote.

REGULATIONS: The State of Kuwait has stringent laws in force concerning the pollution of the sea by oil. The following are two amended paragraphs of this law:

Paragraph 1, Art. 4. "A person responsible for any pollution as described in Articles 1 and 2 shall be punished by a fine of not less than one thousand and five hundred and not more than six thousand Dinars. In the event of his committing a similar crime within a period of one year from the date of his conviction, such a person shall be punished by a fine of not less than three thousand and not more than six thousand Kuwaiti Dinars, and in the event of his committing yet another crime within a year from this last conviction he shall be punished by a fine of six thousand Kuwaiti Dinars".

Paragraph 3, Art. 6. "The person responsible for pollution may suspend the detention order against the ship on payment, as a cash guarantee, of six thousand Kuwaiti Dinars to the official entrusted with the execution of such order."

The Master shall advise the Harbour Master and/or Pilot of any special damage or disability to the ship under his command before berthing or unberthing.

A vessel in outer anchorage receiving a Movement Order in writing, by signal or VHF, and awaiting the Pilot, shall carry:

By day: "G" Flag, over a black ball or shape.

By night: A white light over a red light.

Ships that receive instructions to berth at specified hours and not adhering to these instructions could lose their turn and be liable to pay charges for the time lost at the berth, and facilities arranged for and not used due to such delay.

Ships that receive instructions to unberth at specified hours and not adhering to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities for the incoming ship, and not used, due to such delay.

Ships unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to so do by VHF, visual signals, personally or through Agent.

A ship entering or navigating within the dredged channel or inner basin shall have at least 1 anchor ready for immediate use.

The Master of a ship alongside Shuwaikh wharf or dolphin berth, shall ensure that:

(a) Vessel not allowed to use VHF to any vessel except to call Kuwait Harbour Control or Kuwait Maritime.

(b) A safe and proper accommodation ladder to the quay is provided, adequately lit during the hours of darkness.

(c) A Quartermaster or watchman is stationed on deck, in charge of the ship's gangway, who shall inform the Master or the Duty Officer whenever required by the Port Authority Officials, and shall check that no authorised persons will enter the officer's or crew's accommodations.

(d) The crew or watchman to attend the mooring ropes and lines, and shall cause their adjustment from time to time, as necessary on the rise and fall of the water.

(e) That no substance, matter or material is thrown overboard, either into the water or on to the wharf.

(f) That no engine repairs are undertaken which would prevent the movement of the vessel under her own power, without first obtaining the permission of the Harbour Master.

(g) That all pipe discharges on that side of the ship nearest to the wharf are either adequately and properly covered to prevent their effluent falling on to the wharf, or their use discontinued while the ship remains alongside.

(h) It is forbidden to jettison or ballast other than clean water or pump out the bilges or oil of any description within the port limits.

(i) All ships loaded with petroleum or crude oil at the wharf shall have the end of a steel hawser of sufficient strength, paid out to the water edge, at the offshore bow and quarter, to enable tugs to take the vessel to place of safety with the least possible delay.

(j) The Master shall at all times retain on board sufficient crew to work his ship.

(k) Ratguards to be fixed to all ship's mooring ropes.

(l) The Master shall not shift his vessel while alongside the wharf, prior to receiving permission from the Harbour Master or Berthing Master.

(m) The Master shall not connect water hoses to the water supply points and take water on board before receiving permission from the person in charge of water distribution.

(n) The Master shall report to the Harbour Master or Berthing Master any incident, accident or unusual happening on board his ship.

The Master not complying with the above-stated Port Rules, shall be liable to suffer the penalties prescribed for contravention.

Warning: Port tugs are supplied with nylon and polypropylene hawsers, which require particular attention when securing to ship's bollards, in order that they do not slip. Extra turns than normal on the bollards are recommended.

Ships that receive instructions to unberth at specified hours and do not adhere to these instructions, i.e. retarding the movement of incoming ship, will be liable to pay charges for time lost at the berth and the facilities arranged for the incoming ship, and not used due to such delay.

Ship unable to comply with the berthing or unberthing instructions should notify the Harbour Master in ample time of their inability to do so, by VHF, Visual Signals, personally or through Agents.

Ship's Life Boats:

In the Harbour: It is prohibited to use the ship's boats for transportation or boat-drill.

In the Outer Anchorage: It is permitted to use the ship's boats for transportation, but the crews land *only at Niga's Dhow Harbour* situated in Lat. 29° 22.7′ N. Long. 47° 58.2′ ., and every Crew member must have in his possession a valid passport or seaman book.

TIME: GMT plus 3 hours.

AUTHORITY: Government of Kuwait, Ports Public Authority.

AGENT: International Shipping Agency Limited, P.O.B. Safat No. 20637, KIC Building, 1st Floor, Safat Square, Kuwait, State of Kuwait. Tel. 44186064. After Office hours: 313898, 313887, 432663, 512147, 440608. Telex: 2208 (Answerback "ISASHIP KWT"). and 2396 (Answerback "ISATUG KT"). Cables: "SHIPAGENT" Kuwait.

NOTES

Please also advise Shipping Guides Ltd.

Lebanon

BEIRUT (Beyrouth): 33.54 N. 35.30 E.

DOCUMENTS:

Manifests should be visaed by Lebanese Consul at ports of shipment, or at any port *en route* where there is a Lebanese Consul. If on account of non-existence of Lebanese Consul at ports of shipment or at any of these *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

5 Copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco. (See "Customs Allowance").

For cargoes loaded for Lebanon, there are new regulations concerning documentation as follows:

Original Cargo Manifest to be presented to the Authorities should be rubber stamped and signed by the Customs Authorities at the port of loading.

Copy of each Bill of Lading should be attached to the above Manifest.

A letter from Owners/Charterers indicating the Agents at the respective port.

PILOTAGE: Agent arranges Pilot via Harbour Master. Agent therefore to be kept well informed of ETA, 48 hrs. and 24 hrs. prior arrival. Pilot boat white with red funnel. Sound signals, 2 long and 1 short or contact can be made via VHF to Harbour Master. Pilot boards outside main breakwater. Assistance of Pilot outside daily normal hours, Sundays and official holidays, will be cost calculated at 100% more. Official normal working hours for pilotage station as follows: from 1st October up to 30th April, 0700 till 1700 hrs.; from 1st May up to 30th September, 0700 till 1800 hrs., For tankers outside harbour, the pilotage dues will be 100% extra.

ANCHORAGE: In roads outside breakwater.

RESTRICTIONS: No particular restrictions. Pilot normally available between sunrise and sunset otherwise by special agreement.

MAX. SIZE: Max. draft in port 13 m. No limitation to breadth or length.

HEALTH: Health Authorities board in roads. Health Form obtainable from Agent or doctor. Smallpox and yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for Crew members.

RADIO: Cables via Beirut Radio to and from Agent.

VHF: VHF Channels 13 and 16, Frequency 156.6 and 156.7.

TUGS: Tugs of 1,000 h.p. join vessel inside port when necessary. Ship's lines to be used.

BERTHING: If port congested priority given to vessel already registered. Passenger-tourist vessel and cargo for Army have priority. Harbour capable of berthing 24 ships simultaneously and 3 moored on buoys, discharging into barges. All discharging is by ship's gear.

Dock No. 1: Surrounded by quay Nos. 1, 2, 3. Depth of water varies between 3 and 8 m. Parts of quay No. 1 and quay No. 2 with 3 m. depth of water are reserved for floating units of port company and for launches of Harbour Master and pilotage service. Slipway of 1,000 tons capacity and workshops.

Dock No. 2: Surrounded by quay Nos. 4, 5, 6, 7, with water depths varying between 8 and 10.5 m. On quay No. 5 berthing priority is given to passenger ships, while the other quays are for cargo vessels.

Dock No. 3: Surrounded by quay Nos. 8, 9, 10, 11, with depths varying between 10.5 and 13 m. All these quays can berth ships bringing general cargo. At quay No. 8 of 13 m. depth, priority of berthing is given to grain ships.

Grain Silo: At the present time bulk grain ships are unloaded by means of removable suction machines, which can be installed on the ships and deliver the grain to lorries for direct transport. There is a 60,000 metric tons capacity silo. Ships will be unloaded by means of 2 gantry type suction machines, mobile on rails with a capacity of 6×100 t.p.h. An eventual extension is already designed which would increase capacity of silo to 105,000 tons.

Containers: A ship's Master advises that containers should be loaded on one side of the vessel and vessel berth that side to the berth as crane unable to reach outboard side.

STEVEDORES: Ordered by Agent. No ETA to Stevedores necessary. Working hours, 0800-1200, 1300-1600. Otherwise overtime on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

DENSITY: 1025

FRESH WATER: The port company has equipped all quays with hydrants. Ships moored on buoys can also be supplied with water from cistern barge. By shore installation or by barge. Delivery rate 20/25 t.p.h. Outside harbour double price per barge.

FUEL: Fuel, gas oil, diesel obtainable. 48 hrs. notice required.

FIRE PRECAUTIONS: Special berths for tankers.

DEVELOPMENTS: Discussions about a fourth basin.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners, by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCE: (Tobacco) 40 cigarettes per Crew member (Master 2-3 cartons). Customs very strict, and will search crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port, will be fixed on the basis of 2 packets per crew member, passenger per day and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port - not central Africa; and for 2 months if the vessel last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and, on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call, until arrival at a Lebanese port. That the number of passengers to be taken into account on a tourist vessel, will be the number of berths the vessel can accommodate and not the number of passengers actually on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel at a Lebanese port and not aware of such regulations, and it was found onboard her an excess quantity to the actual one allowed, as indicated above, a Proces Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within 1 month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure on the vessel will be lifted when a Bank Guarantee equalling the amount of fine and dues is placed, or a personal guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled the usual penalties will be inflicted according to the Law.

3. In the event the vessel is aware of such restriction, and for one reason or another, she is carrying an excess quantity, this excess must be, as per official regulations, shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut. Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or Spirits: 1 bottle per crew member. Captain allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used but mobile cranes can be hired. Shore cranes except for mobile cranes only available at quay Nos. 9 and 11. Floating crane of 120 tons available.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and seaman's book to remain in Captain's care.

CONSULS: Most countries have consulates.

REPAIRS: Most types of repairs carried out.

DRY DOCKS: None except for 500/1,000 tonner.

REPATRIATION: Very good facilities for repatriation.

AIRPORT: About 10 km. distant, served by regular airlines.

TIME: GMT plus 2 hrs. Summertime, GMT plus 3 hrs.

HOLIDAYS:

Holidays	*Date*	*Days*
New Year's Day	January 1st	1
Al-Adha (Kurban Bairam)	Varies	2
Ashoura	"	1
New Year (Islamic)	"	1
Arab League Day	March 22nd	1
Good Friday	Varies	1
Easter Monday	"	1
Good Friday (Orthodox)	"	1
Easter Monday (Orthodox)	"	1
Labour Day	May 1st	1
Martyr's Day	May 6th	1
Ascension Day	Varies	1
Mohamed's Birthday	"	1
Assumption Day	August 15th	1
All Saints' Day	November 1st	1
Independence Day	November 22nd	1
Ramadan	Varies	2
Christmas Day	December 25th	1

Port closes completely: New Year's Day, Al-Adha, Easter Monday, Labour Day, Independence Day, 1st day of Ramadan and Christmas Day. On other holidays, day work in port carried out against overtime payment.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 16, Ambulance 18, Fire 17.

TELEPHONES: On request by shipping agency, berthed ships can be connected to telephonic network of city.

SERVICES: Tank-cleaning equipment. Facilities for discharge of tank-washings, compass adjusting, laundry, etc., available.

SHORE LEAVE: Crew allowed onshore.

DELAYS: 1. Unavailability of berth or barges due congestion mainly during Winter months (December to April). 2. Vessel already registered will lose turn if not returned to port in time. 3. Barge ordered for bunkering might be occupied if vessel's arrival delayed.

SHIPMASTER'S REPORT: 1978.

Navigation Buoy: "The buoy off the end of the breakwater has been replaced in approximately the same position as the original buoy. The present buoy is painted green with a 'cone top mark'. Although the buoy is a light buoy the flash was not observed. On no account should the vessel pass between the end of the breakwater and the buoy as rubble is being dumped to extend the breakwater. The actual dumping position is marked.

The local Pilots are now working VHF Channel 16 from the Harbour Office".

AGENT: Gulf Agency Co. (Lebanon) Ltd., PO Box 4392, Ei Arz Street, Modern Building, Beirut, Lebanon. Cable address: "Gacship" Beirut. Telex 20906 (Answerback "GAC 20906 LE") or Athens 216344. Telephones, 296733, 256516. AO 453957.

CHEKAA: 34.20 N. 35.43 E.

Port is used for cement loading and discharge of sulphates.

ANCHORAGE: Safe anchorage in Chekaa Bay.

MAX. SIZE: Draft up to 26 ft. 6 ins. (in calm weather) alongside quay. In event of swell, vessel required to leave quay and anchor in bay.

LOAD/DISCHARGE: 800/1,000 metric tons per 24 hours.

AGENT: See "Beirut".

RAS SELAATA: 34.16 N. 35.39 E.

Port is used for discharge of sulphates and sulphuric acid.
MAX. SIZE: Up to 21 ft. draft (in calm weather) alongside pier which has 2 cranes.

AGENT: See "Beirut".

SIDON: 33.30 N. 35.21 E. (See Plan Book)

GENERAL:
BERTHS NO'S. 1, 3 AND 4 HAVE BEEN TAKEN OUT OF SERVICE AND ALL MOORING BUOYS HAVE BEEN REMOVED. THE SUBMARINE LINE IS STILL THERE.

BOTH THE WHITE AND THE RED SEABUOY ARE MISSING.

OPERATORS: Trans-Arabian Pipe-line Company, Sidon Terminal. The Company transports crude oil from Saudi Arabia via pipe-lines and exports from terminal South of Sidon (Saida). Terminal operates 24 hrs. a day, 7 days a week.
FLAG: All vessels required to fly Lebanese Ensign on foremast during daylight hours. Lebanese flags may be obtained from ship's Agent.
LOCATION: Sidon Terminal is open, unsheltered roadstead, situated immediately North of Zahrani River, about 5 miles South of city of Sidon (Saida), Lebanon. It is approximately 35 miles South of Beirut, and 17 miles North of Tyre.
DESCRIPTION: Terminal's Tank Farm consists of 23 storage tanks situated East of terminal at 360 ft. (average) above sea level. Marine and administrative offices, a laboratory for testing stocks, 2 large and 2 small storage tanks all located within area just above sea level. An "L"-shaped pier for harbouring Company's marine craft extends approximately 1,000 ft. from shore near Southern end of berthing area.
NAVIGATIONAL AIDS: Radio beacon tower located 1,200 ft. back from beach, S.E of moorings. Occulting red light (about 30 flashes per minute) mounted on top, elevation 184 ft. above sea level; position 33° 30′ 04″ N.; 35° 20′ 31″ E. Tower also marked with 2 sets fixed red lights located respectively 45 and 90 ft. below occulting red light. Radio beacon is automatic and operates on 24 hr. basis on frequency of 296.5 kc/s, with "SAD" as the identifying call sign. It will signal 2 times over a 10-second period and then give a constant 1,000 cycle tone for 72 seconds. Tower is of cage-type construction, painted red and white. About 2.5 miles S.W. of terminal sea buoy and approximately 2 miles offshore is rocky shoal with approximately 32 ft. of water over it.

Vessels approaching from Southward should keep offshore until radio beacon tower bears 100° true before hauling-in.

"Sailing Directions for the Mediterranean" (U.S. Navy Hydrographic Office Publication No. 154A Vol. IV) reads in part:

> *"Caution:* As the coast between Saida and Tyre, 20 miles South-South-westward, is bordered in places by rocks and shoal water extending as far as 1 mile offshore, it should not be approached closer than 1.5 miles, nor within depths of less than 16 fathoms."

During darkness terminal range lights and mooring buoy marker lights may be visible. These lights are located inside the restricted area.

A conspicuous water tank (painted aluminium) on a tower located 33° 29′ 27″ N.; 35° 21′ 10″ E., the top of which has elevation of 460 ft. above sea level. Location is seaward of centre oil storage tanks.

There are a number of smaller radio towers to N.W. and S.W. of beacon tower. South of terminal, at Medreco Refinery, is a conspicuous black stack located 33° 29′ 31″ N.; 35° 20′ 08″ E. A little further N.W. from this stack is a tall pipe painted aluminium with a flare on top at 33° 29′ 35″ N.; 35° 20′ 03″ E.
DOCUMENTS:
Health Declaration: International Health Form to be filled out by Master on arrival.
Cargo Manifest: No cargo arrival manifest required, as same usually prepared by local Agent.
Clearance: No clearance required.
Crew List: 4 copies required on arrival.
Passenger Manifest: If any passengers on board.
Store List: 2 copies.
Bonded Store List: 2 copies. Present regulations at Sidon Terminal allow each seaman to retain in his possession a maximum of 40 cigarettes or the equivalent weight of tobacco or cigars. The balance of all smoking items must be collected and carefully listed prior arrival. This list will be checked by Customs before sealing lockers. If any discrepancies, vessel subject to a fine.
PILOTAGE: Vessels to be moored at Sidon will be boarded by Mooring Master of Company within 2 miles to seaward of terminal sea buoy. Mooring Master will advise Ship's Master on approaches to berth, mooring, unmooring, connecting and disconnecting submarine hoses and in all other operations within berthing area. All manoeuvring of ships within berthing area shall be done only in accordance with advice of a Tap-line Mooring Master, subject to the understanding that in all cases and circumstances Master of the vessel being manoeuvred shall remain solely responsible, on behalf of vessel's owner, for safety and proper manoeuvring of vessel. Ship's Master or qualified deck officer must be on bridge at all times while ship is manoeuvring.

Vessels must have a pilot ladder safely and securely rigged, and all vessels over 45,000 d.w.t. should have an accommodation ladder rigged in combination with pilot ladder for safe boarding of Mooring Master and Government officials. Pilot ladder should be abaft and close to accommodation ladder so that Mooring Master, after climbing a few steps, can use accommodation ladder for remaining climb. Since hoses handled on port side at Sidon, it is advisable to rig ladders on starboard side. If at night, adequate lighting must be rigged over-side for Mooring Master to approach side of ship and climb ladder safely.

Note: Vessels having special rigs, such as hoisting equipment on short sections of pilot ladder, are not required to rig pilot/accommodation ladders per the above.

ANCHORAGE: For vessels awaiting berth, good anchorage just W.S.W. of terminal sea buoy in 16 to 20 fathoms, sandy bottom. Vessels should under no circumstances anchor North of terminal sea buoy as depths are excessive for safe anchoring.
MAX. SIZE: Berth No. 2 depth approx. 67 ft. Tankers up to 150,000 d.w.t. or approx. 55 ft. draft are considered max. size which should be handled during Winter months at Sidon, and then only if vessel meets all of below recommended requirements. Otherwise, vessels of over 100,000 d.w.t. should not be nominated for liftings at Sidon during period November-March.

Based on previous experience, sudden and severe storms of long duration are not expected from April through October. Vessels over 150,000 d.w.t. may, therefore be accommodated during this period. However, prior to acceptance of nomination of vessels over 150,000 d.w.t. Tapline requires advance information regarding max. draft, vessel's equipment and location of manifold in reference to distance from stern of vessel which should not exceed 450 ft. Acceptance or rejection will be made after evaluation of above data by Sidon Marine personnel.
Summary of Recommendations for Vessels over 40,000 d.w.t.:
1. Capable, efficient and reliable anchor windlass(es).
2. Fifteen shots on starboard chain – thirteen shots on port chain are satisfactory.
3. Mooring wire winches, 1 on aft well deck, 3 on poop deck, 200 fathoms wire on each, with adequate number of manila or synthetic ropes to double up as needed.
4. Capability of lifting 16 in. hose string – 6.5 tons static weight.
5. Suitably located hang-off bits.
6. Capability of keeping vessel in a reasonable safe ballast condition (November-March) by permanent ballast or loading while deballasting, or a combination of both.
7. Ship's manifold located not more than 400 ft. from stern.

HEALTH: Rules governing quarantine of vessels are same as found in other ports.
RADIO: *(a) Facilities.* Tapline has own ship-to-shore radio telegraph, and VHF radio telephone station at terminal. This station is not open to commercial traffic. Services limited to traffic between Tapline and tankers within 3 days' sailing time from terminal. Messages to or from tanker agents classed as "Commercial" and must be routed via Radio Orient, a commercial radio station. Its call sign is ODR.

Radio Orient Beirut, call sign ODR, transmits (CW) on 8702 kHz and 13101 kHz simultaneously half-past each hour beginning at 0630 until 2130 hrs. GMT, the traffic list; 524 kHz each hour beginning at 0600 hrs. until 2100 hrs. GMT, the traffic list. Listens on 8534–8374 kHz and 12531–12561 kHz for replies and calls each hour from half-past the hour until the hour; 500 kHz 0600 to 2200 hrs. GMT and 425, 454, 468 and 480 kHz from the hour until half-past the hour for replies and calls. Keeps watch only between 0600–2200 hrs. GMT on 500 kHz.

(b) Advice of Arrival. It is important that ships establish radio contact with "ODR" when 3 days distant from Sidon and maintain this contact at regular intervals until just prior to arrival at the terminal. All ships should send a 72-hour ETA message to Tapline, giving the best estimate of ship's arrival time, a statement of bunker requirements and other relevant information. Shorter notice may result in berthing delay. Further ETA messages should be sent when vessel is 24 hours and 12 hours distant and to cover any other time changes occurring in the original ETA or those subsequent thereto. The 12-hour ETA should include a statement regarding "ship's readiness to load" on arrival, and time required to discharge clean ballast after ship is moored. A further contact when 4 hours away is desirable for exchange of weather data and mooring schedule. Vessels failing to give minimum of 12 hours arrival notice may be subject to delays in acceptance.

(c) Ship-to-Shore Communications. Ship-to-shore communications, while ships are in moorings, will be by portable VHF radio units used by the Mooring Master only. The use of the ship's radio station (except Channels 16-14) and/or battery charging equipment is prohibited for safety reasons during cargo transfer operations.

In the event of normal ship-to-shore communications failure, the (ship's) emergency whistle signal should be used.
VHF: Tapline VHF radio telephone system operates on international Channels 14 and 16, 156.7 mc/s and 156.8 mc/s respectively. Channel 16 used to establish contact while all traffic handled on Channel 14. Tapline guards these channels on a 24 hour basis, and contact can generally be made at distances up to 100 miles from terminal. Conversations on these channels will be carried out in English language only.

Mooring Master only will be in direct charge of portable VHF ship-to-shore radio communications.
BERTHING: 7 buoys at berth No. 2. Berths numbered 1 to 4 from South to North. Vessels moored on 1 heading (West) basis using both bow anchors with max. possible spread of anchors to increase ship's anchor beam holding components. Ship's stern moored to cylindrical buoys fitted with release hooks, using 7 ropes (or wires) to respective mooring buoys. Permanent moorings consist of 7 steel cylindrical buoys in each berth.

Certain mooring buoys in all berths fitted with 1.5 in. diameter preventer wires, one end of which is secured to mooring buoys. When required, other end is brought on board vessel by a messenger line after ship moored in position. Preventer wires supplemental to ship's regular moorings during adverse conditions. Ships should have chain stoppers for handling these wires.
BALLAST: Masters are warned that no dirty ballast or bilge water may be discharged within an area extending 100 nautical miles seaward of the Lebanese coastline. All pipe-lines, sea suctions, strainers and pumps that are to be used for the discharge of clean ballast must be flushed clean prior to entering the 100 mile zone. Except for oil retrieved under "load-on-top" procedures, Masters must assure themselves that all oil tanks, pipe-lines and pumps are free of all traces of oil.

The terminal has no facilities for receiving oily ballast. A vessel must have sufficient ballast for safe manoeuvring. However, by carefully watching the weather, especially in the Summer months, by frequent interchange of weather information and berthing instructions, and, by a knowledge of the behaviour of his own vessel, a Master may desire to arrive at the terminal with min. ballast thereby lessening any possibility of infringement of the pollution restrictions of this section, and also reducing time in berth.

As soon as practicable after arrival and prior to acceptance, all the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to a point not less than 100 miles from the coastline and there accomplish the necessary tank cleaning. Any vessel required to return to a position at least 100 miles offshore for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered, and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

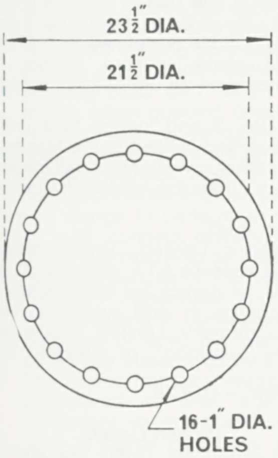
Vessels discharging dirty ballast within the prohibited 100 mile zone may be subjected to action by the Lebanese Government. In addition, ship's owners and charterers will be promptly notified of any violation.

Masters are also warned that ship's garbage or trash should not be dumped within 50 miles from the Lebanese coast.

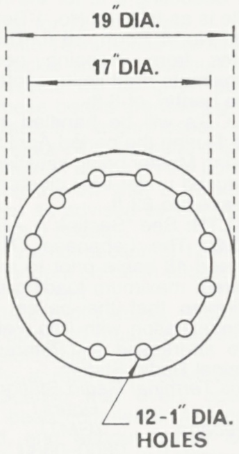
LOADING: *(a) Readiness:* Tenders to load will normally be accepted and berths assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time, carry clean ballast and are in all respects equipped and ready to moor. In event berthing delayed on account weather, vessels will ordinarily keep their loading priority in order of arrival. Vessels required to leave port area on account of weather (port closed), should keep in contact with terminal via VHF in order that they will be available when weather moderates. Company will make every effort to load vessels on arrival, or as promptly as berth is available, weather permitting. Notice of readiness will not be accepted unless vessel ready to load. Arrival time will be considered as time Mooring Master boards vessel underway or time vessel anchors, whichever occurs first.

(b) Connecting-up. Ships loaded by means of submarine pipe-lines. Weight of the 16 in. hose in No. 2 berth about 6.5 tons. Hoses lifted by ship's gear on port side. Detail of flange templates shown in drawings below. Ships should provide manifold fittings to allow connection of flanges shown.

DETAIL OF 16", 12", 8" & 6" HOSE CONNECTIONS FROM SUBMARINE HOSE TO SHIP



16" FLANGE TEMPLATE
150# A.S.A. RATING
In use in Berth 2 only



12" FLANGE TEMPLATE

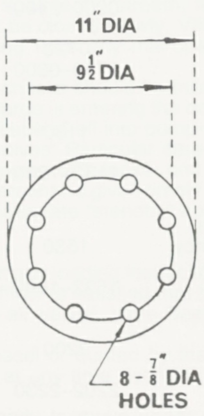
8" FLANGE TEMPLATE
150# A.S.A. RATING



6" FLANGE TEMPLATE
150# A.S.A. RATING

Mooring Master advises ship's personnel in lifting, connecting, disconnecting and lowering of hoses. A ship's deck officer must be present, and must direct ship's crew in all hose handling. There must be sufficient crew on deck to perform this work.

(c) Rates: Loading is by gravity flow from tank farm which is approximately 360 ft. above sea level. Loading rates as follows (approximate maximum):

	Rates (BPH)	
Berth	*With 1 Hose*	*With 2 Hoses*
2	40,000	70,000 (16 in. hoses)

Order save ship's time and to ballast vessel as quickly as possible, as well as to make berth available for others, it is requested that ships receive oil as fast as it can be delivered, with due regard for safety. The removal of any restrictions, such as strainers, etc., is recommended.

MEDICAL: Neither medical nor hospital facilities provided by Tapline. Private doctors and hospital facilities available at Sidon and Beirut. Agents acquainted with situation and can make necessary arrangements.

If unable make radio contact, then vessels requiring emergency medical assistance should hoist International Code Flag "W" in daylight, and at night, send "W" (·– –) on blinker light to attract immediate attention, the same signal "W" (·– –) should be given on ship's whistle in either day or night hours. Signal should be repeated until acknowledged visually by either another ship in berth; from shore station or from Company launch. As soon as signal is received, terminal officials will advise ship's Agent as soon as possible of the emergency medical aid required.

DENSITY: Salinity of the sea is same as open Atlantic Ocean. Temperature ranges from 60°F. to 85°F. (15.6°C to 29.4°C.) depending on season.

FRESH WATER: Not available.

FUEL: Bunker fuel loaded at rate of 3,000–5,000 b.p.h. through 8 in. deck hose. Bunker connection should be located near ship's cargo manifold. Ships calling at Sidon to load crude oil should arrange for bunker fuel nominations through one of the offtaker companies well in advance of arrival. Bunker fuel will not be delivered until Tapline has received a firm nomination. Bunker fuel will be loaded as promptly as circumstances permit, but Tapline assumes no liability for any delays incurred by a vessel in berthing or loading bunker fuel. Maritime lubricants available, through marketing representatives in Beirut by arrangement through Agents.

PRECAUTIONS: *(a) Valve Control.* Ship's valves must not be closed against the oil stream.

(b) Emergency Signal. When, and if normal ship-to-shore communications fail, the emergency signal to stop oil flow will be a continuous blast on ship's whistle, until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations in all berths will be shut down until communications can be established with vessel giving the signal. For this reason, it is requested that ships in the area refrain from using their whistles for other purposes.

(c) Readiness to Leave Berth. Port is considered an "open roadstead", and under no circumstances may engine be shut down for repairs while ships moored in submarine berths. Vessels in submarine berths must be able to clear, and shall clear immediately upon advice of Mooring Master. Ship's engine and gear must therefore be ready at all times with full power for immediate use.

(d) Loading and Deballasting Simultaneously. Properly equipped vessels will be encouraged to discharge clean ballast and load oil simultaneously. This capability is especially necessary during unsettled weather order keep vessel reasonably ballasted.

REPAIRS: No facilities.

CONSULS: Two consulates at Sidon, one Italian and one Norwegian. Consular or diplomatic representatives for most nations maintain offices in Beirut.

OFFICIALS: Lebanese officials, such as Customs Director, Quarantine Officer, Immigration Officer, Captain of the Port and Police, stationed at Sidon. Should Customs guards be stationed on board while in berth, it is expected that ship will provide food for these guards and other officials.

SHORE LEAVE: Arranged between Agent and Lebanese Security Officer aboard vessel. Ship's personnel (other than emergency or medical cases) not allowed to disembark at terminal. All personnel going ashore must land at Sidon where small boats must cross a shallow and sometimes impassable bar. Delays have been caused to vessels whose personnel have been unable to rejoin their ship. Sufficient personnel must be aboard at all times for letting go lines so that vessel can clear berth whenever required.

GENERAL: *(a) Mooring Wires and Winches.* Use of mooring wires to powered drums for all vessels calling at Sidon is strongly recommended. Because there are no mooring tugs available, a ship's ability to moor during marginal weather conditions is dependent upon its ability to warp itself into position. Vessels with capable wire winches and deck mooring equipment that are able to place 1 or 2 mooring ropes on a windward mooring buoy, usually able to moor without difficulty. Vessels over 40,000 d.w.t. should have mooring wires to powered drums, 1 on aft well deck and 3 on poop deck. The wires should be 200 fathoms in length and so secured as to be easily let go from ship if necessary.

(b) Ropes. Vessels should have 2 suitable, best quality mooring ropes of 200 fathoms each located on aft part of after well deck for use on either port or starboard side, 3 (min.) suitable, best quality mooring ropes of 200 fathoms each and 3 additional ropes of 150 fathoms each on poop deck plus properly located warping winches and bitts. Vessels equipped with mooring wire winches on poop deck may reduce required "additional" ropes accordingly. Wires are not used on port side of aft well deck due to possible fouling of wire with hose or pipe-line underwater facilities. In this position a suitable, best quality mooring rope must be used. 2 ropes of 200 fathoms each recommended, to be used on either side while mooring, and used on port side only for securing ship in berth.

AUTHORITY: Trans-Arabian Pipe-line Company.

AGENTS: Gulf Agency Co. (Lebanon) Ltd., Sidon, Lebanon. Cables: "Gacship", Sidon. Tel. 720715. AO 453957. Telex: 20906 Beirut or Athens 216344.

For communication and operational reasons address all your correspondence and cables to head-office in Lebanon: Gulf Agency Co. (Lebanon) Ltd., POB 4392, Beirut, Lebanon. Telephones: 256516, 296733. Cables: "Gacship", Beirut. Telex: 20906 (answer back: GAC 20906 LE.) or Athens 216344.

TRIPOLI: 34.28 N. 35.49 E. (See Plan Book)

(a) DRY-CARGO PORT.

Manifests should be visaed by Lebanese Consul at ports of shipment or at any port *en route* where there is a Lebanese Consul. If on account of non-existence Lebanese Consul at ports of shipment or at any ports *en route* the manifests are not visaed, then such consular visa dues are collected at Beirut.

Non-Liner vessels calling at Tripoli, are to present on arrival to the local customs' authorities, one copy of each manifest of cargo on board (even "IN BALLAST" manifests), DULY STAMPED AND SIGNED by the Customs' Authorities at the Loading Ports.

Otherwise, the vessel is subjected to a Customs' FINE.

DOCUMENTS:
1 Legalised copy of Cargo Manifests.
5 copies of Cargo Manifests.
2 Store Lists.
5 Passenger Lists.
2 Lists of Cigarettes and Tobacco (see "Customs Allowances").

In addition to documents listed, 2 copies of each Bill of Lading are to be handed over on arrival to the Agents, for Local Customs' Authorities control and check.

PILOTAGE: Agent arranges with Harbour Master, therefore keep Agent closely advised ETA. Harbour Master may also be contacted on VHF Channel 13 (frequency 156.6) and 16 (frequency 156.7).

ANCHORAGE: Good anchorage.

MAX. SIZE: Depth at entrance 22.5 ft. Max. draft alongside berth 22 ft. 6 in.

HEALTH: Health Authorities board in roads. Health form obtainable from Agent or doctor. Smallpox and yellow fever certificates required for ships coming from Far East and Red Sea. Owners should check with Agents respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.

RADIO: Cables via Beirut Radio to and from Agent.

BERTHING: New pier about 600 m. length. 2 berths. 4 shore cranes suitable for vessels up to about 7,000 tons only. 2 heavy-lift cranes, capacities 25 and 50 tons. Lighters available for discharging alongside vessel. Ship's gear often used for discharging.

STEVEDORES: Ordered by Agent. No ETA to stevedores necessary. Working hours, 0800–1200, 1300–1600, otherwise overtime included on Sundays and on official holidays.

MEDICAL: Master to advise Agent by cable prior to arrival if medical attendance required.

DENSITY: 1025.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: For liners by stevedores, otherwise per agreement.

CUSTOMS ALLOWANCES: Tobacco. 40 cigarettes per crew member. Customs very strict, checking crew cabins. Regulations are as follows:

1. That the quantity of tobacco to be allowed on board vessels upon their arrival at a Lebanese port will be fixed on the basis of 2 packets per crew member, passenger per day, and to be calculated on a maximum period of 4 months, if the vessel emanates from an American, Asian or African port – not Central Africa; and for 2 months if the vessel's last port of call is in Europe, Central Africa or Mediterranean, which will be deducted from the quantity, and on the same basis the consumption by the crew members and passengers during their trip, and this to start from the last port of call until arrival at a Lebanese port.

That the number of passengers to be taken into account on a tourist vessel will be the number of berths the vessel can accommodate and not the number of passengers on board. As to cargo vessels, the actual number to be accounted for will only be the crew members and the Master of the vessel.

2. In the event that it is the first call of the vessel, at a Lebanese port and not aware of such regulations, and it was found on board her an excess quantity to the actual one allowed, as indicated above, a Proces Verbal will be established for the excess quantity found and the cigarettes placed under seal. An undertaking is also to be obtained from either the Owners and/or her Agents to the effect that they will submit a certificate, within one month, to be issued by the relevant Customs Authorities of the next port of call of the vessel after a Lebanese port. While the seizure of the vessel will be lifted when the Bank guarantee equalling the amount of fine and dues is placed, or a Personal Guarantee from the Agent – if solvable – and in the event that the undertaking is not fulfilled, the usual penalties will be inflicted according to the law.

3. In the event the vessel is aware of such restriction, and for one reason or another she is carrying an excess quantity, this excess must be, as per official regulations, be shown on the manifest legalised and issued at the last port of call touched by the vessel prior to Beirut.

Any excess found over and above such declaration will be considered as smuggling and the law will be applied.

Wine and/or spirits: 1 bottle per crew member; Captain allowed 3/4 bottles.

CARGO GEAR: Ship's gear to be used. A floating crane maximum lift 50 tons is available.

IDENTIFICATION CARDS: Shore pass given to each crew member. Passport and seaman's book to remain in Captain's care.

CONSULS: Most countries have consulates in Beirut.

AIRPORT: Beirut.

TIME: GMT plus 2 hours. Summertime, GMT plus 3 hours.

HOLIDAYS:

Holidays	*Date*	*Days*

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O. Box 2576, Customs Street, Tripoli, Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 600101, 600102, 600146, After hours 601515. Telex: 20906 Beirut or Athens 216344. Head Office: Beirut (which see).

(b) OIL TERMINAL.

OPERATORS: Lebanese Oil Installations, Tripoli.

DOCUMENTS: See "Section A – Dry-cargo Port".

PORT LIMITS: There are three spar-buoys to indicate the limits of the Company's Sea Terminal boundaries.

The location of these buoys is as follows:

1st,	Lat. 34° 30′ 03″ N.	Long. 35° 52′ 30″ E.
2nd,	Lat. 34° 29′ 42″ N.	Long. 35° 52′ 26″ E.
3rd,	Lat. 34° 29′ 03″ N.	Long. 35° 51′ 04″ E.

PILOTAGE: The company's Mooring Masters will meet tankers 2 miles N.E. of Tripoli Breakwater Head. Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

ANCHORAGE: Good anchorage immediately W.N.W. of No. 4 sea berth buoys.

MAX. SIZE: Least depth of water available in berth, and swinging circle, after deducting 6 ft. for the height above sea bed of the sea line and cradle is as follows: No. 1 Berth, 62 ft.; No. 2 Berth, 66 ft.; No. 3 Berth, 53 ft.; No. 4 Berth, 38 ft. The swinging circle is defined as 1.5 ship's lengths from dropping position of ship's inshore anchor. The approximate draft limits quoted are based on an under-keel clearance, in the berths, of 6 ft.

VLCC's will be handled in Berth No. 2 and loaded to a draft of 60 ft. During the period April to October, and subject to the Master and Mooring Master being satisfied that weather conditions permit loading to a reduced under-keel clearance of 4 ft., then the loaded draft may be increased to 62 ft.

HEALTH: See "Section A – Dry-cargo Port".

RADIO: The Lebanese Oil Installations Limited, Tripoli, must be informed 48 hours prior to arrival of a vessel's ETA, quantity of cargo required, maximum loading rate, SWL of derrick for lifting hoses and confirming that the ballast for discharge in port waters is clean. Communication with Iraq Petroleum Company, Limited, should be by cable addressed to "Petriraq, Tripoli, Lebanon", or direct to Tripoli Terminal Radio Station.

Tripoli Terminal Radio Station. Call Sign – ODC 8.

Waveband	*Hours (GMT)*	*Watch Details*
High Frequency	0800–0830	ODC 8 Broadcast Traffic List and calls ships on 8514 kc/s. Listens on 8354–8374.
	1200–1230	Will transmit on 12831 kc/s. on request.
	1600–1630	
	2230–2300	
Medium Frequency	0000–2400	Monitor 500 kc/s. for calls and answers only.

	2232	Broadcast call QSY QSX 500 kc/s.

Cables to Agents may be routed through Beirut radio.

VHF: Tripoli:

Equipment:	Fixed Station sited in Terminal Building and used by Control Room.
Call sign:	Tripoli Control
Range:	Approximately 15 miles.
Frequency:	Transmitting on 163.6 mc/s. Receiving on 159.1 mc/s.
Watches:	Continuous.

Mobile Station

Equipment:	Portable, battery operated, carried aboard vessel with Mooring Master.
Call sign:	Ship's name (before mooring), or Berth No. (after mooring).
Range:	Approximately 8 miles.
Frequency:	Transmitting on 159.1 mc/s. Receiving on 163.6 mc/s.
Watches:	Continuous, whilst Mooring Master on board.

Notes

1. Tripoli also keeps a continuous watch on the international calling frequency of 158.8 mc/s. This has a range of approximately 15 miles and its call sign is "Tripoli Control".
2. The VHF System is not connected to the main telephone switchboard and only selected shore stations have access to it.

TUGS: There is no tug at Tripoli.

BERTHING: *Sea Line Berths.* 4 berths numbered from N.E. to S.W. specifications as follows:

Berth No.	*Max. t.p.h.*	*Fixed Sea Line*	*Strings of Flexible Hoses*	*Approximate Limits Draft*	*Deadweight*
1	5,000	2×24 in.	2×16 in.	56 ft.	140,000
2	7,000	1×32 in.	2×16 in.	50 ft.	250,000
3	6,000	1×32 in.	2×16 in.	47 ft.	87,000
4	1,500	2×12 in.	2×12 in.	32 ft.	25,000

As loading is by gravitation, the maximum rates are dependent upon availability of suitable shore tanks and loading lines.

LOADING:

1. *Readiness to Load,* will be received by the Mooring Master, who is the Company Representative on board. The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

2. *Derricks*

(a) Two hoses are connected on the port side amidship.

(b) Derricks or cranes reaching over the hose connection should be capable of lifting the flexible hose from the sea-bed to a height of up to 30 ft. above the deck.

(c) A minimum SWL of 5 tons is required for 12 in. hoses.

(d) The faster loading berths equipped with 16 in. hoses are available only to vessels with derricks and tackle with a minimum "Safe Working Load of 7 tons". Such vessels will be given berthing priority when queuing occurs and these berths are free but other vessels have not the capacity to handle the larger hoses.

3. *Hose Hang-off Bitts* are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on the port side.

4. *Hose Connection/Disconnection.* Ship's crew with a responsible officer in charge to perform all operations as advised by the Mooring Master, to lift, connect, disconnect and lower hoses.

5. *Ship's manifold* – to be prepared for the connection of 12 in. or 16 in. hoses with flanges of 150 series, dependent on berth allocation.

6. *Loading – Supervision and Commencement*

(a) All operations in connection with starting of loading, discharging, switching of tanks on board and topping-off must be directly and personally supervised by a responsible ship's officer.

(b) The advice from the vessel that she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading.

Caution: The oil loading stream to the ship is controlled on shore and it is extremely dangerous if a ship's valve is closed against the flow of oil.

To prevent excessive pressure from surge in ship and shore lines, ship's valves must not be shut-off against the stream, and when switching tanks, ship's valves must be closed slowly. Vessels will be held liable for damages resulting from any mal-operation of valves on board.

7. *Tank Dips.* During loading frequent checks should be made by the responsible ship's officer to ensure that cargo is entering the designated cargo tanks only and that there is no escape of oil into pump-rooms or through sea and overboard discharge valves. Particular care must be exercised by ship's personnel in "Topping-off" tanks and towards completion of loading to ensure that the terminal is given timely advice of any decrease in loading rate required. Adequate "standby" notice must be given before the final "stop".

8. *Loading Operations*

(a) The Mooring Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

(b) Loading rates requested by the vessel or quoted by the terminal will be the peak or maximum rate at any time during the loading period.

(c) While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repair should be carried out while in berth which would immobilize the ship or impair her fire-fighting efficiency.

Failure to vacate the berth on completion of loading may result in delays to other vessels, demurrage, and loss of throughput which shall be accountable to the vessel.

(d) The Mooring Master will advise the Master of the ship as to any signals needed for local requirements.

(e) The Mooring Master brings a portable radio on board for ship to shore communication.

DENSITY: 1025.

FRESH WATER: May be available at anchorage before berthing, but it is expensive.

FUEL: Fuel oil is available at Berths 2 and 3. The 12 in. bunker hose is raised on the port side of the vessel. Bunkering rates are 300 to 400 t.p.h.

CUSTOMS ALLOWANCES: See "Section A – Dry-cargo Port".

GENERAL:

1. *Ballast*

(a) Vessels should arrive with sufficent clean ballast for safe handling of vessel under prevailing weather conditions.

(b) Ballast water must be clean and a declaration signed by the Master and delivered to the terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

(c) *Pollution of the sea – warning.* It is an offence to discharge dirty ballast or pump out bilges. The authorities are very strict and your attention is drawn to the Lebanese Notice to Mariners No. 23/1 of 29th July 1965, and to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil", issued by IMCO London.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and port fines shall be borne by the vessel.

It is recommended that vessels carry an adequate amount of dispersants with means of application in case of oil spills.

2. *Gear to be provided by the ship*

(a) Anchor to be fitted with marker buoys and 20 fathoms line.

(b) 4 good mooring lines of not less than 150 fathoms each and of suitable size for the vessel. 2 additional 150 fathoms lines securely tailed to the first lines for cases where 150 fathoms may not reach to the stern buoys initially.

(c) For vessels of 50,000 d.w.t. and larger, powered mooring winches with 200 fathoms of wire rope.

(d) 4 suitable rope stoppers to be available aft.

(e) 2 good chain stoppers for use on 5.5 in. circumference wires (preferably carpenter's patent stoppers).

(f) 2 good 4.5 in. circumference boat ropes 200 ft. long placed one on each side of the vessel.

(g) 2 good ropes, 15 fathoms × 3.5 in. circumference and 2 heaving lines for lowering hoses.

3. *Lighting.* Manifold and poop mooring areas should be adquately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

4. *Deck Watch.* A deck watch must be maintained at all times the vessel is in berth. In addition to its normal duties, the watch must inspect the hose connections and area around the ship against oil spillage, pollution, and prevent unauthorised persons from boarding your vessel.

5. *Boarding of vessel.* The control of persons boarding your vessel is the ship's responsibility. Boarding should be restricted to Company employees on duty and to persons authorised by the Port Authorities as advised by your Agents.

6. *Stores/Provisions* or other items should not be received or discharged whilst loading is in progress. Launches other than the Company's mooring launch, should not lie alongside the vessel.

7. *Tanker Safety.* Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

8. *IOTTSG Safety Check List.* The Tanker Safety check list must be completed after inspection of each item prior to commencement of and during loading. The Mooring Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

9. *Action in case of Emergency.* In the event of a fire, oil spillage or other emergency on the vessel,

The Emergency Signal is:—

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

AGENT: Gulf Agency Co. (Lebanon) Ltd., P.O. Box 2576, Customs Street, Tripoli, Lebanon. Cables: "Gacship", Tripoli/Lebanon. Telephone: 600101, 600102, 600146 after hours 601515. Telex: 20906 Beirut or Athens 216344. Head Office: Beirut (which see).

Leeward Islands

BASSETERRE, St. Kitts: 17.18 N. 62.43 W.

(See Book Plan)

DOCUMENTS:

3 copies of Crew List.
3 copies of Passenger List.
1 copy High Duty Cargo List.
1 copy Crews' Personal Effects List.
1 copy Clearance from last port.
2 copies Ship's Stores List.
7 copies Manifest.
2 copies Bills of Lading.

PILOTAGE: No pilotage required.

ANCHORAGE: Harbour at Basseterre is an open roadstead and safe anchorage will be found at a distance of 0.25 to 0.5 mile from the shore opposite the piers in the centre of the town.

RESTRICTIONS: None.

MAX. SIZE: A vessel of any size may be admitted. Anchorage position will depend on the draft of the ship.

HEALTH: The Harbour Master boards all vessels on arrival at port and inspects the clearance from the last port. If there are no health problems the vessel is immediately granted pratique. If there is suspected disease or fever on board pre-notification is recommended. If this is done the Harbour Master will have a Medical Officer with him when he boards the ship on arrival.

RADIO: Contact is through Barbados Radio, call sign 8PO.

TUGS: Not needed.

BERTHING: Ships anchor off shore or if max. draft does not exceed 10 ft. vessel may berth at the 450 ft. long cargo pier.

CRANES: 2 ton lift, mobile (Neal); 5 ton lift, mobile (link-belt); 10 ton lift, mobile (Jones).

All cranes used on cargo pier for offloading barges ferrying cargo from ship to shore.

STEVEDORES: ETA should be advised 24 hours before arrival of vessel, also tonnage to be discharged and number of gangs required. Discharging rate: 15 tons per gang per hour on bags. 6 tons per gang per hour on general cargo.

MEDICAL: Advance notice if possible – hospital facilities available. Valid Vaccination Certificate for passengers disembarking but not for intransit or cruise ship passengers.

DENSITY: No tides. Density normal for a West Indian Island.

FRESH WATER: Not available.

FUEL: No bunkering facilities.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: Half pound tobacco or 200 cigarettes. Wine and/or Spirit, 1 bottle.

IDENTIFICATION CARDS: Not needed.

CONSULS: Netherlands, France, Dominican Republic.

REPAIRS: The sugar factory has a well-equipped shop for machine, welding and maintenance work. They can assist with most engine repairs.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: 2 miles from town with regular daily connections to Antigua and Puerto Rico where onward passages to Canada, the U.S.A., Great Britain and Europe can be arranged.

TIME: GMT minus 4 hours; no alteration.

HOLIDAYS: New Year's Day (January 1st); Statehood Day (February 27th); Good Friday; Easter Monday; Whit Monday; Queen's Birthday (date fixed by announcement annually); August Monday; Prince Charles' Birthday (November 14th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Police 999; Fire 999; Ambulance (Hospital) 2515.

TELEPHONES: None available.

DEVELOPMENTS: A deep-water berth with accommodation for roll-on/roll-off container vessels will be completed in 1981.

AUTHORITY: Comptroller of Customs.

AGENT: S. L. Horsford & Co. Ltd., PO Box 45, Basseterre, St. Kitts, W.I. Cable address: Horsford, St. Kitts. Telex: 822 HORSFD SKB KC. Tel. Shipping Manager, Office 2616, Home 2101; Secretary, Office 2429.

St. JOHN'S, Antigua: 17.7 N. 61.52 W.

(See Plan Book)

PORT LIMITS: All the waters enclosed by an imaginary straight line running due West from Weatherill's Point forming the Northern boundary by an imaginary straight line running due North from Shipstern Point forming the Western boundary and by the coast line running from Weatherill's Point to Shipstern Point forming the Eastern and Southern boundaries.

DOCUMENTS:

4 Passenger Lists.
1 Customs Declaration.
1 Declaration of Health.
4 Copies of Manifest.
Port clearance from previous port.
3 Copies of B/L.
1 Copy Crew Personnel and Curio List.
Fumigation and Deratisation Exemption Certificate to be shown.

PILOTAGE: Compulsory. Messages should be received by Agents 48 hours in advance. Pilot boat may be identified by pilot flag.

Pilot boards at entrance of channel if vessel is proceeding to Deep Water Harbour. If vessel proceeding to Oil Berth, Pilot boards 2 miles North of Sandy Island.

ANCHORAGE: Area between Fairway Buoy, South Warrington Buoy and No. 1 Channel Buoy. Approximately 7 cables N.N.W. of Pillar Rock Light. Depths 40–45 ft. Anchorage for vessels up to 54 ft. 2 miles N.E. of Sandy Island.

RESTRICTIONS: (a) No vessel is permitted to berth alongside before permission to do so is given by the Port Authority or unless such vessel is under the command of a Pilot.

(b) Tidal variation is negligible.

(c) Channel is 8,000 ft. long and 300 ft. wide.

(d) Draft restriction is 32 ft. at berth.

MAX. SIZE: Vessels of any size, but with a maximum draft of 45 ft. can anchor at the outer harbour. At berth maximum draft is 32 ft.; length of dock 1,200 ft.; and turning circle 1,200 ft. diameter.

HEALTH: Pratique given at berth. Suspected infectious diseases must be notified to Port Health Inspectors in advance of vessel's arrival.

RADIO: Cable and Wireless (W.I.) Ltd. via Barbados Radio 8PO.

VHF: Port Authority maintains watch on Channel 16 during normal working hours. Watch is also maintained by Pilot and tugs on Channel 16 one hour before ETA of any vessel. Tugs use Channel 6 during berthing operations.

RADAR: Nil.

TUGS: Two harbour tugs, each with 1,500 h.p. engines. Tugs join vessel in approach channel. Tugs lines normally used. No charge.

BERTHING: Three berths on pier of length 1,200 ft.; maximum permissible shipdraft 32 ft. in salt water; loading or discharging can be done either by shore equipment or by ship's own gear.

CRANES: Two 75-ton cranes are available for use in the port; these can be supplied by local contractor. Port owns one 10-ton crane. All three cranes are mobile.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO-HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: 48 hours notice is required to arrange gangs. Average load or discharge rate is 10 tons per hour.

MEDICAL: Agents should have at least 24 hours notice should medical attention be required. Hospital facilities are available and can be arranged by either ship's Agent of Port Authority.

TANKERS: At Oil Refinery Pier several product pipe-lines of 10, 8, 4 in.; one 16 in. crude line; one 3 in. fresh-water line; 35 ft. mean low water, acceptable draft 32 ft. (deeper draft subject to marine terminal approval). At Seabuoy one 10 in. Bunker C line, one 16 in. crude line; 5 mooring dolphins secure vessel in position. Acceptable draft 43 ft. No slop residue discharge facilities available.

DENSITY: 1025.

FRESH WATER: Available at Deep Water Harbour. Also at Oil Refinery pier and by barge, but only in conjunction with bunker fuel deliveries.

FUEL: All grades of marine fuel available at the marine pier. Also available at the sea buoy and by barges at Deep Water Harbour.

FIRE PRECAUTIONS: (a) No open fires nor smoking are allowed near the open hatches or in the hold in which flammable or dangerous goods are stored, or at the place of discharge of shipment.

(b) No person may set off or ignite any flare, rocket, explosive device, firework or make any bonfire or barbecue in any port area other than for emergency life saving or ship safety purposes, unless permission has been granted by management.

CONSULS: American, Norwegian, Dutch, French, Danish, Swedish and Venezuelan.

REPAIRS: All types of deck, but only minor engine repairs are possible.

DRYDOCK: None.

SURVEYORS: Lloyds and ABS.

GANGWAY/DECK WATCHMEN: Services of watchman absolutely necessary.

HATCHES: Opening and closing normally carried out by ship's crew.

CUSTOMS ALLOWANCE: 1 carton of cigarettes, 1 bottle liquor.

CARGO GEAR: Loading and discharging effected both by shore and ship's gear, but mainly by shore gear.

REPATRIATION: Facilities exist for effecting crew changes and arranging for necessary repatriation.

AIRPORT: Airport is 4 miles from the Deep Water Harbour, and is served by such international airlines as Eastern, Air Canada, B.W.I.A., B.A., L.I.A.T., Prinair, Air Guadeloupe, etc.

TIME: Local time is GMT minus 4 hours. No adjustments made to clocks during the year.

HOLIDAYS: 1st January; Good Friday; Easter Monday; Labour Day (1st Monday in May); Whit Monday; 1st Monday and Tuesday in August (Carnival); State Day (1st November); Christmas Day; Boxing Day; Queen's Official Birthday which is either the 1st or 2nd Saturday in June.

POLICE/AMBULANCE/FIRE: Respective telephone Nos. 20125-6-7-8; 20251-2-3; 20044.

TELEPHONES: Arrangements exist for placing telephones on board.

SERVICES: No special services exist e.g. tank-cleaning equipment, discharge of tank washings, compass adjusting, etc. However, arrangements can be made to carry out these services.

SHORE LEAVE: Crew members are permitted to go ashore; there are abolutely no restrictions.

IDENTIFICATION CARDS: Not necessary to show identification cards. However, may be called upon to present seaman's book should the occasion warrant it.

REGULATIONS: Users of the Port should be acquainted with Port Authority Act and Port Regulations. Copies of these can be purchased at the Government printers.

DELAYS: Delays due to unavailability of berth are very infrequent. However, during the months of December to April, 24 hours delay can be expected.

DEVELOPMENTS: A new container marshalling area of three acres is presently under construction and should be completed in the second half of 1980.

AUTHORITY: Antigua Port Authority, St. John's, Antigua.

Liberia

COURTESY FLAG: Masters of vessels should check with the Pilot the correct times for raising and lowering (0600 – 1800 hrs.) the courtesy flag as heavy fines are imposed if raising and lowering is carried out at the wrong time. It is also advisable to carry a spare courtesy flag aboard the vessel.

BUCHANAN: 05.54 N. 10.04 W. (See Plan Book)

DOCUMENTS:
1 copy Clearance from last Port of Call.
1 copy Health Declaration.
6 copies Number of Passengers.
6 copies Cargo Manifest (even in ballast).
6 copies Crew List.
3 copies Store List (ship).
3 copies Personal Effects List.
1 copy Vaccination List.

PILOTAGE: The ship shall be considered to have arrived at Port of Buchanan when she cuts a circle with a 3 nautical miles radius from the beacon on the main breakwater head (Fl "G" 3-sec.). Lamco provides pilotage. Pilot boarding approximately 1.5 miles off the main breakwater, bearing 095°/110°. Pilot to be provided with a clean and safe ladder on the lee side.

ANCHORAGE: If waiting for Pilot, anchor 2 miles off main breakwater on bearing 090° – 110°, 1.5 m. – 2.5 m. off main breakwater (South).

RESTRICTIONS: Harbour traffic hours – towage and pilotage (ore ships), 0000–2400 hrs. General cargo ships (tankers), 0700–2300 hrs.

MAX. SIZE: See "Bulk Handling Facilities".

RADIO: Dakar Radio, and on ship's telephone working frequency if stated in sailing telegram from last port of call. Buchanan Harbour will call on 6520 kHz 4 days before ETA at 0830 hrs. GMT, or when within 200 miles call Buchanan Harbour on 2182 k/c at 0800 hrs. GMT. Communications with ore ships per HF, call 2182 k/c. Traffic, 2638 k/c, 2738 k/c. VHF, call Channel 16. Traffic, Channel 9, 12 and 14.

HEALTH: Customs, health and passport inspection normally takes place at the berths. Quarantine signal must not be hauled down before "Free Pratique" is received. If diseases are suspected on board contact the Port Authorities or Agents by radio for instructions. After call at other Liberian ports where free pratique has been granted, Port Health will also board here.

TUGS: Lamco provides towage with two tugboats 1,640 h.p. and one tugboat 3,300 h.p. Tugs join vessel about 0.5 mile North of red buoy.

BERTHING: Number of berths for sea going vessels, 4. Length of quays, 2,800 ft. with 50-100 ton bollards and properly fendered. Depth of 33 ft. at commercial quay (at MLWS).

BULK HANDLING FACILITIES: *Deep Water Basin at Buchanan Ore Loading Quay.* With the completion of the deep water basin at the Ore Loading Quay the water depth alongside the quay is increased from 12.95 m. to 14.00 m. below the zero level of the General Elevation System.

The required keel clearance is still 3 ft. for ships up to 125 ft. beam. The max. permissible draft alongside the quay is thus:

$$14.00\text{ m.} - \frac{(\text{Beam in feet } 0.3)}{123}\text{ feet} + \text{tide}$$

Tidal range:
MHWS = +1.18 m. above zero level of the General Elevation System
MLW = +0.05 m. above zero level of the General Elevation System
MLWS = +0.15 m. below zero level of the General Elevation System

Because of the necessity to save a rock shelf to support the sheetpiling of the cells when blasting and dredging the deep water basin, new fenders have been installed at the quay in order to keep the bilges of the vessels well clear of those rocks. The new fenders have a diameter of 1.20 m. against 0.55 m. of the old fenders. A ship loaded to maximum permissible draft can have a list of 5° without touching the rock slope but since she would touch the bottom with a list of about 3° such lists will not be tolerated.

Height of Shiploader: 16.5 m. above the water level at MHWS. A 2.0 m. safety margin is normally sufficient. Maximum shiploader outreach (including throw) from the new fenderline is 22.8 m. whereby a max. 43 m. wide vessel can be loaded. Loading rate 6,000 t.p.h.

It must be clearly understood that the sailing drafts are unchanged. The width of the deep water basin is only 60 m. It gives however, the great advantage of being able to continue loading without stopping for low water, whereby loading can often be completed 12 hours earlier than without the deep basin.

An even greater advantage is probably the increased safety, should a large ship develop engine trouble after she has exceeded the former maximum permissible low water draft, in which case operators have no alternative but to pull vessel out at HW as "dead ship" which could very easily result in a major accident with enormous economic consequences. Now operators can let vessel remain alongside over the next low tide without any risk.

STEVEDORES: As early as possible advance notice of ETA required latest by 1500 hrs. on day preceding arrival if a weekday. Or Saturday before noon if arrival on Sunday. Shore working hours: Ore handling: Monday 0700 hrs. through Sunday 0700 hrs.: general cargo handling, 0700–1200 hrs., 1230–1500 hrs., overtime 1500–2300 hrs., and 2300–0700 hrs.

MEDICAL: Hospital and medical care is provided; advance notice should be given in serious cases. Smallpox, yellow fever and cholera vaccinations are compulsory to enter the Republic. Vaccination book is required.

TANKERS: One tanker berth for discharging only. Hose connections are: 6 in. and 10 in. Max. draft 30 ft.

DENSITY: Varying but around 1020/25.

FRESH WATER: Fresh water is available, ex-quay only, rate is 20 t.p.h. Subject to availability.

FUEL: No bunker facilities available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Performed by stevedores.

REPAIRS: No commercial facilities available. In cases of emergency Lamco might assist with minor repairs.

CUSTOMS ALLOWANCES: Direct sales from ships are strictly forbidden.

IDENTIFICATION CARDS: Not required.

CONSULS: Swedish Vice-Consul only; however, most countries are represented either by Embassy or Consul at Monrovia.

REPATRIATION: Can be arranged.

AIRPORT: Roberts International Airport about 1 hour ride by car; several connections to the rest of the world.

TIME: GMT; no alterations during the year.

HOLIDAYS: January 1st; January 7th; February 11th; Second Wednesday in March; March 15th; Second Friday in April; May 14th; July 26th; August 24th; First Thursday in November; November 29th; December 1st; December 25th. Special holidays as proclaimed from time to time by the Liberian Government. No work will be performed on January 1st, July 26th and December 25th.

GENERAL: Two Customs officers stay on board the ship during ship's entire stay and they should be given meals in the Officers' Mess and if necessary night quarters.

POLICE/FIRE/AMBULANCE: No phone available; however the Lamco Plant Protection Force should be contacted; one officer is normally assigned to each quay/gate.

SHORE LEAVE: Apart from South African and Rhodesian citizens, who are not allowed ashore, no restrictions.

DELAYS: Generally, no major delays have occurred. For ore carriers and tankers the tide may occasionally involve 24/36 hours waiting time depending on the size of ships expected to load: general cargo ships: no delay.

AUTHORITY: Port Operators: Lamco J. V. Operating Company.

AGENTS: All ore carriers must employ LJVOC as their Agent.
Other vessels:
Scanship (Liberia) Inc., PO Box 19, Buchanan, Tel. 321055. Telex via Monrovia 4281.

MONROVIA: 06.20 N. 10.50 W. (See Plan Book)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists or Statements "Nil" if none aboard.
2 Manifests for Customs. This should state ballast if no cargo aboard.
4 List of Ports of call from commencement of voyage with date of calls.
1 International Health Declaration.
1 List of dates of smallpox, yellow fever and cholera vaccination.
4 Store Lists.
2 Crew Custom Declarations.
Immigration now stamp all seamen's discharge books or passports.
2 Livestock Lists.

PILOTAGE: Pilot is compulsory. Pilot ordered through local Agent. 24 hours or minimum 12 hours notice of ETA by Radio Telephone on 2182 kcs. Pilot instructs ship through signal tower or direct on VHF Channel 16.

Pilot comes out from inside breakwaters by pilot launch, displaying "H" flag and "Pilot" in large black letters on side of the launch. Pilot will inform ship by VHF which direction to proceed to meet the pilot launch. Vessels should always keep clear of the Fairway Channel, as very large bulk carriers sail on deep draft.

ANCHORAGE: Good unlimited anchorage space available on roadstead S.W. of Leading Line, from 7 to 10 cables from Southern breakwater end, depth 7 to 10 fathoms. Anchorage safe but subject to moderate South-westerly swell during rainy season, April to October.

RESTRICTIONS: Pilot service is day and night. Loaded oil tankers berth in daylight hours only. Deep loaded vessels i.e. 40 ft. draft and over are restricted to tide for berthing and sailing. Maximum draft for main ore piers is 45 ft. Vessels up to 860 ft. length can be accommodated at these piers. No restriction on beam except that carriers with beam in excess of 126 ft. may experience difficulty in loading with present loading gantries. Bulk carriers of 90,000 tons d.w.t. and over will berth only in daylight hours.

MAX. SIZE: See "Restrictions" and "Berthing".

HEALTH: Vessels entering must fly International Code flag "Q". Port Health Officials board upon berthing. Pratique automatic for vessels having cleared at other Liberian ports, but vessel must still clear Customs.

RADIO: The Freeport of Monrovia maintains a continuous listening watch on HF 2182 kc/s, and VHF Channel 16. Vessels are to call Freeport 24 hours or minimum 12 hours, giving ETA before arrival. Cables should be routed to Agents through Government radio station, ELC or via French Cables through Dakar or Abidjan.

TUGS: 3 tugs of 1700 h.p. available. Join vessels just inside breakwater entrance. For berthing, tug lines used; for sailing, ships lines often used. One additional tug, 3,000 h.p. is available.

BERTHING: Ships are discharged by their own gear. Mobile cranes of up to 40 tons are available.

Vessels loading at the Iron Ore Piers are limited to a maximum draft of 45 ft. and sail from 2 hours before high water up to HW. However, ships over 90,000 tons will sail from 2 hours before HW up to 30 minutes before HW. Vessels proceeding to the Bunker Pier are limited to a maximum draft of 32 ft. Tankers discharging at the Crude Oil Berth are limited to 38 ft. draft and a maximum length of 700 ft. Tankers at this berth moor by means of two anchors and starboard side to the breasting dolphin with the stern fast to the mooring dolphin. Discharge is by means of submarine and floating pipe-line connected to the starboard side midships. Fishing Pier has a 90 ft. wide channel and maximum draft of ships berthing there is limited to 16 ft. and maximum length of 240 ft. The main General Cargo Pier is 2,000 ft. long, and vessels up to 625 ft. in length can be berthed. The maximum permissible draft at this pier is 30 ft., at which draft vessels will berth on the tide, that is 2 hours before HW till HW.

STEVEDORES: Several stevedoring companies. Port Authority handles all cargo on shore and accepts cargo ex-ship's hook only.

Stevedores gangs have to be ordered the day before required, therefore essential for Agents to receive ETA messages in sufficient time.

MEDICAL: Whenever possible Masters should cable Agents if require medical attention especially when arriving week-ends or during night. Hospital facilities available. Port Health require smallpox and yellow fever vaccinations for crew members.

TANKERS: See "Restrictions" and "Berthing".

DENSITY: Density varies with the tide. Also varies during rainy season as river flow increases. Varies from 1009 to 1024 oz. per cu. ft. with average of approx. 1019 oz. per cu. ft.

FRESH WATER: Available only on marginal wharf and three Iron-ore Piers by means of hoses from shore. Average rate of delivery approx. 20 t.p.h. Water also available at the LRC Pier.

FUEL: Light diesel oil and heavy fuel oil available and these can be blended to specification by supplying oil company. Fuel and diesel only available on bunkering pier.

GANGWAY/DECK WATCHMEN: Private security men are engaged by the Agent. Port security also maintain regular patrol.

OPENING/CLOSING HATCHES: Normally done by stevedores.

CUSTOMS ALLOWANCES: Tobacco, reasonable quantities for consumption while in port. Wine and/or Spirit, as tobacco.

IDENTIFICATION CARDS: Not required, but seamen's books are endorsed aboard by Immigration.

CONSULS: Majority of foreign countries have Consuls.

REPAIRS: Limited deck and engine repairs can be carried out by private companies.

DRY DOCKS: One very small floating dock capable of lifting 300 tons with max. draft of 8 ft. This dock is used for small coastal craft and only accepts very limited outside work. There is also a synchrolift of about 250 tons, owned by private fishing company.

REPATRIATION: Repatriation of crews is possible.

AIRPORT: Roberts Field International Airport 45 miles distant. Served with daily international flights to Europe and America.

TIME: GMT.

HOLIDAYS: Many official holidays during year but cargo work carried out those days on overtime rates. Port closes 3 times a year: 26th July (Independence Day), Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Port Authority have own Security Force and Fire Service, situated in port area. There is also an ambulance service.

TELEPHONES: There are no facilities for telephones on board.

SERVICES: Hull, deck and engine surveys can be obtained through Lloyd's, German Lloyds, B.V., Norske Veritas, America Bureau Agents and most of the other classification societies.

SHORE LEAVE: No restriction on shore leave.

AUTHORITY: National Port Authority.

AGENT: Scanship (Liberia) Inc., PO Box 209. Tel. 21646, 22832. Telex 4281 and 4344. Cables: "Scanship Monrovia".

SINOE: 04.59 N. 09.03 W.

DOCUMENTS:

1 copy Health Declaration
2 copies Store Lists
2 copies Vaccination Lists
2 copies Cargo Manifests
1 copy Clearance Last Port
2 copies Crew Declaration Forms
1 copy Stowaway List
5 copies Crew List
5 copies Kroo Boy List — if any onboard
4 copies Ports of Call
4 copies Narcotics Lists
4 copies Passenger Lists
4 copies Animal Lists
4 copies Arms/Ammunition Lists

PILOTAGE: Not compulsory but recommended, and NPA Pilot available. No night pilotage. On approach Agent or Sinoe Pilot can be contacted by VHF Channel 16/2182 SSB Radio. Pilot boarding 1.5 miles off the harbour. No official Pilot Boat available but Pilot using small tug belonging to Scanship.

ANCHORAGE: Anchorage can be obtained in a depth of 7 fathoms about 8 cables West of Blubarra Point — bottom mud and sand.

MAX. SIZE:

Main Pier: Up to 400 ft.LOA – 24 ft. forward and aft.
Up to 450 ft. LOA – 24 ft. aft and 21 ft. forward.
Small Pier: Up to 180 ft. LOA – 14 ft. Draft.
Basin: Up to 500 ft. LOA – 25 ft. Draft.

HEALTH: Boarding party including Port Health Officials clear vessels while still in anchorage. Even when a vessel has called at another Liberian Port prior to Sinoe Port Health still boarding.

RADIO: Monrovia Radio.

VHF: See "Pilotage".

TIDES: Average 4 ft.

TUGS: 1 NPA tug 600 h.p. and 2 Scanship tugs 180 h.p. and 220 h.p. respectively.

BERTHING: Alongside Pier only 1 ship of max. length 400 ft. plus a small vessel of up to 175 ft. can be accommodated. Salt water only. Cargo handling to be carried out by vessel's own gear, however, NPA mobile crane available max. 10 tons capacity .

BULK CARGO FACILITIES: Cargo handled-forestry products only i.e. logs, boules, sawn timber and plywood.

SPECIALISED CARGO HANDLING: Only equipment available for handling forestry products plus a very limited quantity of general cargo plus rubber.

STEVEDORES: Advisable to cable number of gangs workable, 24 hours prior of arrival. Vessels working full capacity gangwise are loading per 24 hours 500-1,000 cu.m. depending on type of forestry products and whether loading in basin or alongside.

MEDICAL: Medical facilities available to a very limited extent. All normal vaccinations possible. International vaccination card required.

TANKERS: Only facilities for small coastal tankers of max. LOA 180 ft. available moored alongside main pier.

DENSITY: Pure Salt.

FRESH WATER: Small quantities can be supplied by the NPA tugboat only.

FUEL: Small quantities of Diesel can be obtained but it is not advisable to rely on supply.

CONSULS: Nil.

REPAIRS: No facilities.

DRY DOCK: No docking facilities.

SURVEYOR: Nil, but surveyor can be called from Monrovia.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

HATCHES: Opening/closing normally carried out by crew.

CUSTOMS ALLOWANCES: 200 cigarettes/1 bottle spirits per crew member, but depending on duration of stay.

CARGO GEAR: Always by ship's gear.

REPATRIATION: Possible through Monrovia Airport (Robertsfield). Small airstrip 5 miles from Sinoe Harbour with daily connections to Monrovia by small charter planes or small planes operated by Air Liberia.

TIME: GMT.

HOLIDAYS: Only days where no work can be carried out are 24th August and 25th December.

POLICE/AMBULANCE/FIRE: NPA has ambulance and limited fire fighting equipment.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Vessels deemed unfit by NPA (derricks lifting capacity too low in the opinion of the Authority, or in an apparent poor condition, etc.) might be refused entry to port. This especially applies when a congestion is faced at Sinoe, and it is feared by the Authority that such a vessel is unable to handle an acceptable daily tonnage.

During 1976 several vessels have been rejected by NPA on the above grounds.

DELAYS: During the rainy season a heavy swell running into the harbour is frequently encountered, causing mooring lines to part, forcing vessel alongside to shift to the basin/roads awaiting more favourable conditions. Hurricane hawsers recommended.

GENERAL: Vessels should not expect to be able to purchase provisions at Sinoe apart from a limited variety of tinned foods.

AUTHORITY: National Port Authority.

AGENT: See 'Monrovia"

NOTES

Please also advise Shipping Guides Ltd.

Socialist People's Libyan Arab Jamahiriya

GENERAL: All ports:

CLEARANCE: ETA to be advised to Port Authority 24 hours before arrival, including the following information: Ship's Name, type, Nationality and port of Registry; Owner, Master and Agent names; Gross and Net tonnage; Ship's length and draft forward and aft; Expected duration of stay in the port; Last port of call, tonnage, quantity and kind of cargo for discharging and loading; Full details of any dangerous liquids or cargo; Number of passengers and crew; Health situation.

Before arrival at the outer limits of the port, vessel requested to hoist the following signals: Flags of her call-sign; Flag of Quarantine; Flag of ship's Nationality; The Libyan Flag on the foremast; Red Flag during daylight and Red light during night-time, if carrying explosives or any inflammable cargo; Pilot Flag and the international flag code signals must be respected.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boat will meet ships outside the harbour. Ships should wait for Pilot at anchor outside the harbour if weather is good. In case of bad weather, after getting permission from Harbour Master ships may enter the harbour at their own risk and anchor inside.

TUGS: Tugs are available at all Libyan Ports.

HEALTH: The following documents to be provided for the doctor: A valid Fumigation Certificate; International Vaccination Certificate for every person on board; Health Certificate for any animal or bird on board. No automatic free pratique between the Libyan Ports.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member or passenger. All kinds of alcoholic drinks are forbidden, even wine and beer, and to be kept in the store under the customs seal. Also arms, perfume, saccharine and all kinds of anaesthetic. The sum of 10 Libyan dinars allowed for each crew member. All Libyan and Foreign currency to be declared in the currency declaration. All personnel effects and electronics to be declared in the crew declaration.

BLACK LIST: Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour will be liable to heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

DOCUMENTS: *On arrival:* Last Port clearance; Full sets of cargo documents; Copies covering consignment; Certificate of origin; Bills of Lading, etc. 8 copies of Crew List; 8 copies of Passenger List; 7 copies of Cargo Manifest; 3 copies of Cargo Plan; 1 copy of Crew Declaration; 1 copy of Currency Declaration; 1 copy of Store List.

During the first 24 hours of arrival: Valid certificates to comply with all the International conventions in force for the State whose flag the ship is flying. Certificate of Registry. For the National ships, moreover, the official log book, engine log book and ship's articles.

REGULATIONS: Foreign currency not to be taken ashore. Crew members visits between ships are not allowed without the prior permission of custom and immigrations. Ship's lifeboats are not to be used within harbours limits without the prior permission of the authorities. No engine repairs to be carried out in port whilst alongside or at anchor in the port without prior permission of authorities. Movements of ships in the port are not allowed without instructions. Using ships propellers whilst in port is not allowed without permission. Ships whistles not to be used without good reason. Cleaning funnels or making smoke whilst in port is strictly forbidden. Ship's gangway to be in position at all times whilst alongside. Rats guards to be fixed all times on every rope. Painting or scraping the outer hull of the ship not to be carried out without prior permission of authorities. Duty officer to be on board all the time accompanied by sufficient crew.

For tankers or vessels laden with dangerous cargo; moreover, the mentioned hereabove: Red flag to be hoisted in daylight and red light to be on in the night-time. No movements allowed between sunset and sunrise for such ships. Electricity to be off from ships holds whilst loading or discharging. Towing wires with suitable shackle to be ready fore and aft. Smoking and any kind of fire are strictly forbidden on deck. All steps for safety to be carried out.

POLLUTION: Pollution of any kind is strictly forbidden. Any ship causing any kind of pollution will be liable to heavy fine.

BERTHING PRIORITY: The berthing priority scheme, according to law, as follows: 1) Passenger ships. 2) Animal ships. 3) Liner and mail ships. 4) Cargo ships. 5) Tankers and dangerous cargo ships. Ships with cargo of less than 300 tons, may not have to comply with the scheme; subject to Harbour Master's decision.

OPENING/CLOSING HATCHES: To be done by crew.

IDENTIFICATION CARDS: Seaman's book or Discharge book, Passports, Identity Cards — all should be valid.

HOLIDAYS: Friday is the weekly day off. Revolution day (1st Sept. yearly); Evacuation days (28th March, 11th June, 7th October; yearly), Syrian Revolution day (8th March, yearly); Sudanese Revolution day (25th May, yearly); Egyptian Revolution day (23rd July, yearly); Hijra New Year (1st Moharam, Muslim year); Ashoura (half day, 10th Moharam, Muslim Year); Mohammadan birthday (12th Rabih Awel, Muslim Year); Israa Wa Merag (half day, 26th, Rajeb, Muslim Year); Eid El-Fitr (1st, 2nd & 3rd Shawal, Muslim Year); Eid El-Adha (9th, 10th. 11th, & 12th Zi Al-Heja, Muslim Year).

TIME: Local time at all the seasons is GMT plus 2 hours.

SURVEYORS: The following addresses are Agents for the mentioned Classification Societies and may be contacted for the necessary surveys on request:–

Lloyd's Register of Shipping: P.O. Box 111115 Tripoli. Telephone: 74383. Telegraphic Address: LLOYDSREG Tripoli Libya.

Bureau Veritas: Tripoli: Orfelli Agencies, 109 – 1st September Street, P.O.B. 2283, Telephone: 35338 and 37398, Telegraphic address: Shetaf Tripolilibia.

American Bureau of Shipping: Tripoli: Libyan Arab Shipping, Baghdad Street, Andalus Building, P.O.B. 882, Telephone: 41712 and 39358, Telegraphic Address: Arabship Tripolilibia, Telex 20033 Arabship.

Germanischer Lloyd: Tripoli: Johs Rieckermann, Baghdad Street, Andalus Building, P.O.B. 2121, Telephone: 37021 and 31069, Telegraphic address: Rieckermann Tripolilibia.

Registro Italiano Navale (RINA): Tripoli: Mr. Mahmoud Gamar, c/o Libyan Arab Shipping Co., Baghdad Street, Andalus Building, P.O.B. 2325, Telephone: 41712 and 39358, Telegraphic address: Gamarin Tripolilibia.

MINE FIELDS: The following areas are prohibited area and dangerous for navigation due to mines:

1)	32° 52.78′ North	& 13° 24.6′ East
	32° 57.67′ North	& 13° 24.46′ East
	32° 57.67′ North	& 13° 18.00′ East
	32° 53.82′ North	& 13° 22.30′ East
2)	32° 53.70′ North	& 13° 20.61′ East
	32° 55.93′ North	& 13° 18.00′ East
	32° 55.93′ North	& 13° 15.00′ East
	32° 54.45′ North	& 13° 15.00′ East
3)	32° 37.00′ North	& 23° 13.00′ East
	32° 14.50′ North	& 23° 31.00′ East
	32° 10.50′ North	& 23° 28.50′ East
	32° 37.50′ North	& 23° 7.50′ East

ATTENTION: It is imperative that vessels contact the wireless stations on the Libyan coast at a distance of 30 miles from the proceeding port, giving the ship's position. Ships winches and cargo gear should be in good order otherwise they will be liable to heavy fine if any delay occurs.

FLOATING DOCK: See "Tripoli".

AUTHORITY: General Ports and Lights Authorities, Tripoli

AZZAWIYA: 32.48 N. 12.42 E.

Also refers to General All Ports.

LOCATION: Azzawiya Oil Terminal is situated about 50 km. West of Tripoli.

PORT LIMITS: Vessels are considered to be an "Arrived Ships" and (subject to charter party terms) lay time will commence, when the ship is approximately 2 miles off the S.A.L.M. berths.

DOCUMENTS: Masters are advised to have the following documents prepared before arrival in order to expedite ship's clearance:

(a) Crew List.
(b) Customs documents.
(c) Health documents.
(d) Bills of Lading.
(e) Ship's papers and certificates.

PILOTAGE/APPROACHES: Vessels are advised to anchor in a position 1.5 miles (NW) North West of S.A.L.M. Berth No. 1 to await Pilot and Agent/Customs clearance. Vessels must keep clear of the area deemed to be the pilotage area and not approach the berth closer than 1 mile without receiving Harbour Master's permission. Admiralty charts indicate an anchorage symbol in position:

Lat. 38° 49′ 00″ N. Long. 12° 42′ 00″ E.
and Flare symbol in position:
Lat. 32° 47′ 25″ N. Long. 12° 42′ 00″ E.

Azzawiya Oil Terminal is adjacent to the flare. Tankers are warned that it is unsafe to remain at anchor during adverse weather conditions and to keep to northward of Lat. 32° 50′ N.

While at berths, tankers must have main engines ready for immediate use at all time. Sudden, and violent changes of weather may occur at any time, and vessels may be required to leave berths at very short notice. Pilot and service craft are available during day hours only until further notice.

RESTRICTIONS: Vessels must have sufficient ballast for safe manoeuvring and must not be trimmed more than 3 ft. by the stern.

If in opinion of the Marine Superintendent or the Mooring Master, the ship has insufficient ballast, she may not be allowed to berth.

The discharge of dirty ballast is strictly prohibited.

HEALTH: Local Authorities will board vessels to grant pratique. Vessel must report any suspected disease or fever to local Health Authorities. There are shore facilities to treat serious injuries or major accidents.

RADIO/VHF: Call sign: "Azzawiya Control".

Azzawiya Control keeps 24 hours watch on Channels 16 and 22.

Vessels approaching the anchorage area must give the following information when possible:

(a) Ship's name and flag.
(b) Cargo nomination (if available).
(c) Distance between ships rails and manifold.
(d) Manifold sizes and derrick capacities (S.W.L.).

Cargo transfer is carried out through VHF Channel 12 and/or Storno Walkie Talkie radios as the situation may require under the Mooring Master's Supervision.

Tankers should have the port derrick rigged before berthing and capable of lifting 10 tons if nominated for S.A.L.M. berths and 7 tons for C.B.M.2.

BERTHING: There are 3 off-shore berths with the following descriptions:

1 Conventional buoy mooring berth: Named C.B.M. No. 2 (Clean product berth). Lat. 32° 48′ 07″ N. Long. 12° 42′ 52″ E.

Vessels will lie in this berth on a heading of 318° (T) approximately. Using 2 anchors, each with about 7 shackles in water. Depth of water 21 m. approximately. Size of vessels allowable for this berth is 5,000–20,000 d.w.t. The berth is 1,200 m. offshore.

2 S.A.L.M. Berths: (Single anchor leg mooring) for crude imports/fuel exports.

S.A.L.M. No. 1: Buoy is moored approximately 1,900 m. offshore with an average depth of 26 m. in position:

Lat. 32° 48′ 29″ N. Long. 12° 41′ 55″ E.

The berth is designed for vessels of 10,000 to 100,000 d.w.t. but not limited on size.

S.A.L.M. No. 3: Buoy is moored approximately 1,500 m. offshore with an average depth of 30 m. in position:

Lat. 32° 48′ 23.8″ N. Long. 12° 41′ 08.7″ E.

The berth is designed for vessels of 15,000 to 140,000 d.w.t. but not limited to the above mentioned sizes.

No lights have been installed as yet to mark C.B.M. No. 2.

S.A.L.M. berths No. 1 and No. 3 are each equipped with a radar reflector and navigation light installed on the buoy deck with the following characteristics:

Colour: 1 white, 1 amber.
Code: Each transmitting morse letter "U" every 12 secs.

On all these berths, hose connection is carried out by ship's crew under Mooring Master's supervision.

GENERAL: No shore leave. No crew changes for non Libyan flag vessels. Fire and Safety regulations will be strictly enforced at all times. No fuel, diesel, fresh water or supplies available. Lifeboat not to be lowered in water.

BENGHAZI: 32.06 N. 20.03 E.

Also see "General" before first Port.

PORT LIMITS: The water area existing within the actual breakwater and that which may fall within any new breakwater eventually constructed up to the bridge across the shallow water basin at the Eastern side.

b) The water area known as the navigational channel outside the harbour commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of 1 mile (2 km.).

RESTRICTIONS: Vessels are not permitted to enter harbour between sunset and sunrise.

MAX. SIZE: All types of ships with 27 ft. draft and less in Wintertime and 28 ft. and less in Summertime are safe to enter the harbour.

RADIO: Benghazi Port Radio, from 0800 to 1800 hrs., call sign 5AV, R/T 2182 V.H.F. Channel 16.

BERTHING:

Quay No.	*Length m.*	*Depth m.*
1	310	9
2	280	9
3	170	9
Libya No. 1	40	5.5
Libya No. 2	130	5.5
Libya No. 3	115	5.5
F.J. No. 1	135	5.5
F.J. No. 2	135	5.5
F.J. No. 3	135	8

Note: F.J. No. 3 not in use at the present time.

STEVEDORES: All stevedoring operations and formalities to be done by Agent, 2 stevedoring companies will be formed in the near future.

CRANES: Electric floating crane available up to 100 tons.

MEDICAL: All facilities available.

FRESH WATER: Available by barge and alongside. Should be obtained from Port Authority through ship's Agent.

FUEL: Available through Agents. A notice of 48 hours needed, advisable for Chief Engineer to check what grades are available.

REPATRIATION: Facilities exist without difficulty.

AIRPORT: Benina airport situated 29 km. away.

DEVELOPMENTS: Port extension project expected to be decided in the near future.

WATCHMEN: Compulsory, provided by Port Authority.

CONSULS: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, Syria, U.K., U.S.A., U.S.S.R.

REPAIRS: Minor repairs are possible. Also see "Tripoli".

POLICE/AMBULANCE/FIRE: Police 99, Ambulance: 2131, 2132, 2281, Fire: 5555, 5599.

SHORE LEAVE: Allowed after free pratique, Custom and Immigration formalities completed.

AUTHORITY: Port Manager and Harbour Master.

DERNA: 32.45 N. 22.40 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing within the actual breakwater and an imaginary line connecting the end of the breakwater and the damaged breakwater existing at the Southern side.

b) The water area known as the navigational channel outside the harbour commencing as from the harbour entrance for a distance of 1 km.

RESTRICTIONS: Vessels are not permitted to enter harbour between 2100 and 0600 hrs.

MAX. SIZE: Depth of Inner Bay – 8 m., Entrance – 9 m. and Outer Channel 10 m.

RADIO: Recommended that radio messages for Agents be sent via Malta Radio or any other near coast station.

BERTHING: Old Quay, Length 120 m., depth 6 m. New Quay, length 240 m., depth 9 m.

STEVEDORES: All stevedoring operations and formalities to be done by Agent. Two new companies will be formed in the near future.

TANKERS: Max. size 18,000 d.w.t. Max. draft 11.5 m. if weather conditions permit.

MEDICAL: Available.

FRESH WATER: Available alongside, to be supplied by Port Authority through ship's Agents.

FUEL: Available through Agents, a notice of 24 hours needed. Advisable for Chief Engineer to check what grades are available.

REPATRIATIONS: Available via Benghazi.

DEVELOPMENTS: Port extension project under construction.

WATCHMEN: Compulsory, provided by Port Authority.

CONSULS: Nearest consuls situated at Benghazi.

REPAIRS: Not available. See "Tripoli".

POLICE/AMBULANCE/FIRE: Call Port Manager, 2063 and 2074.

SHORE LEAVE: Allowed after free pratique, Custom & Immigration formalities completed.

AUTHORITY: Port Manager and Harbour Master.

ES SIDER: 30.38 N. 18.22 E. (See Plan Book)

(Also refer to "General – All ports").

DOCUMENTS: Oasis acts on behalf of tankers loading at Es Sider and shall prepare all crude oil loading documents. Universal Shipping is contracted by Oasis for all normal agency duties. This agency is currently the only agency used by the four Owner Companies.

After a tanker arrives at the anchorage or is moored in a berth, an agency representative will come aboard, accompanied by Libyan Customs Officials and Immigration Police. The agency representative will present certain clearance forms to the Master, which should be completed as soon as possible. After these forms have been signed by the Master, they shall be returned to the agency representative, who shall make the necessary distribution.

Crude oil loading documents shall be prepared by the Oasis documentation group prior to and during loading operations, to expedite their final completion. When the tanker has been loaded, the documents shall be completed and endorsed by the Customs Officer and by the representative of the Ministry of Petroleum Affairs (Secretariat of Petroleum). The documents shall then be distributed aboard the tanker and elsewhere, in accordance with previously arranged standard documentation schedules.

The tanker shall be considered clear to depart Es Sider when the crude oil loading documents have been delivered to the Master.

Libyan Customs Authorities:

- *(a)* List of crew (Form supplied by Immigration Authorities).
- *(b)* List of the crew with a declaration of their personal belongings (Form supplied by the Customs Authorities).
- *(c)* List of tanker's stores.
- *(d)* List of passengers.
- *(e)* Six copies of Cargo Manifest for cargo to be discharged at Es Sider.
- *(f)* One copy of Cargo Manifest for cargo in transit.

Blank copies of "Certificate of Discharge" are placed on board every vessel at Es Sider. These certificates must be endorsed by the Customs, or other recognized authority, on completion of discharge. One completed certificate must then be forwarded to the Libyan Customs Authorities according to the instructions contained in the "Certificate of Discharge". At least one further copy should be retained on board, to be produced to the Customs on any subsequent voyage to a Libyan port. Failure to produce the certificate may result in delays to loading, or even rejection of the vessel by the Libyan authorities.

PILOTAGE: Vessels to be moored, anchored or manoeuvred will only be boarded within the recommended anchorage area (Pilot boarding area centred at 30° 40′ N., 18° 23.8′ E.). The Mooring Master will advise the Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the anchorage or berthing area. All manoeuvring of ships shall be done only in accordance with the advice of an Oasis Mooring Master, subject to the understanding that in all cases and circumstances the Master shall remain solely responsible for the safety and proper manoeuvring of the tanker.

Tankers not equipped with pilot hoists shall provide a pilot ladder, or ladders, constructed and placed in accordance with Chapter V 1960 Safety of Life at Sea Convention. Tankers having a large freeboard are requested to use a combination of pilot ladder and accommodation ladder, which is also in accordance with the above Convention.

The Mooring Master shall be in direct control of all tanker communications while in the Terminal area. Any unauthorized communications will result in the immediate cessation of all operations excepting clearing of the berth. Such tanker immediately nullifies its Notice of Readiness.

APPROACHES: Coastal landmarks in the area are as follows:

- *(a)* The most prominent landmark is a water tower in the terminal area which is painted white and is 180 ft. above sea level. This water tower is located at 30° 38′ 00″ N. Lat. and 18° 21′ 01″ E. Long.
- *(b)* A radio antenna tower which is 395 ft. above sea level is located at 30° 36′ 56″ N. Lat. and 18° 16′ 55″ E. Long. At night this tower is lighted by an occulting red light, flash two seconds, eclipse one second, and there is a fixed red light halfway up the mast. It is flanked by two dish shaped aerials.
- *(c)* There is a water tower at Ras Lanuf Terminal with a highest elevation of 179.5 ft. above sea level located at 30° 30′ 42″ N. Lat. and 18° 32′ 22″ E. Long. It is white in colour. A white light, characteristics:– flash two every 5 seconds, height above sea level 163 ft., is mounted on the seaward side. There is also a fixed red air warning light on the top of the structure.
- *(d)* An omnidirectional aircraft radio beacon is situated at 30° 37′ 29.8″ N., 18° 21′ 07.7″ E. transmitting "OJ" 5 times every 60 seconds.

Range lights and mooring buoy marker lights will appear and disappear with unscheduled frequency. These lights are for the use of the Mooring Masters at the Terminal and should be disregarded by any tankers using the Terminal.

ANCHORAGE: During 1980 and 1981 offshore work is expected to be taking place in the vicinity of the original anchorage area centred at

30° 40′ 20″ N, 18° 24′ 30″ E. This involves the construction of an additional mono-mooring and dependant pipe-line. Therefore, until further notice, arriving vessels required to anchor should do so at a position about 2 miles N.E. of No. 4 berth.

Great care should be taken approaching anchorage from the North or N.W. to give mono-moorings a wide berth.

MAX. SIZE: The following are the approximate berth limitations:–

	Length	*Draft*
No. 1 Berth	920 ft.	51 ft.
No. 2 Berth	890 ft.	51 ft.
No. 3 Berth	950 ft.	51 ft.
No. 4 Mono Mooring	1150 ft.	62 ft. 6 in.

Max. beam 158 ft. Max. d.w.t. 250,000

Note: The max. length overall is 1150 ft. The max. draft to which vessel can load in good weather is 62 ft 6 ins., and when vessel lies within 30° of loading line. During adverse weather causing vessel to roll and pitch, draft may be restricted to 58 ft. The max. draft limitation in good weather is due to depth to top of loading line being 63 ft. at distance of 1900 ft. from buoy.

Length, beam and d.w.t. could all be extended provided draft does not exceed 62 ft. 6 ins.

All the above limitations are based upon standard tankers in normal weather conditions.

Oasis reserve the right to vary the above limitations, depending on vessel's freeboard, (OBO's – ore/oil vessels, etc.) and also the prevailing weather conditions.

RADIO: Oasis maintains direct communication with Tripoli Radio, details of which are shown in publication 205 of the U.S. Hydrographic Office and are included in the Berne Lists. Oasis also maintains a VHF station at Es Sider Terminal.

Cables should be addressed to: Oasisoil Tripolilibya. Cables addressed in this manner will be received directly by the Oasis communications centre in Tripoli and relayed immediately by voice radio or teletypewriter to the terminal at Es Sider.

Within 6 hours of clearing its last port for its voyage to Es Sider, each tanker shall provide the Terminal with the following information by cable addressed to Oasisoil Tripolilibya:

(a) The name of the tanker.
(b) The name of the port from which the tanker last cleared.
(c) The date and hour of the ETA at Es Sider Terminal.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 72 hrs. of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Tripolilibya, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 24 hrs. of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Tripolilibya, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

When the Master of the tanker en route to Es Sider is of the opinion that his tanker is within 12 hrs. of arrival at Es Sider, he shall notify the Terminal by cable addressed to Oasisoil Tripolilibya, providing the following information:

(a) The name of the tanker.
(b) ETA at Es Sider.

4 hrs. before the Master expects to arrive at Es Sider to receive a Mooring Master on board, he shall notify the Terminal by cable addressed to Oasisoil Tripolilibya, and also pass the same by VHF radio, providing the following information:

(a) The name of the tanker.
(b) Precise ETA at Es Sider.

If the tanker is equipped with a FM radio-telephone in the 156–162 mc/s band, communications may be established with the Es Sider Terminal dispatcher by calling on Channel 16, 156.8 mc/s. This frequency is monitored continuously. The range of the Terminal station is approximately 100 miles.

When the Master submits his first ETA to the Terminal he shall indicate the time he expects to need for discharge of ballast.

ARRIVAL PROCEDURE: Tenders to load crude oil cargo will normally be accepted and berths will be assigned to tankers in order of arrival, provided they have valid nominations for cargo and carry clean ballast, if any, and are in all respects equipped and ready to berth. In the event that berthing is delayed on account of weather, tankers will normally keep their position in line. Tankers required to leave Terminal area on account of weather (port closed) shall maintain contact with the Terminal via Tripoli Radio or VHF so they will be available when the weather moderates. Oasis reserves the right to load tankers out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other tankers in line. Further, Oasis reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the Terminal may be open to other tankers. Oasis Marine Superintendent's decision shall be final.

As soon as practical after arrival, all tanks will be inspected for evidence of oil in ballast. Similar inspections will continue during discharge of ballast. If evidence of oil appears at any time, the tanker shall be rejected forthwith and shall not again be accepted until it is shown the ballast can be properly discharged.

If during inspection or during progress of loading it is revealed that tanks are not tight or that oil is leaking from the tanker, it shall be rejected from further loading. Tanker shall not be later accepted for loading unless satisfactory evidence of repair is submitted, duly certified by Lloyds or ABS Surveyors, or other recognized surveyors.

Upon arrival at the Terminal of Es Sider in recommended anchorage, the Master shall give notice of readiness to load by wireless or VHF but not before one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board; or
(b) The Master shall have dropped anchor in the anchorage.

However, the notice of readiness shall not be accepted unless the tanker is in every respect ready to load.

In reporting readiness to load, the Master of any vessel arriving at Es Sider for the first time shall state whether the flanges on the manifold of his vessel are such as to permit hose connections without modification.

A tanker shall have sufficient ballast for safe handling and should be able to discharge the ballast contained in the vessel's cargo tanks in a minimum of 4 hours, or be able to utilize a system which safely allows discharge of ballast concurrent with the loading of cargo. Careful watch of the weather, frequent interchange of information between the tanker and the Terminal and the knowledge of the behaviour of his tanker may permit the Master to bring his tanker with minimum of ballast and thereby reduce the possibility of violating sea pollution requirements.

HEALTH: Tankers shall fly "Q" on arrival by day and display a red light over a white light at night to indicate quarantine conditions.

TUGS: Not required. Oasis maintains launches to assist in berthing tankers. These are under the direct supervision and control of the Mooring Master.

BERTHING: Three open roadstead submarine sea loading berths are available for loading crude oil at flow rates up to 40,000 barrels per hour. These berths are of the seven-buoy type. The berth headings are North. The fourth berth is a mono-mooring buoy with a flow rate of 30,000 barrels per hour. In all four berths ships should pick up hoses on the port side.

The central spar buoy of the Easternmost loading berth at Es Sider is located at 30° 38′ 58″ N. Lat. and 18° 22′ 43″ E. Long. The middle of the three loading berths at Es Sider is located at 30° 39′ 06″ N. Lat. and 18° 22′ 06″ E. Long. The Westernmost loading berth at Es Sider is located at 30° 39′ 35″ N. Lat. and 18° 21′ 53″ E. Long. All conventional berths are approximately one mile from shore and in approximately 65 ft. of water. The mono-mooring is located at 30° 40′ 31.5″ N. Lat. and 18° 21′ 43.7″ E. Long. It is about two miles from the shore in approximately 80 ft. of water.

Tankers shall have at least nine good synthetic fibre lines of not less than 9 ins. circumference and at least 120 fathoms in length, with an eye spliced in each end. These lines shall be placed out free for running, three on the after end of the after well deck, and six on the poop deck. The three lines on the well deck shall be married together so that if the need arises the double length can be run on either side of the tanker.

After the tanker is securely berthed, the submarine hose shall be lifted amidships on the port side. The base lift may weigh up to nine tons, depending on size and type of vessel. Hoses shall be lifted and connected by the tanker crew. The Mooring Master shall advise the tanker's officer-in-charge concerning lifting techniques; however, the responsibility for all operations shall remain with the officer.

Mono-mooring: Vessels are normally moored by two bow lines only, these being provided by Oasis. A selection of wire strops and shackles will also be placed on board for mooring purposes. Mooring lines are hove in until the length of chafing chain is brought inboard. According to the mooring arrangements, the Mooring Master will advise on the method of securing the vessel. Ship's wires or ropes may be required to back up mooring equipment supplied by Oasis. Smits towing brackets may be utilized when fitted. Under no circumstances shall the weight of the ship be taken on lead-in ropes.

On advice from Oasis that a vessel is to load on the mono-mooring, she will have the following ready before the Mooring Master boards:

(a) Port side derrick to be rigged ready to lift various wire strops, shackles, and hose securing equipment. This equipment will be placed on board at the same time as the Mooring Master, or as soon as possible thereafter, who will advise on its disposition.
(b) Forward, the vessel should have ready two good synthetic fibre mooring lines, at least 9 in. circumference, two good 4 in. circumference rope messengers at least 400 ft. long, or two 3 in. wire messengers of the same length, each fitted with a suitable screw shackle. Also a crowbar, spikes and hammers.
(c) No moorings will be required aft.
(d) The vessel shall make a lee on the port side.

It is essential on this berth that the hoses be picked up immediately mooring operations are complete. On advice from the Mooring Master, part of the ship's crew must be standing by at the port manifold for this operation.

Hose lifting and connecting operations are basically the same as in conventional berths, except that hose strings are floating and a maximum lift of up to 11 tons or more may be expected, depending on size and type of vessel.

Vessel's engines must be ready at all times, and under no circumstances is the propellor to be turned ahead without prior consent of the Mooring Master. Failure to comply with this may result in cessation of operations, and possible rejection as being unsuitable for a single point mooring.

In adverse weather, a continuous lookout will be required on the forecastle head, by a responsible person, to keep watch on the moorings.

In adverse weather the Mooring Master may require cargo to be loaded, in the initial stages, into the forward compartments and this should be complied with when requested.

Vessels are encouraged to load and deballast at the same time where this is possible. In the case of vessels with permanent ballast tanks, this ballast should not be started without first consulting the Mooring Master.

LOADING: Shore Stops: If it is requested by the Master of the tanker that the cargo flow should be stopped from the shore at a predetermined tonnage, it must be clearly understood that Oasis Oil Company of Libya, Inc. will not be held responsible for any error and that in the case of overloading, the excess cargo cannot be pumped back ashore.

Vessels are encouraged to load and deballast at the same time.

BALLAST: There is absolutely no provision at the Es Sider Terminal for dirty ballast. Tankers with dirty ballast shall be rejected and all costs accruing therefrom shall be for the tanker's account.

It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his tanker. This includes oily water from bilges, residuals from previous voyages or any other matter that may result in pollution of the sea. Owners and Masters are invited to examine all laws concerning pollution of the sea, especially in regard to the Mediterranean Sea area. Inspections may be made by the Libyan Ports & Lights Authorities, whose opinion of the cleanliness of the ballast shall be final.

The waters in and adjacent to the Terminal of Es Sider must not be polluted, and only clean oil-free ballast may be discharged anywhere inside of a line 100 miles to seaward and roughly parallel to the Libyan Coastline.

Prior to acceptance all tanks will be inspected for evidence of oil in the ballast and during discharging similar inspections will continue.

Masters are warned that when disposing of dirty ballast outside Libyan waters, all pipe-lines, sea-suctions, strainers and pumps that are later to be used to discharge clean ballast, must be flushed clean so that there will be no chance of even a small amount of pollution when the clean ballast is pumped out.

Any vessel required to return to a position at least 100 miles offshore for cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival, when a new Notice of Readiness will be tendered.

Master's attention is directed to Es Sider Notices concerning oil pollution and to the serious consequences of discharging dirty ballast, besides having his tanker rejected.

MEDICAL: Doctor will only attend vessel if patient unable to attend clinic ashore. Accommodation ladder required.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: No facilities exist for crew change or repatriation.

TIME: GMT plus 2 hrs.

REPAIRS: When a tanker is in or near the berth, its engines shall remain ready with full power for immediate use. Engine repairs shall not be performed near any berth.

WATCHMEN: Not less than one capable deck officer and three able seamen shall be available on the deck at all times. No person under the influence of alcohol shall be allowed on deck. The Mooring Master's opinion on the sobriety of an individual shall be final.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, spirits, wines, beers, perfume, arms, ammunition, saccharine, and certain other items shall be placed under Libyan Customs seal from the time of arrival in port until such time as the tanker has left territorial waters. Each officer and crewman is allowed the following ration for each day the tanker is in port: *(a)* 25 cigarettes per day, or 25 grammes of tobacco or 25 grammes of cigars. *(b)* One litre of beer or 0.5 litre of wine. *(c)* Special provisions are sometimes made for the Master.

CONSULS: Consulates are located in Tripoli, which is approximately 650 km. by road from Es Sider. Some countries having Consulates are: Algeria, Argentina, Belgium, Brazil, Chad, Czechoslovakia, Denmark, Finland, France, Ghana, Greece, India, Italy, Japan, Jordan (represented by Indian Embassy), Kuwait, Lebanon, Morocco, Nigeria, Nationalist Republic of China, Pakistan, Saudi Arabia, Spain, Sudan, Syria, Sweden, Switzerland, Tunisia, Turkey, United Kingdom, United States of America, Union of Soviet Socialist Republics, Venezuela, West Germany and Yugoslavia.

GENERAL: When a Mooring Master and his assistants (launch crews and possibly apprentice Mooring Masters) are assigned to a tanker, the tanker shall supply them with meals at the same time and in the same manner as comparable personnel of the tanker. No special meals or special foods shall be required. The terminal will keep this item to a basic minimum. The intent is that the furnishing of meals to Oasis personnel be kept to the minimum.

No boats may be lowered into the water, except in an emergency.

Adequate deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during hosing and loading operations. During the discharge of ballast at night, the sea area around the vessel must be adequately lighted. If vessel is berthed on mono-mooring buoy, in addition to the foregoing, lights MUST be provided on forecastle head and over bow to facilitate supervision of moorings.

Stores of any sort shall not be handled while tanker is under "Notice of Readiness". No stores shall be handled while the tanker is in or near a berth.

Use of anchor marker buoys recommended.

Should any tanker or craft become an obstruction in any part of the Terminal or approaches thereto, or in any area of the submarine pipe-line. Oasis shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the owners. All expenses of such removal shall be borne by the tanker or craft or by those owning it at the time of the accident causing the obstruction, and Oasis shall be entitled to reimbursement by them for any such expenses incurred by it.

Power must be available at all times on all deck winches and on anchor windlass while the vessel is in the moorings.

If mooring wire winches are used, wires should be secured so as to enable them to be quickly let go from the vessel without damage.

Only in an emergency shall the tanker manifold valves be closed against crude flow, and then only with the Mooring Master's consent.

Should communications fail, the cessation of loading may be effected by a continuous sounding of the ship's whistle. This procedure will then stop the loading of all tankers in the area.

The bridge and/or control area shall not be locked nor otherwise arranged to prevent immediate entry at all times by the Mooring Master.

In adverse or marginal weather conditions Mooring Master may request that extra personnel be placed on duty on deck for tending moorings or hoses as required. Masters are advised to comply with this request.

The Mooring Master shall witness the plugging of all scuppers. Failure to plug scuppers shall result in the tanker's rejection.

The presence of unauthorized craft alongside a tanker will render it unacceptable. It shall be the duty of the tanker's personnel to clear all such craft away from the tanker.

When tankers are loading or discharging crude oil or ballast, and while tank tops are open or ullage plugs are open, boiler tubes shall not be blown. Every precaution shall be exercised to prevent sparks escaping through the funnel or stack or from the galley stack. The Mooring Master may demand all fires extinguished if he deems it necessary for safety.

Under the interpretation accorded to the Libyan "Boycott of Israel" Law, it is considered to be a violation thereof if a vessel calling at a Libyan terminal has on board any item of Israeli origin, irrespective of the nature thereof, including but not limited to manufactured products, fruit and vegetables, as well as empty crates, cartons, bottles and paper wrappings, regardless of the country where any of the foregoing was obtained. The law is strictly enforced, and the minimum penalty for violation thereof normally includes a fine and confiscation of all such items. Fines can exceed $1,000.

SHORE LEAVE: None of the officers and none of the crew of any tanker shall be permitted shore leave at Es Sider.

DEVELOPMENTS: See "Anchorage".

AUTHORITY: Operated by Oasis Oil Company of Libya, Inc. Owned by The National Oil Corporation of Libya, Amerada Petroleum Corporation of Libya, Continental Oil Company of Libya and Marathon Petroleum Libya Limited.

MARSA AL HARIGA: 32.04 N. 24.00 E. (See Plan Book)

(Also refer to "General–All ports").

LOCATION: Marsa al Hariga Oil Terminal is located on the South side of the harbour of Tobruk, approximately 1 mile Eastward of Marsa al Hariga.

OPERATOR: Arabian Gulf Oil Company.

APPROACHES: Vessels bound for the terminal should approach the harbour of Tobruk from the North-East with the lighthouse on Tobruk Point bearing 238° (true). In daylight this lighthouse should be kept in line with the conspicuous German War Memorial on the South side of the harbour.

When about 4 miles from Tobruk Point, course should be altered to 224.5° (true) to bring the leading lights on Marsa Umm esc-Sciausc in line. This course should be maintained until the vessel is close to the outer buoy, where one of the company's Berthing Masters will board.

Deep-drafted vessels sailing from the terminal should avoid navigating North-Westward of the leading line from Marsa Umm esc-Sciausc, owing to the presence of shoal water off Tobruk Point.

DOCUMENTS:

A. Customs Requirements. On the arrival of a vessel, the Tobruk Customs Authorities will require from the Master of the vessel:

4 copies of a Crew List.
2 copies of a List of Ship's Stores.
2 copies of a Declaration of the Crew's Personal Belongings, including currency, cigarettes, gifts, etc.
4 copies of a Passenger List.

B. Harbour Master's Requirements. On the arrival of a vessel, the Tobruk Harbour Master will require from the Master of the vessel:

1 copy of a Crew List.
1 copy of a Passenger List.
1 copy of the Ship's Manifest.
1 copy of a Port Declaration (form will be made available to each vessel on arrival).

PILOTAGE: Vessels coming to and departing from the Terminal will be berthed and unberthed by Berthing Masters provided by the company, subject to the understanding that in all circumstances the Master shall remain solely responsible on behalf of his Owners for the safety and proper navigation of his vessel.

Berthing Masters will board at the Outer Buoy.

ANCHORAGES: If a berth is not immediately available on a vessel's arrival off the harbour of Tobruk, the vessel will be advised by the company where she is to anchor.

Anchorage position for tankers waiting to be berthed is 1.5 miles N.E. of the Outer Buoy.

MAX. SIZE: Max. Summer deadweight 150,000 long tons. Two berths are located at the end of a T-head jetty which extends some 700 ft. from the shore. There is a min. depth alongside of 60 ft. and approach to and departure from the berth can be made in not less than this depth of water. Max. draft 56 ft. freeboard at any time whilst deballasting must not exceed 55 ft.

A buoy berth is situated some 1,200 ft. from the shore approximately 1,800 ft. West of the Jetty Berth No. 2. There is a min. depth in the buoy berth and its approaches of 49 ft. However, the buoy berth is not currently in use.

HEALTH: The Libyan Authorities will grant clearance by radio of a vessel coming to the terminal. Radio messages requesting clearance should be sent not earlier than 48 hours prior to vessel's arrival off the harbour of Tobruk and should give the details required in the Maritime Declaration of Health which must also be completed.

COURTESY FLAG: On entering the territorial waters of the Libyan Arab Republic which commence 6 miles off the coast of Libya, vessels should if possible, hoist the Libyan flag, and in any event the Libyan flag must be hoisted before entering the harbour of Tobruk. Should a vessel arrive without a Libyan flag on board, one may be obtained from the Company's Berthing Master when he boards at the Outer Bay.

ARRIVAL MESSAGES: In addition to their arrival messages to Agent, vessels must pass an arrival message to the terminal via the company's radio station giving at least 72 hours notice of ETA and advising their estimates of:

(a) The quantity of cargo (in long tons) to be loaded at the terminal.
(b) The cargo loading rate (in long tons) per hour.
(c) The quantity of ballast (in long tons) to be discharged ashore at the terminal.
(d) The ballast discharge rate (in long tons).

If, subsequent to advice of their ETA there is any material change, a further ETA message must be passed via the company's radio station.

RADIO: Tobruk Radio 5 A1 (MF & HF). Position: 32° 02′ N. 24° 00′ E. Frequency: 420, 500 A1, A2, 0:5 kW. 4241 kHz at 2130 GMT, 8480 kHz at 1730 GMT, 16963 kHz at 0930 and 1330 GMT. All using A1 0:5 kW. *Note:* Station owned by Arabian Gulf Exploration Company. Company telegraphic address: "Injaz Tobruk". All times given are GMT. Station keeps watch on 500 kc/s. during 24 hours.

TUGS: For berthing and unberthing at the terminal, vessels will be required to use the 2 diesel tugs which are available at the terminal. Each of these diesel tugs has a bollard pull of approximately 25 tons.

BERTHING: *Jetty:* Vessels will berth on the jetty starboard side alongside, depending on the prevailing weather conditions, though starboard side alongside is preferred. Each berthing head is "T" shaped and is protected by 4 breasting dolphins.

All moorings, except the backsprings to the outer breasting dolphins at Jetty Berth No. 1, attached to quick release hooks.

Buoy Berthing: (CURRENTLY NOT IN USE). Berthing/unberthing in daylight only.

Vessels will berth heading East or West depending on the prevailing weather conditions, though head East is preferred. The moorings consist of four buoys, 1 buoy being on each bow and 1 buoy on each quarter.

In addition to the vessel's mooring of 2 ropes to each buoy, the mooring wires provided by the company to each buoy must be utilised and vessels moored to the satisfaction of the company.

The company's Berthing Master will remain on board the vessel whilst the vessel is in the buoy, to supervise and co-ordinate the ballast discharging and loading operations.

HOSES: *Jetty:* Ship-shore connections, 4 flow booms with suspended rubber hoses, diameter of hoses 12 in. Flange size and rating 12 in. ASA 150. Full range of standard adapters available.

Buoy Berth: (CURRENTLY NOT IN USE). Ship-shore connections, 3 flexible hoses, 2 crude oil loading, 1 ballast discharging, diameter of hoses 12 in. Max. lift from ship's equipment 5 tons. Flange size and rating 12 in. ASA 150.

OIL BARRIER: "Gemlen" floating anti-pollution booms on reels at jetty heads. Boat with chemical dispersants standing-by.

BALLAST: Vessels should make every effort to arrive at the terminal with clean ballast and with the minimum quantity for safe handling under prevailing weather conditions.

All ballast must be discharged into shore tanks provided by the company, unless it is clean ballast, carried in tanks which are completely isolated from the vessel's cargo system. However, the discharge of such ballast into harbour waters must not be commenced until the ballast has been inspected by a company official, and he has certified that it is in order to commence discharge.

Ballast can be accepted into the company's store tanks at rates up to 6,000 t.p.h. from the jetty berths and 1,500 t.p.h. from the buoy berth. Ballast is discharged ashore over the jetty by way of a loading boom. Ballast is discharged ashore from the buoy berth through a separate 24 in. ballast discharge line connected to a 12 in. flexible hose. Max. quantity 35,000 tons.

LOADING: Cargo loading at each jetty berth is by means of four 16 in. flow booms to which 12 in. flexible hoses are attached. Cargo loading at the buoy berth is by means of a 34 in. submarine line to which two 12 in. flexible hoses are attached.

This system permits a max. loading rate of approximately 8,000 t.p.h. over each jetty berth, and 4,000 t.p.h. through the buoy berth. The actual loading rate for a particular vessel will be determined prior to the commencement of loading by agreement between the Master and the Company.

Jetty: Method: gravity loading, max. head 360 ft. rate regulated to requirements. Loading rates: 2 lines each 4,000 t.p.h. Two 8,000 t.p.h. maximum.

SAFETY: A copy of the Regulations will be given to Master when Company's Berthing Master boards at outer buoy. Masters should make themselves thoroughly acquainted with these Regulations, strict observance of which is required by the Company.

In the event of any infringement of the Regulations, operations may be stopped and, if so, will not be recommenced until the Company is satisfied that appropriate action has been taken by the Master to comply with all the Regulations. The Company also reserves the right to unberth a vessel in the event of a continued or blatant disregard of any of the Regulations. Any loss or expense to the Company resulting from an infringement of the Regulations and, in particular, in the event of an infringement leading to an interruption of operations and/or unberthing of a vessel, will be for the account of the Owners.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: No shore facilities for carrying out repairs to vessels either at the terminal or at Tobruk.

CONSULS: No Consulates at Tobruk and the nearest locations of Consular officials are as follows:

Benghazi – 445 kms. from Tobruk: France, Germany, Greece, Italy, Saudi Arabia, Tunisia, United Kingdom of Great Britain and Northern Ireland, United States of America, U.S.S.R.

Derna – 175 kms. from Tobruk: Turkey.

El Berda (Beida) – 260 kms. from Tobruk: Belgium, United States of America.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and saccharine have to be locked up under Customs' seal from time of vessel's arrival in harbour of Tobruk until time of departure.

Whilst in harbour, each member of crew allowed following: 200 cigarettes (the Master will be allowed 400); half bottle spirits (the Master will be allowed 1 bottle); 4 bottles of beer or wine per man per day.

No fixed allowances for cigars and tobacco.

Libyan law prohibits vessels from having on board any goods or containers of Israeli origin. Any vessel having such goods or containers on board on arrival in the harbour of Tobruk will be liable to a heavy fine and confiscation of the goods or containers. The Libyan Authorities may, moreover, refuse to clear the vessel.

REGULATIONS:

1. *Ship's Garbage.* Whilst within limits of harbour of Tobruk the throwing overside of ships' garbage is prohibited.
2. *Ships' Radio.* Once vessel berthed at Terminal the use of her radio will not be permitted.
3. *Ships' Boats.* Use of ships' boats not permitted within limits of harbour of Tobruk.

AGENTS: Universal Shipping Agency (for all tankers).

MARSA EL BREGA: 30.25 N. 19.34 E. (See Plan Book)

Also refer to "General – All Ports".

FLAG: All ships should fly the Libyan flag, which is plain green, when inside territorial limits. They should make sure that they have a Libyan flag on board before leaving the last port of call. Failure to fly the Libyan flag may result in a heavy fine.

Libyan Law does not permit ships using Libyan waters to retain Israeli flags, stores or literature pertaining to Israel on board, even though these may be normally part of the vessel's navigation equipment.

LOCATION: Marsa el Brega is located in the South-Eastern part of the Gulf of Sirte in Lat. 30° 25′ 0″ N., Long. 19° 34′ 3″ E. It is an open bay contained between Ras Magdar and an unnamed headland some 3 miles to the West.

The Brega sea buoy is located in Lat. 30° 27.55′ N., and Long 19° 35.1′ E.

A bow mooring oil loading fixed structure is located in Lat. 30° 26.0′ N., and Long. 19° 33.9′ E., with a fixed red light exhibited at a height 93 ft. above mean sea level. In addition, the structure is lighted by floodlights.

Brega is radar controlled with the shore installation scanner in position 30° 25′ 02.5″ N., and 19° 34′ 55.6″ E. The height of the scanner tower is 112.2 ft.

The Radio Beacon is located in Lat. 30° 25′ 00″ N., and Long. 19° 34′ 14″ E. The call sign is "MB" and it operates continuously on a frequency of 403 kc/s.

A single point mooring is located in position Lat. 30° 26′ 45.26″ N., and Long. 19° 34′ 01.40″ E.

A single flare is located in position 30° 24′ 31.9″ N., and 19° 35′ 49.7″ E. Three other flares are located approximately 700 ft. to the West and S.W. The flares when burning can be seen at extreme distances.

Numerous lighted and unlighted navigational and mooring buoys are located within the restricted area shown on BA Chart 3350. Vessels are cautioned that these buoys may change position due to weather. Vessels are not permitted to enter restricted area shown on Chart BA 3350 without a Brega Pilot on board.

DOCUMENTS: Customs and Immigration Officials will board the vessel, except in adverse weather. All relevant documents are supplied by the Agent. The Master will fill in, sign and stamp the papers. These will then be handed over to the Authorities before clearance for loading is granted.

Letters on ships' business should be addressed to Esso Standard Libya Inc., P.O. Box 385, Essofield, (Marine), Tripoli, Libya, SPLAJ, and should be marked "Marine Documentation Section" (For Esso ships).

Vessels calling at Marsa el Brega should have the following documents in addition to the ship's register.

Customs and Ports and Lights Authorities Forms:

A. Port Declaration – Form P.L. 7 (1 copy)
B. (Title in Arabic) Inward Report – Form C.L. 128 (3 copies)
C. Cargo Manifest Inward – Form C.L. 1 (3 copies)
D. Report Outwards – Form C.L. 4 (3 copies)
E. Crew Manifest Inwards – Form C.L. 31 (2 copies)
F. Export Manifest Form C.L. 155 (6 copies)

G. *Certificate of Discharge:* If vessel has not called at a Libyan port since October 18th, 1973, then a letter is required from the Master, addressed to the Secretariat of Petroleum, stating that he undertakes to mail the Certificate of Discharge, for the present petroleum cargo, from the port of discharge and retain one signed stamped copy on board. It is essential that the Certificate of Discharge for any petroleum cargo loaded after October 18th, 1973, be on board the vessel and it must be clearly signed and stamped by the Authorities at the port receiving the last Libyan cargo. Vessels may incur delays or be refused loading permission where this is not complied with.

Required when ships clear inwards, lists each member of the crew and all goods held (e.g. liquor, cigarettes, cameras, money, etc.) with crew member's signature opposite name or rank. This form is ordinarily supplied in advance so that it may be completed prior to arrival at Brega. Ships making their first call at Brega must necessarily complete after arrival, but will then receive advance forms for future calls.

Cargo ships also require ship's cargo manifest form (3) with same information as C. above.

Ship's Forms required by Customs:

A. Crew List – ship's form (3 copies)

Submitted for inward clearance and containing the following information: List of crew members, type of vessel, nationality, date of arrival, place from which arriving, destination, and estimated date of departure. Sign and stamp with ship's stamp.

B. Stores List – Ships form (2 copies)

A list of ship's stores required when ship clears inward. Sign and stamp with ship's stamp.

C. Clearance from Last Port – Port's form (1 copy)

Required for inward clearance to load at Brega. Must be properly signed and stamped by Officials of port of previous call. There are exceptions on requirement for this clearance dependent on ship, nationality and last port of call.

Other Forms: (Not required of cargo ships)

A. Report of Cargo and Ship's Ullages (original)

B. Tanker Time and Loading Report (original)

(A mimeograph original to be signed by the Master and returned to ship's Agent).

C. Certificate of Cargo Discharge (6 copies)

Master signs and stamps 1 copy at bottom of form, and returns it ashore.

The other 3 copies are completed by Master at port of discharge and stamped and signed by Customs Authorities. 1 copy should then be air-mailed to Ministry of Petroleum, Tripoli. The second copy air-mailed to Marine Superintendent, c/o Essofield. Marine Division, P.O. Box 385, Tripoli, and the third copy retained on board for presentation when the vessel next calls at Brega. It is essential that the copy retained on board be clearly stamped and signed and the cargo figure should correspond with the cargo figure loaded at Brega.

Notes on Ship's Documentation:

E.S.L.I. no longer supply an agency service. Vessels should nominate Universal Shipping Agency, which is a government agency for all vessels calling at Libyan oil ports. In the event that Universal Shipping Agency has not been nominated, the Master will be required to sign a letter nominating them before permission to load can be given.

Information required by Esso Standard Libya Inc. on vessel's assignment prior to vessel's arrival.

The Owner, Charterer or Agent should airmail or cable following to Esso Standard Libya Inc., PO Box 385, Esso Field, (Marine), Tripoli, cable address Essoship Tripoli:

(1) Name and flag of vessel.

(2) Dimensional characteristics, e.g. overall length, beam and max. draft.

(3) Total tonnage, number and type of products or cargo on board.

(4) Number and size of cargo hose connections on either side and distance in feet of each from the bow.

(5) Safe working load of derricks in vicinity those connections.

(6) Number of shackles of chain (90 ft. shots) on each anchor.

(7) Whether or not VHF fitted.

Information concerning dimensional characteristics need not be included in letter or cable after first call.

PILOTAGE: The services of a Pilot/Mooring Master are provided. He will normally board the vessel in the vicinity of the Brega buoy and will advise the Master on approaches to the berths, mooring and unmooring, connecting and disconnecting cargo hoses, and all other operations within the berthing area. Vessels are cautioned not to enter the restricted area without the services of a Brega Pilot/Mooring Master. Pilot ladder must conform to international safety standards.

The Master of the vessel shall notify the Mooring Master of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring, or loading the vessel. It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berths.

The Mooring Master will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

Vessels must be moored to the entire satisfaction of the Mooring Master, and must be ready at all times to put out more lines or to adjust the lines as required by any change in the weather or as requested by the Mooring Master.

Pilot Ladders:

Several instances of the use of unsatisfactory, dirty and unsafe pilot ladders have been reported by Pilots.

Faulty ladders endanger the lives of Pilots.

Instructions have been issued to all Pilots to report immediately any pilot ladders which do not comply strictly with the following orders:

(1) The Officer responsible for the embarkation and disembarkation of the Pilot is a Watchkeeping Deck Officer.

(2) The Pilot ladder is secure, clean and free from oil.

(3) The Pilot ladder is adequately lit at night.

(4) Means are provided to enable the Pilot to pass safely and conveniently from the head of the ladder into the ship or onto the ship's deck.

(5) The ladder is in good condition and its tread remains *horizontal.*

(6) The length of the ladder does not exceed 30 ft. Whenever the distance from sea level to a point of access to the ship is more than 30 ft., access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

(7) The ladder is rigged so that each step rests firmly against the ship's side.

(8) Spreaders are provided not more than 10 ft. apart to prevent the ladder twisting.

(9) Two manropes (not made fast to the ladder but to some independent structure) and safety lines are provided, and a lifebuoy with self-igniting light is available.

Vessels not complying with these rules will not be boarded by a Pilot and will suffer the consequent delay in berthing.

ANCHORAGE: Anchorages located 0.5 mile N.E. to East of Brega buoy in 12 to 18 fathoms. *Vessels should not remain at anchor in bad weather.* Vessels *are not permitted* to anchor within half a mile of the channels into the bay and inner harbour, and are to keep clear of the 143° 41′ leads (East of the harbour).

HEALTH: Quarantine signals must be displayed upon entering Brega port limits in accordance with international practice and shall be continuously displayed until pratique is granted.

MAX. SIZE: *Cargo vessels:* Maximum draft for vessels entering or sailing from the inner harbour is 10.0 m. (33 ft.). By prior arrangement and in good weather, vessels with drafts up to 10.6 m. (35 ft.) may be accommodated.

Tankers: See "Berthing".

RADIO: Vessels bound Marsa el Brega not required call Tripoli for inward or outward clearance. Radio messages should be sent through Tripoli (via Malta if beyond communication range of Tripoli) and ETAs should be sent at least 48 hours but preferably 72 hours in advance. Master should state whether ETA in GMT or local time.

Unless 24 hours notice of ETA is received by "Essoship, Tripoli", Notice of Readiness will not be accepted.

As cable office closed between midnight and 0800 hrs., allowance for delays in receipt of radio messages due to this and other causes should be made when sending ETAs and other urgent traffic.

VHF: *Port Control Short Range and Radio-Telephone Communications:* Esso Standard Libya Inc. Marine Terminal is equipped with a VHF radio port control system. It is intended that the following procedure should be adhered to:

Vessels approaching Brega and equipped with the appropriate VHF radio equipment, should call Brega Port Control on Channel 16.

Prior to Pilot boarding, the vessel will be allocated one of the four working Channels: 6, 9, 12, 13.

Esso Libya's craft are equipped to operate on these Channels.

Portable sets will be available for use of vessels not fitted with VHF radio equipment.

Note: Whilst in Libyan Territorial waters, it is prohibited for vessels to use Radio and Wireless Telegraphy. On arrival at a Libyan port such equipment shall be sealed by the Customs Authorities. However, VHF communications between such vessels and Libyan Ports Authorities are not affected by this prohibition.

TUGS: Esso Standard Libya Inc. maintains tugs and mooring launches to assist vessels to moor and unmoor.

BERTHING: Tankers: *Connecting of Cargo Hoses:* All cargo hoses used in the sea berth and at the bow mooring have 12 in. American Standard flanges. The hose used on No. 5 berth SPM has 16 in. American Standard flanges. Raising, connecting, disconnecting, and lowering of the hoses used in all berths will be performed by the ship's crew as advised by the Pilot/Mooring Master who will remain on board while the ship is in the mooring. Vessels should arrive with port derrick topped and ready for use.

Ballast: Esso Standard Libya Inc. has no facilities for the discharge of dirty ballast in Brega. Accordingly, all ships must arrive with clean ballast. International oil pollution regulations must be strictly observed by all ships while in Libyan waters.

Vessels should have sufficient ballast aboard for safe manoeuvring, but should not arrive excessively ballasted. The propellor should be submerged and the vessel trimmed not more than 8 ft. by the stern.

Vessels not properly ballasted will not be berthed in order of arrival and will not have their Notice of Readiness accepted.

Loading and Deballasting Simultaneously: Vessels properly equipped will be encouraged to discharge clean ballast and load oil simultaneously subject to the loading rate being reasonable, and that this procedure does not unduly delay the discharge of clean ballast.

Cargo Loading: In order to economise vessel's time and for the benefit of all concerned, it is requested that officers in charge of loading endeavour to receive oil as fast as is safely possible.

The vessel will be responsible to see that all vessel's filling lines are empty and clean prior to commencement of loading in order to prevent contamination of cargo being loaded.

The Master shall indicate on a form the maximum loading rate which is required, having regard to the safety considerations outlined above.

During loading operations at least one licensed Deck Officer and one licensed Engineer Officer shall be on watch and immediately available.

All operations in connection with the starting of loading, discharging, switching of tanks and topping-off of tanks should be directly and personally supervised by a ship's officer in the presence of the Mooring Master.

Mooring Ropes: Tankers calling at Brega to load at the crude/naphtha sea berth should be equipped with a minimum of eight 10 in. circ. fibre or synthetic mooring ropes in good condition, not less than 120 fathoms in length. Mooring wires of equivalent strength are acceptable. A fibre or synthetic mooring rope in good condition must be available for towing vessels into berths by tug. It is recommended that 4 ropes be ready for use on the main deck. One on each side and one amidships joined to the others.

Crude Tanker Sealine Berths Nos. 1 and 4:

Berths 1 and 4 are now out of service. Ground chains and clumps for the mooring buoys, and the *loading lines* are still in position.

Naphtha Crude Tanker Sealine Berth No. 2:

The least depth of water in this berth is 44 ft.

When berthed the tanker is heading 330° true with both anchors out forward, and 6–700 ft. of chain on each anchor. The stern is secured to 5 mooring buoys fitted with quick-release hooks. The submarine hoses are picked up amidships on the port side of the tanker and the vessel's derricks should have a safe working load of 5 tons.

A naphtha line with a single 12 in. connection is laid in this berth, the shore line being 24 in. A crude line with single 12 in. connection can be used if necessary. In good weather, Berth No. 2 can safely accommodate a 65,000 d.w.t. tanker with the following principal dimensions: 65,000 d.w.t.; length, 800 ft.; beam unrestricted, up to 42 ft. draft in good weather. Gravity of sea water about 1030.

Crude Tanker Sealine Berth No. 3 – bow mooring:

The bow mooring is located in approximately 95 ft. of water, and consists of a fixed pylon surmounted by a revolving boom from which hangs a submerged oil-loading pipe arm. The main structure has a diameter of 130 ft. and is 97 ft. above mean sea level at its highest point. The pylon is surrounded by a fender ring which is mounted on vertical steel piles. The revolving boom is 76 ft. in length from the centre of the pylon to the end. The loading arm hangs from a ball joint at the end of the boom and is approximately 560 ft. in length, terminating in a hose handling platform on the outer end. The hose platform is kept at the level of the ship's deck by means of a compressed air ballasting and deballasting system. Four 12 in. hoses hang from the platform. Vessels are normally berthed port side to the platform. Derricks should have a safe working load of 5 tons. A maximum loading rate of 65,000 b.p.h. may be realised with the loading pump in operation.

Vessels are moored in position using 2 head ropes to the bollards on the boom and with two 6 in. nylon back spring mooring lines to the hose-handling platform. In addition, a 6 in. nylon snubber line is used to keep the platform alongside the ship. In bad weather conditions two additional headlines consisting of 12 in. "Samson" nylon are available. Vessels with the following principal dimensions can be accepted: 100,000 d.w.t., overall 1,000 ft., beam unrestricted, draft 48–49 ft., bow to manifold not to exceed 434 ft. Larger vessels may be accepted with prior approval.

Crude Tanker Sealine Berth No. 5 – Single Point Mooring:

No. 5 SPM is located in approx. 140 ft. of water and is in position 30° 26′ 47″ N., 19° 34′ 01.4″ E. The mooring consists of a monobuoy to which are attached 2×15 in. synthetic lines. These are shackled to a single 3 in. chain partly around which is a flotation cover. On the end of the chain is a 9 in. polypropylene line. Vessels using this mooring should have a Panama lead of 12 in. minimum diameter or equivalent fairleads suitable for taking on board the 3 in. chain.

Mooring is effected by heaving the polypropylene through the bow as near the centre lead as possible until the chain is on board, and then shackling two 14 in. nylon strops to open links in the chain. The strops and shackles will be placed on board with the Pilot and vessels are advised to have the port derrick ready to hoist the gear on board at that time. The vessel is also required to have a good 3.5 in. to 4 in. messenger line of at least 75 fathoms in length, ready for use on the fo'c'sle head.

The 48 in. pipe-line is approx. 11,850 ft. long, terminating at the underbuoy structure on the seabed. Crude is loaded through one string of self-floating 24 in. hose with one 16 in. over-the-rail hose to the ship's manifold. Vessel's derricks should have SWL of 10 tons and if necessary be double rigged. The weight of a normal lift for connection to the ship's manifold amounts to less than 5 tons. This is for a hose free of oil, which is usually the case. Vessels with the following principal dimensions can be accepted in this berth: 300,000 d.w.t. Length, beam and draft unrestricted. Flow rate 48,000 b.p.h.

Berths Nos. 3 and 5:

Vessels entering the restricted area on the approach to, mooring and leaving, these two berths must at all times have their anchors firmly secured. No anchor work may be carried out at any time whilst a vessel is in this area.

Product Tanker Berth:

Tankers loading or discharging refined petroleum products at Marsa el Brega will be berthed at the Product Dock. Products will be loaded through a number of small pipe-lines approximately 2,000 ft. long. 4 in. or 8 in. hoses are provided according to the grades of oil being loaded or discharged. Vessels assigned to this berth must be suitably equipped with mooring ropes and have derricks capable of lifting 2 tons.

Vessels cannot be berthed or remain alongside the breakwater except in fine weather. The breakwater is equipped with resilient fendering and ample mooring points. Tankers will be berthed by an Esso Standard Libya Pilot/Mooring Master. Two tugs are available, and a launch will run the mooring lines. In good weather vessel with the following principal dimensions can be accepted: Overall length 500 ft., beam unrestricted, draft 26 ft. max.

Gas Docks: Two types of processed gas are loaded in Marsa el Brega: liquefied natural gas (LNG) and pressurized liquefied petroleum gas (Press. LPG).

These are loaded on 2 piled berths situated on the South-Eastern part of the harbour.

There are dolphins for head, stern and breast lines.

The springs are secured to the central pier and in addition springs from the pier are also made fast. Vessels alongside the gas jetties must be ready to leave at short notice.

On the North or "A" jetty the following products are loaded: Press. LPG and LNG. On "B" jetty: Press. LPG and LNG. There is also a caustic facility on "B" jetty. Minimum depth alongside the gas jetties is 37 ft.

Acid Dock:

There is a small berth to deal with sulphuric acid.

Dry Cargo Dock:

To nominate vessels, carrying cargo for Esso Standard Libya, for direct call at Marsa el Brega, prior approval must be obtained from Esso Europe Inc., Traffic Coordination, 50 Stratton Street, London, W.1., England. Telex No: EURESSPUR, 21221/5. The approval of the Operations General Manager, Brega, is required for any other vessel.

Notice of ETA Port Brega must be given 72, 48 and 24 hours prior to the vessel's arrival. Master of vessel should also advise number of stevedore gangs required.

A Roll-on/Roll-off facility can be used by suitable vessels at times when the product jetty is not occupied. Vessels dimensions should not exceed those described above for the product jetty.

Height of jetty above sea level is 1.5 m. (approx.).

Vessels assigned to discharge dry cargo at Marsa el Brega will be berthed alongside the dry cargo dock by an Esso Standard Libya Pilot/Mooring Master. The min. depth alongside and in the approach is 30 ft. Two tugs are available. A mooring launch will be available to run mooring lines. The dry cargo dock is fitted with resilient fendering and ample mooring points. During Winter it may be necessary to leave the berth during bad weather, and the Master is responsible for any damage sustained by the jetty and/or his vessel. A Pilot/Mooring Master will be standing by at all times.

All mooring ropes should be in good condition and none should have more than one short splice in the usable length. Crew shall keep the moorings tendered and properly lighted day and night. Shore ropes are also available when necessary.

Ships shall provide their own gangways and the crew shall keep them lighted and tendered, day and night.

Ships must be equipped with adequate unloading gear. All cargo will be off-loaded with the use of ship's gear. When weather permits, derricks should be topped at sea prior to arrival. Due to the increase in cargo vessels calling at Brega, considerable delay may be experienced. Vessels carrying Esso cargoes have priority over all other vessels.

The length of the dry cargo dock is 650 ft. The max. size ship which can be accommodated is 500 ft. overall, beam unrestricted, *max. draft 26 ft.*

INSPECTION/POLLUTION: *Arrival*: As soon as practicable after arrival and prior to acceptance, all of the vessel's tanks will be inspected for evidence of oil in ballast tanks. Inspection will continue during discharge of ballast. If evidence of oil appears at either of these inspections, the ship must return at once to sea and clean tanks, etc., in accordance with the procedures as laid down in the booklet entitled "Clean Seas Guide for Oil Tankers – The Operation of Load on Top" as issued by the International Chamber of Shipping – Oil Companies International Marine Forum.

Exxon owned vessels and Exxon chartered vessels should strictly adhere to all anti-pollution measures as published in the Vessel Instruction Manual and other publications and follow the Exxon worldwide oil pollution control program which prohibits the overboard discharge of persistant oils or oily water containing persistent oils (including bilge water) in any water of the world, except in extreme emergency affecting safety of life, vessel or cargo.

Any vessel required to return to sea for the purpose of cleaning tanks or for any similar reason automatically nullifies any Notice of Readiness already tendered, and at the same time loses priority held for loading. On return from sea, vessel will be entered for loading at the time of the second arrival when a new Notice of Readiness will be tendered.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area round the ship to the satisfaction of the Mooring Master in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels not having sufficient illumination will not berth if discharge of ballast continues after dark. Vessels having sufficient illumination will take precedence in berthing order. Vessels should provide suitable floodlights for working on deck during night operations, and should designate a responsible person to keep a continuous watch on hoses and moorings at all times during sea berth occupancy.

Loading Precautions: Masters are responsible to see that no oil (crude, bunker, diesel or bilge) is pumped or spilled overboard from their ships. Cargo hose should be inspected to ensure proper connection; drip pans should be in place, especially when disconnecting hose; scuppers should be plugged tight to contain possible spills; loading valves should be checked and tested to ensure proper operation and tight shut off; unused cargo and bunker connections should be blanked off; stern discharge line, if any, should be closed and blanked off; all sea valves should be closed and lashed shut upon completion of deballasting; the ship should provide sufficient staff (a minimum of one officer and three other crew members are recommended) to ensure proper supervision of loading and topping off operations.

If, during first inspection or during progress of loading, it is revealed that ship's hull is not oil-tight, ship will be rejected and refused further loading. Ship will not later be accepted for loading unless satisfactory evidence, duly certified by Lloyds or American Bureau of Shipping or other recognized survey agency, of effective repair is submitted.

Contamination of the sea: In the event any vessel should discharge dirty ballast or spill oil in the vicinity of the Brega Terminal area, Esso Standard Libya Inc. retains the right to take any action that may be necessary to clean up the contaminated area whether the contamination is upon the sea or the shore, or upon any structures or properties located in or upon the sea or upon the shore. In addition, Esso shall have the right to settle any claims of third parties arising from such contamination. All costs and expenses incurred by Esso to carry out the cleaning up of such contamination, or the settlement of third party claims, shall be borne by the vessel or by those owning the vessel at the time of the said contamination, and Esso shall be entitled to reimbursement by said owners for any such cost and expenses.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the product being loaded, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply with or be in accordance with the following Safety Rules:

(a) *Smoking is prohibited on the open decks of vessels. Smoking is permitted on board vessels only in enclosed spaces specifically assigned by the Master as Smoking Areas.*

(b) Before any loading commences all scuppers on the loading deck through which oil might escape overside must be tightly plugged and must be so maintained throughout the period the vessel remains within the limits of the harbour.

(c) The Master is responsible to see that oil from the vessel is neither spilled nor pumped into the water. At all times while loading cargo, all openings to the loading deck from crew, engine, galley and other dangerous areas shall be tightly closed.

(d) Boiler tubes are not to be blown. Every precaution must be taken so that sparks do not at any time escape from the funnel or stack.

(e) Ship's wireless is not to be operated while vessel is in the berth.

(f) Two hoses with spray nozzles to be laid out near manifolds and pressure maintained on fire mains at all times. Two suitable portable fire extinguishers (foam or dry powder) should also be available and bags of sawdust kept near manifold to contain any small oil spillage.

(g) Please note carefully that the Mooring Master is authorised to suspend operations in case any of the foregoing Safety Rules are not observed and in all cases where dangerous conditions or practices are deemed to exist.

Shore Alarm Signals:

Category 2 (Serious Incident): Three 2 second blasts of the District siren.

Category 3 (Major Disaster): A series of three Category 2 alarms.

Ships:

Fire: Six (6) or more short blasts, followed by a long blast repeated until shore contact, and continuous ringing of vessel's fire alarm system.

VHF Radio: *All* vessels to stand by Channel 16.

Fire or Explosion on Board Crude Vessel Berthed Offshore:

A. Responsible officer to man bridge, engines to be put on standby and crew to disconnect hoses as soon as possible.

B. Loading to be stopped on other vessels berthed offshore. Hoses to be disconnected and hung off, engines put on standby and crew standing by to vacate berth if necessary.

C. Vessels at anchor in the vicinity of the Brega Buoy to have engines on standby, with crews ready to heave up and put to sea if need arises.

Fire of Explosion on Board Ships in Inner Harbour:

A. Master to call Port Control on VHF Channel 16 with details.

B. Loading arms or hoses to be disconnected as soon as possible.

C. Loading or discharging to cease immediately on other vessels in harbour and offshore berths. Vessels to standby to vacate berths if necessary.

Fire extinguishers and hoses with nozzles capable of projecting a fine spray (fog) should be rigged in the vicinity of the loading/discharging manifold with fire mains pressurised at all times. (See 13.2.2.3 of I.O.T. & T.S.G., 2nd Edition).

Crude Oil Health Hazards (Hydrogen Sulphide Content)

A sour crude can be defined as one containing Hydrogen Sulphide (H_2S) within the range of 0.05 cu.ft. to 8.8 cu.ft. per 100 gallons or capable of generating atmospheric Hydrogen Sulphide concentrations of 5 to 1,000 p.p.m. Hydrogen Sulphide vapours in air are extremely toxic and the Maximum Allowable Concentrations (MAC) for personnel exposure throughout an eight hour day is 10 p.p.m. The gas is highly odorous and a particular hazard is its special effect of causing paralysis of the olfactory nerve, thus destroying the sense of smell.

Escape of Hydrogen Sulphide vapours from crude oil is relatively facile and due to a heavier than air effect (S.G. 1.19) may justify additional precautions under some atmospheric conditions.

The following medical effects on personnel exposed to Hydrogen Sulphide represent an indication of the degree of vigilance necessary to prevent or minimise exposure:

	Atmospheric Concentration Range	*Personnel Reaction*
(i)	50–100 p.p.m.	Slight irritation after exposure for 1 hour.
(ii)	200–300 p.p.m.	Marked irritation after exposure for 1 hour.
(iii)	500–700 p.p.m.	Loss of consciousness after exposure of 30–60 minutes.
(iv)	700–900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.

The particular hazards introduced by the carriage of crudes containing Hydrogen Sulphide may be restricted by observing the following practices:

(1) Every opportunity should be taken to utilise closed loading facilities to discharge displaced gas remote from deck areas.

(2) During loading operations, where large volumes of gas are discharged to atmosphere, regular observations should be made of gas concentrations about the decks.

(3) Any persons engaged in sampling, gauging, sighting open cargo tanks or disconnecting cargo hoses, should work windward of the vapour source and should be kept under surveillance from a safe area.

(4) In the event of a person being rendered unconscious by vapours with high Hydrogen Sulphide content, urgent removal to a safe area and application of artificial respiration is of prime importance, followed by the early attention of a qualified medical practitioner.

(5) In respect of loading crude with a high Hydrogen Sulphide content, it is not necessary to take water dips after loading and ullages as indicated by "Whessoe" or other automatic gauges are acceptable on vessels fitted with this type of equipment. Cargo samples taken from the shore meter battery are acceptable.

(6) In respect of transporting crudes with a high Hydrogen Sulphide content, one day prior to arrival at the discharge port, the pressure/vacuum valves should be jacked open to allow gas concentrations to escape to atmosphere at the masthead; then prior to berthing those valves should be reset in the operating position.

The degree of sourness is normally indicated by the Hydrogen Sulphide content in p(arts) p(er) m(illion) *liquid measure.* The Hydrogen Sulphide contents of various types of sour crudes so defined are as follows:

Crude	*Hydrogen Sulphide (p.p.m. Liquid Measure)*
Agha Jari	20
Jambur/Bai Hassan	40
Kirkuk	40–70
Gach Saran	70
Brega	260
Qatar	200–300
West Texas	Up to 1,000

The *Atmospheric* Hydrogen Sulphide concentration varies materially with atmospheric conditions. Particular caution should be exercised when petroleum vapours generally tend to concentrate about the decks. H_2S is readily detected with a MSA Toxic Gas Detector.

The precautions referrred to above should be carefully observed at all times.

MEDICAL: There are limited medical and no dental facilities at Marsa el Brega. Personnel requiring urgent medical treatment may obtain it, but this will only be undertaken in serious cases. The cost of transport and treatment will be charged to the vessel. A form entitled "Charges for Ship Account" must be completed in quadruplicate and sent ashore with the person requiring treatment. This form can be obtained from the Pilot/Mooring Master.

Masters of vessels arriving at Marsa el Brega who require medical treatment should give advance notice of their requirements by radio whenever possible.

FRESH WATER: No fresh water is available.

FUEL: No bunkers are available.

REPAIRS: No repairs are allowed to ship's engines while vessels are moored in the berths. Ship's engines should be ready for use on short notice in case the vessel has to vacate the berth suddenly because of bad weather. There are no repair facilities for ships available at Brega.

REPATRIATION: Crew members cannot pay off or leave the vessel at Marsa el Brega except in cases of emergency. Even in an emergency, it should be noted that seamen's Books are not valid under the Libyan law. A valid passport is required, and with adequate notice by radio it is possible to obtain an exit visa for a crew member leaving in an emergency.

SHORE LEAVE: Passengers and crew members are not permitted to land for reasons other than emergencies.

PORT REGULATIONS:

Cargo vessels: Also see "Max. Size".

The following restrictions, conditions, rules and priorities shall be observed by Masters, Consignees and Agents of Non-Esso cargo vessels calling at Marsa el Brega and berthing at the Esso cargo jetty.

1. The permission of the Operations General Manager must be obtained before a non-Esso cargo vessel can discharge. The Operations General Manager also designates certain priorities which may change from time to time. Agents of cargo ships must keep in touch with Marine Superintendent who will advise them of the priority assigned to their vessel.

2. Maximum vessel draft 26 ft.

3. Maximum length overall 500 ft.

4. No repairs may be carried out to the propulsion machinery during the unloading operation and the ship must remain mobile and be ready to manoeuvre at all times.

5. Vessels must be equipped with their own unloading Gear.

6. Unloading must be from ship to truck and no marshalling arrangements can be made available inside the reserved area. The unloading operations must be completed rapidly.

7. Unloading operations may not be performed except during daylight hours as determined by the Marine Superintendent.

8. Loading trucks will be required to adhere strictly to Esso's safety rules, particularly while operating within the limits of the Industrial area.

9. Arrangements for the entrance and movement of the stevedoring personnel must be coordinated with Esso's industrial Security Division. No housing or victualling will be provided for stevedoring personnel. All expenses, costs, remunerations and compensations associated with this activity will be borne directly by the company concerned.

10. The stevedores will be held responsible for cleaning up after completion of unloading.

11. No victual, water supply or bunkering service is available for vessels calling at Brega.

12. Advance notification must be given to Esso's Marine Division at least 10 days prior to arrival of vessel at Marsa el Brega. ETA of vessel to be notified 72 hours prior to arrival and confirmation and reconfirmation 48 hours and 24 hours respectively prior to arrival.

13. A system of priorities for cargo vessels entering Brega is in operation as follows: 1st – Esso cargo, 2nd – N.O.C., 3rd – other vessels. This system will apply even though this requires interruption of operations of vessels already berthed.

14. Weather and sea conditions, particularly during the period December to April of each year, impose severe restrictions on the cargo pier usage. Among these restrictions are the discontinuation of unloading and the unberthing of the ships as a safeguard against ship and berth damage.

One hour's notice will be given to Masters should it be deemed necessary to vacate the berth due to bad weather.

15. Esso shall not be held reponsible for any waiting period or delay (demurrage) related to the entry of cargo ships, nor be liable for any costs or compensation in that connection, regardless of the circumstances.

16. Esso shall not be held liable for any loss, damage or injury that may occur to any property or persons whatever the cause thereof as long as they are related to or resulting from the use of the port. Such loss, damage or injury shall be the liability of the Master, Consignee or Agent irrespective of whether they are real or alleged. The above named shall also undertake to indemnify Esso for any such losses and damages and to hold Esso harmless from any liability that may arise as a result thereof.

17. All vessel movements will be subject to the control and direction of Esso's Marine Division Superintendent.

GENERAL: *Charts:* Vessels calling at Brega should have on board B.A. charts 3350 and 3354, or H.D. chart H 203. No charts are available at Brega.

Provisions: There are no fresh or dry provisions available at Marsa el Brega, and Esso Standard Libya cannot undertake to obtain supplies from Benghazi.

Mail: The Ship's Agency will handle all official and crew ship's mail which should be passed to the Mooring Master before the vessel sails.

Harbour Work: Dredging is in continual progress in the vicinity of the inner harbour. Vessels are cautioned not to enter the restricted area (B.A. Chart 3350) without the services of a Brega Pilot/Mooring Master.

Master of cargo/product vessels calling at Marsa el Brega are cautioned that seaweed in suspension is present in the inner harbour area, and all precautions should be taken to avoid blockage of main engine room intakes.

All offshore loading is controlled by the VHF ship/shore radio. The Mooring Masters are equipped with portable VHF sets and the vessel will be assigned a frequency when the Mooring Master boards. In the event of total failure of ship/shore radio communication during loading, the ship should sound the emergency signal comprising a succession of short blasts on the ship's whistle. All loading operations will then cease until radio contact with the shore has been re-established.

All mooring lines to be fitted with adequate ratguards.

All berths in the inner harbour are adversely affected during periods of bad weather, particularly when the prevailing wind is from the North-West.

All vessels allocated berths in the inner harbour are therefore required to be ready to proceed to sea as directed by the Marine Superintendent or his representative when adverse weather prevails or is expected.

All tank lids to be closed and vented to the atmosphere via the agreed system.

Smoking is strictly prohibited on board all tankers except in locations approved by the Masters of the vessels. No smoking on deck even if gas free.

Full power must be available for all manoeuvring to and from all berths. During deballasting and loading, vessels must maintain engines and propulsive machinery in readiness at all times to leave the berth on short notice.

No repairs are permitted which will delay or interfere with this contingency. Contravention of this ruling constitutes a serious safety hazard and will entail towage from the berth and possible delay to the vessel for which Esso Standard Libya Inc. will accept no responsibility.

It is the responsibility of the vessel, before arriving, to see that ballast water is free of oil and to *discharge ballast water through ballast discharge lines* prior to arrival to ensure their cleanliness.

All tankers for sea berths must have port derrick ready for use.

Masters are warned that no contaminated ballast or bilge water may be discharged within Libyan territorial waters. It is the responsiblity of the vessel before arriving to ensure that ballast water is free of oil, and that all pipe-lines, sea suctions, strainers and pumps have been flushed clean of oil.

DEVELOPMENTS:

National Oil Company (NOC):

Governing body: G.P.L.A. East side of harbour opened 1978.

Tanker Berths:

Jetties 1 and 2: Facilities for loading of Ammonia and Methanol on both jetties. On Jetty 2 facilities for receiving Acid and Caustic.

Overall Moorings: 175 m.
Loading Section: 43 m. (141 ft.).
Dredged depth: 14m. (45 ft.).

Urea Jetty: Not expected to be operational until late 1980.

Overall length: 216 m.
Dredged depth: 9 m. (29 ft.).

Cargo Dock:

Max. d.w.t.: 15,000 tons.
Overall length: 392 m.
Dredged depth: 11 m. (36 ft.).

Suitable ro/ro ships may berth alongside the Urea Jetty stern on to the Cargo Jetty, which has a height above sea level of approximately 2.7 m. (9 ft.).

AUTHORITY: Esso Standard Libya Inc.

QASR AHMED (Misurata): 32.22 N. 15.13 E.

(See Plan Book)

GENERAL: The harbour is enclosed by 2 rubble mound breakwaters armoured by tetrapods. The North breakwater extends 1,400 m. due East from Ras Zarrugh Lighthouse and East breakwater extends 1,800 m. due North from the shore near the prominent radio station about 2 km. South of the North breakwater. There are lights on the breakwater roundhead. On the North breakwater a white flashing light (0.5 sec.) every 5 secs. The Ras Zarrugh lighthouse at the foot of the North breakwater is a square tower with black and white vertical stripes surrounded by a white metal framework. The structure is 8 m. high and is on the top of a 16 m. hill. The light is flashing white (0.5 secs.) every 5 secs. with a range of 8 miles.

There is a radio mast 7.6 miles W.N.W. of Ras Zarrugh with fixed red flashing lights. Harbour entrance leading lights are not yet installed. The harbour entrance channel is 150 m. wide dredged to a depth of 12 m., it has a fairway buoy 500 m. outside of the entrance with radar reflector, fog bell and white light flashing (0.3 sec.) every 3 secs.

Inside the entrance there is turning circle, diameter 470 m. dredged to 12 m. and marked with 4 buoys with white lights flashing (0.1 sec.) every 1 sec.

Inside the harbour a dredged area 920 m.×200 m. to a depth of 11 m. leads due South alongside the berth.

Directions: Keep 2–3 miles offshore before turning due West for entrance.

Currents: Predominantly N.W. at mean rate of 0.5 to 0.75 knots but in Winter winds can reverse the flow and induce S.E. set in excess of 1 knot.

PILOTAGE: Compulsory, Pilot will board about 1 mile outside the port entrance.

ANCHORAGE: Bearing approximately 270° to lighthouse on Ras Zarrugh 13 m. depth 1 mile (2 km.) offshore but holding ground is poor and it is advisable to leave anchorage at signs of onset of bad weather.

RADIO: A temporary VHF radio station will be operated on Channel 16.

BERTHING: There are 6 berths totalling 1,120 m. of concrete quay dredged to 11 m. with timber fenders and bollards at 150 m. intervals, the quay deck is at elevation of 2.25 m. The berths include a Ro/Ro facility.

CRANES: Shore crane of 50 tons available and in the near future floating cranes of 100 tons will be available.

FRESH WATER: Available alongside and by barge.

FUEL: Not available.

MEDICAL: Facilities available. There are hospitals in the town of Misurata 12 km. from the port and a first aid post in the harbour.

STEVEDORES: See "Tripoli".

REPATRIATION: Possible.

AIRPORT: Tripoli Airport situated about 220 km. from Misurata.

CONSULS: Nearest consuls are at Tripoli.

SERVICES: All kinds of food and soft drinks are available except alcoholic drinks and pork.

SHORE LEAVE: Allowed after free pratique, customs and immigration formalities completed.

REPAIRS: See "Tripoli".

POLICE/AMBULANCE/FIRE: Call Port Manager Tel. 21101 & 21094.

SHIPMASTER'S REPORT: December 1977.

Chart: British Admiralty Chart No. 3353 "Ras Ashdir to Sirte".

A mole has been constructed from Ras Zorog in an East direction, the length of which is approximately 1,100 m.

A second mole extends from the shore in a Northerly direction, approximately 1,800 m. in length. Entrance to the harbour is between the outer ends of both moles.

Wharves and sheds are being built along three quarters of the length of the Northerly direction mole, and around the South part of the inner harbour perimeter. At the time of the visit by this vessel about 350 m. of quay was completed, with depth alongside of 11 m.

All the construction work appears to be done by Yugoslavian labour. The "Overseer" acted as Pilot and was a very able and pleasant person. All questions regarding cargo and fresh water, provisions, etc., were dealt with by him. He supplied 10 tons of fresh water by road tanker, and organised a visit from a ships' chandler for a small quantity of fresh salad and potatoes.

There are two small tugs which were used in berthing under the Pilot's direction. These were very necessary owing to a number of obstacles in the harbour (divers boats, pipes, etc.). The Pilot's knowledge of English was limited and it is most necessary for the ship's Master to judge his intentions carefully.

Without a doubt the port of Misurata when open for commerce will be a very useful port, although a small port (inside harbour space was roughly estimated to be about 1,500 × 700 m.). The Pilot advised that it was expected to be opened about the middle of 1978.

The vessel anchored off the port entrance at 0800 hrs. and Pilot boarded at 1100 hrs., vessel berthed shortly afterwards. Discharge of 208 tons of construction material from No.1 hold commenced at 1330 hrs., and ceased at 2400 hrs. for the day. Work resumed at 0930 hrs. on the following day, and was completed at 1330 hrs. A mobile shore crane was used throughout for discharge into lorries. All labour was Yugoslavian.

All Agency work was attended to by our Tripoli Agent, who arrived onboard at 1700 on day of arrival. As Tripoli was our next port, he was most helpful in advising our berthing prospects at that port, and delivering ship's mail.

The entering and clearing formalities were attended to by two Customs Officers. They advised that there was strictly no shore leave for the crew. All accommodation was diligently searched including the Master's for alcohol, and none whatever was allowed to be in crew's possession. However when all was found to be in order, on request a small amount of bond stores was released for Christmas.

The vessel departed at 1600 hrs. for Tripoli where the Agent's estimate of 2 – 3 days waiting (although there were 50 ships at anchor) proved to be correct.

SHIPMASTER'S REPORT: March 1978.

As will be noted on the Plan, work is still in progress on the Southern Mole. More warehouses are to be erected there, also a grain silo. On the Western shore of the harbour more berths are to be constructed possibly for containers, but nothing finalised yet.

Misurata is to be principally a Ro/Ro port specialising in transit cargoes. A nearby motorway runs in a Southerly direction for 1,000 miles into Central Africa.

There will be facilities for conventional cargoes. Dredging is in progress in the Western part of the harbour in preparation for the new berths. The area is being marked by red marker buoys. The port is scheduled to open in June/July this year and to date there are no services excepting Customs who attend to all the Entering and Clearing formalities. All pilotage being performed by the Master, the contractors work boats will act as tugs if requested.

Documentation is similar to requirements for other Libyan ports also the same strictness regarding alcohol. All Officers and Ratings were allowed to retain a small quantity of beer, all other alcoholic drinks being placed under Seal.

AUTHORITY: Port Manager and Harbour Master.

RAS LANUF (Sirtica Terminal): 30.31 N. 18.35 E.

(See Plan Book)

(Also refer to "General All Ports").

DOCUMENTS: Customs will require:

4 Crew Lists.
1 Crew Declaration of personal belongings (including cigarettes, etc.)
2 Stores Lists.
1 Passenger List.

Crew Lists and Crew Declaration of personal belongings must be on the approved Libyan Government Documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits. Also required are:

6 Copies of Cargo Manifest for Ras Lanuf Discharge.
1 Copy of Cargo Manifest for transit cargo with a summary.
1 Copy of Passenger Manifest.

A copy of a certificate of discharge of the last cargo loaded at a Libyan port is required. Said certificate to be duly signed and stamped by Custom Authorities at the discharge port. Blank forms will be delivered with the cargo documents.

Clearance from the last port of call will be required by the Government authorities. The police will require 4 copies of a Crew List and a Passenger Manifest if any passengers on board.

PILOTAGE: It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival, giving estimated time of arrival. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or local time. The 72-hour signal should include the following: ETA, last port of call, if any sickness on board and if vessel has clean bill of health. Cargo quantity and grades expected to be lifted in net long tons at 60°F. The 12-hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Vessels to be moored at Ras Lanuf will be boarded by Mooring Master in the close vicinity of the suggested anchorage area mentioned below. The Mooring Master will advise the Ship's Master on approaches to berths, mooring, unmooring, connecting and disconnecting the hoses and in all operations within the mooring area.

Terminal sea buoy, colour red with radar reflector and bell is located in approximately Lat. 30° 32′ 40″ N. Long. 18° 34′ 38″ E. Vessels in the vicinity of the port should not navigate or anchor inside of a bearing 120°–300° running through this buoy position.

ANCHORAGE: Suggested anchorage area is within a 3,000 ft. radius of position Lat. 30° 33′ 00″ N., Long. 18° 35′ 40″ E. in approximately 90 ft. of water.

MAX. SIZE: Conventional berths: up to 60 ft. draft; up to 130,000 d.w.t.

Single Point Mooring: up to 75 ft. draft, up to 265,000 d.w.t.

HEALTH: By day – fly flag "Q" and by night display red light over white light for Quarantine Service.

Libyan Customs, Federal Police and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and "pratique" services. Libyan Government Regulations are strictly enforced. The vessel should have a clean Bill of Health or equivalent document from the last port of call. The vessel's Master and all members of the crew shall possess International Certificates of Health showing valid smallpox Vaccination Certificates.

RADIO: Direct communication by radio between ship and shore is by VHF International Maritime Mobile Radio-telephone Service to Ras Lanuf Oil Movements Control Centre. All communication between ship and terminal should be by way of this station. ETA messages to Mobilpro, Tripoli, Libya, via Tripoli Radio (call sign 5AT). Ras Lanuf Oil Movements Control Centre keeps continuous watch on VHF Radio-telephone Channel 16 (156.80 mc/s), Channel 14 (156.70 mc/s) and Channel 11 (156.55 mc/s). Vessels approaching the port should make contact on Channel 16 when shore will request her to switch to Channel 14. This Channel will also be used by terminal Marine Section for internal use and tanker mooring control. Channel 11 is reserved for communications between ships in mooring and Terminal Oil Movements Control Centre and should only be used for general purposes after obtaining clearance from Oil Movements Control on Channel 16. This is a safety measure since oil flow to ships is controlled through Channel 11 and therefore it must be clear at all times in case of need to stop oil flow for any cause. Channel 16 is for calling and safety use only.

TUGS: Not required. The company maintain launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Mooring Master.

BERTHING: There are 4 submarine loading pipe-lines which terminate in the following approximate positions which are each marked by an unlit white spar buoy.

Berth No. 1: Lat. 30° 31′ 35″ N., Long. 18° 34′ 37″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 224°. Depth of water at spar buoy 70 ft.

Berth No. 2: Lat. 30° 31′ 55″ N., Long. 18° 33′ 58″ E., from which a submarine pipe-line runs to shore on a bearing approximately 197°. Depth of water at spar buoy 70 ft.

Berth No. 3: Lat. 30° 32′ 18″ N., Long. 18° 33′ 19″ E., from which a submarine pipe-line runs to shore on a bearing of approximately 198°. Depth of water at spar buoy 73 ft.

Berth No. 4: Lat. 30° 31′ 50″ N., Long. 18° 36′ 06″ E. – a Single Point Mooring buoy in 95 ft. of water.

Raising, lowering, connecting and disconnecting of submarine hoses, as well as all other labours and duties on shipboard, will be performed by the ship's crew under direction of the Mooring Master.

LIFTING HOSES: After the vessel is securely moored the submarine hose will be hoisted on the port side. Berths No. 1 and 2 are each equipped with 2×12 in. loading hoses, the weight of each hose lift being approximately 5 long tons. Berth No. 3 is equipped with 2×12 in. loading hoses the weight of each hose lift being approximately 5.75 long tons. Therefore, all lifting equipment and tackle should have a safe working load of at least 6 long tons. Hoses are lifted by ship's gear and crew, and all connecting of hoses will be done by them. The lifting derrick, equipment, tackle, etc., should be topped off and ready on arrival.

The SPM is equipped with two 16 in. loading hoses.

MEDICAL: No medical services (except in case of emergency and subject to a doctor being available) or other services are to be expected at Ras Lanuf.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: When a ship is in the moorings or vicinity, its engines must remain on standby with full power for immediate use. Deck machinery shall be kept in instant readiness. *Positively no repairs of any sort will be permitted in the moorings.*

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition, saccharine and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed 25 cigarettes per day of stay or 25 grams of tobacco or cigars in lieu. Each man allowed 1 litre of beer or half litre of wine per day. Special allowances are made for Master under special circumstances.

CONSULS: The only consulates are located in Tripoli which is 670 km. by road from Ras Lanuf. These consist of U.S.A., British, Danish, Dutch, French, German, Greek, Indian, Italian, Norwegian, Spanish, Russian (U.S.S.R.), Turkish, Yugoslavian.

REPATRIATION: Crew members cannot pay off or leave the vessel at Ras Lanuf except in cases of extreme emergency. Even in an emergency it should be noted that Seamen's Books are not valid under the Libyan law. A valid passport is required.

BALLAST: Positively no provision is made for dirty ballast. Any ship arriving with dirty ballast will be rejected and all costs accruing therefrom will be to the ship's account. Notice of readiness shall not be accepted until vessel returns with clean ballast and tanks fit to receive cargo. She will on second arrival tender a new notice of readiness to load.

TIME: Libyan local time is GMT plus 2 hours.

GENERAL: No stores, foodstuffs or goods whatsoever of Israeli origin may be on board any ship calling at Ras Lanuf.

Penalties: Fine, confiscation of goods and possibly more. The Libyan Government strictly enforces this law.

Whilst arriving fly the Libyan Ensign (plain green).

Due to the existence in these waters of the fish commonly called "Weaver" fish, ship's crew are urged to exercise extreme caution in fishing whilst lying off the port area. There have been several cases of poisoning by these fish, all of which were distressingly painful, caused by contact with the fins.

SHORE LEAVE: Not allowed.

AUTHORITY: Mobil Oil Libya Limited, Tripoli.

TOBRUK: 32.04 N. 24.00 E.

Also refer to General – all ports.

PORT LIMITS: The complete water area existing within Tobruk Bay or that water area existing to the West of an imaginary line commencing as from Tobruk Peninsula up to the coast to the South.

It is formed of 3 areas inside the Bay, namely Marsa Tobruk, the proposed naval base and Marsa Al-Hariga Oil Terminal.

MAX. SIZE: Max. draft: 29 ft., max. length: 400 ft.

RADIO: Tobruk Radio (Station operated by Arab Gulf Oil, Operating times 0900/0930, 1300/1330, 1700/1730, 2100/2130 hrs.) 5AL: 420, 425 and 500, VHF (24 hours) Channels 12, 16 and 19.

BERTHING: Berths in Tobruk Harbour:

Quay No. 3: Length 82 ft. draft 11 ft.
Quay No. 4: Berth 1: Length 560 ft. draft 20 ft.
Berth 2: Length 395 ft. draft 28 ft.
Berth 3: Length 410 ft. draft 30 ft.

TANKERS: Refer to "Marsa Al Hariga".

STEVEDORES: All stevedoring operations and formalities to be done by Agents. 2 companies to be formed in the near future.

MEDICAL: Available.

FRESH WATER: Not Available.

FUEL: Not available.

REPATRIATION: Available via Benghazi.

DEVELOPMENTS: Port extension project under study.

REPAIRS: Not available; see "Tripoli".

AUTHORITY: Port Manager and Harbour Master.

TRIPOLI: 32.54 N. 13.13 E.

Also see "General" before first port.

PORT LIMITS: (a) The water area existing inside the actual breakwater and that which may fall within any new breakwaters eventually constructed in accordance with the Port Developments Project.

(b) The outer water area known as the navigational channel commencing as from the harbour entrance along the distinguishing marks of the channel for a distance of about 1 mile.

RESTRICTIONS: Any containers arriving on ro/ro ships should be on trailers.

MAX. SIZE: All types of ships with 27 ft. draft and less are safe in harbour.

RADIO: Tripoli Radio (coast station — 24 hours), 5AT, 476 and 500 kc/s, R/T 2182 and 2197, VHF Channels 16 and 6.

Tripoli Port Radio (24 hours), 5AI, 500 kc/s, R/T 2182, VHF Channels 10, 12 and 16.

BERTHING:

STEVEDORES: Two companies available.
CRANES: Electric floating crane available up to 100 tons.
MEDICAL: All facilities available.
FRESH WATER: Available by barge and alongside, should be obtained from Port Authority through ship's Agent.
FUEL: Available through Agent. A notice of 24 hours needed, advisable for Chief Engineer to check what grades are available.
REPATRIATION: Crew changes are possible.
AIRPORT: A number of major air lines operate to and from Tripoli airport which is about 27 km. from the city.
DEVELOPMENTS: Port extension project under construction.
WATCHMEN: Available.
CONSULS: Algeria, 34631; Belgium, 37797; Bulgaria, 35733; China, 32300; Denmark, 39413; France, 33526 & 33527; Germany, 33827 & 30554; Pakistan, 40072; Poland, 31768; Saudi Arabia, 30486; Spain, 35463 and 33275: Sudan, 39181 and 39182; Sweden, 32343; Switzerland, 32416; Greece, 36978 and 36689; India, 41835; Iraq, 34235; Italy, 34131; Jordan, 32707; Kuwait, 40282 and 40281; Lebanon, 33733 and 32289; Malta, 38081 and 38082; Morocco, 34239 and 40188; Netherlands, 41549 and 41550; Syria, 31783; Tunisia, 31051/2; Turkey, 37728; U.S.S.R., 30554; U.K., 31191/5; U.S.A, 34020 to 34029; Venezuela, 36838; Yugoslavia, 34114 & 33392.
POLICE/AMBULANCE/FIRE: Main port call; 39111, 35010, 31518. Karamanli wharf call: 30378, 35010, 31518.
SHORE LEAVE: Allowed after free pratique, custom and immigration formalities completed.
DRYDOCK: *Floating Dock:*

Length over platform	136.700 m.
Length over pontoon	121.200 m.
Moulded outer breadth	30.600 m.
Inner clear breadth	23.400 m.
Depth of pontoon at CL	3.100 m.
Height of keel blocks	1.200 m.
Depth of water above KB	6.400 m.
Lifting capacity	5,000 tons

Spare parts to be supplied by ship's owner. 3 kinds of marine paint are available.
AUTHORITY: Port Manager and Harbour Master.

ZUARA: 32. 55 N. 12.07 E.

Also see "General" before first port.
PORT LIMITS: a) The water area existing between the actual breakwater and that which may fall within any new breakwater eventually constructed.
b) The water area known as the navigational channel existing outside the harbour entrance for a distance of about 0.5 miles (1 km.).
RESTRICTIONS: Port for ships laden with direct delivery cargo only.
MAX. SIZE: Ships up to 13 ft. draft and 65 m. length are safe in the harbour.
RADIO: Tripoli Radio and Port Radio use VHF Channel 16.

AUTHORITY: Port Manager and Harbour Master.

ZUEITINA: 30.51 N. 20.00 E. (See Plan Book)

Also refer to "General – All Ports".
LOCATION: The Terminal Light float, moored in position 30° 56′ 00″ N. 20° 00′ 00″ E., has a red hull with a red tower; it shows at night a white light flashing "Z" every ten seconds. A prominent landmark is the radio mast (height 451.5 ft. above sea level) in position 30° 49′ 57.6″ N. 20° 03′ 05.5″ E.; it displays at night three red lights in a vertical line – the top light flashing, the two lower fixed. The top light is on top of the mast (which is 400 ft. above the base), the middle light is 266 ft. above the base, and the lowest light is 133 ft. above the base. At night flares at the Liquid Petroleum Gas Plant, in position 30° 54.2′ N. 20° 05.4′ E., can be seen from a considerable distance; by day a column of smoke emanating from this position is also conspicuous. Fourteen large oil tanks, painted white, near the foot of the Radio mast, are prominent landmarks.
Positions of Moorings:

"Alpha" berth	30° 53′ 30″ N.	20° 01′ 05″ E.
"Bravo" berth	30° 52′ 18″ N.	20° 01′ 24″ E.
"Charlie" berth	30° 52′ 08″ N.	20° 00′ 11″ E.
"Delta" berth	30° 50′ 56″ N.	20° 00′ 26″ E.
"Echo" berth	30° 50′ 16.4″ N.	19° 59′ 16.1″ E.

FLAGS: When arriving at Zueitina by day, ships must display, in addition to their own national ensigns, the Libyan flag and the appropriate quarantine signal. Throughout the ships' stay, during daylight hours, they must display the Libyan flag, their own national ensigns and, when applicable, the International Code signals "B", "H" or "G", and the appropriate quarantine signal.
DOCUMENTS: Soon after vessel's arrival, a Custom's Officer will board, accompanied by a Company employee, who will act on behalf of the ship and its Agent, as well as on behalf of the Company, in the execution of essential business. The following documents, signed by the Master and imprinted with the ship's official stamp, are required by the Customs Official for the Customs and Immigration Departments and for the Port and Lights Authority:

2 copies Entering and Leaving Territorial Waters Certificates.
2 copies Report Inwards Certificates.
2 copies Crew Declarations of Dutiable Goods.
2 copies Crew Declaration List.
2 copies Report Outwards Certificates.
3 copies Boycott Certificates.
2 copies Stores Lists.
5 copies Crew Lists.
1 copy Clearance from Last Port of Call.
2 copies Tanker Characteristics Certificates.
1 copy Certificate of Discharge, from the Discharge Port Authorities, of the last cargo loaded in Zueitina.

With the exception of the Crew Lists and the Stores Lists and the clearance from the Last Port, the above forms will be provided by the Company clerk.

It is important that the Master should be able to produce a properly authenticated certificate of discharge covering the last cargo loaded into the ship in Zueitina. If for some reason he is not in possession of such a certificate, he must write a letter of explanation which includes the pertinent extracts from the ship's logbook, append his own signature to it and stamp it with the ship's official seal, and address it to the Ministry of Petroleum, Es Zueitina, SPLAJ. If the explanation for failure to produce the certificate is considered satisfactory the ship may be permitted to load. If there appears to be any suspicion that the last port was not as stated, the ship will be turned away.

If the vessel has not previously loaded in Zueitina, the Master is required to confirm this fact in an official letter, stating also the ship's last port of discharge and giving an undertaking that the cargo about to be loaded will not be discharged in any of the countries to which the Arab embargo extends.

The Mooring Master will, after boarding, lose no time in informing Zueitina Marine that he has received one or other of these foregoing documents from the Master, which he will, at the first opportunity, send ashore for delivery to the Ministry of Petroleum representative. This will ensure that there is no unnecessary delay in the commencement of loading.

On completion of loading, the Company's clerk will again board the ship with the cargo documents which are to be signed by the Master. The clerk has to deliver to the Master one copy of each document for his own use and one copy for consignee and bring the rest of documents ashore with him.

1. Bill of loading
2. Cargo manifest
3. Time sheet
4. Certificate of Origin
5. Master's receipt
6. Export manifest

all of which forms are provided by the Company or by the Agency. He will also take ashore any letters to be posted. On occasions, a Customs Official will visit the ship with the documentation clerk prior to sailing to ensure that the seals which were put on the bonded stores lockers have not been tampered with before the ship has left Libyan waters.

The documentation formalities prior to the ship's departure, are usually completed whilst the ship is unmooring from the berth, or just after it has left the berth, hove to with the Mooring Master still aboard. Sometimes, however (and particularly after the loading of "Agip" cargo), the processing of the papers ashore may take longer than usual, and the ship may have to anchor to await the clerk's eventual arrival, in which case the Mooring Master will direct it to a safe anchorage before disembarking. Zueitina Marine will then inform the Master when the launch bearing the clerk is about to leave the Small Craft Harbour, in order that the anchor may be weighed, and a lee side presented to the launch.

For information relating to ships' movements at Zueitina Terminal, such as arrival times, delays in berthing, quantities of cargo loaded in their vessels, tanker owners and agents, should contact Occidental International Oil, Inc. 16 Palace Street, London SW1E 5BQ. Telephone 01-828 5600.

ACCEPTANCE PROCEDURE: *Notice of Readiness, Laytime etc:*

Vessels Loading Crude Oils: A vessel for which a berth is available on arrival will be boarded by the Mooring Master at the Terminal Light float and, providing that the vessel is in all respects ready to commence loading (except for the necessary de-ballasting time), the Notice of Readiness will be accepted at the time of the Mooring Master boarding, subject to the provisos – a, b, c and d, below.

If the vessel is not in all respects ready to proceed to the berth, with main engine and auxiliaries fully manoeuvrable, mooring ropes on deck, anchors, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

A vessel which has been instructed by Zueitina Marine to anchor in the roadstead on arrival should, after doing so, inform Zueitina Marine of the precise anchorage time, which time will, for the purposes of berthing order and the Port Log, be considered as the vessel's arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:–

(a) that it is within the hours of daylight – deemed to be from 06.00 hrs. (local time) to 18.00 hrs. (local time),
(b) that it is not a Public Holiday, or a Friday (the Libyan Sabbath), unless the vessel is actually handled on that day,
(c) that the port is open, and
(d) that the vessel has been nominated to load.

An exception to clause (a) above, is when conditions allow of night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In the case of a vessel arriving without nomination, the Notice of Readiness will be accepted when notification of her nomination has been received at the Terminal, subject to provisos (a), (b) and (c) above, and instructions from the Company's Operations Department. On occasions when the Company deems it advisable to berth a vessel prior to the date of the nominations, acceptance of the Notice of Readiness will be at the time the Mooring Master boards, providing that the anchor is then aweigh.

In addition to clauses (a), (b) and (c) and (d), above, vessels will not necessarily be accepted when arriving at a time ahead of, or behind, their last scheduled Estimated Time of Arrival, especially if such acceptance would be at the expense of a vessel that has arrived within its nominated period.

Vessels Loading Liquid Petroleum Gas: A Liquid Petroleum Gas Tanker's Notice of Readiness will be accepted on arrival, provided that:

(a) the port is open ("port" meaning, in this case, the LPG berth),
(b) that it is not a Friday (the Moslem Sabbath) or an official holiday, unless the ship is actually handled on that day,
(c) that it is not during the night hours – deemed to be, at the LPG berth, between 18.00 hours and 06.00 hours (local time) – unless the ship is actually handled during that period,
(d) that the ship does not arrive on the same day, or clash with the loading of, another LPG tanker chartered under a LINOC contract,
(e) that the ship's tanks are in such a state of readiness, i.e., requiring no cooling, no purging, that loading can be commenced at *full rate* immediately the hoses are connected,
(f) that the arrival time does not differ appreciably, either before or after, from the last signalled ETA sent by the ship and received at the Terminal, and
(g) that the vessel has been nominated to load.

When a Liquid Petroleum Gas tanker does arrive whilst the port is closed, the Notice of Readiness will be accepted at the time of the opening of the port, subject to provisos (b), (c), (d), (e), (f), and (g).

The N.O.R. of an LPG loader arriving on a Friday or on an official holiday, or during the aforesaid night hours, will be accepted at 06.00 hours (local time) on the first subsequent working day, subject to provisos (a), (d), (e), (f) and (g).

An LPG tanker arriving on the same day as an LPG tanker scheduled to load under a LINOC contract, or whose loading would clash with an LPG tanker scheduled to load under a LINOC contract, will have its N.O.R. accepted on the completion of hose connection, subject to provisos (e) and (f).

PILOTAGE: A Mooring Master will board the vessel in the close vicinity of terminal Light float and advise Master on all manoeuvres relative to berthing, connecting and disconnecting the hoses, and in all operations within the anchorage or berthing area.

Vessels of 40,000 d.w.t. and upwards should have a pilot ladder long enough to reach the Mooring Master's launch rigged just abaft the accommodation ladder, in such a manner that the Mooring Master can transfer to the accommodation ladder when about 10 ft. from sea level. Ladders must be strong, clean, and in good state of repair and conform to international requirements. In cases where the ladder(s) fails to conform with these requirements, the Mooring Master will decline to board until an adequate ladder has been provided. A good lee should be made, to allow the launch to come alongside and the Mooring Master to board safely. (Note: Ships which have been instructed to berth at the S.P.M's, and need to take the Company's gear aboard, should have the ladder(s) rigged on the port side, in order that they may take it aboard from the Mooring Master's launch with the working derrick as soon as the Mooring Master has boarded.)

The Mooring Master may require the vessel to unberth at any time he deems it necessary for the safety of the vessel, or the installations, or both, or because of infringements of the Port Rules by the vessel.

As soon as practicable after boarding, the Mooring Master will inspect the mooring and lifting equipment and the ballast, and not until he has assured himself that the equipment is adequate, and the ballast clean, will the ship be accepted. His opinion of the adequacy of the gear, and of the cleanliness of the ballast, shall be final.

ANCHORAGE: Vessels awaiting the Mooring Master, whether for berthing in the crude oil berths or alongside the LPG berth, should heave to in the close vicinity of the Terminal Light float. If they are obliged, or instructed to anchor, they should do so in the recommended anchorage, which is within the radius of a circle centred in position Lat. 30° 55′ N., Long. 20° 01′ E. Under no circumstances should they anchor South of the 30° 54′ 00″ parallel. Whilst at anchor, they should exercise the utmost vigilance, and should keep in VHF radio-telephone with the Terminal at all times. If heavy weather necessitates them heaving up anchor and proceeding to sea, Zueitina Marine must be informed accordingly.

RADIO: Cable Address: OXYPORT OXYLIBYA TRIPOLILIBYA (via Tripoli Radio) OXYOIL LONDON (via Portishead Radio). 72 hours prior to arrival at Zueitina, Masters should advise the Company of their vessels' ETA, by cables sent both via Tripoli and via Portishead Radio to the addresses given above. They should subsequently confirm or amend them when they are 48 hours and again when they are 24 hours distant from the Port.

(Cables to Agents advising of ETAs should be sent in addition to, and *not* in place of, those sent to OXYPORT, TRIPOLI and OXYOIL LONDON.)

Cables should include the quantity and grade of cargo to be loaded, the last port of call and destination, Bill of Health status and details of any sickness on board. Estimated times of arrival should be given in GMT. (Libyan Standard Time is GMT plus 2 hours.).

Masters of vessels equipped with VHF radio-telephones should contact Zueitina Marine on Channel 13 or Channel 16 when within range, and give a firm calculated time of arrival at the Zueitina Light float. They should also again inform Zueitina Marine Duty Officer of the quantity and grade of cargo required, the last port and the destination. They should confirm that they have in their possession a certificate of discharge for the last cargo loaded into their ships in Zueitina or, in cases of ships arriving in Zueitina for the first time, that they have ready for the Ministry of Petroleum a letter which certifies that the cargo which they are about to load will not be discharged in any country against which the Arab Oil Embargo extends. In vessels paying their first visit to the Terminal, Masters should also inform the Duty Officer of the size and type of the manifold connections (i.e. 12 in. A.S.A., or 10 in. European, etc), and whether or not they have on board heavy wires and shackles for mooring at the mono-buoys.

(N.B. It is important that all ships arriving at Zueitina are fitted with VHF radio-telephones, capable of operating on the main working Channels. Without VHF communications, Zueitina Marine cannot always know with accuracy a vessel's arrival time, and as a result that vessel might well lose its loading turn and be subjected to an appreciable – and, with VHF, avoidable – delay in consequence.)

An aerial radio beacon is located on the North-Eastern arm of the Small Craft Harbour, in position 30° 54′ 05″ N., 20° 04′ 12″ E., intended as an aid to navigation for aircraft flying to and from Zueitina airstrip. The beacon transmits continually the call sign ZUE, on 369 kHz: the signal, which is omni-directional, has a range in excess of 100 miles.

HEALTH: Pratique will be granted by the Custom's Official. He will examine the ship's logbook, and will inspect and seal the bonded storerooms.

All ships must display the appropriate quarantine signal until given pratique.

TUGS: No tugs available to assist berthing. One to five mooring launches of 370 h.p. as required, are used to assist berthing operations.

BERTHING: The sea terminal consists of five berths for loading crude products, two of which – "Bravo" and "Delta" – are conventional buoy moorings, and the others – "Alpha", "Charlie" and "Echo" – are "single-point moorings", or "mono-buoys". Conventional buoy moorings "Bravo" and "Delta" are approximately 2.5 miles offshore, with an average depth of 70 and 80 ft. respectively. 42 in. (ID) submarine lines connect the berths to the shore installations. To the header at the seaward end of each of these submarine lines are connected two strings of flexible reinforced rubber hoses, laid on the sea bed and buoyed when not in use. The forward of the two strings is made up of (from the header) three 30 ft. lengths of 24 in. i.d. hose, two 30 ft. lengths of 20 in. i.d. hose, and seven 30 ft. lengths of 16 in. i.d. hose. The after string is similar, but with one less length of 16 in. i.d. hose. To the seaward extremity of each hose string is fitted a 16 in. to 12 in. A.S.A. reduction flange. When the ship has berthed, each hose string is towed in to the ship's side below the manifold by the attendant launch, to be hove up by crane or derrick and bolted to the ship's connections, *invariably on the port side*. Where the ship's connections differ from the 12 in. A.S.A. flange on the hose, suitable reduction spools must be fitted. The weight to be lifted on each hose is approximately 7 tons.

Single-point moorings, "Alpha", "Charlie" and "Echo" are all approximately 3 miles offshore, in an average depth of 100 ft. of water. The submarine pipe-lines to "Alpha" and "Charlie" berths are of 48 in. i.d., that to "Echo" berth, 42 in. i.d. Particulars of the strings of hoses from the header to the ship's manifold are described in detail in the chapter on "Single-point Moorings". As in the conventional buoy berths, *the hoses are always taken up on the port side*, and the connecting flange on the hose is 12 in. A.S.A. pattern. The weight to be lifted is approximately 7 tons, but this is to some extent dependent on the ship's freeboard.

Mooring Equipment: As a guide to Masters who intend to save time and labour, especially in these days of reduced "general purpose" crews, by equipping their ship with the requisite mooring gear, the following standard requirements is suggested:

(a) Two (2) flexible steel slip wires, 1.75 in. dia., 5.5 in. circumference, 130 ft. in length, or longer if the distance from the fairlead to the bitts is such that 130 ft. would be insufficient to make fast safely. Such slip-wires will have an eye spliced in one end only.
(b) Two (2) screw-pin or threaded bolt and nut, bow shackles, bow size 2.5 in., pin diameter 2.75 in., minimum width, jaw to jaw, 4 in.: breaking strain 150 tons.

Single-point Moorings. The "Mono-buoy" is a large cylindrical buoy (weight 106 tons), divided by steel bulkheads into four water-tight compartments, through the centre of which emerges the loading hose. The perimeter of the buoy, to which the buoy-to-ship moorings are attached, is a turntable which revolves on bogies round the centre – hose-supporting – section, in such a manner that the vessel berthed on the buoy will always lie head to wind. The minimum depth of water within the swinging radius of the largest ship envisaged at the buoy is approximately 95 ft.

To the mono-buoy is attached a 240 ft. length of chain cable, made up of 2.375 in. U3 steel studded links, and supported in polyeurathene buoyancy collars, at the seaward end of which is a "chafing chain". This "chafing chain" is 20 ft. long and of similar construction to the main chain, but with three open links at the end: it is detachable for periodic renewal. To the end of the chafing chain is attached the "approach rope" – a 200 ft. length of 10 in. circumference plaited polypropylene which, when not in use, is allowed to float out free from the buoy.

The ship approaches the buoy from downwind, taking care to keep the wind right ahead (adequate ballast should be retained aboard to provide manoeuvrability). When sufficiently close, the crew will lower to the attendant launch the end of a good mooring rope, to the eye of which has been attached a stout nylon lashing, about 2 fathoms long. This mooring rope should be passed out through a central panama lead, if a suitable one exists, or over a fairlead on the port bow (when the ship is fitted with a bulbous bow, a line put out through a central lead, should be brought back down the bow and then lowered to the water, to avoid the possibility of the launch, when coming in to collect the end of the rope, coming into contact with the bulb). Meanwhile, two heavy 5.5 in. circumference flexible steel slip wires have been made fast in readiness – one on each bow, if the line is being hove through a central panama lead, both on the port side (and preferably on different sets of bitts) if the port fairlead is being used – in such a manner that there is an adequate number of turns around the bitts and that the end of the eye reaches to approximately 10 ft. and 10 ft. 9 in. respectively from the fairlead. When the chain comes aboard, it is quickly secured to the wires by two 150 tons B.S. shackles, which are bolted through two of the open links in the chafing chain. The strain on the approach rope (which had followed the ship's rope round the drum-end of the windlass) is now released, and the weight allowed to come on to the wires, shackles chain, and buoy composite: the approach rope is then "turned-up" as an additional mooring and the ship is now all fast in the berth. Ship's tension wires, or other mooring lines, should also be shackled or lashed to the chain, for added security.

When leaving the berth, the ship's additional moorings are first detached from the chain, any slack which is in the approach rope is taken in and that rope made fast very securely. The slip wires are then slacked off slowly and carefully until the strain comes on to the approach rope (when strong winds have tightened the mooring, it will probably be necessary to put the engine slow ahead before attempting to do this). The shackles can then be taken adrift, freeing the wires, and the approach rope slacked off until the chain reaches the water – care being taken to ensure that it is not allowed to fall across the hoses. The engine is then put astern, and the rope allowed to pay out easily (with half a turn around the bitts to stretch it clear) as the ship leaves the buoy.

(Reminder – unlash the ship's rope from the approach rope before unmooring from the buoy!).

Loading. Rate of loading is between 32,000 and 50,000 b.p.h.

Conventional Buoy Moorings. In berths "Bravo" and "Delta" the ship is berthed with two anchors streamed out ahead and mooring lines to 5 buoys round the stern and quarters. In addition, to all buoys except No. 3 (right astern) there are attached 5.5 in. circumference steel wires, laid on the sea bed, buoyed, when not in use — in all but the most settled weather these are brought into the ship by the mooring launch, hove up and made fast on board. Vessels should have ready a good 3.5 in. rope messenger to take up these wires, and strong chain stoppers, or "carpenter's stoppers", for use when securing them.

Before the ship reaches the berth, there should be three good mooring lines ready on the after end of the main deck, two of which have been securely married in readiness to be sent away first, to warp the ship round. At least seven good ropes should be ready for running out from the poop, with lashings ready in case one rope has to be married to another. Plaited polypropylene ropes, at least 120 fathoms long and of a diameter and strength appropriate to the size of the vessel, are recommended: large manilla ropes, slow and cumbersome to handle, are definitely unsuitable for berthing under these conditions.

Synthetic ropes on automatic winches are favoured in this port, but it is recommended that they be at least 150, and preferably 200 fathoms long. The winches must be capable of being firmly locked when in the moorings — any tension feature is not permissible.

When it has been necessary to slip moorings in order to leave the berth quickly and without the assistance of the mooring launches, the Company will make every effort to recover them and to return them to the vessel as soon as possible. Normally the Company makes no charge for recovering anchors and moorings, but it reserves the right to do so under exceptional circumstances.

In the conventional buoy moorings, in order that ships may be securely moored against beam winds and with sufficient chain leading ahead to ride out heavy swells, it is recommended that they be equipped with ample chain on both bower anchors. Experience gained in sea berths suggests that the chain required on each anchor should be more than the length of the ship. In vessels of 100,000 d.w.t., for which the berths were designed, it is recommended that there should be 14 shackles (1,260 ft.) of chain on each anchor. A minimum acceptable amount of chain is 10 shackles (150 fathoms) for the safety of the ship and the company's installations. Anchor marker buoys should be used.

HOSES: The lifting, lowering, connecting and disconnecting of the cargo hoses will be done by the tanker's personnel in accordance with the advice and directions of the Mooring Master. Ship's derricks and deck winches should be capable of operating with a safe working load of 7.5 tons and preferably 10 tons. Vessels with inadequate hose-lifting equipment will be rejected. All derricks should be fitted with "preventer-guys" in addition to normal guy tackles. The port derrick must be rigged and ready for use on arrival. In addition ships leaving SPM should have the starboard derrick ready, too, in order to facilitate the discharge of the mooring gear on the lee side.

Sets of bitts, or strong staghorns, for hanging off the hoses, must be provided, suitably located near the manifold.

On the surface, extending from the buoy (to which it is connected by a Chiksan swivel (a universal joint), is a hose string comprised of 21 (at "Echo") 25 (at "Alpha" and "Charlie") 30 ft. lengths of 24 in. i.d. floating hose, culminating in a floating junction box: from the other side of this junction box emerge two strings of four lengths of 16 in. i.d. hose. The end ones – the "over-rail" hoses – are fitted with 16 in. to 12 in. A.S.A. reduction flanges, which, after the hose has been hove aboard, are bolted or clamped to the ship's manifold.

For V.L.C.C.s, additional lengths of floating hose are inserted if necessary.

LOADING: *Occidental crude oils and debutanized condensate:* The principal cargo loaded at Es Zueitina Terminal is Occidental Field Blended Crude Oil, pumped in from the Company's wells, two hundred and twelve kilometres inland, but in addition certain other grades of Crude Oil are loaded, namely, Occidental Medium Crude, Occidental Premium Crude, and Occidental Debutanized (Stabilized) Condensate. Also loaded are Liquid Petroleum Gas products, Butane and Propane (LPG) see "LPG Loading Berth", and "Agip" Buattifel Crude Oil, from the wells of Agnezia Generale Italiana Petroli, in concession 100.

The following pertinent data will, we believe, be of interest to tanker owners and operators, Masters and Mates, and to refinery operatives in the discharging ports:-

Occidental Field Blend
Average A.P.I. 40.1
Average Specific Gravity 0.8246
Pourpoint +35
Reid Water Vapour Pressure +5.2 p.s.i. at 100° Fah.
H_2S less than 5 p p m.
Flash Point below 60° Fah.
Average loading temperature on board 108° Fah.
Barrels per long ton at 60° Fah. 7.741

Occidental Medium Blend
Average A.P.I. 36
Average Specific Gravity 0.8448
Pourpoint +85
Reid Water Vapour Pressure +5.0 p.s.i. at 100° Fah.
H_2S less than 5 p p m
Flash Point below 60° Fah.
Average loading temperature on board 98° Fah.
Barrels per long ton at 60° Fah. 7.582

Occidental Premium Crude
Average A.P.I. 43.5
Average Specific Gravity 0.8086
Pourpoint +30
Reid Water Vapour Pressure +5.6 p.s.i. at 100° Fah.
H_2S less than 5 p p m
Flash Point less than 60° Fah.
Average loading temperature on board 108° Fah.
Barrels per long ton at 60° Fah. 7.922

Occidental Debutanized (stabilized) Condensate and Debutanized Condensate:
Average A.P.I. 78.0
Average Specific Gravity 0.6706
Pourpoint −60° Fah.
Reid Water Vapour Pressure 11.0 p.s.i. at 100° Fah.
H_2S less than 1 p p m
Flash Point less than 0° Fah.
Average loading temperature on board 75° Fah.
Barrels per long ton at 60° Fah. 9.555

The grades of cargoes to be loaded will affect the berthing schedule, irrespective of the chronological sequence of vessels' arrival times.

It is recommended that vessels take the maximum flow with due regard to safety, in order to both expedite the turn-round time and to obtain the bottom-weight to counteract the possible effect of local winds which frequently spring up with little warning.

Care must be taken not to overload, as there is no provision whatsoever for cargo once loaded to be pumped back ashore.

Warning is given of the danger of closing hoses against an incoming oil flow. Such a procedure may create excessive pressures which result in damage to loading hoses, sea lines, and other Terminal equipment. Vessels which ignore this warning and do in consequence cause such damage will be held responsible for all costs incurred for the renewal or restoration of the damaged equipment.

The attention of Masters is drawn to Safety Precautions, wherein they are reminded of their responsibilities for ensuring that all persons aboard their ships are cognizant with the hazards involved in the loading operations, and with the need for strict observance at all times of the Fire and Safety Rules. Debutanized Condensate, in particular, is a highly volatile fluid which must be treated with the utmost prudence.

(N.B. particulars of cargoes included in the foregoing are for information only and do not constitute a guarantee of quality.).

Loading – A.G.I.P "Buattifel" Crude: Because of its high wax content – 37% – A.G.I.P. "Buattifel" Crude Oil, (hereafter referred to as "Agip") has to be maintained at a very high temperature throughout its entire transit from the wells to the Terminal system, and thence via the sea lines to the berth and the loading vessel: it will arrive on board at approximately 140° Fah., and the heating coils in the cargo compartments must be motivated in readiness and be capable of keeping the oil at above this temperature.

Two berths "Bravo" and "Charlie", have been modified for the loading of Agip cargoes – ships may be moored in either of these berths but because of the considerable heating problem involved only one of the berths at a time can be used for loading Agip cargo. Through the submarine lines to "Bravo" and "Charlie" central "gut" lines have been inserted – at "Charlie" berth where the sea line is 48 inches diameter, the gut line is of 18 inches diameter, and at "Bravo" – sea line 42 inches diameter – the diameter of the gut line is 16 inches. These two gut lines (which are, of course, tied in ashore with the Terminal tank and metering and pumping complex) terminate 20 ft. from the headers at the seaward ends of the sea lines. The area between the outside of the gut line and the interior wall of the sea line is called the "annulus". To the headers (from which emanate the strings of flexible hoses which are ultimately bolted to the ship's manifold connections) are fitted remote control hydraulic valves, operative from the loading station within the Terminal.

Immediately prior to the berthing of the prospective Agip loading ship, hot Occidental crude oil is circulated from its storage tank, through the gut line, and back through the annulus, heating the entire system. Once the ship is securely moored, preparations are made to replace the hot "Oxy" oil with hot Agip oil. (60,000 barrels is the full line content at "Charlie", 33,600 barrels at "Bravo"). This process will take about four hours, and ship and shore must work in conjunction to ensure that the deballasting and the recirculation of the line with hot Agip oil are completed at about the same time. This is of vital importance, for once the line system is filled with hot Agip cargo it cannot remain in circulation for more than one hour. If the ship is not then ready to receive it, the Agip oil must be replaced by Oxy oil, and only after this has been circulated round the line can the line be again replenished with another circulation of Agip oil. This entire process may take about twelve hours – a wastage of time which neither the Terminal nor the ship operators can afford to contemplate with unconcern.

When ship and shore are ready to begin loading, the remote control valves are opened and, at a very slow rate, the cold Oxy oil which has been in the flexible hoses is loaded – 1,500 barrels at "Charlie", 300 barrels at "Bravo".

At this point, the loading officer in the ship will transfer the cargo to other tanks to avoid intermingling of the two types of crude, for now hot Agip is entering the ship's system, from the gut line. Loading continues at a slow rate until the contents of the gut line – 6,000 barrels at "Charlie", 3,600 at "Bravo" – have been pumped into the ship, after which the loading of the Agip, at normal rate, is through the annulus only. (The gut line is, at this point, filled with Oxy oil, which will remain static throughout the loading of the Agip cargo).

With about 2,000 barrels of Agip cargo to go to completion, loading is stopped in order that the ship's loading officer may check his ullages and calculations. When, in "Bravo" there are 300 barrels to go, in "Charlie" 1,500 barrels, loading is again stopped briefly: this marks the completion ashore of Agip cargo being pumped into the circuit. Now the Oxy oil in the gut line is pumped into the flexible hose strings, so that when the required quantity of Agip oil has been loaded into the vessels, the hose strings – from the headers to the terminal flanges, disconnected from the manifold – are filled with Occidental crude oil, which will not solidify whilst the hoses lie dormant under the sea. Similarly, the Agip crude oil in the annulus of the sea line is pumped back into the tank ashore and replaced throughout the system by Occidental crude.

The foregoing explanation pertains to vessels loading Agip cargo only, taking the minimum essential Occidental oil solely as a line flush. If, however, a ship requires a part cargo of Occidental crude, it will load that after completing the Agip cargo, except for that small quantity used as the line flush at the commencement.

A.G.I.P. "Buattifel" Crude, particulars:-
Average A.P.I. 41.0 at 60° Fah.
Average Specific Gravity 0.806
Wax Content 37%
Pourpoint +95
H_2S Nil
Flash Point 68° Fah. (ABEL)
Average Loading Temperature on board 140° Fah. to 150° Fah.
Barrels per Long Ton 7.9 (approximate)

(N.B. The above data is for information only and does not constitute a guarantee of quality).

LPG LOADING BERTH: *Berth, location and nature:* The LPG loading berth is S.S.W. of the Small Craft Harbour, inside Tre Scogli reef. It is designed for vessels of approximately 700 ft. in length, with a cargo capacity of 32,000 cu.m. The maximum permissible loaded draft (1977) is 28 ft., but dredging operations will eventually allow ships to be loaded to a maximum draft of 32 ft.

The channel through the reef, between Trinity Beacon (black tripod structure, group flash 4, green, every 10 seconds) and Wafeya Beacon – Scoglio Sud – (red skeleton tower, group flash, 6 every 10 seconds) runs in a 315° (T) – 135° (T) direction: it is marked by two leading marks, the front one in position 30° 53′ 16″ N., 20° 03′ 42″ E., and the rear one 750 m. (2,460 ft.), 135° (T), from this position. Both marks are black steel pylons with black and red oblong grid topmarks: the front one shows at night an amber light flashing every 1.5 seconds, whilst the rear one shows an amber occulting light, the period of light being six seconds every ten seconds. A small white spar buoy, showing at night a quick flashing red light, marks the turning position for ships approaching or leaving the berth.

The loading platform is of structural steel, supported on concrete piles, and faced with heavy rubber fenders. Ships are berthed alongside four breasting dolphins (two of which are incorporated into the loading platform), with other mooring dolphins ahead and astern and on the inside bow and inside quarter. Ships approaching the berth swing round on the port anchor and about six shackles of chain – when moored, the chain is hove tight and, with a swamp wire on the port quarter, provides an additional safeguard.

Only one loading line is used, with a connecting flange of 12 in. A.S.A. It is hove on board the ship with the ship's derrick or crane, or radial davit. There is no return vapour line.

Such is the location of the berth – fully exposed to winds from most directions but sometimes protected partially by the reef from the worst effects of the swell – that on occasions LPG tankers cannot be berthed although the crude oil berths in the harbour are operational. And vice versa. Consequently, with regard to Port Closure Time, the LPG berth is regarded as a separate entity from the main harbour.

Arrival: On first contacting Zueitina Marine by VHF (Channel 13 or 16), the Master of an LPG tanker should, in addition to giving his ETA at the Terminal Light Float, inform Zueitina Marine of his last port, the intended port of discharge after leaving Zueitina, the quantity and grade of cargo required, the temperature at which he wishes the cargo to be loaded, the size of the ship's manifold connections, and whether or not he has aboard a certificate of discharge for the cargo loaded in Zueitina.

If the vessel is to berth on arrival, the Mooring Master will board in the close vicinity of the Terminal Light Float. If the ship is instructed to anchor, the Master should do so in the recommended anchorage.

Pratique, Customs Formalities: If the ship has been obliged to anchor, pratique and Customs formalities may be dealt with in the anchorage. Alternatively, they may be attended to on board after the ship has berthed.

For information regarding documents required on arrival, Customs and Immigration procedure see "Documents".

Loading: For a ship which needs tank purging and cooling prior to loading, the minimum rate will be approximately 100 barrels per hour. Inert gas is not provided at Zueitina Terminal – the vessel must provide inert gas for purging after previous cargoes other than butane or propane. The ship will not be loaded until the air has been purged to a maximum oxygen content of 0.5%. When loading has commenced, the minimum rate permitted by the Libyan Ministry of Petroleum is 1,500 barrels per hour. The maximum rate available is between 6,000 and 7,000 barrels per hour. For "topping off", the rate can, within these limits, be adjusted to the requirements of the loading officer. Arrangements can be made in advance for the LPG plant to stop loading when the desired quantity has been metered into the ship, or alternatively, the ship's loading officer can instruct the Terminal to stop loading when he sees that the correct amount has been received aboard.

Loading operations on board are the responsibility of the ship's personnel. The Master's attention is particularly drawn to the Terms of Acceptance as detailed in the "Tanker Loading Advice" letter which he has signed, and to the "Zueitina Marine Terminal, Fire and Safety Rules".

The loading platform – abreast of the ship's manifold and within easy hailing distance – is manned at all times during loading operations, and the ship *must* maintain a continuous verbal contact with the loading operative. In addition, VHF contact between ship and loading installations must be maintained on Channel 12. In the event of any emergency – fire, leakage, parting of moorings, etcetera – the operative on the platform can stop the loading by remote control.

Unberthing in bad weather: Should deteriorating weather conditions necessitate the vessel leaving the berth quickly, a Mooring Master will be speedily available at all hours.

Cargo Particulars: The following data will, we believe, be of interest to Masters and Mates and operators of vessels loading LPG products:-

Propane
Average A.P.I. 146
Average Specific Gravity 0.510
Reid Vapour Pressure 175 p.s.i.g.
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0° Fah.
Average Loading Temperature −43° Fah. (−42° Cent.)
Barrels per Metric Ton at 60° Fah. 12.3 (approx).

Butane
Average A.P.I. 114.2
Average Specific Gravity 0.576
Reid Vapour Pressure 48 p.s.i.g
Free Water Nil
Copper Strip Corrosion 1a
Flash Point less than 0° Fah.
Loading Temperature at Ship's Request, within Ranges +18° Fah. (−8° Cent.) to +35° Fah. (+2° Cent.)
Barrels per Metric ton at 60° Fah. 10.8 (approx.)

(N.B. The foregoing data is intended for information only, and does not constitute a guarantee of quality.)

Departure: Immediately after completion of loading, the manifold connections are unbolted and the loading arms retracted. Shortly afterwards the Mooring Master will board and, with the assistance of adequate mooring boats, unberth the ship and pilot it through the reef to a safe anchorage in the outer harbour before disembarking.

When the documents pertaining to the ship's loading have been completed ashore, a clerk will take them out to the ship. (On occasions he will be accompanied by a customs official, boarding the ship to ensure that the seals which were put on bonded storerooms on arrival have not been tampered with before the ship has left Libyan territorial water.) It is customary for Zueitina Marine to inform the ship's Master when the documents clerk leaves the Small Craft Harbour, so that the anchor may be hove up and a lee side presented to the launch.

After the documentation formalities have been completed on board, the Master is required to pass by VHF to Zueitina Marine the official sailing time of his ship.

MEDICAL: Medical facilities are limited to emergency cases only. Under certain circumstances, however, the Terminal medical practitioner will give advice to Masters by VHF in cases where Crew members appear to be suffering from undiagnosed ailments. If it is essential for a sick person to be landed, the ship's Agent must first obtain the approval of the Government authorities.

The sick person when coming ashore must be accompanied by an officer or other responsible person able to speak English, and both the patient and the person accompanying him must be in possession of passports. (Not seamen's discharge books, which are not recognised in Libya).

FRESH WATER: No fresh water available.

FUEL: No bunkers available.

REPAIRS: There are no engineering repair shops.

REPATRIATION: Only in an emergency can any crew member be paid off. Seamen's discharge books are not recognised in Libya. Crew members are advised to have a valid passport in their possession in case of emergency.

CUSTOMS ALLOWANCES: Each member of the crew is allowed 25 cigarettes, or 25 grammes of tobacco, one litre of beer, or half a litre of wine, for every day of the ship's stay in port. Other tobacco and cigarettes, wines, beers and spirits, as well as matches, arms and ammunition, and saccharine, will be retained under seal whilst the ship is in Libyan waters.

CONSULS: There are consulates in Benghazi for most of the maritime nations. Those nations not represented in Benghazi are represented in Tripoli.

BALLAST: Because of the exposed position of the sea berths, it is essential that vessels arrive with sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Experience has shown that a fair estimate of the amount required is one third of the summer deadweight. A tanker found by the Mooring Master to be insufficiently ballasted will be rejected. However, it is imperative for the safety of the ship and of the installation that deballasting should be as speedy as possible, to reduce the period wherein the ship is most vulnerable to any sudden deterioration in the weather. It is, indeed, to the advantage of everyone concerned if the ship is able to commence loading as soon as the hoses are connected, deballasting simultaneous with the loading of the cargo. In cases when it is essential to complete the deballasting before loading can start, and deballasting time in excess of six hours will be deducted from the lay time.

As there are at Zueitina no facilities for discharging it ashore, vessels must arrive at the Terminal with clean ballast: all lines, pumps, and strainers must have been flushed out prior to arrival within one hundred miles of the Libyan coastline.

The Mooring Master will inspect ship's ballast on boarding, and he has the power to reject any vessel that he deems would cause pollution in the Terminal waters. A vessel so rejected must proceed to a position over one hundred miles from the coast, re-ballast, and return only when the ballast is completely clean. A new notice of readiness must then be tended, and the loading turn will be counted as from this second arrival.

The sea area round the ship shall be adequately lighted, as frequent inspection by the Mooring Master will be made during ballast discharge. Any pollution whatever, including bilge discharge, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection – a vessel rejected on these grounds will not be re-accepted until satisfactory evidence of repairs has been certified by a qualified surveyor.

On completion of deballasting, all unused cargo connections must be blanked off, sea valves closed and lashed, deck scuppers securely plugged, and drip pans placed below the cargo hose connections. All the requirements listed on the Company's Safety and Fire Precautions Check Form must be seen to be complied with before loading is commenced.

In the event that the Company has to settle any third party claims as a result of damage to property caused by pollution attributable in any way to a vessel, the Company will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

WEATHER: Weather conditions in Zueitina are generally clement. The temperature during the Winter seldom falls below 10° C. (50° Fah.), and in the Summer, even at midday, is rarely in excess of 35° C. (95° Fah.). The prevailing winds are North-Westerly. During the mid-Summer months, the land- and sea-breezes phenomenon is very apparent: a North-Westerly wind springs up at about 1100 hrs. sometimes to reach near-gale force by late afternoon, then gradually dying away during the evening. At about 2300 hrs. the wind begins to blow off the land – again sometimes to a fresh breeze or near-gale – before falling away completely around dawn.

During the Spring and Autumn, and in the early Winter months, there are frequent prolonged periods of calm, tranquil weather. However, in Spring especially, and again in the Autumn, such periods may be interrupted by the onset of the "gibli", an off-shore wind which, like the "khamsin" wind in Egypt, springs up with little warning to reach gale intensity, laden with sand and dust to such an extent that visibility is reduced to a few yards.

In the Winter months, prolonged periods of strong North-Westerly gales, with very heavy seas and high swells, accompanied by frequent rain squalls, are experienced. Even after the strong winds have subsided, long, high swells may continue for several hours to prevent mooring operations. Such North-Westerly gales are usually accompanied by a sharply rising barometer, and follow the passing of a cold front, with winds from the West.

Rainfall is confined to the Winter months only. Fog is rare, though it does occasionally occur in the Spring and Summer around dawn, generally dissipating after two or three hours.

GENERAL: Vessels are advised not to have on board any articles whatsoever of Israeli origin. If anything of such a nature is found it will be confiscated and the ship be liable to a fine and possibly to a delay for further investigation.

Goods – and, in particular, alcohol and tobacco – must not be taken from ship to shore, or from ship to ship.

Being an open roadstead, vessels must keep engines in a state of immediate readiness. No repairs to main engine may be undertaken in berth. Steam or electric power must be available on deck in case adjustments to anchor cables or mooring lines are found necessary. Power must be available on ship's whistles and sirens. Ship's boats must not be lowered into the sea and detached from the falls. Swimming is prohibited. The Mooring Master (and, when applicable, his assistant(s)) assigned to a tanker, will remain on board until after the vessel has loaded, unmoored, has completed documentation formalities and has cleared the Company's installations and is safely heading for the open sea. During the time he is aboard he is to be provided with accommodation suitable for one of Master Mariner status, and with palatable meals.

SHORE LEAVE: No shore leave is permitted.

AUTHORITY: Occidental of Libya Inc.

AGENCY: All ships must have an approved Agent to look after their interests. As from 1st June, 1978, all shipping agencies in the Socialist People's Libyan Arab Jamaharaya have been superceded by one nationalised company, known as The Universal Shipping Agency.

At Tripoli, the address is, Post Office Box 3703, Tripoli. Tel: Tripoli 40566 and 39631; Telex: 20263; Cables: UNISHIP TRIPOLI.

At Benghazi, the address is 98 Omar Mukhtar Street, Benghazi. Tel: Benghazi 91705 and 95008; Telex: 40101; Cables: UNIVERSAL BENGHAZI.

Ships bound for Zueitina may contact the Agent there by communications sent to either of these addresses. However, cables of estimated time of arrival sent to the Agent should be in addition to, and not in place of, those sent to OXYPORT, OXYLIBYA, TRIPOLILIBYA. Total charges are 750 Libyan dinars for the first 30,000 tons summer deadweight, or part thereof, plus 2 dinars 500 Dirhams for every 100 tons or part thereof in excess of 30,000 tons, plus 2% of the total sum in revenue stamps.

NOTES

Madeira

FUNCHAL: 32.38 N. 16.55 W. (See Plan Book)

DOCUMENTS:
Maritime Declaration of Health Form.
5 Crew Lists.
12 Lists of Passengers finally landing.
5 Lists of Passengers in transit.
1 List of Stores and Provisions, including Deck and Engine Stores.
1 List of Contents of shops on board.
6 Copies of Manifest of Cargo for discharge.
2 Copies of each B/Lading of Cargo for discharge.
1 Copy of Manifest of Cargo in Transit.
1 List of Passengers finally landing, visaed by Portuguese Consul at original port.

All other entry and clearance documents are arranged by the Agents.

PILOTAGE: Vessels should radio their ETA to Agents who order Pilot. 24 hours notice requested. Pilot launch flies "H" flag during day. Exhibits bright white light over red at night. To request Pilot on approach by day fly international "G" flag, or give 2 long and 1 short blast on whistle. At night flash 2 long 1 short. For vessels berthing alongside Pilot boards in bay; for vessels anchoring Pilot does not board but pilot launch indicates where vessel should anchor. Pilot boat equipped with radio telephone on 2182 and 2341 kHz.

Also VHF, Channel 16 (calling) and Channel 6 (working).

ANCHORAGE: Permitted anchorage within 800/900 m. East from end of breakwater or 300/500 m. South of breakwater within a limit of 400 m. from shore.

RESTRICTIONS: None.

MAX. SIZE: No limit to size of vessels which can anchor, but all anchorage positions should be indicated by pilot launch. For vessels berthing alongside quay max. permissible length 990 ft. max. draft 36 ft. Oil carriers discharge at buoys at Praia Formosa 3 miles to West of Funchal. Max. length of oil tankers than can berth at oil discharge buoys 665 ft. max. draft 36 ft.

HEALTH: Free Pratique may be arranged by Master sending wireless message addressed "Port Doctor Funchal" – "Request free pratique arriving . . . from . . . sailing to . . . number passengers . . . landing . . . number passengers in transit . . . number of crew . . . all well. Master."

In event suspected disease or fever on board Master should wireless either Port Doctor direct or to ship's Agents, who will inform Port Doctor. The Master will then be instructed what further action he is to take.

When vessel other than of national flag arrives after calling at another port in same country usual procedure applies, i.e. Masters' radio for free pratique or pratique granted by Doctor visiting in bay.

RADIO: Maderia Radio Station call sign "CUB" 500 k/cs. Same station normally used by Agent when communicating with vessel.

TUGS: Two tugs each of 1,000 –1,100 h.p. (bollard pull 18 tons) are available.

N.B. Vessels up to 2,000 gross tons are not obliged to use tugs.

Vessels of between 2,000 and 15,000 gross tons are obliged to use one tug.

Vessels over 15,000 gross tons are obliged to use two tugs.

BERTHING:
Quay No. 1 Length 139 m., depth 6 m.
Length 41 m., depth 7 m.
Length 19 m., depth 8.5 m.
Quay No. 2 Length 425 m., depth 11 m.
Quay No. 3 Length 347 m., depth 11 m.

STEVEDORES: When ships require labour, Agents must be notified before 1600 hrs. on working days and on Sundays and holidays before 1100 hrs., after these hours labour not available for last minute engagement. On Christmas Eve work stops at noon even if ships loading or discharging. No labour available Christmas Day, New Year's Day or Easter Sunday.

Grain cargoes can only be worked from 0800 hrs. to 2000 hrs. daily including Sundays, and a maximum of 4 gangs only can be worked simultaneously.

Bulk cargoes such as potash and fertilizers need to be bagged on board. Receivers supplying the bags – and this generally applies to grain. Bulk cement, clinker and granulated plaster is discharged by grabs.

MEDICAL: Advance notice is required by Agents for any medical attention required. Hospital facilities available. No inoculations required.

TANKERS: Diameter of connection of discharge lines 8 in. into pipe-lines of 12 in. diameter for black fuel and 10 in. diameter for white fuel. 1 anchorage buoy berth with max. draft of 36 ft.

DENSITY: Salt water.

FRESH WATER: Available at anchorage and ex quay.

Three barges available, with total capacity of 450 tons. Delivery hoses ex barge or ex quay are of 2.5 in. diameter, and there are nozzles of various sizes. Rate of delivery ex barge – 50 t.p.h. per barge. Delivery ex quay, said to be about 60 tons per lead per hour, but this can be slow, according to the number of ships being supplied, and the amount of water in the city storage tanks and may require to be supplemented ex barge in case of big quantities or supplies required within limited time.

FUEL: Fuel oil available from 3,500 seconds Redwood 1 to 200 seconds Redwood 1. Also marine diesel and gas oil. 12 hours minimum notice required.

FIRE PRECAUTIONS: At discharging buoys usual non-smoking precautions.

GANGWAY/DECK WATCHMEN: Gangway watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, Wine and Spirits: Moderate supplies allowed for personal use during ship's stay.

CARGO GEAR: No specific local safety regulations. Vessels discharging must provide strops, slings and nets. Lifts over five tons must be effected by ships gear.

10 mobile cranes are available.
1 crane – 6 tons at 12 m., 3 tons at 24 m.
3 cranes – 5 tons at 20 m.
3 cranes – 3 tons at 12 m.
1 crane – 15 tons at 13 m.
1 crane – 45 tons at 3 m.
1 crane – 20 tons at 3 m.

A floating crane is available which can lift up to 27 tons from the water line up to 8 m. This same crane can lift up to 20 tons from the water line to 12 m.

IDENTIFICATION CARDS: Required.

CONSULS:

Austria	21057	Italy	23890
Belgium	20255	Monaco	20041
Brazil	20355	Norway	20541
Costa Rica	24888	Panama	20091
Denmark	22031	Peru	21375
Dominican Republic	21057	Spain	20535
Finland	20596	Sweden	20121
France	21445	Switzerland	22101
W. Germany	20338	United Kingdom	21221
Greece	20824	United States	23309
Guatemala	20824	Uruguay	20535
Holland	20317	Venezuela	24050

REPAIRS: Repair yard available which can carry out most engine repairs on board except removing or replacing main engines. Hull work limited to removing riveting or replacing hull plates above water line, electric and oxy-acetylene welding. Most electrical work can be effected but notice required in regard to materials necessary. Foundry where castings can be made up to one ton weight.

DRY DOCKS: None.

REPATRIATION: Limited facilities for crew changes. Necessary repatriations can be made.

AIRPORT: At Santa Cruz, 20 km. East of Funchal. Service between Funchal and Lisbon operated by national airline TAP, 19 flights weekly Funchal/Lisbon/Funchal.

TIME: GMT maintained throughout year.

HOLIDAYS: New Year's Day (totally unworkable); Easter Sunday (totally unworkable); Municipal Holiday (local) (workable, 50% overtime); Camoes Day (workable, 50% overtime); Corpus Christi (workable, 50% overtime); Assumption (workable, 50% overtime); Proclamation of the Republic (workable, 50% overtime); All Saints (workable, 50% overtime); Independence of Portugal (workable, 50% overtime); The Immaculate Conception (workable, 50% overtime); Christmas (totally unworkable).

Workers' Day, Portugal Day and Good Friday are also totally unworkable.

Saturday is an ordinary working day. December 24 (workable up to 1500 hrs. only).

POLICE/AMBULANCE/FIRE: Police 22022; Ambulance 22122; Fire 21163.

SHORE LEAVE: All crew visiting shore must be in possession of special Landing Card, plus Identity Cards, Discharge Books or Passports, which must be shown to Immigration Officer at gangway. Crew Landing Cards must be stamped by Immigration Officer before crew can proceed ashore.

DEVELOPMENTS: The Port Authority commenced construction of new jetties in 1976 with completion of the first phase in September 1978.
Phase 1: Construction of 290 m. of berthing space, depth 6–8 m.
Phase 2: Two roll-on/roll-off berths, length 270 m. and 170 m.
Phase 3: Construction of a Marina.

AUTHORITY: Capitania do Porto.

NOTES

Please also advise Shipping Guides Ltd.

Malagasy Republic

DIEGO SUAREZ: 12.12 S. 49.19 E.

Shipmaster's Report (Survey vessel): 1975.

DOCUMENTS:

Documentation on Arrival:

Malagasy Customs require:
- 2 Crew Lists.
- 1 Copy Personnel Manifest (any form will do).
- 1 Nil Cargo Return.
- 1 Bonded Stores List.

Immigration/Police:
- 2 Crew Lists.
- Inspect all Discharge Books and Passports.
- An undertaking that all men will carry their Identification when ashore.

Port Health:
- 2 Crew Lists.
- 3 Vaccination and Inoculation lists very carefully inspected.
- 2 Copies of their own Maritime Health Declaration Form, copy of which becomes Inward Clearance, after stamping ashore.

Agents:
- 2 Crew Lists.
- Ship's register to lodge ashore.

Documentation on Departure:

An official from the Port Junta visits in plain clothes with the Agent and will wish to see:
- Cargo Ship Safety Construction Certificate.
- Safety Equipment Certificate.
- Safety Equipment Record of Inspection Certificate.
- Safety Radio Certificate.
- Load Line Certificate.
- Ships Register (held by the Agent).

After checking all these an Outward Clearance Certificate will be presented. One is then free to leave the Port, the Agent having given an undertaking that all Port dues have been paid.

APPROACHES/PILOTAGE: Tides run fast in the Orangea Pass, but seem to follow the pattern as per the Admiralty Pilot. Until experience is gained it should only be taken in the hours of daylight. There are numerous natural transit marks available to the navigator, all very clearly described in the 'Pilot'. For this reason it would be essential to take this in fine visibility. Pilots can be taken at Cape Mine but this can be difficult and dangerous in the S.E. Trade season and ships are advised that they can proceed on into the Bay right up to Port Antsirana Point.

ANCHORAGE: There are many splendid anchorages available in this vast Bay. Vessel anchored 2 cables off the N.W. corner of the wharf at Antsirana, to conduct formalities for Customs, etc.

RADIO: Tananarive Radio handles HF traffic and Diego Suarez can handle MF and VHF. English is not understood. Port Antsirana Pilots are available spasmodically on Channel 16.

BERTHING: Good modern berthing, plenty of tugs. 1 pier only about 1,500 ft. long operated by SCOM. Not actually used by vessel which went straight into the Dry Dock.

FRESH WATER: Good quality water available at the Pier and at the Dry Dock. No water barge.

FUEL: It appears that they like to have at least a week's notice. Gas oil is available through the Agent or through Shell. There is a bunker barge but this can be unreliable unless several week's warning is given. Bunker available by bowser and pipe-line at the main wharf.

We were unable to find any lubricating oil at all. Several weeks warning is necessary. All fuels and oils should be ordered through London.

MEDICAL: Great attention was paid by the Port Health Authorities and services asked for were promptly dealt with especially out of date inoculations. There is a hospital with Doctors and the necessary surgeries.

DRYDOCK:

Length overall	199.05 m.	653.00 ft.
Subdivided into sections	128.96 m. 70.09 m.	424.00 ft. 229.00 ft.
Breadth at Bottom	28.40 m.	93.00 ft.
Breadth at Coping	36.60 m.	120.00 ft.
Depth at sill and blocks at MHWS	10.42 m.	34.40 ft.

Yard Services: Nothing was too much trouble for any of their staff attending this ship. Power was a bit of a problem but they did everything to help. Fire mains, fresh water, cranes were all good. Toilets and shower-rooms were more than adequate especially after we were given our keys and had them cleaned.

Workshops: A modern well equipped yard with every conceivable service from an iron foundry to upholstery shops. A clean, well kept set of shops including the building of small craft. The Engineers of this ship were very favourably impressed with the shops and technical services.

SURVEYORS: We were informed that there is no Lloyd's Surveyor in the country but often when required Lloyd's Representative flies up from Durban. Sometimes it is agreed that the resident Bureau Veritas Surveyor will substitute. M. Cavanas lives in Tananarive.

AIRPORT: Air services are available each day to connect with the international Air France flights to Orly from the local airfield about 8 miles from the town.

GENERAL:

Launches: Numerous launches are abounding throughout the harbour. Owned by the Dock Company, the Port Junta and one by the Agent, who charges FMg 2,500 for a round trip out to the anchorage (c £5.00).

Laundry: A laundry man did call but we were unable to offer him any business. He said he would need at least two and a half days to complete a complete ship's wash.

Shore Amenities: Generally a very popular Port for Officers, Scientists and Crew. The absence of large hotels would be felt if the whole ship's company had to be present for a long period.

Hotel de la Poste and the Hotel Nouvelle have each about 15 bedrooms air conditioned, and ordinary. Bed and Continental Breakfast with air conditioning FMg 1,500.00 – FMg 2,500.00 – not more than £5.30 per night. They have excellent dining rooms and good French cooking.

Bathing facilities by taxi at beaches and clubs some 7 or 8 miles from town.

AGENTS: S.C.A.C. Madagascar, Box Poste 384, Malagasy Republic, Diego Suarez, Madagascar. Telephones: Diego Suarez 147. Telex: 93102. Cables: Freight Diego Suarez.

FORT DAUPHIN: 25.02 S. 47.02 E.

DOCUMENTS:
- Manifest of Cargo for discharge.
- Manifest of Cargo in transit.
- Ship's Stores List.
- List of Passengers Landing.
- Crew List.
- Franchise Certificate (for mail-carrying vessels).

PILOTAGE: The port is an open roadstead and pilotage not required.

ANCHORAGE: In depths of 8 m. Vessels anchoring are charged with port dues.

RESTRICTIONS: Port is normally used by coastal trading vessels. In case of liners handling cargo exceeding 150 tons, special permission required which is obtained by Agent.

HEALTH: Pratique should be requested from the Health Department, tel. 36.

RADIO: Fort Dauphin Radio, call sign 5RD, between 0400 and 1630 hrs. GMT on following frequencies: 458, 500, 2182 and 2712 kHz.

TUGS: None available.

BERTHING: There are no berths alongside. Vessels work cargo at anchorage.

STEVEDORES: Arranged by the Fort Dauphin Lighterage Company. Advance notice of ETA required to arrange gangs. Average loading/discharging rate is 10 tons per hold per hour.

MEDICAL: 2 hospitals available in the town.

TANKERS: 1 buoy berth for tankers.

FRESH WATER: No water barge. Only small quantities can be supplied in emergency.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Opening and closing hatches carried out by stevedores.

CUSTOMS ALLOWANCES: 1 carton of cigarettes per man. No alcohol.

CONSULS: No local representatives.

REPAIRS: Only facilities available for repairing lighters.

REPATRIATION: No facilities for effecting crew changes.

AIRPORT: Situated 5 kms. from the port, 4 regular flights per week.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Days on which work is normally carried out with overtime payment: Easter; Ascension Day; Whitsun; Assumption; Christmas.

Official holidays on which work can be arranged by special permission: 1st January; 1st May; 26th June (Independence Day); 14th October; Festival of the Republic.

FIRE/POLICE/AMBULANCE: Police Tel. 49; Fire 19; Ambulance 36.

SHORE LEAVE: Not permitted.

AUTHORITY: Service des Ports' Phares et Balises, Tananarive.

AGENT: SCAC Madascar BP 425, Tananarive. Tel. 228–64. Cables: "Freight Tananarive". Telex 22864.

MAJUNGA: 15.44 S. 46.20 E.

DOCUMENTS:
- List of Crew Members.
- List of Passengers.
- Customs Documents.
- Health Documents.
- Manifests.
- Bills of Lading.
- Ship's papers.

PILOTAGE: Vessels requiring Pilot must apply by cable to Majunga Harbour Master's office at least 24 hours before arrival. Pilot embarks at Narcissus buoy.

ANCHORAGES: Indicated to ship's captain by cable from Majunga Harbour Master's office.

RESTRICTIONS: Ship's can enter day and night. Max. draft allowed 10 m.

MAX. SIZE: No restriction except for max. 10 m. draft.

HEALTH: Pratique automatic when vessel comes from a Madagascar port. Pilot is health agent.

RADIO: Radio Majunga.

STEVEDORES: Vessel informs Agent by telegraph 24 hours in advance of number of gangs needed.

MEDICAL: Hospital available.

TANKERS: 1 berth, max. draft 10 m.

FRESH WATER: Unlimited drinking water.

CERTIFICATES: See "Tamatave".

CUSTOMS ALLOWANCES: See "Tamatave".

CONSULS: French and Greek consulates.

REPAIRS: Minor repairs only.

REPATRIATION: All facilities available.

AIRPORT: Served by regular airlines; 7 km. from town.
TIME: GMT plus 3 hours.
HOLIDAYS: Catholic and official holidays. Commercial transactions possible on public holidays.
POLICE/FIRE/AMBULANCE: Police 24–85; Fireman 13; Hospital 29–15.
AUTHORITY: Harbour Master.

AGENT: S.C.A.C. Madagascar, B.P. 256, Majunga. Tel. 23.87. Telex: 62710. Cables: Freight Majunga.

TAMATAVE: 18.08 S. 49.22 E. (See Plan Book)

DOCUMENTS:

Health
International Maritime Certificate of Health.
List of Passengers disembarking.
Crew List.

Police
List of Passengers disembarking.
Crew List.

Customs
Ship's Register.
3 sets Cargo Manifests.
Crew List.
2 Stores Lists.
2 Lists of Crew disembarking.
2 Lists of Crew transitting.
2 Lists of Passengers disembarking.

Port
2 sets Cargo Manifests.

Agents
1 set Cargo Manifests.
List of Passengers disembarking.
Crew List.

PILOTAGE: Compulsory. No telegraphic address. Ships advise Agents hour of ETA. Pilots informed by Agents. Due to the breakwater being extended the South Pass is closed to all traffic. When completed, the extension will render the Pass so narrow that only small coastal vessels can use it.

The East Pass is now permanently in use for large vessels. The pilot boat waits on the East Pass on line 277° True or range approximately 3.3 miles S.S.E. of Prunes Island Lighthouse. The pilot boat is fitted with a small, portable VHF set (Channels 16 and 27) but its effective range is only about 5 miles.

ANCHORAGES: No special anchorage. If no berth available on ship's arrival, Pilots put ships at best anchorage, according to draft and length of ship, between Reef and shore.

RESTRICTIONS: Ships enter and sail day and night any time. Max. tide only 3 ft. However tankers berth in daytime only between 0500 hrs. and 1500 hrs.

MAX. SIZE: For roads, max. length about 200 m. (concerns only passenger ships). For cargo vessels max. length 180 m.; max. draft 31 ft. 2 in. (9.5 m.).

For tankers, max. LOA 230 m., max. beam 31 m., max. draft 12.20 m. in salt water. Distance from stern to manifold 110 m.

HEALTH: Quarantine message sent to Agents who inform Health Service. "Q" flag must be hoisted during daytime or red over white light at night time if health satisfactory. Captain presents maritime declaration of health. Health Officer and Immigration board at Quarantine anchorage.

RADIO: Tamatave Radio, call sign 5RS. VHF frequency (16) 156.80 – (26) 161.90 – 168.95.

TUGS: 1 tug of 1,750 h.p. available to assist berthing. One tug 200 h.p. for towing fresh water barge.

BERTHING: 4 berths for deep-sea ships and 2 berths for coastal ships. Ships moored at berth in order of arrival and according length and draft. Mooring has to be very strong, due to swell that may sometimes enter harbour when S.E. trade winds are strong, or if cyclone in vicinity. Mooring by 2 chains and special nylon lines furnished by Agents. Swell is so dangerous that ships have to go to anchorage or put to sea until weather improves.

CRANES: 3 ton and 6 ton cranes available for hire. Floating crane 80 ton capacity and mobile crane 45 tons also available.

STEVEDORES: ETA to Agents must give hatches, tonnages, and all information about cargo.

Working hours: 1st shift 0700 – 1400 hrs., 2nd shift 1400 – 2100 hrs. On Sundays there is one shift 0700 – 1400 hrs. at overtime rates.

MEDICAL: Preferable to inform Agents in advance. All hospital facilities available – smallpox vaccinations.

TANKERS: 1 refinery imports crude oil and exports fuel and refined oils. Tankers moored using anchors forward, and moorings aft.

Diameter of lines 12 inches. No slop discharge facilities. If tanks are to be washed, slops must be discharged outside harbour.

Shipmaster's Report: A brief description of the berthing manoeuvre is as follows:

About 350 m. from the berth, let go starboard anchor and swing around to starboard with the assistance of a tug, slacking the cable all the time. As vessel completes swing, let go Port anchor, then slack down both anchors. Vessel usually finishes up with about 9 shackles on each anchor. Aft, vessel secures with 4 lines from the starboard quarter to the buoy and 4 lines from the port quarter to the quay. The mooring operation takes about 2.5 hours and unmooring about 1.5 hour.

Facilities:

1. One 12 in. rubber hose, connected always from the starboard side. You can expect 4-5 hours for connecting up the hose and about 2-3 hours for disconnecting.
2. The shore tanks are situated about 5 km. from the vessel, and have a total storage capacity of about 100,000 cu.m. The tanks are located about 4 m. above sea level, the heights of the tanks bein approximately 13 m.
3. The main pipe-line is 20 in. diameter by 5 km. long.
4. Maximum back pressure permitted is 6-7 kg. However in view of th length and size of the line it is very difficult to obtain such pressure, even with all 3 pumps going all out. Understand from th refinery Superintendent that maximum back pressure so fa attained was 4 kg. The back pressures are monitored by gauge fixed on the manifold and on the quay.
5. The maximum draft permitted at the Tanker mooring is 40 ft. Fu laden tankers arriving can berth only in daylight hours. However 2 hour sailing is possible.
6. The cargo discharging operations are as follows: The main pipe-line is kept constantly filled with bunker fuel and has a capacity o approximately 1,000 cu.m. After connecting up vessels commence discharge of their crude. The bunker fuel in the line is thus pushe back and stored in a separate tank ashore. The vessel the continues to discharge her full cargo. After completing discharge, al tanks are inspected and a dry certificate obtained. The refinery the pushes back the pipe-line crude (1,000 cu.m.) and about 1,20 cu.m. of bunker fuel, which must be stored on the ship in separat tanks. Thereafter, the vessel must discharge all crude, and final the bunker fuel.

   Thus the pipe-line is constantly kept filled with bunker fuel.

   The drawbacks to the vessel are obvious. 3 individual strippin operations are involved viz. stripping the crude during completion o discharge, stripping of pipe-line crude stored in the ship an stripping of the bunker fuel.

   Note: Capacity of shore pumps (when transferring oil back to ship is 800 t.p.h.
7. Communications: A telephone is installed aboard fo communication between ship and shore. This however neve seems to be at its best when you need it most. Other difficulties are the language barrier (French being spoken). Notwith-standing, the slow rate of discharge obtainable, helps to offset i part the lack of communications.
8. Out-turn quantities: It is understood that these are checked b sounding shore tanks.
9. Bunkers are available on 24 hours notice. Range Redwoo 1,000–1,500 seconds.
10. Diesel oil is available, however as the supply barge has been out o commission for sometime now, supply cannot be depended upon.
11. Fresh Water available.
12. Connection and disconnection of the cargo pipe-line is undertake by the refinery personnel.

DENSITY: 1023.5.
FRESH WATER: Delivered by water-boats at rate of about 100 t.p.h.
FUEL: Available alongside. Gas oil and diesel oil at 70 t.p.h. Fuel oil a 110 t.p.h.
FIRE PRECAUTIONS: 1 fire-boat stationed near tankers.
GANGWAY/DECK WATCHMEN: Recommended. Very low cost.
OPENING/CLOSING HATCHES: Booms always operated by crew. I hatches are Macgregor type, by crew; otherwise by stevedores.
CERTIFICATES: Safety certificates (3), Derating or Exemptio Certificate, Register, Load Line Certificate.
CUSTOMS ALLOWANCES: 200 cigarettes. Wine/Spirits. 1 opene bottle.
IDENTIFICATION CARDS: Only seaman's papers required.
CONSULS:

France	2721	Dutch	2632
Great Britain	2680	Swedish	2136
Norway	2549	Danish	2615

REPAIRS: Only small repairs possible.
REPATRIATION: Possible, arranged by Agents.
AIRPORT: Served by regular airlines. 1 flight a day by Air Madagasca to Tananarive and 4 tó 6 flights a week from Tananarive to Africa an Europe.
TIME: Local time GMT plus 3 hours.
HOLIDAYS: 13 holidays per year. Cargo work cannot be arranged o holidays but can be on about every second Sunday.
TELEPHONES: 2 connections at 2 berths used for passenger ships, bu may be requested by other ships.
GENERAL: 14 cranes of 3 tons each. 1 floating crane for max. 120 tons weight. Small tugs and lighters for ships operating on roads. 1 po launch for crews of ships at anchor.
SHORE LEAVE: Permitted.
DELAYS: Not fixed. When all berths occupied, ships wait at anchorage.
AUTHORITY: Societe d'Exploitation du Port de Tamatave.

AGENT: SCAC Madagascar, Rue du Capitaine-Shoel, BP 411, Telex 55610. Tel. 320–48; 320–49; 326–80; 326–81. Cables: "Freigh Tamatave".

Malaysia

DUNGUN, Malaya: 04.47 N. 103.27 E.

DOCUMENTS:

Register.
Last Port Clearance.
10 copies Crew List.
6 copies Passenger List (if any).
6 copies Stowaway List (if any).
2 copies Stores List (including Firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crew Declaration List (cameras, radios, etc.).
2 copies Cargo Manifests.

PILOTAGE: Extra charge for pilotage outside normal office hours and holidays. Ocean vessels should anchor about 0.8 miles S.E. of Tg. Dungun Lighthouse.

ANCHORAGE: On arrival vessels required anchor about one mile outside berthed ships to obtain pratique. Accommodation ladder must be rigged on lee side to allow Port Authorities to board.

CUSTOMS: Customs Office hours 0830 to 1630 hrs. (Thursday afternoons, Fridays and holidays excepted).

IDENTIFICATION CARDS: Every member of crew must produce Identity Document or Shore Leave Pass at Customs House when landing and again when returning to vessel.

SHORE LEAVE: No seaman may proceed more than 3 miles from Dungun Customs House. The Immigration Officer has authority to limit or prohibit Shore Leave in all cases.

KOTA KINABALU (Jesselton), Sabah: 05.59 N. 116.00 E. (See Plan Book)

PORT LIMITS: Gaya Bay and waters to the S.W. bounded by a line joining Tanjong Aru and the Northern point of Pulau Gaya thence a line to Gaya Head including rivers entering same for a distance of 600 ft. inland from the mouth of the river.

DOCUMENTS:

Documents to be produced on arrival:
Port Clearance from Last port.
6 copies Inward Cargo Manifests.
2 copies Hatch List, *or*
1 copy Stowage Plan.
9 copies Crew Lists.
9 copies Passenger Lists.
2 copies Bonded Store Lists (incl. Arms and Ammunition Lists).

In addition, the Master has to complete a Shipping Arrival Report Form and a Maritime Declaration of Health Form.

Notes: (a) If vessel arrives from any port outside those declared infected.

(b) These 2 copies (Inward Cargo Manifests) must be certified by the Master as follows: "I hereby certify that to the best of my knowledge and belief this manifest is complete and correct. . . . .Master".

To be Supplied to Ship before Departure:
1 set Agents Outward Manifests.
2 copies Passenger Lists for Immigration.*
1 copy Passenger Lists for Customs.*
1 set Manifests for Customs.*
*To be supplied by Agent.

If vessel departs to a port outside Sabah, 2 copies outward crew list are also required for Immigration.

PILOTAGE: Compulsory. Pilot normally available between 0600 and 1800 hrs. only. Written application must be submitted 12 hours in advance. Marine Department Tel. 52213.

ANCHORAGES (also see "Health"):

Special Anchorages and Prohibited Areas

(1) *Prohibited anchorage:* No vessels shall anchor as to swing within 3,000 ft. of the F.R.G. light on the N.N.E. end of the Authority wharf in approx. position Lat. 05° 59′ 51″ N. Long. 116° 04′ 30″ E. Vessels under 150 ft. in length may anchor within this area, East of a line joining the F.R.G. light and Gueritz shoal light beacon.

(2) *Prohibited Area:* Except with the previous permission in writing of the Authority, no logs or timber shall be allowed to lie afloat within the area – Eastward of a line drawn in a 172° direction from Grieve Reef Beacon.

(3) *Explosives and Dangerous Goods Anchorage:* Vessels having explosives and Dangerous Goods on board shall anchor within a line drawn from a position in Lat. 06° 01′ 21″ N. Long. 116° 05′ 45″ E. thence in a 360° direction for 6.5 cables thence in a 270° direction for 10 cables thence in a 180° direction for 6.5 cables thence in a 090° direction for 10 cables to the starting point.

(4) *Dangerous Petroleum Anchorage:* A vessel having dangerous petroleum on board shall anchor within a line drawn from a position in Lat. 06° 00′ 42″ N., Long. 116° 05′ 45″ E. thence in a 270° direction for 10 cables thence in a 360° direction for 6.5 cables thence in a 090° direction for 10 cables thence in a 180° direction for 6.5 cables to the starting point.

(5) *Quarantine Anchorage:* A vessel which is required to proceed to a quarantine anchorage shall anchor within an area bounded by a radius of 3 cables from a position in Lat. 06° 01′ 34″ N. Long. 116° 03′ 46″ E.

RESTRICTIONS:

1. Entering. Vessels with dangerous cargo such as benzene are not allowed to stay alongside wharf or to berth after 1800 hrs. Vessels arriving from any port within hours of day-light not allowed to berth until they see the signals at the Customs House directing them. This applies equally to vessels arriving on schedule as well as unscheduled vessels and any infringement of these regulations can have very serious consequences.

Master of ship not sailing within 48 hours after port clearance to report to Harbour Master reason for not sailing, and, if so required obtain a fresh port clearance.

2. Shifting. The Authorities must be informed prior to shifting.

3. Immigration. No person may leave ship before clearance has been given by Customs/Immigration officers.

4. Currency. There is no restriction on amount of currency which can be brought into this State but max. amount allowed to be taken out is Mal $100. Foreign exchange must be conducted through recognised banks.

HEALTH: (Also see "Regulations"). *(a)* Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board unless vessel comes from infected port. Instead, Maritime Declaration of Health to be filled-out and handed to Boarding Officer of Health Department who will require 1 copy of crew list and 1 copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel is healthy. Pratique normally cabled to ship but if unreceived, vessel need not proceed to Quarantine anchorage unless coming from infected port.

(b) Vessels arriving from ports outside the State will anchor until boarded by Authorities unless previously instructed by telegram to come alongside.

RADIO: (Also see "Health"). Information required before ship's arrival: Manifest, stowage plan, number of gangs required, amount of water required, Pilot requirements. Local radio call sign "Control K.K.".

TUGS: Tug 280 h.p. available to assist vessels berthing and unberthing without a Pilot at inner berth. Ship's lines used.

BERTHING: Wharf T-shaped; outer berth 647 ft. long with min. depth of 25 ft. Inner berth 475 ft. long with min. depth of 21 ft.; 2 go-downs 28,000 and 30,000 sq. ft. floor area respectively. Sabah Ports Authority operates one 10-ton crane, 8 towing tractors, 37×6,000-lb. forklifts, one 7-ton forklift, 45 trailers of capacity ranging from 3 to 6 tons. Heavy Lifts up to 6 tons received into Sabah Ports Authority trailers, up to 17 tons could be received into railway wagons, beyond 17 tons overside discharge into landing craft. Sabah Ports Authority landing ramp capable of accepting loads of up to 30 tons. Bulk handling limited to petroleum and bitumen into private installation by pipe-line.

New Wharf: Rectangular island wharf 700 ft.×400 ft.

The particulars of the berths are as follows:

Berth No.	*Length (ft.)*	*Depth (ft.)*
1	700	30
2	400	25
3	400	25
4	215	19

Covered storage: one transit shed 72,000 sq.ft.

STEVEDORES: Stevedores provided by SPA; labour supplied for working in ships' holds and on ships' winches (if required). For cargo delivered direct ex-wharf consignee provides wharf labour; cargo for Sabah Ports Authority godown labour provided by Sabah Ports Authority.

Working hours/days: Ships can be worked on all days except for 11 state and national holidays when port closed completely. Working hours 0730 to 1130 hrs.; 1300 to 1700 hrs.; 1800 to 2200 hrs. Work beyond these hours possible by application. Additional charges payable.

Deliveries 0730 to 1630 hrs. except Sunday.

Loading/discharging rate: General cargo excluding vehicles and liquid cargo 20 tons per gang hour. Palletised (unit-load) cargo 40 tons per gang hour.

CARGO: (Also see "Berthing").

1. Tally: The Agent can provide tally clerks at ship's expense.

2. Inward cargo: Ship's responsibility ceases as soon as consignees take delivery ex-sling.

3. Transhipment cargo: Transhipment cargo handles via Port Authority Godown.

4. Outward cargo: All cargo is brought to the ship alongside wharf either by tractors and trailers.

5. Special cargo regulations:

(a) Dangerous cargo. Vessels carrying explosives as cargo: All vessels arriving at, or remaining within the limits of, any port with explosives on board shall fly the gunpowder flag at the foremast.

No vessel having explosives on board shall, without the permission in writing of the Harbour Master, come or remain within 500 yards of the shore or any other vessel:

Provided that such a vessel may, with the written permission of the Harbour Master, come and remain within such limit where:

(i) such explosives are wholly and exclusively of Class V (Fulminate) or Class VI (Ammunition) or both such classes in the second schedule; and

(ii) the total quantity of such explosives does not exceed two thousand pounds; and

(iii) such explosives are carried in a properly constructed magazine duly certified as such by a British Board of Trade Surveyor or by an officer fulfilling similar functions appointed by a Government of any British possession or the vessel has a certificate from one of Her Majesty's Inspectors of Explosives or from an Officer fulfilling similar functions appointed by the Governments of Singapore, the Federation of Malaysia or Hong Kong and approved by the Governor that all the explosives on board such vessel have been properly stored and the Master of such vessel further certifies in writing that no other dangerous cargo is carried by the vessel; or where:

(iv) such explosives are wholly and exclusively explosives of one or any of Class III (Nitro-compound), Class IV (Chlorate mixture) or Class VII (Firework); and

(v) The total quantity of such explosives does not exceed three thousand pounds.

No such explosive shall be landed, shipped or transhipped between sunset and sunrise without the previous permission in writing of the Harbour Master. Any Master of a vessel offending against the provisions of this section shall be liable to a fine of one thousand dollars.

(b) Livestock. Pigs or cattle may not be loaded or discharged on any wharf without permission of the S.P.A.

MEDICAL: Medical Officer of Health: Medical Services Department, tel. 54303. Vaccination and inoculation (incl. Yellow Fever) can be arranged via Agent at any time during working days. In case of death on board, Agent and Harbour Master as well as the Police to be informed.

FRESH WATER: Can be supplied from wharf. Supply rate is 25 tons per hose per hour.

FUEL: Not available.

CONSULS: British Tel. 54056; Indonesian Tel. 54100; Japanese Tel. 54698.

HOLIDAYS: Working on Sundays/holidays is possible against overtime payment. No work will be done on Chinese New Year's Day, Hari Raya Puasa and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 999, Ambulance 54911.

GENERAL: Ship Chandlers: All kinds of stores and provisions available.

Recreation Facilities. Two cinemas in town which show English films frequently. Three tennis courts available and football matches may be arranged. Sports Club is next to town Padang, about half a mile from wharf and golf and yacht clubs situated on beach at Tanjong Aru, 4 miles from town.

Surveyor: Harrisons & Crosfield (S) Ltd. are Lloyd's Sub-Agents and can arrange a surveyor provided prior warning is given.

Fumigation: No facilities.

TELEPHONES: Available.

SHORE LEAVE: Crew members allowed ashore after inspection by Immigration Officer.

REGULATIONS: *(a)* Arrival and Departure. 1. The owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

(c) Priority. First come first served.

AUTHORITY: Sabah Ports Authority.

KUCHING, Sarawak: 01.34 N. 110.21 E.

(See Plan Book)

DOCUMENTS:

Port Clearance to be surrendered to Customs when boarding.

Crew Lists and Passenger Lists, 2 copies for Immigration Department, 2 copies for Kuching Port Authority, 3 copies for Customs, 1 copy for Port Health Officer.

List of Ship's Stores (2 copies for Customs).

List of Ammunition (3 copies for Customs).

Health Documents (Vaccination Certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

Manifests (3 sets for Customs, 5 sets for Kuching Port Authority, 1 set for Health Inspector).

Customs: Permit to go alongside a legal landing place or an ocean-going vessel within the port limits is required by Customs 24 hours prior to berthing.

PILOTAGE: Pilot can be applied for through Agents or by direct cable to Marine Dept. giving at least 24 hours notice of ship's arrival time at Tanjong Po. Telegraphic address, "Shipping Kuching". Pilots are embarked either at the position, marked on B.A. Chart 1822, off Tg. Po or at Sejingkat by vessels proceeding further up river to the wharves operated by Kuching Port Authority. Pilot boat "Alor" equipped with VHF.

In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement.

APPROACHES: The seaward approach to Kuching port is restricted by the presence of two bars; Outer Bar at a depth of 16 ft. below datum, and the Inner Bar at 15 ft. below datum. The max. depth of high water over the Bar, which occurs at springs is about 31 ft., whilst at neap high waters this decreases to approximately 28 ft. The tidal range is 5 to 17 ft. There are also numerous rocks and shoals in the river and, although these are well known and accurately charted, a vessel without local knowledge should arrange with the Director of Marine for pilotage.

ANCHORAGES: *(a)* Tanjong Po Anchorage: 045° one mile from Tanjong Po. Area of safe anchorage is 0.25 mile radius. Depth 6 fathoms. *(b)* Sejingkat Anchorage: For vessel up to 580 ft. long with max. draft 25 ft. 3 miles from Pending Point. Mainly used by vessels loading logs.

Examination Anchorage: The examination anchorage is re-established off Sejingkat in an area bounded by:—

(a) A line, marking the outer limit, drawn 345° from the Channel Beacon in position Lat 01° 34′ 51″ N., Long. 110° 26′ 41″ E.

(b) A line, marking the inner limit, drawn 343° 30′ from the Inner Measured Mile Beacon in position Lat. 01° 34′ 50″ N., Long. 110° 26′ 13″ E.

Vessels are recommended to anchor in the Northern half of the area and shallow draft vessels should berth as close to the Northern bank of the river as is practicable.

Vessels should advise the Marine Signal Station of their arrival using VHF Channel 20. Movement of vessels up river will be controlled from the Marine Signal Station or Marine Office. In order to receive information, vessels should keep watch on VHF Channel 20.

Vessels carrying dangerous cargo will be examined in the existing explosives anchorage.

RESTRICTIONS: Tide restriction and max. draft 17 ft. at high tide. Not advisable to enter port at Tanah Puteh at night.

MAX. SIZE: Max. permissible length overall for vessel entering port at Tanah Puteh is 430 ft. and max. draft 17 ft. Max. overall length for oil carriers proceeding to oil installation at Baiwak Wharf, Pending Point is 400 ft., and max. draft 21 ft. At Pelabuhan Datuk Sim Kheng Hong (Pending), the LOA of ship permissible is 580 ft. with a max. draft of 25 ft.

RADIO: ETA cable to ship's Agent can be sent to Department of Communications, Kuching. Code words, Kuching Radio.

To expedite the berthing of ships as well as the loading and unloading of ships' cargoes, the Authority offers the following International Maritime Mobile VHF Radiotelephone Services (Hague Plan Radio).

Channel No. 16 – Calling and Safety. A continuous loudspeaker listening watch is maintained on this channel by a telephone operator of the Telecommunications Department in Kuching.

Channel No. 26 – Public Correspondence. All conversations between ships and telephone subscribers take place on this channel, after contact has been established on Channel 16.

Channel No. 20 – Port Operations. Direct communication can be established by ships with:

1. The Kuching Port Authority, Kuching (The Operations Superintendent's Office).
2. The Pilot Launch "Alor".
3. The Marine Department, Kuching.

All ships equipped with the Hague Plan Radio Equipment and approaching Kuching Port within 25 to 30 miles will be able to communicate direct with the Authority and with the Marine Department Headquarters on Channel 20. Plans are now afoot to increase the number of channels.

TUGS: 3 tugs, 2 of 1,000 h.p. and 1 of 164 h.p. 3 mooring boats also available.

BERTHING: Application for berth must be made by Agents at least 24 hours before berthing. Facilities: at *Tanah Puteh* 800 ft. wharf of the deck on piles with shore-bridge type with 122,000 sq. ft. of Covered Storage Space and 195,000 sq. ft. of Open Storage Space, depth at lowest water 19 ft.; at *Pelabuhan Datuk Sim Kheng Hong (Pending)* 860 ft. marginal wharves, depth at lowest water 28 ft. with 82,000 sq. ft. Covered Storage Space and 100,000 sq. ft. of Open Storage. Feeder Container Services are available but ship must provide lift on/lift off gear for ship/shore and vice versa operations. Max. shore facilities – 14 tons gross per container.

STEVEDORES: Normal port operating hours are as follows:

(a) Discharging and loading of cargoes, First shift, 0730 – 1200 hrs. Weekdays, except Fridays 1300 – 1530 hrs.; Fridays 0730 – 1130 hrs. 1400 – 1530 hrs.; Second Shift 1530 – 1700 hrs., 1730 – 2300 hrs.

(b) Delivery of cargoes/receiving of export cargo, 0730 – 1200 hrs. 1300 – 1700 hrs.

Arrangements can be made for delivery of perishable cargo during the weekends and public holidays provided prior approval of the Customs Department is obtained.

Tractor/trailer trains are used for transfer of cargoes within the port area while forklift trucks are used for stacking palletised/unitised cargoes and storage pallets. The equipment for container handling are tractor/trailer trains and truck cranes.

Cargo handlers who are stevedores as well as longshoremen working under a fully integrated gang system are employees of the Authority. The Authority receives gang orders daily between 1430 and 1500 hours on normal working days and between 1000 and 1030 hours on the days preceding Sundays and public holidays. Gang orders are placed on a shift basis.

CRANES: *Cargo Handling Equipment:* 21 units towing tractors; 58 units forklift trucks (4,000 – 18,000 lbs.); 135 units trailers (3 – 20 tons); 2 units 35-ton mobile cranes; 2 units 5-ton mobile cranes.
MEDICAL: Necessary for Agents to receive advance notice of required medical attention at least 24 hours before arrival. Hospital facilities available. Crew should possess Cholera inoculation and Vaccination Certificates.
TANKERS: Tankers berth at Biawak Wharf, Pending Point, for discharge of their oil. Diameter of pipe line 6 in. Only one tanker can berth at a time and max. draft is 21 ft.
DENSITY: 1008 oz. per cubic ft.
FRESH WATER: Available and can be supplied to vessel alongside Authority's Wharf by hose about 25 t.p.h.
FUEL: High-speed diesel fuel oil can be supplied to vessel by making arrangement with either Shell or Esso Oil installation at Biawak.
GANGWAY/DECK WATCHMEN: Not usually available. Ship should provide own watchmen.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Ship's should possess all relevant certificates on board in case required for reference.
CUSTOMS ALLOWANCE: Tobacco: 1 oz. tobacco or 25 cigarettes or 8 cigars permitted for each crew member daily. Up to three days ration in port. Wines and/or Spirits, eighth qt. bottle of spirits or 0.25 qt. of beer or 1 qt. of wines is permitted for each crew member daily. Up to 3 days' ration in port.
CARGO GEAR: Ship provides own gear especially for handling heavy lifts, vehicles, etc. Rope slings, pallets and safety nets, etc., will be provided by the Authority.
IDENTIFICATION CARDS: Required.
CONSULS: Indonesian.
REPAIRS: Minor repairs to vessels only.
DRY DOCKS: Not suitable for sea-going vessels. Coastal vessels up to 220 ft. long.
REPATRIATION: Facilities available.
AIRPORT: Airport about 6.5 miles from port at Tanah Puteh. It is served by regular airlines which operate two flights daily except on Wednesday and Sunday when 3 flights.
TIME: Local time eight hours ahead of GMT.
HOLIDAYS: Port work can be arranged on all official holidays on overtime rates except Chinese New Year Day, Hari Raya Puasa Day, International Labour Day, (1st May), Dayak Festival Day (1st June), and Christmas Day, during which the port at Tanah Puteh and Pending will be closed.
POLICE/AMBULANCE/FIRE: For emergency call, tel. 999 is applicable to all these three services. Individual call: Central Police Station, 22181; General Hospital, 23151; Fire Station, 21033.
TELEPHONES: Telephones can be provided (local calls free of charge) on board vessel occupying Authority's berths at Tanah Puteh Wharf.
SHORE LEAVE: Crew members are allowed ashore provided permission is granted by Immigration Department.
REGULATIONS: Refer to Sarawak Merchant Shipping Ordinance and Kuching Port Authority's Ordinance and Bye-laws.
DELAYS: At present ships can normally secure a berth within 24 hours of arrival if tide is right.
AUTHORITY: Kuching Port Authority.

KUNAK, Sabah: 04.41 N. 118.15 E. (See Plan Book)

Sabah Government Requirements

(a) Customs will treat port as sufferance wharf as defined in Section 2 of Customs Ordinance (Cap. 33), with control from Lahad Datu. Agent will be required to make application to Customs for sufferance facilities in respect of each vessel, on appropriate form. Officer-in-Charge of Customs, Lahad Datu will arrange to send a supervising officer with ship; this officer will attend vessel's inward and outward Customs clearance. Transport, food and shelter of Customs Officer are for vessel's account, though it is envisaged that his transport can be concurrent with boarding and departure of the Pilot, i.e. per Marine Department launch.

(b) Immigration requires that vessel shall be cleared inwards and outwards in Lahad Datu. As Marine Department launch will be required to run mooring lines at Kunak, it will not be available to transport Immigration Officer who will *not* accompany vessel. His transport will therefore be a matter for Agent to arrange.

(c) Medical will grant pratique by radio by Medical Officer, Lahad Datu: whose right to carry out full inspection is not affected thereby. This will only be exercised, it is anticipated, when vessel has called at an infected port within prescribed period. Radio messages should therefore give this information, e.g. "Malay Maru Hongkong Twentieth Tokyo Thirtieth Manila Second All Well Request Pratique Master".

(d) Marine Dept. in the case of a vessel arriving from foreign ports will ultimately place a Pilot on board in Lahad Datu, if requested.

(i) Pilot will receive vessel's arrival report and sight her last port clearance. Pilotage will commence at any such point on route as Master may request, at rates laid down in the Merchant Shipping (Fees) Regulations, 1961. The Pilot launch carrying berthing crew will arrive in advance of vessel at Kunak and assist in making fast.

(ii) As there is no accommodation available at Kunak, the Pilot it is hoped, can be accommodated on board ship during her stay.

(iii) Return to Lahad Datu will follow as in sub-para (i) with the Pilot issuing Port Clearance on completion of Immigration formalities.

(iv) Requests for Pilot should be made *at least* 24 hours in advance to Marine Sandakan via Sandakan Radio, 9WHZ1. Initially this service will be offered from Sandakan, and ships proceeding Kunak from there will retain the Pilot on board. Ships from foreign ports will be served by air; charges to their account.

There is now a Pilot based at Tawau, who will berth vessels at Kunak.

For information the port limits of Lahad Datu are "a line drawn from Tanjong Melandong on the South-west point of Darvel Peninsula to the most Westerly point of Sakar Island and thence to the mainland, etc." From this it can be seen that large vessels need not enter the narrow waters of the inner bay.

BERTHING: 1. Wharf consists of,
(a) A raised cement platform 30 ft. × 30 ft. on wooden piling.
(b) Three lazy piles with rubber fendering situated 20 ft. from the front edge of the platform and 125 ft. in each direction from the centre of the platform.
(c) Two cement mooring dolphins 20 ft.×20 ft. situated 350 ft. each side of the platform and 50 ft. from the rear edge of the platform.
(d) A metal jetty approach 10 ft. wide × 350 ft. long.
(e) A coral bund 24 ft. wide at the base and approximately 16 ft. wide at the top.
(f) Mooring Buoy placed 600 ft. off head of jetty.

2. Depth of water alongside: Minimum depth of water outside the lazy piles is in excess of 35 ft. datum.

3. Bulk oil will be pumped from installation along a metal pipe via coral bund and metal jetty. At a point approximately 15 ft. before cement platform the pipe bifurcates and the two terminals are situated two-thirds the way along each side of platform. To these terminals will be attached a flexible steel hose for connection with ships. Hose will be provided by shippers, and is 400 ft. long if required.

4. Pumping capacity. Maximum overall rate of pumping palm oil will be 100 t.p.h. Palm oil pipe is of 6 in. diameter.
AUTHORITY: Port Manager, Tawau.

LABUAN, Sabah: 05.17 N. 115.15 E. (See Plan Book)

Island of Labuan is 12 miles long and 7 miles wide lying off N.W. coast of Borneo at entrance at Brunei Bay. It is part of State of Sabah and is only 4.5 miles from mainland and some 77 miles from the State Capital of Kota Kinabalu.
DOCUMENTS:

(a) On arrival, when vessel has arrived from ports outside Sabah, Health Officer, Boarding Officer, Customs and Immigration or their representatives will board vessel. Agent cannot board until ship has been cleared.

(b) Health Officer will require Maritime Declaration of Health duly completed together with one copy of passenger list and one copy of crew list whenever vessel's last port of call has been outside State of Sabah.

(c) Boarding Officer will require one copy of Shipping Arrival Report, one copy of passenger list and one copy of crew list. He will also inspect various Certificates such as Load Line, Life Saving Equipment etc.

(d) Following is summary of documents required:

	Customs	*Immi-gration*	*Boarding Officer*	*Agent*	*M.O.*
Passenger List	2	2	1	1	1
Crew List	2	2	1	1	1
Store List	2	—	—	1	—
Maritime Declaration of Health	2	—	—	—	1

(e) To be supplied before Departure:
Manifests as necessary.
Captain's copies of Bills of Lading.
Port Clearance.
Customs Clearance.
Certificate of *(a)* Buoys and Lights Dues and *(b)* Port and Harbour Dues.

PILOTAGE: Pilot available if adequate notice given but pilotage not compulsory. Vessels normally berth between 0600 and 1800 hrs., unberthing at any hour, day or night, provided that notice of such movements received between 0800 and 1600 hrs.
ANCHORAGES: Good anchorage for large vessels in a least depth of five and three-quarters fathoms South and S.E. of No. 6 Beacon.

Quarantine. Vessels arriving from an unhealthy port should proceed to quarantine anchorage for pratique. This anchorage is bounded on North by a line drawn 090° from Harbour Shoal Beacon to Eastern Harbour Limit; South by a line drawn between S.W. point of Papan Island and Enoe Beacon; on West by Eastern Boundary Limit of Explosives Anchorage (as under). If vessels arriving from healthy port and healthy themselves, they need not proceed to Quarantine Anchorage.

Explosives. No vessels having explosives on board may come or remain within 500 yards of shore or of any other vessel; such vessels shall fly Gunpowder Flag at foremast, and should anchor in Explosives Anchorage which is within a line drawn from Enoe Beacon to Harbour Shoal Beacon thence in 090° for 6 cables thence in 180° direction until it joins line between S.W. point of Papan Island and Enoe Beacon.

Dangerous Petroleum. A vessel having dangerous petroleum on board shall anchor within a line drawn from Harbour Shoal Light beacon in a 360° direction for 2,500 ft., thence in a 090° direction for 3,600 ft., thence in a 180° direction to join Northern boundary limit of Explosives Anchorage.

Prohibited Anchorage. No vessel shall anchor within 2,000 ft. from the light of Southernmost dolphin of Liberty Pier.
RESTRICTIONS: Tides. Subject to diurnal inequalities but usually one high water and one low water a day. Average high water is 6.5 ft. and low water 3 ft. above datum of soundings.

Clearance. Port is open from 0600 to 1800 hrs. although vessels can be cleared later than 1800 hrs. on application provided they are sighted from Papan Lighthouse at 1800 hrs.
HEALTH: See "Regulations" and "Anchorages".
RADIO: Information required before ship's arrival. ETA Labuan, with as

much prior notice as possible. Number of gangs required. Quantity of fresh water required. Whether Pilot required for berthing.

Labuan has no radio facilities and messages are received via Kota Kinabalu, Miri, Singapore, etc.

Port VHF Service operates on Channels 16 and 12, between 0530 and 2400 hrs.

TUGS: One tug, 750 b.h.p., twin screw, available to assist with berthing and unberthing.

BERTHING: 1. Wharves.

(a) Liberty Wharf – A permanent concrete wharf, measuring 800 ft. with dolphins 100 ft. off each end – least depth of water is 28.5 ft.

(b) Victoria or Small Ships' Wharf (marked on Chart as H. & C.'s Wharf). A wooden structure – length 270 ft. with min. depth of 12 ft. No longer useable except by kumpits. No vehicles allowed on wharf.

(c) New Shell Installation Wharf. Concrete jetty 170 ft. long with two dolphins at each end with a total length between of 700 ft., least depth of water 31 ft.

(d) Brown & Root Jetty – A timber decked jetty with following dimension:
Length of main jetty – 160 ft., width 40 ft.
Length of causeway – 476 ft., width 22 ft.
Least depth alongside approximate 28 ft.
Max. load (proven) – 800 lb./sq.ft.
Max. single approximate 100 short tons.

2. Buoys: No mooring buoys in Labuan.

3. Monsoons. N.E. monsoon prevails from December to April and S.W. monsoon from middle of May to middle of October. Harbour is well sheltered from both monsoons.

4. Flags and Berthing Signals:

(a) When entering port vessel should fly Signal Letters, Mail Flag if applicable, and "G" flag if requiring Pilot, and also Quarantine Flag.

(b) Berthing Signals. Following berthing signals will be used at Labuan and will be displayed from Flagstaff in Harbour Office in vicinity of Liberty Wharf, Victoria Harbour. A red and white chequered flag and International Code numbered pendant will indicate berth number allocated. Berth numbers have been allocated as follows:

(c) Berth and Pendant No.
1. Esso Wharf.
2. LCT. Landing Ramp.
3. Victoria Wharf (small ships) S.E. Section.
4. Old Liberty Wharf (inner section).
5. Old Liberty Wharf (outer section).
6. New Liberty Wharf (inner section).
7. New Liberty Wharf (outer section).
8. Brown & Root Jetty.
9. Shell Installation Jetty.
10. Anchor.

On receipt of berthing signal, vessel should acknowledge in the usual manner with the answering pendant and proceed to berth.

(d) Tidal Signal. A tidal signal consisting of a cone and ball is hoisted in conjunction with berthing signal showing state of tide at berth indicated. A cone point down signifies flood tide (West-going), a cone point up ebb tide (East-going), a ball slack water.

(e) Facilities. Max. single load without special precautions on Old Liberty Wharf is 25 tons and New Liberty Wharf is 650 lbs/sq. ft. i.e. 180 tons four axle vehicles. Any load over this figure will require to be distributed over two or more panels of 10 ft. by 10 ft. each according to weight. However, special arrangements must be made prior to discharge, and Agent should be consulted in advance.

STEVEDORES: Supplied by contractors as arranged by Agent. Working hours 0800–1200 hrs., 1300–1700 hrs. Working outside these hours on Sundays and Public holidays is overtime.

CARGO: 1. Inward. Inward cargo is tallied out of ship on to wharf or into lighter. Damaged cargo is surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge is carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of shortlanded cargo, reasonable proof must be given to Customs that the cargo has not been landed. A shortlanded Memo certified by the Chief Officer is usually accepted as proof.

2. Transhipment. After discharge of cargo from the 1st carrier, transhipment cargo is placed under supervision of Customs, unless it is possible to arrange direct transhipment into small coastal vessel. Customs do not accept responsibility for cargo in Customs Bond.

3. Refrigerated. Only small quantities of refrigerator cargo loaded or discharged.

4. Explosives. Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for their importation must be obtained from the police prior to arrival of cargo, and harbour and police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

MEDICAL: Hospitals. Not possible for Government Medical Officer to visit ships but patients can be sent to Cottage Hospital. Four 1st class beds, 10 2nd class beds, 46 3rd class beds. Two private clinics, Dr. Chan Clinic and Dr. Wong Clinic, are located in town.

Dentist. A Government Dental Clinic, located in Cottage Hospital area. In addition, a dentist is available in town.

TANKERS: See "Berthing".

FRESH WATER: Only available in small quantities (usually 30 tons maximum) and at restricted hours.

FUEL: Bulk furnace oil and high speed diesel usually available but 48 hours notice of requirements must be given.

FIRE PRECAUTIONS: In case of fire, the Harbour Master, OCPD, and Agent should be telephoned immediately. A mobile gas turbine fire pump is available.

CONSULS: None.

REPAIRS: Slipways of up to 500 tons displacement, and Marine Department can undertake minor repairs. The Sabah Shipbuilding, Repairing and Engineering Co. can also carry out minor repairs.

POLICE/AMBULANCE/FIRE: Medical Officer 224; Asst. Commissioner of Customs 201; OCPD 400; Police Station 297; Hospital 222.

GENERAL: *Surveyors.* Harrisons & Crosfield are Lloyd's Sub-Agents in Labuan and may appoint a surveyor as necessary.

Ship Chandlers. Fresh fruits, vegetables and fish available and price list can be obtained from ship chandler through Agent. Cold storage with limited supplies.

Recreation Facilities. If owners pay a monthly subscription to the Labuan Recreation Club, ship's crew are automatically members. Football and cricket, etc., can usually be arranged on application to Agent. Two cinemas in town which show American, English, Chinese, Malayan and Indian films.

Good beaches all round island, however, it is strongly recommended that bathers should remain in shallow water. It is not considered safe to bathe from the ship.

Victoria Hotel situated in town. All rooms air-conditioned and have private bathrooms or showers attached. Lodging house accommodation available in town for Chinese Crew members.

REGULATIONS: *(a)* Arrival and departure. 1. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessels shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, 6 f apart, hoisted vertical where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 f apart, hoisted vertical where best seen.
Quarantine (vessel is Healthy request pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white lig and a separate hoist of re light over a green light an hoisted vertically 6 apart where best seen.
Quarantine (vessel is infected)	International code Signal "Q L"	
Quarantine (not received pratique)	Nil	A red light over a white lig 6 ft. apart hoisted ve tically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white lig 6 ft. apart hoisted ver cally where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green lig 6 ft. apart, hoisted ve tically where best seen.

GENERAL: *Recreational Facilities:*

(i) A newly constructed 12 storey Labuan Hotel is situated in the town. All rooms air-conditioned with bathroom attached.

(ii) A nine-hole golf course situated about 1 mile away from town.

AUTHORITY: Harbour Master.

LIMBANG, Sarawak: 04.48 N. 115.05 E.

Limbang is the principal town of the Fifth Division and is situated 8 mi above the entrance of the Limbang River. There is an anchorage f ocean-going steamers 5 miles below the Limbang bar buoy with a lea depth of 26 ft.

Depth on Bar. The least depth reported on the bar is about 2 ft. wit highest rise of 12 ft. The channel is marked by stakes with red/white a black/white topmarkers and a flashing light buoy Fl.1 sec. at t entrance.

Every vessel arriving in quarantine shall fly or show the appropri International Quarantine signal; and no person other than a Pilot, P Officer, Port Health Officer, Immigration Officer or Officer of Custo shall board the vessel; and no person shall disembark therefrom u the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a p for any place outside Sarawak shall cause the "Blue Pe

(International Code Flag "P") to be hoisted, during daylight hours, for at least twelve hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

LUMUT, Malaya: 04.14 N. 100.38 E.

DOCUMENTS:

Customs:

3 Crew lists.
2 Report of arrival – Appendix "A".
1 Passenger list.
2 Dutiable stores statements.
5 Inward manifests (prepared by Agent)
2 Personal effects lists.
2 Lists cargo in transit.
1 Lists arms & ammunition (NIL certificate required).
Last port clearance.
3 Copies loading manifests.
3 Outward manifests (prepared by Agent).
1 List narcotics (NIL certificate required).

Immigration:

2 Crew lists.
2 Passenger lists.
All passports and seaman's books.

Boarding Office (Port Authority):

1 Report of arrival.
1 Crew list.
1 Passenger list (NIL return required).
1 Arms & ammunition list (NIL return required).
Register, load line, derat certificate.
Radio and Safety equipment certificates.
1 Narcotics list.

Port Health:

2 Vaccination lists (Cholera and Smallpox).
2 Health Forms.
Deratization certificate

Police:

1 Crew list.
1 Passenger list.
1 Arms & ammunition list.

Clearance of vessel carried out on arrival at anchorage or berth before loading or discharging is allowed. Usually Customs', Immigration, Police, Health will come together on board and free pratique issued by Health Officer.

PILOTAGE: Pilot boarding position 4° 10′ 30″ N., 100° 35′ E., which is one mile South of Pangkor Island S.E. Point light. Berthing and unberthing will only be carried out during daylight hours and at slack water or beginning of flood tide. Pilot comes from Penang for berthing and unberthing. Pilot leaves vessel at Hospital Point on departure. Pilot launch painted blue with white superstructure and named "King Miller". Pilot rates:— $900 in & out, launch fee $200 in and out & service fee $400 covering travel, accommodation, meals etc.

ANCHORAGE: Just inside harbour limits, 7 cables South of S.E. Point light in about 12 fms. Bottom said to be sand & shells and reputed good holding ground.

MAX. SIZE: Max. length on grain berth 575 ft.

Max. draft into port 30 ft. 6 in. salt water on Spring tides. This is due to a bar at the entrance of Dinding River and a rather sharp turn around buoy of 125° to miss rocks marked by unlit buoy. (Lloyd Rocks B. A. Chart 792 vicinity of River Passage).

HEALTH: See "Documents".

RADIO: *ETA's:* Sent through Penang or Singapore Radio to Flourmill Kuala Lumpur and ship's Agents. 72, 24 & 12 hours notice required. Agents will keep Flourmill Lumut and Pilots informed. Authorities like 5 days notice of a vessels impending visit.

VHF: There are no VHF communications in the port or with pilot boat.

TUGS: There are no tugs at Lumut — nearest Penang (small) and Singapore (large).

BERTHING: Port side to at Malaysian Flour Mill Private Wharf in position 4° 16′ N. 100° 39.5′ E., ship's head in. Depth of water at wharf is 32 ft. 06 in. A modern wharf supporting one movable discharging elevator. Conveyor belt runs under wharf.

South side of dock is used by coastal tankers and has 20 ft. of water. Dock is of concrete construction with heavy wood and steel girder fendering which is rubber mounted. End of wharf has a separately fendered concrete construction which is fitted with rubber shock absorber.

STEVEDORES: Mill employs own stevedores and work continues throughout 24 hours. No cargo work on Sundays and Public Holidays unless requested by either party when the overtime charges will be borne by the said party. Discharge rate is about 118 m.t.p.h. with 2 suckers (wheat). Reported to be about 100 m.t.p.h. with corn.

MEDICAL: Doctor in Lumut and Sitawan (7 miles from Lumut). Local hospital usually has large queue, therefore better to attend private doctor. Private doctor may be called onboard if necessary.

DENSITY: Water is brackish both at anchorage and berth. About 1022 ozs/cu. ft. at berth.

FRESH WATER: Available on berth, arranged through Flour Mill at $5.00 per ton during working hours and at $6.50 per ton after office hours.

FUEL: By special arrangement only and brought to ship in road tankers. Cargo cannot be discharged while bunkering as the trucks are not able to pass under or by the grain discharger (Agent informed me that two weeks notice required for bunkers). Fuel and diesel supplies come from Mobil Oil Depot. Batu Undan about 1.5 miles from mill but there are many Customs problems re-clearance.

REPAIRS: Minor repairs only at mills workshop, firms can be called in from Kuala Lumpur or Singapore.

GANGWAY/DECK WATCHMAN: Private wharf and protected area - no shore watchman required on board - only ship's watchman for ropes and safety. Shore mill patrol is armed with shotgun.

REPATRIATION: No problems but make sure travel documents i.e. passports, are valid.

AIRPORT: Nearest local airport is Ipoh and then fly or by road to Kuala Lumpur International Airport. Ipoh is about 1.5 hours drive and Kuala Lumpur 6 hours drive.

TELEPHONE: None on berth, nearest is in Flour Mill entrance hall but very noisy due to mill working.

SHORE LEAVE: Local leave only, except with special permission and pass. Boats to be laid on by ship for crew shore leave to Lumut and this is about a 20 minute boat ride to shore. Charges – 0700 to 1800 hrs. $15, and 1800 to 0700 hrs. $20 per trip. A boat from the anchorage may be laid on and this costs $75. Boat service is run by Mr. Khor Beng Seng – Titi Panjang Road, Lumut – He can usually be found on waterfront by Customs office.

Also to Sitiawan about 7 miles from Lumut. To Iroh 52 miles by taxi $4.50 per person one way. Special Immigration pass is required and can be arranged through Agent.

GENERAL: The Flourmill is situated on the N.E. side of Lumut about 40 miles by road and 20 minutes by launch from Lumut town. There is a good canteen at the Flourmill which serves European, Chinese and Muslem foods, soft drinks and beer. Ship's personnel are allowed and welcome to use these facilities.

There are only two reasonable hotels in Lumut, Dinding Hotel which has only three rooms air conditioned, and The Rest House which is not air-conditioned. If possible book in advance especially on Saturdays, Sundays and Holidays.

At Pangkor Island there are good hotels; Sea View Hotel, Rest House and Pangkor Bay Village. At Teluk Batik 10 chalets available, about 5 miles from Lumut town.

Football matches can be arranged and Customs, Flourmill etc. are all very keen to play ships visiting the port. Hire of the football pitch which is in the centre of town and very good is only $5.

A soya bean mill is expected to complete construction in 1980/1981 and will use the same wharf for discharge.

Customs: Allowances very small – 75 cigarettes per man for three days and one bottle of spirits for eight men every three days. Customs office is on shore near to ferry berth. One and sometimes two, customs men remain on vessel throughout and accommodation is to be provided for them.

Immigration: No immigration if from Malaysian ports but clearance required when from foreign.

Tide: Ebbs for 5.25 hours on berth. Tides times are based on Port Kelang – difference is minus 1 hr. 40 mins. Rise and fall about 2 m. – see Admiralty Tide Tables and Admiralty N.P. 214, Malacca Strait and Southern Approaches to Malacca Strait. Atlas of Tides and Tidal Streams.

Provisions/Stores: Fresh provisions available but advisable to give 24 hours notice as some of the items come from outside Lumut. Fruit and vegetables are available in season from local supply and are reputed to be reasonably priced. Some fruit and vegetables imported and may be expensive. Chandlers are Lumut Supplies Pte. Ltd., and T/A Hin Wah Siong Tiam.

Laundry; Arranged by Chandler (see above), takes about three days as is done by hand.

Charts: BA 1009 Perak River & Approaches when approaching from South and BA 792 Dinding River & Approaches with inset covering flour mill wharf.

AUTHORITY: Malayan Flour Mills Berhad, Lumut.

MALACCA, Malaya: 02.15 N. 102.15 E.

DOCUMENTS:

1. *Harbour Master's Office, Marine Department*

(a) "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.

(b) One copy Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.

(c) Port Clearance from last port and copy of Manifest of Cargo to be discharged.

(d) List of all arms and explosives on board.

(e) In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port produce to Port Officer the Certificate of Registry and ship's Articles.

(f) All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load Line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derating Certificate and all Certificates of Competency of all Officers on board.

(g) Crew List.

2. *Immigration Authorities*

(a) Crew List (3 copies).
(b) Passenger List (3 copies).
(c) Produce all passengers passports/visas.
(d) Produce all seamen's cards.
(e) Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.

3. *Port Health*
   - *(a)* Crew List showing last date of vaccination.
   - *(b)* Passenger List, showing the last date of vaccination.
   - *(c)* Produce all seamen's and passengers' vaccination cards.
4. *Customs Department*
   - *(a)* Crew List (2 copies).
   - *(b)* Passenger List (2 copies).
   - *(c)* Personnel Effects List (2 copies).
   - *(d)* Cargo Manifests (2 copies).
   - *(e)* Last Port Clearance.
   - *(f)* Bonded Stores List (2 copies).
   - *(g)* Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   - *(h)* Customs Form CD 15 obtainable from Customs Department on arrival.

APPROACHES: No difficulty from North or South. No sand bar at river mouth. Harbour open all year round.

PILOTAGE: None. See "Developments".

ANCHORAGES: For ocean-going and coastal vessels anchorage between 1—1.5 miles off Malacca Harbour. Between 3–6 fathoms depth. No specific prohibited anchorage.

TUGS: None.

BERTHING: None. Discharging into lighters at anchorage. See "Developments".

STEVEDORES: Discharging cargo capacity per day – 1,000 tons.

MEDICAL: Modern Government hospital. All surgical and medical facilities available.

FRESH WATER: None. See "Developments".

FUEL: None.

DEVELOPMENTS: A deepwater berth – least depth alongside 36 ft. is due to open in 1979. Jetty "T" head connected to shore at Tanjung Bruas (approx. position 02° 13′ N. 102° 09′ E.) by approach bridge. Length of berth 368 ft. Fresh water supply will be provided at the berth.

A prohibited anchorage area will be established off the jetty "T" head. Quarantine and Explosives Anchorages will also be designated.

Pilotage will be available for vessels berthing at the deepwater berth.

CUSTOMS ALLOWANCE: Tobacco, cigarettes 25 in number per man per day, or cigars, 8 in number per man per day, or Tobacco, 1 oz. per man per day, or snuff, 1 oz. per man per day.

Wine and/or Spirit: Spirit, eighth of a quart per man per day, or wines, 1 quart per man per day, or beer or stout, 1 quart per man per day.

REPAIRS/DRY DOCKS: None.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammad's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

AIRPORT: Batu Berendam, 6 miles from port – commercial airlines daily.

AUTHORITY: Marine Department, Malacca and Port Dickson.

MIRI, Sarawak (incl. Lutong): 04.26 N. 113.55 E.

Miri Roads is an open roadstead in a shallow bay, bounded at North by Tanjong Baram and at South by Tanjong Lobang.

PORT LIMITS: Outer: within an area to Northward of Lat. 04° 22′ N., Eastward of Long. 113° 55′ 30″ E. and Southward of Lat. 04° 31′ N.

DOCUMENTS: *(a) Health.* Vessels exempted from inspection (see "Health") should deliver to Berthing Master on arrival, a Declaration of Health, Last Port Clearance and 2 Crew and Passenger Lists.

(b) Inward Clearance (also see "Anchorage"). All vessels calling Miri Roads for passengers or cargo must be cleared by Immigration and Customs and, if necessary, by Port Health.

Inward clearance effected only between 0600 and 1800 hrs. and following signals must be shown: if passengers carried, flags "3" and "4"; if no passengers carried, flags "2" and "5"; if free pratique requested, flag "Q".

Following papers will be required on arrival for inward clearance:

Port Health:

Declaration of Health.
1 Crew List.
1 Passenger List, inward and through.

Customs Boarding Officer:

As above, if not boarded by Health Officer, and 2 Inward Cargo Manifests.

(c) Outward Clearance. For vessels that have called to lift bunkers only at Lutong Moorings, clearance will be issued by Berthing Master.

Other vessels will be issued a Port Clearance by Customs Officer on board who will require: 1 Outward Manifest and, if any embarked, 1 Outward passenger list.

APPROACHES: The loom of gas flares on Seria Oilfields 30 miles N.E. of Miri are a general guide at night but should not be used as a bearing because flares movable within area of oilfield and liable to be extinguished at any time. Following bearings exist. By night, three lighthouses:

- *(a)* *Tanjong Baram* 04° 35′ 47″ N. 113° 58′ 25″ E. white single light 680,000 candle power, visibility 17 miles, elevation 120 ft. in grey steel lattice tower, group flash three every twenty seconds.
- *(b)* *Lutong* 04° 28′ 30″ N. 113° 59′ 46″ E., white single light, 13,500 candle power, visibility 10 miles, elevation 80 ft. in grey steel lattice tower, group flash two every ten seconds.
- *(c)* *Tanjong Lobang* 04° 21′ 48″ N. 113° 57′ 36″ E., white single light 20,150 candle power, visibility 18 miles, elevation 155 ft. in grey steel lattice tower, 60 ft., flash one every ten seconds.

By day, above lighthouses difficult to distinguish and following may be used for day-time bearings:

- *(a)* Lutong radio mast F.R 210 ft., position 04° 26′ 25″ N. 113° 59′ 54″ E.
- *(b)* Tanjong Lobang radio masts as marked on chart.

PILOTAGE: No official Pilot stationed at Miri but Shell Company provid Berthing Masters to moor vessels at their Lutong Moorings (se "Tankers").

ANCHORAGE: For cargo, passengers or clearance. It is recommende that vessels anchor close inshore directly opposite Miri River Mouth, bu caution must be exercised as sudden squalls and swell up to 4 ft. ca occur, for which allowance should be made.

Cargo usually worked into or from wooden lighters of 30 to 35 ton capacity. Swell often restricts work to landward side only and swell o wind often make it difficult to work Hatch No. 1 in some vessel Accommodation ladder should be lowered on landward side to enab shore personnel to board.

Prohibited Anchorage and Berthing Area. From *(a)* 4° 30′ 54″ N.; 11 56′ 19″ E. in a 090° direction to the shore; and from *(a)* to *(b)* in 4° 27′ 3 N.; 113° 47′ 01″ E., thence in a 090° direction to the shore.

HEALTH: Every vessel arriving in quarantine shall fly or show th appropriate International Quarantine signal; and no person other than Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer o Customs shall board the vessel; and no person shall disemba therefrom until the vessel has been cleared by the Port Health Office

Free pratique granted without health inspection to vessels calling to l bunkers only at Lutong Moorings, provided ship healthy. Vessels wi unclean bill of health or vessels which have not declared themselve healthy in their arrival notice telegram are subject to normal Port Heal inspection procedure. Therefore of utmost importance that arrival notic is sent not less than 24 hours before arrival and contains all informatio requested (see "Radio") in order to prevent unnecessary delay.

RADIO: Miri Control call sign 9 WW21, frequency 500 kc/s., operates following hours local time: 0900–0930, 1300–1330, 1700–173 2100–2130. Present station has a limited range and if difficulty experienced making contact, vessels should pass messages throug other stations, such as Singapore Radio, or through other ships in clos vicinity of Miri.

Arrival notice must be telegraphed at least 24 hours before arrival an should contain following information:

All vessels

- *(a)* expected time of arrival (local time GMT plus 8 hours);
- *(b)* name of last port of call and next port of call, if not previous advised;
- *(c)* whether or not ship is healthy.

For bunkers

- *(d)* quantity of bunkers required, in long tons at least 48 hours notice required;
- *(e)* provisions or medical attention required, if any.

For cargo

- *(f)* tonnage to discharge, if any;
- *(g)* number of gangs required to load;
- *(h)* number of winchmen required to load.

Passengers

- *(i)* number of passengers to disembark.

BERTHING: Cargo vessels – see "Anchorage", oil carriers – se "Tankers".

MEDICAL: Treatment of urgent cases available on shore subje weather conditions. Early notice should be telegraphed of medic requirements.

TANKERS: Lutong Terminal position 04° 30′ N., 113° 57′ E. (approx Open sea berths lying about 3 miles offshore just Northward Lutong River mouth. Berthing any hour day or night. Await Berthin Master in area bounded by lines joining following positions: 04° 25′ 113° 56.25′ E.; 04° 25′ N. 113° 55′ E.; 04° 26.25′ N. 113° 55′ E 04° 26.25′ N. 113° 56.25′ E.

Pilot ladder should be rigged for Berthing Master, and starboa derrick near fuelling connection should be topped-up and rigged to heavy equipment required for mooring and connecting pipe-lines a which has to be taken on board before proceeding to mooring berth

Moorings are in a prohibited area which must not be entered withou Berthing Master of Sarawak Shell Oilfields Limited on board.

Berth	*Max. length*	*Max. draft*
SBM 1	600 ft.	40 ft.
SBM 2	750 ft.	40 ft.
SBM 4	820 ft.	44 ft.

No slop discharge facilities.

FRESH WATER: No fresh or boiler water available.

FUEL: No ex-barge facilities but bunkers obtained from Luto Terminal.

Nos. 2 and 4 Sealines. Available for bunkering dry-cargo vesse Ship's spring wire will be used to haul ends of mooring wires on boa and mooring winches should be double gear and in all respects ready t use. All other gear for mooring and connecting pipes is brought on boa with Berthing Master at Pilot Station. Bunkers will be supplied throu 8-in. flexible hose brought up on starboard side amidships a appropriate flange on ship's connection should be removed in advanc Berthing Master will remain on board throughout bunkering operat and will leave after vessel has unberthed. Mooring and unmoo operations each require about 1.5 hours and bunkering rate usua 45–75 t.p.h.

CUSTOMS ALLOWANCES: Bonded Store on vessels other than tho berthing at Lutong Moorings for bunkers only and exempted from form clearance, sealed by Customs after allowing a daily ration for duratio stay in port.

1 Customs Officer will remain on board all vessels anchored in M Roads and accommodation, if necessary, should be arranged for the The Agents' staff will remain on board throughout all cargo operatio and it would be highly appreciated if meals could be supplied to the and to the Customs Officer in view of the long time occupied travelling launch between ship and shore.

AIRPORT: Distant 10 miles. Daily flights.

TIME: GMT plus 8 hours. Permanent.

SHORE LEAVE: It is regretted that both passengers and crew must be dissuaded from coming ashore other than for medical attention, owing to weather and tidal restrictions.

REPAIRS: No facilities for repairs.

LUBRICANTS: Generally, lubricants not available but in emergency certain grades sometimes obtainable in very limited quantities.

PROVISIONS: Limited fresh provisions and ex-bond stores available for which vessels should give 72 hours notice of requirements so that arrangements can be made to secure the required supplies.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

POLICE/AMBULANCE/FIRE: Tel. 999.

AUTHORITY: Marine Officer, Marine Dept., Miri.

AGENT: Lloyd's sub-agents in Miri. The Borneo Company (M) Sdn. Bhd. Postal address PO Box No. 60, Miri, Sarawak. Tel. office: 3365, 3366, 3367; out of office hours: 3261, 3344. Telegraphic address "Borneo Miri".

The Borneo Co. (M) Sdn. Bhd. operate their own launches and a representative will board vessels as soon as possible after arrival.

PASIR GUDANG, Malaya: 01.26 N. 103.54 E.

(See Plan Book)

LOCATION: The port is situated on the Malaysian Coast of the Straits of Johore, 10 nautical miles East of Johore Bahru Town. The coordinates are: Lat. 01° 26′ 06″ N., Long. 103° 54′ 25″ E.

PILOTAGE: Pilotage is compulsory for vessels exceeding 45 m. (150 ft.) entering or leaving the Port Water Limits. Pilotage is provided by the Authority. The pilot boarding point is within the vicinity of Johore Shoal Buoy in position Lat. 01° 18′ 51″ N. Long. 104° 06′ 30″ E.

APPROACHES: *Fairway:* There is no limitation imposed on size of vessels passing through the fairway except for the draft. The main channel in the East Johore Strait has a depth of water up to approximately 11.6 m. (38 ft.).

ANCHORAGE: Anchorage areas have been designated within the port water limits for the following:

(a) General purposes.
(b) Dangerous goods and explosives.
(c) Quarantine.
(d) Petroleum.
(e) Lay-up.

RESTRICTIONS: A 24 hour Pilotage service for all vessels entering or leaving Johor Port is provided. However, for reasons of safety, vessels with drafts of 33 ft. and more are not allowed to navigate during the hours of darkness.

RADIO: Vessels can communicate direct with the pilot control station tower via ship to shore VHF on the following Channels:

Channel	*Ship Stations*	*Shore Stations*
11	156.550 mHz	156.550 mHz
21	157.050 mHz	161.650 mHz
(Listening Frequency only)		
63	156.175 mHz	160.775 mHz

VHF network links the tugs, launches and the Authority's personnel working on board vessels at the anchorages.

TUGS: Tug service is available for towage, berthing and unberthing operations within the port's water limits. This service is provided by the Authority's tugs and supplemented by privately operated tug companies. The tugs are mostly equipped with fire fighting and anti-pollution equipment.

FACILITIES: *Oil Jetty:* Depth of water 11 m. (36 ft.), L-shaped with 2 berths.

Ocean Wharves: Depth of water 11 m. (36 ft.), length 732 m. (1,200 ft.).

Coastal Wharf: Depth of water 5.5 m. (18 ft.), length 107 m. (350 ft.).

Transit Shed: 10,950 sq.m. (118,800 sq.ft.).

Godown: 5,400 sq.m. (59,400 sq.ft.).

Open Sided Shed: 10,950 sq.m. (118,800 sq.ft.).

Open Storage Yard: 3.24 hectares (8 acres).

Palm Oil Tank Installation: Present capacity for crude 33,000 tonnes. Future capacity for crude and refined 87,500 tonnes.

Liquid Chemical Installation: Present capacity 5,000 tonnes. Under construction 5,000 tonnes.

Petroleum and Petroleum Products: Storage capacity 37,000 tonnes.

Grain Silos: 21,000 tonnes.

Fertilizer Storage: 30,000 tonnes.

Proposed Timber Terminal: 6.07 hectares (15 acres).

Proposed Warehousing and Distribution Area: 3.24 hectares (8 acres).

Other facilities such as bauxite, ore and woodchip jetties as well as a shipyard (Malaysian Shipyard and Engineering) are available and operated by private companies. The shipyard undertakes repairs and docking to vessels up to 400,000 d.w.t.

Shore Equipment:

	Capacity	*Unit*
(a) Sideloaders	52,000 lbs.	1
	9,000 lbs.	5
(b) Mobile Cranes	28 tonnes	2
	10 tonnes	2
	17,600 lbs.	1
(c) Forklift Trucks	13,000 lbs.	3
	6,000 lbs.	18
	4,000 lbs. L.P.G.	6
(d) Towing Tractors	4,000 lbs. Drawbar pull	1
	2,000 lbs. Drawbar pull	3
(e) Trailers	15 tonnes	5
	6 tonnes	12

Floating Equipment:

(a) Tugs	Two – 1,800 b.h.p.
	Two – 350 b.h.p.
(b) Launches	Two – pilot launches
	Two – security launches
(c) Lighters	Eight – 100 tonnes steel barges
	Two – 100 tonnes steel flat-top water barges

HOLIDAYS: Chinese New Year, 16th and 17th February*; Prophet Muhammad's Birthday, 30th January; Labour Day,. 1st May; Wesak Day, 28th May; Hari Keputeraan D.Y.M.M. Seri Paduka Baginda Yang Di Pertuan Agong, 4th June; First Day of Fasting Month, 13th July*; Hari Raya Puasa (1400), 12th and 13th August*; Malaysia National Day, 31st August; Deepavali, 19th October; Hol Almarham Sultan Ibrahim, 9th October; Sultan of Johore's Birthday, 28th October; Hari Raya Haji (1400), 19th October*; First Day of Muharam, 9th November; Christmas, 25th December.

*These dates are subject to alteration.

SHIPMASTER'S REPORT: February 1979.

Port Limits: All the area of water enclosed on the West by a line drawn due South from Tanjung Bin (01° 20′ 00″ N. 103° 32′ 48″ E.) on the North by the Southern shores of the State of Johore, on the East by a line drawn 229° from Tanjung Stapa (01° 20′ 36″ N. 104° 08′ 12″ E.) and on the South by the limits of territorial waters of Johore, including the Johore River up to the bridge where the Johore Bahru to Kota Tinggi road crosses.

Documents:

Customs: 2 Personal Effects Lists, 2 Narcotics Lists, 2 Arms and Ammunition Lists, 2 Stores Lists made out on ships forms only, no special forms issued by the port. Customs Boarding Officer also requires a full and correct statement of all dutiable liquor and tobacco carried as ships stores, the statement which is to be submitted in duplicate on forms provided by the Boarding Officer is to show in detail the quantities of dutiable goods held (a) in the ships stores, bars, and shops, (b) in the possession of Officers and Crew.

Immigration: 3 Crew Lists, all Crew Seamans books for entry Visa stamp.

Port Health: 1 Vaccination List, Maritime Declaration of Health.

Police: 1 Crew List.

Agent: Last Port Clearance, Manifest, Bills of Lading, Ships Certificates, Crew Agreement (Articles).

Pilotage: Pilots board off Johore Shoal Buoy, request for Pilot to be made via Agents. Confirmation of Pilot boarding obtained from Johore Port Control, VHF Channels 11, 21 and 63.

Pilot launch is a fast motor cruiser.

Pilotage is compulsory for all vessels over 45 m. in length.

Anchorage: Ships proceeding to call at any of the docks within Johore Port Limits, may be requested to use the anchorage to the East of the pilot boarding ground. Vessels may also anchor approx. 0.6 miles E.S.E. off Pasir Gudang wharf, for large vessels there is a mooring buoy to restrict swinging into the channel.

Max. Size: The navigational conditions in the Straits are adequate for vessels of sizes expected to call at Johore Port as determined by depths at Ocean Wharf, Oil Jetty, and Coastal Wharf. No limitations on the size of vessel passing through the fairway except for controlling draft in the East Johore Channel of up to approx. 11.6 m. Large vessels up to 400,000 d.w.t. can navigate the Straits in ballast proceeding to Malaysia Shipyard also situated in Pasir Gudang.

Health: Vessels Agent to give advance notification to the Health Officer, if possible 48 hours prior to ETA of vessel, together with a list of ports visited within the preceding 14 days. Vessels from infected ports, or without valid derat exemption certificates, or with cases of sickness or death on board, must fly the quarantine flag, and proceed to quarantine anchorage until boarded by the Port Health Officer.

Radio: Singapore Radio 9VG is the most reliable, and messages are telexed direct to local Agent in Johore Baru.

VHF: The base station is situated at Pasir Gudang, Channels presently in use are 11, 21 and 63.

Tugs: 2 tugboats of 1,800 h.p., 2 tugboats of 350 h.p. Tugs normally meet vessels off the wharf, or at anchorage when mooring to buoy. Tugs lines used.

Berthing: Oil Jetty: Depth alongside 11.0 m.; "L" shaped jetty, with 2 berths. Ocean Wharves: Depth alongside 11.0 m.; length of wharf 732 m. Coastal Wharf: Depth alongside 5.5 m.; length of wharf 107 m. the Ocean berth is designed for general cargo vessels, and bulk carriers, of approx. 25,000 – 30,000 d.w.t.

All cargo work is carried out by ship's gear, shore equipment is available, e.g. mobile cranes, side loaders, vacuvators.

Specialised Cargo Handling Facilities: Oil Jetty capable of handling Palm oil shipment. Liquid chemical installation of 5,000 tonnes capacity. Grain silos, 21,000 tonnes capacity. Fertilizer storage 30,000 tonnes. Timber terminal 15 acres.

Stevedores: Stevedoring and shore labour undertaken by the Port Authority. Shift times, 0700–1500, 1500–2300, 2300–0700 hrs.

Medical: Medical service is available from the nearby town of Masai, which is only a short distance from the port. There is a General Hospital situated in Johore Baru to attend to serious cases.

Fresh Water: Fresh water is available through hydrants installed at frequent intervals on the wharves and the breasting island of the oil jetty. Fire fighting hydrants are installed throughout the port area, using separate fresh water, and sea water systems. Fresh water may also be supplied to vessels in the anchorage if required by water barge.

Fuel: Bunkers are available by pipe-line installed along the quay, or alternatively by barges. Bunkering is undertaken by Petronas.

Fire Precautions: The Port Authority maintains a fire and rescue service, with trained firemen responsible for fire fighting on board, and on shore. The brigade is equipped with modern fire fighting appliances, and salvage equipment. Tugs are also equipped with fire fighting equipment, and anti-pollution equipment.

Consuls: Nearest Consuls are situated in Singapore, and arrangements can be made to obtain Visa to proceed to Singapore to carry out ships business.

Repairs/Drydocks: Situated in Pasir Gudang industrial area is Malaysia Shipyard & Engineering Sdn Bhd. MSE is a fully equipped up-to-date engineering establishment, with facilities for ship repairing, new-building up to 12,000 d.w.t. and general engineering works.

(1) Drydock, length 395 m., width 80 m., depth 14 m., capable of handling ships of 400,000 d.w.t.

(2) No. 2 Drydock, length 270 m., width 46 m., depth 12.5 m., capable of handling up to 140,000 d.w.t.

(3) Newbuilding dock, length (approx.) 130 m., width 24 m., depth 8.0 m., capacity approx. 12,000 d.w.t.

Berthage – No. 1 quay, 390 m. long×7 m. draft. 1×15 ton luffing crane.
No. 2 quay, 168 m. long×7 m. draft. 1×15 ton luffing crane.
No. 3 quay, 168 m. long×7 m. draft. 1×15 ton luffing crane.

Surveyors: Classification Surveyors are available from Singapore, or Kuala Lumpur.

Gangway/Deck Watchmen: The Port Authority has a Security Division, responsible for the general security of the port area. The force consists of a detachment of trained armed guards. Their services are available if requested through the Agents.

Hatches: Preferably all opening/closing to be carried out by ships crew, as the stevedoring labour is inexperienced.

Customs Allowance: Spirits 0.125 of a quart per man per day *or* wines 1 quart per man per day; beer 1 quart per man per day; cigarettes 25 in number per man per day *or* cigars 8 in number per man per day *or* tobacco 1 oz. per man per day. Customs will issue allowance for total of 3 days, and on request to a Proper Customs Officer the seal may be broken for further issues.

Cargo Gear: When possible all loading and discharging carried out with ships gear. Shore equipment comprises – 1 side loader capacity 52,000 lbs., 5 side loaders of capacity 9,000 lbs. each, 2×28 tonne mobile cranes, and 2×10 tonne mobile cranes. For bulk cargoes, grains, fertilizers, sulphurs, etc. shore grabs of 2 tonne capacity connected to ships gear.

Repatriation: Ships crew with valid or recognised International Passports are permitted to enter and sign-off through Malaysia/Singapore checkpoint at Causeway, provided they obtain a transit visa from the Malaysian Authorities through the ships Agent. Ships crew without International Passport, and only Seamens Books must join/leave ships via Kuala Lumpur.

Time: GMT + 7.5 hours.

Telephones: Telephones may be placed on board at a connection charge of $/M25.00 per day.

Services: The Malaysia Shipyard & Engineering Co. has an agreement with the Port of Singapore Authority for the use of a slop barge which may be sent to the Johore Anchorage to receive slops from tankers which are proceeding to MSE for repairs. Numerous other services, and local representation for engineering and marine equipment available from Singapore.

Shore Leave: Shore leave for Crew members is permissible. The nearest town is Masai, approx. 5 miles from the port. Johore Baru is approx. 23.5 miles from the port. Crew members are allowed to cross the causeway into Singapore, providing they obtain the necessary visa from the Immigration Authorities through the ships agent.

Developments: Johore Port has plans for the construction of 3 more wharves. The proposed berths are for dry bulk materials, general cargo and containers. The berths will serve the needs of specialised industries, such as fertilizers, feedmeal, and grains. The construction of silos, storage areas, and other processing plants is to be undertaken by the companies concerned.

SHIPMASTER'S REPORT: April 1979.

Position: The port is situated at the Southern tip of the Malaysian peninsula on the East of Johore Straits, about 10 miles East of Johore Bahru town. The straits separating Malaysia and Singapore provides good shelter and safe anchorage. The exact position is Latitude: 1° 26′ 06″ N., Longitude: 103° 54′ 25″ E.

Approaches: Pilot is picked up at Johore Shoal buoy. Pilots can be contacted on VHF Channels 11, 21 and 63. The access route for vessels proceeding to the port branches via the buoy off Johore Shoal, passes through Kuala Johore and the bend off Serargoon North of Pulare Ubin. From Serargoon the route leads straight N.W. of the port. The East Johore channel has a depth of 38 ft.

Berths: There are at present 5 berths in the port. They are as follows:

	Berth	Length (ft.)	Water Depth (ft.)	Max. draft allowed (ft.)
1.	Outer oil jetty	700	36	34
2.	Inner oil jetty	450	32	29
3.	Ocean berth 1	350	18	17
4.	Ocean berth 2	600	33	31
5.	Ocean berth 3	600	32	30

Boarding Officials: Since this vessel came from Singapore, al clearances were arranged by the Agent there. The customs boarded t check the seal on the bond. The Immigration, Port health, etc. also boarded for a cursory check.

Discharging: Discharging was carried out using grabs which were attached to the ship's cranes. There are no facilities ashore for any type of discharging, except a small conveyor which is used for grain only. The grabs had no weight marked on them, hence it was insisted that the gra along with one full lift of cargo be weighed. This was done and the average weight of the grab was found to be 2 tons and the maximum cargo possible that could be lifted was 2.5 tons.

This port apparently handles a lot of fertilizer, but never in large parcels. This parcel of 6,000 tons was the second largest discharged. cranes were used throughout and the discharge rate worked out t nearly 2,000 tons/day. The stevedores were initially warned agains mishandling the cranes, and it was found that the operators handled the cranes very slowly and carefully.

Fresh Water: Fresh water connections are on the berth. The rate supply being 20 t.p.h.

Fuel: All grades of Bunkers are available at short notice.

Provisions: Available, but slightly more expensive than Singapore. N bonded stores available at this port.

Density: Varried from 1018 to 1021.

Shore Leave: There is no restriction on shore leave. No specia permits/passes are issued, but the Agents suggested that persons goin ashore should preferably carry their passports/discharge books. The nearest city is Johore Bahru which is 20 miles away. Ample transport available at moderate rates. About 4 miles away from the port there also a village called Masai.

Medical: All types of normal medical attention available.

AUTHORITY: Johore Port Authority.

PENANG, Malaya: 05.25 N. 100.21 E. **(See Plan Book**

DOCUMENTS:

The report of arrival (provided in Marine Shipping Ordinance, 1952

A copy of Passenger Statistics on prescribed forms.

A List of Crew Members.

A List of Passengers.

Evidence of last port clearance.

All Ship's Documents (safety equipment, deratisation, radio, load line and register).

Maritime Declaration of Health.

International Health Certificate for passengers and crew.

Vaccination List, for Smallpox and Cholera, for passengers and crew

Departures: Port Clearance Certificate signed by the Port Healt Officer, to be shown to the Port Officer issuing clearance.

Clearance also required from Immigration.

For oil tankers, a copy of Ship's Manifest to be submitted. Shi carrying explosives, Captain required to fill prescribed form "D" statin quantity of explosive cargo ship is carrying together with copy of Ship's Manifest.

PILOTAGE: Vessel approaching port has to send telegram to Pilo Office direct (cable address "Pilots Penang") or to ship's Agent statin "ETA North Channel Light Float" or in case of South Channel "ET Pulau Rimau". Draft of vessel to be given. Pilot Office may be contacte through Penang Telephone Exchange on VHF Channel 16 to loca telephone No. 63313. At least 3 hours advance notice should be give before arrival at Pilot point.

Pilot boats have a blue hull, varnished upperworks with "Pilot" writte in bold letters on both sides of boat.

Pilot is usually taken on board, for North Channel, in vicinity of Nort Channel Light Float and for South Channel, in vicinity of Rimau Wre Buoy 1 mile South of Pulau Rimau Lighthouse.

Vessels awaiting tide can anchor, in case of North Channel, in are shown by pecked lines marked anchorage area in Chart No. 1366. Fo South Channel ship can anchor in vicinity of Rimau Wreck Buoy. Durin bad weather, provided draft suitable, vessels sometimes requeste enter and take on Pilot at Erskine Buoy.

Pilotage is compulsory for all vessels navigating in pilot district Penang with the exception of fishing vessels and vessels of belo 600 g.r.t.

Shipmaster's Report: The KRA lightvessel, on the Outer Kra Bank the South of the South Channel, is non-existent.

The Pilot station is now equipped with VHF but operates on Chann 12 only. The Pilot Launch is also equipped likewise, as is a car th transports the Pilots from their homes to Batu Maung Point where th board the launch. It takes them exactly 1 hour from their homes un they are aboard a vessel at Rimau Buoy, therefore a minimum 3 ho notice is adequate.

One Pilot advised me not to approach the South Channel at any time the vessel's draft is over 24 ft. He stated that the bar to the S.W. Rimau Buoy has not been surveyed for many years and that possib silting may leave it on a lesser depth than the chart suggests. Th approach to the North Channel is safe.

ANCHORAGES: The anchorage for foreign going steamers (other tha those carrying dangerous cargo or quarantine ships) is Southward of th S.W. corner of the Man of War Anchorage (shown on Admiralty chart pecked lines) and Eastward of a line drawn from this point to th Northern white mark buoy and thence 180°. Vessels must moor so as swing clear of these lines at all states of tide.

The anchorage for coasting power vessels is Southward of a li drawn 270° from the Northern white mark buoy and Westward of a li drawn 180° from this buoy. Vessels must swing clear of these lines at states of the tide.

RESTRICTIONS: No entry restrictions imposed other than thos dictated by state of tide and draft of vessel.

MAX. SIZE: No limitations of size of vessel except for draft. North Channel chart datum 24 ft. 04 in. South Channel chart datum 19 ft. Vessels of up to 30 ft. 06 in. can use port but must wait for high water.
RADIO: Penang Radio, call sign 9–MG.
VHF: Vessels can communicate direct to Pilot Office via VHF operated on Channel 12 VHF within a range of 15 miles. A separate VHF network links the tugs, launches and the Commission's personnel working on board vessels in the roads.
TUGS: May be required to berth vessel at Butterworth Wharves in Port Penang. Tug joins vessel when at close proximity to wharves. Usual for tug's lines to be used.

3 tugs available, 2,000 b.h.p., 1,320 b.h.p. and 1,200 b.h.p. Also 1 tow-boat of 174 b.h.p. available to tow lighters to and from vessels.
BERTHING: There are 2 wharves, viz. Swettenham Pier on the island of Penang and Butterworth Wharves on the Mainland.

Swettenham Pier: 2 ocean berths of 365 m. length with 9.7 m. of water alongside. There is 4,366 sq.m. of covered storage accommodation.

Butterworth Wharves; 6 ocean berths of 1,051 m. length with 9.7 m. of water alongside.

There are 5 transit sheds of 148,000 sq. ft., 7 storage godowns of 261,000 sq. ft. an open sided timber shed of 90,000 sq. ft. and 140,000 sq. ft. of open storage area. 9 godowns of 384,000 sq. ft. near the port area are leased to private companies. Berth No. 6 is a container berth with roll-on/roll-off facilities.
SPECIALISED CARGO-HANDLING FACILITIES: A bulk cargo terminal has been constructed to service dry and liquid bulk carriers. Length of wharf is 146 m., but is aided by 2 side dolphins connected by a 1,219 m. access bridge, depth alongside is 10 m. (Chart Datum).

There is another vegetable oil tanker pier which will be ready in July 1980. Draft alongside is 9.7 m. – Pier of open dolphin supported structure.

Also see "Developments".
CONTAINER HANDLING FACILITIES: The port is equipped with modern container handling facilities to handle both 6 m. and 12 m. containers. These container facilities are available at the Butterworth Wharves and they include a 6.7 hectare marshalling yard with storage space for 5,000 containers, 2 container freight station units (8,639 sq. m.), 2 units of straddle carriers for handling both 6 m. and 12 m. containers, 20 power points for refrigerated containers and prime movers with 6 m. and 12 m. trailers. To assist in the working of vessels which do not have lifting facilities, there is also a mobile boom crane with the capacity to lift 6 m. containers at 24 m. radius and capable of plumbing the hatch of vessels.

Additional container handling equipment includes a container gantry crane, 2 transtainers, 2 heavy duty 25 tons capacity forklift trucks, 14 prime movers with 8 units 12 m. trailers and 11 units 6 m. trailers and 6 units short-mast forklift trucks for container freight station operations.

Haulage of containers inland and between the Island and Butterworth Wharves is catered for by Kontena Nasional, a private haulage company.

Container Roll-On Roll-Off Berth:

The length of this berth is 523 ft. (159.4 m.) and it is served by a rail-mounted 35 ton container gantry crane. The wharf decking is capable of withstanding a superimposed load of 7 cwt. per sq.ft. (3.82 tonnes per sq.m.) while vehicle load is in accordance with standard highway loading type H.A. and 45 units type H.B.

The ro/ro ramp is 27 ft. (8.2 m.) in width and is designed to take 2 laden 55,000 lb. (24.75 tonnes) capacity forklift trucks or their equivalent. Its main ramp is 76 ft. (23.2 m.) and is connected to a 15 ft. (4.6 m.) link span with a 2.25 ft. (0.7 m.) levelling flap.

To enable the ramp to service vessels under any local tidal condition, the two extreme levels are set at +22.6 ft. (+6.9 m.) ACD and +3.5 ft. (+1 m.) ACD.

Depth alongside wharf is 32 ft. (9.7 m.).
CARGO HANDLING EQUIPMENT: At Butterworth Wharves one mobile crane of 30 tons capacity, 14 mobile cranes of 2- to 3-ton capacity, 62 fork-lift trucks of 6,000 lb. capacity, 4 fork-lift trucks of 13,000 lb. capacity and 28 LPG fork-lift trucks for hatch work.

At Swettenham Pier 1 mobile crane of 10-ton capacity, 6 electric cranes of 3-ton capacity, 5 fixed and mobile cranes and 22 fork-lift trucks. Scores of tractors and trailers make up the rest of the mechanised cargo-handling equipment of the Commission.
LIGHTERAGE: In the event of a vessel working in the Roads, lighterage is available for the transport of goods to and from the vessel. There are about 182 lighters operated by private companies and twenty 150-ton lighters by the Commission for lightering of cargo in the Port. In the case of the Commission's lighters, lighterage is only undertaken for export cargo.
STEVEDORES: Stevedores can only be provided by stevedore contractors at short notices but normally a minimum of 12 hours will be required. Shipping Agents normally make these arrangements with stevedoring contractors.

Working Hours:

The Port operates round the clock. The working hours are as follows:
1st shift 0730 hrs. – 1530 hrs. (meal break 1130–1230)
2nd shift 1530 hrs. – 2300 hrs. (meal break 1930–2030)
3rd shift 2330 hrs. – 0730 hrs. (meal break 0330–0430)
MEDICAL: Advance notice is necessary if medical attention is required so that arrangements can be made with Medical Department by Agents.
TANKERS: 2 tanker berths. Esso Wharf, 27 ft. at low water. Caltex Wharf, 35 ft. at low water. Mud bar approach to Caltex Wharf is 29 ft. at low water. Tankers also occasionally call at Swettenham Pier to deliver oil to City Council Power Station.
FRESH WATER: Available at all times. Delivery can be by means of hydrants at berths or by water-boats (2×180 tons and 1×200 tons capacity) to vessels anchored in Roads. Rate of delivery is approximately 40 t.p.h.
FUEL: Fuel available from private oil companies at 24 hours notice. Limited quantities of fuel can be supplied by barges to vessels in the Roads.
GANGWAY/DECK WATCHMEN: Services of a watchman recommended.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
IDENTIFICATION CARDS: Needed only when a crew member is discharged after hospitalisation or when he is repatriated.
REPAIRS: Minor repairs can be undertaken.
DRY DOCKS: Dry docks not available for ocean carriers. Slipways available for vessels of 700 nrt with dimensions of 190 ft. × 40 ft.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.
AIRPORT: Distance from port to airport approximately 11 miles. Served by both international and local airlines.
TIME: 7.5 hrs. ahead of GMT. No alteration to clocks during year.
HOLIDAYS: 3 port holidays a year: Hari Raya Puasa, Hari Raya Haji and National Day.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: A telephone is placed on every ship that berths alongside. This is one of services provided under a common charge known as the wharf service charge.
SERVICES: All types of minor marine servicing is available. Provided by private firms. Some of the services are draft survey, general conditioning of ship, valuation of ship, accident survey, inspection of refrigeration, radar adjusting service, compass adjusting and tank-cleaning facilities.
SHORE LEAVE: Allowed.
REGULATIONS: When a vessel calls at port, Customs search party may go on board vessel to search for contraband goods.
DEVELOPMENTS: The Commission's new Bulk Cargo Terminal is located South of the Prai power station and the Caltex Wharf. The terminal has approximately 75 acres (30.6 hectares) of backup area which has been demarcated for stockpile site, covered storage and tank farm.

It will be served initially by a 460 ft. (140.2 m.) long berth linked to the land by a 4,000 ft. (1,219.2 m.) access bridge. Bulk carriers of up to 39 ft. (11.9 m.) draft can berth alongside it. However, at the moment the maximum draft in the approach channel is only 32 ft. (9.7 m.).

A kangaroo luffing crane located at the quayside to service vessels has a capacity to discharge cargo at 350 tons (355 tonnes) per hour. It is linked to a conveyor belt system which has an automatic built-in weighing device.

On the shore side portable conveyor belts are provided to direct the cargo to the appropriate storage area.

Front end loaders are provided for shipment of dry bulk cargo such as ilmenite ore and a separate portable conveyor belt unit at the quayside helps to load the cargo into the relevant ship's hatch.

For liquid bulk operators, gantry supports are provided for installation of pipe-lines. Storage arrangements can be made to store the liquid bulk cargo at tanks constructed at the tank farms or direct at the operators' factories situated nearby.

The terminal is currently ready to service liquid bulk operations although dry bulk handling is only expected to commence in late 1980. A provision has also been made for the construction of 2 additional berths when the need arises.

Other projects:

Together with these projects, the port has completed a feasibility study into the deepening of the North Channel entrance of the harbour to enable deeper draft vessels to call at the port and plans are in progress to locate a new port site to meet the future requirements of the port.

In addition the Commission is constructing a vegetable oil tanker pier which is expected to be completed in the middle of 1980.
DELAYS: Rain is only factor that may delay a ship's discharging or loading operations.
AUTHORITY: The Penang Port Commission.

PORT DICKSON, Malaya: 02.31 N. 101.47 E.

DOCUMENTS:

1. *Harbour Master's Office or Marine Department*
   - *(a)* "Report of Arrival of Vessel" on prescribed Form (Marine 28) obtainable from Harbour Master's Office on arrival.
   - *(b)* One copy, Passenger List, specifying names and nationalities and required to report any casualties, accidents, births or deaths that have occurred during the voyage to the passengers, crew, ship or cargo.
   - *(c)* Port Clearance from last port and copy of Manifest of Cargo to be discharged.
   - *(d)* List of all arms and explosives on board.
   - *(e)* In the case of a British or Malaysian vessel and vessels belonging to a nation not having a Consular Officer at the port, produce to Port Officer the Certificate of Registry and ship's Articles.
   - *(f)* All ship's certificates such as Safety Equipment Certificate, Radio Certificate, Load-line Certificate, Safety Construction Certificate, Ship's Registry, Passengers' Certificate, Derating Certificate and all Certificates of Competency of all Officers on board.
   - *(g)* Crew List.
2. *Immigration Authorities*
   - *(a)* Crew List (3 copies).
   - *(b)* Passenger List (3 copies).
   - *(c)* Produce all passengers passports/visas.
   - *(d)* Produce all seamen's cards.
   - *(e)* Forms A and B – "Immigrant and Emigrant" obtainable from Immigration Department on arrival.
3. *Port Health*
   - *(a)* Crew List showing last date of vaccination.
   - *(b)* Passenger List showing the last date of vaccination.
   - *(c)* Produce all seamen and passengers' vaccination cards.

4. *Customs Department*
   - *(a)* Crew List (2 copies).
   - *(b)* Passenger List (2 copies).
   - *(c)* Personnel Effects List (2 copies).
   - *(d)* Cargo Manifests (2 copies).
   - *(e)* Last Port Clearance.
   - *(f)* Bonded Stores List (2 copies).
   - *(g)* Full and correct statement of dutiable goods carried as ship's stores (2 copies).
   - *(h)* Customs Form C.D.15 obtainable from Customs Department on arrival.

APPROACHES: Deep water approach channel from N.W., marked by 5 light buoys, presents no difficulties and is clear.

PILOTAGE: The Port Dickson area does not constitute a Compulsory Pilotage District under provisions of Merchant Shipping Ordinance, 1952. Private pilotage services are, however, operated by Shell and Esso for vessels making use of their respective marine installations. Mooring Master boards tankers at Banbeck Shoal Buoy.

Ship's Officer's Report: Pilot boards one mile off Fairway Buoy. However, vessels of less than 30,000 d.w.t. holding Admiralty Chart No. 1140 may be requested to proceed inwards, Pilot boarding at No. 1 Buoy. Coasters proceeding to Headlands Jetties may be required to do own pilotage.

ANCHORAGES: *(a)* Good anchorage may be obtained in depths from 15 to 20 fathoms, Westward and South-Westward of Tanjong Kamunin. Small vessels may obtain anchorage in depths from 4 to 5 fathoms North-Eastward of Pulau Arang Arang, but holding ground is poor.

(b) Prohibited Anchorage Area indicated by pecked lines on chart and described under Port (Negeri Sembilan) (Amendment) Rules, 1963. This area contains a tanker SBM, with extensive ground tackle and floating hose attachments, which is connected to the shore by a submarine pipe-line. Passage between the buoy and the shore is also prohibited.

RADIO: *Ship's Officer's Report:* Send ETA 96 hours and 24 hours in advance. Two hours before arrival keep listening watch on Channel 16. Shell Oil Terminal on VHF Channel 16 and 9. Cargo operations are carried out on Channel 9.

TUGS: No tug-boats available.

MAX. SIZE: Up to 49 ft. draft at S.B.M. terminal.

BERTHING: Port installations at Port Dickson comprise the following:

A small boat harbour contained in the curve of the stone approach to the Railway Jetty which affords little shelter against Southerly winds dries out at low water.

The Shell Jetty – property of the Shell Refining Co. (Malaysia) Ltd. (Private). Reinforced concrete jetty 700 ft. with "T" head 170 ft.×36 ft.

The Esso Jetty – property of the Esso Standard Malaya Ltd. (Private). Reinforced concrete island jetty 200 ft.×24 ft.

The Railway Jetty – property of the Malayan Railway Administration. Stone pier 600 ft. length terminating in a crosshead 150 ft. long with steel piling and wooden deck.

The Joint Shell/Esso single-buoy Tanker Mooring and Crude Oil Discharging Terminal.

Stone ramp on foreshore usable by lighters at high water.

MEDICAL: District hospital with 150 beds.

TANKERS: Shell/Esso Single Buoy Mooring for crude discharge into submarine pipe-line. Refineries produce petroleum products for export. Deballasting facilities up to 35,000 barrels capacity.

Esso Product Jetty: Berth is constructed of reinforced concrete. The island jetty is 200 ft.×24 ft. with 4 off-lying mooring buoys inshore for mooring purposes. Accommodation for one vessel on outer face only.

Max. LOA 575 ft.; max. draft 34 ft.; max. size 19,500 d.w.t.

Shore connections:

1×20 in. black oil/ballasting
1×16 in. white oil line
1×10 in. LPG line
1× 4 in. inert gas line
1 crane to handle hose

FRESH WATER: Available at Shell and Railway jetties.

FUEL: Bunker fuel-oil available. No diesel.

DEVELOPMENTS: Proposal to enlarge facilities and to provide deep-water berths.

CUSTOMS ALLOWANCES: Tobacco, cigarettes 25 in number per man per day, or cigars 8 in number per man per day, or tobacco 1 oz. per man per day, or snuff 1 oz. per man per day. Wine and/or spirits, spirit 0.175 qt. per man per day, or wines 1 qt. per man per day, or beer or stout 1 qt. per man per day.

REPAIRS/DRY DOCKS: None.

HOLIDAYS: Official holidays in the state as follows: New Year's Day, 1 day; Chinese New Year's Day, 2 days; Muslim New Year's Day, 2 days; Wesak's Day, 1 day; His Majesty's Birthday, 1 day; Prophet Mohammed's Birthday, 1 day; His Excellency Governor's Birthday, 1 day; Malaysia Day, 1 day; Deepavali, 1 day; Hari Raya Huji, 2 days; Christmas Day, 1 day. No cargo is worked on any of the above gazetted public holidays – port closed.

AIRPORT: None.

AUTHORITY: See "Malacca".

PORT KELANG, Malaya: 03.00 N. 101.24 E.

(See Plan Book)

PORT LIMITS: All the waters in the Klang Straits, Klang River, Sungei Aur, Selat Lumut, Sungei Langat and other waterways contained within the parallels 2° 58′ N. and 3° 05′ N. and the meridians 101° 20′ E. and that passing through Connaught Bridge i.e. 101° 28′ 30″ E. approximately including all piers, jetties, landing places, wharves, quays, docks and other similar works whether within or without the line of high water mark, any position on the shore or bank within 50 yards of high water mark subject to any rights of private property therein.

APPROACHES: Ships from and to Penang enter and leave the port by the North Klang Straits, and ships from and to Singapore enter and leave by the South Klang Straits. The entrance channel at the North Klang Straits is dredged to 36 ft. below datum. A very large deep water anchorage for ships is available at the North Klang Straits. For ships entering the Old Port, the permissible draft is 28 ft. and 22 ft. plus the height of tide through the North Klang Straits and South Klang Straits respectively.

DOCUMENTS: *(a) For Agent.* Vessels required to fill in arrival report which may be obtained from Agent at Singapore or Penang or Boarding Agent on arrival. This should be completed and handed to Boarding Agent together with last Port Clearance and one copy each of Crew List and Passenger Lists for submission to Marine Department.

Vessels should have ready and hand to Boarding Agent on arrival the following:

Arrival Report.
Last Port Clearance.
Two copies of Crew List.
Two copies each of Disembarking and Transit Passenger Lists (if any).
List of Explosives, dangerous cargo on board.

Following documents should also be handed to Boarding Agent on arrival and will be returned to vessel after perusal by Marine Department:

Malaysian Light Dues Receipt (if any).
Ship's Register.
Radio Safety Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Deratisation Certificate.

Port Health Officer now requires all vessels arriving from foreign ports to submit an "Entry Declaration" on form Health 43, on the International "Maritime Declaration of Health" form or on a similar copy, and this should be handed to Boarding Agent, together with copy of crew list, in cases where vessels are not in Quarantine, in which case doctor does not attend on board.

Note: Endorsement of Port Clearance must be obtained from Port Office at Marine Office before a fresh Port Clearance can be issued by local Customs Authorities and handed to vessel before sailing.

(b) Immigration

2 copies Crew List.
2 copies Passenger List (Disembarking and Transit).

(c) Customs

2 copies Customs List (CD.15).
1 Crew List.
1 Passenger List.

FLAGS: The Malaysian flag. Flag "Q" meaning Health Clearance required. *Flag 2/5 meaning no passengers on board, or *flag 3/4 meaning passengers on board. Pennant Zero is not required since Boarding Officers do not board the ship on arrival. Flag "H" meaning Pilot on board. (*Applies only to vessels arriving from foreign ports which includes Singapore.)

Note: Except for vessels under way, no vessel in port may use its siren except in case of an emergency when no other means of communication is available. The Authorities strictly enforce this rule and vessels infringing it become liable to heavy fine.

PILOTAGE: Available 24 hours a day. Pilotage compulsory.

(a) Application. Piloting carried out by Kelang Port Authority. Masters to cable "Pilots Port Kelang" giving ETA and point of arrival, i.e. Pintu Gedong or Pulau Angsa and draft at least 4 hours before arrival, as Pilots will not leave shore until confirmation received from vessel. Both North and South Channels are well marked and Pilots consider it quite safe to arrive and depart at any hour.

Vessels approaching this port normally apply through Agent, giving ETA Pintu Gedong, Pulau Angsa or Deep Water Point, together with draft and port of departure.

(b) VHF. If vessels wish to communicate direct all pilot boats are fitted with VHF for use between pilot office, pilot boats, pilot boat to pilot boat and where necessary to vessels arriving at this port. Operated on Channel 12 of International Maritime VHF radio telephone bands, and of a range of 20–25 miles.

(c) Recognition. Pilot boats painted orange and have white superstructure.

(d) Boarding. Unless advised otherwise Pilots will be ordered to board vessels at Pulau Angsa (North Channel), or Pintu Gedong South of the Seaward Bar Buoy.

Pilot ladders should be of approved Standard pattern internationally used.

(e) Waiting for Pilot. Location for a vessel awaiting Pilot is at Pintu Gedong 5 cables South of Seaward Bar Buoy, at Pulau Angsa 1 mile East of Pulau Angsa Island, and at Deep Water Point where anchorage is available according to number of vessels already anchored.

ANCHORAGES: Per latest Admiralty charts. Vessels may load timber and ore from privately owned junks at Deep Water Point Anchorage. In exceptional cases and with permission of Port Authority it is also possible to work with Authority Lighters at Deep Water Point.

RESTRICTIONS: (See "Max. Size"). Pintu Gedong, the Southern Channel Pilot Station, there is a restriction, of which vessels will be advised when giving their ETA.

MAX. SIZE: Max. length of vessels using South Port (old port) is: dry cargo vessels, 565 ft. LOA with draft of 32 ft., tankers, up to 560 ft. LOA and draft 32 ft. Tidal conditions govern movements of all vessels over 500 ft. LOA in the South Port but not at the North Port (new port). Vessels of up to 621 ft. can be berthed under any conditions at the North Port but only under special tidal conditions at the South Port.

At the North Extension Wharves, container ships of 950 ft. can be berthed.

HEALTH: Port Health Officer will board vessels arriving from infected ports, or carrying deck passengers at Deep Water Point between 070 and 1800 hrs. All ships arriving from foreign ports should ensure that all on board hold valid smallpox vaccination documents.

All vessels should include in arrival cables confirmation that all well on board and also that all health papers in order. It should be understood that the health papers referred to include deratisation, or deratisation exemption Certificate.

RADIO: ETA cables normally routed via Singapore or Penang as no radio station in Port Kelang. Such messages when received are transmitted by telephone to Agents/and or Pilots at Port Kelang.

VHF: (See "Pilotage"). Ship to shore telephones available at all berths at North Klang Straits, and VHF sets available for ships in moorings. Klang Exchange keeps a 24-hour watch on Channel 16 and will connect the vessel to any telephone receiver ashore. For local calls the cost is $1.92 for three minutes (approx.).

TUGS: Supplied by Port Authority and normally "stand by" vessels berthing at wharves as and when required. Tugs towing use ship's lines, tugs pushing use their own lines. 5 tugs available to assist in berthing and unberthing and are equipped with fire-fighting appliances and radio communications system. When vessels berth or unberth at wharf tugs ordered by Agent in consultation with Pilots and once in attendance are charged for whether used or not. Tugs also used to swing vessels in stream which are stemming ebb tide on departure. In addition 3 smaller tugs used to tow lighters to and from vessels.

BERTHING: There are 2 ports viz: the South Port or Old Port and the North Port. Vessels berthing in the South Port (Old Port) are governed by tidal conditions which vary considerably. Vessels over 525 ft. LOA are usually berthed port side to on the ebb and then only when tides are favourable. There is usually no objection to vessels unberthing from the wharf at night although generally speaking vessels will not be berthed at night. As a general rule discharging vessels will berth at North Port (North Klang Straits) and loading vessels in the stream in the South Port (Old Port).

(a) South Port. 3 ocean wharves of 2,190 ft. length with 30 ft. of water alongside, 2 coastal shipping wharves of 650 ft. with 20 ft. of water alongside, 5 swinging buoys, and 2 anchorages. 3 to 4 vessels of not more than 250 ft. in length and with drafts of up to 18 ft. can be accommodated at North Shore anchorage.

(b) North Port (North Klang Straits) Wharves. 4 ocean wharves with total length 2,490 ft. Each berth 580 ft. long, with 202 ft. Concrete wharves with a safe working load of 4 cwt. per square foot and a maximum point load of 10 tons. Draft alongside all 4 wharves 30 ft. Rail track on wharf apron. In addition 4 container wharves, each 1,050 ft. long and 1 conventional cargo wharf 700 ft. long have been built and are now in operation. The wharf aprons are 260 ft. wide. Depth of water alongside is 45 ft. There are 4 container cranes on the container wharves. If there are no container ships in port, these wharves will be used by conventional vessels.

Depth of water alongside is 45 ft. 62 acres of stacking, capacity 9,000 TEU's (excluding 100 reefer points). Freight station measures 600 ft.×120 ft.

Container Handling Equipment: 4 container cranes of 35 tons capacity each (which can handle 800 containers a day).

16 straddle carriers of 30 tons capacity each. (By August/September 1980 an additional 10 straddle carriers will be available).

20 prime movers.

12 × 20 ft. and 10 × 40 ft trailers.

53 forklifts.

2 tugs of 2,700 b.h.p. each and 11 tugs of 400 b.h.p. – 2,400 b.h.p.

(c) General.

Distance between buoys is as follows:

Distance between No. 1 buoy and No. 2 buoy	1,200 ft.
Distance between No. 2 buoy and No. 3 buoy	1,200 ft.
Distance between No. 3 buoy and No. 4 buoy	1,200 ft.
Distance between No. 4 buoy and No. 5 buoy	1,300 ft.

The above distances allow for slackness in pendants at low water. The depths listed combined with tidal predictions for current year give actual depth of water.

(d) The new roll-on/roll-off ramp is now ready to accommodate ro-ro vessels with or without stern ramps of their own. The linkspan, measures about 45 m. long and 8 m. wide. It can cope with ships of up to 40,000 tonnes and is capable of accommodating vessels with 20 to 32 m. beams and 1.0 to 4.5 m. freeboards.

STEVEDORES: Almost all timber loaded from private junks for which no lighter gangs needed. Average working rate, subject to stow, for timber in loose pieces is 4–6 t.p.h., and in bundles 6–8 t.p.h. Not more than 2 lighters or "tongkangs" may lie alongside any vessel abreast of each other and not more than 2 lighters shall be moored astern of a vessel.

Rubber, latex in drums, etc., loaded by Port Authority and lighter/wharf gangs are required. Average working rate for these commodities is 14 t.p.h.

The average rate of discharge at North Port (North Klang Straits) wharves is 14–16 t.p.h.

On-board stevedores provided by the Port Authority. Requirements for the 1st shift should be made known by 1300 hrs. the previous day and for 2nd shift by 1000 hrs. same day and the 3rd shift not later than 1130 hrs. the same day.

Working hours throughout the port: 1st shift 0700 to 1500 hrs. (meal break 1100–1200 hrs.). 2nd shift 1500 to 2300 hrs. (meal break 1900–2000 hrs.). 3rd shift 2300 to 0700 hrs. (meal break 0300–0440 hrs.).

MEDICAL: A number of private doctors in Port Kelang and it is often not necessary to give any advance notice of medical attention being required. In event of vessel requiring urgent medical attention on arrival, advisable for Master to cable Agent in advance. At present 2nd class medical facilities available in Kelang and 1st class facilities only available in Kuala Lumpur. As vessels arriving at Port Kelang normally do so after calling at Penang or Singapore no inoculation, vaccination or fever certificates are required unless either Singapore or Penang is declared an infected port.

TANKERS: Tankers always berth port side to on ebb and near slack water. Vessels with bulk liquid cargoes to load or discharge will berth at wharves 1, 2, or 3. When a number of pumping vessels in port, vessels will usually occupy these wharves only for the time it takes to complete pumping and may then have to shift to stream or another wharf. Three of the ocean wharves are provided with facilities for handling liquid cargo. Liquid cargoes now being handled are: latex, palm, coconut oil, petroleum products, alkane, tallow and fuel oil.

Shell Company has a private jetty on which vessels up to 320 ft. in length with drafts not exceeding 20 ft. can be berthed.

DENSITY: Varies considerably with state of tide and heavy monsoon rains.

FRESH WATER: Waterboat, capacity 200 tons, available to supply vessels in South Port (Old Port) and at Deep Water Point with fresh water. As much notice as possible should be given if waterboat required. At North Port (North Klang Straits) water available from wharf. Pumping rate about 20–25 t.p.h.

FUEL: Bunkers are available.

FIRE PRECAUTIONS: In respect of tankers loading or discharging inflammable cargo, necessary to have wharf cordoned off and "No Smoking" signs exhibited prominently. Port Fire Brigade required to be on stand-by at wharf whilst operation in progress. Vessel may not disable engines whilst alongside wharf and shall have axes ready in event has to leave wharf urgently and necessary to cut ship's lines. Port Fire Service on duty 24 hours a day throughout year. Service is capable of fighting all types of fire whether on land or on sea. Fire service has following equipment: 3 fire engines, 1 Land Rover fire engine, 2 trailer pumps, 3 fire fighting tugs.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS/IMMIGRATION: Customs Officer will board vessel soon after arrival to seal the "Bonded stores". For vessels staying in port some time it is usual to issue three days supply – a further issue may be made on request after three days.

Immigration Officer will clear vessels arriving from foreign ports on all days between 0700 and 2100 hours. No one may board or leave or approach within one cable length of such vessel without special permission until vessel has been cleared by Immigration Officer and Immigration Signal is hauled down. No Immigration formalities required for vessels arriving from or leaving for other West Malaysian ports (Malacca and Penang).

IDENTIFICATION CARDS: Advisable that members of crew carry identification cards when leaving ship.

CONSULS: Consulates/Embassies/High Commissions in Kuala Lumpur (28 miles from Port Kelang).

Australian High Commissioner's Office.
Belgian Embassy
Consulate of Brazil
British High Commission
Burmese Embassy
Canadian High Commission
Consulate of the Republic of China
Royal Danish Embassy
Consulate of Finland
Embassy of France
West German Embassy
Indian High Commission
Embassy of the Republic of Italy
Embassy of Japan
Embassy of the Republic of Korea

Royal Embassy of Netherlands
New Zealand High Commission
Consulate of Norway (at Penang only)
Consulate of Panama (at Penang only)
Pakistan High Commission
Embassy of Philippines
Singapore High Commission
Royal Swedish Embassy
Embassy of the United States of America.

REPAIRS: Slipping facilities for repair of lighters and smaller tugs available. No facilities for major repairs to ships.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriation must be arranged by Agent. Harbour Master attends signing-on and signing-off of the crews on ship's articles.

AIRPORT: Subang International Airport approximately 20 miles from port on main trunk route to Malaysian capital of Kuala Lumpur and served by regular domestic flights and international flights.

HOLIDAYS: Port Closing Days. *Hari Raya Puasa; *Chinese New Year; Malaysia Day (31st August); *Deepavali; Christmas Day (25th December). *Dates subject to changes as festivals coincide with Mohammedan, Chinese and Hindu calendars.

TELEPHONES: At North Port (North Klang Straits) Wharves telephones installed on board if required. At wharves in South Port (Old Port) there is always a telephone within easy reach at Wharf Office.

GENERAL: *(a)* Ship-Shore Communication. When vessels are berthed in stream or at Deep Water Point a 24 hour launch service can be supplied. Arranged by Agent in consultation with Master to suit requirements of ship.

Vessels permitted use own boats with proper navigation lights at night.

(b) Seamen's Club. "Mariner's Club" for officers and seamen outside No. 3 Gate of South Port. Club has swimming pool and bar.

(c) Diving. Diving services available for salvaging lost cargoes, examining underside of ships, etc. Divers capable of deep-sea diving down to 120 ft.

DEVELOPMENTS: Construction of 3,500 ft. of wharves expected to be ready by 1980.

AUTHORITY: Kelang Port Authority.

ROMPIN (Kuala Rompin): inc. Pahang, Malaya: 02.43 N. 102.30 E.

DOCUMENTS:
Register.
Last Port Clearance.
7 copies Crew List and 4 for Agent.
5 copies Passenger List (if any).
5 copies Stowaway List (if any).
2 copies Stores List (including firearms and ammunition).
2 copies Dutiable Liquor and Tobacco List.
2 copies Crews Declaration List (cameras, radios, etc.).
1 copy Vaccination List.

Masters of vessels to fly the necessary following flags on arrival as required under Section 448 of the Merchant Shipping Ordinance and Sub-Section (9) of the Federation Port Rules, 1953.

(1) The Federation of Malaysia Flag.
(2) The Pennant "O" Flag (Request Port Officer).
(3) The "Q" Flag (request Port Health Officer).
(4) The Pennant "2"; "5" Flags if no passengers and "3"; "4" Flags if there are passengers on board (Immigration).

PILOTAGE: Compulsory to the loading berths. Extra charge for pilotage outside normal office hours and holidays.

ANCHORAGE: On arrival, vessels required to anchor about 1 mile outside berthed ships to obtain pratique. An accommodation ladder must be rigged on lee side to allow Port Authorities to board.

READINESS: Notice of readiness cannot be accepted until vessel is in free pratique, Customs Inward Examination completed, and in all respects ready to load.

LOADING. *(a)* Ladders. Masters particularly advised to see that a sound and adequate ladder provided at each lighter to allow labourers engaged in loading to pass to and from ship with no undue risk. Regulations are provided in the Merchant Shipping Ordinance, Section 445, Sub-Section (O) which takes care of this requirement and failure to take adequate precaution in seeing regulation is observed may result in serious consequence to those responsible.

Masters requested to ensure that in addition to ladders for labourers, an extra ladder, preferably a clean pilot ladder, be made available at all times for the Agent for boarding. This ladder should be made fast on lee side, just forward of any scuppers in vicinity, and a heaving line from ship's rail made fast to bottom rung. When ladder not in use, bottom of ladder can be pulled up a few feet with heaving line to prevent labourers from using it or damage from lighters.

(b) Winches. All winches must be in single gear at all times.

(c) Derricks. Practice to work 2 sets of derricks to 1 lighter where practicable.

(d) Trimming. No manual trimming undertaken.

(e) Damages. In the event of your vessel sustaining damage by stevedores during loading, you are requested to inform the clerk and foreman on board immediately and as soon as practicable confirm same in writing to the Eastern Stevedoring Co. Ltd., Kuala Rompin, with copies to Hong Kong & Eastern Shipping Co. Ltd., Hong Kong, and Malay States Shipping Ltd., Kuala Rompin. It is important that full details of damage are given, together with measurements whenever possible.

Minor damage has occurred on vessels due to hatch beams not being bolted or lashed. Masters therefore requested ensure all beams adjoining working parts of hatches either bolted or lashed, otherwise stevedores will repudiate liability for any damage incurred.

OPENING/CLOSING HATCHES: Removal and replacement of hatc beams and covers must be done by ship's crew. Ship's Officers shoul see that any tween-deck beam removed is replaced before ore reache that height.

CUSTOMS: Customs office hours 0830 to 1630 Monday to Friday, 083 to 1300 hrs. Saturday.

IDENTIFICATION CARDS: Every member of crew must produc Identity Document or Shore Leave Pass at Customs House whe landing and again when returning to vessel.

HOLIDAYS: New Year's Day; Hari Raya Puasa, 2nd day; Chinese Ne Year, 2nd day; Hari Raya Haji, 2nd day; First Day of Muharram; Vesa Day; Birthday of Sultan of Pahang; Birthday of H.M. The Yan Di-Pertuan Agong; Birthday of Prophet Muhammad; Malaysia Da Deepavali; Christmas Day.

Note: Where a holiday falls on a Sunday, the following day will b observed as a holiday, and if such latter day is already a holiday, the the day following shall be a public holiday.

GENERAL: *(a) Scrap Iron.* Steel mills in Japan complain from time t time of finding pieces of scrap iron in the iron ore cargoes. If this scrap i not found it will cause serious damage to the plant and occasio considerable delay to production: furthermore, should scrap iron ente the machinery there is always the possibility of it endangering life, an several fatal accidents have been attributed to this cause.

The assistance of officers and crew is requested in reporting an scrap iron they see being loaded, advising shippers into which hold i went and number of the lighter it came from to enable us to tak appropriate action.

(b) Whistle, Radio. Wireless Transmitters, Whistles and Sirens etc must not be used by vessels at anchor off Kuala Rompin.

(c) Stores. Bonded stores can be obtained from Kuala Lumpur an Kuantan at prices roughly same as Singapore. Essential, view Custom formalities, that Masters give Malay States Shipping Ltd., Kuala Rompi 6 days prior notice of requirements.

SHORE LEAVE: No seaman may proceed more than 3 miles fro Kuala Rompin Customs House. The Officer in Charge Customs, a acting Immigration Officer, has authority to limit or prohibit shore leave i all cases.

SABAH (Minor Ports): (See Plan Book)

KUDAT: 06.53 N. 116.51 E.

LAHAD DATU: 05.02 N. 118.20 E.

SEMPORNA: 04.29 N. 118.37 E.

DOCUMENTS: 8 copies all usual documents.

PILOTAGE: Applications normally made by Shipping Agents wit advance notice of 24 hours prior to actual time that Pilot service required. Pilot boats between 30-40 ft. length and equipped wit VHF/AM Sets – 80.4 Mc/s. frequency. Pilot station at Port Office an location for vessel awaiting Pilot is within port limit.

ANCHORAGE: All ports within bays, therefore provide saf anchorages.

RESTRICTIONS: No restrictions for vessels entering port at night.

MAX. SIZE: All ports unlimited, cargo worked at anchor.

HEALTH: To obtain pratique, arrange with Shipping Agent. Pratique fo vessel entering, after calling at another port in same state, is no required. Anchor in quarantine anchorage if vessel is suspect an display following signals: *By Day:* International Code Signal "QQ". *B Night:* A Red light over a White light and a separate hoist of Red ligh over a Green light. Hoisted vertically 6 ft. apart where best seen.

RADIO: Singapore Radio recommended.

BERTHING: Application for berthing has to be made within 24 hour prior to actual time that berthing is required.

Details and Requirements: Name of vessel, gross and net tonnag length overall, draft (fore and aft), ETA at berth, ETD from berth, natur and tonnage of cargo to be discharged/loaded. No priority for berthin ships and the turn is, first come first served.

Kudat: L-shaped wharf with 2 berths. Western berth – length 370 f min. depth 21 ft. Eastern berth – length 300 ft, min. depth 21 ft.

Lahad Datu: L-shaped wharf with 2 berths. Outer berth, length 200 f min. depth 32 ft. Inner berth, length 130 ft. min. depth 30 ft.

Semporna: T-shaped wooden wharf with 2 berths. Outer berth, leng 150 ft. min. depth 26 ft. Inner berth, length 127 ft. min. depth 20 ft.

STEVEDORES: Arrangement of stevedores should be made with 4 hours notice to Shipping Agent. Average load/discharge rate: Gener cargo, 15–20 tons per hatch per hour; cement 20-30 tons per hatch pe hour.

MEDICAL: Arranged on arrival by Shipping Agent.

DENSITY: Average density in the ports 1020.

FRESH WATER: Available at Government General Cargo Wharves at rate of 20 t.p.h.

DEVELOPMENTS: Lahad Datu, having new port installation an wharves facilities.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by stevedores.

CERTIFICATES: Registry, Load Line, Radio, Safety Equipment an Derating Exemption.

CUSTOMS ALLOWANCE: Tobacco, Wine and/or Spirits: no contr and up to discretion of Officers of Customs and Excise.

CARGO GEAR: Ships gear used.

IDENTIFICATION CARDS: Not needed.

CONSULS: At Kota Kinabalu.

REPAIRS: Marine Department operates engineering workshops Labuan and Sandakan. Some private firms also undertake small engi and deck repairs.

DRY DOCKS: No dry docks available in the State. Marine Departme has 3 slipways in Labuan which are capable of shipping vessels of tons, 200 tons and 500 tons displacements. One in Sandakan for vess up to 120 tons.

REPATRIATION: Normally arranged by Agents.
AIRPORT: Most airports in State between 2–5 miles from the town.
TIME: Local time is 8 hours ahead of GMT. No alteration to clocks.
HOLIDAYS: Cargo work can be arranged if necessary during official holidays, but not for Hari Raya Puasa, Chinese New Year and Christmas Day.
POLICE/AMBULANCE/FIRE:

	Fire/Police	*Hospital*
Kudat	333	335
Lahad Datu	81999	81522
Semporna	599	—

SERVICES: No services available for cleaning tanks, but compass adjusting can be arranged with officers of Marine Department, Labaun.
SHORE LEAVE: Allowed.
DELAYS: Due to weather conditions only.
AUTHORITY: Sabah Ports Authority.

SANDAKAN, Sabah: 05.50 N. 118.07 E.
(See Plan Book)

FLAGS: Signal letters, Mail flag (if any mail on board for discharge); "Q" flag is essential if Sandakan is the first Sabah port at which a vessel calls. If ship carrying passengers it should fly immigration signals Nos. 3 and 4; if no passengers Nos. 2 and 5.
PORT LIMITS: The limits of the port of Sandakan shall be Sandakan Bay bounded by a line drawn in a West-South-West direction from the Northern point of Pulau Berhala to the mainland, and by another from the same point on Pulau Berhala to the most Eastern extremity of Tanjong Aru and thence to the opposite bank at the entrance of Trusan Duyong, including all passages and rivers entering the same for a distance of 600 ft. inland from the mouth of the river.
DOCUMENTS: 5 sets of Inward Manifest in the prescribed form to be airmailed to Agent to arrive at least 48 hours before the vessel.
(a) To be Produced on Arrival:
1 Sabah Lights and Harbour Dues form
2 Manifest in the prescribed form
3 Crew List
1 Last Port Clearance
3 Stores List
3 Passenger List
2 Arms List
3 Narcotics List
2 Parcels List
(b) Required by Agent:
2 sets of Inward Manifests for all inward cargo
5 sets of Transhipment Manifests for all cargo to be transhipped at Sandakan.
2 copies of Hatch List.
1 copy of Passenger List.
1 copy of Crew List.
1 copy of List of Arms and Ammunitions.
1 copy Narcotics List.
1 copy Stores List.
(c) To be Supplied to Ship before Departure:
Manifests, as required by vessels.
Captain's copy of Bills of Lading.
Port Clearance and Customs Clearance.
Sabah Lights and Harbour Dues form.
(d) Immigration: Immigration Officer will board vessel on arrival and clear her inward. No restrictions on crew and/or passengers going ashore. Immigration require 2 copies of crew list and 2 copies of passenger list. Vessels cleared inward until 1800 hrs. only. If there are special circumstances arrangements can be made to clear vessels inward after this time.
(e) Marine Department: Shipping Arrival Report to be signed by Master of Vessel.
PILOTAGE: Pilotage not compulsory but if required the Harbour Master acts as Pilot. At least 24 hrs. notice should be given and position where Pilot is required to embark (i.e. the bar buoy or within harbour limits) should be included in the message. Marine Department tel. 3126.
ANCHORAGES: For loading timber: A black and white conical buoy situated 1.2 miles S.W. from Government Wharf indicates the anchorage. It is important that vessels should anchor as close to this buoy as possible, when anchored further from shore it may take up to an hour longer for launches towing rafts of timber to reach ship and in addition there is less shelter from wind and weather and consequently raftsmen have to cease work earlier.

For discharging: Unless it is intended to come alongside the wharf, vessels discharging should anchor 4 cables due South of wharf. Wharf is 750 ft. long with dolphins placed 100 ft. from each end giving a total length of 950 ft. If discharging into lighters and loading log timber simultaneously vessels should proceed to Timber Anchorage.
RESTRICTIONS: *(a)* Shifting: Vessels may not berth alongside after dark without special permission but they may leave the wharf, having given prior notice.

(b) Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset, except at discretion of Harbour Master. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Harbour Master. Livestock: subject to approval of Veterinary Authority. Certain animals, including cattle, are prohibited imports and exports except under licence.
MAX. SIZE: Draft restriction is 25 ft. on the Bar plus the height of tide, mean high water being about 6 ft.
HEALTH: (Also see "Radio" and "Regulations"). If Sandakan is first port of entry into Sabah a vessel must proceed to quarantine anchorage until cleared by Health and Immigration Officials.

The Sabah Government are signatories to the WHO convention on quarantine regulations. If vessel comes from outside State of Sabah then Port Health Authority will require to board in quarantine anchorage before vessel can proceed to wharf or timber anchorage. If, however, vessel is not corning from an infected port pratique may be granted providing vessel cables Agent prior arrival advising last port of call and whether vessel healthy. Pratique normally cabled to ship but if unreceived, vessel must proceed to quarantine anchorage.

Port Health Authority require completed copy of Maritime Declaration of Health, and copies of Crew, Passenger and Narcotics Lists.
RADIO: (Information required before ship's arrival). ETA, number of passengers, health situation, Manifest, amount of water required. Vessels not allowed to use their radio in port.
VHF: Marine signal station keeps watch on VHF Channel 16, from 0530 to 2000 hrs.
TUGS: A tug of 337 b.h.p. stationed at Sandakan.
BERTHING: (Also see "Anchorages").

(a) Mooring: The numbers of a vessel which is berthing alongside will be shown from signal station on Eastern end of Customs House. In addition, a cone indicating tidal stream will be hoisted pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines, a mooring boat will be provided by Marine Department if it is necessary to send lines to dolphins. Government Wharf, least depth 21 ft.

(b) Buoys: No mooring buoys.

(c) Lighters: No lighter fleet. The timber companies have their own lighters and scows which can sometimes be hired if not being used by these companies.

Rectangular Island Wharf: The particulars of the berths are as follows:

Berth No.	*Length (ft.)*	*Depth (ft.)*
1	700	30
2	540	21-31
3	250	20
4	400	21-23

Covered Storage:
(a) One transit shed 90,000 sq.ft. at new port site.
(b) One 8,100 sq.ft. and two 20,000 sq.ft. godowns at the old port site in town.
Equipment: New equipment only listed below:
(a) 5 towing tractors.
(b) 32×6,000 lb. forklifts.
(c) 20×5-ton trailers.
(d) 1×7-ton forklift truck.
STEVEDORES: Stevedoring in hands of Port Authority who supply gangs as required.

(a) Working hours, 0730–1130, 1300–1700 and 1800–2200. Gangs ordered at least 12 hours before a vessel arrives.

(b) Overtime. When working in stream, overtime usually from 1100 to 1200 and 1800 to 2200 hrs. Application for permission to work overtime must be made to Customs not later than 1500 hrs. on the afternoon that overtime is to be worked or 1100 hrs. on Saturday for weekend overtime.

(c) Working Sundays and holidays. Work is normally carried out Sundays and it is sometimes possible to arrange for work on some public holidays, principal exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(d) Rate. Log loading is good, comparing more than favourably with other Borneo ports. Rate of loading about 800 cu. ft. hoppus (20 B/L tons) per gang hour for logs, and 6 B/L tons per gang hour for sawn timber. Discharging general cargo about 20 tons per gang hour. Palletised cargoes about 40 tons per gang hour.
CARGO: (a) Tally: Tally clerks supplied by Agent if required. Sawn timber tallied on to scows by timber companies' clerks and tallied into ship by ship's tally clerks. Ship responsible for total number of pieces of timber shown on Mate's receipts. Letters of Credit do not allow the clause: "A quantity said to be" to be inserted on the B/Lading. Log timber tallied into ship by checking against specifications supplied by timber companies.

(b) Inward Cargo: Is tallied out of ship on to wharf or into lighter. Local watchmen can be supplied by Agent if necesary but it is generally found to be more satisfactory if these duties are carried out by crew. Damaged cargo is surveyed on the spot, otherwise no liability of vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo is delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-handed Memo certified by Chief Officer is usually accepted as proof.

(c) Heavy Lifts: Usually landed overside on flat-top scows for delivery to private jetties, where they are man-handled to required site. Occasionally consignees provide low-loaders.

(d) Transhipment Cargo: After discharge of cargo from first carrier, transhipment cargo placed under supervision to Ports Authority, unless it is possible to arrange direct transhipment into small coastal vessels.

(e) Outward Cargo: Main export is log timber and is towed out to loading vessels in rafts, each one accompanied by 2 raftsmen. Loading is on a single swinging derrick with gun tackle; the other derrick being used for pulling the logs into position in the holds. Vessels should have, if possible, 2 snatch blocks available at each hatch where log timber is being loaded. Sawn timber loaded in normal manner from scows and lighters. Documents required are shipping order issued by Agent and list of specifications supplied by timber companies. Other exports are rubber, copra, coconuts, palm oil, jungle and sea produce.

(f) Refrigerated cargo: Only small quantities of refrigerated cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs regulations. Inward fridge cargo is confined to foodstuffs, meat, etc., and outward to frozen prawns.

(g) Explosives: Explosives must be discharged into lighters under police escort and transported to an approved police store. A licence for

their importation must be obtained from police prior to arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge or as through cargo.

(h) Damaged Cargo: Ship's survey should be carried out at ship's side on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

MEDICAL: *(a)* Hospitals: Duchess of Kent Hospital will receive sick seamen or officers. Three classes of wards, also isolation wing. Hospital equipped to carry out normal surgery.

(b) Inoculation: PHO will vaccinate or inoculate crew members at Duchess of Kent Hospital.

(c) Death on Board: PHO and police to be informed immediately. They will then make an investigation into cause of death. If satisfied that death was due to natural causes, a certificate will be issued, and arrangements may then be made for interning the body. Harbour Master must also be informed in the case of seamen.

TANKERS: Two bulk oil installations at Karimunting (Pavitt Point). Esso, with storage capacity of 2,080 tons and Shell, with storage capacity 15,730 tons.

Jetty extends 550 ft. from shore, is 128 ft. long with mooring dolphins 125 ft. from each end. Min. depth alongside 24 ft.

New oil berth, 1,000 ft. length between dolphins, with central discharging pier. Least depth alongside 30 ft. This berth also used for loading palm oil in bulk.

FRESH WATER: Can normally be supplied from wharf at rate of 20 t.p.h. No water boat. Occasionally water is not available and, at such times, Agent warns Principals in advance.

FUEL: No facilities for supply of fuel oil bunkers. Limited quantities of lubricants can be obtained in drums and bulk diesoline available at Shell jetty.

FIRE PRECAUTIONS: No fire-floats and in case of a vessel alongside, fire brigade should be summoned by dialling 999. The OCPD should be informed also.

WATCHMEN: No regulations regarding use of watchmen, who, however, can be supplied if required. There have been only very isolated reports of pilferage in Sandakan.

CONSULS: At Kota Kinabalu. Contact using Kota Kinabalu numbers.

DRY DOCKS/REPAIRS: No dry docks and very limited repair facilities. Marine Department slipway on Berhala Island is capable of taking ships up to 300 tons. Castings, forgings, welding, etc., can be done at this slipway. Permission to repair main engine of a vessel alongside the wharf should be obtained from the Port Manager, Sabah Ports Authority.

POLICE/AMBULANCE/FIRE: Ambulance: Duchess of Kent Hospital, tel. 2111; Police/Fire: Police Station Emergency, tel. 999.

TELEPHONES: Available.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah), Sdn. Bhd. are Lloyd's Agents, neither Bureau Veritas nor the American Bureau of Shipping are represented.

(b) Fumigation: No facilities.

(c) Ship Chandlers: All kinds of stores and provisions can be supplied at reasonable prices.

(d) Call Signals and Call Flags: (i) Continuous watch kept by signal station during day-light hours. In emergency such as serious injury or fire a ship should hoist appropriate International Code signal and blow whistle or siren to attract attention. Apart from these circumstances and for purposes of navigation vessels are prohibited from using sound signals for any other reason.

(ii) Signals for attracting Public Service Launch: By day: International Code Pendant No. 8. By night: three red lights vertical. Owing distance of anchorage from jetty these signals often indistinguishable by hire launches unless they are cruising in the harbour. Regular launch services can be arranged if required by Master. No restrictions against a vessel using its own launch or motor lifeboat but it must not land anywhere other than at Customs wharf.

(e) Recreation Facilities: Three cinemas in town which show English-language films. Cricket, football, and hockey matches can be arranged with local teams and several tennis courts available. Only suitable swimming beaches at Berhala Island at mouth of harbour. Yacht Club and Golf Club for members only, but several Shipping Companies pay Corporate Membership fee which enables all officers and first-class passengers to use club. Recreation Club offers facilities for large variety of sports and entertainment; visitors must be accompanied by a member. Churches in town for Anglican, Catholic and Lutheran worship.

REGULATIONS: 1. Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than thirty-six hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a customs officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

9. Special signals.

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International Code Signal "2 5"	Two green lights, six ft. apart, hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, six ft. apart, hoisted vertically where best seen.
Quarantine (vessel is Healthy request pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically six ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received pratique)	Nil	A red light over a white light six ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green over a white light, six ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, six ft. apart, hoisted vertically where best seen.

AUTHORITY: Sabah Ports Authority.

SARAWAK COASTAL PORTS

Coastal anchorages at Sibuti, Niah and Suai, 28, 30 and 47 miles S.W. of Miri respectively are being used increasingly for the export of round logs, good holding ground is to be found approximately 3.5 miles offshore in 30 ft. of water. Caution should be observed in the event of sudden wind squalls from the West.

Vessels destined for coastal ports should report to Miri for Customs and Immigration Clearance.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

SEJINGKAT (Sungei Sarawak), Sarawak:

01.35 N. 110.26 E.

Anchorage off Kampong Sejingkat approximately 14 miles from mouth of river and 3 miles below Pending Point. (See "Kuching".)

Main timber loading point for the First Division of Sarawak. Loading used to be seasonal due to log rafts having to be towed from felling areas along coast. Since this is not possible during North-east monsoon season shippers now stockpile during favourable weather and loading continues throughout monsoon period.

Vessels up to 550 ft. length and 25 ft. draft regularly use anchorage. No facilities for obtaining fuel. Fresh water obtainable through Marine Department.

Pilots may be picked up off Tanjong Po in the area marked "Pilots" on Admiralty Chart 1822 or at Sejingkat. In rough weather it may be necessary for a ship to follow or meet the pilot launch at the junction of Embang and Senari leads. Pilots for the Batang Lupar, Triso or Lingga Anchorages are also normally embarked off Tanjong Po by arrangement. The Kuching pilot launch is fitted with "Hague Plan" VHF radio for ship to Pilot communication.

Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during daylight hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the port clearance.

(2) The port clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

SIBU, Sarawak (incl. Binatang and Sarikei): 02.24 N. 111.56 E.

Sibu is the major town in the Third Division of Sarawak. There are 2 inward routes *(a)* via Paloh River and *(b)* via Rajang River. Sibu is 51 miles from the sea via Paloh, and 70 miles via Rajang.

(a) Paloh Entrance: This route to Sibu is almost exclusively used by overseas vessels and the use of a Pilot is recommended, they having knowledge of other ship movements in the river (see "Pilotage").

The Outer Bar limits the draft to 17 ft. during the Landas (N.E. monsoon) or to 20 ft. during the summer months. The depth on the axis of the channel is now 10.5 ft. chart datum. The 2 buoys are fitted with radar reflectors and the Fairway Buoy is visible for a distance of 10 miles. Care should be taken transitting the channel against being set to the Northward by the ebb tide as there is a 7 ft. patch in position 2° 29.2′ N. 111° 10.5′ E. The entrance to the Kuala is marked by a light beacon at Tanjong Sedi on the North bank of the river.

Strong cross currents and swell especially during the N.E. monsoon period (November to March) necessitate caution when entering.

An inner bar with a least depth of 12 ft. exists where the Paloh joins the Seredeng at Tanjong Gelang. This crossing is marked by unlit transits and being sheltered no allowance is necessary for swell.

Vessels can cross the Outer Bar at night then anchor off Tanjong Sedi to await daylight.

(b) Rajang Entrance: Draft for crossing Outer Bar is governed by state of tide with an allowance for swell together with depth of 19 ft. below ACD. Vessels drawing 29.5 ft. have successfully crossed this Bar. However, this draft will only give access to the Deep Water Anchorage at Tanjong Mani and vessels proceeding further up river are restricted as follows:

(i) Deep water anchorage in Rajang River situated at Tanjong Mani. Has a capacity for about 6 large ships (500 ft.) and 4 small ships (300 ft.), it is normally used for loading logs. (See separate information for "Tanjong Mani".)

(ii) From Tanjong Mani inwards there is a Bar situated about 3 miles below Sarikei with a least depth of 13 ft. below ACD thus limiting drafts to 23 ft.

(iii) From Sarikei to Binatang, the next port, the river is winding with some shallow patches with depths of 15 to 18 ft. below ACD.

(iv) Proceeding from Binatang towards Tanjong Pendam and thence to Sibu vessels are limited to 13 ft. draft and 200 ft. length.

(v) Leba'an corner, 15 miles below Sibu is the junction of the 2 routes used by sea-going vessels bound for Sibu. A certain amount of shoaling has taken place here at the approach from the Rajang channel and it has been found necessary to restrict the length of vessels using this route (Rajang) to 200 ft. with a draft of 13 ft. This route is generally used by the smaller overseas vessels trading from Singapore, etc. There is an obstruction off Tanjong Ensurai approximately 6.25 miles up river from Leba'an bend which has a least depth over it of 15 ft. Caution should also be exercised when rounding Tanjong Bindje due to 3 shoals across the river, 1 of which has a least depth over it of 11 ft.

Note: River Igan and Sungei Kut. The River Igan affords access to Sibu from the North. It is approximately 60 miles long and depth over the bar is 4 ft. with an average rise of 5 ft. Ocean-going oil tankers of up to 2,000 tons displacement entering the river from the Sibu end discharge at Sungei Meral Oil Wharf about 3 miles from Sibu.

The largest vessel to use this wharf was the Japanese vessel "Nisso Maru" of 1,566 gross tonnage, 264 ft. overall length with a draft of 16 ft. Larger vessels using this wharf are not envisaged due to the wharf position and structure.

DOCUMENTS: Port Clearance to be surrendered to Customs when boarding.

Crew lists and passenger lists, 2 copies for Immigration Department, 2 copies for Rajang Port Authority, 2 copies for Customs, 1 copy for Port Health Officer.

List of ship's stores (2 copies for customs).

List of ammunition (2 copies for customs).

Health Documents (Vaccination certificates and Cholera Inoculation Certificates to be examined by Health Inspector).

PILOTAGE: *(a)* Kuala Paloh. Pilots usually embarked off Tanjong Sedi, however, if master requires a Pilot to board at Fairway Buoy he should indicate this in his ETA telegram.

Ship Masters wishing to use Paloh channel should state this clearly in their ETA messages.

(b) Rajang River (Tanjong Mani, Sarikei, Binatang and Sibu). Pilots normally embarked, weather permitting in buoyed channel West of Jerijeh lighthouse but it may be necessary for a ship to follow the pilot launch to sheltered water inside turning buoy. This applies mainly to larger ocean ships calling at Tanjong Mani and smaller vessels on a first visit, but a Pilot may be picked up anywhere to suit provided clear and precise information is given in the arrival telegram. A few of the more frequently requested points are off South Jerijeh Beacon, Rajang Village and for upriver berths, Tanjong Mani itself, or even as far up as Tanjong Delima. The Rajang Pilot launch "Alor" is fitted with "Hague Plan" VHF radio for ship to Pilot communication.

Application for Pilots should be made giving 24 hours' notice of arrival to "Shipping", Sibu or to "Shipping", Sarikei, for Sibu and Tanjong Mani ports respectively. Ships proceeding to Sibu and requiring a Pilot should indicate positively in their arrival telegram which channel they wish to use by adding "Paloh" or "Rajang" in the text, bearing in mind the max. length via Rajang is 200 ft.

ANCHORAGES: *(a)* See "Tanjong Mani".

(b) Sibu Anchorage. Some foreign-going vessels load, with Customs permission, at the mid-stream anchorage when Customs wharf is congested.

(c) Restricted Anchorages.

(i) Abeam of Loba Selemit on the true right bank of the Rajang River in position 02° 08′ 22″ N. 111° 16′ 35″ E. for loading and discharging dangerous goods.

(ii) The Anchorage defined by a line running 045° 2.6 cables from position 02° 16.89′ N. 111° 49.28′ E. on Pulo Kerto, thence 135° 8 cables to position 02° 16.5′ N. 111° 50.4′ E. thence 225° 1.9 cables to shore on Pulo Kerto. For loading and discharging dangerous goods other than petroleum.

(iii) The berth alongside the Sungai Merah Wharf in position approximately 2 miles downstream from the junction of the Rajang/Igan River on the true right bank. For loading and discharging petroleum.

MAX. SIZE: Largest vessel to berth Sibu was 7,372 gross tons and overall length 450 ft.

Deepest drafted vessel to berth Sibu was 23 ft. 4 in.

HEALTH: Every vessel arriving in quarantine shall fly or show the appropriate International Quarantine signal; and no person other than a Pilot, Port Officer, Port Health Officer, Immigration Officer or Officer of Customs shall board the vessel; and no person shall disembark therefrom until the vessel has been cleared by the Port Health Officer.

BERTHING: *(a)* Principal wharves at Sibu.

1. Main wharf 1,500 ft. long (incorporating the former Lighterage Wharf) with min. depth alongside 20 ft.
2. Burong Apu wharf 250 ft. long with a least depth of 5 ft. Used for larger coastal craft.
3. Floating landing stages 576 ft. long with least depth of 4 ft. Used for smaller coastal and river craft.
4. Upstream of the public wharves several private wharves are used for timber and general cargo.
5. Sibu-Sungei Merah oil wharf is "T"-shaped with a berthing face of 73 ft. and a least depth alongside of 16 ft. It can accommodate vessels up to 245 ft. long and 16 ft. draft.

(b) Sarikei. Wharf 198 ft.×30 ft., can accommodate vessels up to 2,000 d.w.t. up to 23 ft. draft. There is an old Customs Godown on shore and a new transit shed with total area of 13,600 sq. ft.

(c) Binatang. Wharf 158 ft. long by 20 ft. wide with a least depth alongside of 15 ft. There is a transit shed of 5,300 sq. ft.

STEVEDORES: The Rajang Port Authority provide all labour necessary for loading and discharging at Sibu, Sarikei and Binatang.

REPAIRS: 5 shipbuilding (up to 100 gross tons in size) and repairing yards near Sibu. These deal mainly with repairs to wooden or steel coastal and river craft. 1 yard has a slipway capable of taking vessels up to 500 gross tons.

GENERAL: Small quantities of diesel oil bunkers available, also provisions and fresh water. Principal exports rubber, pepper, timber and sago.

REGULATIONS: The Master of every vessel of over 15 tons about to depart from a port for any place outside Sarawak shall cause the "Blue Peter" (International Code Flag "P") to be hoisted, during day-light hours, for at least 12 hours before the vessel is due to sail, or if the vessel is in port for less than 12 hours, for the period of her stay in the port.

(1) The Master or the Agent of every vessel about to depart from a port shall, on demand by the Port Officer, produce for inspection the Port Clearance.

(2) The Port Clearance shall be in the form of an endorsement on the form of clearance prescribed under the Customs Ordinance or in such other form as may be approved by the Director.

A vessel arriving in, leaving from or shifting berth within a port shall hoist her signal letters, if any, whilst under way.

AUTHORITY: Rajang Port Authority.

TANJONG MANI, Sarawak: 02.09 N. 111.21 E.

Rajang River entrance. The least depth on the bar remains at 19 ft. The entrance is well lit by two lighthouses and one light beacon and the bar is marked by two light buoys.

Tanjong Mani Anchorage. This is a deep water anchorage 16 miles from the river entrance, mainly used by vessels loading timber.

Size of vessels using Tanjong Mani limited only by depth on bar. Ten ships can be safely accommodated at anchorage at any time, roughly six large (500 ft. length) and four small (300-400 ft.). So far no ship has been delayed awaiting a berth though eight or nine ships anchored there at the same time is now a regular feature. Vessels up to 29 ft. 6 ins. draft have crossed the bar.

Pilots are normally embarked, weather permitting, in the buoyed channel West of Jerijeh lighthouse but it may be necessary for a ship to follow the pilot launch to sheltered water inside the turning buoy. This applies mainly to the larger ocean ships calling at Tanjong Mani and smaller vessels on a first visit but a Pilot may be picked up anywhere to suit provided clear and precise information is given in the arrival telegram. The Rajang pilot launch "Alor", is fitted with "Hague Plan" VHF radio for ship to Pilot communication.

Application for Pilots should be made giving 24 hours' notice of arrival to "Shipping", Sarikei.

Restricted Anchorage: Abeam of Loba Selemit on the North bank of the Rajang River in position 2° 08′ 22″ N. 111° 16′ 35″ E. is restricted to loading and discharging any dangerous goods.

AUTHORITY: Director of Marine, Kuching, Sarawak.

TAPIS MARINE TERMINAL: 05.31 N. 105.01 E. (See Plan Book)

SHIPMASTER'S REPORT: March 1979.

PORT LIMITS: Tapis Marine Terminal is an offshore installation situated approximately 240 miles North of Horsburgh Lt. in the South China Sea.

The boundaries of the field are as follows:

05° 10′ N., 105° 30′ E.
05° 30′ N., 104° 34′ E.
05° 46′ N., 104° 48′ E.
05° 46′ N., 105° 14′ E.
05° 20′ N., 105° 39′ E.

The largest scale chart for the area is B.A. 3543.

A waiting area consisting of a circle 12 miles in radius centred on 05° 15′ N., 104° 55′ E., is situated on the Southern side of the field.

A storage tanker "Esso Mercia" moored to an S.P.M. is situated in position 05° 31′ N., 105° 01′ E.

Ships should not navigate within the boundaries of the field as there are many rigs, barges, anchor buoys, etc., causing obstructions.

DOCUMENTS: The following are required:

Last Port Clearance.
4 Crew Lists.
4 Ship Stores Lists.
4 Crew Personal Effects Lists.

The Agent supplies an arrival report for completion after berthing.

PILOTAGE: The Berthing Master boards at a position 4 miles South of the storage tanker. Vessels should approach the pilot area only from the South (from the waiting area).

RESTRICTIONS: Berthing and Unberthing is undertaken in daylight hours only.

HEALTH: A Maritime Declaration of Health was handed to the Agent but whether it was necessary was not ascertained.

RADIO: Messages informing terminal of ETA; Cargo requirement, etc., should be sent through Singapore Radio.

The operator of the terminal is; Esso Production Malaysia Inc., Wisma Bunga Raya, 152 Jalan Ampong, Kuala Lumpur, Malaysia. Cable: EssoProd Kuala Lumpur. Acting for "Petronas" the Malaysian state oil company.

VHF: A VHF watch is kept by the "Esso Mercia" on Channel 16. After contact is made all communications take place on Channel 9.

TUGS: The Mooring Master boards from a tug "Ribut" which then makes fast on the starboard shoulder using tugs lines, to assist with berthing.

BERTHING: Export tankers berth port side alongside the starboard side of the "Esso Mercia", which is fitted with 6 Yokohama type fenders.

Mooring arrangements vary from ship to ship and taking into account the strength of the monsoon. The Mooring Master discusses a suitable arrangement after boarding which is usually 4 headlines, 4 sternlines, 2 forward springs and 2 after springs. After the export tanker's lines are made fast, the storage tanker sends preventer wires across, usually 2 forward and 1 aft.

Hoses: The ship's port derrick should be rigged ready to assist the 2 cranes aboard the "Esso Mercia" to make fast 2×12 in. flexible cargo hoses. These hoses should not be connected to adjacent manifolds. After they are connected they are supported by the cranes and derrick.

Cargo: The maximum loading rate is 33,000 bbls/hr. Tapis Blend has an A.P.I. of 44.1 and is loaded at a temperature of 101°F.

A portable walkie talkie is lent to the export tanker during cargo operations to communicate with the cargo operator aboard the storage tanker.

GENERAL: No repair facilities, consuls, shore leave, fresh water, bunkers, surveyors, or repatriation services are available. Crew members may be flown to the hospital in Kuala Trengganu in emergencies.

TIME: GMT plus 7 hours 30 minutes is kept throughout the year.

AGENTS: The Agents for ships using the terminal are; Radin Shipping Agents Sdn. Bhd., 225 Atas Jalan Sultan Zaimal Abidim, Kuala Trengganu, Trengganu, Malaysia. Cable: Sejenlaut Kuala Trengganu, Telex. MA 51431.

TAWAU, Sabah: 04.14 N. 117.52 E. (See Plan Book)

PORT LIMITS: The Port of Tawau shall comprise the waters of Cowie Bay and Wallace Bay and rivers entering same contained within the following limits:

A line from 4° 13.3′ N. 118° 00.0′ E. to the National boundary mark on the Eastern shore of Sebatik Island, thence to the National boundary mark on the Western shore of the said island, thence in a 270°(T) direction to the shores at Burs Point, thence in a 311°(T) direction to 4° 20.0′ N. 117° 25.9′ E. thence in a 070°(T) direction to 4° 25.0′ N., 117° 40.0′ E., thence in a 120°(T) direction to the point of commencement.

DOCUMENTS:

(a) To be Produced on Arrival:

Customs
2 Manifests in prescribed form.
2 Crew Lists.
1 Last Customs Clearance.
2 Stores Lists.
2 Passenger Lists.
2 Arms Lists.

Marine
1 Marine Dept. Boarding Report, required to be completed.
1 Last Port Clearance.
1 Crew List.
1 Passenger List.

Agent
4 (2 for SPA) Manifests in the prescribed form.
1 Crew List.
1 Passenger List.

Immigration
2 Crew Lists.
2 Passenger Lists.

Travel Control Office
2 each. Crew Lists and Passenger Lists.

(b) To be Supplied to Ship before Departure:
Manifests, as required by vessel.
1 Port Clearance and 1 Customs Clearance.
3 copies of Passenger List.

PILOTAGE: Not compulsory. A Pilot is available from 0600 to 1800 hrs. for berthing vessels given reasonable notice (48 hours). Marine department Tel: 73510.

ANCHORAGES: Good anchorage in 8 fathoms 1,000 yd. to 1,300 yd. W.N.W. of wharf; and 350 yd. South there is an anchorage in 8.5 fathoms.

Petroleum Anchorage. An area bounded by parallels of 04° 15′ N. and 04° 16′ N. and meridians of 117° 51′ E. and 117° 52′ E. This area is to be marked "Petroleum Anchorage".

Explosives Anchorage. An area bounded by parallels of 04° 12′ N. and 04° 13′ N. and meridians of 117° 52′ E. and 117° 53′ E. This area is to be marked "Explosives Anchorage".

Quarantine Anchorage. An area bounded by parallels of 04° 12.5′ N. and 04° 13.5′ N. and meridians of 117° 54′ E. and 117° 55′ E. This area is to be marked "Quarantine Anchorage".

RESTRICTIONS: *(a)* Communication ship/shore when lying on roads: Regular launch services difficult to arrange if required by Master. No recognised signals for summoning a launch, as distance between small boat jetty and anchorage is too great for flag signals to be recognised. No restrictions against a vessel using its own launch or motor life-boat apart from fact that it must not land anywhere other than at Ports Authority Wharf.

(b) Explosives: No vessel carrying explosives shall come within 500 yards of shore or any other vessel except with written permission of Port Manager which will be given provided that:

(i) quantity does not exceed 2,000 lb. of explosives of Class V and VI and are carried in a certified magazine, and there is no other dangerous cargo on board as certified in writing by the Master.
(ii) quantity does not exceed 3,000 lb. and are exclusively of one of the following classes III, IV or VII.

Danger flag must be flown by day and a red light by night.

HEALTH: *(a)* Quarantine. The Sabah Government are signatories to WHO convention on Quarantine regulations. Port Health Doctor will not board, unless vessel comes from an infected port. Instead Maritime Declaration of Health is to be filled out and handed to Boarding Officer of Marine Department, who will require one copy of crew list and one copy of passenger list. Vessels should cable Agent prior arrival advising last port of call and whether vessel healthy.

(b) Immigration. Immigration officer will board vessel on arrival and clear her inwards. No restrictions on crew and/or passengers going ashore. Immigration will require 2 copies of crew list and 2 copies of passenger list. Vessels are cleared inward until 1800 hours only. If there are special circumstances arrangements can be made to clear vessels inward after this time.

RADIO: Information required prior arrival, ETA Tawau with as much prior notice as possible. Number of gangs required. Quantity of fresh water required.

VHF: A Maritime VHF radio telephone service now operates in the Port of Tawau on Hague Plan Channels 16 and 12.

Continuous listening watch is kept on Channel 16 and the station is operative between the hours of 0600 and 2000 daily.

Vessels are requested to make use of the above facility for notifying ETA, pilotage requirements etc. Berth availability will be notified on vessel's call.

TUGS: No tugs available.

BERTHING: *(a)* Wharf Light at Tawau in position on N.W. end of wharf, 04° 14′ 32″ N. 117° 52′ 56″ E.

(b) Tides/Linesmen. The numbers of a vessel which is berthing alongside will be flown from signal station. In addition a cone, indicating tidal stream will be hoisted, pointed end of cone down indicates flood tide and pointed end up indicates ebb tide. Linesmen are on hand to receive a vessel's lines; a motor boat can be hired to assist in berthing if prior advice is given.

(c) New Wharf. Consists of a 220 ft. long approach causeway extending from a reclamation area and a 650 ft. long wharf, 40 ft. wide with a dolphin in line +100 ft. off each end. Least depth 20 ft.

(d) Monsoon. During strong wind from S.E. and S.W. ships are liable to range alongside wharf, and during S.W. monsoon sea breeze may make it difficult for ships to leave wharf in the afternoon.

(e) Buoys: No mooring buoys in Tawau.

(f) Lighters: No lighters available except a few wooden and steel lighters owned by Bombay Burmah Trading Corpn. Ltd. and Borneo Abaca Limited. Hire of these lighters can be arranged when they are not being used by owners, which is seldom.

CARGO-HANDLING FACILITIES: 19 Fork-lift trucks of 6,000 lbs. each; 1 Fork-lift truck of 7 tons; 10 Towing tractors; 45 Trailers.

STEVEDORES: *(a)* Stevedoring in the hands of Sabah Ports Authority who will supply gangs as required.

(b) Working hours 0730–1130 hours, 1300–1700 hours, 1800–2200 hours.

(c) Overtime: Overtime working hours are from 1800 to 2200 hours. Application must be made to Customs one day in advance; double rate charged.

(d) Sundays and holidays: Work normally carried out on Sundays and holidays, the only exception being Chinese New Year. Application must be made to Customs for permission to work Saturday afternoons, Sundays and public holidays.

(e) Rates: General cargo about 17 t.p.h./gang (loading/ discharging). 28 t.p.h./gang for palletised cargoes.

CARGO: *(a)* Special Cargo Regulations: No vessel with dangerous cargo may be alongside after sunset except at discretion of Port

Manager. No dangerous cargo may be discharged simultaneously with general cargo except with permission of Port Manager.

Heavy lifts usually landed overside on to flat-top scows. Customs bonded store is available with about 4,000 sq. ft. of space including Customs Liquor and tobacco store. There are no private bonded warehouses to date. There are no facilities for handling or storing bulk cargoes in any quantity.

Livestock: Subject to approval of Veterinary Authority, certain animals including cattle are prohibited imports and exports except under licence.

(b) Damage. Ship's survey should be carried out on all cargo discharged in a damaged condition and Chief Officer should note extent of damage, and sign, certifying same. Cargo coming alongside in a damaged condition should be noted and M/R claused accordingly. Chief Officers are reminded that it is most unwise to load any copra which is rain or salt water damaged.

(c) Tally: Tally clerks can be supplied by Agent if required, on receiving advance notice.

(d) Inward. Inward cargo is tallied out of ship onto wharf or into lighter. Damaged cargo surveyed on the spot, otherwise no liability of the vessel is acknowledged. Discharge carried out after permission has been obtained from Customs after manifest of inward cargo has been deposited. Cargo delivered to consignees against production of relative Bill of Lading. Ship's responsibility to consignees ceases at ship's side, but, in the case of short-landed cargo, reasonable proof must be given to Customs that cargo has not been landed. A short-landed Memo certified by Chief Officer is usually accepted as proof.

(e) Transhipment. After discharge of cargo from first carrier, transhipment cargo is placed under the supervision of the Customs, unless it is possible to arrange direct transhipment into small coastal vessel.

(f) Outward. When vessels berth alongside, packages are brought by motor transport and lighters; when in roads, by lighters.

(g) Refrigerator. Only small quantities of refrigerator cargo loaded or discharged. No formalities or certificates being required other than compliance with normal Customs regulations. Inward refrigerator cargo is confined to foodstuffs, meat, etc., and outward to frozen fish.

(h) Explosives. Explosives must be discharged into lighters or immediately on arrival onto wharf under police escort and transported to an approved police store. A licence for their importation must be obtained from police prior arrival of cargo, and Harbour and Police authorities must be informed of arrival of explosives in port either for discharge, or as through cargo.

TANKERS: Shell jetty, least depth 14 ft.
Also see "Shipmaster's Report".

MEDICAL: *(a)* Hospitals. Government General Hospital is only hospital in town, and will receive any sick seamen or officers. 3 classes of wards, but first class ward can only accommodate 2 persons. Hospital is equipped to carry out normal surgery.

(b) Inoculation. Port Health Officer will vaccinate or inoculate Crew members at General hospital.

(c) Port Health Officer. General Hospital, General Office 73533, 72191. Medical Officer-in-Charge 71206. M.O.'s Residence 72239.

FRESH WATER: Can only be supplied at wharf. 24 hours notice should be given of a vessel's water requirements. Usual rate of supply is about 15 t.p.h. A water barge is available but no guarantee of availability.

FUEL: Not available except diesoline in drums.

FIRE PRECAUTIONS: No fire floats and in the case of a vessel alongside catching fire, the fire brigade should be summoned by dialling 2999. The OCPD should also be informed.

CONSULS: At Kota Kinabalu.

REPAIRS: No facilities.

POLICE/AMBULANCE/FIRE: *(a)* Police/Fire, Tel. 999; Ambulance/Hospital 73533.

(b) Accidents: Hoist a two-flag signal and give a blast of the whistle to call attention of signal station. Police and the hospital should be informed immediately of any untoward incident.

TELEPHONES: Available.

GENERAL: *(a) Surveyors:* Harrisons & Crosfield (Sabah) Ltd., as Lloyd's sub-Agents, may appoint a Surveyor if a survey is requested.

(b) Fumigation: No facilities.

(c) Ship Chandlers: Fresh vegetables obtainable in limited quantities early every morning from vegetable market.

(d) Priority: Vessels are berthed on a "First come first served" basis. Vessels with palletised cargo get priority.

(e) Watchmen: These can be supplied if required.

DEVELOPMENTS: Larger and more modern facilities are being installed under a multi-million dollar project now being implemented. The new facilities to be sited upstream of the present wharf will provide 3 additional berths each about 500 ft. long and with a depth of 32 ft. at the outer face. A large portal-frame godown will be provided on the wharf deck while ample open storage will be constructed on the foreshore area. Completion expected 1982.

REGULATIONS: *(a)* Arrival and Departure. The Owner or Agent of every vessel other than a small ship intending to call at a port shall, as soon as possible, and in any case not later than 36 hours prior to the estimated time of arrival of the vessel, give notice in writing to the Authority of such arrival and, if so desired, the requirement for a berth at a wharf.

2. The notice under this regulation shall be in a form prescribed by the Authority and shall contain full particulars regarding the cargo to be discharged and loaded, the embarkation and disembarkation of passengers, heavy lifts, special or perishable cargo, hazardous and dangerous goods (whether to be discharged at the port or not), and any other matters of importance relating to the working or safety of the vessel in the port.

3. The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted the national colours and the signal letters, if any, of the vessel. The national colours shall be exhibited from 0800 hrs. to sunset whilst the vessel remains in port.

4. The Master of every vessel arriving from outside the State of Sabah shall exhibit the Immigration and Quarantine signals contained in the First Schedule and shall also at the request of a Customs Officer hoist the Customs signals. Such signals shall remain exhibited until the appropriate officer has given permission for them to be lowered.

5. No vessel shall approach within 600 ft. of any other vessel exhibiting the Immigration, Health or Customs signals.

6. No person other than a Pilot may board or disembark from any vessel until the vessel is cleared inwards and the Immigration, Quarantine and Customs signals have been lowered.

7. Every vessel entering a port shall be anchored or efficiently secured to a wharf or buoy before commencing the loading or discharging of cargo and/or the embarkation or disembarkation of passengers.

8. No vessel shall leave any port unless in possession of a valid Port Clearance issued by or on behalf of the Director of Marine.

(b) Special signals:

Significance	*By Day*	*By Night*
Immigration (for ships not carrying passengers)	International code Signal "2 5"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Immigration (for ships carrying passengers)	International Code Signal "3 4"	Two green lights, 6 ft. apart hoisted vertically where best seen.
Quarantine (vessel is Healthy request pratique)	International Code Signal "Q"	Nil
Quarantine (vessel is suspect)	International Code Signal "Q Q"	A red light over a white light and a separate hoist of red light over a green light and hoisted vertically 6 ft. apart where best seen.
Quarantine (vessel is infected)	International Code Signal "Q L"	
Quarantine (not received pratique)	Nil	A red light over a white light 6 ft. apart hoisted vertically where best seen.
Request Police Assistance	International Code Signal "S T"	A green light over a white light, 6 ft. apart hoisted vertically where best seen.
Request Medical Assistance	International Code Signal "W"	A red light over a green light, 6 ft. apart, hoisted vertically where best seen.

SHIPMASTER'S REPORT: 1976.

Government Oil Wharf:

Position: 04° 15.5′ N. 117° 50′ E. 2 miles N.W. of Main Cargo Pier. Least depth in channel from sea to berth — 30 ft. Vessels to be ballasted to 1/3rd deadweight. Density, 1025. Vessel docks daylight only, undocks anytime at any stage of tide. Anchorage 0.5 mile S.W. of jetty. 5 lengths of ship's hose required. Manifold, 10 in. Length of shoreline 3,000 ft. All products handled. Shore booster pump cannot be used. No steam.

Pilot boards at Quarantine Anchorage. 48 hours notice required. No tugs available. Accommodation ladder required for Quarantine but not at berth.

Fresh water available ex-barge. Other services available. Fresh provisions, repairs, Machine Shop, Airport, Lloyd's Surveyor, Telex, Doctor, Hospital, Laundry, Groceries and Meats. No slop tanks.

AUTHORITY: Port Manager, Sabah Ports Authority.

NOTES

Please also advise Shipping Guides Ltd.

Malta

VALLETTA: 35.54 N. 14.31 E.

DOCUMENTS: On arrival the Master has to fill the pratique deposition, the stores list, the crew declaration, and the crew list (two copies). The forms for the pratique deposition and for the store list are supplied by the Customs Boarding Officer.

Arrival Notice: In accordance with the Port's Regulations Master or Agent of a vessel should give the ETA to the Port Department on a form prescribed by the regulations as early as possible prior to arrival and 48 hours in the case of vessels carrying petroleum or other hazardous cargoes.

PILOTAGE: Pilotage is compulsory for vessels above 500 g.r.t. Pilots boarding vessels at Fairway Buoy, weather permitting. Pilots available round the clock all the year round. In bad weather Pilots board vessels inside entrance, subject to size of vessels, Master's knowledge of the port and Master's willingness to bring vessel up to Bighi Bay.

Pilot boat is equipped with VHF on Channels 12, 14 and 16.

ANCHORAGES: Anchorage in territorial waters and in other harbours is prohibited unless expressly authorised by the Port Department.

RESTRICTIONS: Maximum depth at entrance is 16 m. Dredging works are in hand (November 1980) for channel and berth at Menqa Basin to provide 13.7 m. of water. Nature of bottom in entrance channel, rock and mud. Harbour channels – mud.

Harbour entrance and approaches affected by current. In Northwesterly winds there is a set of up to 0.5 knots from N.W. to N.E.

Port is subject to closure in gregale (N.E. gale) conditions – Winter months occasionally, not more than 4 times a year.

MAX. SIZE: Discharging Berths:

Deep Water Quay – 500 m. long.

Berths No. 1, 2 and 3 have maximum depth of water alongside of 9.75 m. Maximum displacement tonnage of 15,000 tons.

Berth No. 4 has the same depth of water and can take maximum displacement of 25,000 tons.

Laboratory Wharf mainly used for container traffic has a length of 220 m. with a depth of 12 m. Two other small berths adjacent to the main wharf are used for Ro/Ro and direct deliveries.

There are other berths at Coal Wharf for cargoes intended for discharging direct to trucks. There are various berths for various sizes of ships at Bighi Bay, Fish Market, Fuel Wharf and Bridge Wharf.

HEALTH: Port Medical Officer grants pratique after boarding vessels on arrival. Accelerated pratique may be granted through Agent provided crew are all in good health and ship has not called at any infected port during previous 15 days and is coming from a European port.

RADIO: Radio call sign 9HD. Radio telephone working frequency 2625 kHz. Listening watch 2182 kHz.

RADAR/VHF: No radar service available. VHF available at Port Signal Station. Operating on VHF Channels 11, 12, 14 and 16.

TUGS: Meet vessels just inside harbour entrance. Lines given at discretion of ship's Master under advice from Pilot.

BERTHING: Berthing conference held at the Port Department daily at 1100 hrs. between Monday and Saturday when berths are allocated for expected ships. No specific requirements necessary. Once berth has been allocated by Port Department vessels can berth at any time at the allocated berth (container and Ro/Ro berths are available).

EQUIPMENT: One gantry crane maximum lifting capacity 35 tons. One mobile crane maximum lifting capacity 250 tons. Two mobile cranes with maximum lifting capacity of 75 tons. Various other mobile cranes. Fork lift trucks 2×40 tons. Various other smaller fork lift trucks and other cargo handling equipment.

STEVEDORES: Ship Agents of liner vessels normally act as stevedores. Port workers for stevedoring are ordered by Shipping Agents and labour is allocated from a pool operated by the Manager of port workers.

MEDICAL: Notice must be given to Agents as early as possible. Hospital facilities available. Crew must be in possession of inoculation/vaccination certificates.

TANKERS: Vessels must be gas-free except for the tank cleaning berth. Facilities for discharging slop or residue are available.

N.B. Vessels not gas-free are not allowed to enter port between sunset and sunrise.

FRESH WATER: Limited amount ex-barge subject to permission from Water Authority. Notice, as long as possible required.

FUEL: Sea Malta Co. Ltd. Grades handled include gas oil, fuel oil, thin fuel oil 30 CST up to 380 CST.

FIRE PRECAUTIONS: Precautions as laid down in Ports Regulations for cargo ships and as in Petroleum Ships Regulations for tankers. Civil tugs partly equipped with fire fighting equipment.

GANGWAY/DECK WATCHMEN: Gangway recommended. Deck compulsory.

OPENING/CLOSING HATCHES: By ship's crew or shore labour.

CERTIFICATES: Ship's Register; Load Line Certificate; Derat Certificate; Factory Act Book.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, plus one bottle spirits (officers only).

CARGO GEAR: Certificates of cargo handling gear have to be valid before cargo work can commence. Factory Act Book to be endorsed quadrienially and annually.

CONSULS:

Vice Consuls in Malta for following countries:

Austria	29182	Spain	28180

IDENTIFICATION CARDS: A personal identification card not required. Passports or seamen's books will suffice.

REPAIRS: Malta Drydocks has the capability to carry out normal and specialised engine, hull and machinery repairs such as:

Engine, (diesel, steam, turbine)
Auxiliaries (turbine and diesel)
Turbine re-blading
Propeller servicing, repairs including re-tipping (tips cast in yard) and balancing
Dynamic balancing of rotors
Boiler and heat exchanger chemical cleaning
Rudder and tailshaft alignment and repairs
Gritblasting (internal/external) to all standards
Hull cleaning by high pressure water jet
Refrigeration system repairs
Replacement of lignum vitae stern tube bearings
Installation of Deutsche Werft Simplex stern tube sealings
Internal/external cathodic protection
Combustion control system repairs
Re-tubing of boilers, brickwork and lagging
Renewal of heating coils, cargo and stripping lines
Hull repairs (welded and rivetted)
Jumboizing.

Travelling Repair Parties:

Malta Drydocks Travelling Repair Parties are available to carry out repairs at sea both as an emergency repair, or as a means of reducing lay-up time during normal voyage repairs or classification surveys.

It is possible to shorten the time of refits by employing a travelling repair party to commence work before entering or complete after leaving the Drydocks, non-critical items being completed on passage.

Malta allows the maximum use to be made of Travelling Repair Parties, situated as it is in the centre of the Mediterranean, midway between Gibraltar and Port Said. It is ideally placed on the shipping lanes between the East and West and connected by daily air services to Europe and North Africa.

Malta Drydocks Travelling Repair Parties are equipped to carry out the following work:

1. Repairs to main and auxiliary boilers, including re-tubing, renewal of brickwork and insulation and fitting of new furnaces in Scotch type boilers.
2. Overhauling and repairing deck and engine room auxiliary steam and diesel plant, cargo systems and valves.
3. Repairs or replacement of cargo tank heating and stripping line systems, in cast iron, steel or aluminium/brass.
4. "Metalock" cold repairs to castings by trained specialists.
5. Gas or electric welding to Classification Society requirements for steelwork repairs and reinforcements.
6. Repair or renewal of electrical wires and cables.
7. Overhaul or installation of any electrical machinery.
8. Repair or installation of all navigational aids, i.e., radar, radio, auto-pilots, gyros by qualified personnel.

Any enquiry will receive immediate attention by radio, telex or telephone.

DRY DOCKS: Malta Drydocks.

Docking Facilities:

Dock Number	*Length (m.)*	*Inside Beam (m.)*	*Depth (m.)*	*Cranes (Capacity-tons)*	*Other Facilities**

Capacity of No. 6 Dock 300,000 d.w.t.

SERVICES: Tank cleaning and underwater hull cleaning undertaken by Malta Drydocks.

Ricasoli Tanker Cleaning Installation:

The tanker cleaning installation at Ricasoli accepts cleaning for drydocking, repairs and survey for upgrading tankers.

The jetty area consists of a 100 m. jetty, situated immediately inside the Grand Harbour, and capable of berthing tankers up to 100,000 d.w.t. at a maximum draft of 8.5 m. in 10 m. of water.

Tankers are assured of immediate attention on arrival from a trained crew of tank-cleaning personnel. Work is continuous 24 hours per day from the time of arrival of the vessel, together with a 24-hour security watch.

1. Washing: The installation supplies hot wash water at a temperature of 60°C and a pressure of 14kg. per sq.cm. to operate four washing machines simultaneously, with a delivery rate of 30 – 34 t.p.h. The discharge of slops and/or ballast is at a maximum of 1,200 t.p.h. Chemical cleaning is also undertaken and Malta Drydocks holds stocks of well-known chemicals.
2. Gas-freeing: The installation operates 3 compressors and 6 Meco ventilators, together with trunking, are available for gas-freeing.
3. Steam Supply: This is available at the jetty when required. All associated tank-cleaning equipment is available for ship's use.

Full fire-fighting facilities are available at the jetty.

The installation also makes distilled water for sale to ships and a separate line is available at the jetty for the discharge of this product.

The reception and treatment area incorporates reception tanks, treatment tanks and an observation tank with separating baffles and oil sump. In addition there is an oil storage tank and a distilled water storage tank.

The boiler house accommodates 3 Scotch boilers with all associated auxiliary equipment. The steam supply is extensively used in the plant area for heating and treatment purposes. An evaporator-distiller is incorporated in the Boiler House for the production of distilled water.

The whole area has been designed to be perfectly safe and is to the standards laid down by the Institute of Petroleum Safety Codes for Installations storing Class A Petroleum. Strict safety regulations are applicable to the whole plant and the tank-cleaning crew has been thoroughly trained in these matters.

SURVEYORS: Lloyds Register of Shipping; The London Salvage Association; American Bureau; US Salvage Association; Det Norske Veritas; Registro Navale Italiano; Bureau Veritas; Germanischer Lloyd; Hellenic Register of Shipping; Nippon Kaiji Kyokai.

REPATRIATION: Facilities exist for crew changes and repatriation by air.

AIRPORT: 4 miles from port, Served by Air Malta and other airlines. Daily flights to London and Rome. Also other flights to other countries.

TIME: GMT plus 1 hour in Winter. Summer time kept from April till September.

HOLIDAYS: New Year (1st January – no work); St. Paul's Shipwreck (10th February); St. Joseph's Day (19th March); Good Friday (no work performed at all on this holiday and in the afternoon of Tuesday Carnival); St. Joseph the Worker (1st May); Ascension Day (date changes); St. Peter and St. Paul (29th June); Assumption of B.V. Mary (15th August); National Day (8th September); All Saints' Day (1st November); Immaculate Conception (8th December); 13th December (Republic Day); Christmas Day (25th December); (no work performed at all).

POLICE/AMBULANCE/FIRE: Police 26934; Ambulance 21251; Shore Fire Brigade 24001.

TELEPHONES: Can be arranged at the Drydock berths, and on buoys.

GENERAL: Important that tankers are gas-free before entering, and that vessels do not carry explosives.

AUTHORITY: Director of Ports, Valletta.

AGENT: Kirton & Co. Ltd., 18/19 Floor 3, Europa Centre, Floriana, Malta. Telegraphic address: 'Kirton Malta'. Tel. 624360. After hours 20599. Telex. MW 241. Sole and exclusive Agents for Lambert Brothers Ship Agencies Ltd.

NOTES

Please also advise Shipping Guides Ltd.

Marianas Islands

GUAM (Apra Harbour): 13.26 N. 144.39 E.

(See Plan Book)

DOCUMENTS: Guam is part of the American Trust Territories in the Western Pacific and official documentation is as for mainland U.S. ports, including visaed crewlist completed at port of departure prior to Guam. Vessels should have a stock of American Crew Lists Form I-148 and Form I-95A. The American Alien Crewman Landing permit is acceptable and preferred. This is the plastic identification card previously issued on the U.S. coast.

Required on arrival:
Vaccination Cards.
Visaed Immigration Crew List.
4 Crew Lists.
4 Passenger Lists.
1 Store List.
Clearance from last port.
Cargo papers.

Have ready Immigration Form I-94 for each passenger and Form 1-95 for each alien unless they have I-184 plastic Identification Card. Shore Passes not required. Crew Customs Declaration not required.

PILOTAGE: It is advisable to have on board U.S. charts for Guam: C & GS 4197 Apra Harbour. 4196 Guam Approaches.

Pilot available 24 hours a day. Weather permitting, Pilot will board outside breakwater upon Master's request.

ANCHORAGE: Harbour – range 084° True, 2 green lights. Strong set across harbour entrance, Navy recommends 10 knots entering. Quarantine Anchorage at Middle ground, Outer Harbour, depth 45 ft.

RESTRICTIONS: The Harbour Master of the Port Authority of Guam, is in complete control of the approaches to Guam and it is essential to obtain clearance and permission to enter Guam from "Harbour Master" Port Authority, call sign KUF–810 at least 24 hours prior to arrival. Permission is readily granted with the condition to request permission again two hours prior to arrival at Guam. This time from Guam controls, call sign KUF–810 and NRV (USCG).

MAX. SIZE: Max. LOA 230 m. (Berths "F4", "F5" and "F6"). Depth alongside Berth "F5" – 10.97 m. at HW.

Berth "F3". Max. LOA 182.80 m. Depth 9.75 m. at HW.

Max. beam for container vessels is 33.55 m.

HEALTH: If from suspect port, Inspector boards at anchorage or at pier for thorough check. Grants Pratique.

RADIO: Harbour Master Radio Station, call sign KUF–810 ship/shore watching 24 hours. Use of USCG Station "NRV" for best service if unable to reach KUF–810 due to limitation of range.

Notice to Ship's Agents: (20th August, 1980)

The Harbour Master's Control Tower is presently operating on a 24 hour basis. The following VHF frequencies are guarded and monitored:

156.8 mHz – Channel 16
156.6 mHz – Channel 12
156.65 mHz – Channel 13

In addition, Control Tower personnel will be monitoring S.S.B. with the following procedure:

2182.0 kHz continually.

4143.6 kHz – (4B). Every hour on the half hour for a period of five minutes.

8291.1 kHz – (8A). Every hour at 35 minutes after the hour for a period of five minutes.

12432.3 kHz – (12B). Every hour at 40 minutes past the hour for a period of five minutes.

The Port Authority solicits your co-operation in the matter of keeping the Harbour Master advised of all arrivals, departures, and other pertinent information whereby we may best serve the maritime industry.

VHF: Masters of vessels approaching should keep watch on Channels 16 and 13.

TUGS: 3 tugs (1,200 h.p.) available throughout 24 hours. Tugs can be contacted direct on VHF Channel 16, 13 and 19.

BERTHING: Vessels may berth Port or Starboard side upon request of the Master or Agent at F–3, 4, 5 except F–6 Portside to, 1 large tug and 1 small tug normally used. Ship's gangway is required. Local information from Pilots states that after completion of this oil berth, a submerged wreck was discovered, said to be a 500 ft. long cargo vessel, and lies across and below the vessel in this berth, on the Eastern side of the jetty. It is advisable not to drop anchors – should they have to be used – until vessel has passed over the wreck. There have been instances of forward springs or breastlines becoming fouled in this wreck during operations.

TANKERS: *Mobil Pier:* Berth "G". Depth alongside 39 ft.

Gorco Berth: Berth "F1". Depth alongside 55 ft. Ship to pier hoses – 10 in. Crude shore line 24 in. (7 miles to tanks). Diesel/general line 16 in.

CRANES: 1 (P&H) × 250 ton, 1 (Manitowoc) × 140 ton, 1 (P&H) × 40 ton and 1 × 35 ton.

2 Paceco rail mounted container gantry cranes for handling 20 ft., 27 ft. or 40 ft. containers. 30 fork lifts, capacity 3–20 tons, including a Hystainer with special spreader for handling containers.

IMMIGRATION:

1. *Prior to Departure for Guam:*
   - A. Visaed Crew List: Prepare 1 Crew List on U.S. Form I-418 and have it visaed by a U.S. Consulate at a port prior to Guam. Without this, crew shore leave may be denied.
   - B. Passengers must have a valid passport and also must have an appropriate U.S. Visa whether landing or not on Guam.
   - C. Intransit passengers do not need U.S. visa if the Owners of the vessel have signed a contract called "Immediate and Continuous Transit Agreement" with the Commissioner of Immigration at Washington, D.C.
2. *Prior to Arrival at Guam:*
   - A. Passenger List, Form I-418 prepare 3 copies of Passenger List on U.S. Form I-418 (for Immigration, Customs and Agent).
   - B. Passenger Landing Card: Form I-94. Prepare or have on hand, one U.S. Form I-95A for each alien Crew member. Not required if Crew member is a permanent resident with U.S. I-184 laminated "Crewman's Landing Card". Not required of U.S.A. Citizens. Please present form I-95A in appropriate Seaman's passport or identification book. Form I-95A can be used repeatedly for future arrivals of same crewman on same ship at any United States Port.
3. *Upon Arrival at Guam:*
   - A. U.S. Federal Immigration Inspector boards upon arrival at pier, must see all passengers with their passport and Form I-94 and all crew members with their passport or identification books and Form I-94A or Form I-184.
   - B. Passengers and crew are required to be ready for inspection immediately upon docking at Guam.
   - C. No shore leave and no visitors or stevedores may board until this Immigration inspection is complete. The Inspector will advise Master when he has completed his inspection of passengers and of crew.
4. *Prior to Departure from Guam:*
   - A. Intransit Passengers: Pick up from intransit passengers the Form I-94 and hand to Agent before departing from Guam. These must be returned by Agent to U.S. Immigration as passenger departure records.
   - B. Alien crew member joining at Guam: Pick up from them the Form I-94 which they used to enter the U.S.A. These must be returned to U.S. Immigration by Agent as permanent records.

SECURITY: Guam Government Official usually boards at pier, examines vaccination cards (smallpox vaccination required) and inspects Steward's stores and slop chest. Also represents U.S. Customs. Requires 1 Crew List, 1 Passenger List, 1 Store List, Clearance from last port, later issues new clearance from Guam which Agents bring to ship. Normally does not seal stores or slop chest.

MARINE GUARD: Required when docked at Ammunition Pier, requires 1 Crew List.

U.S. COAST GUARD: Marine Inspection and Shipping Commissioner Services. Requires 1 Crew List. Checks official log book and arrival draft.

FUEL: Marine Diesel Oil available by truck at any pier and by pipe-line at Berth "F3". Black Oil available by pipe-line at Berth "F6". Both products also available by pipe-line at Berth "F1" (GORCO Pier) and the Mobil Pier. The distribution companies are Exxon, GORCO, Mobil and Petroco. Infrequent fuel delivery restriction occurs when ammunition vessel working. ADO and MDO available from barge at the anchorage.

FRESH WATER: Very good, available any quantity, meter service. Water barge available at all times.

STORES: Available but considered expensive. Produce from U.S.A.; Meats from U.S.A. and N.Z.; Milk is recombined in quart cartons, White, Chocolate or Buttermilk. Order milk day prior to delivery; Tropical fruits seldom available; Ice in blocks or cubes. Prices wholesale, except under 1 case lots when at retail. Delivered to ship's gangway or hook.

LAUNDRY: Also dry-cleaning available 3 days service at U.S.A. prices. 1-day service extra. Delivered to ship's gangway or hook.

MEDICAL: Foreign ships use Guam Memorial Hospital or Catholic Medical Centre or other clinics in town. American ships use U.S. Naval Dispensary in Harbour area, or in emergency U.S. Naval Hospital near Agana, 10 miles distant. Certificates required signed by Master. Patient returns to vessel by taxi at vessel's expense. Dispensary Hours for merchant seamen Monday to Friday 0800-1200 and 1300-1600 hrs. At other times, if emergency, use the U.S. Navy Hospital. Doctors will not normally visit ships.

Dentists: Private dentists only. Usual hours 0900-1700, Saturday to 1200 hrs.

REPAIRS: Commercial Yard, Dillingham Maritime Services Yard available. Navy Yard, repairs by U.S. Naval Ship Repair Facility (SRF), subject to prior Navy commitments, and requires cash deposit in advance. Payment to be made for work done successfully or not. "No Cure No Pay" does not apply.

TIME: G.M.T. plus 10 hours. When on Daylight Saving Time, G.M.T. plus 11 hours.

POLICE/FIRE/AMBULANCE: Ambulance U.S. Naval Dispensary, Harbour Area, 339-4224/4227; Fire, 22222; Police – Naval Station Security, Harbour Area, 333-2988; Police – Guam Civilian Police, Agana 777-9811

AUTHORITY: Harbour Master, Port Authority of Guam.

Martinique

FORT DE FRANCE: 14.36 N. 61.04 W.

(See Plan Book)

PORT LIMITS: The straight lines joining Pointe des Negres, the South extremity of Fort St. Louis and Pointe d'Alet.

DOCUMENTS:

Maritime Declaration of Health.
4 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
5 Lists of Passengers Disembarking.
2 Lists of Crew Personal Effects.
2 Vessel's Particulars Declarations.
2 Cargo Manifests.

Tankers Only: Certificate of Insurance against Oil Pollution.

PILOTAGE: Call Pilot by International Code flag "G" or by sounding "G" on whistle. Pilot launches are painted black. The Pilot joins vessel on arrival at Pointe des Negres. If Pilot not available, vessel must anchor in the Baie des Flamands East of Point des Negres to await Pilot.

ANCHORAGE: In Baie des Flamands in front of the town. Depths of 10—14 m.

MAX. SIZE: Length: 180 m. for vessels with one right hand propeller and without bow-thruster. 250 m. if vessel has two propellers and bow-thruster. Draft: 10 m. See also "Tankers".

Quay	*Max. Draft*
Quai Quest	7.50 m.
Quai Ouest Tableau	6.00 m.
Quai des Grands Cargos	7.50 m.
Darse	7.00 m.
Annexes	8.50 m. Aft. 8.00 m. Forward
Tableau Tourelles	9.00 m.
Tourelles	10.00 m.
Hydrobase	10.00 m.
Batellerie	5.50 m.
Appontement des Carrieres	15.00 m.
Quai Conteneurs	10.0 m.

HEALTH: Request free pratique by radio or can be obtained on arrival when Master completes Health Declaration and presents Health Certificates.

RADIO: Fort de France Radio, call sign FFP. ETA message to Agent required 24 hours before arrival on working days or 48 hours on holidays. Message to include number of crew on board, flag, ship's name, tonnage, length, beam, max. draft on arrival, date and time of arrival.

VHF: Port Authority on Channel16.

RADAR: None.

TUGS: None available.

BERTHING: Alongside quay. Max. depth according to berth. Tidal range 0.4 m. maximum. Load/discharge by ship's own gear. Cement handled at Petroleum Pier.

Container Quay: Length 248 m., depth 11.0 m. 2 gantries will be available May 1980.

CRANES: None available.

MEDICAL: Doctor and hospital facilities available.

TANKERS: *Petrol Pier:* Depth alongside 17 m., can accommodate tankers up to 65,000 d.w.t. Crude discharge through 2×12 in. Chicksan Arms, capacity 4,500 t.p.h.

DENSITY: About 1028.

FRESH WATER: Available from quay in unlimited quantity except during dry season. Rate 50-80 t.p.h.

FUEL: All grades available subject to 12 hours advance notice.

GANGWAY/DECK WATCHMEN: Recommended. Performed by Crew members.

OPENING/CLOSING HATCHES: Can be performed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes per man. All alcohol to be declared.

IDENTIFICATION CARDS: Seaman's Book.

CONSULS:

Belgium
Colombia
Cuba
Denmark
Germany
Haiti
Italy
Netherlands
Norway
Panama
Portugal
Spain
Sweden
U.S.A.
Venezuela

REPAIRS: Minor repairs possible.

DRY DOCK: 1×200 m. length, 21 m. wide. Equipment restricted.

REPATRIATION: Facilities for crew change and repatriation.

AIRPORT: 7 miles from the port, served by regular airlines.

HOLIDAYS: 1st January, Shrove Tuesday, Ash Wednesday, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 25th December.

POLICE/FIRE/AMBULANCE: Police, tel.: 17 or 71 00 24; Ambulance, tel. 17 or 71 59 48 – 72 04 20. Fire, tel: 18 or 71 22 64.

SURVEYORS: *Lloyds:* Porry Paul, Immeuble Transat, Route du Lamentin. Tel: 71 93 45.

Veritas: Rue Victor Hugo N° 17 – Tel: 71 30 78.

TIME: GMT minus 4 hours.

TELEPHONES: None.

SERVICES: No tank cleaning equipment, tank-washing, nor compass adjusting.

SHORE LEAVE: Permitted.

AUTHORITY: Capitainerie du Port.

NOTES

Please also advise Shipping Guides Ltd.

Mauritania

NOUADHIBOU: (Port Etienne):

POINT CENTRAL: 20.49 N. 17.03 W.

PILOTAGE: Compulsory for vessels calling at Point Central.

An outer pilot station is situated in the vicinity of No. 2 Buoy, bearing 037° distance 4.4 miles from Fairway Buoy No. 0 (Lat: 20° 40′ N., Long: 17° 04′ 30″ W.). Also see "Shipmaster's Report (1977)".

The inner pilot station is 1 mile from the mineral wharf bearing East.

DOCUMENTS:

3 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
2 Passenger Lists (even if "NIL").
2 Ports of Call Lists of the last 30 days.
1 Health Declaration.
1 Vaccination List.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag (must be flown day and night) is hoisted and check very closely the concordance between the Ship's Articles, the Seamen Books and the Crew List.

If any difference is found between these three documents a fine may be given to the ship.

Immigration/Police: Crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to Agent on arrival.

Money: On principle, the foreign money is not allowed in Mauritania, but Agent may change money into local currency.

No Mauritanian money (Ouguiya) may be kept on board and if the crew have not spent their local money they have to give it back to the Agency (10 Ouguiya about 1 French Franc).

ANCHORAGE: Ships waiting can anchor N.E. of No. 2 Buoy, distance 1 mile in 20 m. of water, good holding ground. Another anchorage on the roadstead, the wharf bearing N.W./N.N.W. distance 1 mile can be used by ships prior to berthing.

RESTRICTIONS: Minimum depth of water below chart datum is 17 m. in the buoyed channels and swinging area. Outer channel width is 400 m. but it varies from 250 to 400 m. for the inner channel; the radius of the swinging circle being 500 m.

MAX. SIZE: Not to exceed 310 m. in length and 47 m. in breadth, the extreme reach of the shiploader arm being 28.5 m. from ship's side. At the limit an extreme breadth of 48 m. could be accepted after advice from the DCFP. If possible drawing should be sent prior to acceptance for vessels of more than 100,000 d.w.t.

The recommended draft for large vessels in ballast, or partially loaded is 12 m. on arrival. Smaller ships should have on board a quantity of ballast equal to half their cargo capacity.

Maximum freeboard under shiploader arm is 14 m. With hatch covers opening crosswise (abreast) the maximum freeboard must be understood as the height from sea level to the upper part of hatch covers.

On departure a draft of 16.15 m. is usually admitted.

Essential: All vessels greater than 100,000 d.w.t., which have never visited the port before must have prior approval of the DCFP.

HEALTH: Free pratique is usually granted after vessel has berthed. Smallpox and yellow fever vaccination certificates required.

TUGS: None available.

BERTHING:

Mineral Wharf: The ore loading terminal of "Societe Nationale Industrielle & Miniere" de Mauritanie (SNIM) is located at mid distance between the Cap Blanc and Nouadhibou, geographical position: Lat: 20° 49′ N., Long: 17° 02′ W. It consists of a platform, 20 m. wide oriented North and South, resting on 8 big dolphins, 13 m. in diameter each and 32 m. distant one from the other. The platform supports a conveyor belt and one single shiploader. The maximum travel of the shiploader from one end of the rails (railway) to the other is 165 m.; the virtual loading capacity would be 5,000 t.p.h. while the actual output varies from 2,000 to 4,000 t.p.h. according to ship's size and on condition there is only one quality and grade of ore to load.

To maintain a depth below LLWT (lowest low water astronomical tides) of 16 m. at the berth, ships are laid against 2 big outrigger pontoons leaning on the dolphins and protected on the ships side by heavy but efficient rubber rollers acting as shock-absorbers.

Ships are generally made fast port side to the quay, coming alongside with the help of the anchors which should be kept at the ready.

TANKERS: *Oil Wharf:* It consists of a light platform placed on top of 3 dolphins of the same diameter as above but 64 m. apart, adjoining the mineral wharf to the Southward. A wooden decking supports the oil pipes which are connected abreast of dolphin No. 10 to the tanker lying portside to the quay, the stern is made fast to a mooring buoy.

DENSITY: Point Central 1026–1027.

FRESH WATER: Not available.

FUEL: Not available at the moment. An oil refinery has been built which will eventually supply fuel.

MEDICAL: There are hospital and medical facilities at the port.

CUSTOMS: Regulations are very strict, and a careful declaration of all bonded stores must be made before berthing. Ships have been fined for quantities in excess or missing even when small.

GENERAL: (a) Radiotelegrams stating the date and ETA at pilot station and addressed to Snim-Cominor Nouadhibou should be transmitted 72 and 24 hours beforehand via Nouadhibou coast radio station (5 TA) working hours 0800 – 1800 or Dakar (6 VA) hours: continuous.

Shipmaster's Report 1977: Telegrams to Agents through Dakar Radio 6 VA only.

(b) It is of interest to Pilots when coming on board, to know whether the ship is powered by a steam-turbine or diesel engine whether the propeller is left or righthand and if it is a variable pitch propeller, how she behaves when the engine is running astern.

GANGWAY/DECK WATCHMEN: Recommended as stowaways try to board at night.

SHIPMASTER'S REPORT: (1975), Vessel 169,000 d.w.t.

Iron Ore Marine Loading Terminal:—

Approach to Cap Blanc and Baie du Levrier: Approach was from the Southward. From Dakar the course was laid to cross the 100 fathom line at 20° 04′ N. 17° 41′ W., this being a precipitous shelf, when crossed with D.F. bearings from the Radio Beacon at Port Etienne gave a reasonable fix. Vessel then steamed across the main flow of North/South traffic at quite a broad angle heading for the landfall buoy 6 miles West by South of Cap Blanc. A dense concentration of fishing vessels extending Westwards from Banc Vilmorin offered little hindrance to our landfall. The light of Cap Blanc lighthouse was visually observed in the pre-dawn darkness at 26 miles and radar contact of Cap Blanc was established at 23 miles. The landfall buoy fitted with a radar reflector, gave radar contact at 15 miles.

Pilotage: A Pilot boards in the vicinity of No. 2 Fairway Buoy from a black-hulled, white superstructure, 40 ft. high-speed motor launch with "Pilote" written on the side. VHF contact is made on Channel 16, working frequency Channel 14. Call "Nouadhibou Pilot". The Pilot, a Frenchman, had a good understanding of English and proved to be very competent. The transit inwards and through the Passe du Levrier was at half speed but the last mile towards the berth only an occasional Dead Slow ahead movement was made to maintain steerage way.

Tide/Currents: Berthing for large vessels is on the ebb tide with a Southerly set of about 1 knot. South of the headland the set is to the Eastwards again about 1 knot i.e. directly across the channel. Unberthing is made on the flood tide setting Northerly along the jetty again about 1 knot. Rise and fall is in the region of 1.6 m.

Wind: Ranges from North by West to North by East (May). During darkness it abated to about Force 3 but from early morning through to sunset gusted up to Force 6 causing a short steep sea to run. The Pilot stated that in August and September Easterly winds often occurred hence the placing of 2 mooring buoys about 1 cable off the berth to assist vessels warping clear when leaving.

Tugs: None available.

Quay: Stout cylindrical rubber fenders are chained to the sides of 2 floating pontoons laying to the quay face. An adequate number of bollards are placed along the length of the quay. 3 dolphins, connected by a catwalk, extend the Southern length of the quayside for ship mooring purposes.

Moorings: When approaching and lying off the jetty 2 motorized mooring boats will run ashore 1 synthetic fibre rope (no wire ropes at this stage) from forward and 1 similar rope from the Poop. Vessel is then to warp alongside with these 2 lines aided by helm and small engine movements. Once alongside a spring from the after extremity of the Poop is to be sent away and a forward spring. Vessel secured to the berth with 1 headline to a mooring buoy North of the jetty, 3 forward breast lines, 1 forward spring, 2 stern lines, 2 after breast lines 1 spring from the Poop, and 1 spring from the normal position on the after deck.

Gangway: The accommodation ladder could not be used because of the space between the pontoons lying between ship's side and the quay. A pilot ladder was the means of access to the after pontoon from which access could be obtained to the quay.

Depths alongside: At the first low water soundings were taken around the ship and when reduced to chart datum — obtained from a monthly tide table loaned by the Pilot – a least depth of 16.2 m. was found on the inboard side with depths generally about 18/19 m. elsewhere.

Draft: Maximum permitted for berthing 12 m. Maximum permitted draft for sailing is 16.16 m. (53 ft.) at any state of the tide.

Airdraft: Maximum 14.5 m. In our case several thousand tonnes of hold ballast had to be taken once secure alongside, this delayed loading for 5 hours.

Shiploader: This is a single conveyor belt fed gantry having a range of travel of 165 m. along the quay but the loading arm has no facility to slew horizontally. It can only be luffed in the vertical plane. The maximum outreach was stated to be 23 m. which combined with the airdraft limitation of 14.5 m. made it extremely difficult to plumb the centre of the holds. For the majority of our loading period the ship had a port list (this was exaggerated by the free surface effect of the 4 ballasted holds). To keep the loading arm from fouling the ship's structure and assisting the arm to plumb centre all the port side side-rolling hatch lids were only partially opened.

Shifting: This had to be done on 2 occasions but was successfully achieved by hauling on the 2 spring wires aft and 1 headline to warp a distance of 6 m. forward and heaving on the forward spring and stern lines to warp 26 m. aft. The shifting was necessitated by the fact that the distance centre to centre of our extreme loading hatches was 191 m.

Agency: This was conducted by SNIM, Societe Nationale Industrielle & Miniers, their telegraphic address is "Snimport – Nouadhibou".

Documents: Required are:

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Manifests.
2 Vaccination Lists.
3 Passenger Lists.
3 Ports of Call of the Last Month Lists.
2 Ballast Manifests.

The latter 3 lists can be made on 1 sheet of paper (in triplicate). No Maritime Health Declaration was asked for. All these documents were passed to the Agent, no Customs, Port Health, Immigration or Police visited the ship. Although some crew members were without Yellow Fever vaccination certificates this posed no problem, with the Agent, he declared no vaccinations can be done here. Nor can the De-rat Exemption Certificate be renewed.

Port Restrictions: The Agent warned that crew members could not use pounds sterling, U.S. dollars, Dutch guilders or other foreign currency ashore for fear of confiscation by the "authorities". The local currency is the Ouguiya, 100 of which are on par with £1 (approx.).

Port Capacity: The Pilot stated previous largest ships had been:

(i) *"Atland"* Obo Swedish 84,229 g.r.t.
(ii) *"Thor"* Bulk German 79,270 g.r.t.
(iii) *"Lilyprima"* Obo Italian 72,68 g.r.t.

However, our claim to be the largest vessel to call being 169,080 d.w.t. is unsubstantiated. The Agent claims a shipment of 139,000 metric tonnes is the largest cargo exported from the port.

Loading Rate: The installation foreman claimed a rate of 4,000 t.p.h. Our rate, allowing for the frequent short stoppages, was 2,813 t.p.h.

Ore: The grade "Siliceous Iron Ore Fines XBF" was extremely dusty. About 10 grades of ore are available from 3 different mines.

Water Density: From our observations at low water 1024 ozs. cu. ft. and at high water 1025 ozs. cu. ft.

Cargo Figures: All tonnages quoted this port are metric tonnes. Ship's figure was about 1,300 tonnes less than the shore quantity, however, the ship's figure was accepted and the foreman stated the shore installations were usually 1% high of the ship figure. Ship was loaded to the maximum draft of 53 ft. but a great deal of difficulty was experienced reading the draft due to the seaway.

Unberthing: This was carried out on the flood tide. Single up to the 2 spring wires aft, using small astern movements and helm movements which aided by the anchor will cant the head from the quay. When the anchor is aweigh, slip the springs and steam ahead of the jetty then using full ahead power and starboard rudder followed by full astern power the vessel is swung well within the turning area to head seawards.

Depths in Channel: Except for the area of the channel abreast Cap Blanc lighthouse where less than 1 m. beneath the keel the remaining parts of the channel showed 3-4 m. underkeel clearance.

Conclusion: It would appear impractical to enter ships of a larger physical size than ourselves at this port because of airdraft/outreach limitations, draft restriction and manoeuvrability problems. Although we were fortunate in having a trouble–free berthing and unberthing procedure serious problems could be foreseen if a vessel had a main engine failure or a sudden deterioration of the weather occurred during these manoeuvres.

Copy of notice received from SNIM Agents Nouadhibou:

To avoid any problem with the Authorities, kindly note the following instructions:

Documents required on arrival:

4 Crew Lists
2 Store Lists
2 Crew Declaration Lists
3 Passengers Lists (even "Nil")
3 Ports of Call Lists of the Last Month
2 Manifests "In Ballast"
1 Health Declaration
2 Vaccination Lists

Customs: The Mauritanian Customs Officers check very closely the provisions on board. Any difference (more or less) may lead to a fine including the confiscation of the excess goods. Then please give on arrival to your Agent lists of provisions strictly exact.

Maritime Gendarmerie: Officers of the Maritime Gendarmerie of Nouadhibou may come on board. They mainly control if the Mauritanian flag is up and check very closely the concordance between the Ship's Articles, the Seamens' Books and the Crew List. If any difference is found between these 3 documents a fine may be given to the ship.

Immigration/Police: The crew members are not allowed to go ashore without a safe conduct given by the police. The list of the men asking to go ashore has to be given to your Agent on arrival.

Money: On principle, foreign money is not allowed in Mauritania, but your Agent may change your money into local currency. Non–Mauritanian money (Ouguiya) may be kept on board and if crew has not spent the total of their local money they have to give it back to the Agency (10 Ouguiya = 1 Fc.)

SHIPMASTER'S REPORT: (1977). The landfall buoy 6 miles West-by-South from Cape Blanco does not exist. Buoy No. 0 approx. position 20° 40′ N., 17° 04.7′ W. has been removed.

SHIPMASTER'S REPORT: (June 1978). The following is a brief account of the port which is in addition to the information supplied in the "Guide", which may be read as being correct. The port, formerly Port Etienne, is in Mauritania, I found travellers are afforded every courtesy. There are two flights per week from Paris via Air Africa who are very good. The flights arriving here on Tuesday and Thursday. The plane returning from Dakar Wednesday and Friday. Spare parts can be landed here and taken out to the ship with minimum of Customs formalities though it would prove to be an expensive exercise. It must also be pointed out that it is not always possible for the plane to land here due to high cross winds and resultant sand storms at the runway, in which case the plane then proceeds to Dakar direct.

Custom Authorities are most interested in the amount of foreign currency brought in as there is a strict levy on this, care must be exercised in this respect. They are also most interested in the stores on board the ship and these must be strictly accounted for precisely.

The town itself of which I did not visit is a separate community from the mining town itself. The mining town itself is self-sufficient and both French and Mauritanians live here. There is a hotel, which is practical and clean with reasonable food. There is also a club with tennis courts, a post office, power station and cinema and a hospital where major surgery can be carried out. There is also an oil refinery which is uncompleted. Refined products are imported via a modern berth. Bunkers and fresh water are available here but in limited quantities and I would imagine costly.

There are no tugs. According to the Agent wireless telegraphy may be used alongside the berth although there is a Telex ashore. I found the Agent to be most helpful.

I was assured that seamen joining or leaving here do not require a visa only a passport and discharge book are required, of which I personally was never asked to produce.

The iron ore mine is approximately 650 miles from the loading berth, all the ore coming by rail and attacks are frequent by bandits and guerillas. This can cause lengthy delays to the ship as very little ore is stockpiled.

Loading is carried out by one loading arm which pours approximately 4,000 tonnes per hour. Weights loaded can be measured ashore and have proved to be quite accurate, however it is normally the practice to accept the ship's figures.

AUTHORITY: Societe Nationale Industrielle et Miniere (SNIM).

NOUADHIBOU HARBOUR: 20.54 N. 17.03 W.

LOCATION: Position of Trading Port 20° 53′ 48″ N., 17° 03′ 10″ W.

PILOTAGE: Not compulsory, effected by SNIM/Cominor. Pilotage not available at night.

RESTRICTIONS: Depth of buoyed Channel 24 ft. Anchorage strictly prohibited in the Channel.

TUGS: One tug, 150 h.p.

BERTHING: Pier of 115 m. length connected to shore by a 150 m. long bridge.

Outside general berth for ships with a 24 ft. draft and a 160 m. max. length. According to certain vessel's accommodations, the extreme hatches cannot be discharged through quayside.

Inside berth for ships with a 20 ft. max. draft and a 80 m. max. length.

The maximum payload authorised on the bridge connecting the pier to the warehouses and the storage areas being limited to 10 tons, all heavy lifts over 10 tons are to be compulsorily discharged on lighters.

Lighterage Piers: Southern quay = length 80 m; depth 10 ft.
Western quay = 150 m; depth 10 ft.

The Southern quay is connected to SNIM/Cominor railroad network, allowing the loading of heavy lifts on railcars.

2 covered sheds: totally 3,500 sq.m.

1 area with macadamized roads offering 30,000 sq.m. of storage connected to SNIM/Cominor railroad system.

Lighterage: Compulsory for any ship whose characteristics do not allow a safe berth.

Compulsory for any loading or unloading of heavy lift over 10 tons

Not compulsory in case berths are occupied and if manpower and equipment are still available.

STEVEDORES:

Working Hours. Normal hours: from 0800 to 1200 and 1400 to 1800 on Monday to Friday.
From 0800 to 1200 on Saturday
Overtime: from 0700 to 0800 hrs., 1200 to 1400 hrs. and 1800 to 2000 hrs. on Monday to Friday.
From 1200 to 2000 hrs. on Saturday
From 0800 to 2000 hrs. on Sunday and holidays.
Night work after 2000 hrs. is not normally foreseen during Ramadan period, during this period, the work stops at 1800 hrs.
There is no work on the following holidays: New Year's Day (Jan. 1); Tabaski (El Aid) (variable date); El Mouloud (variable date); Labour Day (May 1); Africa Liberation Day (May 25); Korite (El Fatar) (variable date); Independence Day (Nov. 28); Christmas (Dec. 25); 1st Moharam (variable date).

The holidays corresponding to the Islamic holidays are calculated from Arabic calendar.

FRESH WATER: Only available for small vessels.

FUEL: Only available for small vessels.

GENERAL: *Winds* mainly N./N.E. in the morning N./N.W. in the evening. Wind force: variable from August to January rather strong from February to July. Tidal current running North during Flood, and South during Ebb (1.5 to 2.5 knots).

Swell 0.80 m. max. Strong surge alongside all berths.

Rise and Fall High water 2.35 m. Low water 0.35 m. difference = 2 m.

NOUAKCHOTT: 18.02 N. 16.02 W. (See Plan Book)

LOCATION: Nouakchott Wharf is situated in position 18° 02′ 08″ N., 16° 01′ 43″ W., being about 7 km. S.S.W. of Nouakchott.

All vessels anchor off the port and movement of cargo is undertaken by barges and lighters.

WIND: The direction of the wind varies from N.N.W. to N.E. The predominant winds affecting navigation are from the N.N.W.

The rapid onset of bad weather should be noted. When conditions are bad vessels should weigh anchor and proceed seaward as the coast offers no natural shelter.

CURRENTS: There is an almost permanent N.-S. current running at about 0.5 knots; it reverses S.-N. on a few days during the year.

SWELL: 2 kinds of swell have been observed: Local swell due to the coastal winds, varying from N. to N.W. in dry weather, and turning between N.W. and S.W. during the wet season.

ANCHORING ROADS CONDITIONS: The periods during which climatic conditions are liable to upset work are as follows: Strong swell, January/March; rain, July/August/September.

This virtually allows the port to be used during 200 days in the year.

WORKING CONDITIONS: Vessels must locate themselves as closely as possible, where they can anchor without risk, to the wharf, within the limits of their drafts (generally between 0.5 and a 0.25 miles), in line. At the lighterage quay there is a depth of water of 7 m. – 8.5 m. It is preferable for a ring of lines to be placed in advance around the sides of the vessel to which barges may tie up.

Experience shows that the tonnage unloaded currently by the wharf is 400 to 500 t.p.d. where goods in sacks are concerned. It is possible to work 2 vessels at once, but each 4 will only work half of this tonnage.

Work is currently carried out on board by private companies, and on land, in the launches and lighters by the Wharf Organisation personnel.

As far as wharf personnel are concerned, during working days, the normal working hours are from 0800 to 1600 hrs.

Overtime day hours are from 1600 to 1900 hrs.

Night time working is considered to apply between the hours of 1900 and 0600 hrs. (currently impossible).

It should be noted that there is an overtime hour at the beginning and end of work, which is the time required to launch or bring barges on to the landing-stage.

RECOMMENDATIONS TO CAPTAINS OF VESSELS: Vessels must be at all times capable of gaining the open sea rapidly, since bad weather comes up very quickly, and the coast affords no natural protection.

WHARF: The working platform is 86 m.×21 m. and lies in a N.W.-S.E. direction; it is connected to the shore by a gangway 246.5 m. length and 7 m. wide.

The wharf is designed to take a load of 2 lorries of 25 tons (2 axles of 10 tons and 1 axle of 5 tons) or an overload of 1 ton/sq. m.

The wharf manager's office together with Police, Customs and radio office are located on the shore.

WHARF EQUIPMENT: 3 cranes with capacities of 20, 8 and 5 tons respectively.

FLOATING EQUIPMENT: 1 launch of 50 hp, 2 launches of 100 h.p. 10 steel barges, internal dimensions 10 m.×3 m.×1.25 m. with capacity for 20 tons cargo. 1 steel barge, internal dimensions 13 m.×4 m.×1.35 m. with capacity for 30 tons cargo.

LAND EQUIPMENT: Goods are transported from the wharf to the storage area by 18 trailers each with a capacity of 8 tons. The port is also equipped with 2 tractors of 80 h.p. and 5 fork-lift trucks with capacity of 3.5 tons.

TANKERS: Dakar oil companies are presently building a hydrocarbon oil depot about 400 m. North of the wharf.

The depot will be fed from tankers by means of 2 sea-lines of 900 m. length.

SHIPMASTER'S REPORT: August 1978.

The following is to be read in conjunction with the information above.

Currents: Reversal of current is unpredictable and may last for several days on each occasion.

Anchoring Roads Conditions: While in the main the holding ground is good, there appears to be patches of hard sand where the anchor cannot take hold.

Working conditions: It is practical to work 4 vessels at once plus one of up to 5,000 tons d.w.t. at the new extension to the pier.

Present (August 1978) hours for ships at anchor are 0800 to 1600 hrs. (Ramadan) but Sunday overtime can be worked if vessel gives authority. It seems that this is very expensive as so many are involved.

At the pier extension work has been observed from 0800 to 2400 hrs. and a mobile crane is available there to assist ship's gear.

Wharf Equipment: There are 7 cranes with various capacities, two being used for lifting out barges for repairs and to house the tug launches at night. The mobile crane is backed up by some 8 small fixed jib carriers.

Tankers: The sea berth North of the pier is in operation.

Documentation: See "Nouadhibou".

Customs Control: The officer will not board until the Agent has entered the vessel with the necessary documents, hence there will always be a time interval between arrival and being boarded for inspection. So financial loss must be expected accordingly.

General Observations: Due to the lack of any VHF or similar communication system, it is difficult to assess the true performance of this port. It is most uncomfortable for any vessel of more than 7,500 tons d.w.t. unless the barges are prepared to come out to 7 or more cables from the pier. In the recommended anchorage the effect of swell and surf is such that the vessel frequently swings through a wide arc and the chances of breaking out the anchor are very real. The erratic current direction may also swing the ship towards the pier hence the above opinion. Other vessels may also anchor so as to swing across one's own cable and anchor.

SHIPMASTER'S REPORT: October 1979.

Anchorage: Vessel anchored in position 18° 02.2′ N., 16° 02.7′ W. (with the lighthouse tower on the jetty bearing 101° distance 3.3 cables.

General: City of Nouachott (the capital) is in position 18° 05′ N., 15° 58′ W. The port jetty is in position 18° 02.1′ N., 16° 01.55′ W. being about 7 km. S.S.W. of the city. The official languages are Arabic and French. There are asphalt roads, one which leads to Dakar. There is an airport (close South of the city) with connections to Dakar and Casablanca. Scheduled flights being published in the daily newspapers.

Time: GMT.

Authorities: No authorities come on board on arrival, however, after a few days an agent's clerk comes on board and takes all port forms and documents ashore. No store rooms are sealed but stores list is to be filled in properly.

Documents: Two copies of each of the following are required:

a. Crew List.
b. Health Declaration.
c. Vaccination List.
d. List of Ports of Call.
e. List of Arms and Ammunition.
f. Ship's Register and Tonnage Certificate.
g. Ship's Stores List.
h. Crew's Personal Effects Declaration.
i. Notice of Readiness/Manifest & Stowage Plans.

With regard to notice of readiness it is advisable to send cable via Dakar Radio. It is also advisable to ask the clerk for his identification card and ask him to sign a receipt for the above.

Shore Leave: Passports are needed for going ashore, only method o going ashore is by ship's own lifeboat or during working hours by the motor launches used for transporting barges.

Consuls: West Germany, China and U.K.

Medical: All services can be arranged by Agent.

Stores: Limited amounts of vegetables, cereals, coffee (instant) and mil (condensed) can be arranged by agent (all items are imported). There is no ship chandler.

Repairs: No facilities.

Fresh Water: There is no possibility of supplying fresh water to vessels therefore rationing of water is recommended on arrival due to the fac that turn of 30–40 days is normal for general cargo, bulk cargoes and bagged cargoes. Priority being given to vessels with cement cargo as construction of a new port is taking place 1.5 miles to the South. At mos times there are 15-20 vessels at the anchorage.

Repatriation: Can be arranged by Agent via Dakar.

Weather: See "African Pilot", Volume 1 and supplements. During the time the vessel was at the port (mid-September to mid-October) there was hardly any rain. Temperatures ranged from 20° C to 42° depending on the direction of the wind. The barometric pressure was 1008 mb. (min.) to 1012 mb. (max.). Winds normally from the North to Northwest, being influenced by anticyclones in the Dakar and Casablanca areas. Occasionally winds were from the West, S.W. South, S.E. and East. The wind was from force 3-5/6 for short periods which quickly caused deep swell and surf.

Easterly winds caused sand storms and visibility becomes poor.

The swell is reported to reach high levels in the first and last quarter o the year and vessels are advised to leave the anchorage when the rapid increase in wind appears. These winds come from two directions namely, Northerly and Northwesterly.

Approaching/Pilotage: No Pilot available. Charts BA 3247 and BA 2078 Plan (1976/correction 1978). Vessels should approach the coas heading 090° from the 20 fathom line 9 miles to the West of the charted lighthouse (Chart BA 3247). The jetty is a good radar target at 37-40 miles and the radio beacon at Nouakchott "KC" on 297 kc/s in position 18° 04.3′ N., 15° 58′ W., is an excellent aid. The depths on this track are between 20 fathoms and a minimum of 30 ft., close to the shore line (0.25 miles offshore). There are no dangers or difficulties encountered approaching.

Navigational Aids: BA Chart 2078 Plan (1976/correction 1978) mos charted buoys are not in correct position. The unlit wreck buoy in position 18° 01′ 32.2″ N., 16° 02′ 48.8″ W., marks a wreck to the S.E. the wreck is not visible and the position is doubtful. For furthe information see the plan of the port made by the ship's officers.

Anchoring/Berthing: Anchorage is recommended in the area to the North of the green wreck buoy and between 0.25 and 0.5 nautical miles from the shore. A close anchorage is required during discharge to avoi long distances for the lighters and tugs. The jetty berth (N.W. end) coul be used by vessels during calm weather and low swell. The berth is 52 m. in length and the jetty which runs in a N.W./S.E. direction is 86 m long with a width of 21.17 m. If berthed alongside, good fenders must be available at all times and crew must stand by the mooring ropes.

Remarks: Receivers sometimes require a vessel to berth at the jett but care should be taken, as if vessel causes any damage during the difficult approach or by swell, the authorities may sue the master/owners with high penalties and detain the vessel until payment is made. There has been an instance where a master has been placed under "hote arrest" and all papers and documents for the vessel kept ashore resulting in a delay to the vessel of 40 days.

Stevedoring/Port Equipment: The stevedore company is So Ge Co Nouakchott, Societe Generale de Consignation.

The jetty wharf is connected to the shore by a 246.5 m. long bridge with two lanes each of 7 m. width. There is an old pipe-line in the centre of the bridge between the two lanes. The bridge runs in a 104° direction to the shore. At the Southern side of the jetty-platform there are 7 cranes (one damaged) with lifting capacities of 12.5 to 25 tonnes.

There are 5 motor launches (50-100 h.p.) for towing lighters to and from the vessels. There are also 10 steel barges (lighters) with a capacity from 20–70 tonnes. At night the launches are lifted onto the jetty and the lighters are either moored alongside the jetty or at buoys.

In addition to the 7 cranes there are available on the jetty and whar area 10 mobile cranes and 5 forklift trucks (3.5 tonnes) and 2 tractors fo transporting goods on trailers (total 18).

Capacity of the trailers being from 8-20 tonnes.

Cargo is discharged into the barges and transported to the shore. Ne slings mostly being used for bagged cargo and general cargo. There are stacking areas of 70,000 sq.m. and 45,000 sq.m. near the wharf. So Ge Co have 2 cold rooms (6 m.×3 m.). There are 4 sheds, storage area 2,000–4,000 sq.m. capacity.

Signals: When loaded barges alongside the vessel are to be collected by the launches, vessel is to sound 2 long blasts on the ship's whistle.

Average discharge rate: Bulk cargo 7.5 tonnes per gang hour and bagged cargoes 15 tonnes per gang hour, however, this is dependent upon barges and launches. The average tonnage discharged pe day/gang is for general cargo 15–35 tonnes and bagged cargoes 35–8 tonnes.

Working hours: Monday to Friday 0800–1600 hrs. Saturday 0800–1200 hrs. Sundays and local holidays are on overtime.

Note: It is compulsory that 1 hour prior to and 1 hour after working hours is counted as overtime for shore gear preparation.

Mauritius

PORT LOUIS: 20.09 S. 57.30 E. **(See Plan Book)**

PORT LIMITS: The commercial area of the port is the area inside the port bounded by the entrance buoys and the shore line of the inner harbour. Vessels at the outside anchorage lie within the limits of the port defined by an imaginary line joining Pointe Aux Sables and Pointe aux Pimentes. In this area commercial activities are restricted to bunkering, ship repair and the landing of passengers or personnel.

PILOTAGE: Compulsory for vessels over 100 tons register. Vessels are piloted inwards and outwards at any time of the day or night if circumstances permit. Inward bound vessels are met about a mile seaward of the Entrance buoys though they may, in some circumstances have to be boarded at a greater distance offshore.

ANCHORAGE: Open roadstead with anchorages for vessels of any draft. Admiralty Chart No. 713 refers.

MAX. SIZE: Harbour entrance depths from 12.8 m. to 36.3 m. Channel – dredged to 12.1 m. Also see "Berthing".

RADIO: The Port Master requires to be notified of the date of the vessel's arrival, the length and draft and purpose of call, by radio as soon as it is possible for Master to communicate with Harbour either:

1. By CW transmission through the Government Radio Station (3 BA) at Vacoas on 500 kc/s.
2. By R/T transmission through Port Louis Harbour Radio Station (3 BB 3) on 2182 kc/s.

VHF: Port Louis Harbour Radio Station is equipped with VHF and maintains 24-hour watch on Channel 16.

TUGS: 2×830 h.p. diesel-engine tugs, *Betty Des Mascareignes* and *Winnie Des Mascareignes.* These tugs are available for deep-sea towage and salvage and are fitted with fire-fighting equipment, R/T and VHF. 3 smaller tugs of 320 h.p. are also available for harbour work and fitted with VHF.

BERTHING:

Quay No.1: Length 122 m.; maximum draft 11 m. at any state of tide, vessels up to 183 m. overall length can be accommodated. This berth is designed mainly for discharging petroleum products and bulk fertilizer. General cargo vessels and passenger ships are occasionally berthed at the Quay.

Quay Nos. 2-3: Marginal quays having a total length of 366 m.; maximum draft 10.2 m.; vessels up to 195 m. overall length can be accommodated. These berths are mainly used for general cargo operations.

Quay No.4: (Container Terminal): Length 183 m., maximum draft 10.2 m. This berth is for container operations. A Container Park of 3.2 hectares is available for storage of containers. Two heavy duty Hyster Forklifts of 26 tons are available for handling laden containers.

Vessels must use their own gear to discharge/load containers. The movement from the hook to the Container Park and vice versa is carried out by tractor/trailer system.

Quay D: Length 149 m., maximum draft 9.3 m. can take a vessel up to 183 m. overall length. This berth is used for discharging of petroleum products and loading of bulk molasses. Passenger vessels are also berthed alongside the quay.

Quay C: Length 121 m., maximum draft 5.0 m. Berth can take a vessel of up to 92 m. length berthed port side to. This berth is used mainly for the inter-island trade and discharge of cattle.

Sugar Terminal: A Bulk Sugar Terminal constructed on the South side of the harbour came into operation in July 1980. Sugar is now loaded in bulk through the terminal at a maximum rate of 1,400 t.p.h. Vessels up to 198 m. overall length can be accommodated at the terminal. Maximum draft for the vessels loading sugar is 11 m. Two sheds capable of storing 175,000 tons of sugar each have been constructed. The Bulk Sugar Terminal is operated by the Mauritius Sugar Corporation.

Bulk Cement Berth: A bulk cement discharge point lies between Quays Nos. 1 and 2. Cement vessels up to 135 m. are regularly accommodated at this berth. Vessels up to 183 m. may be occasionally accommodated subject to adjacent berths being vacant.

Buoys Berths:

(i) 4 berths capable of taking ships up to 10.7 m. draft.
(ii) 3 berths capable of taking ships up to 7.6 m. draft.
(iii) 1 berth capable of taking ships up to 5.8 m. draft.
(iv) 2 berths capable of taking ships up to 4.9 m. draft.

Length of ships berthed at the mooring buoys varies between 137 m. to 183 m.

Vessels are berthed/unberthed at any state of tide. Tidal range is about 0.8 m. maximum.

SPECIALISED CARGO-HANDLING FACILITIES: LPG carriers berthed at Quay D. The Port offers full containerisation facilities. Quay No. 4 which became operational in June 1979, is specially designed to receive container vessels. Cement discharging facilities also available. Rate of discharge 500 t.p.h.

STEVEDORING: Undertaken by private contractors.

Working hours: Monday to Fridays from 0700 to 1500 hrs., Saturdays from 0700 to 1300 hrs. Sundays and public holidays from 0700 – 1100 hrs. Overtime work is carried out during weekdays as well as on Sundays and public holidays if necessary.

MEDICAL: Arrangements for medical attendance should be made through ship's Agent. Private clinics available.

FRESH WATER: Fresh water supplied by barges at any berth between 0700 and 1600 hrs. Arrangements can be made for supply before 0700 and after 1600 hrs. on payment of overtime. The rate is about 25–30 t.p.h. 4 barges of 50, 75, 85 and 110 tons respectively are available.

FUEL: Gas oil, marine diesel and furnace oil obtainable. (Arrangements must be made in advance between Owners and Shell Co., BP, or the Anglo-Iranian Oil Co.) The pumping capacity of the installations at Port Louis for furnace oil is between 150 and 200 t.p.h., and for marine diesel oil and gas oil 50 t.p.h. Marine diesel oil and furnace oil (35 secs. to 1,000 secs.) is supplied at Quay "D". Furnace oil 1,000 seconds only is supplied on No. 5 West berth.

A 400-ton bunkering barge available to supply vessels in harbour and outside anchorage.

DEVELOPMENTS:

(i) Construction of Port Administration Building.
(ii) Construction of Workshop and Fire Station Building.
(iii) Construction of Recruitment Centre/Canteen.

Future Projects:

(iv) Construction of Container Control Building, Weighbridge, etc.
(v) Construction of a Grain Complex.

REPAIRS: Almost any type of repair can be undertaken in Port Louis.

DRY DOCK: Stevenson dry dock. Largest vessel that can be docked: 100 m. × 15 m., with a max. draft of 9.0 m.; vessels of up to 109 m. ×15.3 m. can also be docked, but at least 15 days notice should be given.

CONSULS: *Consulates:* Belgian, Danish, Dutch, Finnish, German (Federal Republic), Norwegian, Portuguese, Spanish and Swedish. *Embassies:* French, Malagasy, American, Russian and Pakistan. *High Commission:* British and Indian.

HOLIDAYS: 1st January (New Year's Day), 22nd January (Cavadee); 6th February (Chinese Spring Festival); 18th February (Id-El-Adha); 1st May (Labour Day); 29th October (Divali); 1st November (All Saints' Day); 1st December (Id-El-Fitr); 25th December (Christmas Day).

POLICE/FIRE: Police, tel. 999; Fire, tel. 999.

TIME: Local time GMT plus 4 hours.

AUTHORITY: Mauritius Marine Authority.

NOTES

Please also advise Shipping Guides Ltd.

Mexico

ACAPULCO: 16.50 N. 100.00 W.

DOCUMENTS:

Health Clearance from previous port.
Health Pratique.
4 Stores Lists.
4 Lists of Crew's Personal Effects.
12 Crew Lists.*
2 Passenger Lists.*
12 Manifests of cargo for the port.*
*One copy to be visaed by Mexican consul.

PILOTAGE: Pilot is ordered by Agent on the basis of Master's ETA, which should be given accurately at least 24 hrs. before arrival. Pilot boards at the port limits, approx. 1 mile from the entrance.

ANCHORAGE: Vessels may anchor in the middle of the bay as indicated by the Pilot. Depths up to 150 ft.

RESTRICTIONS: The Bay of Acapulco is a natural harbour surrounded by mountains, approx. 4 miles across at its widest part and 2.5 miles across at its narrowest. There are 2 entrances, 1 called Boca Grande and the other called Boca Chica.

Boca Grande is between Punta Siclata on Isla de la Roqueta and Punta Bruja. The channel is 3,000 m. wide with a depth of 31 fathoms in mid-channel.

Boca Chica Channel, between Isla de la Roqueta and the Peninsula of Las Playas is 300 m. wide with a depth of 14 fathoms in mid-channel.

MAX. SIZE: For berthing alongside max. draft 28ft. 6in.

HEALTH: When vessel arrives at the port the following Authorities will board: Port Health Authority, Customs and Immigration, accompanied by the ship's Agent.

RADIO: Coastal station of Acapulco receiving on 8374 kHz in daytime and on 4180 kHz at night. Transmitting on 8514 kHz in daytime and 4250 kHz at night. Radiotelephone receiving and transmitting on 2715 kHz during the day and on 2182 kHz from 2000-0600 hrs. local time. VHF service available from 0630 to 2300 hrs.

TUGS: 1 tug is required for berthing. Tug's line used.

MEDICAL: Agent should be advised by radio in advance if any medical assistance required. Hospital facilities available.

TANKERS: Tanker moorings operated by Petroleos Mexicanos situated on the Eastern side of the bay. It is strictly prohibited to discharge oily residues in the bay or within 40 miles of the port.

FRESH WATER: Can be supplied by hoses from the quays, rate about 15 t.p.h.

OPENING/CLOSING HATCHES: Is performed by stevedores.

CUSTOMS ALLOWANCES: Crew members are only allowed to retain cigarettes, tobacco and liquor sufficient for their own consumption while vessel is in port.

IDENTIFICATION CARDS: Crew members should carry a passport.

CONSULS:

Denmark	Tel. 2.11.11	Italy	Tel. 2.25.10
France	" 2.43.83	Norway	" 2.19.56
Great Britain	" 2.29.21		

REPAIRS: Minor engine repairs can be effected. No dry docks, only a slipway for vessels up to 100 tons.

REPATRIATION: Can be arranged.

AIRPORT: International Airport situated 22 km. from the port, daily flights to all parts of the world.

TIME: GMT minus 6 hrs. all through the year.

HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.

POLICE/FIRE/AMBULANCE: Police tel. 2.00.40; Fire 2.00.42; Ambulance (Red Cross) 2.02.41. and/or 2.00.88.

TELEPHONES: Cannot be connected on board the ship but Master may make calls from the quay.

SHORE LEAVE: Allowed.

AUTHORITY: Capitania de Puerto.

AGENT: Representaciones Maritimas, S.A. c/o Ricardo Careaga E Hijos, S. De R. L., C.M. Aleman No. 187-31 3er Piso, P.O. Box 256. Acapulco, Gro. Mexico. Tel.: 2 23 35. Telex 017 516 Cables: "Maritimex".

COATZACOALCOS: 18.08 N. 94.25 W.

PORT LIMITS: From the centre of the channel at the bar with a radius of 0.5 mile to seaward.

DOCUMENTS:

Customs:

Cargo manifest, original and 4 copies visaed by Mexican Consul at place of origin. If no cargo carried for this port a certificate and 2 copies stating the fact.
Stores List, original and 1 copy.
Personal Effects List, original and 1 copy if vessel is arriving from another Mexican port. Customs release from that port must be produced.

Port Captain:

Clearance from last port.
2 copies Crew List.
3 copies Manifest of cargo for this port.

Immigration:

Crew List, original and 1 copy, bearing consular visa.
Passenger List, original and copy, visaed by consul.
All Crew Passports or I.D. Cards.

Health:

2 copies Crew List.
2 copies Passenger List.
Crew Vaccination Certificates.
Derat Certificate.
When vessels are anchored beyond the breakwater authorities board from the pilot launch.

The following must be made available for inspection.

Registration Certificate of Vessel.
Certificate of Inspection of Deck Machinery.
Certificate of Inspection of Machinery.
Freeboard Certificate.
Tonnage Certificate.
Radio Certificate.
Radio-telephony Certificate.
Emergency Procedure in the Case of Abandoning Ship.
Emergency Procedure in the Event of Fire.
Vessel Insurance Policy.
Copy of the Charter Party (where applicable).

PILOTAGE: Compulsory. Pilot meets vessel off the jetties at Coatzacoalcos Estuary. Master should give Agent information not less than 24 hours prior arrival stating vessel's name, flag, and ETA as well as draft.

Pilot boat black hull, white housing and red deck. 2 launches *Alcion* and *Vencedora*. The sound signal for calling the Pilot is 2 long blasts and 1 short blast. The light signal is a blue Bengal light.

There is a new cutter *Siriux*. The pilots' office has a VHF radio station, listening out on Channel 16.

ANCHORAGE: Vessels may anchor between 0.5 mile and 1.5 miles off the breakwater or at the Master's discretion.

MAX. SIZE: Max. draft crossing the bar is 37 ft. The Pajaritos Channel to the bar reaches 42 ft. (will shortly be 45 ft.)

Free Zone: Max. length during the day 200 m., at night 125 m. Max. draft. 31 ft.

Pajaritos: Max. length 225 m. Max. draft 37 ft.

HEALTH: Pratique never given by radio. Vessels granted free pratique when berthed alongside if no contagious illnesses aboard.

RADIO: Telegraphic transmitter type TH 600-M with an open sea range of 500 miles radius, frequencies of 512, 500, 432, and 419.5 kc/s. Telephonic transmitter type TSB-500-Be with approx. range of 500 km., frequencies of 2182, 2270, 2542 and 2665 kc/s. RDF transmitter type TT-1017-B with approx. range of 300 miles, frequency 312 kc/s. Transmitter/Receiver for radiotelephony VHF type VFD-50PT/PR, with approx. range of 50 miles, frequencies in Simplex operation: Channel 12-156.6 mc/s and Channel 16. International call-up 156.8 mc/s. Duplex operation: Channel 26. Transmission 161.9 mc/s and reception 157.30 mc/s Channel 27. Transmission 161.95 mc/s and receiving channel 157.35 mc/s. At the moment, there is a point to point link-up with national and coastal telegraphs, as well as teleprinters for national and international service No. 078-835 (the latter is said already to be installed and will shortly be operating normally).

TUGS: The Free Zone has the "Servicios Portuarios del Istmo de Tehuantepec S.A de C.V., owners of the tugs *Quetzalcoatl* 2,400 h.p., *Olmeca* 1,600 h.p. and *P.L.M.8* with 600 h.p. for operations in the Free Zone and the Pajaritos Terminal, the first being able to undertake salvaging work due to extensive range of action.

A tug is obligatory for mooring, unmooring or changing position in the port roads. 1 tug for vessels of 2,500 g.r.t. and 2 tugs for vessels larger than 4,000 g.r.t. The signal for calling up tugs is 2 long and 2 short blasts on the vessel's siren. The signal for the tug to withdraw is 1 short, 1 long and 3 short. The tug will repeat the signal to indicate that it has been heard. Tugs are fitted with VHF radio listening out on Channel 16 and during working on the channel which the tug captain is ordered to use.

BERTHING: *Free zone:* This has a quay length of 1,900 m. (1, 2, 3, 4, 5, 6, 7, 8,) with varying depths of water from 29 to 31 ft. All necessary services for vessels are available. During the day, vessels up to 200 m. overall length can manoeuvre, and at night only vessels up to a max. length of 125 m.

Restrictions: Night service is suspended during times of strong currents in the Coatzacoalcos river.

Pajaritos Terminal: In this terminal PEMEX has 3 quays operating and 1 being constructed, those operating being PX1E and PX1W with operational depth of 33 ft. and 30,000 tons gross with lengths of 200 m. PX2E and PX2W with operational depths on the Eastern side of 33 ft. and with 37 ft. on the Western side, admits vessels of 225 m. overall length and 35,000 g.r.t. The Provisional Quay admits vessels with 37 ft. draft. and 35,000 g.r.t. At this terminal, Pemex exports crude oils, fuel oils, and at the PX1E quay ethylene is loaded specifically. In the Western part of the lagoon, there is a manoeuvring basin with a radius of 300 m.

F.F.M. Quay: In the Eastern part of the Lagoon of Pajaritos, the Empresa Fertilizantes Fosfatados Mexicanos S.A. have their plants and a quay of 425 m., running E. — W., this quay being used for discharge of phosphoric rock in 4 mobile hoppers. Also, liquid sulphur is discharged, phosphoric acid is loaded, as are sulphuric acid and superphosphates. It has an operational draft of 33 ft., and takes vessels of 35,000 g.r.t.

STEVEDORES: No ETA advice necessary. Free Port: Straight working hours: from 0800 to 1200 and from 1400 to 1800 hrs. Overtime 100% overcharged according Tariffs. Latest times to order gangs: 0730, 1330 and 1730 hrs. Straight time above hours Monday through Saturday. Sunday and holidays allowed to work except "Legal Holidays". Loading and discharging rates: 25 tons gang/hour using ship's derricks. No shore cranes available. Loading sulphur by conveyor belts at 500 t.p.h., working around the clock.

Private FFM Berth: Loading or discharging operations performed by their own personnel working 24 hours per day. Rate of loading by conveyor belt: 500 t.p.h. Rate of discharging 1,100 tons per day with ships gear.

MEDICAL: Hospital facilities available. Inform Agent in advance if treatment required. Smallpox vaccination certificates inspected on arrival. If certificates expired crew members are re-vaccinated at Health Department.

TANKERS: Also see "Berthing". Tankers regularly moor in the Pajaritos Roads. There are 4 large quays for mooring 7 vessels up to 233 m., with max. draft at the quay of 33 ft.

The provisional Quay has 2 lines of operation of 24 in. with 3 points 8 in. for crude oil and 1 other of 8 in. for crude oil.
DENSITY: Averages 1012.
FRESH WATER: Available at berths in Free Port area, delivered by 1.5 in. hose. Loading rate about 8 t.p.h.
FUEL: Fuel can be supplied at Coatzacoalcos port by tank-trucks when vessels need small quantities. Petroleos Mexicanos (PEMEX) has at Nanchital a loading terminal which is about 3 miles up-river from Coatzacoalcos (max. draft 27 ft. 6 in.) where Bunker C fuel available.

Diesel oil only available at Minatitlan, about 17.5 miles up-river from Coatzacoalcos (max. draft 21 ft.). If vessel bunkers at Nanchital or Minatitlan there will be at least 1 day delay and heavy extra expenses.

Gas freeing equipment for Gas tanker at Nanchital.
DEVELOPMENTS: The entrance channel up to Pajaritos roads has been dredged up to 42 ft. The quays in the Free Zone have been completely reinforced, vessels up to 31 ft. draft being able to come alongside. The warehouses for general cargo at quays 2 and 3 have been completed, with a covered area of 4,000 m. and normal loading capacity of 10,000 cu. m. There are sufficient open areas for positioning heavy loads or machinery. Apart from the lighthouse on the Gavilan Hill, in the Allende area (left bank), the port has light towers indicating the main entrance channel, another 2 to indicate the channel leading to Pajaritos roads. All 4 have flashing lights. The branch leading onwards to the Free Zone is indicated by a small tower with flashing white light. The lights of the promontories of the 2 headlands;— the East light is green, and the West light is red. The channel is marked with black coloured buoys with odd numbers, on the port side entering, and red with even numbers on the starboard side. Both sets of lights are of the flashing type. When continuing upstream towards Nanchital or Minatitlan, the bridge has to be passed under. Its characteristics are: Length 1,375 m. vertical clearance with the bridge up 35 m., with the bridge down 8.84 m. Horizontal clearance which can be used: 60 m. To have the bridge raised, vessels must give 3 long and 2 short blasts on the siren.
CUSTOMS ALLOWANCES: No restriction for free use on board.
CONSULS: Norway and Netherlands.
REPAIRS: Minor repairs may be effected. No dry dock available.
AIRPORT: At Minatitlan, about 40 minutes car drive away. 2 regular flights to Mexico City.
TIME: 6 hours behind GMT.
HOLIDAYS: No work performed on following legal holidays: January 1st; March 21st; May 1st; May 5th; September 16th; October 12th; November 20th; December 25th; and December 1st every six years when Federal Government changes President.
TELEPHONES: No facilities for placing telephones on ships.
POLICE/AMBULANCE/HOSPITAL: Police tel. 2 01 22, Red Cross 2 02 85; Hospital 2 00 30.
SHORE LEAVE: Possible. Crew must have I.D. cards or passports Passengers must have passports.
AUTHORITY: Port Captain.

AGENT: Representaciones Maritimas, S.A. Calle Juarez 320 Altos Coatzacoalcos, Ver. Tel. 2 01 71. Telex 078 822. Cable: "Maritimex", Coatzacoalcos.

LAZARO CARDENAS: 17.59 N. 102.10 W.

(See Plan Book)

PORT LIMITS: Area within limits of anchoring described below. For "Arrived Ship". Pilotage limits 1 mile off to seaward from breakwaters.
DOCUMENTS:

7 Crew Lists
2 Vaccination Lists
1 Sanitary Health Declaration
3 Stores Lists
2 Personal Effects Lists
Clearance From Last Port
Voyage Memorandum, showing also Ships Registry
Derratisation Certificate and Cargo Gear Certificate regarding cargo
5 Cargo Manifests
5 Bills of Lading.

PILOTAGE: 24 hours advance notice through coastal station, addressed to "Puerto" Lazaro Cardenas, Mich. A VHF watch on Channel 16 is maintained Monday to Friday, 0800 to 1900 hrs. and at any time previously requested by ship's Agent. VHF range 45 miles. Pilot will board normally either 1 mile off the breakwater or at the anchorage, and at Master's request further out if required. In the event of heavy sea, vessel will be instructed accordingly via VHF.
ANCHORAGE: Imaginary circle 1 mile in diameter whose centre is located 1.5 mile South of breakwater with depths ranging from 8 fathoms on the North edge of circle to 20 fathoms on the South. Very good holding ground, care should be taken not to anchor on, or near leading line (304°) due to a submarine canyon with over 100 fathoms depths at 1 mile off the breakwater.
RESTRICTIONS: Vessels up to 200 m. LOA and up to 35 ft. salt water draft may enter or leave the port 24 hours a day, larger vessels or those with deeper draft only with daylight. Vessels with over 42 ft. salt water draft must wait for tide.
HEALTH: Port Health Officer will normally board vessel along with Pilot, pratique can also be granted by VHF radio. Automatic pratique is granted when coming from another Mexican port.
RADIO: Radio Maritima Manzanillo "XFM" and Radio Maritima Mazatlan "XMA" are recommended coastal stations through which to route ETA's. Initial contact on 2182 kHz.
VHF: At port, 25 watt 45 mile range. Channels 6, 16, 26, 11, 12, 13 and 69. Initial contact to be made on Channel 16, manoeuvring on Channel 6, port operations on Channels 11, 12 and 13.
RADAR: No radar service available.
TUGS: 1 tug stationed permanently at port 1,900 h.p. twin-screw. Tug's lines used, no charge for lines. Vessels over 50,000 tons displacement should apply to Manzanillo for other tug through Agent. A second tug is also available.
BERTHING: The quay of "Metales Y Minerales" is the only one in service, 650 m. (2,132 ft.) of usable berthing length with depth alongside from 45 ft. to 47 ft. salt water. Shore cranes and sometimes ship's gear used for steel products. Significant cargoes are coal in bulk, coke-breeze, pig iron and finished steel products, also fuel oil.
BULK CARGO FACILITIES: Berth No. 2 of quay mentioned above has a shore crane clam-bucket type 250 t.p.h. capacity capable of loading and unloading. Depth alongside 45 ft. salt water. Clearance from boom to MLLW 35 m.
CRANES: In addition to the crane on berth No. 1 a container crane 40 tons lifting capacity is available. Clearance from boom to MLLW, 31.2 m. also 3×75 ton movable cranes (self-powered) can work anywhere on quay, 2 additional mobile cranes of 20 ton capacity are available.
SPECIALISED CARGO HANDLING FACILITIES: Berth No. 1 can handle containers and heavy lifts up to 40 tons. Berth No. 2 can handle bulk and ores.
BRIDGES: No bridges.
STEVEDORES: Agents will arrange for stevedores upon receipt of ETA.
MEDICAL: Advance notice required by Agents when medical assistance required, emergencies can be routed via VHF at pilot station (Channel 16). 2 hospitals and 2 clinics with a total of 40 beds available plus a new hospital with 50 bed capacity will accept seamen. Smallpox vaccination required, yellow fever and cholera vaccination desirable.
TANKERS: All berths have 10 in. diameter lines to discharge fuel oil.
DENSITY: Highly variable, can range from 1024 in dry season to 1012 in rainy season.
FRESH WATER: Available. 3 in. pipe on all piers (American standard thread), but is recommended to boil it, for drinking purposes.
FUEL: No fuel available for vessels, only diesel of specific gravity 0.85 available in trucks.
FIRE PRECAUTIONS: Tankers should fit a good ground connection to quay and have 2 lines hanging fore and aft ready for emergency towing.
CONSULS: No consuls available at present.
REPAIRS: Small and medium size repairs can be done at the workshop of the steel works if previous advice sent to Agent.
DRY DOCKS: No dry docks available.
SURVEYORS: One independent surveyor available for draft surveys, on/off hire and damage, can be contacted through Agents.
GANGWAY/DECK WATCHMEN: Neither necessary nor recommended.
HATCHES: Normally done by crew members, or by stevedores at ship's request.
CUSTOM ALLOWANCES: There are no regulations. It is according to the Master's judgement for his needs for the stay in the port.
CARGO GEAR: Normally done with ship's gear but shore cranes are available upon request. Heavy lift cranes up to 40 tons.
REPATRIATION: All facilities for crew changes.
AIRPORT: Zihuatanejo Airport, nearest 135 kms. 5 daily flights to Mexico City with connections to all parts of the world.
TIME: GMT minus 6 hours.
HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, 1st December. (Every 6 years when there is President change.)
POLICE/AMBULANCE/FIRE: Police 2-0154, Ambulance 2-05-75, Fire 2-03-33 ext. 1020 and 1000
TELEPHONE: No shore connection available.
SERVICES: Only ship chandler and laundry.
SHORE LEAVE: Crew members allowed shore leave, without any special permit.
IDENTIFICATION CARDS: Seaman's book is sufficient.
REGULATIONS: No special regulations.
DELAYS: No delays expected.
DEVELOPMENTS: General cargo berth, 150 m. long., 12 m. depth. Phosphoric rock terminal, 300 m. long, 14 m. depth. Grain terminal completion scheduled late 1979, 280 m. long, 14 m. depth.
GENERAL: Salinity in basin and docks always changing and subject to tides and river flow, recommend taking at least 5 samples from keel to surface to get an adequate average of salinity.
AUTHORITY: Superintendent of Port Operations.

MANZANILLO: 19.03 N. 104.20 W.

DOCUMENTS:

14 Crew Lists.
20 Passenger Lists.
Derat Certificate.
Vaccination Certificate for each crew member.
Cargo Manifest and one copy to be visaed.
8 additional copies of Cargo Manifest, unvisaed.
10 Bills of Lading, one copy to be attached to each cargo manifest.

PILOTAGE: Pilot station cannot be contacted by radio, and Pilots are ordered by Agents basis Master's ETA.

Pilot boat is black with white wheel-house on which is painted letter "H". International Code signals used. Pilot normally boards vessel about 1 or 2 miles from breakwater but if requested in advance the pilot boat will come out to 5 or 6 miles. Pilot cannot board in rough weather. Vessels waiting for Pilot may anchor about 2 – 3 miles N.W. of breakwater in depths of 12-15 fathoms.
ANCHORAGE: Vessels may anchor in the whole North part of the Bay where depths are 12-15 fathoms at a distance of 1 – 2 miles from the coast.
RESTRICTIONS: Vessels may enter at any time day or night.
MAX. SIZE: No limitation for anchoring in the bay. For mooring alongside, max. length 200 m., max. draft 32 ft.

Also see "Tankers".

HEALTH: Port Health Officer and Immigration Officers board vessel at anchorage. Passengers and crew may be required for inspection. All passengers and crew members must possess Smallpox Vaccination Certificates.
RADIO: Coastal station Manzanillo Radio, call sign XFM, operating 0600-1800 hrs. local time.
TUGS: 1 tug available, compulsory to use tug when mooring alongside. Tug will join vessel as ordered by the Pilot.
BERTHING: Vessels may berth at both sides of the pier or at the North end of the pier.
STEVEDORES: Advise Agent in advance number of gangs required. Discharge rate approximately 20-25 t.p.h. per gang.
MEDICAL: Agent should be advised in advance if medical attendance required on board. Hospital facilities available.
TANKERS: 2 berths available, max. length 650 ft. No restriction on beam. Max. draft: N.E. side 31 ft. (Forward) and 38 ft. (Aft). S.E. side 33 ft. (Forward) and 38 ft. (Aft).
FRESH WATER: Should be ordered in advance. Rate of 10 t.p.h. Vessels must furnish own steam for pumping, 2 inch coupling. No barges available for delivery at anchorage.
FUEL: Should be ordered in advance: All grades available. May be expensive due Customs fees.
GANGWAY/DECK WATCHMEN: No shore service available.
OPENING/CLOSING HATCHES: Normally performed by crew members.
CUSTOMS ALLOWANCES: Each crew member may retain 1 carton of cigarettes, and 1 bottle wine/spirits for his own use. No alcohol may be taken ashore.
IDENTIFICATION CARDS: Identification cards or shore passes are necessary for crew going ashore.
CONSULS: Nearest are at Colima and Guadalajara.
REPAIRS: Only repairs to auxiliary machinery can be effected. At Guadalajara hull repairs may be effected provided dry dock not required.
REPATRIATION: Can be arranged.
AIRPORT: Local airport only for internal traffic.
TIME: GMT minus 6 hrs. all the year round.
HOLIDAYS: The following holidays can only be worked in case of emergency: 1st January; 5th February; 21st March; 1st May; 5th May; 16th September; 12th October; 25th December; and in addition 23rd May, Anniversary of the Stevedores' Union.
POLICE/FIRE/AMBULANCE: Police Tel. 4; Fire 23; Ambulance 96.
TELEPHONES: Cannot be connected on board ships.
SHORE LEAVE: Permitted, except for crews of Russian, Cuban and Communist Chinese vessels.

Crew members required present their identity cards to Immigration at the gangway. Crew members left behind by vessel must be covered by 10,000 Pesos bond to guarantee repatriation expenses.
DEVELOPMENTS: Improvements are in progress to accommodate vessels up to 30,000 tons with a draft of 40 ft.
AUTHORITY: Capitania de Puerto Edifico Federal.

MAZATLAN: 23.11 N. 106.26 W.

SHIPMASTER'S REPORT: August 1977.

DOCUMENTS:

Port Clearance from previous port.
4 Store Lists.
12 Crew Lists.
2 Passenger Lists or Nil Passenger List.
(All to be stamped by Mexican Consul or a representative of a friendly country.

On arrival the following officials board:
Port Health Authority.
Customs.
Agricultural Department Authority for checking ships provisions, mainly vegetables.
Doctor for checking 'meat' in the fridge room.
Immigration.
Ships Agent.
Port Authority representative.

The (provisions) meat room is sealed after inspection by the doctor, every morning the seal is broken and resealed after the days provisions are taken out.
PILOTAGE: Pilots can be contacted on VHF Channel 16. Pilots board in position 23° 10′ 24″ N., 106° 26′ 24″ W. with Creston Island light bearing 116° (T) × 0.4 miles.
APPROACHES: The approach is clear with no obstructions except Piedra Negra rock which is just 7 ft. above the water. Vessel should head for Creston Island light, keeping at least 2 cables clear of Piedra Negra rock.
ANCHORAGE: Anchorage is not in the position marked on the British Admiralty Chart. I was told about this by the Pilot when he boarded. The anchorage is now shifted and a vessel should anchor East of a line drawn North/South through the Eastern tip of Island Chivas, East and clear of Piedra Negra rock but outside the 10 fathom line. The holding ground is not good. Creston Island light is a very powerful light, but its characteristic is now Fl. white every 8 sec. and not as marked on the chart.
RADIO: Mazatlan has a coastal radio station but only works on Medium frequency.
TUGS: Only 1 tug is available, if a second tug is required it has to be called from another port.
BERTHING: There are 4 berths:

No. 1	213 m. length	9.0 m. depth alongside.
No. 2	210 m. length	8.5 m. depth alongside.
No. 3	214 m. length	9.0 m. depth alongside.
No. 4	351 m. length	10.0 m. depth alongside.

TANKERS: Max. draft 29 ft. and LOA 590 ft., however tankers of 629 ft. LOA have discharged.
STEVEDORES: Gangs work from Mondays to Saturdays from 0800 to 1700 hrs. Any work after 1700 hrs. till 0700 hrs. next day and from 1700 hrs. on Saturday till 0700 hrs. Monday is overtime. Cotton bales are loaded at the rate of 85 to 90 bales per hour per gang. The bales stow at 29/30 cu.ft. per bale.
FUEL: Can be supplied, but has to be arranged in advance through PEMEX (Petroleos Mexicanos) office in New York. Diesel oil is normally supplied by trucks.
FRESH WATER: Can be obtained at any time and is supplied by hoses (ships hoses) from the quay at about 9 Pesos per ton.
STORES: Provisions are available, however it is difficult to get a variety and frozen vegetables are not available.
MEDICAL: Assistance available.
IDENTIFICATION CARDS: Not required, crew can go ashore, there are no restrictions, but all passports and seamen's books are kept in the custody of the Master.
REPATRIATION: Can be arranged via Mazatlan Airport or Mexico City.
TIME: GMT minus 7 hours throughout the year.
SHIPMASTER'S REPORT: December 1978.
Pilotage: Pilot compulsory. Pilot boards 1.5 cables of the South breakwater. ETA's and amendments to be sent as soon as possible after leaving previous port.
Restrictions: Vessels can enter and leave day and night. However, they can only sail on the flood tide. Tidal range approximately 3ft.
Tugs: Tugs available but power not known.
VHF: Pilot, Port Authority and Agent on Channel 16.
Services Available: Fresh water (must be boiled for drinking). Fresh provisions. Airport (3 miles from city). Salvage Surveyor. Laundry service. Bunker fuel oil. Doctor and Hospital. Groceries and meats.
Density: 1020.
Charts: U.S. Chart 21301 B.A. Chart 3060.
Ship Anchored: 4 cables S.W. of Cerro del Creston Light in dense morning fog, depth 13 fathoms.
Pilot Boat: Low power, black hull with white superstructure, only came out to ship when the fog cleared. Requested first a gangway to board but afterwards changed his mind for a pilot ladder in view of a slight swell. Pilot boat also handled the ships mooring lines at the berth.
Breakwater: Quite narrow to pass through.
Buoys: Mostly all covered in guano.
Berth No.3: As there was a bulk carrier on the next berth the ship had to overhang the berth by approximately 12 m. However there were bollards on shore away from the quay to provide suitable leads for stern lines. The quay was low lying approximately 3 m. above the water with 1 m. max. rise and fall of tide.
Note: Admirality Tide Tables do not give any data for this port other than its range. U.S. tide tables give all required information.
Depth of Water: Average depth after sounding round hull was approximately 9.5 m., shallowest depth 8.5 m.
Officials: There is a Customs and Police gate on the quay.
Cargo Work: The ship loaded from refrigerated road trucks. The labour set their own derricks and took out the beams and plugs. However, it was over two hours before the first sling came onboard. Meal breaks were long necessitating the covering of open decks with plastic sheets to keep the cold air in. The cargo was not stowed very well, most of it was very crooked with large gaps between the deckhead and cargo. Gross hourly cargo rate is approximately 8 t.p.h.
Pilfering: There did not appear to be much pilfering. Keeping the offshore doors and the store rooms locked is a good precaution.
Early Morning Fog: On two mornings we had fog, clearing between 1030 and 1200 hrs.
Fresh Water: Available alongside the berth, appears to have no meter on it and we had to use our own hose and coupling. However pipe was left connected and we could top up whenever required.
Painting: No objection was made to painting the ship's side from a painting punt.
Lifeboat: Starboard lifeboat was used for a trip to the beach, boat however should not be landed because of the heavy swell.
SHIPMASTER'S REPORT: August 1979.
Navigation: Best chart is American. U.S. Chart No. 21301.
Anchorage: Recommended position with Cerro del Creston Lighthouse bearing 310° distant 2 miles in approximately 10 fathoms.
Approach: Straightforward but note that the small island off harbour entrance (Piedra Island) is often unlit.
Communications: Mazatlan Radio Station (XFL) has a range of 2,000 miles.
VHF: Pilots have Channel 16, also tugboats.
Pilots: Compulsory, board at anchorage or about 1 mile from breakwater entrance. Use a variety of craft. Board via pilot ladder.

No large ship movements permitted at night or during strong tidal streams.

Ro-Ro ferries, which also take Pilots in and out, have priority at all times.
Tugs: 1 only, low powered.
Draft: Presently restricted to 30 ft. salt water.
Cargo Facilities: Discharged 18,100 tons bulk soya bean in 10 working days. Discharge rate very dependent on transport and truck (rail) availability. 24 hour working with 6 gangs into hoppers. All grain type cargoes from South America must be fumigated if loaded onto road trucks, this takes approximately 2 days. Ships gear usually used for cargo operations.
Authorities: Require the following in addition to ship's certificates:

12 Crew Lists
12 Passenger Lists
2 Crew Effects Lists
Crew Passports
6 Stores Lists.

The meat store of the vessel may be sealed if the Government Inspector considers that the meat is from an unsuitable country.

Repair Facilities: Minimal, mostly involved with the upkeep and repair of very large fishing fleet.
Surveyors: Nil – Nearest ABS Surveyor is in Mexico City 350 miles away, but will attend at two days' notice.
Medical: Good local facilities with English speaking staff.
Provisions: Excellent fruit, fish and vegetables. Meat of poor quality and expensive.
Hatches: Mechanical hatches operated by crew. Essential to have adequate crew available at night in rainy season (August to October) while working cargo at night.
Watchmen: Not required or compulsory. Little thieving experienced.
Laundry: Excellent quality and price.
Cash: Both Mexican pesos and US Dollars available.
Time: GMT minus 7 hours.
Repatriation: Several flights daily from local airport direct to Southern and Western U.S.A. airports. This avoids having the Agents post a 'bond' if travelling via Mexico City.
Agents: Most have telex, either via Mexico City or direct international. Telephoning overseas reasonably efficient. Mail services 7 days to Europe.
Fresh Water: Available at piers – should be chlorinated prior to use.
Bunkers: Only diesel oil available – sole supplier Government owned 'Petromex'.
Shore Labour: Not available as heavy port congestion at present.
General: Mazatlan is one of the largest ports in Mexico, 6 berths and is also a large resort with excellent hotels and large numbers of tourists. It is also the largest fishing port on the West coast of Mexico.

Port delays – Bulk carriers 4 days.
– General cargo ships 2 days.

(As at mid August) – this could change for the worse once the rainy season starts.

MINATITLAN: 17.54 N. 94.35 W.

DOCUMENTS: See "Coatzacoalcos."
PILOTAGE: See "Coatzacoalcos Pilotage." Port about 17.5 miles up-river from Coatzacoalcos. Vessels are piloted either up-river or down-river to and from Minatitlan.
ANCHORAGE: Only at Coatzacoalcos. At Minatitlan river is narrow and anchorage not permitted.
RESTRICTIONS: Vessels may enter harbour only in daylight. Latest time for entry and sailing to and from Minatitlan is 1500 hours.
HEALTH: Pratique never given by radio. Vessels granted pratique at anchor at Coatzacoalcos. Vessels must prepare accommodation ladder, to be boarded by port authorities.
MAX. SIZE: Max. LOA at Pemex berths: 475 ft. Max. LOA at Fiscal berth: 440 ft. No breadth restrictions at both. Max. draft permitted: 21 ft. in fresh water.
TUGS: 1 tug required to accompany vessels past the Coatzacoalcos Bridge. Tugs rejoin vessels in the river on arrival at berth. Tug's lines used. For vessels over 2,000 g.r.t. 1 tug required, over 3,000 g.r.t. 2 tugs required.
BERTHING: Normally vessels dock starboard side to. Petroleos Mexicanos (Pemex) has 8 berths for tankers, where they can load crude, fuel oil, gasoline benzene, xylene, metaparaxylene, toluene and other petroleum derivates. Fiscal berth has a length of 80 m. depth alongside of 22 ft. Actually only used to discharge bulk harmless fertilisers. Discharge performed by elevator at a rate of 800 tons per 24 hours, also by ship's gear using buckets at a rate of 200 tons per day per hatch.
TANKERS: No ballast to be discharged in the river. All ballast to be discharged to shore tanks through 2×6 in. pipe-lines.
STEVEDORES: No ETA advice necessary. Agent or Receivers of cargo order gangs to discharge. Straight working hours from 0700 to 1500 Mondays through Saturdays. Latest time to order gangs 0645 and 1445 hrs.
DENSITY: Averages 1006.
MEDICAL: Hospital facilities available.
FRESH WATER: Available at all berths, but is not recommended.
FUEL: Marine diesel oil and Bunker "C" obtainable at Pemex berths. Bunker "C" also obtainable by barge, and diesel oil only by tank truck.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards remain on vessel while alongside.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.
REPAIRS: No dry docks available, but small repairs can be done in shore repair shops.
AIRPORT: About 15 minutes car drive away. Regular flights to Mexico City.
TIME: 6 hours behind GMT.
TELEPHONES: No facilities for placing telephones on ships.
AGENTS: See "Coatzacoalcos".

MORRO REDONDO, Cedros Island: 28.03 N. 115.11 W. **(See Plan Book)**

LOCATION: Morro Redondo: Bulk Salt Terminal 28° 10′ N. 115° 11′ W.
PORT LIMITS: The limits of the port consist of the federal and maritime zones found between the parallels of 28° 02′ 40″ North Latitude and 28° 09′ North Latitude on the Eastern coast of Cedros Island.
DOCUMENTS:

3 Crew Lists in Spanish, visaed by Mexican Consulate in previous port.
12 Ordinary Crew Lists.
3 Stores and Provisions Lists.
3 Lists of Crew Effects.
1 List of Crew Vaccinations.
Clearance from Last Port.
Certificate of Registry.

The authorities such as Port Health, Customs and Immigration together with the Agent will board after the vessel has berthed. Only in exceptional circumstances will the authorities board at anchor or off the berth.
PILOTAGE: Pilot arranged by Agent on the basis of ships ETA. Pilot boards when ship is within 1 to 3 miles of the berth, from a small MFV type pilot launch, painted black with white cabin and red deck. No radio.
ANCHORAGES: Good holding ground is found 1–3 miles North of the berth in 20 to 35 fathoms with the ship loading tower in line with the Morro Redondo lighthouse.
RESTRICTIONS: None. Vessels enter and clear 24 hours a day on a first come first served basis. Height of chute above MLLW is 48 ft.
MAX. SIZE: Minimum depth alongside 17 m. Largest ship to date 160,000 d.w.t.
HEALTH: Pratique granted by local doctor who boards on arrival. Requires Crew Vaccination Certificates and Master's Declaration of Health.
RADIO: Vessels can transmit and receive through KFS San Francisco Radio or KOK Los Angeles Radio.
VHF: Loading installation calls VHF Channel 16 when ship is expected and gives any information at this time. VHF is normally manned on Channel 12 so further communication is available.
RADAR: None.
TUGS: 5 tugs are available ranging from 2,500 h.p. to 3,200 h.p. each. 2 tugs are normally used for berthing, 1 tug for unberthing. Tugs' lines at no extra charge.
BERTHING: 1 berth only, 710 ft. in length consisting of steel dolphins and wood facings, also large mooring buoys, 1 ahead and 1 astern, each about 600 ft. distance from berth. 2 mooring ropes must be bent together each end to reach buoys.
CRANES: None.
BULK CARGO FACILITIES: Port is solely for the purpose of loading solar salt in bulk. Loader is belt and spout type and is fixed in position. Vessel must be shifted from hatch to hatch by ship's crew.
STEVEDORES: No special requirements. Average loading rate 2,000 t.p.h.
MEDICAL: No advance notice required, doctor will attend on board at dock. Limited hospital facilities available. Vaccination Certificates for smallpox required.
DENSITY: 1026.
FRESH WATER: Not available.
FUEL: Not available.
FIRE PRECAUTIONS: Smoking allowed on dock. Usual requirements for oil receiving terminal.
CONSULS: None.
REPAIRS: No repairs possible.
GANGWAY/DECK WATCHMEN: Shore gangway only, electrically operated and tended by stevedores. Deck watchmen required.
HATCHES: Opened and closed by ship's crew.
CARGO GEAR: One fixed loader only, controlled by stevedores.
REPATRIATION: Possible, with advance notice to Agent.
AIRPORT: Close to berth. Average 3 flights per week to mainland.
TIME: Standard time GMT minus 8 hours. Daylight saving time GMT minus 7 hours from last Sunday in April to last Sunday in October.
HOLIDAYS: Cargo is worked every day of the week including Sundays and holidays.
TELEPHONES: No telephone contact with mainland.
TELEGRAPH: Government public telegraph services available in village about 11 km. from port.
SHORE LEAVE: Allowed. No special shore passes required.
OPERATOR: Exportadora de Sal S.A.

NANCHITAL: 18.00 N. 94.27 W.

DOCUMENTS: See "Coatzacoalcos."
PILOTAGE: See "Coatzacoalcos Pilotage." Port about 3 miles up-river from Coatzacoalcos.
ANCHORAGE: See "Coatzacoalcos Anchorage."
RESTRICTIONS: Vessels may enter Coatzacoalcos only with daylight. Navigation from Coatzacoalcos to Nanchital remains closed from 1630 to 0700 hrs.
MAX. SIZE: Max. LOA 580 ft. No breadth restrictions. Max. draft permitted 27 ft. 06 in.
HEALTH: See "Coatzacoalcos."
TUGS: When vessels proceed to Nanchital, 1 tug accompanies to pass the Coatzacoalcos bridge, according to Port Regulations. Tugs again join vessels when arriving at Nanchital berths. Tug's lines used. For vessels over 4,000 g.r.t. 2 tugs used.
BERTHING: Normally vessels dock port side alongside. When current and circumstances permit vessel is turned around and docked starboard

side to. There are 2 docks at Nanchital, called Old Pier and New Pier. Both to load crude oil, No. 6 fuel oil by pipe-line of 6 in. and up to 10 in. Mooring, unmooring, connecting and disconnecting hoses performed by Pemex own labourers.
MEDICAL: Hospital facilities available only at Coatzacoalcos.
BALLAST: Special regulation for tankers that no ballast water to be discharged in the river. Deballasting performed by 2 pipe-lines of 6 in. diameter to shore tanks.
DENSITY: Average 1006.
FRESH WATER: Available at both berths but is not recommended for drinking.
FUEL: Available only at the Pemex Oil Terminal at any time.
CUSTOMS ALLOWANCES: No restrictions. Free use on board. 2 Customs guards stay on board. Vessel to provide them boarding and lodging.
CONSULS: None.
REPAIRS/DRY DOCKS: No dry docks available, but small repairs can be done in shore repair shops.
AIRPORT: At Minatitlan, about 1 hour car drive away. 2 regular flights to Mexico City.
TIME: 6 hours behind GMT.
TELEPHONES: No facilities for placing telephones on ships.
DEVELOPMENTS: Constant programmes for more berths, sheds, dredging and equipment are under way, but rather slow.

AGENTS: See "Coatzacoalcos".

PROGRESO: 21.17 N. 89.39 W.

DOCUMENTS:
- Crew List visaed by the Mexican Consul and 7 simple copies.
- Derat Exemption Certificate.
- Valid Smallpox Vaccination Certificates for all crew and passengers.
- Passports or Seaman's Book for all crew.
- Clearance from last Port of Call.
- Passenger List visaed by Mexican Consul and 7 copies.
- 6 Stores Lists.
- 7 Manifests.
- 7 Bills of Lading (2 to be visaed).
- Tonnage Certificate.
- Certificate of Free Pratique.

PILOTAGE: Compulsory. Pilot boards about 3.5 miles North of the lighthouse from a fast launch. International signals to be used to call Pilot day and night. ETA should be passed to Agent via radio station at least 24 hours before arrival.
ANCHORAGE: Vessels waiting for a berth anchor 3 miles off the Fiscal quay. The anchorage is marked on Chart H.O. 0966.
RESTRICTIONS: No night restrictions. Also see "Max. Size". No facilities for tankers.
MAX. SIZE: Max. LOA, 190 m. Max. draft 16 ft. (arriving), 16 ft. 06 in. (sailing).
HEALTH: The doctor boards the vessel at the quay. Where illness or fever is suspected on board, international rules are followed. If the vessel is arriving from another Mexican port, there is no health inspection. Radio pratique is not obtainable.

Authorities require Smallpox Vaccination Certificates for all crew and passengers, and valid Derat Exemption Certificates. No radio pratique prior to arrival obtainable.
RADIO: Progreso Radio XFN works from 0600 to 1900 hrs. every day and listens on frequencies 2,182 kc/s. and Channel 16 VHF on radio-telephony and 500 kc/s. on radio-telegraphy. Working frequencies are 2,756 kc/s., Channel 14, Channel 13 and Channel 12 VHF for radio-telephony, and 420 and 429 kc/s. on radio-telegraphy. ETA can be passed through this station 24 hours in advance.
TUGS: No tugs available.
BERTHING: One pier heading 355° true. Berth available on both sides, East and West, with 204 m. length on each side, and both with 18 ft. depth alongside.
STEVEDORES: No ETA advice necessary if stowage plan received in advance by Agent. Otherwise, ETA advice for gangs required 6 hours prior to arrival. Stevedores' General Cargo discharging and loading rate about 12 tons per gang/per hour.
MEDICAL: Attention available. The port has a clinic. Hospitals are situated in Merida.
TANKERS: No facilities.
DENSITY: Average 1015.
FRESH WATER: Available from pier by hoses. Fresh water is treated in the plant.
FUEL: Bunkers are available. Delivery by tanker truck equipped with pumps. Diesel and fuel supplied. Agent requires 24 hours notice.
FIRE PRECAUTIONS: No smoking allowed aboard vessels.
GANGWAY/DECK WATCHMEN: It is not necessary. Sometimes Masters require them.
OPENING/CLOSING HATCHES: This work is normally carried out by stevedores, but sometimes is carried out by crew in order to save time in loading or unloading.
CUSTOMS ALLOWANCES: Any quantity to be used on board is permitted.
IDENTIFICATION CARDS: Not necessary, but crew must carry passport or Seamans I.D.
CONSULS: The Consular Offices are located in Merida, the capital of State of Yucatan (20 minutes from Progreso by taxi):

Cuba	tel. 1 66 77	Lebanon	tel. 1 77 76
France	tel. 1 60 13	Switzerland	tel. 1 75 00
Germany	tel. 1 21 77	USA	tel. 1 60 30
Great Britain	tel. 1 67 99		

REPAIRS: Small repairs can be carried out in shore shops. No dry docks available.
REPATRIATION: There are facilities for effecting crew changes and arranging necessary repatriation. All matters are handled by the Office of Immigration.
AIRPORT: International Airport in Merida, about 30 minutes from Progreso by taxi. Daily services to Miami, Fla., by Pan American World Airways and New Orleans, La., every 2 days. Other flights to Central America, Jamaica, and Germany.
POLICE/AMBULANCE/FIRE: Police 5 00 26.
HOLIDAYS: January 1st; February 5th; March 21st; May 1st (Labour Day); September 16th (Independence Day); November 20th (Revolution Day); December 1st (every 6 years); December 25th; It is possible to work, paying 100% additional.
TELEPHONE: It is not possible to place telephones on board.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Harbour Master (Captain of the Port).

AGENT: Representaciones Maritimas S.A., c/o Fernando Patron Nicoli, 27th Street No. 112, Progreso, Yucatan, Mexico. No Telex. Tel. 5 00 52.

PUERTO MADERO: 14.44 N. 92.25 W. (See Plan Book)

PORT LIMITS: A vessel is considered an "arrived ship" when it is alongside the berth.
DOCUMENTS:
- 10 Crew lists (Spanish language), three stamped.
- 10 Passenger lists (Spanish language) three stamped.
- 10 Store lists (Spanish language).
- 10 Cargo manifest (Spanish language), three stamped.
- 3 Arrival reports.
- 10 Bills of Lading.
- 3 Crew customs manifest.
- 1 W.H.O. form.

All papers must be correct, immigration officer checks crew list against all passports/seamen's book.

Vessels are boarded on arrival by 7 officials.
PILOTAGE: Pilot boards vessel about 0.5 mile off the entrance. Pilotage is compulsory, the Pilot boat has VHF radio, (Channel 16).
ANCHORAGES: A good anchorage is about 2 miles S.W. of the breakwater head, in 7 to 10 fathoms, the bottom is of sand and mud, a long swell from seaward can be expected.
HEALTH: All smallpox certificates examined.
RADIO: Vio Manzanillo or Salina Cruz, ETA 48 hours and 24 hours prior to arrival.
TUGS: One small tug 750 h.p. is available.
BERTHING (Port under construction): There are 2 reaches, an expansion basin, a turning basin and a general cargo berth 150 m. length, the actual depth is 10 m. at LW (salt water), the maximum draft at present is 30 ft. (9.14 m.) and the maximum ship length is 175 m.

The first reach is entered on a heading of 043° (T) and passes between the breakwaters one of them 850 m. length and the other 650 m. length, the channel has 80 m. width. The second reach commences at the shore end of the breakwaters on a heading of 022° (T) for a distance of 250 m. The third reach is on a heading of 006° (T) and length of 650 m. At the end is the turning basin 320 m. wide and 350 m. length.

Vessels usually moor port side alongside and drop the starboard anchor with 3 or 4 shackle. The cargo handling is by means of ship's own gear and there are four conveyor belts for the handling of boxed bananas at a rate of 1,800 boxes per hour. The dry cargo (break bulk) handling rate is 18 metric tons/hour/hook (average).
CRANES: No cranes in the port.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Advice is required when carrying cargo for Puerto Madero.
MEDICAL: There are a few hospitals in Tapachula and they accept seamen. It is advisable to take precautions against malaria while staying in Puerto Madero.
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Only gas oil can be obtained by trucks.
FIRE PRECAUTIONS: Usual precautions.
CONSULS: British vice-consulate, Nicaragua, Guatemala, El Salvador.
REPAIRS: Only minor repairs.
DRY DOCKS: None.
SURVEYOR: None.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: 200 cigarettes, 50 cigars or equivalent 1 litre liquor or spirit.
REPATRIATION: No facilities.
AIRPORT: Tapachula International Airport, two flights daily to Mexico City.
TIME: GMT minus 6 hours whole year.
HOLIDAYS: 1st January, 21st March, Good Friday, 1st May, 16th September, 20th November, Christmas.
POLICE/AMBULANCE/FIRE: No telephone in the port.
TELEPHONES: See above.
SERVICES: None.
SHORE LEAVE: Seamans book is sufficient.
SHIPMASTER'S REPORT: February 1977.
Documents:
- 10 Spanish Crew List (7 Certified).
- 12 Passenger List (5 Certified).
- 6 Store List (6 Certified).
- 6 Priced Shop List.
- 6 Cargo Manifest (8 Certified with Bills of Lading for Puerto Madero Cargo).

6 Arrival Reports.
2 Health Part 1 and 2.
2 Crew Customs Manifest.

All the above papers were taken.

Officials: Immigration Officer boarded *with the Pilot*, checked all I.D. Cards and Passports against the Crew List.

15 People boarded on arrival, all in uniforms, i.e. Army, Navy, Police, Quarantine and Port Captain.

All bonded lockers were sealed as well as the beer room. All store rooms were checked.

Meals were provided for 11 people. 2 Customs Guards remained on board at all times, a room is required for them at night.

Pilotage: Compulsory. Pilot boards from a large, black hulled launch with a red superstructure, about 0.5 miles off the entrance.

Pilot speaks good English.

Approaches: New light structure, painted in red and white bands, and lying 0.3 miles North of entrance is conspicuous from seaward.

This light is expected to be in operation as from mid-February 1978, and will have the characteristics of the old one, lying 1 mile North, viz. Flash every 30 seconds. 2 rubble breakwaters 350 m. apart with red and green lights at their seaward ends are also conspicuous on Radar. All ranges into the port are marked with beacons and lights.

Turning basin is 280 m. in diameter, with a depth of approx. 10 m.

1 tug of 800 h.p. assists berthing, which is difficult. Berthing and unberthing should not be attempted during hours of darkness, nor when sea breeze is so strong as to hinder the attempt. Tidal streams outside the port are influenced by the wind. Tidal information is based on Standard Port of La Union, with a Secondary Port of Champerico, Guatemala, being used for Puerto Madero.

Anchorage: Anchorage may be obtained off the Port S.S.W. of the entrance about 0.5 to 1.5 miles off in mud, good holding ground.

Vessel arrived off the port in late January.

A heavy swell may however be experienced with a passage of a "Tehuantepecer" or of a Tropical Revolving Storm passing far out in the Pacific.

Depths in the roadstead may be between 12 to 16 m.

Max. Size: Max. size of vessel handled LOA 145 m. Beam 22 m. Draft 7.5 m.

Radio: Advise ETA 48 and 24 hours prior to arrival via any Mexican Coastal station.

Tugs: One tug of 800 h.p. assists in docking and undocking.

Berthing: One wharf at present in use, of 150 m. length, bulkhead type well fendered, depth alongside 10 m. on completion of dredging programme. Proposal for dredging out another wharf at right angles to the first also of 150 m. length and 10 m. depth, this to take place within the next 2 years.

1 Naval facility wharf in side channel and basin, pier 60 m. in length, depth alongside approx. 5 to 6 m.

Fishing pier also 60 m. long depth alongside 4 to 5 m. No other details known.

Cargo Handling: Ship's Gear, supplemented by 2 conveyor belt systems suitable for cartoned or boxed cargo.

Cranes: None, but mobile tower cranes may be obtained from Tapachula given sufficient notice.

Medical: Medical services available at Tapachula and San Benito, the Hospital will accept seamen.

Fresh Water: Fresh water laid on to principal pier, approx. delivery 12 t.p.h. Should be treated before drinking.

Fuel: Fuel pipe-line is built below principal wharf, but as yet, January 1977, is not connected to any fuel terminal. Fuel Oil may be obtained by road transport for the time being.

Repairs: Only minor repairs at present.

Communications: Road Service to Tapachula, thence air services are readily available to Mexico City, thence to all parts of the world.

Plans are in hand to build a large Airport complex near to Puerto Madero.

No port radio as yet, but future plans call for a Radio Station, and eventually Port Office will have VHF facilities.

Services: Provisions available from Tapachula if notice given. Deratting not available.

Consuls: There is a British Consul at Tapachula.

SHIPMASTER'S REPORT: August 1977.

Documents: Clearance from last port.
12 Crew Lists.
4 Store Lists.
4 Personal Effects Declaration.
1 Health Declaration.
2 Passenger Lists.
Ship's Register.
Deratting Certificate.

Pilotage: Pilot boards vessel 1 mile West of breakwater. Pilotage is compulsory. 48 and 24 hours notice to "Empresa de Servicios Portuarios de Puerto Madero".

Anchorages: 1.5 miles West of the breakwater in 8 fathoms of water.

Restrictions: No entering of port after 1800 hrs. No leaving of port before 0600 hrs.

Max. Size: Access channel 1,750 m. long, 10 m. deep, with an 80 m. wide bed. Turning basin 280 m.×325 m. and 8.5 m. deep. Pier 151 m. long, depth alongside 8.5 m. Pier equipped with cylindrical rubber fenders.

Tugs: 2 tugs available from November 1977.

Berthing: Loading and discharging operations with ship's gear. Dry bulk 28 m.t./hook hour (average). Sheds to handle banana shipments and conveyor belts, handling with side-ports system and average loading speed of 1,700 boxes per hour.

Fresh Water: Available from pier.

Gangway/Deck Watchmen: Security service rendered.

Time: GMT minus 6 hours all through the year.

Airport: International airport in Tapachula.

Services: The following services can be found in Tapachula City, Chis., 23 km. away from the port: Ship chandler service, mechanical and electric repair shops, hospital, telephone, telegraph and telex.

SHIPMASTER'S REPORT: October 1978.

Pilotage: Compulsory. Pilot boards 1 mile S.S.W. of North Breakwater, 24 hours and 12 hours notice required.

Restrictions: Limits of channels and Turning Basin are not marked. Daylight berthing and unberthing only.

Max. Size: LOA. 160 m. Beam 25 m. Draft 27 ft.

Anchorage: 0.5 – 1.0 mile from North Breakwater, depth 45 ft.

Health: Quarantine Officials require 24 hours and 12 hours notice of vessels arrival.

Radio: Salina Cruz.

VHF: Pilot and Port Authority on VHF Channel 16.

Tugs: One tug, 750 hp.

Berthing: General Cargo Berth: 2,200 m. from entrance. Max. size. LOA – 160 m., Beam 25 m. and max. draft 27 ft. Vessels size limited by width of turning basin. Least depth of water from sea to berth 9.0 m.

There are 6 hoppers available for bulk cargoes. No Ro-Ro facilities. No floating cranes. Security is good, berth surrounded by wire fence with only one entrance.

Density: 1025.

Consuls: British Vice-Council in Tapachula.

Services available: Fresh water; Fresh provisions (with 24 hours notice); Telex (at Tapachula); Doctor and Hospital; Airport (at Tapachula) 2 flights daily to Mexico City; groceries and meals (24 hours notice).

AUTHORITY: Capitania de Puerto, Puerto Madero.

AGENTS: Jose Antonio Tellez, P.O. Box 198, Tapachula, Chiapas (Province), Mexico. Tel. Office 612–40, Home 622–54.

Fruit Agent: Jose Leyba, P.O. Box 311, Tapachula, Chiapas (Province), Mexico. Tel: 615–31.

ROSARITO: 32.20 N. 117.05 W. (See Plan Book)

SHIPMASTER'S REPORT:

GENERAL: There is no port chart or approaches to Rosarito.

There are 3 sea berths only, 2 using anchors and stern buoys, and 1 single point mooring platform due to come into service in 1976. There is a continuous Westerly swell (July) and the berth is very exposed. Discharging a full cargo, it is advisable to commence ballasting as soon as possible to maintain a reasonable draft. There is no objection to this by the receivers.

DOCUMENTS: As for other Mexican ports re visaed Crew Lists etc. Suppliers in Curacao supplied all cargo documents with correct number of copies.

PILOTAGE: Pilot boards about 1 mile West of the berths from a black pilot launch equipped with VHF Channel 9. He speaks good English. The Boarding Officer boards with the Pilot. He speaks no English. The Pilot and Boarding Officer remain on board throughout cargo operations, also pilot/mooring launch is at hand at all times. All cargo operation liaison with the shore is by VHF operated by the Boarding Officer, who also does all Customs, Immigration work, etc., with the Pilot as interpreter.

APPROACHES: Straight forward, with a shelving bottom and ample depth of water up to the berths. Anchorage was found about 1.2 miles off the South buoy berth in 14 fathoms with good holding. Approach in poor visibility, common at this time of year, presented little difficulty once a position of berths is ascertained. Coronado Islands are good radar targets for position fixing.

RADIO: Communications to Agents in Ensenada through Manzanillo Radio XFM and then Ensenada Radio XFE on HF.

Petroleos Mexicano (PEMEX), the Charterers, have their own station at Rosarito which supplies berthing instructions etc. Station XIB83 working on 8690 mHz and 500 kHz. They also keep a listening watch on VHF Channel 9.

OPERATIONS: Local flag tonnage gets preference for the berths. This should have little effect with the single point mooring coming into operation shortly, giving 2 product berths.

The pipe-line is handled by ship's staff. All ullaging etc. done by ship's staff. A comparison between ship's figures, Bladings and shore figure is made on completion of discharge, before clearance is issued by the Boarding Officer.

No difficulty was encountered in maintaining the requested back pressure of 6 kg. at the manifold using 1/2 pumps. Liaison with the shore is excellent, by Boarding Officer on VHF with hourly checks.

SUPPLIES: No bunkers or fresh water. Provisions can be obtained in small quantities but are difficult to get on board and expensive. Medical assistance can be obtained ashore, but again with the difficulty in getting ashore it would be only in a serious case.

AGENTS: Only communication was on the second day by VHF but did not attend on board ship. This may be explained by the fact that due to the heavy swell it is difficult and sometimes dangerous to clear the breakwater by boat. This is endorsed wholeheartedly by Officers joining the vessel. However they were well attended by the Agent ashore. It is recommended that this port is not used for reliefs unless absolutely necessary. There was no shore leave allowed by me due to this.

SAN CARLOS: 24.47 N. 112.08 W. (See Plan Book)

PORT LIMITS: The limit of the port is up to parallel 24° 39′ 41.5″ N. which passes through the position of the East buoy of the channel entrance on Mexican Chart F.H.614.

DOCUMENTS:

Port Captaincy:
- Clearance from Last port
- Crew List.
- List of Passengers.
- Voyage memorandum including dates and ports visited during the previous 3 months.

Ports Operations:
- Stowage plan.
- Certificate of cargo handling equipment on board.
- List of peculiarities of the vessel.

Health:
- List of Vaccination Certificates of the crew.
- List of Vaccination Certificates of passengers for the port.
- Certificate of deratting or exemption.

Immigration:
- Visaed crew list.
- List of passengers for the port, also visaed.

Maritime Customs: Vessels without cargo, and arriving from abroad:
- Declaration of arrival in Ballast.

Vessels coming from abroad with cargo for the port:
- General Manifest for the port.
- List of passengers for the port.
- List of explosives, corrosives, inflammables for the port, visaed.

Vessels coming from a Mexican port to load:
- Customs clearance.

Vessels coming from a Mexican port to unload:
- Customs Clearance.
- Cargo Manifest, visaed.
- List of passengers for the port.
- List of explosives, corrosives, inflammables for the port.

Inspection of Animal Health:
- List of meats (tinned or fresh or refrigerated or in deep freeze).

Vessels bringing animals to the port:
- Veterinary Health Certificate.
- Transport Permit.
- List of Meats (See above).

Inspection of Vegetable Health:

When products are not brought for discharge: Deratting Certificate or Exemption.

When products brought for discharge:
- Deratting Certificate or Exemption.
- Vegetable Health Certificate.
- Importation Permit from the Secretariat of Agriculture and Cattle breeding of Mexico.

PILOTAGE: The port captaincy has VHF Channel 16 for receiving. ETA's. The Pilot comes on board vessels by motor launch from San Carlos two miles from the entrance to the channel.

ANCHORAGES: Any location between meridians 112° 05.0′ W. and 112° 03′ W. and parallels 24° 38.5′ N. and 24° 37.5′ N. depths approximately 105 ft., sandy bottom.

RESTRICTIONS: With 26 ft. draft, vessels may navigate the Channel between buoys 'C' and 'D' to '5' and '8'. With a tidal rise of 4 ft., vessels enter and leave with a draft of 30 ft. at high tide.

MAX. SIZE: LOA. 600 ft. beam 100 ft. and draft 30 ft.

HEALTH: When coming from abroad, hoist the yellow flag. Inspection is effected when the vessel is berthed or at the inner anchorage. If the vessel is coming from another Mexican port, the health authority's visit is not necessary.

TUGS: None available.

RADIO: La Paz Coastal Radio: Call sign "XFK".

VHF: Port Captaincy on VHF Channel 16, operates between 0800 and 1800 hrs.

RADAR: This service does not exist.

BERTHING: The 'L' shaped quay is made of concrete and has 102 m. of berthing length. There are two "Dukes of Alba" making up a length with the quay for berthing of 204 m. Also there are two mooring buoys, one at each end of the berth. The minimum depth at low water is 37 ft. in the berthing area. Loading and discharging is effected using the vessel's own gear. It is possible to work in 2 or 4 gangs, according to the type of vessel and cargo.

CRANES: None.

BULK CARGO FACILITIES: On the quay there are installations of "CONASUPO" with a tower for shipment of grain, located in the angle of the 'L'. The grain generally shipped is wheat at the rate of 200 t.p.h. The height of the end of the grain output tube above sea level at full tide is 12 m.

SPECIALISED CARGO HANDLING FACILITIES: Vessels berth at the same quay as above with ammonia, unloading by means of installations located in the angle of the 'L'. These installations are owned by Fertimex.

BRIDGES: None.

STEVEDORES: Vessel's Agent submits a request 24 hrs. in advance for stevedoring services through the Superintendent of the Port Operations. Three products are mainly handled in the port: cotton at a rate of 90 bales per hr. gang. Bulk wheat at a rate of 200 t.p.h., bagged at the rate of 25 t.p.h. Fertilizers in bags at a rate of 25 t.p.h. Since the mechanical equipment on shore is sufficient for 2 gangs in the case of cotton, stevedores are requested for this number of gangs. As far as wheat is concerned, the loading rate drops to 80 t.p.h. when the warehouse has little wheat in it.

Stevedores work from 0800 hrs. to 0200 hrs. of the following day i.e. they work 18 hours in 24 hours.

MEDICAL: There is a civil hospital in Ciudad Constitucion 45 minutes away from San Carlos. There is a telephone service available for calling ambulances. There are 6 doctors in the port.

TANKERS: No facilities.

DENSITY: 1023.

FRESH WATER: This is supplied when the vessel is berthed. There are various 2 in. hydrants. The rate of supply is 10 t.p.h., and the approximate cost is 6.90 Mexican Pesos per ton.

FUEL: Moderate quantities of diesel oil can be supplied, and it is brought by road tanker from La Paz, the vehicles themselves pumping supplies to the vessel.

CONSULS: There are no consuls in the port.

REPAIRS: There are workshops at Ciudad Constitucion 45 minutes away by road.

DRYDOCKS: None.

GANGWAY/DECK WATCHMEN: This service does not exist.

HATCHES: Hatches are opened and closed by the stevedores.

SURVEYORS: None.

CUSTOMS ALLOWANCES: Tobacco, wine and spirits are placed under seal.

CARGO GEAR: For loading and discharge, ships' gear is used. There are no cranes in the port.

REPATRIATION: There are Immigration Authorities in the port. There are no hotels, however, there are several in Ciudad Constitucion and in La Paz. La Paz, is the capital of the State of Southern Lower California and is approx. 3 hours away by road.

AIRPORT: None in the port. Airport at La Paz where there is an international airport called General Marquez de Leon.

TIME: Time is that of meridian 105° W. There are no seasonal time changes.

HOLIDAYS: 1st January, 5th February, 21st March, 1st May, 16th September, 20th November, 25th December, and 1st December (every 6 years). These dates are all obligatory.

POLICE/AMBULANCE/FIRE: In the port there are municipal and prison police, telephone No. 25. Ambulance and fire fighting services come from Ciudad Constitucion.

TELEPHONES: No service for installing phones on board vessels, but in the port there is a telephone service for communications with any part of the world.

SERVICES: None available.

SHORE LEAVE: No restrictions.

IDENTIFICATION: Seaman's book is sufficient.

REGULATIONS: No naked lights when there is cotton in the port o ammonia is being discharged.

DELAYS: As there is only one berth, there are times when the berth is occupied, but this does not occur often. Berthing is done in shifts.

DEVELOPMENTS: At the moment, there is no programme.

GENERAL: *Post Office:* At the moment, there is no Post Office in Sa Carlos.

Telegraph Office: There is a telegraph office but the service is not fo maritime traffic. For such purpose, vessels must send their ETA via L Paz Coastal Radio Station.

SHIPMASTER'S REPORT: 1976.

Documents:
- Visaed Crew List by Mexican Consul and 9 copies.
- Visaed Cargo Manifest from each loading port and 4 copies.
- Derat Exemption Certificate.
- Valid Smallpox Certificates for all on board.
- Passport or Seamen's Book for all on board.
- Clearance from last port of call.

Approaches: A very strong current was experienced running from S.E.-N.W. when entering Bahia Magdalena at Pta. Redondo. Caution should be exercised making this approach, because currents can be strong and unpredictable in this area.

Pilotage: Compulsory. Pilot boards at Lat. 24° 39′ N. Long. 112° 05′ W from small boat with outboard engine.

Anchorage is also good in this position should it be necessary to awai Pilot or berth. The 2 buoys marking the entrance make good rada targets and are distinctive.

Restrictions: Channel must be navigated at suitable time of tide giving careful consideration to vessel's draft, in order to clear numerous shallow patches. Max. draft to date of vessel navigating channel was 30 ft. 4 in. on top of high water.

Radio: La Paz Radio (XFK) 500 kHz and 441 kHz. Working hours appear to be uncertain, but there is a working arrangement with Agent to transmit messages free of charge.

Charts: Chart used to navigate channel was Mexican No. FH. 614 Masters are strongly advised to obtain this chart.

Berthing: 1 pier 420 ft. long.

Fresh Water: Available at pier at 10 t.p.h.

Communications: Very poor. No telex, No telephone and no cable service. Telephone available at Villa Constitucion 57 kms. away by paved highway. Plans are in force to introduce a telephone service in the fairly near future.

Consul: If consular advice is required it is best to contact the British Embassy in Mexico City. Tel. 5 11 48 80.

Laundry Service: None.

Ship Chandler: None. A pick-up wagon can be supplied by Agent to obtain essential stores from supermarket at Villa Constitucion.

AUTHORITY: Capitania de Puerto de San Carlos.

TAMPICO: 22.16 N. 97.47 W. (See Plan Book)

PORT LIMITS: Vessels in Mexican ports are considered to be arrived vessels as soon as permission to moor has been granted by the Port Authorities.

Permission to tie up will be granted on the quay or whilst in mid-stream, and occasionally during periods of very good weather a vessel is authorised to anchor in the port entrance.

DOCUMENTS:

1 Crew List visaed by Mexican Consul.
9 simple copies of Crew List.
1 Visaed Cargo Manifest from each loading port.
4 simple copies of Cargo Manifest.
1 Visaed Passenger List or visaed Statement to the effect of no passengers, and 5 simple copies.
2 copies of Store List.
2 copies of Personal Effects List.
Derat Exemption Certificate.
Valid Smallpox Vaccination Certificates for all crew and passengers.
Passports or Seaman's Books of all crew.
Clearance from Last Port of Call.
3 copies of lists of packages containing explosives, inflammable or corrosive materials.

PILOTAGE: Pilot ordered by Agent who requires 24 hours notice of vessel's arrival. Pilots board vessels 2 miles off the breakwater. Vessels may anchor about 2 miles off the breakwater waiting for Pilot. Pilots have radio-telephone, frequency 2182 and VHF Channel 16.

ANCHORAGE: About 2 miles East of breakwater in 40-60 fathoms of water.

RESTRICTIONS: There are no restrictions for movements at night. The drafts of the vessels will be governed by the mooring zones in which they are working. The depths at these berths are as follows:

*Free Zone Quay	30 ft.
Minera Autlan Quay	32 ft.
Petroleos Mexicanos Quay	30 ft.
Mexican Gypsum Quay	26 ft.
Metals and Minerals Quay	29 ft.
Anahuac Cement Quay	23 ft.

The navigation channel to the Mexican Petroleum Maritime Terminal has a depth of 38 ft. and that to the Free Zone 31 ft.

*This depth is subject to constant dredger maintenance, the draft being reported weekly to the Ship Agents.

MAX. SIZE: The max. length is 656 ft. There are no restrictions for beam. The drafts will be those admissible in the corresponding berth used.

HEALTH: No radio pratique. Pratique granted after docking and presentation of documents to Port Authorities. In case of disease or fever on board, Master to give notice to Agent before arrival.

RADIO: Tampico has a coastal station with frequency 2182, as have the Port Captain, the Pilots' Office and Gulf Tugs' Office. All have the same frequency and VHF Channel 16.

TUGS: 3 tugs are available, intended solely for port manoeuvres, comprising *Guayalejo* 2,000 h.p., *Tamesi* 1,000 h.p., and *Panuco* 800 h.p. Also Petroleos Mexicanos have tugs whose power varies between 1,000 and 3,000 h.p.

BERTHING:

1 berth at the Minera Autlan quay where manganese is moved by moving belt at the rate of 1,200 t.p.h.

5 berths at the Pemex Quay, where oil and its derivates are moved at the rate of 600-800 t.p.h., by means of 4 in., 6 in., 8 in. and 10 in. pipes.

1 berth at the Mexican Gypsum quay where calcium sulphate is moved by moving belt at the rate of 500 t.p.h.

2 berths at the Metals and Minerals Quay, where bulk minerals are moved by 4 moving belts at the rate of 125 t.p.h. per belt.

1 berth at the Anahuac Cement quay, where bulk cement is moved by means of 10 in. pipes at the rate of 250 tons per pipe, there being 2 ducts.

7 berths at the Tampico Free Zone, where general cargo is moved at the rate of 20 t.p.h. per gang.

Berth	*Length*
1	145 m.
2	145 m.
3	145 m.
4	145 m.
5	145 m.
6	145 m.
7	180 m.

Depth alongside 10.5 m. Official fresh water draft 9.14 m.

All quays have lighting for night operation and telephone facilities.

STEVEDORES: No ETA advice necessary of Stowage Plans received in advance by Agent, otherwise ETA advice for gangs appreciated 48 hrs. prior to arrival. Stevedores general cargo discharging and loading rate about 20 t.p.h. per gang. Mineral loading at Metals Pier about 125 t.p.h. per belt (2 conveyor belts available to service both berths).

MEDICAL: Hospital facilities available. No advance notice required.

TANKERS: See "Berthing". Dirty ballast is received ashore.

DENSITY: Average 1006.

FRESH WATER: Available on written request from ship's Agent. Drinking water delivered by pump at the rate of 12 cu.m. per hour.

FUEL: Available preferably at the Petroleos Mexicanos Quays, although with 1 week's advice prior to arrival this service can be provided at the public service quays.

CUSTOMS ALLOWANCES: No allowances to be taken ashore, but reasonable amounts of tobacco and spirits are allowed to be taken out of bond, but to be kept on board for use of crew and passengers only.

CONSULS: Belgium, Brazil, Great Britain, Peru, Germany, Holland, Norway, Sweden, Italy, Uruguay and Lebanon.

REPAIRS/DRY DOCKS: There is a floating dock with capacity up to 4,000 gross tons, where hull repairs can be effected, as can work on steering system, machinery, marine auxiliaries and other equipment of less importance.

There are specialist workshops attached to the dock.

GANGWAY/DECK WATCHMEN: No watchmen necessary. Customs guard keeps watch at gangway while vessel alongside.

REPATRIATION: In the port there is an office of the Administrative Secretariat, where the repatriation of any crew member can be negotiated. This negotiation will be for the account of the ship's Agent, who is required to deposit a bond of $20,000 per person.

AIRPORT: At a distance of 10 km. from the port, there are regular flights to Monterrey, Nuevo Laredo, and Mexico City with connections in any direction.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st; February 5th; March 21st; May 1st; September 16th; November 20th; December 25th; December 1st every 6 years.

FIRE/AMBULANCE/POLICE: Fire Department 2 12 22; Red Cross 2 13 33; Police 2 11 57; Police (Jail) 2 10 32.

DEVELOPMENTS: Constant programming for more space at wharves, sheds, warehouses, continuous dredging and increasing capacity of operational equipment.

SHIPMASTER'S REPORT: September 1980.

Pilotage & Radio: 2182 does not appear to be in use but 500 kc/s. and VHF are the popular mode, most Agencies having the latter.

Restrictions:

Minera Autlan Quay for manganese loading: 33 ft.
Muelles des Minerals (Metals & Minerals Quay): 30 ft.

Max. Size: All vessels in river berths moored starboard side to, head up, and if at Muelles des Minerals and over 500 ft. length, the vessel will have to drop down river stern first before turning aided by tugs.

Berthing: Muelles des Minerals: This open apron berth adjacent to the railway sidings at Colonia del Golfo is situated before the sharp bend leading to the main wharfage at Tampico and the bulk cement wharf by the entrance to the Canal Cortadura.

The method of loading is to wheel portable belts adjacent to the hatch in conjunction with another belt lifted aboard and a chute that is suspended from the vessel's gear and braced for direction by guys.

The mineral is dumped into the hopper at the lower end by bulldozer and it will depend upon the situation of the pile as to the speed that can be obtained. Thus if the cargo is in railway gondolas it will be grabbed out by rail cranes into trucks for transport to the apron where a pile is created for the 'dozers, a method which has several areas of slow working or waiting time.

Ideally the cargo has been stockpiled on the rear side of the quay from which it can be lifted directly by the 'dozers for dropping into the belt hoppers. It is this system that can achieve a good rate.

Fresh Water: Observed delivered by road tanker.

AUTHORITY: Superintendency of Port Operation.

AGENTS: Representaciones Maritimas, S.A., Edificio Luz - Piso 5 Despacho 523, Tampico, Tamps. Mexico. Tel. 2 34 77 and 2 46 62. Telex 01430. Cable: "Maritimex, Tampico".

VERA CRUZ: 19.12 N. 96.08 W. (See Plan Book)

PORT LIMITS: Area bounded by the reef lighthouses outside the breakwater.

DOCUMENTS: See "Coatzacoalcos".

PILOTAGE: Compulsory, advise Agent 24 hours before arrival giving name, flag, ETA and draft.

The Port Captain is to be given a min. of 2 hours' notice by the Agent. This to be done between 0800–1800 (Pilot office hours). Orders for Pilots between 1800-0800 hrs. to be made between 0800–1800 hrs.

The Pilot normally boards within the port limits, but if his services are requested outside such limits the Pilot will proceed to the location, i.e. the anchorage.

The pilot launch leaves from a "T" shaped pier when expected vessel is sighted. The launch has a black hull with white superstructure and false funnel painted black.

ANCHORAGE: In good weather, vessels may anchor in the outer area off the port, in the case of bad weather, to the South of the Isle of Sacrifices (Isla de Sacrificios). If the vessel prefers to anchor within the port limits, it must request the services of the Pilot and on anchoring for its own account within this sector must pay the fees due to the pilotage service.

RESTRICTIONS: In normal weather conditions there are no restrictions on entry and departure, the sole consideration being the draft of the vessel, since if this exceeds 29 ft. the time of the tide must be taken into consideration, and also after a strong North wind, a vessel drawing more than 24 ft. must wait for the tide. Depth in access channel 10.5 m.

MAX. SIZE: Length 200 m., at berth nos. 4 and 6 or the oil terminal.

HEALTH: The International Health Office gives a 24-hour service for the arrival and departure of vessels. To obtain free pratique on arrival of vessels there is a medical inspection, with submission of the Maritime Health Declaration, signed by the Captain, and examination of documents of Derat Certificate, certificates of vaccination of the crew and passengers; smallpox, cholera, yellow fever, (dependent upon the location from which the ship has come). Examination of crew members or passengers who might be declared as suffering from contagious illnesses. With these formalities fulfilled, free pratique is granted. Free pratique can be granted by radio, provided it is considered that the vessel's arrival will not give rise to the introduction or propagation of illnesses covered by the regulations, and that also the following requirements are fulfilled:

1. Exercise of greater epidemiological vigilance in respect of illnesses covered by International Health Regulations.

2. The Captain's radiogram must be presented to the International Health Delegation 8 hours in advance and must invariably fulfil all the stipulations as set out in the attached form.

3. Without prejudice to the foregoing, the Health Doctor or whomsoever he may designate, and where it is considered appropriate, shall go on board for the purpose of receiving the Maritime Health Declaration so that enquiries and verifications as may be considered necessary may be carried out.

Once the vessel has called at a national port, in subsequent national ports the requirements for obtaining free pratique will not be required, provided there does not exist on board any alteration in the health conditions as established in the Maritime Health Declaration.

Medical service to crew members and passengers on board foreign flag vessels is provided by doctors and private hospital institutions, through the intermediary of the consignee ship's Agent.

For possible handling of disease covered by the Health Regulations (smallpox, cholera, yellow fever, bubonic plague), there are isolation wards in the Official Hospitals "Aquiles Serdan" and "Regional de Veracruz".

The Office of International Health has immunisation services required for the diseases covered by the Regulation, which are certified on special international forms, with any cost, to crew members and passengers.

RADIO: Radio station Vera Cruz Radio, call sign XFU. Transmits on 420 and 451 kHz. and listens on 425, 454, 463 and 480 kHz. Also VHF Channels 12, 16, 26 and 27.

TUGS: 4 tugs available, 810, 900, 1,000 and 1,200 h.p.; tugs' lines used at no extra charge. Tugs join vessels inside breakwater.

BERTHING:

Berth	*Capacity*	*Length (m.)*	*Depth (m.)*
No. 1	2 vessels	361.00	10
No. 2	5 vessels	431.00	9 to 10
No. 4	5 vessels	795.00	9 to 10
No. 6	5 vessels	725.00	9 to 11
No. 7	5 vessels	548.00	6 to 8
Marginal	3 vessels	682.00	9 to 10
Pemex	2 vessels	958.00	10

STEVEDORES: *Handling rates:* General cargo, 12 tons/per hook hour. Bulk cargo, 30 tons/per hook hour.

BULK HANDLING FACILITIES: Handling of grain at a mechanised plant, with storage capacity of 25,000 tons and an average discharge rate of 250 t.p.h. and loading rate of 400 t.p.h.

Handling of bulk sugar by mechanised installations, with storage capacity of 40,000 tons and an average loading rate of 800 t.p.h.

Handling of aluminium, coal brickettes, cement, latex, crystallised honey, chemical products, vegetable oils and crude oil.

MEDICAL: Doctors, dentists and hospital facilities available (see "Health").

TANKERS: Petroleos Mexicanos berth located in Northern part of port. Max. draft 28 ft. Berthing for 2 vessels of 170 m. LOA. Berth provides 5×8 in. lines for discharge of refined product and 2×12 in. lines for fuel oil.

DENSITY: 1025.

FRESH WATER/FUEL: Available.

REPAIRS: Hull and machinery repairs can be effected by "Astilleros de Veracruz" (Vera Cruz Shipyard Company).

DRY DOCKS: "Astilleros de Veracruz S.A." has 4 docks, 2 floating and 2 dry docks. The largest of them is Floating Dock No. 4 with the following characteristics:

Length on stocks	169.210 m.
Internal useful beam	30.400 m.
Height of keel stocks	1.400 m.
Max. draft on keel stocks	8.200 m.
Lifting capacity	30,000 d.w.t.

Dock No. 2: with capacity for vessels up to 10.000 tons

Useful length	154.000 m.
Useful beam	19.400 m.
Draft	5.180 m.

Served by a 45 ton capacity crane

Floating Dock No. 3: with 3,000 ton capacity lifting capacity

Useful length	25.900 m.
Useful beam	13.550 m.
Draft	5.800 m.

Served by 2 (two) cranes of 10 ton capacity each.

Dry Dock No. 1

Length	45.720 m.
Useful beam	7.920 m.
Draft	2.130 m.

SURVEYORS: Lloyds, Norske Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Mechanical hatches usually opene by crew, otherwise by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits pe man and will attend as necessary for further issues.

CARGO GEAR: Piers 1 and 2, 4×20 tons, 6×10 ton, 3×5 ton and 10× ton mobile cranes. Various cranes at piers 4 and 6. 2 floating crane available max. lift 46 tons.

REPATRIATION: Possible, arranged by Agent.

AIRPORT: 8 km. from Vera Cruz, flights daily to Mexico City.

TIME: GMT minus 6 hours all year round.

HOLIDAYS: During the year the following holidays are observed: 1 January, 5th February, 21st March, 1st May, 5th May, 16th Septembe 12th October, 20th November and 25th December.

POLICE/FIRE/AMBULANCE: Police – 2.28.23, Fire brigade – 2.25.0 Red Cross – 2.01.40.

TELEPHONES: Available on most piers but not on vessels.

SERVICES: Provisions, laundries, and dunnage available. Garbag must be removed every 48 hours.

SHORE LEAVE: Possible.

DEVELOPMENTS: A new petroleum quay is to be constructed to take tankers of 40,000 tons.

Container berth under construction, a transtainer, portainer crane ar other equipment will be acquired in the near future.

GENERAL:

Government Secretariat – Local Administration Office

In accordance with the stipulations of Article 75 of the General Loc Administration Law, vigilance of foreign crew members in vessels of ar nationality tied up in national ports, together with visits or stays by th said crew members will be subject to the following requirements:

I. Heads of Local Government will designate accordingly personn who will carry out vigilance of the vessel, in accordance with th provisions of Section II of Article 29.

II. Crew members may visit ports during the stay of the vesse provided they deposit at the Local Administration Office their identi documents which for such purpose may be issued to them and the passports and other documents, all of which will be returned to them c re-embarkation.

III. Shipping companies, their Agents or consignee firms, for all leg purposes shall be responsible for the complete embarkation of cre members and for the costs involved in repatriating any who may rema behind after the vessel sails. When a crew member wishes to stay in th country, he must obtain documentation in compliance with one of th categories as set out in the appropriate Law and Regulations.

SHIPMASTER'S REPORT:

Documents:

1 Visaed and 9 Plain Spanish Crew Lists.
1 Visaed and 5 Plain Passenger Lists.
1 Visaed and 2 Plain Spanish Stores Lists.
2 Crew Customs Declarations.
5 Cargo Manifests.
1 Arrival form.

The Customs require a complete list of all shop goods priced in U.S Dollars, failure to produce this will cause confiscation and $10,000 fin The Customs thoroughly check bond and beer locker and seal same. A storerooms are also checked.

The Agricultural Inspector insists that all dry stores are fumigated an kept under seal for 24 hours. All refrigerated stores – except U.S.A meat is sealed up.

Pilotage: Pilot boards 1 mile W.N.W. of Angeguda de Adentro Lig beacon from black boat flying pilot flag.

Tugs: 2 tugs available for berthing.

Restrictions: Port open day and night. Prevailing Northerly winds ar sometimes too strong to allow ships movement in harbour.

Health: Health authorities board after berthing.

Radio: ETA to be sent 48 hours in advance via XFB Cuidad d Carmen. Agent orders Pilot.

Fuel: Bunker C and Diesel are available. A mixing machine is bein installed to supply intermediate. Bunkers are supplied from most quay and are expensive for foreign ships.

Consul: There is a British Consul.

Repairs: There are 3 drydocks and all repairs can be done.

Surveyors: There are Lloyds and N.B. Surveyors available.

Airport: The airport is 6 km. from Vera Cruz with twice daily flights t Mexico City.

AUTHORITY: Port Captain.

Monaco

MONACO: 43.44 N. 07.26 E. **(See Plan Book)**

PORT LIMITS: The seaward boundaries of the port are materialized by the 2 breakwaters at the Eastern entrance.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists – 3 Landing Passenger Lists.
2 Store Lists.
1 Manifest (cargo).
1 Bill of Health.
Ship's Register.

PILOTAGE: ETA via Monaco Radio – Channel 16, 12, 23, 15, within range. Pilot boat is a small white tugboat with a black "P" painted on the hull. Meets vessels 1 mile radius from the harbour entrance.

ANCHORAGE: One half mile East of the Southern breakwater lighthouse. Depth at the anchorage 68 m.

MAX. SIZE: Max. length 130 m. Stern to the pier on the West side or alongside the North quay, only from October to March and with 8 days notice. Max. draft allowed: West Pier 8 m; North Quay, 6 m.

HEALTH: Health Declaration must be handed to the Customs. If coming from neighbouring countries (France, Italy, Spain) not requested.

RADIO: Monaco Radio VHF Channel 16. Port operations Ch. 12. Public telephone calls Channel 23 and 25.

RADAR: No port radar service.

TUGS: Pilot boat 96 h.p. available without notice. 1 tug boat 200 h.p. with notice and 1 tug boat 450 h.p. Available with notice.

BERTHING: All 3 quays plus inner sides of the breakwaters and Western "T" pier are available for mooring yachts stern to. The port may be congested during the Summer season. The possibility remains of anchoring off the dock.

MEDICAL: There is a state hospital fully equipped for surgery etc.

FRESH WATER: Can be supplied at all berths alongside the quay. If vessel on roads, water may be provided by barge up to 500 tons per day, with one week notice. Tel. Cannes 39.36.12.

FUEL: There is a fuel berth in port for yachts. No heavy fuel.

CONSULS: Most countries are represented in Monaco.

CUSTOM ALLOWANCES: Same as in French ports.

REPAIRS: Only for yachts.

DRYDOCKS: None.

REPATRIATION: Good railway connections.

AIRPORT: Nice – Cote d'Azur. Distance 25 km.

TIME: May to September GMT plus 2 hours. Other months GMT plus 1 hour.

HOLIDAYS: New Year – National Holiday, (Jan. 27); Easter Monday, (May 1); All Saints Day – His Serene Highness' birthday Nov. 19. Harbour services work on Sundays and Holidays.

POLICE/FIRE/AMBULANCE: Maritime police Quai Antonie 1st Tel. 30.22.39; Ambulance/Police Secours Tel. 17; Fire brigade Tel. 18.

TELEPHONE: Available at all berths.

SERVICES: Engine repairs. Electronics. Maintenance for yachts. 220 volts available at all berths. TV aerial sockets at all berths free of charge.

SHORE LEAVE: Crew members allowed ashore.

DEVELOPMENTS: The new yacht harbour at Fontvieille (West of the old town of Monaco) is now open. It is a private harbour with about 100 berths for yachts up to 35 m. All berths are fitted with water and electricity. Port Office Telephone No. 50.80.99.

This new port provides very good shelter regardless of wind direction.

REGULATIONS: *Recommendations to Ship-Owners, Masters and Crew Members:* Ship-owners, Masters and Crew members are strongly requested not to dispose of hydrocarbon, household refuse and other rubbish into the Monaco harbour (i.e. cartons and mainly plastic containers).

Used motor oils and other petroleum residues must be transferred into tanks exclusively provided for this purpose at the beginning of the North and South jetties and on the landing stages facing the Rainier III swimming pool.

These tanks are signposted with panels bearing the words "Huiles Usees" (used oil) in red letters on a white background.

Household refuse and other rubbish are to be put into garbage containers located around the harbour throughout the year. Furthermore, during the Summer, special individual bags are made available free of charge to all in-coming vessels.

Those responsible for ships equipped with used water tanks or bilges are requested to empty these containers off the coasts of the Principality at a minimal distance of 6 miles.

Those whose ships are not equipped with these used water tanks are requested not to dispose of their used water during their stay in the Monaco harbour, and to use the sanitary installations and facilities made available to them within the harbour.

Offenders infringing the above provisions will be penalized in accordance with the stipulations of Law No. 954, dated April 19, 1974, dealing with the fight against water and air pollution.

AUTHORITY: Captain R. F. Gratioulet – Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Morocco

AGADIR: 30.25 N. 09.38 W.

DOCUMENTS:
Health Declaration.
4 Cargo Manifests.
6 Stores Lists.
6 Crew Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. Pilot boards at port entrance. International code signals used. Pilot on VHF Channel 16.

ANCHORAGE: Good anchorage in open roadstead.

MAX. SIZE: Up to 29 ft. draft.

HEALTH: Pratique given immediately after berthing when port doctor boards.

TUGS: 3 tugs available, 1 × 350 h.p., 1 × 1,275 h.p., 1 × 1,200 h.p.

RADIO: Agadir Radio operates 24 hours a day.

BERTHING: Alongside pier: berth 640 m. long, 9 m. depth; berth 380 m. long, 6 m. depth.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available from pipe-line at berths.

FUEL: Fuel and gas oil available from pipe-lines at berths.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

STEVEDORES: ETA required 24 hrs. in advance to arrange gangs.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.

IDENTIFICATION CARDS: Required.

CONSULS: France, Spain, Belgium and Portugal represented locally.

REPAIRS: Small machinery and electronic repairs can be effected.

POLICE/FIRE/AMBULANCE: Police, tel. 23-49; Fire, tel. 22-43; Ambulance, tel. 19.

HOLIDAYS: Fete du Trone, (Throne holiday); 3rd March; Fete du Travail (Labour Day); 1st May; Al Massira Al Khadra, 6th November; Fete de l'Independance (Independence Day) 18th November; Aid El-Fitr, (1st and 2nd Chaoual); 1st January; Aid Adha (10 et 11 Hija); Le Premier Moharrem (The first Moharrem) and Aid Maouloud Annabaoui (12 et 13 Rebia I).

Note: Chaoual, Hija and Rebia are months in the Muslim calendar.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: November 1979.

Documents:
3 Copies Crew's Personal Effects.
6 Crew Lists.
3 Stores Lists.
3 Vaccination Lists.

Anchorage: Vessel anchored 0.5 miles South of breakwater.

Pilotage: Compulsory. Pilot boards 0.5 miles S.W. of the outer buoy. 1 hours notice required.

Restrictions: Vessel can enter and sail during hours of darkness and at any stage of the tide.

Max. Size: Max. LOA 600 ft. (approx.) and max. draft. 26 ft. (approx.). Size of vessel limited by the swinging room.

Radio: Agadir Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: Two available.

Berthing: Vessel berthed at No. 8 berth on the South mole which is about 7 cables from the harbour entrance. Max. LOA approximately 600 ft. and Max. draft approximately 26 ft. Least depth of water in channel from sea to berth is approximately 30 ft. The bottom at the berth is sand and mud and the density is 1025.

There are no special bulk handling facilities. There are 10 cranes with safe working load of 10 tonnes. Ro/Ro facilities available, no floating cranes. There is ample equipment for handling palletised cargoes also storage space for palletised and break bulk cargoes. Containers are handled by ship's gear and storage space for containers is limited.

Facilities: The following are available: Fresh water (poor quality), fresh provisions, small repairs, there is a small machine shop, airport, Lloyd's Surveyor and laundry service.

AUTHORITY: Port Director.

CASABLANCA: 33.36 N. 07.37 W. (See Plan Book)

PORT LIMITS: Vessels considered as "arrived" when passing buoy CA 5 in position 33° 37′ 05″ N. 7° 35′ 02″ W.

DOCUMENTS:
Certificate of Registration.
Cargo Manifests.
Crew Lists.
Passenger Lists.
Customs Declaration.
Bill of Health.
Ship's Entry Declaration.
International Tonnage Certificate.

PILOTAGE: Compulsory for all merchant vessels of 100 tons and over, in the area between the meridians 7° 37′ 10″ W. (the foot of Jetee Moulay Youssef) and 7° 33′ 50″ W. (Table d'Oukacha) and South of the parallel 33° 37′ 4″ N. Pilotage is available day and night. The Pilot meets vessel at the CA5 buoy.

A red flag displayed at the signal station by day indicates that the Pilot cannot come out, on account of the sea, but vessels may enter the port at their own risk, and the Pilot will await them under the shelter of jetee Moulay Youssef. Should bad weather prevent the Pilot from coming out, a vessel should not attempt to enter the harbour at night. The Master may contact the Pilot station for port radar service by VHF Channel 12.

ANCHORAGE: The anchorage outside Casablanca harbour is partially protected from winds between S. and W. but a Westerly swell finds its way into the bay. With a heavy Westerly or North-westerly swell the anchorage becomes dangerous.

The holding ground in most places outside the harbour is poor, but a berth with good holding ground may be obtained in a depth of 13 fathoms N. of jetee Moulay Youssef. There are numerous anchorage berths in the harbour, some at mooring buoys, in depths up to 12 m. (42 ft.).

MAX. SIZE: Max. length permissible, about 884 ft.; max. breadth permissible, about 105 ft.; max. draft permissible, about 32 ft.; but normally 30 ft. for berthing alongside. Tankers: up to 34 ft. draft.

HEALTH: Masters must fill in the declaration of health and display the "Q" flag, to obtain pratique. In the event of any suspected disease or fever on board, Masters have to warn their Agent before the ship's arrival.

RADIO: The name of radio station for ETA cables to Agents, receivers, etc., is Casablanca Radio.

TUGS: There are 6 tugs of 800–1,500 h.p. 3 of them are sea-going tugs fitted with modern salvage apparatus. Normally tugs join the vessel at port entrance. To call them, 4 long blasts and 1 short for one tug, 4 long blasts and 2 short for 2 tugs, etc. Ship's lines are mostly used.

BERTHING: To arrange berth, ETA message should be given 24 hours before the ship's arrival.

Mooring. When making fast to the jetty by the stern, the anchor should be let go at a sufficient distance from the jetty to allow for a good scope of hawsers.

Vessels are recommended to secure with special 10 in. coir hawser tailed with wire. It is recommended to moor head to the swell, but in bad weather a vessel should be ready to leave at short notice.

CARGO HANDLING: Phosphate loading: up to 5,000 t.p.h. Depth alongside 32 to 26 ft.

Grain Handling: discharging 800 t.p.h., loading 400 t.p.h. Depth at silo berths 30 ft.

Containers: straddle carrier for handling up to 20 ft. containers.

Roll-on/roll-off: three berths for roll-on/roll-off vessels, depth 30 ft.

STEVEDORES: There are 13 stevedoring companies. Normal working days are in two shifts (from 0700 to 1500 hrs. and from 1500 to 2300 hrs.). Ship's Agents arrange gangs in connection with stevedores. Two daily orders (at 1100 and 1600 hrs.) are made to fix the number of gangs.

MEDICAL: It is necessary for Agent to receive advance notice of required medical attention. Hospital facilities available. Only smallpox vaccination certificates are required.

TANKERS: There are 4 tanker berths, *(a)* one for Import and Export of white products and max. permitted draft 34 ft. (Berth P3). *(b)* three berths for Import and Export of black products. These berths (No. 60, 61 and 62) are situated inside the harbour, vessel's draft should not exceed 30 ft.

FIRE PRECAUTIONS: Two firemen remain on board tankers while vessel berthed alongside. One fireman is required for other vessels carrying dangerous cargo.

FRESH WATER: Numerous feeders along berths. Also delivery by barges is possible.

FUEL: All grades available. Ex-wharf or by barge.

CONSULS: The following countries are represented by consuls in Casablanca:
Algeria
Argentina
Austria
Belgium
Brazil
Denmark
Finland
France
Great Britain
Greece
Germany
Haiti
Italy
Netherlands
Norway
Panama
Poland
Portugal
Spain
Sweden
U.S.A.
Yugoslavia

GANGWAY/DECK WATCHMEN: It is necessary to have watchmen on board. They are hired by the ship's Agent.

OPENING/CLOSING HATCHES: This work is normally carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes are permitted for each crew member to be held out of bond.

IDENTIFICATION CARDS: Needed.

REPAIRS: Only small repairs and dry docking works are carried out.

DRY DOCKS: One large dry dock, 152 m. long and 22 m. wide (lifting power 10,000 tons). Three slips for ships up to 700 tons.

REPATRIATION: Facilities exist for effecting crew change and arranging any necessary repatriations.

AIRPORT: Distance from airport, 25 miles. International connections.

POLICE/AMBULANCE/FIRE: Police, 2210–74 or 19; Ambulance, 15; Fire, 15.

TELEPHONES: Only arrangements for placing telephones on board passenger ships are possible.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: Directeur du Port.

AGENT: Lasry Maroc, 61, Avenue de l'Armee Royale, Casablanca. Telex: 21949–21092. Tel.: 2688–75 – 2669–46. Cables: "Jolasry".

EL JADIDA (Mazagan): 33.15 N. 08.31 W. (See Plan Book)

DOCUMENTS: As for "Casablanca".

PILOTAGE: Arranged by Agent, basis vessels ETA given in advance. Pilot boards about 2 miles from the port entrance.

ANCHORAGE: About half a mile from head of North jetty in depths of 13 to 14 m. Hard rock bottom covered in sand. Holding ground is fair only.

RESTRICTIONS: The port comprises an entrance channel 50 m. wide and an outer harbour area 7 hectares, partially dredged to 3 m. depth to make a waiting basin. In the Southern part of the outer harbour is a quay, called the barge quay. 120 m. long, dredged to 6 m. depth.

MAX. SIZE: No limitations for vessels anchoring. For entering harbour max. length 80 m., draft 5 m., entering at high water.

RADIO: No local radio station. Use Casablanca Radio for messages to Agent.

TUGS: Available. Normally join vessel 2 miles from port entrance.
CRANES: 2 electric cranes and 2 diesel cranes available.
MEDICAL: Hospital facilities available. Vaccinations can be arranged.
FRESH WATER: Available at the quay.
FUEL: Can be supplied subject to 24 hours notice.
WATCHMEN: Recommended to employ watchmen.
OPENING/CLOSING HATCHES: Work performed by ship's crew.
CONSULS: The only consular representatives are those of France and Portugal.
REPATRIATION: Can be arranged via Casablanca.
REPAIRS: Small repairs can be done on board, or parts sent to Casablanca. One small dry dock reserved for Port Authority vessels and fishing boats.
AIRPORT: Nearest commercial airport is Nouasseur. The airport at Camp Cazes, Casablanca, operates for internal flights only.
HOLIDAYS: Sundays and holidays, except for National holidays, can be worked on payment of overtime.
POLICE/AMBULANCE/FIRE: Police, tel. 19; Ambulance, tel. 15; Fire, tel. 15.
TELEPHONES: Cannot be connected to vessel, but telephone situated on the quay.
AUTHORITY: Arrondissement de L'Equipment et de la Promotion Nationale.

KENITRA: 34.17 N. 06.30 W.

Situated on the left bank of the Oued Sebou, 17 km. from the Atlantic.
PILOTAGE: Pilotage is compulsory for entering and leaving port. Vessels must wait outside the port entrance for the tide. It is possible to enter from 2 hours before until 1 hour after high water during the night, and from 3 hours before until 2 hours after high water during the day. The Pilot boards vessels at river mouth. The Pilot will be on station 2 hours before high water.

On arrival at the Roads or after 0830 hrs., call the Pilotage Department and advise arrival time at the Roads and draft.

Pilotage Department on VHF Channel 16 and 2182.
RESTRICTIONS: From the mouth of the river up to the port is a dredged channel. Depths are 4.20 m. during neap tides and 5.40 m. during spring tides. Height of tide during neap tide is 2.60 m. Height of tide during spring tide is 3.80 m. The constant is 1.60 m.

During the Winter it is recommended to stay outside the port in strong squalls. Ships are advised by Kenitra port radio of the possibilities for entering port.

Between November and April there is a total of 6 or 7 individual days when the port is closed to navigation, due to weather conditions.

Vessels are berthed and unberthed in daytime only at present time.
RADIO: Messages to ship's Agent should be sent through Casablanca Radio. In the ETA message to Agent, also advise vessel's draft. There is a radio station at Kenitra for port use only. Watch-keeping hours are only during high water, on 2182 kHz.
TUGS: Two tugs of 250 h.p. and one of 130 h.p.
BERTHING: The outer port used only by trawlers, and a mooring quay of 360 m. length belonging to the Royal Moroccan Navy. The length of main quay is 870 m. and includes 10 berths. In addition to the above there is a jetty for wine vessels, and a jetty for oil tankers.
FRESH WATER: Supplied alongside the quays.
FUEL: There are supplies of diesel oil, gas oil and petrol in the port. These products supplied by tanker lorry along the quay.
REPAIRS: There are workshops for small running repairs in the port. There is a slipway for ships up to 400 tons.
CONSULS: The Consular representatives at Kenitra are those of Belgium, France, Portugal.
AIRPORT: The nearest commercial airport is that of Rabat-Sale and there is a small airfield at Kenitra.
AUTHORITY: Directeur du Port.
AGENT: Consortium Industriel Commercial et Maritime, 19 Boulevard Imam Ali, Kenitra. Tel. 22 56 (3 lines). Telex: 91030 Boutrans and/or 91966 Incomar. Cables: "Incomar Kenitra".

MELILLA: 35.18 N. 02.57 W.

DOCUMENTS:
Health Declaration.
4 Cargo Manifests.
2 Stores List.
5 Crew Lists.
5 Passenger Lists.
PILOTAGE: Compulsory for vessels over 500 tons. ETA to Agent required at least 10 hours before arrival to arrange Pilot. Pilot boards at anchorage near port entrance. International code signals used.
ANCHORAGE: Half a mile East of port entrance, in depths of 14 to 20 m.
RESTRICTIONS: Entrance normally in daylight only. In case of emergency vessel may enter at night.
MAX. SIZE: Up to 32 ft. draft.
HEALTH: Pratique obtained immediately after berthing when vessel boarded by health officials.
TUGS: One tug of 550 h.p. available.
MEDICAL: Doctors and hospital facilities available. Vaccinations can be arranged.
TANKERS: One oil berth for tankers up to 32 ft. draft.
FRESH WATER: Available at all quays.
FUEL: Available subject to advance notice.
GANGWAY/DECK WATCHMEN: Available. Consignee Agents have their own watchmen for goods on the quay.
OPENING/CLOSING HATCHES: This work is carried out by stevedores.
CUSTOMS ALLOWANCES: Crew allowed normal daily consumption of tobacco, wine and spirits.
IDENTIFICATION CARDS: Required.
CONSULS: France and Italy are represented locally.
REPAIRS: All types of engine and hull repairs can be effected for smaller vessels.
REPATRIATION: All facilities available.
AIRPORT: Situated 1 km. from the city. 3 daily flights to Malaga, except on Sundays.
HOLIDAYS: 1st January, 6th January, 19th March, Maundy Thursday, Good Friday, 1st May, Ascension Day, Corpus Christi, 29th June, 17th July, 18th July, 25th July, 15th August, 12th October, 1st November, 8th December, Christmas Day. Work may be arranged on all holidays except Good Friday.
POLICE/FIRE/AMBULANCE: Police, tel. 1741 or 1744; Fire, tel. 1693; Ambulance, tel. 1441.
TELEPHONES: It is possible to arrange for a telephone to be placed on board.
SHORE LEAVE: Allowed.
SHIPMASTER'S REPORT: April 1979.
Though geographically situated in Morocco it is a territory of Spain and the Spanish flag should be hoisted. VHF Channel 16 for Pilots, berthing day or night. A new port adjoining Melilla is being constructed but this will be in Morocco. (See "Port Nador").
AUTHORITY: Ingeniero Director del Puerto.

MOHAMMEDIA: 33.45 N. 07.22 W. (See Plan Book)

DOCUMENTS:
Bill of Health.
3 Crew Lists.
3 Passenger Lists.
3 Provisions Lists.
Manifests and Ship's Papers for Agent.
PILOTAGE: Compulsory for vessels entering or leaving the harbour or shifting berth. Pilot available for vessels arriving during night and wishing to enter the basin when conditions are possible.
ANCHORAGE: Three good anchorages in depths of 11 to 6.5 fathoms about a mile N.E. of the entrance, and N.W. and S.E. of the pipe-line area.
RESTRICTIONS: Vessels with a draft over 15 ft. wishing to berth in the basin are obliged to wait for tide.
MAX. SIZE: Sea line installations:
No. 1 Berth – Tankers up to 100,000 d.w.t.
No. 2 Berth – Tankers up to 120,000 d.w.t.
For the basin: max. length 150 m., max. draft 6.9 m. (22 ft. 8 in.).
HEALTH: Port sanitary control officer boards immediately after arrival for pratique delivery. In the event of any suspected disease or fever on board, it is necessary to advise by radio to Agent 24 hours before arrival. Pratique is automatic after calling at another port of Morocco.
RADIO: Casablanca Radio Station.
TUGS: There are no tugs but 3 pilot boats of 150 h.p. will assist vessels if necessary, or tugs can be ordered from Casablanca.
BERTHING: Vessels up to 150 m. in length and drawing up to 6.9 m. (22 ft. 8 in.) at Spring tides and 5.4 m. (18 ft.) at Neaps.

Quay No. 1 has a length of 70 m. with a depth of 8.50 m. (28 ft. alongside).

Quay No. 2 has a length of 170 m. with a depth of 5.50 m. (18 ft. alongside). Max. LOA 120 m. Max. draft 6.0 m.

Quay No. 6 has a length of 60 m. with a depth of 6.00 m. (19 ft. 8 in. alongside).
TANKERS: Sea line installations located in position 33° 44′ 01″ N., 7° 23′ 02″ W. in depth of water 70 ft. Diameter of swinging area: 850 m.

Vessels may be berthed by day. Mooring is effected by 6 floating nylon ropes, each 200 m. long, made fast to the after end of the vessel and by both anchors.

The buoy is connected to a floating crude oil line, 20 in. diameter, with two flexible hoses of 16 in. diameter. One flexible hose of 8 in. diameter is available for discharging refined products. There are no facilities for discharge of slops or dirty ballast.

Smaller tankers may also berth at harbour quay No. 1.
STEVEDORES: The loading and discharging capacity of general cargo or timber is 300 tons per day. Gangs are arranged by the stevedores according to the cargo plan given by the consignee to the harbour authorities.
MEDICAL: There is the hospital in Mohammedia, and other hospitals and clinics in Casablanca (16 miles away). Vaccinations can be arranged.
DENSITY: 1025.
FRESH WATER: Water can be supplied at any time alongside the quays at the rate of 15 t.p.h. There is no fresh-water supply to the offshore tanker terminals.
FUEL: Available from Casablanca at 48 hours notice.
FIRE PRECAUTIONS: All tankers are confined by gates and watched over by special firemen.
GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.
OPENING/CLOSING HATCHES: This work is normally carried out by crew. When carried out by stevedores the cost is charged.
IDENTIFICATION CARDS: Passport required and police permit for leaving the harbour.
CONSULS: There is no consul in Mohammedia. All are in Casablanca.
AIRPORT: The nearest airport for international flights is Nouasseur. Casablanca Airport operates internal flights only.
HOLIDAYS: 1st January; 1st May; 3rd March; 18th November; and any other religious holidays which are not at regular dates. Only on two days (1st January and 1st May) no cargo work can be arranged.
POLICE/AMBULANCE/FIRE: Police, 21.51; Ambulance/Fire, 15.
SHORE LEAVE: Allowed.
AUTHORITY: The Harbour Master, RAPC, Port de Mohammedia.

PORT NADOR (Beni Enzar): 35.17 N., 02.56 W.

SHIPMASTER'S REPORT: November 1979.

DOCUMENTS:

6 Crew Lists.
3 Stores Lists.
Vaccination List.

PILOTAGE: Compulsory. Pilot boards off the breakwater and requires one hour's notice.

ANCHORAGE: About 0.5 miles N.E. of the breakwater.

RESTRICTIONS: Vessel is able to enter and leave at any stage of the tide, day or night.

MAX. SIZE: LOA 500 ft. (approx.). Max. draft 8.5 m. (approx.). Size of vessel limited by swinging room. Underkeel clearance of 1.5 m. required.

RADIO: Nador Radio.

VHF: Port Authority and Pilot on Channel 16.

TUGS: One tug of 600 h.p. In 1980 an additional tug of 1,500 h.p. may be available.

BERTHING: *Berth No. 1:* The berth is close to the entrance and the max. size permissible is approximately 400 ft. LOA and approximately 8.5 m. draft. The least depth in the channel from sea to the berth is 13 m. The nature of the bottom at the berth is sand and mud and the density is 1025.

Cargo Facilities: There is one ore loader for small vessels. There are 4 mobile cranes with safe working load of 6 tonnes. No Ro/Ro facilities. There is ample mechanised equipment for handling palletised cargoes. There is storage space for break-bulk cargoes and storage for palletised cargoes, however, there is little covered space. There is no equipment for handling containers and there is no storage space for containers as there is no hard ground.

FACILITIES: The following are available: fresh water, fresh provisions, small repairs, small machine shop, airport (at Oudja 140 km.), Lloyd's Surveyor, Salvage Surveyor, laundry service, doctor and hospital, groceries and meats.

CONSULS: Spanish Consul located in the port. British and French Consuls at Oudja.

TIME: GMT.

DEVELOPMENTS: Port construction is taking place at the present time and eventually 14 berths will be available and when this is completed Melilla and Port Nador are expected to become one port. There will be one oil/mineral berth with depth of 12.5 m., two berths with 8.5 m., one berth with 6.5 m. and one berth with 5 m. in the initial stages.

GENERAL: Port Nador is situated next to Melilla, and the same entrance between the breakwaters is used for entering, although both ports are run entirely separately, Melilla being Spanish and Port Nador being Moroccan. The Moroccans are sure that Melilla will soon be theirs, then it will become one large port.

The port under construction is to have 14 berths, at the moment there are only two berths working, both of which are only partially completed. The only shed constructed is used for palletising and storing fruit.

The nearest major airport is at Oudja about 140 km. away.

Maximum intended draft when all is completed will be 13 m.

REPORT: Dated September 1980

This port is still under construction but for the last two years has been open for trade of iron ore, lead and citrus fruit (seasonal). There are 3 piers now in use as follows:

Mole No. 1 (S.W. side) for the shipping of iron ore.
Mole No. 2 (N.E. side) for lead and general cargo.
Mole No. 2 (S.W. side) for citrus fruit.

The N.E. side of Mole No. 1 will also be for minerals but is still under construction.

AUTHORITY: R.A.P.C.

SAFI: 32.19 N. 09.12 W.

DOCUMENTS: Clearance procedure is very simple. 3 Crew Lists, 1 Personal Effects Lists, 3 Passenger Lists and 1 Stores Lists only are required. Other documents are presented on berthing.

PILOTAGE: Arranged by vessel's Agent, to whom a correct ETA should be given. There is VHF radio contact with the pilot station and Harbour Master's office. The pilot boat is located inside the harbour and the Pilot boards in the anchorage. Pilot ladder only is required.

ANCHORAGE: Recommended anchorage is S.W. of harbour entrance. Safe holding ground for 25,000 d.w.t. vessels. Vessels should keep port entrance clear.

MAX. SIZE: Vessels with a draft of more than 28 ft. and up to a max. of 30 ft. enter and sail at high water.

HEALTH: Health Officer boards shortly after berthing but Agent must be advised before arrival if suspected disease or fever on board. Health clearance in one Moroccan port holds good for the next.

RADIO: Casablanca Radio for normal traffic or Safi Radio for local R/T traffic. Harbour Radio VHF Channel 16.

TUGS: Tugs stand by vessel inside breakwater and, usually, ship's lines are used.

BERTHING: Vessels berth in order of arrival. Port used for export of manganese and barytes. No night entry after 1900 hrs.

STEVEDORES: Gangs are arranged by vessel's Agent. Night work is possible from 1800 to 2200 hrs. and, very exceptionally, until 2400 hrs.

MEDICAL: Advanced notice of required medical attendance is advisable but not essential. Modern hospital and clinic are available. Smallpox vaccination only is necessary except when vessels have called at cholera and yellow fever ports.

TANKERS: Only small tankers used in this port. White products and gas oil imported; no export. Ammonia tanker berth max. draft high water 30 ft.

DENSITY: Density varies between 1024 and 1026.

FRESH WATER: Availability not limited, by hoses from quay.

FUEL: Limited supplies gas oil; diesel available but must be stemme Fuel oil and large quantities diesel, gas oil can be delivered by tanki lorry from Casablanca.

GANGWAY/DECK WATCHMEN: Watchmen necessary. O watchman day and night.

OPENING/CLOSING HATCHES: Normally done by crew but can arranged by stevedores with advance notice.

CUSTOMS ALLOWANCES: 200 cigarettes, and one open bottle spirit allowed each man. Bond is sealed and heavy fines are imposed Customs for smuggling.

IDENTIFICATION CARDS: These are needed.

CONSULS:

Denmark,	Tel. 30.39	Portugal,	Tel. 23.58
Finland,	Tel. 31.40	El Salvador,	Tel. 28.76
France,	Tel. 27.97	Sweden,	Tel. 29.06

REPAIRS: Major repairs not possible; small workshops only repairing fishing boats.

REPATRIATION: Repatriation by air or sea through Casablanca, 1 miles away.

AIRPORT: Nearest at Novasseur, served by principal Europe airlines.

HOLIDAYS: On the following holidays no work is possible: 1st Janu (New Year's Day); 3rd March (Coronation Day); 1st May (Labour Da 18th November (Independence Day). Other Moslem and Christ holidays are subject to last minute decisions as far as tariff is concern but work can be arranged.

TELEPHONES: No telephones can be placed on board. Pu telephone available on the quay during working hours only.

GENERAL: Masters are strongly advised to take local currency fr their Agent. Landing of foreign currency encourages black mar transactions and incurs confiscation and heavy fines as well as dela by the Customs authorities.

SHORE LEAVE: Police permits are required by Liberty men and delivered by Immigration Authorities.

AUTHORITY: Capitainerie de Port.

TANGIER: 35.47 N. 05.48 W. (See Plan Boo

PORT LIMITS: To the South by the coast and port installations and the North by a line joining Pointe de Malabata and the Mouth of L'Ou el Youd.

DOCUMENTS: Required on arrival:

Health Declaration.
2 Crew Lists.
7 Cargo Manifests.
5 Lists of Passengers Disembarking.
4 Lists of Passengers in Transit.

Required on departure:

5 Cargo Manifests.
5 Manifests of Passengers Embarking.

PILOTAGE: Pilotage is compulsory for ships of more than 50 g.r.t. entering, leaving and shifting in harbour. Departure possible through 24 hours, entry up to the last departure. Pilot on VHF Channel throughout 24 hours. Vessels should advise arrival 6 hours and 1 hou advance.

Pilot boards 0.5 miles North of head of breakwater.

ANCHORAGE: There are good anchorages to the East and Southe of the breakwater head in depths of 10–16 m.

RESTRICTIONS: The harbour area between the breakwater and extremity of the main pier has a min. depth of 9 m.

HEALTH: Apart from the international laws which must be obey vessels coming from an infected area must send in advance (12 hou a telegram to "Saniport Tangiers" describing the state of the vessel persons on board.

Vessels having a sick person on board to be landed at the port m send a telegram as soon as possible to "Saniport Tangiers" with details concerning the case to be brought ashore and await corresponding reply.

Hospitalisation will be in a State hospital, or, if needs be, in a clinic. disembarkation of a sick person may take place without the presence ruling of the health authorities of the port.

Vaccinations necessary in case of need are carried out on the s and in accordance with the requirements of the OMS.

Evacuation of sick persons is effected by ambulance, either munic or private, after having advised the Port health authorities.

RADIO: Tangiers Radio listens on 2182 kHz and VHF Channel Weather forecast at 0915 and 1630 hrs. GMT on 1911 kHz.

TUGS: The port owns 3 tugs, 1,500, 500, and 300 h.p. respectively. these tugs are equipped with fire-fighting equipment.

BERTHING:

Total Length	*Max. Draft*	*Remarks*
290 m.	28 ft.	
300 m.	28 ft.	New Mole
200 m.	20 ft.	
100 m.	14 ft.	

Berth TC: (extension of the new mole) has a depth of 12.0 m.

Car Ferry Berths: 3 installations for car ferries (2 ramps and 1 qu Max. load on ramps 60 tonnes (30 tonnes per axle).

Roll-on/Roll-off: Berth T3: Length of quay 90 m. Max. draft 5 m. Widt vehicle approach way 5.30 m. Max. weight permitted 40 tonnes.

Berth T4: Length of quay 140 m. Max. draft 6 m. Width of ramp landside 6.60 m. and at ship's side 10.8 m. Max. capacity 50 tonne

CRANES: 7 mobile cranes, lifting capacity 6 tonnes. 1 Titan mounted crane with capacity of 60 tonnes. No floating crane availa

TANKERS: Length of berth 60 m. Butane gas carriers also handle

FRESH WATER: Replenishment of fresh water can be made at all tim alongside the quays at the rate of 30 t.p.h.

FUEL: There are no refuelling installations at the quays. Only very sm quantities can be supplied by tanker lorries belonging to the oil companies.

STEVEDORES: Normal working hours are from 0800–1200 hrs. and from 1400–1800 hrs. Overtime: 1200–1400 hrs. and 1800–2400 hrs. Usual loading and discharging rates are as follows: 15–18 t.p.h. goods in sacks; 12–15 t.p.h. for bales; 10 t.p.h. for general cargo; 7–8 t.p.h. for cork.

GANGWAY/DECK WATCHMEN: Advisable, order through Agent.

REPAIRS: Slipway for small vessels, no shipyard.

AIRPORT: International airport 12 km. from port on the road to Rabat.

TIME: GMT in Winter. GMT plus 1 hour in Summer (Date of change variable).

TELEPHONE: Installation only possible at the jetty.

POLICE/AMBULANCE/FIRE: Police: Tel. 19; Town Ambulance: Tel. 324-44, 342-42 and 376-83; Private Ambulance: Tel. 210-89; Fire Brigade: Tel.15.

GENERAL: *Tides:* Height of Springs, 2.20 m. Height of neaps, 0.50 m. *Wind:* (October – May) W. and S.W., (May – October) E.N.E. (sometimes Force 8).

Swell: From the N.W. in Winter which creates fairly rough seas in the port.

Currents: Insignificant.

AUTHORITY: Regie d'Aconage du Port de Tangier.

AGENT: Lasry Maroc (Tangier), 4 rue de la Mediterrannee, Tangier. Telex: 33064. Tel. 335-75-325-76. Cables:"Jolasry".

NOTES

Please also advise Shipping Guides Ltd.

Mozambique

BEIRA: 19.46 S. 34.50 E. (See Plan Book)

PORT LIMITS: Vessels are considered to be "arrived ships" when they enter the pilotage area, i.e. when they enter to within a radius of 5 miles from the pilot boat. The custom of the port is that vessels are in "free pratique" only when they have entered port and have been cleared by the Immigration Authorities. Immigration will only clear vessels in port.

DOCUMENTS:

Customs Clearance from last port.
Health Certificate.
8 Crew Lists.
8 Lists Passengers in Transit.
8 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
8 copies of Manifest of Beira Cargo.

PILOTAGE: Compulsory for all ships other than naval vessels. Ship's name, ETA and draft should be radioed via Beira Radio, call sign CRS, 24 hrs. in advance to Port Captain Beira and owner's Agent.

The pilot boat – black hull, grey upperworks, black funnel with white "P" – is stationed 19° 52′ 47″ S., 34° 57′ 21″ E. Pilot boat call sign CRL H – W/T: listens on 500 kc/s., replies on 480 kc/s. – R/T: listens on 2,182 kc/s., replies on 2,341 kc/s. – VHF: frequency 156.6 Mc/s. (Channel 12).

Unless instructed to the contrary by the pilot boat, vessels with a draft under 25 ft. anchor by "P" buoy, 19° 52′ 47.3″ S., 34° 57′ 21.1″ E., and vessels with draft over 25 ft. anchor between "P" and "A" buoys, 19° 56′ 20.1″ S., 35° 02′ 44″ E.

In bad weather pilot boat may leave above position and enter port. In such cases vessels should anchor as indicated above, weather permitting.

ANCHORAGES: At Bar, "P" and "A" buoys as indicated above. There is anchorage for 4-6 ships, depending on size, in inner harbour off Cabedelo sand-pit.

RESTRICTIONS: Ships with draft 16 ft. and under can enter at any time. Ships with draft over 16 ft. generally enter 2 hrs. either side of high water.

MAX. SIZE: Max. permissible length about 800 ft. Max. permissible drafts between 33-36 ft. at springs, about 27-29 ft. at neap tides.

HEALTH: Vessel to radio "Sanidade Maritima", Biera, their ETA and "All Well". If "All Well", Health Certificate given by Pilot.

RADIO: Vessels to route messages through Beira Radio – call sign CRS. Agents radio ships through same station. Naval Radio Station – call sign CRX 3 available for distress signals.

TUGS: Join incoming vessels at inner anchorage, about 1 mile distant from quays. Ship's lines used. 4 tugs available, up to 3,200 h.p.

BERTHING: No night berthing done unless with prior consent of Chief Pilot, otherwise no specific requirements.

Pungue Wharf:

Berth No.	*Depth (ft.*	*in.)*	*Length of Berth (ft.)*	*Cranes (Electric)*
1	32	02	580	2× 6 tons 4× 3 tons
2	31	02	530	2× 6 tons 4× 3 tons
3	33	00	530	3× 6 tons 3× 3 tons
4	32	00	525	2× 6 tons 3× 3 tons
5	26	09	530	2×3.5 tons 1× 5 tons 1× 3 tons
6	26	03	540	1× 10 tons 5× 5 tons
7	29	04	540	1× 10 tons 5× 5 tons
8	32	00	630	Conveyor Belt
9	27	08	540	1× 10 tons 5× 5 tons
10	31	06	550	1× 20 tons 5× 5 tons

Note: Wharf No. 1 is generally used by trawlers, No. 2 by trawlers and coasters, No. 3 by vessels loading cement, Nos. 4, 5, 6, 7, 9 and 10 for general cargo.

Range of Tides: 15–21 ft. Maximum depth of water should only be taken as an approximate guide as actual depths are dependent on the port dredging programme. Maximum permissible draft for turning ships round at or off the wharfs is 30 ft.

Chiveve Cais; length, 446 m.; depth, max. 10 m., min. 3 m.

CARGO HANDLING FACILITIES: There is a mechanical ore appliance at No. 8 Berth Pungue Wharf, used mainly for minerals like chrome, coal, etc. This appliance has an average loading rate of 1800-2000 tons per 20 working hours. It is equipped with only one spout.

Mobile Cranes: 25 cranes with capacity 1-10 tons.

Electric Cranes: See "Berthing" – Pungue Wharf.

Steam Cranes: 19 cranes at Chiveve Wharf with capacity 3-20 tons.

Molasses: Storage tanks, capacity 18,000 tons. Served via No. 8 Berth.

Vegetable Oils and Tallow: 3 tanks×400 tons capacity.

STEVEDORES: Ordered by Agent. Vessels should advise Agent their ETA at least 12 hrs. in advance (weekdays), 24 hrs. in advance (week-ends).

Port Cargo Working Hours:

Normal – Weekdays – 0700–1100
1300–1700
Saturdays – 0700–1100
Overtime – The remainder of the day and up to 1700 hrs. on Sundays is considered overtime. All vessels are required to work full overtime including Saturdays and Public Holidays as ordered by Port Authorities. The only time when no work is carried out is from 1700 hrs. on Sundays to 0700 hrs. on Mondays.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox, cholera and yellow fever certificates on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required.

TANKERS: Discharge lines white and black oils, 2×10 in. lines feeding into 12 and 14 in. lines leading to storage tanks. Also a 22 in. discharge line for crude oil. No slop discharge facilities. 2 tanker berths, max. permitted drafts about 31 ft.

DENSITY: In harbour area allow 3 to 4 in.

FRESH WATER: Available at all Pungue Wharf berths, pumping rate about 50 t.p.h.

FUEL: Fuel oil 1,000 Secs R. viscosity, marine diesel 43.1 Secs R., diesel 34.1 Secs R. 3-4 days advance notice required. Bunkers delivered when alongside, no bunkering barge available.

GANGWAY/DECK WATCHMEN: Compulsory to employ watchmen to prevent pilferage.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CUSTOMS ALLOWANCE: There is no restriction on crew member holding in his cabin any amount of tobacco/wine, spirits.

SHIP CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

CARGO GEAR: All gear supplied by stevedores except rope slings, rain tents, and spreaders for heavy lifts.

IDENTIFICATION CARDS: Required. Passport if possible, otherwise Seamen's Book.

CONSULS: None at present time.

REPAIRS: Most types of deck and engine repairs are possible, but major repair jobs are not undertaken.

DRY DOCKS: 1 dry dock 115×17×8.5 m., suitable for ships up to 5,000 tons, LOA 377 ft. and max. beam 55ft.

REPATRIATION: Facilities exist and a valid passport is necessary as Immigration Authorities do not recognise a Seamen's Book as being a valid travel document.

AIRPORT: Beira Airport situated 7 miles from sea port and is served only by domestic airline which maintains 2 flights per day to Maputo from where international connections available.

TIME: Local time 2 hrs. ahead of GMT. No alterations made to clocks during year.

HOLIDAYS: January 1st (New Year's Day); February 3rd (Hero's Day); April 7th (Woman's Day); May 1st (Labour Day); June 25th (Independence Day) and September 25th (Army Day).

POLICE/AMBULANCE/FIRE: Port Police (Tel. 22920); Ambulance (22442); Fire (22222).

TELEPHONES: No telephones placed on vessels.

GENERAL: Beira port works 20 hours per day, 7 days a week (except 1st January) and overtime working is compulsory.

SERVICES: Services normally available for tank cleaning, compass adjusting, minor repairs to radar and radio.

SHORE LEAVE: Crew members and officers are allowed ashore, and shore passes are issued against Seaman's Book or Passport.

DELAYS: Generally no delays, but sometimes 24-48 hours delay following rain or bunching of arrivals.

AUTHORITY: Direccao do Porto da Beira.

AGENT: Allen Walk & Shepherd Limitada, Rua Dr Eduardo Alberto Ferreira de Almeida 51, Beira. P.O. Box 270, 280 or 290. Cables: Thaine or Allenwalk. Telephone: 22091 (5 lines). Telex: 7-332 Thain Mo.

MAPUTO: 25.59 S. 32.36 E.

DOCUMENTS:

6 Crew Lists.
1 Stores List.
6 Passenger Lists.
Last Port Customs and Port Clearance.
1 List of Ports of Call.
1 Health Declaration (given by Pilots on arrival).
1 Entrance Report (given by Pilot on arrival).
1 Customs Entrance (given by Agent on arrival).
1 Railway Statistics Form (given by Agent on arrival).

PILOTAGE: Compulsory. Channels in 24-hour use, but sailing after 2400 only by special arrangement with Immigration. Berthing only during day-light. Pilot station about 26 miles from Maputo wharf if South entrance used; 55 miles if North entrance used.

Pilot granted only if 16 hours' notice of ETA given.

On arrival vessels can contact Pilot on VHF Channel 16 (working on Channel 12).

The pilot ladder is used together with the accommodation ladder in order that the Pilot has a climb of 9 ft. on the pilot ladder.

IMMIGRATION CLEARANCE: Inwards: 0600–1800 hrs. only inside harbour proper. Outwards: 0600–2400 hrs. except in special circumstances.

N.B. Vessels at the pilot station cannot obtain pratique because this includes Immigration clearance and can therefore be considered as not having arrived or not being in all respects ready to load.

ANCHORAGE: Inside harbour: One each for vessels drawing 33, 31, 27 and 26 ft. respectively. Six for vessels between 17 and 19 ft. Vessels delayed in berthing are brought in from pilot station at port's convenience.

RESTRICTIONS: Berthing during day-light only. Unberthing 0600 hrs. to 2400 hrs. with exceptions of Matola piers where ships can only unberth during day-light. Ships over 650 ft. may not pass through dredged Channels at night. Ships up to 23 ft. may sail at any time, any tide up till midnight. Thereafter arrangements to be made with the Pilot Department for ETD.

MAX. SIZE:

	Max. LOA	*Depth L.W.O.S.T.*
General Cargo Wharf	750 ft.	22 ft.–34 ft.*
Matola Oil Pier	750 ft.	32 ft. 6in.
Matola Ore Appliance	820 ft.	40 ft. but governing draft is at the North Bar.*

*Maximum drafts published by Port Authorities. Approximately 34 ft. 5 in. to 37 ft. 2 in. depending on tide.

HEALTH: Pratique granted by Pilot unless disease prevalent on board when Masters should telegraph "Saude" Maputo.

RADIO: Advice of arrival 16 hours before to the Port Captain or Chief Pilot and Port Health should be sent through the station CRX (Naval), operating 24 hours on 500 kc/s., replying on 437 kc/s., also 2000 to 0500 hrs. GMT on 8356 to 8376 kc/s. (replying 3642 kc/s.) and 0800 to 2000 GMT on 12534 and 12564 kc/s. (replying 1299 kc/s.). All other non-official messages through station CRL, operating 0200–1800 GMT on 6 Mc/s. at even hours, 0400 to 1800 GMT on 4 Mc/s. at even hours plus 30 minutes (answering on 4259 kc/s.). Continues watch 0200–0400 GMT on 4 Mc/s. Radio telephone through CRL on 2132 kc/s. at even hours plus 45 minutes 0600–1700 GMT answering on 4415 kc/s.

VHF: Pilot boat (Inhaca Station) and port radio operate on Channel 16 (calling) and Channel 12 (working) from 0530 to 1830 hours.

TUGS: 4 tugs available, 3,200 h.p., 3,200 h.p., 1.500 h.p. and 1,200 h.p.

BERTHING: Carried out at all times between 0000–0600 hrs. at the Main wharves. At Matola Ore berth vessels must berth only at permissible times according to tides.

Main Wharf: All facilities owned and operated by Caminhos de Ferro de Moçambique (CFM), except stevedoring.

Dimensions: Wharf is in an uninterrupted line running roughly N.E./S.W., accommodating 12–15 vessels. Length: 3,033 m.

For loading or discharging bulk grain there are 2 Buhler machines at a berth with 33 ft. depth of water LWOST. About 120 t.p.h. A recent vessel averaged 2,900 tons per day.

Coaling Appliance: The coaling appliance can berth vessels of LOA 750 ft., beam 91 ft. 10 in. and a max. draft of 34 ft. 06 in.

The best loading rate, in theory, is about 10,000 tons per day, however, in practice, allowing for shunting trucks, warping ship, etc., average rate is about 7,500 tons per day.

The length of the chute is 181 m. and it operates between angles of 46° and 58° to the perpendicular. At 46° the tip of the chute is 4.80 m. above wharf level and 9.50 m. from the wharf edge. At 58° the tip of the chute is 7.60 m. above wharf level and 11.80 m. from the wharf edge. At lowest spring tide the water at the coaling berth is 5.90 m. below wharf level and at highest spring tide 2.15 m., the difference between max. extremities being 3.75 m.

Sugar Terminal: The daily intake capability of installation is 2,000 metric tons and it has storage facilities in three sheds with a capacity of 40,000 metric tons each. It has a nominal loading capacity of 750 metric tons. The stowage within each hold is done by means of a telescopic trough and a mechanical distributor (projector) and is capable of projecting the sugar in various angles and distances. Max. reach of the jib is 17 m. Min. reach of the jib (in use) is 11.50 m. and the limit of inclination of the jib (in use) is ± 15°. Max. draft alongside is 33 ft. 06 in.

Depths alongside:

Berth A	30 ft.
Berth B	32 ft.
Berth C	30 ft.
Berth D	31 ft.
Berth D3	31 ft.
Coal Tip	33 ft.
Berth Frigo	30 ft.
Berth G	33 ft.
Berth H	33 ft.
Wharf extension	40 ft.

LPG Carriers: Berth at Matola Ore Berth.

Timber: Vessels berth at Matola, Post No. 1 (P.I.). Max. draft 32 ft. Max. LOA, 600 ft. Vessels over 550 ft. LOA and draft over 25 ft. berth and sail during daylight hours only.

CRANES: *Electric cranes:* 82 units with capacity 3 to 20 tons. *Mobile cranes:* 63 units with capacity 4 to 12 tons.

Heavy lift crane with capacity of between 60–80 tons.

STORAGE CAPACITIES:

Ore and Coal dumps: Gorjao Wharf.

	Tons
Coal	96,000
Ores	600,000
Copper	40,000
Vermiculite	4,000
Steel, Beams and Billets	46,000
Vanadium	7,000

Oil: Storage capacity 200,000 tons.

Molasses: 4 tanks, capacities 6,000, 9,000, 11,000 and 7,000 tons.

Fruit: 7,500 tons (1.133 cu. m./ton) in 100 chambers.

Fish: 200 tons.

Ore: Matola. Capacity 1.3 million tons. Loading speed for iron ore 1,500 t.p.h. and chrome ore 750 t.p.h. (via trucks) and 1,200 t.p.h. (ex bins).

Sugar: See "Berthing".

Containers: Containers and steel handled at the New Wharf Extension (Length 3,000–3,500 ft.). 20 ton cranes available, also 20 ton fork lifts for moving steel. Ro-Ro vessels will be handled from the beginning of 1979.

STEVEDORES: *Working Hours:*

Normal:	Weekdays:	0700–1100, 1300–1700
	Saturdays:	0700–1100.
Overtime:	Weekdays:	1900–2300, 0000–0600.
	Saturdays:	1300–1700, 1900–2300.
	Sundays:	All day.

Overtime is compulsory on a daily basis (including Saturdays and Sundays) from 1900–2300 hrs.. and from 0000–0600 hrs.

The responsibility for overtime costs should be clearly defined in the Charter Party, normally 50/50 between charterers and owners.

TANKERS: Matola Mineral Wharf, 40 ft. LWOST, max. length of vessel 820 ft. Matola Oil Jetty, 32 ft. 6 in. LWOST, max. length of vessel 750 ft.

Dolphin berth at Matola (P3) has been erected for tankers. Max. draft 35 ft. Max. LOA 750 ft.

FRESH WATER: Available at all berths, not available ex-barge.

FUEL: Vessels can be supplied from pipe-lines whilst working at all berths, including the Matola Appliance and Tanker jetty, but excluding the new wharf extension, where pipes have been laid but the system is not yet ready for delivering bunkers. The rate of delivery varies between 300 to 500 tons per hour depending on the type of vessel taking bunkers. At present, supplies of gas oil and marine diesel oil are not in very plentiful supply, recommended to stem as far in advance as possible.

MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox and yellow fever certificates (cholera certificate too if cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required. Men for sick parade must first go through the port doctor whose hours are week-days 0800–1130 hrs. and 1400–1730 hrs.; Saturdays 1000–1130 hrs., but always available on an emergency call.

REPAIRS: No dry dock except for small coasters. Facilities for most normal work, except underwater rivetting, cutting and welding, and shaft balancing.

CONSULS:

U.S.A.
U.K.
France
Norway
Sweden
Switzerland
Italy
South Africa
Brazil
Germany
Spain

IDENTIFICATION CARDS: Crew and passengers are issued with Immigration Boarding Permits and they must be carried at all times. (Such permits to be returned to Immigration Officer prior to sailing.)

WATCHMEN: Strongly recommend employing services of a local watchman, who will also control visitors and labour passes.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.

CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.

REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid passport and visa is necessary as immigration authorities do not recognise a Seaman's Book as being a valid travel document.

AIRPORT: About 5 miles from centre of town.

CUSTOMS ALLOWANCES: Bonded stores are usually not sealed.

HOLIDAYS: No cargo work on 1st January and 25th December, on other holidays, work continues normally in the port.

TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during the year.

SHORE LEAVE: Crew members are allowed ashore, from 0600–2400 hrs. excepting nationals of those countries not maintaining diplomatic relations with Mozambique.

TELEPHONES: A telephone will be placed on board the vessel.

DEVELOPMENTS: Administration are considering the construction of a deep-sea port on the coast between Inhaca Island and the Natal border. This port will be mainly used by coal and iron-ore carriers and have a capacity of approximately 6 million tons per annum.

GENERAL: Crew and passengers not to take photographs in the dock area. Permission through Agent required to lower any boats or gear overside into the water or on to the wharf.

Do not immobilize main engines or carry out engine trials at the wharf until permission has been obtained by the Agent as the Authorities require vessels to maintain sufficient steam for main engines to be used at 2 hours notice.

Customs guards to be supplied with meals and accommodation whilst at inner anchorage and alongside the wharf otherwise cost per guard will have to be paid by Agent on Owner's behalf.

AUTHORITY: Capitania do Porto de Maputo.

MOZAMBIQUE: 14.58 S. 40.45 E.

DOCUMENTS:

Customs Clearance from last port.
Port Clearance.
Health Certificate.
6 Crew Lists.
6 Passenger Lists in Transit.
7 Passenger Lists Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in Transit (main items of cargo only).
6 copies of Manifest of Mozambique Cargo.

PILOTAGE: One Pilot available, 24 hrs. Pilot boat is black and grey. Ships take Pilot near buoy No. 2 (Red Buoy) placed off Goa Island. At night ships should send Morse signals with Aldis lamp to the middle of Mozambique Island (location of port office). ETA should be given as soon as possible to pilot station off Mozambique Island and/or to ship's Agent.

ANCHORAGES: When waiting for Pilot, or in reason of their draft (more than 30 ft.) ships may drop anchor off red buoy No. 2 (0.5 miles seawards). Depths between 60 and 90 ft. Bottom with sand and some broken coral; current from North to South, sometimes up to 4 knots.
MAX. SIZE: Only ships with drafts less than 30 ft. can cross the bar and enter the Port.
HEALTH: Quarantine flag should be flown, even after calling at other ports in this country. Health Certificate given by Pilot.
RADIO: Radio Mozambique call sign CRQ. Also available Maputo or Beira Radio Stations.
TUGS: Tugs are not necessary in this port.
BERTHING: No quay berths. Vessels work cargo at anchor.
STEVEDORES: All requirements on this purpose must be sent to the Agent.
MEDICAL: Medical assistance can be given at any time, even to vessels unable to cross the bar because of draft. Hospital with adequate facilities, and emergency services available.
FRESH WATER: Always available in any quantity. Supplied by barge of 40 tons capacity.
FUEL: Small quantities available.
OPENING/CLOSING HATCHES: By stevedores.
CARGO GEAR: Vessels anchor in bay and load and discharge by lighter and barges.
IDENTIFICATION CARDS: Required.
CONSULS: No local representatives.
REPAIRS: Light repairs can be effected.
REPATRIATION: All facilities available.
AIRPORT: Situated about 7 km. from Mozambique. Connections to Beira and Maputo every day.
HOLIDAYS: 1st January; 2nd March; 1st and 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December. Cargo handling can be arranged on these days.
POLICE/AMBULANCE/FIRE: Maritime Police, Customs and Agents will always be on board during stay.
TELEPHONES: No telephones, but walkie-talkies are available; arrange with Agent.
AUTHORITY: Capitania do Porto de Mocambique.

NACALA: 14.32 S. 40.37 E.

PORT LIMITS: The line joining Ilha Goman to Cabo Columulomo Light at the entrance of Bay of Fernao Veloso.
DOCUMENTS:

7 Lists Passengers Disembarking.
2 Stores Lists.
2 Lists Deck Stores.
2 Lists Cargo in transit (main items of cargo only)
10 copies of Manifests of Nacala Cargo.
2 Lists of Dangerous Cargo.

PILOTAGE: Permanent and compulsory for entering harbour. Pilot boat situated at harbour entrance.
ANCHORAGE: Fine natural harbour. Entrance half a mile wide, depths up to 60 m. Good anchorage for any size vessels. Sand and mud bottom.
MAX. SIZE: For anchoring, no restrictions. For berthing, up to 31 ft. draft.
RADIO: No facilities at present.
Communications: Very poor, causing a lot of difficulties. Normally cables/telegrams received by Agents after vessels sail.

Telex not available. Cables – taking 3/4 days to Maputo or overseas.
HEALTH: Vessels to radio "Sanidade Maritima", their ETA and "All Well" (or otherwise). If "All Well", Health Certificate given by Pilot.
TUGS: One available, 1,000 h.p.
BERTHING:
Old Wharf: There is a pier with berths for 4 vessels with a length of 426 m.

Depths: Wharf 1: 24 ft.
,, 2: 21 ft.
,, 3: 30 ft.
,, 4: 30 ft.
Cranes: 11 cranes available 8×5 tons
2×10 tons
1×20 tons

New Wharf: There is a pier to berth 2 vessels.
Depth: 45 ft.
Cranes: There are no shore cranes available
at this stage.

CRANES: 11 electric cranes with capacity 1 to 20 tons. 1 Floating crane with capacity of 25 tons. 1 Mobile crane with capacity 2 to 5 tons.
BULK CARGO FACILITIES: Not available, bulk cargoes discharged through buckets at an average of 300/350 tons per day of 20 hrs. (3 gangs working).
SPECIALISED CARGO HANDLING FACILITIES: Two 20 ton forklifts available for handling containers. Containers handled in the New Wharf at an average of 600 per month Imports/Exports.

Ro-Ro vessels also able to berth and load/discharge at New Wharf. No special equipment available to handle Ro-Ro vessels.
STEVEDORES: Working hours 0700 to 1100 hrs., 1300 to 1700 hrs. and 1900 to 0600 hrs. One stevedoring firm in operation, under Port Railway control. Gang requested at the following hours:

0530 – for day shifts – (0700–1100) weekdays
– (1300–1700) and Saturdays
1500 – for night shifts – 1900–0600 weekdays
0900 – for night shifts – 1900–1600
Saturdays and
Sundays, day and – 0700–1100 – 1300–1700
night shifts – 1900–0600

Very important that accurate ETA be received well in advance to enable Agents to book gangs in time.
FRESH WATER: Available and delivered direct from the pier or by barges.
FUEL: Not available.
CONSULS: Not available locally only at Maputo/Beira.
REPAIRS: Not available.
DRY DOCKING: Not available.
SURVEYORS: Available operated by M/s Cory Mann George (Malawi) Ltd. *Lloyd's Sub-Agents.*
CUSTOMS ALLOWANCES: No restrictions provided quantities in crew's possession declared on vessel's arrival.
AIRPORT: The only commercial airport is Nampula Airport, 200 km. from Nacala.
MEDICAL: No advance notice required for medical attention, unless urgent assistance necessary. Hospital facilities available. Crew members and passengers should be in possession of valid smallpox and yellow-fever certificates (cholera certificate too if from cholera area) on international forms. Vaccination/fever inoculations and certificates may be obtained ashore if required.
GANGWAY/DECK WATCHMEN: Compulsory, under supervision of Immigration Department.
OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Often done by crew.
CERTIFICATES: Tonnage Certificate to be produced to Pilot, as certain port dues are based on vessel's registered tonnage.
REPATRIATION: Facilities exist for nationals of those countries maintaining diplomatic relations with Mozambique. A valid passport is necessary as immigration authorities do not recognise a Seaman's Book as being a valid travel document.
TIME: Local time 2 hours ahead of GMT. No alterations made to clocks during year.
POLICE: Tel. No. 2820, 2710.
AMBULANCE: No telephone. Contact must be done through Agents, local hospital Tel. No. 2347.
TELEPHONES: Not possible to place telephones on board.
SERVICES: Not possible to perform any service to the vessels, as no facilities.
SHORE LEAVE: Crew members are allowed ashore, excepting nationals of those countries not maintaining diplomatic relations with Mozambique, weekdays from 1800–2300 hrs. only. Saturdays from 1400–2300 hrs. and Sundays/Holidays from 0800–2300 hrs.

Crew must take their Passports or Seaman's Book according to what has been used in the crew list declaration signed by Master. Seaman's Book or Passport will remain at the gate, and a shore pass will be given in return. On returning to the vessel, crew will exchange shore pass for their Seaman's Books or Passports.
HOLIDAYS: New Year's Day (1st January); Mozambican Hero's Day (3rd February); Mozambican Woman's Day (7th April); Workers' Day (1st May); Independence and Frelimo's – Foundation Day (25th June); Revolution and Forcas Populares de Libertacao de Mozambique's Day (25th September).

No cargo work on the 1st May, 25th June, and 25th September. On the other days work continues normally in the port.
REGULATIONS: Crew are not allowed to take cameras on shore also are not allowed to take photographs in the port area.

When vessels are at anchor, special attention must be taken with the small fishing boats whose owners normally approach the vessels and try to exchange local goods with clothes, soaps, etc., these transactions must be avoided at all costs otherwise Masters will be subject to heavy fines.
DEVELOPMENTS: New container berth available.
AUTHORITY: Capitao do Porto de Nacala.
AGENT: Navir Sarl, P.O. Box 175, Nacala. Cables: 'Navir Nacala'.

PEMBA: 13.00 S. 40.28 E.

DOCUMENTS:

6 Crew Lists.
6 Lists of Passengers Disembarking.
6 Lists of Passengers in Transit.
1 Master's Declaration.
1 Stores and Provisions List.
1 Health Declaration.
5 Sets Cargo Manifests.
2 Sets non-negotiable Bills of Lading.
Clearance Documents from last port.

PILOTAGE: It is necessary to order by radio request to Agent 14 hours before arrival.
ANCHORAGE: Vessels may anchor South of the dock about 300 m. off. Other suitable anchorages will be indicated by the Pilot.
RESTRICTIONS: Vessels may enter with Pilot at any hour day or night.
MAX. SIZE: Draft up to 27 ft. 6 in. for berthing.
HEALTH: In case of contagious disease on board, the Port Health Authorities must be advised in advance.
RADIO: Send messages through Beira radio.
TUGS: None available
BERTHING: One berth, length 182 m., depth alongside 28 ft.
STEVEDORES: In ETA message to Agent, indicate number of gangs required and advise quantity and description of cargo for discharge.

MEDICAL: In case of urgency advise Agent by radio before arrival. Hospital facilities available. Vaccinations can be performed.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary as there is a permanent guard on board.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: Bond is not sealed and no restrictions made.
IDENTIFICATION CARDS: Required by police.
REPATRIATION: Can be arranged.
AIRPORT: Situated 7 km. away. Flights to Beira and Maputo daily.
TIME: GMT plus 2 hours. No alterations during the year.
HOLIDAYS: No work performed from 1700 hrs. Christmas Eve until 0600 hrs. 26th December; no work performed from 1700 hrs. New Year's Eve until 0600 hrs. on 2nd January. Work may be arranged on the following holidays: 1st January, 3rd February, 7th April, 1st May, 25th June and 25th September.
POLICE/FIRE/AMBULANCE: Police, tel. 2828; Hospital, tel. 2211.
SHORE LEAVE: Allowed. Except for nationals of countries not maintaining diplomatic relations with Mozambique.
AUTHORITY: Capitao do Porto de Pemba.

Namibia

WALVIS BAY 22.57 S. 14.30 E. (See Plan Book)

PORT LIMITS:

The area bounded on the West by a line drawn from Pelican Point Lighthouse to a point North (true) for a distance of 4 km; on the North by a line from this point drawn East (true) to the mainland; together with the foreshore therein and the jetties, harbour works and harbour lands vested in the Government. For the purposes of calculating port charges a vessel is regarded as an "arrived ship" when it enters the dredged channel in Walvis Bay Harbour or when the vessel anchors in the port limits.

DOCUMENTS:

Customs:

Form DA. 1 – Report Inwards/Outwards for ships;
DA. 3 – Certificate of Clearance for ships;
DA. 4 – Transire – for a destination in South Africa;
DA. 5 – List of Sealable goods on board ship;
Ship's Crew List (Customs Department);
Livestock Form (Customs Department).

Post Office:

Form P. 160 – Notification of Departure of Vessel;
P. 1/27 – Certificate of Departure of Vessel;
P. 1/149 – Ships Mail Declaration;
P. 21 – Post Office Certificate.

Port Health:

Maritime Declaration of Health;
Crew List with last vaccination dates;
Deratisation Certificate.

Port authority:

Form T 958 – Report of Arrival;
T 962 – Departure/Shifting Notification;
T 942 – Clearance Certificate;
Ship's Manifest.

PILOTAGE: Pilotage is compulsory. The vessel's Master must radio his ETA to his local Agent, who completes form T.958 for submission to the Port Authority.

Channel 16 on VHF radio can be used to call the Port Control Office. Pilot boats are normally black with a white superstructure and have a yellow funnel with horizontal green stripes.

The Pilot boards at a point approximately 1 km. from the Fairway Buoy (entrance channel buoy) in the direction of the Bell Buoy (Pelican Point Spit Buoy).

The Pilot will inform the Master by means of the VHF on which side the pilot-boarding ladder and manropes are required.

ANCHORAGE: Varying in depth from 9 m. – 14 m. at LWOST. Bottom – sand and silt. (Please also see "Africa Pilot" Vol. II).

RESTRICTIONS: The movement of Oil Tankers and vessels carrying explosives or dangerous goods are restricted to daytime hours. The maximum permissible draft is 9.4 m.

MAX. SIZE: Draft of vessels is the major restricting factor (9.4 m.). The maximum permissible length at the tanker berth is 192 m.

HEALTH: Same procedures apply as at South African ports.

RADIO: Call sign ZSV. VHF radio in Port Captain's Office.

VHF: VHF Radio is used by Pilots and Channels 11, 12 and 13 are available.

RADAR: Radar is fitted to the harbour tugs and pilot boats. The Port Captain's Office is awaiting installation of port operations Radar.

TUGS: Two first-class tugs equipped with radar, wireless telegraph and telephone direction-finding apparatus and salvage and fire-fighting appliances; 2 Pilot boats and 1 launch.

Tugs normally join a vessel in the entrance channel and are secured by means of the tugs' wires. There is no charge levied for the use of the tugs' lines.

BERTHING:

		Depth at	Cranes	
Wharf	*Length*	*LWOST*	*No.*	*Capacity*
Berths 1, 2 & 3	487.68 m.	10.06 m.	5	4 tons
(Working Portion 457.2 m.)			1	15 tons
Berths 4–8	926.6 m.	10.67 m.	22	4 tons
			1	15 tons

BULK LOADING FACILITIES:

(i) Travelling ore loader for handling zinc, lead and copper concentrates for export. (This appliance is privately owned).
(ii) Privately-owned Bulk Fishmeal Loaders.
(iii) A fish-oil pipe-line at Berths 1, 2 and 3.

SPECIALISED CARGO-HANDLING FACILITIES: Ro/Ro berth introduced in 1979. Container stacking area and 2 container stacking cranes available. Ships gear will still be required for loading and unloading containers. Liquid chemicals are handled in tank containers.

STEVEDORES: Stevedoring is undertaken by private enterprise and stevedores are appointed by Ships' Agents.

MEDICAL: Hospitals are available but prior arrangements have to be made with Agents for medical assistance.

TANKERS: See "Max. Size" and "Restrictions".

Tankers up to 192 m. in length can be accommodated. Depth alongside 10.06 m. at LWOST.

Storage and pumping facilities are privately owned.

DENSITY: 1025.

FRESH WATER: Available and delivered by hose ex-wharfside – hydrant at 15 t.p.h.

FUEL: Diesel fuel is available but heavy oil is only available if special arrangements are made with the local oil companies.

FIRE PRECAUTIONS: When berthed alongside a wharf or jetty, a ship having explosives or any other goods of a dangerous nature, the Master shall, if the Port Captain so directs, have a fireman in attendance, the cost whereof shall be borne by the Owner of the ship and the Master of any such ship shall also, at the expense of the Owner of the ship, adopt such other or further precautionary measures as the Port Captain may consider reasonably necessary for ensuring the safety of the harbour, the ship or the cargo.

CONSULS: Norwegian and Belgian Consulate.

REPAIRS: Undertaken by private enterprise on a small scale.

DRY DOCK: There are no dry-docks available at this port. A syncrolift with a lifting capacity of 2,000 tons, maximum permissible length of 80 m. and a depth of 10 m. is operated and owned by the Department of Sea Fisheries.

SURVEYORS: Available for various classification societies.

GANGWAY/DECK WATCHMEN: Arrangements have to be made with vessel's Agents to secure services of gangway/deck watchmen.

HATCHES: Arrangements have to be made with stevedores in connection with opening/closing of hatches.

CUSTOMS ALLOWANCE: As per Customs Tariffs.

CARGO GEAR: Loading/discharging of cargo is effected by means of shore cranes.

REPATRIATION: All facilities available.

AIRPORT: The nearest International Airport is at Windhoek 445 km. from Walvis Bay.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; Ascension Day; Day of Covenant (16th December); Christmas Day; Boxing Day (26th December).

Cargo is now worked on Saturdays, Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Police Tel. 2055; Ambulance Tel. 3441; Fire Department; Municipal: Tel. 3117.

TELEPHONES: Arrangements have to be made with Post Office to have a telephone connected.

SERVICES: Tank-cleaning, compass adjustments and minor repairs can be undertaken.

SHORE LEAVE: Allowed.

REGULATIONS: A copy of the Regulations are supplied gratis to Masters on arrival.

DELAYS: Dependant on weather conditions.

AUTHORITY: Port Captain, Walvis Bay.

NOTES

Please also advise Shipping Guides Ltd.

Nauru Island

NAURU: 00.32 S. 166.56 E.

DOCUMENTS:

International Declaration of Health, 1 copy.
Clearance from last port.
Crew Lists, 2 copies.
Passenger Lists, if any, 2 copies.
Manifest, 1 copy.

PILOTAGE: Pilotage is available on request without charge; Masters are advised to avail themselves of this service. It is necessary that Masters, through Radio Nauru, inform telegraphic address Nauruphos Nauru of ETA 48 hours before arrival, confirming or altering this 12 hours before arrival. Nauruphos will reply through Radio Nauru on receipt of second message giving time for the vessel to close in to 0.5 mile West of loading plants, where Pilot will board. In case of adverse weather or congestion, Masters will be notified by radio, or by VHF Channel 16, 156.8 Mc/s with range of about 40 miles. Vessels are handled inwards in daylight only, and should fly flag when approaching island. A safe and clean pilot ladder should be provided, a good lee made for the Pilot to embark.

ANCHORAGES: No anchorages are available owing to the extreme depths of water. Vessels waiting normally drift off and return at daybreak or when instructed to do so.

RESTRICTIONS: Tide and draft have no bearing on entry but it is normal not to handle vessels into berth in darkness. However, vessels are unmoored at all hours.

MAX. SIZE: Vessels have been handled up to an overall length of 630 ft. Beam should not exceed 90 ft., but there are no draft limitations.

HEALTH: Masters of vessels approaching Nauru are required to send a telegram addressed to the Quarantine Officer, Nauru within 24 hours of arrival. The telegram should state the name of last port, date, presence of any infectious disease. On receipt of telegram, the quarantine officer will send reply indicating whether or not pratique is granted. It is still necessary to fill out the International Declaration of Health and hand this to Boarding Officer after berthing.

RADIO: Nauru Radio station, call sign C2N. Should, through atmospheric conditions, difficulty be found in raising Nauru, it is suggested that the message be passed through Sydney or any other convenient coastal station. Port Radio VHF, calling Channel 16, working Channel 12, permanent service.

TUGS: No tugs available for berthing.

BERTHING: Such special requirements which relate to berthing in the port are contained in a Letter of Advice to Ship Masters issued by the BPC. Shore labour normally boards the vessel with the Pilot to assist in mooring to the buoy system.

STEVEDORES: As stevedoring is carried out by Nauruphos, no separate advice is required. Loading rate of bulk phosphate is as high as 3,000 t.p.h.

MEDICAL: Medical treatment can be given at short notice. Limited hospital facilities are available, and emergency surgery can be carried out. Smallpox vaccination is required, and cholera if the vessel has come from an infected area.

TANKERS: Lengths and drafts as for bulk phosphate vessels. 8 inch discharge line to shore storage tanks.

DENSITY: Normal salt water all states of tide.

FRESH WATER: Island water is imported, and water will be supplied only in cases of emergency.

FUEL: Island stocks are imported for use in the phosphate industry, and only limited quantities of heavy fuel or diesel oil can be made available in cases of extreme urgency.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Carried out by crew.

SHIP CERTIFICATES: Deratisation certificate only.

CUSTOMS ALLOWANCE: No restrictions apply.

CARGO GEAR: Cargo gear should be up to the standard demanded in Australian ports.

CREW IDENTIFICATION CARDS: Some form of identification, passport, discharge book, or identity card should be carried by Crew members.

CONSULS: An Australian Representative is resident on the Island.

REPAIRS: The phosphate industry requires good workshop facilities of various kinds for maintenance of their own heavy plant and such workshops are kept busy at all times. Small repairs such as welding, brazing, lathe work, etc., can be carried out, but only when essential to allow the vessel to proceed on its voyage. Main engines cannot be immobilised whilst the vessel is moored to any section of the buoy system.

REPATRIATION: Repatriation can be arranged. No facilities for crew changes.

AIRPORT: Air Nauru operates a twice weekly service to Melbourne and Hong Kong. Other routes include Fiji, Majuro, Japan, Samoa, Vila, Honiara and Taiwan.

TIME: Local time is GMT plus 11.5 hours. No alterations during the year.

HOLIDAYS: Christmas Day, New Year's Day, and Good Friday are normally closed holidays. Other National holidays occur during the year but normally work carries on, on these days.

POLICE/AMBULANCE/FIRE: All emergencies are handled by the Harbour Masters, one of whom remains aboard the vessel throughout the time the vessel is attached to the mooring system.

TELEPHONES: Telephones are put aboard for the use of island staff working the vessel.

SERVICES: No special services available.

SHORE LEAVE: This may be granted at the discretion of the Master but should in all cases terminate at 1700 hrs.

PORT REGULATIONS: No vessel may immobilise main engines whilst moored to the buoy system. Main engines should be on instant readiness, deck power should be available at all times, and the vessel must proceed to sea when instructed to do so by the Harbour Master.

DELAYS: Normally no delays should be expected. Vessels could wait a day, or possibly 2 due to port congestion, but this seldom happens; delays can occur due to adverse weather, the duration of which is unpredictable.

AUTHORITY: The Harbour Master, appointed by The Nauru Phosphate Corporation, Nauru.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands

AMSTERDAM: 52.22 N. 04.54 E. (See Plan Book)

PORT LIMITS: Notices of Readiness will only be accepted (subject to C/P terms) if vessel has actually arrived at Amsterdam, which means that vessels have to enter from sea and pass the locks at Ijmuiden, proceeding through the North Sea Canal to Amsterdam. There are various buoys and quays available where vessels can be moored waiting for final discharging berth.

DOCUMENTS:

Health Certificate. Forms obtainable from sea Pilot.
Crew List in triplicate.
2 copies of Crew Manifest for cigarettes, cigars, spirits, etc., belonging to crew.
Passenger List in triplicate.
1 copy of Manifest.
1 copy of Bills of Lading.
Dangerous Cargo List.
Ship's Register.
1 copy Stores List.

PILOTAGE: Pilotage is compulsory. A pilot vessel cruises at sea in the vicinity of Ijmuiden between the light whistle buoy and the moles.

In order to avoid delays, Masters who require a Pilot must advise their ETA not less than 4 hours in advance to "Pilotage Ijmuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain: *(a)* the words "ETA-pilot", *(b)* expected time arrival (group of 4 figures) in middle European time, *(c)* draft with indication of unit applied, *(d)* port of destination.

"Pilotage Ijmuiden" can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation is possible at night.

Pilotage by Helicopter: When the pilot service by pilot cutter has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of min. 15 ft. diameter. Deck plans should be provided in advance.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind force 10 (55 kts.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot Ladders: Pilots strictly adhere to regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

ANCHORAGE: Anchoring in Ijmuiden outer harbour, North Sea Canal and in harbour of Amsterdam is prohibited.

RESTRICTIONS: Entry possible at night. Official max. draft is 43 ft. (salt water). By permission of Government Harbour Master at Ijmuiden it is possible to enter with max. draft 45 ft. (S.W.). Such permission to be applied for at least 14 days prior to arrival.

MAX. SIZE: Vessels proceeding to Amsterdam have to pass locks at Ijmuiden. Dimensions of Northern lock (biggest): 1,312 ft. long, 164 ft. wide 49 ft. 2 in. deep.

RADIO: Cable Agents giving ETA draft, cash and other requirements via Scheveningen Radio/PCH.

RADAR/VHF: Harbour radar is installed at Ijmuiden. In bad visibility radar assistance will be given for incoming ships day and night. A radio portophone is provided by Pilot. Direct communication between incoming and outgoing ships and commanding post of locks is possible by means of VHF radio telephone, Channel 11. Government patrol boats are also equipped with VHF installations. The Radio-Radar Station (Redeplot) can also be contacted via VHF Channel 12 before approaching Ijmuiden.

Gemeentelijk Havenbedrijf (Port Management) on VHF Channel 14 day and night.

TUGS: Sea-going tugs available between piers at Ijmuiden assisting vessels, into locks or outer harbour. Harbour tugs available in locks assisting vessels to Amsterdam. The rates include use of tug hawser.

BERTHING: Possible at night. If no berth available vessels may be moored on buoys.

BRIDGES: Vessels proceeding to Oil Harbour, Coen Harbour, Vlot Harbour and installations in Eastern part of port pass railway bridge over North Sea Canal at Zaandam. Notices indicating distance from bridge have been placed at 500 m. at either side and notices to stop at 150 m. at West side and 225 m. at East side. When bridge closed Masters must stop their ships and must on no account proceed unless signal is given that passage is allowed. Bridge is opened regularly in accordance with time-table of Netherlands Railway.

STEVEDORES: In order to enable Agents to order gangs in time it is recommended to keep Agents duly informed about ETA. No ETA to stevedores necessary.

MEDICAL: If immediate medical assistance will be required in the locks at Ijmuiden, Agents must receive advance notice.

BULK HANDLING FACILITIES: *Grain:* The Silo installation of IGMA at Vlothaven depth alongside 49 ft. 3 in., has main jetty 1,200 ft. length to accommodate 2 vessels up to 80,000 tons d.w.t. Ships unloaded by 4 mobile pneumatic suckers, with capacity 400 t.p.h., and 3 floating elevators. Daily discharge capacity about 17,000 tons.

On discharging side maximum gear height above water line 92 ft. On loading side maximum gear height above water line 36 ft.

Ore, Coal, etc: NV Overslagbedrijf Amsterdam in West harbour, quay 2,600 ft. length, max. draft 45 ft. (SW).

Discharging rate of gear up to 60,000 (Coal) tons and 100,000 (Ore) tons per 24 hours. Loading rate about 2,000 t.p.h.

Maximum outreach of loading and discharging gear 164 ft.; max. height of loading discharging gear above water level 80.5 ft. Four high speed gantry cranes in use.

NV Havenbedrijf Rietlanden Quay length 2,500 ft. depth 35 ft. Capacity about 15,000 tons per day.

Phosphate: Albatross Fertiliser Works Jetty, depth alongside 31 ft. Two grab cranes with daily capacity of 7,000 tons.

Containers: Length of quay 1,088 m. Roll-on/roll-off berth: 140 m., depth alongside quay 36 ft.

The berth is equipped with 3 gantry cranes with lifting capacity of 50 tons and 1 multi-purpose crane with a capacity of 30 tons and 4 cranes with a capacity of 5 tons.

Ferry Terminals (Roll-on/Roll-off terminals): Scandia Terminal in the Suezhaven, 10.5 nautical miles from the sealocks in Ymuiden. Total area 50,000 sq. m., marshalling area 28,000 sq. m., quay length 400 m. shed space 2,300 sq. m., modern passenger building.

Combined Terminals Amsterdam B.V. (C.T.A.)

Berth No. 1: Length 250 m. Depth 13 m.
No. 2: Length 215 m. Depth 11.5 m.
No. 3: Length 140 m. (Ro/Ro) Depth 11.0 m.
No. 4: Length 290 m. Depth 11.0 m.
No. 5: Length 150 m. Depth 11.0 m.

Equipment: 3 Portainers, capacity 50 tons. 2 rail-mounted dock cranes capacity 30 tons at 20 m. outreach and 12 tons at 40 m. outreach. 7 multi-purpose cranes, 2 rail mounted transtainers, capacity 35 tons and 45 tons. 40 reefer points.

Another terminal is located in the Coenhaven, 11 nautical miles from the sea-locks in Ymuiden. It is equipped with a ramp with movable link span (twin construction), 40 ft. wide and 63 ft. long and has 2 more berths for roll-on/roll-off vessels. The water depth is 33 ft. The terminal also includes a passenger hall (1,000 sq. m.), 3 ha (7.5 acres) of parking space and ample shed space. A mobile container crane (35 tons capacity), side-loaders (20 tons), tug masters, slave trailers, flats, containers and fork-lift trucks are available.

Molasses: Tradax–2 jetties, max. draft 11.30 m. receiving capacity 1,000 t.p.h. Max. d.w.t. 65,000 tons (approx.). Connections 8 in.

Minerals: Eggerding & Co. B.V. Length of quay 400 m. Depth alongside 33 ft. Discharge is carried out by floating cranes.

TANKERS: *Oiltanking B.V.:* 1 jetty for 2 vessels of 100,000 tons. Max. draft 44 ft. 6 in., 2 jetties for 2 vessels of 3,500 tons, 1 jetty (used in case of fire). Pipe-line connection 6 in. and 8 in. Receiving rate 2,000 t.p.h. Loading rate 2,000 t.p.h. depending on grade and condition. Fresh water available from jetty, fuel by barge. Stores by barge or trucks. (Jetty not accessible to trucks). Dirty ballast by barge.

Mobil: 2 jetties, 1 for vessel of 30,000 tons and another for vessel of 80,000 tons. Max. draft 44 ft. 6 in. pipe-line connections 10 and 12 in.

One jetty for coast tankers or LPG tankers up to 2,500 tons.

The receiving rate for crude oil is 4,000 cu. m./hr. The loading rate varies from 400–1,900 cu.m/hr. depending on grade.

Fresh water available from jetty. Fuel available, pipe-line 8 in. Facilities available for dirty ballast if vessel to load at berth. Max. capacity 10,000 tons. Stores by barge or truck (Jetty not accessible to trucks).

Amatex: 4 jetties, depth alongside 32–41 ft. Pipe-line connections 6 in. – 12 in.

Receiving rate, 4–1,200 t.p.h. depending on grade and back pressure, if any. The loading rate is about 1,000 t.p.h. depending on grade.

Fresh water available by barge. Fuel available by barge. There are facilities for dirty ballast under special conditions. Stores mainly by truck (Jetties not accessible to trucks).

Comos: Two jetties, depth alongside 44 ft. 4 in. Pipe-line connections 8 in. and 12 in. Four jetties available for seagoing vessels and barges up to a max. draft 14 ft. 9 in.

The receiving capacity is about 2,000 t.p.h. and loading rate up to about 1,000 t.p.h.

Fresh water available by barge. Fuel available by barge or pipe-line. Stores by truck. There are no facilities for dirty ballast.

Smid & Hollander: One jetty for receiving crude oil, max. draft 42 ft. 8 in. Fresh water and fuel available by barge. Stores by truck (Jetty not accessible to trucks).

Noord Europees Wijnopslagbedrijf B.V.: One jetty, depth along-side 20 ft. Fresh water and fuel available by barge. Stores by truck.

DENSITY: Amsterdam is not a tidal port. The water is brackish to fresh.

FRESH WATER: Drinking and boiler water can be supplied by barge, or if connection available, from shore. Price depends on quantity ordered.

FUEL: All grades of fuel are available. Advance notice 48 hours.

FIRE PRECAUTIONS: No repair work to be carried out to tankers without permission of Harbour Authorities. Usual non-smoking precautions, etc.

GANGWAY/DECK WATCHMEN: Not required. Dependent on commodity of cargo.

OPENING/CLOSING HATCHES: Liner vessels by crew or by stevedores, payable per man per hour. Tramp vessels as per Charter Party.

CERTIFICATES:

Ship's Register.
Usual Cargo Certificate.
Safety Radio.
Safety Equipment Certificate.
Crew Roll.

All usual certificates required for navigation.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per man or equivalent of tobacco or cigars. Wine and/or Spirits: 5 litres of wine per man. Spirits: total 5 litres for the whole ship.

CARGO GEAR: Usual cargo certificate.

IDENTIFICATION CARDS: Not needed.

CONSULS: Nearly all countries have established consulates at Amsterdam.

REPAIRS: All types of deck and engine repairs are possible including gas-freeing and tank-cleaning.

DRY DOCKS: ADM: 4 dry docks, largest of which length 817 ft. breadth 120 ft., depth 28 ft. Capacity 72,000 d.w.t.; 2 floating docks largest of which length 677 ft. breadth 97 ft. 6 in., lifting capacity 40,000 tons d.w.t.; other floating docks available for vessels up to 4,500 tons.

REPATRIATION: Facilities for repatriation of crew to any destination are available.

AIRPORT: Distance to Schiphol Airport (served by regular airlines) 15 km.

TIME: GMT plus 1 hour. Summer time GMT plus 2 hours.

HOLIDAYS: New Year's Day; Easter Monday; Queen's Birthday (April 30th); Ascension Day; Whit Monday; Christmas Day and Boxing Day.

Cargo can be worked during these days subject to labour being available at premium rates.

POLICE/AMBULANCE/FIRE: Police 222222; Ambulance 355555; Fire 666666.

TELEPHONES: Telephone connections on board are only possible on certain quays (passenger ships). It is possible to rent portable mobilephones.

SERVICES: 1 tank cleaning installation, compass adjusting/direction finder calibration, representatives of all leading radio installations, radar and other nautical instruments available.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Usually no congestion.

AUTHORITY: Gemeentelijk Havenbedrijf Amsterdam. (Port Management of Amsterdam)

AGENT: Wm. H. Muller & Co. Amsterdam B.V., "Havengebouw", 7 De Ruyterkade, P.O. Box 182, 1000 AD, Amsterdam. Telegrams "Mineral". Telex 12058. Tel. (020) 26 34 56.

DELFZIJL: 53.20 N. 06.54 E. (See Plan Book)

LOCATION: On the estuary of the River Ems, opposite Emden.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Pilot boats normally cruise at Wester-Ems buoy. During bad weather they withdraw into estuary, but never further than Borkum Roads. Pilot boats listen on Channel 6 and pilot office on Channel 14 VHF; distance from pilot station to Delfzijl 32 miles. Pilot service compulsory for all vessels drawing over 2.2 m. Foreign vessels may call Pilot on 2182 kHz. and Netherlands vessels on 2391 kHz. Traffic between the cutter and the vessel will be held on 1657 kHz.

Approaching vessels from sea should inform the Pilot commissioner of their ETA in M.E.T. with a notice at least 4 hours in advance via Scheveningen Radio (PCH); the pilot cutter may be informed via VHF.

The ETA message should contain the following details: *(a)* ETA Pilot Westereems (time in M.E.T. in a group of 4 figures); *(b)* Draft; *(c)* Port of destination.

Departing vessels should apply for a Pilot at least one hour before ETD; the request should be made to the office of the Inspector of Pilotage.

Pilotage from Delfzijl to Emden is not compulsory. On request however a Pilot may be put at the Master's disposal for a trip to Emden. This is not applicable for a trip from Emden to Delfzijl or Eemshaven.

ANCHORAGE: Vessels up to 4,000 tons d.w.t., which for some reason have to anchor outside the piers can do this East of the harbour entrance near Oterdum. Anchorage is situated within the following area: a line connecting the buoys BW 13 – BW 15 – BW 26 – PS 2. Request for anchorage at the office of the Harbour Master, VHF Channel 14. Larger vessels should seek an anchorage in the Doekegat. There is no anchorage inside the harbour.

ENTRANCE: The harbour entrance lies opposite the former village of Oterdum. The entrance extends to reach the deep water of the Bocht van Watum, and lies opposite the dredged channel between the Bocht van Watum and the Oostfriese Gaatje near Paapsand Sud.

The harbour entrance has an initial depth of N.A.P. −10 m., and a bottom width of 200 m. The harbour channel has the same depth, and a width of 100 m.

Depths: All depths are indicated in relation to N.A.P. LLWS at Delfzijl lies 2.03 m. below N.A.P. (Normal Amsterdam Level).

Tides: The range at Springs is 3.05 m. and at Neaps 2.35 m. Tidal movement is diurnal with an average range of 2.7 m.

MAX. SIZE: The harbour entrance has a depth of 8 m. at LLWS. Vessels drawing up to 9 m. can enter under normal HW circumstances; a keel clearance of about 1 m. will be maintained. Masters of vessels with large draft are recommended to contact the Pilot Service in good time with regard to the water level to be expected near Paapsand-Sud and in the Zeehavenkanaal. In the harbour "always afloat" can be guaranteed along the entire length of the Handelskade West for vessels with a draft up to 8.7 m. See "Depths" above.

TUGS: Tugs up to 900 h.p. available. Additional tugs can arrive within 3 hours from Emden.

RADIO: Cable to Agents via Radio Scheveningen. (PCH).

VHF: The Harbour Master's office is equipped with a VHF installation, Channel 14. The station is constantly manned.

BRIDGES: Bridge to the Damsterhaven may always be worked. Bridge to the Oosterhornhaven will be handled from Monday to Saturday. On Sunday bridge may be opened on special request at the Harbour Master's Office.

BERTHING: The Outer Harbour is divided into 3 communicating basins: Handelshaven, Balkenhaven and Zeehavenkanaal.

Handelshaven, in the Western part of the Outer Harbour, has a deepwater quay, 520 m. long, with a depth of 11 m. alongside, 2 mooring buoys in a depth of 11 m. also jetties 110 and 130 m. in length, with a depth of 7 m. alongside.

Balkenhaven, East of Handelshaven, has depths of 8.5 m. to 5.5 m.; there are berths at several mooring buoys for small sea-going vessels.

Zeehavenkanaal is the Eastern part of the Outer Harbour and is being developed as a deep-sea harbour; it has a depth of 11 m. There are several private mooring facilities in the Sea Harbour Channel, from West to East:

a. Private quay of Wagenborg Terminal B.V. with a depth of 7 m.;
b. Private jetty of the Alcohol Factory. Tankers up to 25,000 tons d.w.t. can be accommodated here. Depth alongside 12 m.;
c. Private jetty of AKZO is equipped with a loading station with a loading capacity of 500 tons salt/hour. Ships up to 25,000 tons d.w.t. can be accommodated here; depth alongside 12 m.;
d. Private jetty of the Methanol Chemie Nederland (M.C.N.) equipped with a loading station with a loading capacity of 500 tons of methanol per hour. Tankers up to 20,000 tons d.w.t. can be accommodated here; depth alongside 10 m.;
e. Private jetty of the Aluminium Factory equipped with cranes is able to accommodate ships up to 30,000 tons d.w.t. Depth alongside is 12 m.

The Oosterhornhaven behind the dyke is a basin with a total length of 3,100 m. and a width of 60 m.

Navigating Oosterhornhaven is prohibited for vessels having a LOA exceeding 75 m. and/or having a maximum beam exceeding 12.50 m. and or having a draft exceeding 4.50 m., unless a special permission is obtained from the Harbour Master subject to certain conditions.

Amongst others there are mooring facilities located in this canal alongside the yard of Azko and Methanol Chemie, equipped with loading installation and a tanker jetty.

The Eemskanaal:

Several private mooring facilities are located here. These are the following:

Name	*Type*	*Suitable for*
Jonker's Terminal	Potatoflour, bulk term	Coasters
Aankoop Centrale	Grain elevator	Coasters
Terminal Delfzijl	Timber Terminal	Coasters
C.Z.G.B.	Stevedores	Coasters
B.P.	Oil storage	Inland vessels
Gulf	Oil storage	Inland vessels/Coasters
Eemsmond	Cement factory	Inland vessels
Jansen Continental	Grain elevator	Coasters

The Sea Locks:

The link between the Outer Harbour and the Eemskanaal and also the Oosterhornhaven of the port area is formed by the provincial sea locks. Sea-going vessels up to 6,000 tons d.w.t. with a beam of 16 m., a length of 120 m., and a draft of up to 5 m. can use these locks. As this will generally apply to vessels in ballast, the locks for this size of vessel are only of importance for the Groningen shipyards.

For loaded vessels, the limit lies between 2,000 and 2,200 tons d.w.t. In the Outer Harbour of the locks sufficient berths have been provided for vessels waiting to pass through the locks.

Dimensions of locks:

The Western (small) lock has a length of 123 m. at falling tide and 81 m. at rising tide, a width of 7 m., a depth of sill outside 4.2 m. inside 2.4 m.; across each lock head lies a bascule bridge. The Eastern (large) lock has a length of 120 m., a width of 16 m., depth of sill 5.4 m.; across each lock head lies a drawbridge. The opening times of the locks are continuous on weekdays.

Sheds and warehouses:

There are several sheds and warehouses (total capacity: 3,250 sq. m.); also open storage. Grain silo with a storage capacity of 2,000 tons loose and 500 tons in bags. Also several private sheds, warehouses and grain silos.

CRANES: There are about 10 shore cranes with capacities up to 12.5 tons and a floating 60 ton crane.

STEVEDORES: *Working hours:*

Morning shift 08.00 – 12.00
Afternoon shift 13.00 – 17.00
Evening shift 17.30 – 21.30
1st night shift 22.00 – 02.00
2nd night shift 02.30 – 06.30
Extra shift 03.30 – 07.30

Combination of shifts possible:
1. Morning shift+afternoon shift
2. Afternoon shift+evening shift
3. Evening shift+1st night shift
4. 1st night shift+2nd night shift
5. Extra shift+morning shift

Double shift:
from 05.00 – 13.30 and
from 13.30 – 22.00
Each shift half an hour's break

Work on Saturdays and Sundays:

Work on Saturdays and Sundays can be arranged in the same manner as this is done in the ports of Rotterdam and Amsterdam, *viz.* in consultation with the stevedores.

DENSITY: Ranging between 1007 and 1020, depending on the tide.

FRESH WATER: Water obtainable alongside the quays or can be delivered by motor tankers.

FUEL: Fuels in limited quantities for coasters are always available. For bunkering of larger vessels, arrangements should be made in advance.

GANGWAY/DECK WATCHMEN: According to police regulations, Master has to keep watchmen on board.

AIRPORT: Eelde (Groningen).

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CONSULS:

At Delfzijl		*At Groningen*	
Denmark	tel. 05960–16333	Belgium	tel. 050–138222
Finland	tel. 05960–16800	Germany	tel. 050–139922
France	tel. 05960–13778	Norway	tel. 050–189444
Sweden	tel. 05960–16333	Spain	tel. 050–137879

REPAIRS: Most engine and deck repairs can be carried out by two local shipyards.

DRY DOCKS: Dry-docking is limited to ships up to 3,000 d.w.t. with a draft not exceeding 32 dm. For larger vessels, dry-docking facilities exist in the nearby port of Emden (Germany).

CERTIFICATES: The tonnage certificate should be shown to Harbour Master on first call every year.

HEALTH, MEDICAL ATTENDANCE, HOLIDAYS, LOCAL TIME, CUSTOMS ALLOWANCES: See "Rotterdam".

REGULATIONS: *Regulations for arrival and departure of sea-going vessels:*

1. The arrival of a sea-going vessel, other than vessels passing through the port, must be reported in writing by the Master, or his local representative at the Harbour Master's office twenty-four (24) hours prior to arrival;
2. The declaration of arrival must contain:
   a. name and flag of vessel,
   b. nature and amount of the cargo to be discharged and/or loaded;
   c. dangerous goods, according to the IMGD or IMCO code;
   d. last port of call;
   e. ETA and next port of call.
3. Declaration of arrival must be made on the special forms or per teleprinter (53299 HSDDZ);
4. At least three hours before departure the Master, the shipping company or its local Agent must notify the Harbour Master's office of the intended departure, stating the estimated time of departure and the destination of the vessel.

AUTHORITY: Port of Delfzijl Authority.

AGENTS: Maritima Scheepvaart en Handelmaatschappij B.V., De Vennen 52, Delfzijl. Tel (05960) 18989. Cables "Maritima". Telex 53153.

DORDRECHT: 51.49 N. 04.40 E. (See Plan Book)

DOCUMENTS: See "Rotterdam".
PILOTAGE: Compulsory. Vessels have to enter New Waterway at Hook of Holland and proceed to Dordrecht via this New Waterway and the River Oude Maas. Masters of vessels bound for Dordrecht should state destination in ETA message as Pilots for Dordrecht embark from pilot cutter at roads. Deep-drafted vessels may have to exchange Pilots just inside breakwaters at Hook of Holland. (See Rotterdam "Ordering a Pilot").
ANCHORAGE: At sea off Hook of Holland (see "Rotterdam"). No anchorage between entrance to New Waterway and Dordrecht.
RADIO/RADAR/VHF: No radar service on River Oude Maas or Dordrecht.
RESTRICTIONS: Max. LOA 175 m. Max. breadth 23 m. Max. draft 30 ft. Max. breadth is discussable as 25.90 m. could be allowed. For tankers min. visibility 500 m. (1,640 ft.). For dangerous cargoes, see "Rotterdam". The Pilot will decide the number of tugs required for passage on the Oude Maas, usually a min. of 3–4.
TUGS: Tugboats ordered by Pilot when entering New Waterway. Tugs normally meet vessels at Dordrecht.
CRANES: 2 Transporting bridges 15 tons each, 2 Portal cranes 12.5 tons each, 1 Portal crane 7 tons. 1 cargo crane 5 tons capacity.
BRIDGES: Bridges across the River Oude Maas are opened day and night. Sea traffic has preference over shore traffic.
STEVEDORES: Working hours: 0730 hrs on Monday until 1400 hrs on Saturday.
TANKERS: Oil installation of Gebr. Broere N.V. has seven tanker berths. Max. draft 9.0 m. There are other tanker berths for small tankers. No slop (residue) storage facilities.
REPAIRS: Yards of various capacities available for all types of repairs.
FRESH WATER: At oil installations fresh water can be supplied from shore or supply by waterboat.
FUEL: Available by barge.
CONSULS:
Denmark tel. 32177 Norway tel. 32177 France tel. 33231.
Other consulates at Rotterdam at 20 km. distance.
POLICE/AMBULANCE/FIRE: Tel. Police 30333; Ambulance and Fire 33333.
AIRPORT: Rotterdam and Amsterdam airports at a distance of 30 and 90 km. respectively served by regular airlines.
PILOT CUTTERS, HEALTH, MEDICAL ATTENDANCE, BUNKERS, CUSTOMS ALLOWANCES, HOLIDAYS: See "Rotterdam".
TIME: GMT plus 1 hour. Summer plus 2 hours.
AUTHORITY: Havendienst der Gemeente Dordrecht.
AGENTS: See "Rotterdam".

EEMSHAVEN: 53.27 N. 06.50 E. (See Plan Book)

LOCATION: On the Western shore of the River Eems, about 15 km. N.W. of Delfzijl.
PILOTAGE: See "Delfzijl".
ANCHORAGE: Near the Western mole of the Eemshaven is an anchorage with a depth of about 16 m.
RESTRICTIONS: The entrance channel Doekegatkanaal has a depth of 12 m. thus enabling ships with draft up to about 12 m. to enter at HW. Plans exist to increase the possible draft to about 13 m.
Tides: The range at Springs is 3.05 m. and at Neaps 2.35 m. Tidal movement is diurnal with an average range of 2.7 m. (all approx.).
Depths: All depths are indicated in relation to N.A.P. LLWS at Eemshaven lies 1.84 m. below N.A.P. (Normal Amsterdam Level).
RADIO/TUGS/VHF: See "Delfzijl".
BERTHING: The harbour is divided into 4 communicating basins:
Doekegatkanaal: Has a depth of 14 m. at the entrance and 12 m. further on. The bottom width at the moles is 300 m. at 14 m.; the minimum width is 275 m. at 12 m. At the end of the Doekegatkanaal is a turning basin with a diameter of 500 m. and a depth of 12 m.
Wilhelminahaven: East of the turning basin is a special basin for tankers with a depth of up to 17 m. and a bottom width of 200 m. This basin has a length of 600 m. Mooring facilities will be constructed by future industries.
Julianahaven: Located West of the turning basin. This basin has a length of 1,200 m. and a width of 250 to 300 m. ultimately. The depth of this basin varies between 14 and 17 m.

To the South of this basin a quay has been constructed with a length of 600 m. and a width of 300 m. The quay is equipped for general and unitised cargo handling to be handled with 2 cranes with a maximum lifting capacity of 20 tons and 1 crane with a lifting capacity of 30 tons. A Ro-Ro ramp is incorporated in the construction of this quay. (The Quay will be extended to the West by approx. 200 m. in the course of 1980/81).
Emmahaven: Has been constructed South of the quay and West of the swinging basin. This basin with a length of 600 m. and a width of 130 m. has been dredged to 10 m.
SUPPLIES: Fuel oil and provisions should be arranged in advance.
REGULATIONS: See "Delfzijl".
AUTHORITY: Port of Delfzijl Authority.
AGENT: See "Rotterdam".

FLUSHING: 51.27 N. 03.35 E. (See Plan Book)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Store List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.
PILOTAGE: Position of pilot cutters in the Scheldt Estuary: Pilotage is compulsory.
Wielingen (Southern approach) or via Scheur: Vessels approaching the Scheldt estuary from the English Channel pass the lightvessels Sandettie Banks and West Hinder. The Belgian pilot cutter *Wandelaar* is stationed near Buoy A1 at 51° 22′ N. and 02° 53′ E. This cutter has a black hull with a white number on her bow, a yellow funnel with black top and flies a red flag with the letter "P" in white.

A vessel bound for Flushing to discharge, bunker, load, to embark or disembark passengers or for repairs will be provided with a Dutch Pilot, who will take the vessel into harbour. Other vessels for Flushing (sheltering, awaiting orders, unplanned repairs, etc.) will be provided with a Belgian Pilot to Flushing Roads, where a Dutch Pilot comes on board to take the ship into harbour.

Oostgat (Northern approach): Vessels approaching the Scheldt estuary from the North can take a Pilot in the vicinity of the S.B.Z. lightbuoy (51° 42.3′ N. and 03° 14.3′ E.) where a Dutch pilot cutter is stationed, flying a blue flag with the letter "L" in white. As a rule vessels bound for Flushing are provided with a Dutch Pilot.

ETA Messages: Masters' telegrams via Scheveningen Radio, call sign P.C.H., are passed on to Agents 24 hrs. a day, week-ends inclusive.

For this reason it is advisable that Masters communicate with Agents via Scheveningen Radio, via which station Agents also route their messages to vessels.

Vessels bound for the River Scheldt should cable, at least 4 hours in advance, their:

1. ETA "Wandelaar" (Southern Approach) to:
   "Pilotage Ostend", via Ostend Radio (OST):
2. ETA "Steenbank" (Northern Approach) to:
   "Pilotage Flushing", via Scheveningen Radio (PCH).

The ETA message should contain the following details: *(a)* the words "ETA Pilot Wandelaar or Steenbank". *(b)* ETA central European time shown in a group of four figures. *(c)* draft (S.W. or FW) with indication of unit applied. *(d)* port of destination and berth.

Pilot cutters may be contacted on VHF Channel 6.

During bad weather both pilot cutters shift to Flushing Roads.

APPROACHES:
Approaches to the Scheldt Estuary are:

	Depth	*Max. Draft SW*		*Keel Clearance*
	MLWS	*Neap*	*Spring*	
S. Channel:				
Wielingen	25 ft.	32 ft.	34 ft. 5 in.	5 ft.
Scheur	35 ft. 6 in.	43 ft. 5 in.	46 ft.	5 ft.
N. Channel:				
Oostgat	25 ft. 6 in.	30 ft.	32 ft.	5 ft.

ANCHORAGE: The roads of Flushing offer a safe and spacious anchorage with a sandy bottom. Vessels anchoring in the roads are recommended to do so Southward of the Koopmanshaven (the Western harbour of Flushing) at not less than 0.75 of a mile from the Northern Coast. In this part of the roads depths vary from 10 m. (33 ft.) to 26 m. (85 ft.).

The greatest depths and the strongest tides are encountered on the Southern part of the roads. When lying there vessels are less exposed to the risk of collision in foggy weather etc. and are well away from vessels proceeding up and down the river, manoeuvring for the purpose of landing and/or embarking Pilots, and from ferry boats crossing between Flushing and Breskens.

At the Northern part of the roads the tidal stream slackens gradually until HW is reached and under normal conditions of tide and wind the ebb stream is already felt along the shore from half an hour after HW until 1 hour after LW. From 1 hour after LW the flood tide sets in again and is felt until shortly after HW.

At the South side of the roads the tidal stream is running until slightly over an hour after HW when the stream slackens and turns. Two hours after HW the stream is running in NW direction gradually veering West.

MAX. SIZE: *Flushing East Harbour:* Entrance 34 ft. 4 in. at MLWS. A depth of 38 ft. alongside the quay.

Max. draft at Buoys at entrance 43 ft.

Outer Harbour: West side, max. draft 40 ft.

Inner Docks: Max. depth 24 ft.

Total: Max. length 280 m., max. draft 49 ft. (S.W.), max. d.w.t. 100,000 tons. However, draft is controlled by the depth in the approach channels.

HEALTH: No certificates required. In event of any disease or fever contact Agents.
RADIO: All messages to Agents via Scheveningen Radio.

Flushing Radio can be reached by VHF Channel 14. Harbour tugboats and pilot cutters operate on VHF Channel 6.
RADAR/VHF: Port radar service, none. River service under consideration. Flushing Radio Channel 14. Every 5 minutes each hour this station transmits information regarding visibility, water-level, hindrances, anchorages, etc. Harbour tugs Channel 6.
TUGS: Join vessels in Flushing roads. Vessel's lines usually used. No extra for tug lines. For contract holders 5% reduction.
BERTHING: *Outer Harbour:* West side, quay of 1,150 ft. long, depth of water 40 ft. LWOST. Quay height above sea level 2 m. at high tide and 7 m. at low tide. In Northern part of Outer Harbour a landing stage with length of 360 ft. Depth at low tide 20 ft. Depth at HW 29 ft.

Flushing East Harbour: Quay length 1,740 ft. Depth 38 ft. LWOST.

Inner Docks: A double lock and sluice give access from Outer Harbour to inner docks and canal through Walcheren. Largest lock length 455 ft., width 72 ft., depth on still LWOST of 17.5 ft. The other lock is 213 ft. long, 26 ft. wide, and 10 ft. deep. Sluice 113 ft. wide, 28 ft. deep. Constant depth of water at quay 24 ft.
STEVEDORES: Provided by N.V. Haven Van Vlissingen (Port of Flushing Limited). Tel.: 01184–15070. Telex: 55137.
MECHANISED CARGO HANDLING: Quay length 1,700 ft. equipped with 2 portainers (65 tons capacity), suitable for handling 20 up to 40 ft. containers. Straddle carriers capacity 32 tons and fork-lifts capacity 32 tons available.

Roll-on/Roll-off service between Flushing and Sheerness. Service twice a day. Vessels berth in the Outer Harbour at the Olau Line Terminal. At Flushing-East, Ro-Ro facilities for deep sea vessels, as well as Ro-Ro facilities for short sea Ro-Ro traffic.
TANKERS: Vessels carrying over 4,400 gallons of combustible liquids with a flash point up to 21° C., or over 22,000 gallons with flash point up to 55° C. require Harbour Master's permission for entry.

Two discharging berths alongside the quay. Discharge lines three of 8 in. diameter with capacity of about 2,000 t.p.h.

Total: See "Max. Size".

One jetty for tankers up to 100,000 d.w.t. and three jetties for barges and coasters with depth of 20 ft. and 30 ft.

Connections:

Commodity	Loading arms
Fuel oil	2×12 in.
Clean products	2×10 in.
Bunkers (fuel oil only)	1× 8 in.

The two fuel oil loading arms can also be used for the discharge of crude oil. The loading arms are hydraulically operated.

Deballasting: One 12 in. and one 10 in. loading arm can also be used for the discharge of dirty ballast water in unlimited quantities at the rate of about 1,000 t.p.h.

Capacities: Discharging rate of crude oil 3,000 t.p.h. and the loading rate of fuel oil about 2,700 t.p.h.

Supplies: Water obtainable from jetty. Bunkers by barge. Stores by small vehicles max. axle load 12 tons.
MEDICAL: Two hospitals available.
DENSITY: About 1024.
FRESH WATER: Can be supplied either alongside the quay or by water boat. Possible to supply fresh water in Flushing roads weather permitting.
FUEL: All grades obtainable from major oil companies and supplied by barge only.

Economical bunkering arrangements can be made at the sheltered anchorage Schaar van Everingen, a few miles up river from Flushing. No harbour dues. Max. draft HW Neaps 42 ft. Springs 45 ft.(S.W.).
DEVELOPMENTS: In Flushing E. the quay of 1,300 ft. length to be extended by 140 m. with depth alongside 38 ft. LWOST.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
OPENING/CLOSING HATCHES: On liners by crew or stevedores, ship's option.
CERTIFICATES: On arrival, ship's register only.
CUSTOMS ALLOWANCES: 200 cigarettes for each member of crew and total on board out of bond 5 litres spirits and 100 litres wine.
CARGO GEAR: The port is equipped with modern mobile cranes, which can be used both in the outer harbour and in the inner docks, with the following capacities:

2 cranes – 30 tons
2 cranes – 25 tons
3 cranes – 12 tons
2 cranes – 10 tons
1 crane – 8 tons

Floating cranes are available with capacities of 225, 75, 40 and 8 tons.
IDENTIFICATION CARDS: Not required.
CONSULS:

Belgium	tel. 66989	Germany	tel. 01188–1764
Denmark	tel. 14272	Norway	tel. 12272
France	tel. 12373	Sweden	tel. 16828

REPAIRS: All repairs possible.
DRY DOCKS: Largest (Graving) 712 ft. 5 in., width 98 ft. 4 in. Draft 28 ft. 6 ins., 45,000 d.w.t. and 4 smaller docks.
REPATRIATION: All facilities available for crew changes; good railway connections.
AIRPORT: Rotterdam (Zestienhoven) 125 km.; Brussels (Melsbroek) 150 km.; Amsterdam (Schiphol) 180 km.
TIME: GMT plus one hour.
HOLIDAYS: New Year's Day (January 1st); Easter Monday; Queen's Birthday (April 30th); Ascension Day (May 15th); Whit Monday; Christmas Day (December 25th); Boxing Day (December 26th).

Work can be arranged on above days, however dependent upon permission of the Docker's Inspection.
POLICE/AMBULANCE/FIRE: Police 3333; Ambulance and Fire 2323.
TELEPHONES: Not possible to place telephones on board except for vessels berthing at the shipyard "De Schelde".
SERVICES: Compass Adjuster; Radio/radar services also calibration of the Direction Finder, Seamen's Home (Mission to Seamen); Lloyd's Sub-agents; Ship's Laundries.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
AUTHORITY: *Outer Harbour:* N.V. Haven van Vlissingen.

E. Harbour: The Port Authority of Flushing.

AGENT: Wm. H. Muller & Co. Scheepvaartagenturen B.V., 16 Boulevard de Ruyter, P.O. Box 81, 4380 AB Flushing. Tel.(01184) 12171. Telex 55068. Cables "Mineral".

GRONINGEN: 53.15 N. 06.34 E. (See Plan Book)

The port is connected with the Ems Estuary via the Eemskanaal and the lock at Delfzijl.
DOCUMENTS: Clearing is done at Delfzijl.
PILOTAGE: For the approach of the lock see "Delfzijl".

The length of the lock is 120 m. and the width 16 m. Depth over sill at low water 3.9 m. and at canal level 6.07 m.

On the locks canal-pilots are available but pilotage on the canal is not compulsory. The length of the canal is 14 miles and it has a least depth of 5.2 m. There are 3 bridges all 16 m. wide.
MAX. SIZE: Maximum size for ships passing lock and navigating canal; beam 13 m. and draft 4.5 m. (Vessels with greater beam and draft possible with permission of the Canal Authority.)
TUGS: Available at Delfzijl and Groningen.
BERTHING: *Hunzehaven:* South side 300 m. quayage, railway connected, max. draft 4.5 m., two grab cranes 3.5 ton, two general cargo cranes 3 ton.

Oosterhaven: North side 150 m. quayage, max. beam 12 m., max. draft 3.6 m., two grab cranes 3 ton.

Deense haven: Three mooring buoys, max. draft 4.5 m.

Eemskanaal: Private silo max. beam 12 m., max. draft 3.9 m. private timber yard max. beam 12 m., max. draft 3.6 m.

Van Starkenborghkanaal: Private silo max. beam 9.6 m., max. draft 2.9 m. private timber yard max. beam 9.6 m., max. draft 2.9 m.
CRANES: Floating sheerlegs up to 250 tons.
STEVEDORES: Available.
MECHANICAL CARGO HANDLING: Silo's with equipment for bulk-handling of grain on Eemskanaal and Van Starkenborghkanaal.
MEDICAL: 3 hospitals available.
FRESH WATER: Supplied by Authority's water boats.
FUEL: By barge only.
CERTIFICATES: On arrival, ship's register only.
CONSULS: Belgium, tel. 138222; Norway, tel. 189444; Spain, tel. 137879.
REPAIRS: All repairs possible at Delfzijl.
DRY DOCKS: Transverse slipway at Delfzijl.
AIRPORT: Eelde, 10 km. from Groningen, daily services to Schiphol.
TIME: MET.
HOLIDAYS: New Year's Day, Easter Monday, Queen's Birthday (30th April), Ascension Day, Whit Monday, Christmas Day, Boxing Day.
POLICE/AMBULANCE/FIRE: Police tel. 121212; Ambulance tel. 123456; Fire Brigade tel. 123456.
TELEPHONES: Can be placed on board alongside Hunzehaven quay.
AUTHORITY: Harbour Master, Gemeentelijk Havenbedrijf.

IJMUIDEN (YMUIDEN): 52.28 N. 04.34 E. (See Plan Book)

Also refer to "Amsterdam".
DOCUMENTS:

2 Personal Effects Lists.
2 Stores Lists.
3 Crew Lists.
3 Passenger Lists.
Declaration of Health.

PILOTAGE: On entering and leaving Ijmuiden Government pilotage is compulsory. A pilot vessel with Pilots cruises at sea in the vicinity of Ijmuiden between the light whistle buoy and the moles.

In order to avoid delay, Captains, who require a Pilot must advise their ETA not less than 4 hours in advance to "Pilotage Ijmuiden". This advice must be amended, if vessel's ETA changes more than 2 hours from the original advice.

The text of the message must contain:

a. The word "ETA-Pilot".
b. Expected time arrival (group of 4 figures) in middle European time.
c. Draft with indication of unit applied.
d. Port of destination.

"Pilotage Ijmuiden" can be informed via Scheveningen Radio or via VHF Channel 12. Pilotage and navigation are possible at night.

Pilot Ladders: Pilots strictly adhere to Regulation 17b, Chapter V of the International Convention for the Safety of Life at Sea, which reads as follows:

"Whenever the distance from sea level to the point of access to the ship is more than 30 ft. (9 m.), access from the pilot ladder to the ship shall be by means of an accommodation ladder or by another equally safe and convenient means".

Pilot from Helicopter: When the pilot service per pilot cutter has been suspended owing to weather conditions it is possible to take a Pilot on board vessels by helicopter. Helicopter pilotage is carried out for vessels which have an obstacle free hoisting area on deck of minimum 15 ft. in diameter. Deck plans should be provided in advance.

Helicopter rates:

Dfl. 4,080. – per flying hour.
Dfl. 225. – per sling transfer.
Dfl. 318. – overtime from 1800 until 0600 hrs. and on Sundays and holidays.

Restrictions

1. Minimum visibility 800 m. at 150 ft. above sea level.
2. Maximum wind Force 10 (55 kts.).
3. Severe turbulence and icing conditions at or below 150 ft.

Harbour Master's office can be contacted by VHF Channel 11 to obtain information for safe navigation and rapid locking. In adverse weather vessels may receive radar assistance from Port Operations for entering harbour.

ANCHORAGE: Vessels may anchor off Ijmuiden outside the breakwaters.

MAX. SIZE: For North Sea Canal, entrance lock 1312 ft. long, 164 ft. wide. 49 ft. 02 in. depth. Density: 1016.

The official maximum draft to enter Ymuiden is 43 ft. salt water. Vessels with a draft of 43 ft. to 45 ft. salt water may enter Ymuiden and proceed to Amsterdam after special permission thereto has been given by the Government Harbour Master at Ymuiden. Such permission to be applied for well in advance.

HEALTH: Pratique granted automatically on arrival after completion of Maritime Declaration of Health. In case of suspected disease on board notify Agent by radio before arrival advising full details.

TUGS: Available. Meet vessel in harbour entrance if required.

BERTHING: Coal and ore cargoes discharged to Blast Furnace and Steel Works Company in Outer Harbour.

Quay 1: Length of quay: 414 m. Depth alongside quay: East part 31 ft. at LLWS, West part 37 ft. at LLWS.

Opposite the quay there are 3 dolphins available where one vessel can wait for a loading/discharging berth (up to 34 ft. draft).

Equipment:

2 cranes, lifting capacity 30 tons, max. outreach 57 ft.
1 crane, lifting capacity 30 tons, max. outreach 63 ft.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs and coils are handled.

Quay 2: Length of quay: 1,800 ft. Depth alongside quay: 48 ft. 09 in. at LLWS. Max. draft; the entrance to Outer harbour is accessible to vessels up to 43 ft. draft and with special permission of the harbour authorities up to 45 ft. draft.

Equipment:

3 bridgecranes, lifting capacity 40 tons each, max. outreach 115 ft. 2 conveyor belt systems (capacity 6,000 t.p.h.).

Despatch:

About 45,000 tons iron ore per 24 hours. About 30,000 tons coal per 24 hours.

Quay 3: Length of quay: 825 ft. Depth alongside quay: 37 ft. LLWS. On this quay exclusively steel products will be loaded.

Equipment:

2 cranes with a capacity of 60 tons each. Outreach 70 ft.

Inner harbours: These harbours are mainly used for loading or discharging smaller vessels having drafts between 13 ft. and 21 ft. 6 in.

Finished products such as rolling mill products, pig-iron, cast iron, steel ingots, slabs, coils but also fertilisers are handled.

STEVEDORES: *Working Hours:* In the Outer harbours round the clock, also on Sundays and holidays.

In the Inner harbour round the clock except from 1400 hrs. on Saturdays until 0600 hrs. on Monday.

FRESH WATER: Available from quay.

FUEL: Available by barge.

MEDICAL: Doctors, hospital and all services available.

REPAIRS: Possible.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member; 5 litres spirits for whole ship.

CONSULS, DRYDOCKS: And all general information; refer to "Amsterdam".

DEVELOPMENTS: Proposed new outer port to be built South of South Harbour Entrance Mole to accommodate vessels up to 62 ft. draft.

AUTHORITY: Rijkshavendienst Ijmuiden.

AGENT: See "Amsterdam".

ROTTERDAM: 51.55 N. 04.24 E. (See Plan Book)

DOCUMENTS: Maritime Declaration of Health, obtainable from River Pilot. Crew list in duplicate on special Dutch forms, obtainable from Agents. Ship's Register. Store list. Crew custom declaration showing quantity cigars, cigarettes, tobacco, spirits, wine, radios, cameras, etc., and souvenirs for each Crew member.

Crew and passenger lists to show date of last vaccination against smallpox, for vessel coming from suspect zone within last 14 days.

Oil Pollution Damage Certificate:

Tankers carrying over 2,000 tons of oil or oil products in bulk have to produce in Dutch ports a certificate of insurance in respect of civil liability for oil pollution damage (TOVALOP certificate). Fines will be imposed if vessels do not comply with these international regulations and authorities will not allow such vessels to leave the port.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg".

PILOTAGE: River pilotage compulsory from sea to harbour area and vice versa, except vessels in ballast drawing less than 7 ft. 3 in.

Harbour pilotage compulsory from fairway to berth in harbour area and vice versa, except for vessels under 475 g.r.t.

Pilot Cutters: Cruising continuously, day and night, off entrance to New Rotterdam Waterway, one North of line North Mole/Maasbuoy and one near Maasbuoy. Characteristic signals:

1. By day pilot flag, being a blue flag with white letter "L", displayed from main top mast.
2. At night, lights as prescribed by Regulations for Preventing Collisions at Sea.
3. During bad visibility the fog signal prescribed by rule 15 of these Regulations.

Ordering a Pilot:

1. Vessels bound for New Rotterdam Waterway must cable, at least 4 hours in advance, ETA pilot station, gross tonnage and draft to:
   (a) Pilotage Hook of Holland via Coastal Station Scheveningen Radio (PCH) or
   (b) Coastal Station Maassluis Radio (Radio Dirkzwager) by VHF Channel 12 (Port operations) or
   (c) Station Pilot Maas at Hook of Holland by VHF Channel 20.
   This ETA notification shall, with due observance of the afore-mentioned 4 hours period, be rectified if the ETA will be more than 2 hours later than the ETA last reported.
   Without prejudice to this provision the Master shall indicate his requirement for a Pilot by displaying the prescribed visual signals when his vessel arrives within visual range of the pilot vessel.
   The ETA message shall contain:
   (a) The words "ETA Pilot"
   (b) ETA (group of 4 figures) in Central European Time
   (c) Draft of vessel including unit of measurement (feet or decimetres)
   (d) Port of destination.
   Please note that vessels which do not comply with the above-mentioned regulations and fail to state their ETA timely or accurately, may only be provided with a Pilot 4 hours after their arrival at the pilot station, provided that other vessels which reported themselves correctly will not be delayed.
2. Vessels bound for Port of Dordrecht should also state their destination, as Pilots for Dordrecht embark from pilot cutter on roads.
3. Vessels bound for Europoort should also adopt following procedure:
   (a) Vessels equipped with VHF should notify via Channel 12 or 14 their ETA pilot station at least 1 hour in advance to Maassluis Radio Dirkzwager.
   (b) Vessels not equipped with VHF should cable same information to Europoort Rotterdam via Scheveningen Radio (PCH).

On arrival at pilot station vessels requiring Pilot are to display following signals, separately or together:

1. *By day:* International code signal "G". Pilot flag, viz., vessel's National Flag with white border from foremast.
2. *By night:* Morse signal "G" by flash light. Blue lights at intervals of 15 minutes. A bright white light shown just above bulwark for 1 minute at short intervals.
3. *During bad visibility:* At least 3 seconds after the normal fog signal the international code signal "G". Pilot vessel will answer: the normal fog signals, followed after at least 3 seconds by international code signal "H" (I have Pilot on board).

Pilotage for deep draft vessels and Helicopter Service:

Vessels drawing 57 ft. (SW) and over must make use of the "Eurochannel" between the "Euro One Buoy" and the "Maas Centre Buoy". Pilots board by helicopter in position 52° 00′N, 03° 00′E.

For vessels drawing over 57 ft. (SW) 1.5 times the pilotage tariff Sea-Hook of Holland is applicable.

Restrictions:

1. Min. visibility 800 m. at 150 ft. above sea level.
2. Max. wind force 10 (55 kts.).
3. Severe turbulence and icing conditions at or below 150 ft.

Pilot ladders: Vessels with a freeboard over 9 m. must provide an accommodation ladder in addition to the pilot ladder. If boarding equipment does not strictly comply with the SOLAS provisions, Pilots must be embarked/disembarked by helicopter. Generally Pilots refuse to use mechanical pilot hoists or other constructions not within the recommendations of the "European Maritime Pilots Association".

ANCHORAGES:

1. South of Maas Centre Buoy, up to about 45 ft. (SW) draft.
2. About 3 miles N.N.E. of Maas Centre Buoy, for vessel drawing from about 45 ft. to 57 ft. (SW).
3. At the approximate position of 52° 00′ N. 03° 00′ E. for vessels drawing 57 ft. (SW) or more.
4. Emergency anchorage N.E. of Maas Centre Buoy for vessels mentioned under 3.

RESTRICTIONS: Dangerous Goods:

General Information:

Regulations are based on several Governmental laws and Municipal bye-laws.

The "Dangerous Goods Department" of the Municipal Port Management is the centre where all information on dangerous goods on board vessels is collected, administrated and distributed to those concerned.

Inspection on board vessels berthed in the Port of Rotterdam will be carried out mainly by inspectors of the Municipal Dangerous Goods Department, although in certain cases (e.g. explosives), Governmental Dangerous Goods Inspectors are in charge as well.

For detailed information the following Regulations should be consulted:

Rotterdam Port Bye Laws (Havenverordening Rotterdam)
Order of the State Secretary for Traffic and Public Works No i-3/V20146 of 10 Jan. 1980
(Beschikking van de Staatssecretaris van Verkeer en Waterstaat Nr i-3/V20146 of 10 Jan. 1980)
Notice to shipping of the Governmental Harbour Master No. 11/1980 (Bekendmaking aan de scheepvaart No. 11/1980)
Notice to shipping of the Dept. of Public Works No. 50/1967 (Bekendmaking aan de scheepvaart No. 50/1967)

From these Regulations the following significant obligations have been extracted:

1. Signals:

Vessels carrying:

In Packages

- *(a)* More than 100 kg. gross of IMCO class 1.1 and 1.5
- *(b)* More than 1,000 kg. gross of IMCO class 1.2, 1.3, 1.4 (explosives) and 5.2 (organic peroxides).
- *(c)* More than 1,000 kg. poisonous gases of IMCO class 2.

In Bulk

- *(d)* Any dangerous substances in any quantity. Also empty tanks which are not certified as being clean by an acknowledged expert should hoist the following signals before entering the Rotterdam Waterway area:
    - I. by day: the International signal "B";
    - II. by night: 2 red lights at the same level at a distance of 1 m.

2. Prior Notification:

Masters of vessels carrying:

- *a.* Dangerous goods of class 1 and 5.2 in packages;
- *b.* More than 1,000 kg. gross weight per substance of the other IMCO classes in packages.
- *c.* Dangerous substances in bulk: Report these commodities to the Dangerous Goods Dept., of the Municipal Harbour Master 24 hours before arrival.

3. Explosives:

There is a restriction on the carriage of explosives by ships, dependent on kind, quantity and stowage of the explosives.

Permission to deliver explosives is given by the Minister of Transport.

Captains of vessels are advised to make sure whether such a permission has been granted.

4. Dangerous Cargo List:

Apart from these obligations the Rotterdam Port Bye Laws prescribe that a vessel having any dangerous cargo on board is prohibited from being in the harbour unless there is a list on board and an identical list has been submitted to the Harbour Master, stating the correct technical names, IMCO class flashpoint if below 61° C and the stowage of these materials.

5. Operational Notice:

Masters of vessels showing the signals as mentioned above ("B" flag or 2 red lights) shall give notice to "Pilot Maas" on VHF Channel 20 on arrival.

This notice shall be given at least half an hour but not more than 1 hour before the ship enters the Rotterdam Waterway area.

Upon departure: On Channel 1 to "Central Post" or Channel 3 if sailing from the Europoort area.

This notice shall contain: ship's name, position, destination and expected time of entering or leaving the Rotterdam Waterway area.

Should there be considerable alteration in this time, "Pilot Maas" should be notified again 30 minutes in advance.

After the first notice and during the further voyage on the Rotterdam Waterway, VHF Channel 14 should be kept on stand-by. Listening watch should be kept on.

When visibility is less than 500 m., ships may be prohibited from navigating the Rotterdam Waterway.

6. Pilotage:

Ships carrying:

- a. more than 1,000 kg. explosives (IMCO Class 1), liable to mass explosion;
- b. substances of IMCO Class 2, Class 3 (not miscible with water) or Class 6.1 in bulk, must have a Pilot on board when entering the Rotterdam Waterway area. At least 24 hours before arrival and 1 hour before departure the following particulars shall be given to the Governmental Harbour Master via the H.C.C. (Harbour Co-ordination Centre);
    1. Name and call sign;
    2. Nationality;
    3. Gross tonnage and draft;
    4. Nature and quantity of dangerous cargo;
    5. Berth;
    6. ETA/ETD;
    7. Agent.

Incoming ships shall also give notice 4 hours before arriving at the Pilot Cruising Station stating:

1. Name and call-sign;
2. Draft;
3. ETA;
4. The code word "IMCO".

by radio telegram via the Netherlands Coastal Radio Station (PCH) addressed to: "Pilotage Hook of Holland" or by VHF on Channel 12 to "Maassluis Radio" (Dirkzwager).

Navigation on the Rotterdam Waterway might be prohibited if circumstances make this necessary.

Alterations:

For commodities in quantities above those mentioned in the list, there might be restrictions on certain berths.

Name of Dangerous Goods or Group of Dangerous Goods	*Limited Quantity*
1. Chlorine	1,000 kg.
2. Phosgene	1,000 kg.
3. Fluorine	1,000 kg.
4. Hydrogen Cyanide	5,000 kg.
5. Hydrogen Sulphide	5,000 kg.
6. Carbon Disulphide	5,000 lit.
7. Hydrogen Bromide	10,000 kg.
8. Hydrogen Chloride	10,000 kg.
9. Hydrogen Fluoride	10,000 kg.
10. Sulphur Dioxide	10,000 kg.
11. Methyl Bromide	10,000 kg.
12. Acetone Cyanohydrin	40,000 lit.
13. Acrylonitrile	40,000 lit.
14. Acrolein	40,000 lit.
15. Allyl Alcohol	40.000 lit.
16. Allyl Chloride	40,000 lit.
17. Epichlorohydrin	40,000 lit.
18. Acetonitrile	40,000 lit.

For bigger amounts apply to the Harbour Master.

Remarks:

a. Particular berths are the Eemhaven basins and the harbour basins to the West of them on the South bank of the New Rotterdam Waterway.

b. Liquid dangerous cargoes in bulk only in the oil harbours.

Explosives wharf Poortershaven:

Explosives must be discharged at the Governmental explosives wharf Poortershaven, near Maassluis.

Restrictions: Max. length 120 m, Max. draft 27 ft.

Restrictions for entering:

Fog: Tankers and vessels carrying poisonous and explosive cargoes may not be allowed to manoeuvre in fog with visibility of less than 500 m. (1,640 ft.).

Entry times: Depend on prevailing circumstances, as follows:

Europoort: Tankers:

up to 61 ft. (SW) draft – Any time.

over 61 ft. (SW) draft – 1 hour before until 2 hours after HW at Hook of Holland.

Vessels with a draft of 57 ft. (SW) or more and/or a length of 250 m. or more must comply with the "Shipping rules for large vessels".

On entering Europoort tugboats are made fast just inside the breakwaters. On departure tug's hawsers must be used aft.

The time at which deeply loaded vessels destined for Europoort enter the New Waterway depends on the prevailing circumstances and is always subject to agreements made between the Pilot Service and the Harbour Master.

Botlek:

Max. draft 44 ft. (SW), exceptionally 45 ft. (SW), under certain conditions. To obtain permission one should apply to the State Harbour Master at H.C.C. in writing, if possible 10 days before arrival, giving particulars of call and vessel.

Max. length 270 m. Vessels exceeding 270 m. in length and drawing 44 ft. (SW) may have to lighten at Europoort/Maasvlakte.

As a rule entering times are as follows: (Salt Water draft).

33 ft. – 37 ft. Anytime, except from 4.5 hours before, till HW at Rotterdam.

38 ft. and 39 ft. At Slack Low or at Slack High Water, depending on the prevailing circumstances.

39 ft. – 44 ft. At Slack High Water.

Vessels with a length of over 200 m. (656 ft.) can only enter at slack tide.

Vessels which have been lightened at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at about one hour after high tide at the Hook of Holland.

Waalhaven:

Vessels with a draft of 36 ft. fresh water, or a length of over 200 m. should arrive at the entrance of the Waalhaven half an hour after high water at Rotterdam.

Other basins: Any time.

All harbours in the Rotterdam area can be entered at any time during day and night.

Restrictions for several harbours are made on some drafts and ships' lengths as follows: (To be read in conjunction with the above).

Botlek and 3rd Petroleum Harbour: For ships with a length over 200 m. or a draft over 33 ft.

U.K.F.: Draft over 30 ft., no length restriction.

1st Petroleum Harbour: Draft over 25 ft. or longer than 200 m.

2nd Petroleum Harbour: Draft over 31 ft. or longer than 200 m.

Vulcaanhaven Vlaardingen: Draft over 33 ft.

Eemhaven: Draft over 36 ft. or longer than 240 m.

Schiedam, Shipyard Wilton: Ships longer than 200 m.

Schiedam, Wilhelminahaven: Draft over 21 ft. or longer than 200 m.

Shipyard R.D.M.: Ships longer than 180 m.

Waalhaven: Draft over 36 ft. or longer than 200 m.

MAX. SIZE: (Also see "Developments")

Entrance and river area	*Channel width in m.*	*Max. SW draft (High tide)*	*Keel-clearance*
Euro 1 buoy – Euro 5A	600	68 ft.	20%
Euro 1 buoy – Euro 5A	1,200	65 ft.	20%
Euro 5A buoy – Maas centre	600	68 ft.	17.5%
Euro 5A buoy – Maas centre	1,200	65 ft.	17.5%
Maas centre buoy – Entrance	600–400	68 ft.	15%
Entrance – Europoort	400–350	68 ft.	10%
Entrance – Botlek	250	44 ft.	10%
Botlek – Waalhaven	250	40 ft.	10%
Waalhaven – Rijnhaven	200	34 ft.	10%

Shipping Rules for Large Vessels:

Vessels drawing 17.4 m. (57 ft.) (SW) or more must make use of the approach channels "Eurogeul" and Maasgeul". Such vessels must report, at least 6 hours prior to their arrival at the Pilot "rendez-vous" position 52° N. 03° E., by radio telegram to "Traffic Centre Hook" (TCH) via Scheveningenradio (PCH), the following information:

- *(a)* name and call sign of the ship
- *(b)* GRT and deepest arrival draft in SW
- *(c)* ETA rendezvous position

(d) Confirmation that the following equipment functions well:

1. Gyro compass
2. Radar installation
3. VHF, operational on Channels 6, 14 and 20
4. Decca receiver Mark XII or XXI, provided with a connection for the so-called Brown Pattern Indicator (Brown Box Connection).

The intention to leave Europoort must be reported by the Master or the Agents, at least three hours prior to departure to "Traffic Centre Hook", giving the information mentioned above under a, b and d.

Vessels with a length of 250 m. or more but with a draft of less than 57 ft. SW (not bound to use the approach channels) must report, at least 4 hours prior to their arrival at the "Maasbuoy", the information mentioned above under a, b, c and d, 1, 2 and 3.

The intention to leave the port must be reported by the Master or the Agents, at least three hours prior to departure to "Traffic Centre Hook", giving the information mentioned above under a, b, d, 1, 2 and 3.

The 4 hours' report prior to arrival will also be considered the 4 hours' ETA message for obtaining a Pilot.

Vessels equipped with a "T.O.R." installation can send their messages to "Traffic Centre Hook" via Dirkzwager's message relay and ships reporting station: Telex No. 26751 "dirk nl".

Outward bound vessels drawing 57 ft. (SW) or more, having to make use of the "Maasgeul" and "Eurogeul" must give 12 hours notice of their intended departure to the Harbour Coordination Centre/Municipal Harbour Service, giving the information mentioned under a, b and d.

Shifting: Vessels which have been partly discharged at Europoort/Maasvlakte terminals should arrive at the Botlek entrance at about 1 hour before high tide at The Hook of Holland. The following rules in view of length and draft apply:

Max. length overall	*Max. draft allowed*
up to 260 m.	44 ft. SW
260–270 m.	42 ft. SW
270–280 m.	41 ft. SW
280–300 m.	39 ft. SW

Tidal Information:

The mean height of sea-level off the Hook of Holland = 1.5 in. below DATUM (=N.A.P.).

LLWS (Low Low Water Spring) = 3 ft. 5 in. below DATUM

MLW (Mean Low Water) = 2 ft. below DATUM

All permissible drafts and depths of water mentioned are given at MLW, unless otherwise mentioned.

Tidal Range:

	Neap Tides	*Spring Tides*
Mean Rise above DATUM	2 ft. 11 in.	3 ft. 5 in.
Mean Fall below DATUM	2 ft. 3 in.	2 ft. 4 in.
TIDAL RANGE	5 ft. 2 in.	5 ft. 9 in.

Duration of the flood tide:..4 hrs. 34 min.

Duration of the ebb tide:...7 hrs. 51 min.

HEALTH: Master has to fill in and sign Maritime Declaration of Health which is handed to him by Pilot. Vessels subject to medical inspection have to hoist flag signal according to Pilot's orders.

RADIO: *E.T.A. messages and T.O.R.:*

Masters' telegrams via Scheveningen radio, call-sign P.C.H., are passed on to Agents 24 hours a day, weekends inclusive. For this reason it is advisable that Masters communicate with Agent via Scheveningen Radio, via which station they also route messages to vessels.

Ships equipped with "Telex Over Radio" may, outside office hours, channel their messages to Agent via Dirkzwager's message relay and ships' reporting station at Maassluis, Telex No. 26751 Answerback "DIRK NL". Such messages are passed on to Agent immediately, also during weekends.

OBO-Carriers:

Masters of this type of vessels must, when calling to load and/or discharge dry cargo, cable at least 24 hours prior to arrival. the following information:

1. that vessel has no slops on board and is certified gasfree or alternatively

2. a. correct name of liquid cargo carried last, with place and date of discharge

- b. stowage of cargo remnants (gases and/or liquids) and whether mixed with water or not
- c. whether non-gasfree spaces are adjacent to dry cargo holds and if so, which holds
- d. which spaces contain inert gas.

RADAR/VHF: Chain of 8 shore-based radar stations permits navigation during all weather conditions. Radio and radar station Pilot Maas, at Hook of Holland, communicates via VHF Channel 20 (Port Operations).

VHF range = about 15 miles.

Radar range = about 14 miles in S.W. and West direction, and 10 miles in North direction.

Masters are requested to call this station, especially during bad visibility, well in advance of arrival at pilot station. Pilot Maas provides vessels within range with nautical information and acts as a link with pilot cutters.

Radio-Radar Station "RHD Waterway"

The radio station, "Rijkshavendienst Waterway", in Europoort acts as a communication centre and a traffic-regulating station near the entrance and on the New Waterway. The station provides weather forecasts hourly by VHF Channel 14. Radar assistance is provided on VHF Channel 3 from CA-RW separation buoy into Europoort and vice-versa.

The activities of this station will be integrated in the tasks of "Traffic Centre Hook" in 1980.

TUGS: Tugs normally join vessel on river when nearing the basin where vessel will be accommodated. Vessel's towing lines used. On departure from Europoort the tow ropes, fastened to the stern, must be supplied by the tugs.

BRIDGES: New Waterway connects port of Rotterdam with North Sea, without any locks or bridges. Only to reach some shipyards, situated East of Rotterdam, vessels have to pass the "Maas-Bridges" (Koningshaven), which are on working days opened at regular times.

GENERAL CARGO FACILITIES: General Cargo Terminals:

	Max. FW draft at LW	*Length of quay*	*No. of cranes*	*Capacity in tons*
Schiehaven	9.0 m. (29 ft. 6 in.)	620 m.	8 1	5—17.5 30 tons (Containerlift)
Lekhaven	10.0 m. (32 ft. 10 in)	855 m.	8	5—25
Merwehaven	10.0 m. (32 ft. 10 in.)	600 m.	8	5—25
Waalhaven, Pier 1	10.5 m. (34 ft. 6 in.)	860 m.	12 1	5—25 30 ton (Containerlift)

The 17.5/25 ton cranes are mainly used for the handling of containers and steel. In combination these cranes can lift 28 tons.

Also see table (Multi-Purpose Terminals) below.

Multi-Purpose Terminals:

	Maashaven	*Waalhaven Pier 6*	*Prinses Beatrixhaven*
Facilities/commodities	Containers and Unit Loads General Cargo	Steel Products Roundwood Forest Products	General Cargo Steel & Forest Products Banana Handling Plant
Maximum Draft	9 m. (29 ft. 6 in. FW)	11 m. (36 ft.)	10 m. (33 ft.)
Quay Length	750 m.	771 m.	733 m.
Marshalling area	62,900 sq.m.	72,800 sq.m.	61,000 sq.m.
Sheds	3	2	2 + 1 office building
Covered storage area	12,958 sq.m.	6,097 sq.m.	18,370 sq.m. all temperature controlled
Open storage area	27,000 sq.m.	34,352 sq.m.	22,460 sq.m.
Level luffing cranes number – capacity	6 – 5 tons 2 – 25 tons 2 – 30 tons*	2 – 5 tons floating cranes 2 – 20 tons 4 – 30 tons*	7 – 5 tons 3 – 17.5 tons
Transtainer	1 – 45 tons

*Max draft allowed at HW in Botlek 44 ft. (SW), under certain conditions 45 ft. (SW) and in Vulcaanhaven 39 ft. (FW)

Bulk cargoes are also handled at the buoys in all basins by means of floating cranes of Messrs. Aegir and S.H.V.

BULK HANDLING FACILITIES: (Continued)
Also see Table on page 717

Europees Massagoed – Overslagbedrijf (EMO), B.V.: (European Bulk Transhipment Company (EMO) B.V.) Also see "Tables".

World's largest bulk transhipment and storage installation is situated on the Maasvlakte, which has been reclaimed from the North Sea. Fully loaded ore carriers up to 270,000 d.w.t. can be handled.

EMO B.V. is an executing company which concludes transhipment contracts, primarily for ores and secondly for coal. Participants in this company are: Frans Swarttouw; S.H.V. Nederland; August Thyssen-Hutte A.G.; Manufrance; Ruhrkohle.

A.G. Messrs. EMO operate 2 transhipment installations:

1. Maasvlakte terminal – E.K.O.M. (Erts Kolen Overslag Maasvlakte).
Participants: Frans Swarttouw
Manufrance
S.N.V. (Transport – en Handelmaatschappij
Steenkolen Utrecht B.V.)

A conveyor belt system connects the discharging pier in the Mississippi haven with the barge loading section in the Hartelhaven and with the loading installation for railway wagons, both direct and via the stockpiling area.

Technical data:
Discharging pier – quay length 560 m.; max. draft (HW) – 69 ft. SW.
Loading section for barges – quay length 500 m. (2,296 ft.); max. draft – 15 ft. FW.
Max. discharging rate – 6,000 tons of ore per hour.

Continued next column

Average discharging rate – 3,000 tons of ore per hour.
Loading rate railway wagons – 3,000 tons of ore per hour.
Outreach discharging gear – 45 m. (148 ft.).
Max. height of gear above MHW – 30 m. (98 ft.).
Storage capacity – 8 million tons.
Transhipment capacity – 18 million tons per year.

2. Botlek Terminal – Botlek B.V. "See Tables".

Ertsoverslagbedrijf Europoort C.V.:
This transhipment installation, specialised in the handling of iron ore, is situated between Caland canal (right), and Dintelhaven (left).

Participants in this installation, partly via their Dutch sister companies, are: August Thyssen-Hutte A.G.; Fried. Krupp-Huttenwerke A.G.; and Mannesmann A.G.

A conveyor belt system connects the discharging quay in the Caland canal with the barge loading section in the Dintelhaven, both direct and via the stockpiling area. For further details of this installation "See Tables".

Technical data:
Quay length discharging section 645 m. (2,116 ft.).
Max. draft allowed at MLW – 59 ft. SW.
Max. capacity – 6,900 t.p.h.
Average discharging rate – 4,500 t.p.h.
Outreach discharging gear – 34.75 m. (114 ft.)
Max. height of gear above MHW – 24 m. (78 ft. 8 in.)
Storage capacity – 3.5 million tons
Transhipment capacity – 15 million tons/year.

GRAIN HANDLING FACILITIES:

	Max. draft at MLW	*Quay length*	*Number of elevators*	*Total disch. capacity*	*Silo capacity (tons)*
1. Grain Elevator Company (G.E.M.)

Beneluxhaven, Europoort	52 ft. 6 in. SW	230 m.	2	2,400 t.p.h.	100,000
				Capacity per elevator	
3. Floating Equipment					
a. Grain Elevator Company	in Europoort:		3	800 t.p.h.	
			1	600 t.p.h.	
			2	1,000 t.p.h. (1980/81)	
	in Botlek, Waalhaven, Maashaven		18	200-600 t.p.h.	
b. Grainwave B.V.	in Boltek, Waalhaven, Maashaven		2	400 t.p.h.	
			1	600 t.p.h.	

Total annual discharging capacity of the Grain Elevator Comp. (G.E.M.): 25 million tons.

Berthing possibilities for bulk carriers and OBO's:

Beneluxhaven: Europoort Silo B.V. 1; G.E.M.-Europoort 4.

Botlek: G.E.M. installation 2; G.E.M. buoys 1; Buoy No. 21 1.

At the G.E.M.-Europoort terminal it will be possible to discharge vessels of up to 200,000 d.w.t. Conveyor belts (1 per elevator) will transport the grain at a capacity of 800 cu.m.p.h. to a central building with automatic weighing machines.

Grain Loading:
Grain loading into vessels of up to 30,000 d.w.t. can be effected both by means of floating elevators, ex-barges, and at the G.E.M.-Botlek shore installation.

Unimills B.V.: On a site between G.E.M. installation and Europoort Silo B.V., situated at the Beneluxhaven and Dintelhaven, a soya extraction plant has been built. Annual capacity: 1.25 million tons. Both the supply of raw material and the loading of extracted soyameal are effected via the adjacent installation of the G.E.M.

CONTAINER HANDLING FACILITIES:

Europe Container Terminus B.V.:
Europe Container Terminus B.V. (E.C.T.), specially equipped for the handling of container vessels, is situated in Prinses Margriethaven and in Prins Willem Alexanderhaven.

At present 38 container lines including a number of feeder services are operating from the E.C.T. terminal.

145 Container trains are despatched every week to 45 destinations in Europe.

Present capacity: 1,000,000 containers per year.

At this terminal 3rd generation container vessels and containers of all sizes and weights are handled.

Technical Data:
14 container cranes.
40 van-carriers
4 stacking cranes
2 railway gantry cranes
1 Ro/Ro ramp.
75 terminal trucks
525 terminal chassis
3 rail tracks of 500 m.

Quay length:	3,000 m. (9,840 ft.)
Marine terminal:	85 ha. – marshalling area
Control terminal:	6 ha. – data processing, administration
Land terminal:	11 ha – storage empty containers, chassis, C.F.S. activities

The maximum draft allowed amounts to 40 ft. (SW) although the water depth alongside the quay permits drafts of up to 41 ft. 4 in. (SW) in view of trim during cargo handling.

Multi-Terminals Rotterdam B.V.:
Multi-Terminals Unitcentre B.V.: Waalhaven Pier 7. Full container terminal

Annual capacity: 330,000 containers.

Technical data:

Maximum draft	12.2 m. (40 ft. FW)
Quay length	800 m.
Pier width	250 m.
Storage and marshalling area	240,000 sq.m.

	number	capacity	outreach
Container gantry cranes	5	60 tons	45 m.
Rail-mounted gantry cranes for stacking	6	45 tons	45 m.
Railway tracks	5		
Reefer station	65 connections		

Ro/Ro ramp: For vessels with an angled or slewing ramp a special outer ramp is available.

Multi-Storage I + II: Land terminal Waalhaven WZ + NZ
Technical data:

Indoor storage capacity:	13,500 sq.m.
Outdoor storage capacity:	40,000 sq.m.

Container Freight Station
Storage/repair of containers

(Container Handling Facilities continued)

Multi-Terminals Waalhaven B.V.: Waalhaven Pier 2. Multi-purpose terminal ro/ro ramps.

Technical data:
Maximum draft: 10.36 m. (36 ft. FW)
Quay length: 1,500 m.
Marshalling area: 60,000 sq.m.
Covered storage and consolidating area: 45,000 sq.m.

	number	capacity
Level luffing cranes	11	5–45 tons
	1	60 tcns
Mobile cranes	3	4–25 tons
Floating crane	1	7 tons
Rail-mounted gantry cranes for stacking	1	36 tons
Forklift trucks	63	up to 37 tons
Tugmasters		
Terminal chassis railway connections		

Ro/Ro facilities: One ramp for stern operations
One ramp for angled platforms (45°)

SPECIALISED CARGO-HANDLING FACILITIES:

Waalhaven-Heyplaat: Operated by Multi-Terminals Rotterdam B.V. Max. draft 10 m. (34 ft. FW). Multi-purpose terminal. Length 790 m. ro/ro ramp. 9 level luffing cranes (5–60 tons) common user ro/ro berth, length 22.4 m., width 9.0 m.

Ro/Ro Facilities:

Company	Location	Number of ramps
Maatschappij Zeeland	Hook of Holland	2
Multi-Terminals C.V.	Waalhaven	2
Seaport Terminals B.V.	Prins Johan-Frisohaven	2
Quick Dispatch B.V. (Tor Line)	Prins Johan-Frisohaven	2
Quick Dispatch B.V.	Prinses Beatrixhaven	2
Europe Container Terminus B.V.	Prinses Margriethaven	1
North-Sea Ferries B.V.	Beneluxhaven	2
Transport Ferry Service (Townsend Thoresen)	Beneluxhaven	1

L.A.S.H.: Vessels discharge and load at buoys in Waalhaven. Average permissible draft at buoys 36 ft. (FW). Max. draft at Buoys 6, 12 and LASH buoys, 40 ft. (SW).

Esso Chemie N.V.: The fertiliser plant in Europoort produces ammonia, urea, nitric acid, calcium ammonium nitrate.

Max. size: 30,000 d.w.t., length 690 ft., draft 42 ft. 06 in. in SW.

TANKER BERTHS:

Europoort

Installation	*Basin*	*No. of berths*	*Max. SW draft*	*Hoses*
Shell (No. 104)	Beneluxhaven	1	68 ft.	4 at 16 in.

Chevron/ Texaco	2nd Petr. haven	1	32 ft. FW	3 at 12 in.
		1	35 ft. FW	3 at 12 in.
Mobiloil	2nd Petr. haven	1	33 ft. FW	6 and 8 in.

No facilities for discharging dirty ballast at Mobiloil at 2nd Petrol Haven, Chevron/Esso at 5th Petrol Haven, Tank Terminal Rotterdam, Panocean and Paktank.

No bunkers (ex-installation) at Mobiloil, Esso, Tank Terminal Rotterdam, Panocean and Matex Europoort.

Tank Cleaning – Ballast Water:

Messrs. Tankcleaning United C.V. and Booy Clean have floating and rolling equipment for all cleaning jobs and for the collection of contaminated ballast water.

Shore installations are: 1. Verolme Tankcleaning, Botlek
2. Tankercleaning B.V., Schiedam

Crude Oil Washing System:

For applying the crude washing system to tankers the permission of the oil installation, the Charterers and the Port Authorities is required.

Moerdijk:

The route New Waterway, Oude Maas and Dordtse Kil is frequently used by 20,000 ton tankers, loaded for 70%, proceeding to and from the Petrochemical installations of Shell Moerdijk, which are connected by pipe-lines to Shell-Chemie at Rotterdam-Pernis. Cleaning/gas-freeing is not allowed in this area.

All vessels with a LOA exceeding 135 m. and/or a beam exceeding 17.5 m. and planning to navigate the rivers Oude Maas and/or Dordtse Kil shall report in writing (telex no. 26043) to the State Harbour service at the H.C.C., 24 hours in advance:

(a) name and call sign of vessel,
(b) nationality,
(c) LOA and beam,
(d) g.r.t.,
(e) port of destination or departure,
(f) deepest draft and
(g) ETA at Oude Maas/Dordtse Kil or ETD from berth.

Restrictions:

Max. draft Oude Maas 30 ft., max. draft Dordtse Kil 25 ft. 06 in.; max. length 175 m., max. width 23 m., max. height 41 m., channel width 250 m.

The use of tugboats is compulsory for certain categories of vessels, the number of which depends upon length, draft and circumstances.

DENSITY: *Europoort* – At high water 1025; at low water 1022.

Botlek – At high water 1014; at low water 1001.

Waalhaven and other basins in the Rotterdam port area: at high water 1004; at low water 1000. All depending upon amount of fresh water carried down river.

STEVEDORES: Normal working hours:

Bulk cargoes except grain: Monday 0730 – Saturday 1400 hrs. uninterrupted.

Europoort C.V. operate throughout 24 hours.

Grain: Europoort Silo B.V.: (Beneluxhaven).

	Day-shifts	*Night-shifts*
Monday-Friday	0700–1130 hrs.	1530–1930 hrs.
	1200–1530 hrs.	2000–2400 hrs.
Saturdays	0700–1130 hrs.	
	1200–1500 hrs.	

In principle no work is performed on Saturday-nights, Sundays and holidays.

Grain Elevator Company (G.E.M.) B.V.: Europoort (Beneluxhaven).

Continuously from Monday 0730 until Saturday 1530 hrs.

Meal breaks	1130–1200 hrs.	0330–0400 hrs.
	1930–2000 hrs.	

Botlek and Floating Elevators:

Monday-Friday	Monday-Thursday
0730–1130 hrs.	1630–2030 hrs.
1200–1600 hrs.	2100–0045 hrs.
Saturday	Friday-night
0730–1130	1630–2030
1200–1530	

Overtime: The Grain Elevator Company *does not charge* any overtime expenses, except for work on Sundays and holidays and the nights preceding and following them.

For weekend work after Saturday 1530 hrs. permission will normally only be granted when the operations can be completed on Sunday-morning early. Labourers have to be obtained on a volunteer basis.

Permission to work on Sunday from 0045 until 2200 hrs. is granted in exceptional cases only.

Official Office Hours at Rotterdam:

Monday–Friday 0900–1700 hrs.
Saturday 0900–1200 hrs.

Off-Port Notice Clause: In view of the fact that for large vessels a restricted number of berths is available only, such vessels frequently have to wait for a berth outside at sea.

In such cases laytime will count only in case the relevant Charter Party contains a proper off-port notice clause.

Lay-by Berth: In case the off-port notice clause stipulates the use of a lay-by berth, the vessel, in such a berth, should be at the immediate and effective disposition of the charterers.

In order to avoid heavy extra shifting expenses the charter party should stipulate that such a lay-by berth should be situated in that part of the port where the discharge will be actually effected (Europoort or Botlek).

Shifting Expenses: Berths midstream at the buoys in Botlek, Waalhaven and at the dolphins in Rijnhaven and Maashaven are recognised regular discharging berths where bulk cargoes are handled by means of floating equipment.

Disputes about shifting expenses from the buoys, especially when no work has been done there, to the Botlek shore installation can be avoided by stipulating for whose account shifting expenses between "berths" are.

Oil: At the oil refineries of Shell, Chevron, Esso, Gulf and B.P. tankers can discharge continuously, including week-ends without extra charge. This also applies to the Mobil Oil Terminal and to the Maasvlakte Oil Terminal.

The oil storage companies Paktank and Nieuwe Matex work from Monday to Friday during daytime only, unless overtime arrangements are made.

General Cargo:

A. *In daytime Monday – Saturday*
morning shift 0730–1145 hrs.
afternoon shift 1230–1600 hrs.

B. *Night-work Monday – Friday:*
evening shift 1630–2045 hrs.
1st night shift 2115–0045 hrs.

Gangs have to be ordered for two shifts.

Overtime:

1. *Saturday 0730 – 1600 hrs.*
One third of the labour is available.
More labour may be engaged on a volunteer basis.
2. *Saturday 1630 – Sunday 0600 hrs.*
Permission can be granted if operations will be completed before Sunday 0600 hrs. Labour on a volunteer basis.
3. *Sunday 0600 – 2200 hrs.*
Permission is granted in exceptional cases only. Labour on a volunteer basis.
4. *Sunday 2200 – Monday 0615 hrs.*
Permission is usually granted. Labour on a volunteer basis.
5. *Official Holidays:*
The surcharge for work on official holidays is identical to that for work on Sundays. The nights prior to and following a holiday are to be regarded as Saturday/Sunday nights.
The possibilities to engage gangs are limited.
No work is permitted:
24th December 1800 hrs. – 26th December 0730 hrs.
31st December 1800 hrs. – 1st January 1700 hrs.

Containers: The large Container Terminals E.C.T. and Unitcentre operate around the clock, week-ends inclusive.

Agents should be kept closely advised of vessel's position. In view of ordering gangs for next morning/evening Master's final ETA message is required before 1400 hrs. For work on Monday mornings a final ETA is required before Friday 1400 hrs.

MEDICAL: All medical facilities available. Advance notice only in emergency or if attendance required during week-end.

OPENING/CLOSING HATCHES: On liners by stevedores. On tramp vessels by crew; stevedores lifting beams.

FRESH WATER: Can be supplied ex quay at many berths. Where no shore connections are available and at buoys: by waterboat.

Fresh water can also be supplied in the Roads off the Hook of Holland, weather permitting.

FUEL: All types of oil bunkers can be supplied by means of barges or ex shore installations for tankers. Coasters can take bunkers ex installation during their inward or outward passage. Advance notice is required for vessels which are only 24 hours or less in port and for bunkering during week-ends.

FIRE PRECAUTIONS: No floating objects are allowed alongside tankers during discharge or loading of dangerous cargoes and during ballasting.

CUSTOMS ALLOWANCES: Spirits: first arrival each month, 5 litres per vessel plus 1 bottle per man. Otherwise, 0.75 litre per man with a max. of 5 litres per vessel. Wine: 5 litres per man.

Each Crew member permitted out of bond 200 cigarettes, or 25 cigars, or 500 gm. tobacco.

DEVELOPMENTS: Adaption of the approach channel and harbour mouth for ships with a draft up to 72 ft. will be completed in 1982.

Radar Service: The present chain of 8 shorebased radar stations is planned to be replaced by a new system, which should be fully operational in 1984.

The equipment which the central and regional traffic control stations will use in future is described as Vessel Traffic Management System (VTMS), which is a nautical operational data-processing system.

The system will comprise a centrally operated traffic control from the approach routes off the Hook of Holland up to the Van Brienenoord bridge, East of the city and to the Spijkenisser bridge over the river Oude Maas. The radar screenings will include the major harbour basins so as to be able to pass-on traffic and position data to tugboats and seagoing vessels manoeuvring in these basins.

Maasvlakte Coal Terminal: Maasvlakte Coal Terminal (M.C.T.) has been set up jointly by:

Shell, Esso and B.P.	Ruhrkohle
Frans Swarttouw	Thyssen
SHV	Manufrance

The MCT will be situated North of and adjacent to the transhipment installation EKOM. The installation is planned to be constructed and developed in three phases:

In its first phase the MCT can be operational in 1983. Coal carriers will be discharged at the EKOM installation and the cargo stockpiled at the MCT area of 10-15 ha. (25-37.5 acres) at a capacity of 4 million tons annually.

Stockpiling and bargeloading machines will be available.

In the second phase the Municipality will construct a separate harbour providing 1,100 metres quay length suitable for vessels up to 250,000 d.w.t.

In the final phase, planned for the years 1990-1993, a transhipment of 25 m. tons of coal is foreseen on a site of 110 ha (275 acres).

Container Overflow Terminal: A container overflow terminal of 60 ha. (150 acres) is planned to be available on the Maasvlakte in 1981. The terminal, which will have an initial quay length of 1,000 m., can be enlarged to 400 ha. (900 acres).

LPG: It is expected that LPG transhipments will increase from the present 1 million tons to 5 million tons around the year 2000, which will be 10% of the world production at that time.

LPG will then be transported to Rotterdam in approx. 260 tankers annually from locations in the North Sea, the Middle East and from Africa. It may be of decisive influence on the development of the chemical industries in the port area.

Shell and B.P. are studying possibilities for a concentrated supply of butane and propane by tankers to a specialized terminal at the B.P. installation in Europoort.

Bulk Transport to the Ruhr: Ore cargoes are usually transhipped at the Maasvlakte and Europoort terminals into combinations of max. 4 push barges of up to 2,750 tons and transported to the Rhur area via the Hartelcanal, the rivers Oude Maas, Waal and the Rhine.

Pusherboats of 5,400 h.p. could during normal conditions, move 16,000 tons in 6 barges.

One of the hindrances for such large convoys formed by the Hartel locks which give access to the Hartelcanal, is being removed. This operation is planned to be ready in 1982.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: Ship's Register and Derating Exemption Certificate.

REPAIRS: (Also see "General"). A variety of shipyards and workshops is available for engineering and all types of repairs. Various yards have specialised in the construction of dredgers, ferry boats, offshore equipment, heavy derrick vessels and/or in the jumboizing of vessels.

The largest drydocks in the Rotterdam port area are owned by the following shipyards of the Rhine-Schelde-Verolme group:

Verolme Dock- and Shipbuilding Company	Graving dock 7	500,000 d.w.t.
Wilton-Fijenoord, Schiedam	Graving dock 8	160,000 d.w.t.
Rotterdam Drydock Company	Floating dock 10	110,000 d.w.t.

Wilton-Fijenoord, Rotterdam Dockyard Co. and Verolme Rozenburg have combined their fleet of tugboats for assistance at the R.S.V. shipyards in the New Waterway area.

If V.L.C.C.'s with a length of over 270 metres do not have full engine power for manoeuvring or have not made sufficient engine trials after repairs they must be escorted to and/or from the repair yards by two tugboats of sufficient capacity.

The Government Harbour Master (Rijkshavenmeester) must be notified in this respect 12 hours prior to arrival or departure.

Tank cleaning facilities are available.

Voyage repairs are carried out in the entire port area including Botlek and Europoort/Maasvlakte.

Some shipyards are situated beyond the bridges across the river Maas, East of Rotterdam. They can be reached via the Koningshaven, where a traffic and a railway bridge have to be passed.

Max. draft at HW: 21 ft. FW.
LW: 17 ft. FW.

Opening Times of the Koningshaven Bridge:

0029–0042 hrs.
0210–0225 hrs.
0323–0340 hrs.*
0430–0445 hrs.*
0556–0626 hrs.
0655–0715 hrs.*
0940–0955 hrs.
1037–1057 hrs.*
1237–1257 hrs.
1437–1457 hrs.*
1638–1653 hrs.
1839–1859 hrs.*
2040–2056 hrs.
2242–2257 hrs.*

*Also on Sundays.

DRY DOCKS: Largest dry dock for vessels up to 500,000 d.w.t. with tank cleaning installation for largest vessels.

REPATRIATION: All arrangements for crew changes and repatriation can be made.

AIRPORT: Rotterdam airport Zestienhoven (distance 6 km.) and Amsterdam airport Schiphol (distance 70 km.) are served by regular airlines.

TIME: During Winter GMT plus one hour. During Summer GMT plus 2 hours.

HOLIDAYS: New Year's Day; Easter Monday; Queen's Birthday (30th April); Ascension Day; Whit Monday; Christmas Day (25th December) no work; Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police head office tel. 14.31.44; Alarm and accidents tel. 14.14.14; Ambulance tel. 13.50.00; Fire tel. 29.29.29.

TELEPHONES: At major shipyards, oil and grain terminals telephone is placed on board without extra charge.

DEGASSING/CLEANING: Free translation of circular issued 17th April 1973 by the Docks Industry of the Municipality of Rotterdam, reads: Safety requirements in regard to degassing/cleaning of tanks and/or holds on board ocean tanker vessels.

A recent accident during cleaning activities of tanks having contained combustible gases or liquids, poisonous or not, has resulted in the following directives to maintain the safety and to protect the environment in the dock area.

The articles 55 and 56 of the Port Regulations Rotterdam (Municipal Gazette 1971, No. 3) prescribed a written consent of the Port Superintendent for degassing/cleaning. To obtain such a written consent on behalf of an ocean tanker vessel, the Captain should apply to the Office of the Port Superintendent, Department of Dangerous Substances, at least 24 hours before the actual cleaning. Conditions may be made in respect of, and amongst other things:

(a) safe cleaning procedure, and
(b) presence of an expert.

To that effect an investigation may be held on board as to a safe rinsing procedure, and relevant subjects, in consultation with the ship's management.

A statement may be demanded from the Captain stating whom he charges with the supervision of the activities. From this person expertise is demanded, to the satisfaction of the Port Superintendent. This "Expert" may be a member of the ship's crew, respectively a person to be designated by the Owner (e.g. a laboratory expert). Without the express consent of the Port Superintendent cleaning must not be started.

These measures have become effective at once and are applicable to all ocean tanker vessels, of which the tanks to be cleaned have contained a combustible liquid as its last contents with a flash-point lower than, or equal to, 55° C.

For ships berthed at a shore tank-cleaning station and handled by that company, the cleaning-company concerned shall be liable for a safe treatment and consequently no separate consent shall be required.

In the following summary, the ship's data necessary to obtain a consent has been stated.

The cleaning of tanks, as indicated in this circular, is not permitted without the consent of the Port Superintendent of Rotterdam. Concerning stench-causing substances further directives will be issued.

It will be tried to restrict the delays possibly occurring as a result of this new regulation minimum.

Summary: By "degassing" to be understood: Degassing or ventilating a tankage, steaming or cleaning and the activities related thereto.

Reporting: At least 24 hours before commencement of the cleaning activities the ship (ship's Agent) should make a request by Telex to the Port Superintendent of Rotterdam (Port co-ordinating centre) to obtain a consent pursuant to Art. 55 or 56 Port Regulations Rotterdam. 35 Lloydstraat, Rotterdam. Telex: GEVST 25720.

The following data should be stated when making the application: (1) name ship; (2) nationality; (3) tonnage in g.r.t.; (4) name Agent; (5) berth where cleaning is to be carried out; (6) indication of tanks to be cleaned; (7) correct technical denomination of the last 2 products carried in these tanks; (8) expected time of commencement cleaning; (9) cargo still on board; (10) by whom cleaning will be carried out (ship's own crew respectively name cleaning company); (11) destination slush (remaining on board respectively discharge to . . .).

GENERAL:

Ship Repairing: For repairing (except cold work outside the cargo-area) on board any vessel outside a ship-repair yard permission from the municipal Harbour Master is required.

Dependent on nature and location of repairs a certificate may be required to be issued by a recognized Marine Chemist after inspection.

For sea-going tank vessels an application for permission shall be made by telex to the Harbour Master of Rotterdam (Harbour Co-ordinating Centre, Dangerous Goods Department. Telex GEVST 25720), containing the following information:

1. Ship's name.
2. Date of commencement repairs.
3. Duration of repairs.
4. Berth.
5. Nature of repairs.
6. Location of repairs.
7. By whom repairs will be carried out.
8. Any cargo-operations, bunkering etc., during repairs.
9. Cargo on board and stowage.
10. Effect of repairs on ship's manoeuvrability and time and duration of immobilized situation.

The Municipal Dangerous Cargo Department will contact the Harbour-Inspectorate, which organisation is in charge of the National law: cleaning and repairing of tank vessels.

Inspection of International Safety Certificates:
As from January 1st, 1979 Harbour Pilots on board foreign vessels entering the port area of Rotterdam will keep a check on the presence of valid international safety certificates according to the "International Convention for the Safety of Life at Sea 1960" and the "International Convention on Loadlines 1966".

This check will be executed on behalf of the State Shipping Inspection to which Harbour-Pilots have to report. The Harbour-Pilots entrusted with this inspection are in the possession of an authorisation provided with photograph issued by the State Shipping Inspection (Scheepvaartinspectie). Should the reporting of a Harbour-Pilot be negative, any measures to be taken will solely remain the task and responsibility of the State Shipping Inspection.

"Off-Port Notice" clause:
Large grain vessels still often have to wait off the port for a berth. For that reason a proper "Off-Port Notice" clause is still recommended in order to avoid loss of time and sometimes heavy shifting expenses.

Control on delivery of cargo:
At Rotterdam, bulk grain cargoes are mainly discharged direct overboard into receivers' barges. Therefore, a careful supervision by an independent control company is recommended so as to make sure that no cargo is delivered to receivers before original Bills of Lading have been presented.

AUTHORITY: Havenbedrifzj der Gemeente Rotterdam.

AGENT: Wm. H. Muller & Co. Scheepvaartagenturen B.V., Westerlaan 1, P.O. Box 770, 3000 AT Rotterdam. Tel. 010–36.43.00. Telegrams: "Mineral". Telex 21245 (3 lines).

SCHEVENINGEN: 52.05 N. 04.15 E. (See Plan Book)

PILOTAGE: For Pilot service via the Hook tel: (01747) 2341 and for service via Ijmuiden tel: (02550) 19027.
MAX. SIZE: Max. draft 7.0 m.
VHF: Port radar services on Channel 21, port operations on Channel 14.
TUGS: Available up to 335 h.p.
BERTHING: Outer Harbour, depth 7 m.
First Harbour, depth 6 m.
Second Harbour, depth 4 m.
Third Harbour, depth 6 m. Two Ro/Ro berths available.
FUEL: Available.
FRESH WATER: Available.
REPAIRS: Possible.
SERVICES: Compass adjusting.
POLICE/AMBULANCE/FIRE: Police tel: (070) 614141. Fire tel: (070) 949311.
AUTHORITY: Harbour Master.

TERNEUZEN: 51.20 N. 03.50 E. (See Plan Book)

LOCATION: At mouth of the ship canal from the River Scheldt to Ghent. Lat. 51° 20′ 14″ N., Long. 3° 49′ 39″ E.

DOCUMENTS: Also see "Rotterdam". Customs clearance takes place in the docks, except vessels bound for Belgium. Clearing of ships comprises the production of a document signed by the Master, accompanied by the following documents in triplicate: Cargo and Crew Manifest, and Stores List. Masters are requested to have Crew List completed beforehand to avoid delay in the lock.

PILOTAGE: Compulsory for all sea-going vessels entering, leaving, and navigating inland waterways. Sea Pilot meets inward vessels at buoy A1, 51° 22.00′ N. 2° 53.24′ E. for ships entering by Wielingen channel; or at Middensteen Bank buoy, 51° 39.30′ N. 3° 19.00′ E. for ships entering by the Oostgat channel.

In Wielingen channel Belgian and Dutch Pilots available. In Oostgat channel a Dutch pilot cutter is stationed. Belgian pilot boat carries at the masthead a red flag with a white letter P, the Dutch pilot boat has a blue flag with a white letter "L". Communicate with pilot cutter by VHF Channel 6.

Warning: In approaches Masters may encounter fishing boats steaming a parallel course about 300 ft. apart. The net is being towed between the two vessels. If there is danger of fouling the net, the fishing vessels will display by day International Code flag D, or by night a searchlight from each vessel.

ANCHORAGE: Vessels anchor outside fairway where depth is at least 49 ft. Mud bottom and good holding ground.

RESTRICTIONS: No restrictions on night entry.

MAX. SIZE: Controlling depth 31 ft. 4 in. Keel clearance 3 ft. 0 in. Height of tide 12 ft. to 15 ft. A vessel of max. draft 40 ft. 6 in. can reach Terneuzen in most circumstances.

Ships not exceeding the following dimensions are allowed to pass through West lock and canal: length 245 m., breadth 33 m., draft in fresh water (canal) 12.25 m.

With special permission: length 255 m., breadth 34 m., draft in fresh water (canal) 12.25 m.

HEALTH: Arriving vessels are only subject to medical examination when arriving from countries where contagious diseases reported or when such cases suspected on board. Medical Officer will board in Terneuzen roads or Outer Harbour.

RADIO: Communicate via Flushing Radio Channel 14, 156.70 mHz. 24-hour watch kept. From five minutes past every hour to ten minutes past the hour switch to Channel 16 for traffic list and navigation reports.

Communicate before entering the West outer harbour Terneuzen by VHF Channel 11 (156.55 kHz), 24 hours watch kept.

Each hour a weather bulletin, navigation reports and warnings are given.

RADAR: The port radar service operates between buoy 23 and Eendracht Lighthouse. Communicate by VHF Channel 3, 24 hr. watch maintained.

TUGS: Towage not compulsory. Tugs can be ordered from Terneuzen tugboat company or Towage and Salvage Union Ltd. respectively by Channel 72 and Channel 32. Both companies maintain continuous listening watch on Channels 6, 11 and 14.

BERTHING: The port has three outer harbours: West, East and Ferry. The West harbour has two locks (West and Middle), which is mainly used by sea-going vessels. The East harbour has one lock (East lock) for inland craft, while the Ferry harbour (no locks) is used mainly by fishing craft and yachts. Ships not exceeding the following dimensions are allowed to pass through the West lock and canal: length 255 m., breadth 34 m., fresh water draft (canal), 12.25 m. Middle lock is under construction and cannot be used. East lock: ships of a length 140 m., breadth 22.80 m., fresh water draft (canal), 3.50 m. can pass. There are four harbours on the East bank of the canal situated about one mile South of Terneuzen locks.

Noorderkanaalhaven (Northern Canal Harbour) length of North Quay, 170 m., maximum draft 5.50 m.; South quay, 192 m., maximum draft 5.50 m.; in the middle of the harbour maximum draft 7.50 m.

Zuiderkanaalhaven (Southern Canal Harbour) length of North quay, 225 m., maximum draft 2 m.; South quay, 230 m., maximum draft 5.75 m.; in the middle of the harbour maximum draft 8.25 m. and 5 m.

Massagoedhaven (Bulk Harbour) length of quay 504 m., maximum draft 12.25 m. and 6.50 m. A quay of 275 m. length and max. draft of 6.50 m. is under construction.

Zevenaarhaven (Zevenaarharbour) length of North quay 421 m., maximum draft 8.25 m.; South quay, 259 m., maximum draft 8 m., in the middle of the harbour maximum draft 9.50 m. *Sluiskil* (sub-port, about four miles South of Terneuzen) length of quay, 775 m., maximum draft 10 m. to 10.50 m. *Sas van Gent* (sub-port, on the canal about seven miles South of Terneuzen) length of quay, 210 m., maximum draft 7.50 m.

There are several sheds and warehouses, total capacity 160,000 sq. ft., also open storage, total capacity, 100,000 sq. ft. Grain silo with a storage capacity of 10,000 tons. Vessels up to 80,000 d.w.t. which for some reason have to anchor outside the piers can do so on the River Scheldt near buoy No. 27. Ships with maximum draft of 40 ft. 6 in. can reach Terneuzen under practically all circumstances.

Cranage: 10 movable cranes of 5 tons capacities; four floating cranes, one 8.5 tons and three 16 tons; one floating derrick of 40 tons. At Sluiskil there are two coke-loading plants, three cranes of 15 tons and four loading bridges. Sas van Gent has two 5 ton cranes. Water and provisions available.

Container and Ro-Ro facilities: Ro-Ro harbour, width 24 m., maximum draft 6.75 m. Ro-Ro berth Zevenaarharbour South, width 15 m., maximum draft 9.50 m. Ro-Ro berth Zevenaarharbour-North, width 28 m., maximum draft 8.25 m. In Zevenaarharbour a Ro-Ro berth for two vessels, depth 10 m. and 7.50 m.

Ore and Bulk Cargo Facilities: Available at the Massagoedharbour.

MEDICAL: Two modern hospitals available.

TANKERS: Slop tanker available.

FRESH WATER: Available from water barge.

FUEL: Fuel oil and lubricating oil available from lighter or tanker barge. Bunker coal available by prior arrangement.

GANGWAY/DECK WATCHMEN: Available. Tariff increase 100% on Sundays and holidays.

OPENING/CLOSING HATCHES: Can be effected by crew or stevedores.

CUSTOMS ALLOWANCES: See "Rotterdam".

IDENTIFICATION CARDS: Not required.

REPAIRS: Terneuzen Shipbuilding Yard situated at junction of East and West Canal branches. Able carry out hull and engine repairs. Floating cranes and diving equipment available.

TIME: GMT plus one hour in Winter. GMT plus 2 hrs. in Summer.

HOLIDAYS: See "Rotterdam".

SERVICES: Repairs of radio radar, etc., can be effected.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Plans made to widen and deepen Outer Harbour.

AUTHORITY: Havenschap Terneuzen.

AGENT: See "Flushing".

VLAARDINGEN: 51.54 N. 04.20 E.

On the Waterway about 5 miles from Rotterdam.

DOCUMENTS: See "Rotterdam".

PILOTAGE: Harbour pilots are always available.

TUGS: Available.

BERTHING: *Old harbour (municipal):* For tugs and inland craft. Depth at entrance 10 ft. at LW. Total length of quay 2,000 m.

Koningin Wilhelminaharbour (municipal): Depth 12 to 17 ft. at LW. Length of quay 1,300 m.

Vulcaan harbour (private): Suitable for vessels up to a draft of 10 m. (33 ft.) at LW. Stevedoring by: Frans Swarttouw's Havenbedrijf.

Length of quay for cargo-handling: 750 m. Phosphate loading jetty (on riverside) for barges 140 m. 3 electric 16-ton cranes, 3 electric 6-ton cranes and two 5-ton mobile-cranes. Belt conveyors on phosphate jetty. Large shed with a capacity of 30,000 tons and 6 storage tanks with a total capacity of 90,000 tons for various bulk cargoes.

Nieuwe Matex Wharfs (private): 3 berths for sea-going vessels on riverside up to 35 ft. draft at LW. Several berths for barges and coasters on innerside of jetty up to 22 ft. draft.

Large tank installation; bonded warehouses. 424 storage tanks (total) capacity 450,000 cu.m. for vegetable and mineral oils, molasses, latex and chemicals.

Lever-Sunlight Jetty (private): Jetty 75 m. max. draft 10 ft. at LW. (no harbour dues).

N.V. Van Neerbos Ind. en Handel My. Jetty (private): Length of jetty 70 m., max. draft 10 ft. at LW. 1 electric 3-ton crane.

Royal Shell Jetties (private): 4 jetties, length 25 m. each, with berths for vessels up to 12 ft. draft. Tank installation for mineral oils; 77 tanks, total capacity 412,640 cu.m.

Harbour dues by arrangement.

Windmill Holland Fertilizer Works Harbour (private); Length of harbour 300 m. max., draft 11 to 14 ft. at LW. One jetty on riverside, length 105 m. Max. Draft 16 ft. at LW. Harbour dues by arrangement.

FRESH WATER: Available by barge.

FUEL: Available by barge.

REPAIRS: *Ship Repair Yard "Vlaardingen Oost"* All kinds of repairs undertaken. Outfitting quay of 1,100 ft. length.

Machinefabriek Kreber: Builders and repairers of boilers, engines and various kinds of dredgers.

DRYDOCKS: Two drydocks (capacity 4,200 and 5,300 tons) and one broadside slipway of 400 ft. (capacity 3,500 tons) in Vulcaan harbour (Western part).

AIRPORT: Rotterdam Airport (designed for international short and medium haul air traffic) lies at a distance of 10 km. from the Vlaardingen port area.

AUTHORITY: Municipal Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Netherlands Antilles

BARCADERA, Aruba: 12.29 N. 70.00 W.

(See Plan Book)

The industrial harbour of Aruba is situated three miles S.E. of Oranjestad.

DOCUMENTS: Documents and all general information, refer to "Oranjestad".

PILOTAGE: Compulsory.

RESTRICTIONS: Harbour open day and night. Depth of water in entrance and throughout harbour is 36 ft. Swinging basin width 1,000 ft.

MAX. SIZE: Max. LOA 232 m., max. draft 33 ft.

TUGS: Available.

BERTHING: 1,150 ft. of dockside accommodation.

FRESH WATER: Not available.

FUEL: Can be supplied.

AUTHORITY: See "Oranjestad".

BONAIRE TERMINAL (Brasil): 12.13 N. 68.23 W.

(See Plan Book)

OPERATORS: Bonaire Petroleum Corporation N.V. Transhipment Terminal receives crude oil shipped from its source in Very Large Crude Carriers (VLCC's). The crude is stored in tanks on shore and reloaded into large and medium range tankers for subsequent unloading at a refinery or other terminal.

LOCATION: The steel jetty is situated on the South coast of the Northern portion of the Island of Bonaire in Lat. 12° 13′ 12.9″ N. and Long. 68° 23′ 17.2″ W.

DOCUMENTS:

3 Crew Lists.
1 Stores List.
1 List of personal effects of crew leaving.
1 Medicine and Drugs List.
Health Certificate from last port.

PILOTAGE: Compulsory. The Pilot-Berthing Master will board the vessel at the established arrival point in Lat. 12° 10′ N. and Long. 68° 25′ W., which is 3.6 miles, 208° True from the jetty.

The Pilot will embark from one of the tugs or launches assigned to assist the vessel in the berthing operation. The Pilot will assist the Master in every way possible to manoeuvre the vessel from the arrival point into the berth with the assistance of the 2 or in case of a VLCC 3 tugs and utilizing the services of 1 or 2 mooring launches to run mooring lines from the vessel to the breasting and mooring dolphins.

ANCHORAGE: There is no anchorage area at Bonaire for tankers; therefore, if the berth is occupied, vessels will be appropriately instructed to remain within radio/telephone (VHF Channels 16 and 13) radius pending advice with respect to a clear berth or other advices.

NAVIGATION: Navigable waters surrounding Bonaire Island are clear; however, the coasts of the Island are steep-to and should be avoided. The currents in the offing and off the points of the Island set Westward. On days with little wind a weak current sets to the Westward, generally parallel with the coast from Kralendijk Roads toward Wekoewa Point and parallel to the coast line in way of the jetty. It is urged that reference be made to the British Admiralty South American Pilot Volume V or United States HO Pub. 22 Sailing Directions for the West Indies Volume II or equivalent publication of the Netherlands Government.

Lacre Point, on which a light is shown, is at the Southern extremity of Bonaire. A light is situated on Boca Spelonk, the Eastern mid-point of the Island. Seroe Bentana Light, situated near the Northern extremity of the Island, is visible for approach from the N.E. through N.W. South of 250°/070° on the West side of the Northern end of the Island this light is obscured and then jetty lights and Radio Netherland Towers may be used for bearings.

Prevailing winds are the E.N.E. trade winds.

HAZARD ZONE: *Radio Transmitting Installation:* Vessels approaching Bonaire should remain clear of an area within a radius of 3 nautical miles from the Radio Netherlands Towers situated on the Island of Bonaire in Lat. 12° 13′ N. and Long. 68° 19′ 15″ W. This area is noted as a danger area due to strong radiation from the powerful radio transmitters on shore. Bonaire Terminal is situated sufficiently West of this area to be well clear of any radio radiation influence.

RADIO: When a vessel leaves its loading port, the shipper should advise the date of anticipated arrival at Bonaire. For vessels departing from remote loading ports, the estimated arrival date should be revised at least once each week while the vessel is en route.

A government wireless/telegraph station operates daily from 0700 to 2130 hrs. local time (1100 to 0130 GMT). Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC).

Arrival Advice: The Master should advise his estimated time of arrival not less than seventy-two (72) hours in advance, again forty-eight (48) hours in advance and again twenty-four (24) hours prior to arrival, and this last message should be revised if an unusual change in the estimated time of arrival should occur. Wireless telegraph messages of this nature must be sent to the ship's Agent who, in turn, will immediately relay the information to the Terminal management.

The text of any one of the arrival advices should contain the following data in addition to the declared time of arrival:

1. Draft of vessel, fore and aft.
2. Available fittings, i.e. number and diameter of connections at deck manifold system for prompt connecting of two 24 in. and/or two 12 in. steel swivel loading arms.
3. Any conditions which may affect loading or unloading operations.
4. Any unusual condition which may require abnormal attention prior to berthing.

VHF: International VHF Maritime Band Communication should be commenced within a radius of thirty (30) miles from the Terminal, or more, if possible. The Terminal may be called on International VHF Channel 16 (156.800 mHz). When radio/telephone contact with the Terminal has been established, communication should then be shifted to Channel 13 (156.650 mHz).

After initial radio/telephone contact has been established, radio/telephone communication with the Terminal will remain on Channel 13. This will include communication with the two tugs and the two mooring launches on standby, all of which will be available to assist the vessel into the berth.

Mooring, Unmooring VHF Communication: Communication on Channel 13 during the immediate approach and mooring procedure will be confined rigidly to berthing operations which includes all directives from the Berthing Master to the tugs, the mooring launches and the jetty. The only messages which may interfere with these communications will be those caused by an extreme emergency.

After the vessel has been secured in the berth and the Berthing Master has cleared all berthing operations, communication on VHF Channel 13 will be secured and all base VHF receivers will be returned to guard Channel 16 pending an emergency or when the Berthing Master resumes his function for a departing vessel. It is to be noted that hand radio/telephone sets transmit and receive only on Channel 13. The base sets in the terminal office and on each of the tugs and launches is equipped with radio/telephone equipment for transmitting and receiving on Channels 16 and/or 13.

Radio/Telephone UHF (Private Frequency): Communication between the platform and the vessel and the Terminal before, during and after transfer of product will be via portable intrinsically safe, hand carried, radio/telephones on a private UHF frequency.

Radio/Telephone VHF Resume use Departing: When the vessel is ready to depart and the Berthing Master has boarded and resumes his function, VHF radio/telephone communication will again be established on International Maritime Channel 13 between the vessel's bridge, the 2 or 3 tugs, the 2 mooring launches and the jetty so that the casting off operation may be properly accomplished.

Radio Telephone – Guard Call Channel 16: After the Berthing Master disembarks and the tugs are dismissed, and the vessel has departed full away, it is expected the vessel will resume a guard watch on Channel 16. The terminal station may be called on Channel 16 and/or 13.

TUGS: Tug assistance is compulsory. Mooring launches are available.

HEALTH: There are no health formalities; however, a health certificate from the last port must be presented to the Agent for submission to local health authority.

CUSTOMS/IMMIGRATION: When the vessel is secure in the berth and the gangway is landed on deck, the Immigration Officer, the Customs Officer and the Agent will board to attend formal entry of the vessel.

Immigration: Two copies of the crew list are to be ready for presentation to the Immigration Officer. Crew members must all be presented for Document check without delay or interruption of vessel's operation. Terminal gate watchmen are required to check all personnel re-entering the terminal. Therefore, appropriate crew passes are to be issued to each crew member prior to shore leave.

Customs: The Customs Officer will require one crew list, one stores list, one list of personal effects for those crew men leaving the vessel at Bonaire and one list of all medicines and drugs. The Customs Officer with the assistance of the ship's Agent will prepare the Inward Clearance document. This document is to be signed by the Master. Upon completion of the above formalities, the vessel is declared free and shore leave may be granted.

BERTHING: The least depth of water in way of Berth No. 1 is 110 ft. (33.5 m.). Also see "Developments".

Mooring Facilities: Berth No. 1 consists of an operating platform 132 ft. 10 in. (40.48 m.) long facing the sea and 94 ft. (28.65 m.) wide toward the shore with two 24 in. and two 12 in. swivel jointed steel loading arms for the transfer of petroleum products. The waterfront side of the platform is 22 ft. 3 in. (6.787 m.) inside and away from the ship's side.

Breasting Dolphins: There are 6 breasting dolphins, 4 of which are designed for the vessel to rest against and to which forward and back spring lines are to be secured to heavy quick-release mooring hooks. At each end of the system of breasting dolphins there is one landing dolphin offset to allow a vessel 5° off the parallel line to land against the berth system. These are noted "a" for the offset dolphin and the main dolphin is noted "b". The dolphins are numbered from No. BD1a and BD1b in the West and through BD2, BD3 and BD4b and BD4a to the East. The centre line of the berthing facility is 17 ft. 5 in. (5.3 m.) East of the centre line of the operating platform. This point is well marked on the seaward panel of the platform with a 4 in. wide white reflecting vertical stripe. BD2 and BD3 are each 135 ft. (41.148 m.) West and East of this white vertical stripe. BD1b and BD4b are each 80 ft. (24.384 m.) further West and East respectively, from BD2 and BD3.

Mooring Dolphins: Inshore 215 ft. (65.532 m.) perpendicular from the berthing line are 6 mooring dolphins. These dolphins are numbered from MD1 in the West to MD6 in the East MD3 and MD4 are each 350 ft. (106.680 m.) West and East from the centre line of the mooring structure system noted by the white vertical stripe on the seaward face of the operating platform. MD2 and MD5 are each 250 ft. (76.200 m.) West and East respectively, from MD3 and MD4. MD1 and MD6 are each again 250 ft. (76.200 m.) West and East respectively, from MD2 and MD5.

Capstans: On each of the breasting and mooring dolphins there is a small capstan with sufficient power to heave up on to the deck of the dolphin a ship's mooring line for securing to the heavy quick-release hooks.

Mooring Lines: Prior to coming alongside, the vessel must have all mooring lines on station and available on that side which will be to the berth. Bearing in mind that the product transfer is via steel swivel loading arms, it is imperative that the forward and back spring lines be adequate to maintain a minimum fore and aft motion of the vessel to remain within the limitation of the envelope of the loading arms.

Spring Lines – Breasting Lines: The first lines lead out will be the forward and back springs after which the forward and after breasting lines lead to the appropriate mooring dolphins, and then the bow and stern lines lead to the appropriate mooring dolphins. The procedure may be altered in accord with physical equipment on the ship, weather and sea conditions, along with other circumstances, all subject to the Berthing Master's requirements and combined approval of the Master and terminal management.

Mixed Mooring Lines Prohibited: Mixed moorings are prohibited, i.e. a wire and a fibre rope in parallel service is undesirable due to unequal elasticity. All mooring lines must be so arranged that loss of effect cannot occur when slacking off or heaving in one line, as required, due to the rise or lowering of the vessel during discharge or loading of cargo.

Mooring Machinery – Deck Winches: All deck machinery used for the heaving in and control of mooring lines must be operable. A vessel having deck machinery in poor state of maintenance to that point where mooring lines cannot be hove tight or brakes that tend to slip under tension will be sufficient reason to require consideration of terminal management to refuse connecting of the steel loading arms, or if same are already connected and the mooring lines become insecure, all transfer of product will be stopped and the steel loading arms disconnected pending correction of the mooring situation.

Surge-Tension Controls Prohibited: Wire mooring lines not on winch drums are not to be used for spring lines. Mooring wires secured on surge and tension controlled winches are prohibited. All mooring lines must be secured positively, i.e. on winch drums with the brake properly drawn tight or properly secured on bitts.

Power to Deck Machinery: At no time during the period the vessel is in berth is the power to operate deck machinery to be shut off.

Motion of Vessel in Berth: The vessel, while loading arms are connected, must not be permitted any motion alongside or away from its proper position in berth.

Surveillance of Mooring Lines: Mooring lines must remain under constant surveillance during unloading and loading operations. Failure to ease tension on mooring lines during unloading or failure to maintain proper tension on mooring lines while loading will be sufficient reason to stop transfer of product.

Fire Warp – Emergency Towing Wire: After the vessel is all fast fore and aft, an emergency wire of suitable quality and strength to tow the vessel should be positioned on the offshore bow and the after offshore quarter of the ship. This towing wire should be so secured that the eye may be readily picked up by a towing vessel. It is required that the length of the wire hawser should be not less than one-half again that of the highest freeboard of the vessel at the point of its location on the ship where the ship end is well fast on bitts.

EMERGENCY SIGNAL: In the event of any form of emergency such as fire, bursting of transfer piping, overflow of vessel's cargo tank, etc., the Operating Platform emergency signal will be an intermittent signal on the general alarm system for not less than 15 seconds.

The vessel will use its own emergency signals in the event of any emergency on board. To coordinate any emergency procedure, the personnel on the Operating Platform must be advised of the vessel's emergency signals.

In the event of any emergency either on board the vessel or the operating platform all oil transfer must be stopped and all oil transfer valves closed.

LOADING: *Electric Bond – Earthing:* Prior to manoeuvring the loading/unloading steel mechanical loading arms toward the vessel from the Operating Platform, the electric bond wire must be connected to a clean metal contact on the vessel's oil cargo transfer system.

The electric bond wire shall not be disconnected until the loading/unloading mechanical arms have been disconnected and manoeuvred well clear of the vessel.

The flame proof switch on the jetty will remain open until the electric bond wire has been connected to the ship. Prior to disconnecting the electric bond wire from the ship, the flame proof switch on the jetty will have been opened.

Connection to Oil Transfer Piping Systems: In the berth there are two 24 in. and two 12 in. steel pipe swivel jointed loading/unloading arms. This equipment is entirely controlled from the deck of the Operating Platform. Connection of the fittings requires clean flat faced flanges on the vessel's oil transfer piping deck manifold, using a proper gasket, to ensure a secure tight connection.

Cargo and Ballast Transfer: Before transfer of cargo or ballast may be started, the Chief Officer and the Terminal Representative will ensure that all necessary controls and safety measures have been attended. A Declaration of Inspection is to be signed by a responsible Ship's Officer and the Terminal representative certifying that all precautionary measures have been taken, that all equipment used in the transfer operation is in proper order and that all concerned are in agreement on the proper procedure of the operation.

Discharge of Cargo: Upon advice from the Terminal Marine Supervisor to the Ship's Officer in charge that oil transfer may be started, the Officer will arrange for the initial flow to be slow with sufficient pressure to permit inspection of all transfer piping and connections for any leakage. When the terminal personnel advise they are receiving product, the flow may be increased to the rate agreed upon.

Completion of Cargo Discharge: After all cargo tanks have been drained and the pumps have lost suction and the discharge of cargo has been declared finished, the flow of product will have stopped. With the agreement between the Ship's Officer and the Terminal Marine Supervisor, the oil transfer valves on the Operating Platform will be closed. All product remaining in the unloading arms will be drained back into the vessel. If the vessel's pipe-line system does not allow the complete draining of the unloading arm, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel!* After the arms have been completely drained, they may be disconnected and the ends blanked off to prevent any drippage of oil.

Loading of Cargo: Upon advice from the Ship's Officer in charge that oil transfer may be started, the Terminal Marine Supervisor will arrange for the initial flow of product into the vessel. When the Ship's Officer advises that he is satisfied that product is flowing in accord with the loading programme, he will advise the terminal personnel and the flow will be increased to the rate agreed upon.

Communication, Audible, Visual: Constant contact with the personnel on the Operating Platform during the topping off procedure is mandatory! The rate of flow of product is to be adjusted to that point where complete control is constant and that in the event of an emergency immediate shut down will not create any pressure surge on the shore transfer piping.

Topping Off of Cargo Tanks: Every precaution must be observed to avoid over-filling of any tank or causing any listing of the vessel. Observance of the trim by the stern shall be constant to avoid any undue strain upon the vessel's longitudinal structure. The cargo tanks and pipe-lines thereto on most tankers are segregated into groups. One tank in each group should be selected for the overflow relief tank by maintaining the level of liquid considerably lower than the other filling tanks to permit prompt relief of that tank reaching an overfilled level.

Completion of Loading: After all cargo has been loaded all product remaining in the loading arms will be drained into the vessel. If the vessel's pipe-line system does not permit complete draining of the loading arms, then arrangements must be made to drain the arm into a container or via a drain hose led into a cargo tank. *No product will be permitted to drain out onto the open deck of the vessel!* After the arms have been drained they may be disconnected and the ends blanked off to prevent any drippage of oil.

BALLAST: *Ballast Loading:* Should the vessel have permanent ballast tanks with entirely separate pipe-lines and ballast transfer system sea water ballast may be loaded in accord with the Master's requirements.

Sea water ballast is not to be loaded into any cargo tanks or through any oil transfer system while there is any cargo on board the vessel. In the event of an emergency, special arrangements must be agreed upon with the terminal management for the loading of ballast into any cargo tanks before all of the cargo has been completely discharged.

The vessel's Senior Officer in charge will personally supervise the arrangement of the pumproom system for the ballasting operation. The Public Cargo Inspector will accompany the Officer into the pumproom to break the seals on the sea suction valves.

No sea suction valve may be opened until all down coming pipe-lines have been drained and are completely free of product and the down coming valve closed. In most instances the pumps should be operating just prior to opening the sea suction valve.

Ballast loading will be under the entire control of the ship's personnel and it is expected that all normal loading precautions will be observed.

Deballasting: En route to Bonaire the vessel should have thoroughly cleaned certain appropriate tanks for the containment of clean ballast for discharge overboard. Only dirty ballast (oil contaminated sea water) and tank cleaning slops are to be discharged into the terminal's ballast receiving system.

Ballast, Oily Water, Discharge: Under no circumstances will dirty ballast water be discharged overboard within a radius of 50 miles from any Netherlands Antilles Island.

Ballast Discharge to Shore; The quantity of ballast to be discharged into the terminal will be measured prior to commencement of discharge. After the steel loading arm to be used has been connected to the ship's manifold, the discharge of ballast water will be accomplished in the same manner as the discharge of cargo.

Tank Bottoms and Slops: Upon completion of the deballasting operation, all of the vessel's tanks will be inspected and approved for the reception of cargo. The sea suction valves will then be sealed in the closed position by the public inspector or by a Bonaire Petroleum Corporation N.V. representative. Any bottoms and slops remaining must have the approval of terminal management prior to "loading on top".

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master for crew members requiring medical or dental attention.

In the case of crew members having to be left behind at Bonaire for hospitalization or otherwise, Master must sign authorization guaranteeing expense of attention rendered and repatriation.

FUEL: Bunkers for steam propelled tankers are available.

Bunker Transfer: During the period of time the vessel is in berth, the transfer of bunkers from one tank to another is prohibited. All bunkers to be consumed while in port must be available in that tank from which bunkers are normally consumed.

FRESH WATER: Fresh water on Bonaire is desalinized sea water and the supply is minimal. Small quantities may be supplied upon advance notice.

REPAIRS: There are no repair facilities on the Island of Bonaire. Upon sufficient advance notice, special service personnel and minor mechanical repair work may be arranged from Curacao. Transportation for such service personnel is via scheduled airline.

POLICE/AMBULANCE/FIRE: Tel. 8000.

CARGO INSPECTION: Along with the Government Boarding Officers the representative of the petroleum inspecting organization mutually engaged by the Shipper and Bonaire Petroleum Corporation N.V. will board the vessel for the purpose of gauging the cargo tanks, obtaining the temperature of the cargo and obtaining required samples. His function is to protect the interest of the vessel as well as the Shipper and the consignee. Every assistance is to be rendered to expedite his function on board the vessel. An Officer should accompany the Inspector while on board and should assist by making available all information requested such as cargo tank calibration tables, etc. Cargo transfer may not be commenced without the approval of the Inspector.

Completion of Discharge of Cargo – Inspection: Upon completion of discharge of the cargo, the Inspector will examine all of the cargo tanks and will sign the tank inspection certificate.

Loading Cargo, Inspection: In the case of a vessel arriving to load cargo, the Inspector will examine all of the cargo tanks to determine the condition of the cargo tanks for reception of the cargo. Upon completion of loading all of the cargo, the Inspector will gauge the cargo tanks, take temperatures and samples as required.

Incomplete or Part Cargo: In the event the vessel does not complete the discharge of cargo, or does not load a full cargo, the Inspector will board the vessel to gauge the cargo tanks to record the amount of cargo in the vessel after transfer operations have been completed.

Cargo Pumproom Sea Suctions: Prior to loading or unloading the Public Inspector will certify that the sea suction valves connected to the vessel's oil transfer system are closed, lashed and sealed. *Do not lock these valves under any circumstances.* These valves are to be sealed in the *Closed* position and sufficiently lashed so they may not open due to vibration or any other reason.

STORES/PROVISIONS/LAUNDRY: All stores and provisions are imported into the Island of Bonaire; however, small quantities of provisions may be obtained. There are no deck and engine stores available. Upon sufficient advance notice, small items not available on Bonaire may be obtained from Curacao.

Laundry service in small quantities may be arranged for through the ship's Agent.

DEVELOPMENTS: Second jetty completed for vessels up to 80,000 d.w.t.

SHIPMASTER'S REPORT: 1977. *In his report the Master called the port – "Brasil".*

Documents:

5 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
1 Vaccination List.

Immigration Officer acts on behalf of Quarantine service. State of health on board to be given in 72 hour ETA message.

Services:

Fresh water by truck from Kralendijk and very expensive. Very limited quantities of shipchandlery supplies. No deck or engine stores. Gas oil limited and by drums only. Bunker "C" only. Lube oil limited to some brands and limited supply by drums. Water and fuel oil chemical treatment available. Radio Holland Service Engineer available. Repair men can be flown in from Curacao. Very limited laundry service. If required at least 4 days notice advisable. Tankers from Mediterranean, Africa and Gulf should give ETA's 10 and 5 days as well as 72/48/24 hours, any of which to give arrival draft F & A, number and diameter of connections, any condition affecting loading or discharging, ballast quantity, clean or otherwise and slops quantity, Pilot advised that 10 days longest, so far, that vessel waited off for berth. Have adequate fresh water on board for this contingency.

Berthing: No. 1 Jetty: Least depth alongside 110 ft. Loading/discharging Chiksans 2 × 24 in. and 2 × 12 in. Max. Size 500,000 d.w.t.

No. 2 Jetty: Least depth alongside 60 ft. Loading/Discharging Chiksans 3 × 12 in. Max. size 80,000 d.w.t. Product handled: Crude. Max. pressure; 125 p.s.i.

VHF contact with BOPEC on Channel 16 at 25 miles, then stand-by on Channel 13 for instructions. On berth VHF supplied to maintain shore contact with control who pass messages to Agent at Kralendijk.

Immobilising of engines or transfer of bunkers not permitted on berth.

Port side alongside always.

SHIPMASTER'S REPORT: May, 1979.

Documents: Immigration require 2 crew lists on IMCO forms. One additional crew list to be supplied to Agent and another to the security gate also required are 2 personal effects lists and 3 stores lists.

Pilotage: The Pilot requires a combination of accommodation ladder and pilot ladder. He will not use the pilot hoist.

Berthing: For vessels of about 140,000 d.w.t. 2 tugs are used, 1 each at the fore and aft ends of the main deck. Each tug supplies 2 lines.

When unberthing the tugs push and do not make fast.

Tankers of 250,000 d.w.t. use 3 tugs.

Moorings: 3 head lines are passed ashore first, followed by 2 breast lines and 2 forward springs. At the after end 2 spring lines are passed ashore first followed by 2 breast lines and finally 3 stern lines. Only one mooring boat is used and he passes forward shore lines ashore first.

SHIPMASTER'S REPORT: February, 1980.

Documents: 3 Crew lists for Agent and 2 for Immigration.

Pilotage: Pilot requires accommodation ladder (usually starboard side) when disembarking for VLCC's.

Tankers: Crude oil washing permitted only for tanks which will be used for ballast.

Shore Leave: Passes not required.

BULLEN BAY, Curacao: 12.11 N. 69.01 W.

(See Plan Book)

Bullen Bay is an open bay on the South coast of Curacao, 8 miles N.W. of Willemstad.

DOCUMENTS: Documents and all General information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the Bay anymore. Ships arriving are piloted by government Pilots supplied from Willemstad. Ships leaving are piloted by Pilots employed by the Curacao Oil Terminal.

Pilot Station: 1 mile S.W. of Cape St. Marie (that is the cape on the West side of Bullen Bay).

Communications: Ships destined for Bullen Bay are to inform Traffic Control at Willemstad (call "Fort Nassau" on VHF Channel 16) and also Curacao Oil Terminal at Bullen Bay (VHF Channel 11) of their approach. The Pilots at Bullen Bay operate on VHF Channel 9.

ANCHORAGE: There is no anchorage in the bay. Ships that have to wait for berth are to remain in the vicinity within VHF radio range.

MAX. SIZE: 500,000 d.w.t. on full draft, LOA 1,350 ft.

TUGS: Compulsory. There are 2 tugs of 3,852 h.p. with 53 and 60 tons bollard pull and 1 tug of 2,500 h.p. with 35 tons bollard pull, stationed at Bullen Bay. 2 tugs will assist the tankers on their arrival and departure. 3 tugs will assist the VLCC's on their arrival and 2 tugs will assist on their departure.

BERTHING: *Curacao Oil Terminal:* Curacao Oil Terminal (COT) located at Bullen Bay facilitates economical trans-shipment of Eastern hemisphere crude arriving in very large crude carriers (VLCC's) for storage and on-carriage in smaller ships to draft restricted U.S. ports.

Jetties: Ships moor port side alongside.

Tanker jetties from East to West:

No. 1: 250,000 d.w.t. four 12 in. connections, heading 196°
No. 2: 70,000 d.w.t. four 12 in. connections, heading 177°
No. 3: 100,000 d.w.t. four 12 in. connections, heading 146°
No. 4: 540,000 d.w.t. four 16 in. connections, heading 129°
No. 5: 100,000 d.w.t. four 12 in. connections, heading 127°
No. 6: 350,000 d.w.t. four 16 in. connections, heading 124°

The tugboat jetty is located between Jetties No. 2 and 3.

Total tank capacity: 17,750,000 barrels.

1 – 1,000,000 barrels capacity – 1,000,000
16 – 750,000 barrels capacity – 12,000,000
6 – 375,000 barrels capacity – 2,250,000
38 – small tanks capacity – 2,500,000

Pipe-lines: Main track consists of 5 strings of 36 in. pipe. The jetties carry 2 strings of 36 in. pipe in a loop. The loading rate is up to 12,000 t.p.h. Tankers' discharge rate is up to 25,000 t.p.h.

Deballasting: Capacity 4,000 t.p.h. per jetty. Ballast treatment produces affluent of less than 20 parts per million (20 ppm) oil content.

Throughput:

Transhipment	1,200,000 barrels per day
Refinery import	250,000 barrels per day

Operators: Curacao Oil Terminal NV, PO Box 660, Willemstad, Curacao, Netherlands Antilles. Telex No. Curacao 1175.

FRESH WATER: Fresh water available at the piers.

FUEL: Bunker facilities for all grades are available at a rate of 3,800 barrels per hour.

NAVIGATIONAL AIDS: There is a leading range of 43° True bearing on the West side of the bay for ships entering the bay, running 851 m. (approx. 4.5 cables) clear of the shore near Cape St. Marie, with red daymarks and a green and (yellowish) red light at night.

SHIPMASTER'S REPORT: February 1979.

Restrictions: Crude oil washing permitted subject to notice below. Tank wash piping must be tested before arrival and oxygen meters calibrated.

Health: As for U.S.A.

VHF: Channel 9 to give notice of readiness and for berthing with Pilot and tugs. Call Agent on Channel 25.

Berthing: Shore gangway at 2 largest berths.

Notice No. 1: Issued by Curacao Oil Terminal (C.O.T.)

Crude Oil Washing

Only tankers equipped with a well constructed inert gas installation and provided with fixed tank washing machines connected to the tank wash piping system by means of fixed steel piping may crude wash cargo tanks under the following conditions:

1. Oxygen content in cargo tank may not exceed 5% (*meters calibrated*).
2. Minimum inert gas pressure in cargo tank to be 250 mm. (10 in./water column) (0.025 hg/sq.cm. = −0.36 lb./sq.in).
3. Continuous supervision by a specifically appointed and experienced operator is mandatory.
4. The "in-line" O_2 analyser must be arranged to allow for calibration during inert gas operation.
5. The hydrants of the tankwash piping must be equipped with screwed-on heads.
6. Tankwash piping must be tested for tightness.
7. Exceed of discharge time will be for ship's account.

For each "crude washing" a request for cleaning must be submitted to the Head Operations of C.O.T.

Please sign for receipt: Curacao Oil Terminal N.V.
Signed..........................

Master

Operation Manager

Notice No. 2: Issued by N.V. Curacaosche Scheepvaart Maatschappij. Emmastad, Curacao, N.A.

CUSTOMS REGULATIONS
BONDED STORES

In connection with revised Customs Regulations for the ports of Curacao, we draw your attention to the following:

1. All stores on board of vessel on arrival, also personal effects, must be declared to Customs Officials when clearing in vessel.
2. While ship is in port, Customs Officials may seal bonded stores, e.g. beer, wine, spirits, cigarettes and tobacco.
   When sealing bonded stores, permission may be granted by the Customs Officials, to take out a certain amount of these stores, from the bonded store-room, before sealing the store-room.
3. Stores on board, which are *not* sealed by the Customs Officials, may be used on board vessels, but may not be taken ashore without permission of Customs.
4. All stores ordered in bond at the port of Curacao, MUST REMAIN UNBROACHED, until departure of vessel from Curacao, and it is more likely than not, that Customs Officials will board before departure for control. If bonded stores are found opened up, or missing, Customs will charge import duties, whilst the possibility exists that the ship may be fined for such breach of law.

AUTHORITY: Harbour Master of Curacao.

CARACAS BAY, Curacao: 12.04 N. 68.52 W.

Caracas Bay is an open bay on the South coast of Curacao, 6 miles S.E. of Willemstad. This port, mainly used by tankers, bunker ships and big passenger liners, is specially fitted as an oil terminal.

DOCUMENTS: Documents and all general informations, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory and rendered day and night. There is no resident Pilot at the bay. Ships at Caracas Bay are piloted by government Pilots supplied from Willemstad.

Pilot station: 1 mile SW of Lijhoek (that is the cape on the West side of Caracas Bay).

ANCHORAGE: There is no anchorage in the bay.

MAX. SIZE: Vessels with a max. overall length of 1,050 ft. and max. draft of 45 ft. can be accommodated. Max. depth 47 ft.

VHF: Ships destined for Caracas Bay are to inform traffic control at Willemstad (call "Fort Nassau" on VHF Channel 16) of their approach. There is no VHF radio station at Caracas Bay.

TUGS: Tugboats operate from Willemstad. Tug assistance only for ships arriving. Tugs are automatically provided:

1 tug for tankers up to 20,000 gross tons.
2 tugs for tankers above 20,000 gross tons.
1 tug for cargo and passenger ships exceeding 16,000 g.r.t. and 600 ft. length.
2 tugs for cargo and passenger ships exceeding 30,000 g.r.t.
Ships leave without tug assistance.

BERTHING: 2 piers owned by Shell Curacao Ltd. are at the East side of the bay, naturally protected from prevailing wind and sea, with depths up to 47 ft. alongside. Vessels dock directly with their port side along the piers. Pier No. 2, with a depth alongside of 47 ft., and pier No. 3, with a depth alongside of 47 ft., are newly built concrete piers/quays, modern and equipped for handling oil in bulk, with enough platform to serve also as passenger terminal. The biggest cruise ships moor along these piers regularly.

The oil is transported through pipe-lines from the refinery at Emmastad to the storage tanks at Caracas Bay. 2 ships can bunker simultaneously. New electrically-driven centrifugal pumps, metering and blending equipment at the bay stand for efficiency to reduce bunkering time. Subject only to the capacity of ships receiving connections, loading rates up to 2,000 t.p.h. of bunker oil can readily be achieved.

FUEL: The piers are built as oil piers, modern and equipped to supply any kind of bunker or lubricating oil to any vessel.

FRESH WATER: Fresh water can be obtained via pipe-line on the wharves.

STEVEDORES: Lighters and longshoremen are supplied from Willemstad.

REPAIRS: Small repairs can be done at the bay through working barges alongside.

GENERAL: Clearance, port administration, port charges and regulations are the same as at Willemstad.

AUTHORITY: Harbour Master, Curacao.

FUIKBAY, Curacao: 12.03 N. 68.50 W.

Fuikbay, on the South coast of Curacao, 7 miles South-east of Willemstad, is an inland bay with a 147 ft. wide navigable entrance. The depth of this harbour is 26 ft.

DOCUMENTS: Documents and general information, refer to "Willemstad".

PILOTAGE: Pilotage is compulsory.

ANCHORAGE: There is an anchorage area in the West side of the bay.

RESTRICTIONS: As a rule vessels only enter this port during daylight. Sailing can take place day and night.

MAX. SIZE: Vessels can enter and leave with a max. draft of 24 ft. and a max. length of 360 ft.

BERTHING: This bay is mainly used as a loading terminal of the "Mining Company Curacao" for export of phosphate rock mined out of the "Tafelberg". There is one berth under the conveyor which transports the phosphate rocks from shore into the holds of the vessel alongside. Depth alongside is 28 ft. There is also a 84 ft. berth available for handling explosives or other cargo, usually named Westwerf. Only small vessels with a max. draft of 8.25 ft. can come alongside. Vessels with more draft can moor with the help of floats between ship and quay.

The piers are privately owned by "Mining Company Curacao" situated on private territory of this company.

FUEL: This port has no bunker facilities, so vessels bound for this port must take bunkers in Caracasbay or Willemstad before or after calling at this port if bunkers are desired.

GENERAL: Other services such as tugboats, repairs, power, etc. are rendered from Willemstad. 5-ton mobile crane available.

AUTHORITY: Harbour Master, Curacao.

KRALENDIJK, (including Salina) Bonaire: 12.09 N. 68.17 W. (See Plan Book)

DOCUMENTS:

	Customs	*Immigration*	*Agent*
Passenger list	1	2	2
Crew list	1	2	2
Personal effects list of crew	1		
Store list	1		
Curio list	1		

PILOTAGE: Pilot service is compulsory. Pilot meets vessels 0.75 miles S.W. of the berths. Pilot boat flies blue flag with letter "L" by day and red over white light at night.

ANCHORAGES: Unlimited. Depth 30 ft. and over.

RESTRICTIONS: Notify the Agent at least 24 hrs. in advance. No tide.

MAX. SIZE: Length 1,050 ft., also see "Berthing".

INWARD CLEARANCE: Inward clearance is effected on board immediately on docking. Immigration Officer arrives on board immediately after docking. Passengers disembarking at Bonaire must present themselves for documents check.

Customs Officer boards immediately after docking and together with a representative of the Agency's Shipping Department the inward clearance document of the vessel (in ballast or with cargo in transit, as the case may be) is prepared and signed. This document must be signed by the Master. Occasionally the Customs Officer may insist that the Master sign in his presence. Only upon completion of the above formalities, usually carried out in a very short time, is the vessel declared free and passengers and crew may go ashore. It is recommended that one of the public rooms be made available for the purpose of inward clearance in order to avoid congestion in the purser's office.

HEALTH: No health formalities.

RADIO: A Government Radio Station operates daily from 0700 to 2400 hrs. In case of emergency Bonaire Radio can be contacted by telephone. Vessels bound for Bonaire should route their messages for Bonaire through Curacao Radio (PJC). The Government Radio and Telephone Station maintains daily telephonic communication with Curacao, also with the United States, Europe, etc.

VHF: Call sign "Bonaire Pilots". Calling Channel 16. Working Channel 11. Rescue operations Channel 6. Watchkeeping 0800 – 1700 hrs. except Saturdays, Sundays and holidays. Plans being made for 24-hour service.

TUGS: Three 4,300 h.p. tugs are available. The Agent should be notified in advance if a tug is required, in order to make the necessary arrangements with the Petroleum Company.

BERTHING:

North Pier:

Berthing space	225 ft.
Depth	34 ft. alongside at LW
Height	6 ft.

Max. permitted load factor on pier is 2,000 kilos per sq. m.

Vessels of max. 30,000 g.r.t. or a max. length of 738 ft. are allowed to berth alongside.

Southern Pier:

Length	394 ft.
Width	46 ft.
Depth	50 ft.alongside
Height	6 ft.
Length of connecting bridge from shore to pier	199 ft.
Width of connecting bridge from shore to pier	68 ft.
Max. LOA	1,050 ft.

Mooring facilities:

A: Double Mampaey easy-release electrical capstans (100 tons each)
B: Two (2) bollards 50 tons each
C: Double Mampaey easy-release electrical capstans (100 tons each)
D: Bollards of 50; 25 and 10 tons (every 20 m.)

Fendering: Vredestein Gigant Fenders; Block fenders and D-fenders (made of rubber).

Roll-on/roll-off Facilities: At the South pier a small Ro-Ro platform for "coaster-size" ships and small "landing-craft" type. Max. permitted load factor 2,000 kilos p.sq.m. Depth 5 m.

Off the Harbour Office between the North pier and the South pier a Ro-Ro pier for ships up to 3,000 gross and/or a max. length of 90 m. Max. permitted load factor unlimited. Depth 6 m. Max. size: LOA 300 ft. Draft 20 ft.

For the mooring and unmooring at the pier shore labourers are engaged by Agents at the expense of the shipping line. Motor-boats are available for running lines.

Salina: This port is situated 4 miles South of Kralendijk and is owned by the Antilles International Salt Co., loading of salt in bulk only can be carried out at this pier.

Vessels of approximately 40,000 tons d.w.t. can be accommodated.

Depth alongside 45 ft. The Pilot will board vessels destined for this port 0.75 miles West of the jetty, from a motorboat displaying the signals as referred to for Kralendijk.

STEVEDORES: There are no regular stevedores (longshoremen) available in Bonaire. For cargo handling operations ordinary labourers are engaged by the Agents for account and risk of the ship.

Working Hours: Monday-Friday 0700-1200 hrs. and 1300-1600 hrs. Overtime possible.

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical or dental treatment. In case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign an authorisation guaranteeing expense of treatment and repatriation.

FRESH WATER: Limited quantities of fresh water from the Government Water distillation and power plant can be supplied at the pier.

FUEL: On advance request, bunkers are delivered by craft at rates comparable to those in Curacao or Aruba.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary but recommended; Overtime as usual.

OPENING/CLOSING HATCHES: This work is normally carried out by crew.

IDENTIFICATION CARDS: Passengers. No landing cards required, but some ships carrying a large number of passengers furnish landing cards to passengers for their own control of passengers returning on board. Crew. No landing cards required.

REPAIRS: There are no facilities for carrying out major repairs. Qualified technicians are available for electronic instrument repairs.

HOLIDAYS: The following are the official holidays observed in Bonaire: New Year's Day (Jan. 1st); Good Friday; Easter Monday; Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day; Holy

Saturday (Monday after Carnival); Kingdom Day (December 15th); Christmas Day (December 25th); Second Christmas Day (December 26th). Religious holidays: August 15th (Assumption Day); November 1st (All Saint's Day).

TIME: 4 hours slow of GMT. No summer time kept.

AIR SERVICES: There is a good daily airplane service between Bonaire and Curacao. 8 to 10 flights a day with good connections at Curacao with the international services to and from many parts of the world.

CUSTOM OFFICERS ON BOARD: 1 or 2 Customs Officers will remain on board during the vessel's stay in port. Such officer(s) must be furnished meals at regular meal hours.

TELEPHONES: Telephone connection can be placed on board ships at the pier.

POLICE/AMBULANCE/FIRE: Police, tel. 8000; Ambulance, 8000; Fire, Tel. 8000.

GENERAL:

Live Animals: The importation of dogs, cats, horses and certain other animals is permitted, provided these animals are accompanied by a certificate issued at place of origin by a licensed Veterinarian, stating that the animal in question is free from any contagious disease.

Dogs must have, in addition, a certificate of Rabies Inoculation. All animals imported (including birds) will moreover be examined on arrival.

Prohibited Imports: The importation of the following is strictly prohibited: Parrots and parakeets, absinth, explosives, firearms, ammunition and firework, except with prior permission from local authorities. All kinds of narcotics and drugs, the sale and use of which is regulated by International Conventions, except for legitimate use by and for sale to drugstores by duly accredited importers. Unauthorised reprints of copyrighted scientific and literary works of art. Copper, bronze and nickel coins, except for account of the Government of the Netherlands Antilles. Obscene printed matter.

Immigration Law: All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:

(a) Valid passport/birth certificate.
(b) One passport photograph.
(c) Smallpox vaccination certificate, not over 3 years old.
(d) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(e) All documents and visas necessary for continuing to next destination or return to place of origin.
(f) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.

AUTHORITY: Harbour Master, appointed by the Island Government of Bonaire.

ORANJESTAD, Aruba: 12.31 N. 70.02 W.

(See Plan Book)

DOCUMENTS:

Clearance from last port.
Deratisation Exemption Certificate.
Ship's Register.
Manifest of Cargo (or ballast), or Bills of Lading for import goods and transit goods separately.
Crew List (4 copies).
List of Stores on Board (2 copies).
Consignee Mail (if cargo for discharge).
Passenger List (if any passengers).

The passenger list must carry full names, ages, sex, nationality and occupation of passengers landing at Aruba. The ultimate destination of in-transit passengers must also be shown on the passenger list.

Deratisation Exemption Certificates can be renewed at Oranjestad, Barcadera and St. Nicholas.

Outward clearance, cargo documents and list of outgoing passengers are delivered on board by the Agent's representative, thereby making it unnecessary for Masters to visit the Customs Office to obtain outward clearance.

PILOTAGE: Masters are requested to advise Agents of their expected time of arrival at least 48 hours in advance. Arrival messages should include advice regarding cash or other requirements. This information is particularly necessary in order to give prompt attention to vessel's requirements and to avoid delay after arrival.

Pilots are government employees and pilotage is compulsory for vessels from 50 g.r.t. upward entering or leaving the harbour. Pilots board inbound vessels within 2 miles of shore. The Agent's representative will arrange for Pilots to board vessels as necessary. Inbound vessels should close the West entrance of the harbour as near as prudently possible and make a lee to facilitate the Pilot's boarding.

Every vessel arriving or departing must provide and properly secure a pilot ladder which conforms with the standards of construction normally accepted by international safety standards. Failure to provide such a ladder may result in the Pilot's refusal to board a vessel.

ANCHORAGE: Anchorages, suitable even for deepest draft vessels, are located outside the protecting reef along the whole length of the Western and S.W. coast. The depth of water ranges from 10 to 35 fathoms. Because of the sharply shelving nature of the bottom in this area, it is recommended that the services of a Pilot be obtained in taking up an anchorage. Ships are anchored only during daylight hours.

TUGS: A tugboat of 1,000 h.p. is available for assisting vessels to and from the docks. The tug-boat is fitted out with radio-telephone which is open on 2182 kHz. while tug is in operation.

An additional tug, 2,200 h.p. fitted with VHF Channel 16 (Working Channel 11), is available.

MINIMUM DRAFTS: For tankers arriving or sailing in ballast the following minimum drafts are required for manoeuvring under normal weather conditions:

G.R.T.	*Forward*	*Aft.*
16,600 (T-2)	8 ft.	18 ft.
18,000	8 ft.	18 ft.
27,000-30,000	10 ft.	20 ft.
30,000-36,000	14 ft.	22 ft.
37,000	14 ft.	24 ft.
46,000	16 ft.	26 ft.

MAX. SIZE: The harbour itself has a depth of 36 ft. at MLW. The safe salt water draft approved for entering and leaving is 33 ft. Vessels normally enter via the West channel and depart via the East channel.

HEALTH: The port doctor will visit an arriving ship only if there is a case of quarantinable disease on board, if the ship has no clean bill of health or if one of the preceding ports of call has been declared to harbour a quarantinable disease. The Netherland Antilles bill of health is free of charge.

RADIO: Shore station for R/T communication with 24-hour service. VHF Channel 16, 156.80 mHz (calling); Channel 11, 156.55 kHz (working channel).

HF 2182 kHz, 2558 kHz (working frequency transmitter), 2158 kHz (receiving frequency SSB).

BERTHING: In total there are 4,070 ft. of dock length available to accommodate ocean-going vessels and 1,090 ft. of dock for small craft, of which:

1,720 ft. with 36 ft. of water alongside
2,350 ,, ,, 34 ,, ,, ,, ,,
460 ,, ,, 16 ,, ,, ,, ,,
230 ,, ,, 10 ,, ,, ,, ,,
400 ,, ,, 6 ,, ,, ,, ,,

STEVEDORES: Stevedoring is performed at a fairly fast rate compared with other ports in the Caribbean area. All cargo has to be handled with ship's tackle, while on the docks and in the warehouses fork-lift trucks are used for transportation of merchandise. General cargo is handled at an average of 8 tons per gang per hour.

MEDICAL: Excellent medical and dental attention is available at any hour of the day or night to crew members of all vessels.

FRESH WATER: Boiler and drinking water of purest quality is supplied by hose from the docks at a rate of 200 t.p.h. (in special cases 400 t.p.h.).

FUEL: The port of Oranjestad is an official Esso bunker station. All grades of bunker fuels can be supplied from shore tanks at a rate of 1,500 barrels an hour. A minimum of 48 hours advance notice is required.

REPAIRS: There are no facilities at Aruba for major ship repairs. Local workshops can do repairs of minor nature. Preliminary advice regarding such minor repairs should be included in ETA messages and work requisitions for repairs should be prepared for handing to the Agent's representative immediately upon arrival.

Radar, radio and gyro repairs can be carried out. However, it is important that Masters radio in their requirements as early as possible and give a brief reference as to the nature of the breakdown or fault of the equipment concerned.

While alongside vessels must be prepared to move at 1 hour's notice. Engine repairs to the effect of demobilizing the vessel may only be carried out with special permission.

SURVEYORS: Representatives of the American Bureau of Shipping, the Lloyd's Register of Shipping and the Norske Veritas are resident in the area. Masters may request the surveyors' services through the Agent.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast that can be pumped over board when alongside, as it is prohibited to pump dirty ballast into the harbour.

GANGWAY/DECK WATCHMEN: An efficient and continous watch must be maintained on deck and in the engine-room of all ships while in port, and a sufficient number of men must be on board at all times to move vessels either for harbour operations purposes or in emergency situations.

OPENING/CLOSING HATCHES: This work is normally carried out by the crew.

AIRPORT: The port of Oranjestad – the commercial and tourist harbour of Aruba – is only 5 miles by road from the jet airport. The connection by air with the U.S.A. and Europe are very good and rather frequent (TCA, KLM, VIASA); other airlines operating in Aruba are: ALM, LAV, Aerocondor, and Caribbair.

POLICE/AMBULANCE/FIRE: Police, Oranjestad, tel. 1000; Ambulance, Oranjestad, tel. 2010/1234; Fire Alarm, tel. 00.

CONSULS: The following countries have consular representatives at Aruba:

Brazil
Chile
Colombia
Costa Rica
Denmark
Dominican Republic
El Salvador
Great Britain
Guatemala
Haiti
Italy
Lebanon
Liberia
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
Venezuela
West Germany

Necessary for Masters of Panamanian and Italian flag vessels to visit Consulates at Oranjestad to present documents and receive despatches. Other Consulates have similar requirements. Masters may check with Agent for clarification.

DEVELOPMENTS: Landing stage for roll-on/roll-off vessels with depth alongside 33 ft. under construction near Harbour Office.

TIME: Local time is 4 hours slow of GMT. Vessels are requested to use local time in ETA messages and when dealing with their Agents.

CUSTOMS GUARDS: Local authorities assign 1 or more Customs guards to each vessel during its stay in port; the charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore liberty. Masters are requested to endeavour to have all crew members on board prior to departure time, so that the ship will have no delay in sailing.
AUTHORITY: Eilandgebied Aruba, Haven en Loods Dienst.

PHILIPSBURG, St. Maarten: 18.05 N. 63.10 W.

(See Plan Book)

Philipsburg, capital of Netherlands St. Maarten, lies in a well-protected bay in the S.E. corner of the island. The only obstruction to the harbour is "Proselyte Reef" or "Man-of-War-Shoals", located 17° 56′ N. 63° 04′ W., with a min. depth of 2.5 fathoms. Entrance to the harbour can be accomplished by passing either to the North or the East of this reef.
DOCUMENTS:

Crew List: Immigration 1 copy.
Agent 1 copy.
Passenger List: Immigration 1 copy.
Agent 1 copy.
Store List: None required.
Ship's Register: Pilot will require to see this document for obtaining the official tonnage.

Note: No special form is prescribed for the above documents, consequently these may be made out in Company's regular form.
No consular visa required on any of the above documents.

Immigration: Immigration officer boards ship immediately after docking. Passengers and crew are usually free to disembark immediately after boarding.

Agency Personnel: Agency personnel board immediately after vessel is docked together with Immigration Officer.
PILOTAGE: Pilotage is compulsory and performed by Government Pilots. Ships bound for the pier at Philipsburg should await the Pilot at a max. distance of 1 mile from the line Point Blanche - Fort Amsterdam. Pilotage service available day and night.

Pilot Ladder: Jacob's ladder, in clean and sound condition is sufficient.

Time to Berth: From pilot station to pier, about 15 to 30 minutes.
ANCHORAGE: Ample suitable anchorage area available with sufficient depths of water for several large ships simultaneously.

A good anchorage can be found in 40 ft. depth at the cross point of line joining the pier and Fort Amsterdam (Fl. ev. 3 secs.) and line joining radio masts and the mountain "Naked Boy".

If and when the pier is already occupied by another cruise-ship, cruise-ships can proceed to anchorage, in which case communications between ship and shore to be by ships' own launches.

For ships proceeding to anchorage, pilotage is also compulsory.
MAX. SIZE: 1 berth (North side of pier) max. LOA 300 ft. and draft 30 ft. 1 berth (South side of pier) max. LOA – no limit, max. draft 30 ft. Vessels berth portside alongside. 1 berth (East side of pier) max. LOA 360 ft. and maximum draft forward 12 ft.
RADIO: The Government radio and telegraph service operates daily from 0700 L.T. to 2400 L.T. worldwide.

Radio Telephone: VHF Channel 10 and 155.925 mHz.

ETA Messages: ETA messages should be sent to Agent preferably in local time at least 24 hrs. in advance and any changes occurring thereafter should be advised.

Use of Ship's radio in port: Prohibited.
TUGS: None available.
BERTHING: *A. C. Wathey Pier:* The new concrete pier at Philipsburg is located at Point Blanche in Great Bay and has a length of 210 m., with an additional 60 m. of berthing space, located at a 60° angle to the finger pier. Min. depth is 34 ft. of water. 4 fenders of steel spring and rubber are located along the berthing space.

Height from sea-level to the deck of the pier at high tide is 4.02 m., at low tide 4.48 m. Ship will lie with port side to the pier.

Mooring and Unmooring: 3 dolphins are located in an extended line of the berthing space for mooring. Minimum required size of openings in shackles is 40×50 cm. Mooring boat is available.

Equipment: Cranes are available with a capacity of 20 tons max. Forklifts up to 8 tons and sufficient flat-bed trailers and low-buoys are also available.
STEVEDORES: There are 3 gangs available. Each gang has a total of 9 workers.
MEDICAL: Government physicians are available in Philipsburg and there is also a small, but up-to-date hospital operated by the Netherlands Antillean Government. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical treatment.

Dental facilities available.
FRESH WATER: Available.
FUEL: No facilities for carrying out repairs except for radio and radar (Radio Holland).
SURVEYORS: There is a representative of Lloyds on the island.
AIRPORT: The island is served by A.L.M. (Dutch Antillean Airlines), Air France, Eastern Airlines, K.L.M. (Royal Dutch Airlines), L.I.A.T. (Leeward Island Air Transport), Prinair.

There are direct, almost daily flights, to and from New York and Miami connecting to other major places.
TIME: 4 hours slow of GMT.
HOLIDAYS: The following Official holidays are observed in St. Maarten: New Year's Day (January 1st); Good Friday (varies); Easter Monday (varies); Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day (varies); Whit Monday (varies); St. Maarten Day (November 11th); Kingdoms Day (December 15th); Christmas Day (December 25th); Boxing Day (December 26th).
TELEPHONE: Service from ship to shore is not available.
GENERAL:

Ship's Bars and Shops: No restrictions and these may remain open for business while in port.

Laundry: Available.

Wind: Prevailing winds on the island between the months of March and December are East to South, velocity 6 to 10 knots. Between December and March winds are generally North to East at a velocity of 8 to 15 knots.

Tide: The tidal range in Philipsburg is at most 2 ft., but regularly not more than 1 foot.

Current: The current outside Philipsburg harbour changes from Easterly to Westerly, with a max. velocity of 2 knots. At the Pier the current generally runs from North to South, with an average velocity of 0.5 knot.

Gangways: No gangways are available from the pier and ship's gangways will have to be used.

Ship's Launches: There are no restrictions on the use of ship's launches.

Stores: Available.

Garbage: No disposal facilities available.

Port Health: No regulations or requirements.

Customs: None.
AUTHORITY: Harbour Master.

SAN NICOLAS, Aruba: 12.26 N. 69.55 W.

(See Plan Book)

DOCUMENTS/HEALTH and all General Information, refer to "Oranjestad".
PILOTAGE: (Inner Harbour) Pilotage is compulsory. Pilot boards off West Entrance within 2 miles of the shore. Inbound vessels are expected to approach the entrance as near as prudently possible and make a lee to assist Pilot boarding.

A pilot service for anchoring off Lago Aruba terminal is available upon the Master's request, providing radar and echo sounder are functioning properly.
RESTRICTIONS: The port is open for day and night navigation, allowing vessels to enter and leave at any hour. The East and West channels are 45 ft. deep. The safe salt water draft approved for entering and leaving is 41 ft. Vessels normally enter via the West channel and depart via the East channel.

Tides: Diurnal with max. amplitude of 18 in. Datum used is M.L.W., water level never falls more than 6 in. below M.L.W.
RADIO: Radio-telephonic communication is possible on frequency of 156.70 VHF (Channel 14). Calling and listening Channel 16. Call sign "Lagomarine". Agency business is conducted on international Channel 19 (call sign "Stanship Aruba").
TUGS: 2 diesel-powered tugs are used for berthing and unberthing. A third tug is used if arriving tanker's draft is a maximum of 41 ft.
MAX. SIZE: *Reef Berths:* Tankers up to 550,000 d.w.t. No. 2, depth alongside, 105 ft. MLW. Also see "Reef berths".

Inner Harbour: 100,000 d.w.t.
BERTHING: All port facilities are controlled by Lago Oil and Transport Company.

The max. limitations for vessels using San Nicolas facilities are:

Berths	*Length (ft.)*	*Beam (ft.)*	*Salt water max. draft (ft.)*	*Bow to manifold (ft.)*	*Approx. Deadweight*
1 South	745	UNL	39	361	50,000
1 North	740	110	39	365	50,000
2 South	800	110	40	400	50,000
2 North	780	110	39	365	50,000
3 South	900	130	41	440	90,000
3 North	850	120	40	390	80,000
West Pier	650	UNL	32.25	350	25,000
HDS Pier	620	UNL	31	UNL	30,000 (dry cargo only)

The max. entering draft is 41 ft. even keel salt water. The following is the suggested ballast draft for vessels.

MDWT	*Fore (ft.)*	*Aft (ft.)*
10–20	8	18
20–30	10	20
30–40	14	22
40–50	14	24
50–100	16	26

REEF BERTHS:
VLCC anchorage: When anchoring is necessary, Masters of VLCC's may wish to anchor in the following position; 12° 24′ N., 70° 07′ W., approx. 12 miles West of San Nicolas Harbour in approx. 25 fathoms.
Pilot Station: 2 to 3 miles West of San Nicolas Harbour entrance. When Pilot is boarding, the vessel should be on an Easterly course with a speed of not more than 2 knots.
Embarking Pilot, Loaded VLCC's: On the port side with either pilot hoist or conventional pilot ladder.
Ballast VLCC's: On the port side with a combination of accommodation ladder and conventional pilot ladder, or with only accommodation ladder.
Disembarking Pilot, Loaded VLCC's: On the starboard side with either pilot hoist or conventional pilot ladder.
Ballast VLCC's: On the starboard side with a combination of accommodation ladder and conventional pilot ladder, or with only accommodation ladder.
Tugs: Normally 4 tugs used for tankers over 220,000 d.w.t. 2 on long lines, 1 forward and 1 aft and 2 alongside starboard side. Tug's lines used.
Docking: Always portside to, with starboard anchor ready, walked out to 1 shackle in the pipe.
Approach Velocity: RB I and RB II are equipped with a doppler traffic light system.

Approach velocity 00–12 ft./min.=green.
12–20 ft./min.=amber.
above 20 ft./min.=red.

When the vessel is receding, the light is always green.

Mooring Launch: Used for all lines, except for the spring lines fore and aft. Forward moorings first, after moorings second.

Mooring Capstans: All mooring and breasting dolphins are equipped with capstans, 2 ton pull capacity, 100 ft./min. line hauling capacity.

Max. Size:

	MDWT	*Max. LOA (ft.)*	*Beam*	*Depth (ft.)*	*Max. draft (ft.)*	*Pier Heading*	*Approach angle*
RB I	40–400	1200	UNL	85	75	130° true	15°
RB II	40–550	1400	UNL	105	95	114° true	10°

Sailing Draft Ballast VLCC's: abt. 25 ft. fore and 35 ft. aft.

Lines and Winches: Mooring lines assumed to be 1.625 in. dia. steel wire with a breaking strength of 90–100 tons.

Mooring winches assumed to have about 25 metric tons heave capacity and 55 metric tons brake holding capacity (minimum).

Combination of a wire and a synthetic line to a single dolphin will not be permitted.

Mooring lines must not be stressed beyond 55% of their breaking strength.

Self tensioning is not permitted. Automatic winches should be used on manual brake.

Synthetic tails on wires should have a higher breaking strength than the wire to which they are connected. The eyes of the tails should be protected from abrasion with suitable coverings, and tails should be connected to wires with suitably designed shackles.

A max. of only 2 layers of line to be allowed on working or tension drum of split drum winches.

Current and Wind: Current is less than 0.2 of a knot 90% of the time. Wind is less than 20 knots 70% of the time, and less than 25 knots 97% of the time.

Wind direction		*Current direction*	
True	*% of time*	*True*	*% of time*
20°– 40°	2	40°– 70°	24
50°– 60°	6	100°–110°	17
70°– 80°	33	140°–240°	10
90°–100°	40	260°–290°	24
110°–120°	13	320°–340°	25
140°–170°	1		
220°	5		

Wind tolerance: At 30 knots steady, loading will be discontinued, and the loading arms will be drained, engine to be confirmed ready for use.

At 35 knots steady, arms will be disconnected and tugs will be on stand-by.

Loading Arms: RB I; four 16 in. cargo arms with 16 in. bolted flange connections. One 8 in. bunker arm (No. 5 arm, the most Westerly arm). RB II; five 16 in. cargo arms with 16 in. connections.

Discharge/Loading Lines: RB I 36 in., 3,000 ft. long. RB II 56 in., 4,000 ft. long.

Radio Contact: Contact between Loading Master, control room, marine office by VHF and UHF. Particulars will be given by loading Master.

Bunkers: RBI; through bunker arm (No. 5). RB II; through No. 1 or No. 5 loading arms with reducers.

Water: Available on RB I and RB II only in an emergency. (Max. 50 tonnes).

Provisions: By launch; to be taken on board by ship's lifting gear on the port quarter.

Shore Leave: No pedestrian traffic allowed between ship and main gate. Arrangements for crew transportation can be made with Agent.

LIGHTERING OPERATIONS: (Transferring crude oil from ULCC/VLCC's into approved MSTS) is carried out from time to time in a specially designated area off Aruba. Lago provides all lightering equipment necessary for this operation and Lightering Masters, Officers and rigging crew for supervising operation.

Masters need not come ashore to clear ship with Customs. The ship's Agent can do this by proxy. Ship's papers for clearance and signed proxy will be picked up from ship off port by tug or launch.

FRESH WATER: Fresh water can be supplied ex-wharf in an emergency (Max. 50 tonnes).

FUEL: All grades of bunkers available.

Berth: Vessels arriving for bunkers only with a draft greater than 41 ft. or over 90,000 d.w.t. must use the Reef Berths. As the berth is used for crude oil trans-shipment bunkering vessels can expect delays. Also the following considerations apply:

1. Vessels working cargo have priority over vessels bunkering.
2. In assigning tugs, vessels working cargo take priority. (2 to 3 hours tug service required at the sea berth.)
3. Mooring launches require 24 hours notice.
4. Vessels using the Reef Berths must have at least 12 good mooring lines. All mooring winches and equipment will be inspected and must be in good order. Vessels may not be docked if equipment is faulty.
5. In the event of marginal weather, deep draft vessels calling for bunkers may not be docked.

REPAIRS: A local workshop can do minor repairs.

PORT FIRE PROTECTION: The port of San Nicolas is very well equipped with modern equipments for fire-fighting and fire prevention.

BALLAST: Tankers must arrive with a maximum of 20% dirty ballast to pump ashore. Shore reception facilities are limited. 80% clean ballast to go overside after inspection. Ships arriving with more than 8% of their d.w.t. dirty ballast will be put to anchor to clean ballast, delay for owner's account. Clean ballast will be discharged overboard after docking. Slops can be discharged to the disposal facilities ashore but "sour" slops can only be received at Reef Berths.

SPECIAL REGULATIONS: Strict compliance with Harbour Safety Regulations is mandatory. Stringent regulations prohibit the transportation of alcoholic beverages through Lago refinery and harbour area. No liquor or beer may be taken on board or removed from vessels except only bonded stores ordered by the Master.

SHORE LEAVE: As all ship's personnel when going ashore have to pass through the docks and the company's concession, every seaman must carry an identity card to check off against ships crew list at main gate. Seamen must have special pass to use any other gate than refinery main gate.

POLICE/AMBULANCE/FIRE: Dial 2222 on jetty telephone. Call "Lagomarine" on UHF set which is supplied to every ship whilst alongside.

AUTHORITY: Lago Oil and Transport Co.

SINT MICHIELSBAY, Curacao: 12.09 N., 69.01 W.

Sint Michielsbay, on the South coast of Curacao, 5 miles N.W. of Willemstad, is an open bay, naturally protected from prevailing winds and sea.

PILOTAGE: Compulsory.

ANCHORAGE: In the bay 650 ft. out of the coast in 130 ft. water is laid a mooring buoy, which gives a good anchorage to vessels which, because of dangerous cargo, quarantine or because of a defect cannot enter another port of Curacao.

BERTHING: Vessels moored with their stern to the buoy and their bow anchors are heaved out to hold the foreship from the coast.

REPAIRS: Repairs or handling cargo can be carried out by way of barges. A landing jetty for barges is available.

GENERAL: Other services as tugboats, lighterage, stevedoring, etc. are rendered from Willemstad.

AUTHORITY: Harbour Master, Curacao.

WILLEMSTAD/EMMASTAD, Curacao: 12.06 N. 68.56 W. **(See Plan Book)**

DOCUMENTS:

For Immigration:

2 copies of Crew List.

2 copies of list of passengers. Passenger lists should indicate full names, age, sex, civil state, and occupation. Passengers must show proof of citizenship (a passport, voter's registration or birth certificate is acceptable).

For Customs:

1 copy of list of stores (deck, engine and stewards department).

Manifest of cargo for Curacao, if any, in duplicate, on special form called "Vrachtlijst" itemising the cargo by lots of the same mark and showing numbers kind of packages, general description of contents and weights in kilograms or pounds of each lot.

Manifest of cargo for Curacao, in transit, for transhipment to other ports, if any, in duplicate for each different port separately on special form and itemised as indicated above.

Manifest of cargo on board, in transit, if any, in duplicate on special form as indicated above, showing only the total number of packages on board, general description of the merchandise and total weight in kilograms or pounds; if the cargo is in bulk, this is indicated accordingly.

2 copies of tally books of cargo for discharge at Curacao, if any.

1 copy of crew list plus 1 copy of personal effects list.

1 copy passenger list landing at Curacao.

If the ship is in ballast, only the stores list is required.

The Customs Officer will then make out his "Akte van inklaring" (Certificate of Entry).

The above documents have to be signed by the Captain. They may be made out in Dutch, English, Spanish or French.

PILOTAGE: Pilotage is compulsory. Rendered day and night. Pilots are government officials and are stationed at Willemstad. The Harbour Master is also the head of the Pilot Service.

Vessels must provide a lighted, manned, properly secured and clean pilot ladder, fitted with sufficient spreaders.

A life buoy fitted with a Holmes light, as well as a reliable heaving line, should be placed close to the pilot ladder and the embarkation and disembarkation should be supervised by an officer. Vessels arriving or leaving with a freeboard exceeding 30 ft. must use the accommodation ladder in conjunction with the pilot ladder (Safety of Life at Sea Convention 1960).

Vessels bound for Curacao should proceed to Willemstad harbour except when they have specified orders for another bay.

Vessels in sight of Willemstad will be contacted by the signal station at Fort Nassau for further orders. From this same station, lights are shown to direct the traffic in port.

Vessels should stay 3-4 miles off shore S.W. of the harbour entrance to await Pilot. Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence the manoeuvring ability of the vessel should be reported before entering to the Harbour Master. The pilot motorboat is identified by a blue flag with the letter "L" in daytime, and a red light above a white light at night.

ANCHORAGE: As a rule there is no anchorage area in the harbour of Willemstad, but in the Eastern part of the Schottegat there is a dolphin with mooring buoy on each side available to await berth or orders for limited time subject to permission and conditions from the Harbour Master.

4 vessels, 2 vessels alongside each other can be safely moored at these buoys. Depth: 40 ft.; distance between each buoy and dolphin 1,000 ft. Furthermore, in the Southern part of the harbour a set of 2 dolphins can accommodate 2 vessels with length up to 600 ft. and a max. draft of 20 ft.

RESTRICTIONS: The harbour of Willemstad consists of a 1,400 yd. long and min. 270 ft. broad channel, the Santa Anna Bay, with depths from 50 ft. to 79 ft. and an adjacent inner bay, the Schottegat, a 150-acre body of water with a depth of more than 10 ft. and a max. of 79 ft.

The navigable portion of the entrance of the port is 865 ft. wide, marked on either side by a light-buoy, and the min. depth is 50 ft.

Required minimum draft for tankers arriving, shifting and sailing:

g.r.t.	fwd. ft.	aft. ft.
up to 11,000	10	16
11,000–15,000	11	18
15,000–19,000	13	19
19,000–25,000	14	20
25,000–29,000	15	21
29,000–35,000	17	23
35,000–43,000	18	24
43,000–45,000	19	25
45,000–47,000	20	25
47,000–50,000	21	26
50,000–55,000	22	28
55,000–60,000	22	29
60,000–65,000	23	30
65,000–70,000	23	31
more than 70,000	24	32

Maximum trim for tankers: 10 ft. by the stern, 2 ft. by the head.

BRIDGES: Santa Anna Bay is crossed by 2 bridges, the Queen Emma floating pontoon bridge and the new, fixed bridge.

The pontoon bridge opens day and night for in and outgoing vessels. There will no longer be any waiting period at the harbour entrance. Automobile traffic will be diverted to the new bridge and those on foot will have continuous ferry service available. Ships will have overall preference for openings.

The new fixed bridge, dominating Willemstad's skyline and the entrance to Schottegat Bay, is 185 ft. high, (clearance 180 ft.) enabling the biggest vessels to pass under. The bridge is of box girder construction and is open to automobile traffic only. Glare-proof lights are installed to prevent interference with light signals that harbour Pilots rely on when bringing a ship through the channels.

Tankers passing through the Santa Anna Bay must have all tank-lids properly closed, even if they are gas free. This is a harbour regulation.

MAX. SIZE: Length 850 ft., draft 45 ft. Vessels with a LOA of 1,000 ft. have been piloted in the harbour.

RADIO: Port Operations Station (Operated by Harbour Authorities): Location, Fort Nassau. Call sign, Fort Nassau. Frequencies, International Channels 16 (156.80 Mc/s.), calling and safety; 12 (156.60 Mc/s.), working, first choice; 14 (156.70 Mc/s.). Watchkeeping, 24 hours on Channel 16. Type of operation, Simplex, Frequency modulated. Range, 20 to 25 miles.

Main Private Station (Operated by Shell Curacao N.V.): Location, on the Zwartberg. Call sign, Shell Curacao. Frequency, international Channel 25 (receiving, 157.25 Mc/s.); (transmitting, 161.85 Mc/s.). Type of operation, Duplex working, frequency modulated; operated by remote control from Shell's telephone exchange; ask operator for connection with party desired. Range, 20 miles. Watch-keeping, 24 hours on Channel 25; normal daily business, 0730 hrs. till 2400 hrs.; urgent business only, 2400 hrs. till 0730 hrs.

Tug Base Station: Location, on the Zwartberg. Call sign, Marine Department – for tug movements only and in an emergency to direct the tugs. Watchkeeping during office hours. Central Post – for tug movements only. Watchkeeping 24 hours. Shell Curacao – for emergency calls to tugs only after having been alerted on Channel 25. No watchkeeping. Frequency, International Channel 14 (156.70 Mc/s.). Operation, Simplex – frequency modulated. Operation by remote control from Shell's Marine Department, Central Post and telephone exchange.

Tug Mobile Stations: Location, 1 on each tug. Call sign, Balau, Drado, Koraal, Passaat, Karet, Piku, Buni, Mula and Orca. Frequency, International Channels 16, 12, 14, 9, 8 and 6. Watchkeeping, 24 hours on Channel 14. Operation, Simplex – frequency modulated.

Curacao Drydock Co. – VHF Channel 6. SEL Maduro and Sons Inc. – VHF Channel 10.

HEALTH: The port doctor will visit only if there is a case of quarantinable disease on board. The Netherlands Antilles Bill of Health is free of charge.

TUGS: Compulsory for all tankers exceeding 3,000 g.r.t. Tankers exceeding 700 ft. overall length must make one tug fast forward before entering.

S.I.A. (Smit International Antilles N.V.) has 3 modern powerful tugs stationed at Bullen Bay, for rendering services to tankers calling at Bullen Bay.

The "Piku", 4,000 h.p., 59 tons bollard pull, built in 1974.

The "Buni", 4,000 h.p., 59 tons bollard pull, built in 1975.

The "Drado", 2,800 h.p., 37 tons bollard pull, built in 1976.

They are also used by "ship to ship transfer" in the coastal waters South of Curacao.

All tugs are provided with extensive firefighting and salvage equipment, and each tug carries some 25 tons of oil dispersant together with a spray system to be utilised in case of oil spill.

Another tug the "Balau", 2,800 h.p., 37 tons bollard pull and built in 1976 is stationed in the harbour of Willemstad for rendering towage and salvage assistance both inside and outside the harbour.

Shell Curacao N.V. has three sea-going motor tugs stationed at Willemstad.

The "Passaat", 1,250 h.p., 280 g.r.t., bollard pull 18 tons.

The "Karet", 2,250 h.p., 280 g.r.t., bollard pull 34 tons.

The "Koraal", 1,250 h.p. 298 g.r.t., bollard pull 18 tons.

The tugs can be engaged for rendering towage assistance both inside and outside the harbour. As a rule, however, all vessels dock or undock at all wharves and enter or leave the port without tug assistance. In case of abnormal circumstances or in case the Harbour Master may require tug assistance.

Tugs can be requested by the Master for speeding up docking or undocking the vessel.

There are about 20 small harbour tugs available, varying from 60 to 300 h.p. and about 80 lighters, to receive cargo or bring it alongside a vessel, varying from 60 to 250 tons capacity.

Also see "Services".

BERTHING: There are berths on either side of the Santa Anna Bay North of the pontoon bridge, with depths varying from 18 to 33 ft. alongside, generally used for bunker, cargo and passenger ships.

On the Eastern side four wharves: the Handelskade, depth 18 ft.; the Kleinewharf, depth 24 ft.; Grotewharf, depth 31 ft.; and Salazar, depth 24 ft.

On the Western side six wharves: the Matheywerf, depth 23 ft.; Westwerf S., 25 ft.; Westwerf N., 36 ft.; Nieuwewerf, 33 ft.; Motetwerf, 33 ft.; Oranjewerf, 19 ft.

In the Schottegat there are seven more berths, generally used for bunker, cargo or passenger ships.

Prins Hendrikwerf which closes the Western corner Santa Anna Bay/Schottegat, has a depth of 35 ft.; however, ships with a draft of more than 35 ft. can be moored by way of placing rafts of 10 ft. width between vessel and the quay.

At the Eastern part of the Schottegat are the Admiral Brion Wharves, which has 3,000 ft. docking space available with 34 ft. depth alongside.

In the Schottegat on the peninsula of Asiento are situated the 14 piers owned by Shell Curacao N.V., which are mostly used by tankers; however, other vessels are enabled to use these wharves for bunker facilities. Pier No. 1 may be used for general cargo (mostly packed oil products).

The names and the depths alongside these piers from West to East are: Pier I, 32 ft.; Piers II and III, 34 ft.; Pier IV, 40 ft.; Pier V, 46 ft.; Pier VI, 41 ft.; Pier VII, 34 ft.; Pier VIII, 46 ft.; Pier IX, 36 ft.; Pier X, 33 ft.; Pier XI, 19 ft.

The Schottegat also has about 5,000 ft. of quay available for repairs. The names of the wharves, lengths and depths alongside are: Beatrix I and II, 1,300 ft. (each) – 21 ft.; Beatrix III, 400 ft. fore, 10 ft. aft – 35 ft.; Beatrix IV, 350 ft. – 31 ft.; Beatrix V and VI, 1,000 ft. (each) – 37 ft.; Repair Quay, 1,650 ft. – 35 ft.

There are sufficient covered and open storage places available on the wharves to load or unload a ship, generally dry cargo. Total covered storage area: 219,500 sq. ft., open storage: 1,100,000 sq. ft.

These areas can be used for transit as well as local cargo; also barges are used for transit cargo.

In the N.E. part of the Schottegat LASH lighters can be moored at 2 sets of buoys, depth 20 ft.

Storage capacity for liquid petrol products is 4,600,000 tons in tanks of refineries of "Shell Curacao N.V.".

All Shell piers are modernly equipped to handle oil in bulk, safely, and speedily, in order to make the turn around of the vessels as short as possible. Sufficient hose connections are installed to load or discharge oil, water-ballast or residue, and to supply steam and fresh water.

The wharves in Santa Anna Bay and the Brion wharves are all modernly equipped to supply different kinds of bunkers and also handle cargo simultaneously. Normally, general cargo is handled with the ship's tackle; there are no apron cranes or cargo masts or conveyors.

There are lighters alongside, and sufficient pallets and fork-trucks are available. Mobile and floating cranes are available if needed up to 140 tons.

Docking of cruise ships in Willemstad harbour: The following piers are regularly used by cruise ships and cargo ships:

Nieuwewerf, Motetwerf: West side St. Anna Bay. Type: quay. Construction: sheet piling, concrete top, stelcon plates floor. Length 1,200 ft. Draft: 33 ft. Height above water: 4 ft. One transit shed each. Nieuwewerf, width 65 ft., length 216 ft., area 14,000 sq. ft.

Motetwerf, width 65 ft., length 216 ft., area 14,000 sq. ft. Open space area 200,000 sq. ft. One warehouse facility 6,500 sq. ft.

Oranjewerf: On West corner St. Anna Bay/Schottegat. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 418 ft. Draft: 19 ft. Height above water: 6 ft. Special bunker pier, cargo handling mostly via lighters alongside.

Prins Hendrikwerf: In the Schottegat near West corner Santa Anna Bay. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 400 ft. Draft: 34 ft. Height above water: 5 ft. One transit shed width 65 ft., length 385 ft., area 25,000 sq. ft. Open space area 100,000 sq. ft. No warehouse facilities.

Admiral Brion Wharves: Nos. 1, 2, 3, 4, 5 and 6 situated at the East side Schottegat. Type: quay. Construction: sheet iron cells with concrete top, asphalt floor. Total length: 3×1,000 ft. Depth: 34 ft. Height above water: 5 ft. Two transit sheds: one with width 65 ft., length 680 ft., area 44,000 sq. ft.; one with width 65 ft., length 330 ft., area 21,000 sq. ft. Open space area 510,000 sq. ft. Two special platforms for Ro-Ro ships have been constructed. Max. draft 23–33 ft. These platforms are also the mooring berths for ferry service between Curacao-Venezuela-Aruba and Bonaire.

Kleinewerf, Grotewerf, Salazarwerf: East side of St. Anna Bay. Type quay. Construction: sheet piling, concrete top, asphalt floor. Total length wharf: 1,470 ft. Maximum draft alongside 24–31 ft. Height above water 2 ft. One transit shed, width 65 ft., length 330 ft., area 21,500 sq. ft. Open space area 154,000 sq. ft. No bunkering facilities.

Matheywerf, Westwerf, Westwerf North: West side Santa Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Total length wharf: 640 ft. Draft: 23 ft. Height above water: 4.5 ft. One transit shed: Mathey loods. Width: 61 ft. Length: 320 ft. Area: 19,000 sq. ft. Open space area: 17,000 sq. ft.

Westwerf: West side Santa Anna Bay. Type: quay. Construction sheet piling, concrete top, asphalt floor. Length: 396 ft. Draft: 25 ft. Height above water: 4.5 ft. One transit shed: Westwerf. Width: 61 ft. Length: 396 ft. Area: 20,000 sq. ft. Open space area: nil.

Westwerf North: West side Santa Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Length: 396 ft. Draft: 36 ft. Height above water: 4.5 ft. One transit shed: Westwerf North. Width: 61 ft. Length: 106 ft. Area: 6,400 sq. ft. Open space area 18,000 sq. ft.

Cargo handling and bunkering can be carried out simultaneously.

STEVEDORES: Gangs must be engaged between 0600 and 0630 hrs for the day, on weekends and Saturdays. For work on Sundays and holidays, gangs must be ordered between 0600 and 0630 hrs. or

Saturday or the workday preceding the holiday. Masters of vessels carrying out cargo operations are consequently recommended to advise Agents their ETA well in advance of above deadlines.

TANKERS: Besides the wharves mentioned in "Berthing", there are 13 oil piers in the Schottegat for discharging crude oil and feed-stocks for the Shell refinery and loading products. These wharves are therefore used mainly by tankers. They are all equipped to provide bunkers.

All main grades of marine lubricants are stocked at the port of Curacao. Shell Marine lubricants and Marine Technical Service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

SLOP RECEPTION FACILITIES: Available at all Shell Terminals.

FRESH WATER: Fresh water for drinking and use in boilers is available day and night in sufficient quantities at all wharves through pipe-lines. Fresh water is distilled from sea water by one of the biggest distillation plants in the world. The quality is very good and chemically pure.

Fresh water is also delivered alongside by means of water barges. Five water barges are available. Each barge can deliver 50/100 tons of fresh water per hour. The rate of delivery depends on the quantity required and how many barges can simultaneously deliver fresh water in the vessel. It also depends on the amount of connections on board the vessel and the height above water to be lifted.

On the *Admiral Brion Wharves, Motetwerf, Nieuwewerf* and *Prins Hendrikwerf* water can be delivered by means of a pipe-line.

FUEL: Besides the Shell piers there are two bunkering installations: namely, the "Admiral Brion Wharves" comprised of six berths and the "Motet" bunkering installation comprised of four berths.

The "Admiral Brion Wharves" bunkering installation is directly supplied from the refinery by means of two pipe-lines with diameters of 12 and 8 in. The pipe-lines run the full length of the piers, each with five bunkerpits, from which the oil can be delivered directly to the ships via a mobile blending unit if this is required. The capacity of the pipe-line and the pumps is 600 t.p.h. for fuel oil and 300 t.p.h. for diesel oil. Gas oil is also available.

The bunkering facilities of the "Motet" installations in Otrabanda, which are comprised of seven storage tanks and pumping facilities, are supplied through two pipe-lines of 12 in. and 6 in. diameter from the refinery. The rate of delivery, by gravity and pumps, is 600 t.p.h. for fuel oil and 500 t.p.h for diesel oil.

Modern fuel blending facilities are available at all installations in Willemstad.

REPAIRS: The Curacao Drydock Company Inc. has repair yards and two graving docks laid out in the Schottegat.

The largest graving dock is 919 ft. long, width of entrance between wheel fenders 152 ft. and a depth of water over sill of 27 ft. 10 in. Suitable for up to 150,000 d.w.t. Movable cranes of 25 and 75 tons lifting capacity are fitted alongside the dock.

The Curacao Drydock Company Inc. has 6,000 ft. of repair wharf with varying depths up to 40 ft. Cranes alongside up to 75 tons lifting capacity. A floating crane with capacity of 30 tons and a mobile truck crane of 140 tons also available.

Electric shore-power A.C., D.C. 110, 220 or 440 volts can be supplied directly from shore at wharves of Shell Curacao N.V. and at other wharves from generators on barges. Shell can also supply steam directly from the shore at a pressure of 8–15 kg/cm.

SURVEYORS: A.B.S., Lloyds, N.V., B.V., R.I. and G.L.

TIME: Curacao time 4 hours slow of GMT.

HOLIDAYS: New Year's Day, Carnival Monday (February), Good Friday, Easter Monday, Queen's Birthday, Labour Day, Ascension Day, Kingdom Day, Christmas Day, Second Christmas Day. "No work", holidays for cargo operations: New Year's Day, Good Friday, Labour Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel: 44444. Ambulance Tel: 11495.

GENERAL: Customs Officers remain on board on duty during the vessel's stay in port. They must be fed by the ship and are entitled to the equivalent of officers mess or first-class dining saloon.

REGULATIONS: Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence manoeuvring abilities of the vessel should be reported before entering, to the Harbour Master.

Dangerous Cargo: Explosives, ammunition, fireworks, radio active material and other dangerous cargo.

All vessels carrying explosives or other dangerous cargo, for discharge at Curacao, for transhipment or in transit without transhipment, *require special permission in writing, obtained prior to arrival,* for entering any port in the island of Curacao. Full details must be furnished in advance.

Only limited quantities of explosives, etc., are permitted in the port of Willemstad. For calls with larger quantities outports are used. Details of the regulations in force on the subject will be furnished on request by shipping Agents.

Entry permit required for ships carrying dangerous and/or hazardous cargo. Cost of form including stamp is fls. 4.00. Additionally administration fee is charged on the following basis:

Cargo in transit not being off-loaded from the ship – Nil. Local cargo to be discharged from the ship:

Up to 500 kilos	Cfls. 5.00
500 kilos to 5 tons	Cfls. 15.00
5 tons up to 25 tons	Cfls. 30.00
25 tons to 50 tons	Cfls. 45.00
over 50 tons	Cfls. 60.00

Transhipment cargo landed from one ship and reloaded on another ship: Double the local charge, indicated above.

At the discretion of the Harbour Master a special guard may be assigned onboard vessels handling or having dangerous and/or hazardous cargo on board. The charge, if and when incurred, is Cfls. 15.00 per hour in straight time and Cfls. 30.00 in overtime. Please note that this happens very seldom.

AIRPORT: There are daily international flights from Dr. Albert Plesman Airport.

ALM: Frequent daily trips to Aruba and Bonaire. Daily flights to Miami and New York. Regular air services to St. Maarten, Caracas, Maracaibo, Colombia, Haiti, Sto. Domingo, Puerto Rico, Trinidad and Paramaribo.

Eastern Airlines: Daily flights to Puerto Rico and transfers to all points.

American Airlines: Daily flights to New York and transfers to all points.

VIASA: Regular scheduled flights to Caracas, Sto. Domingo, Paris and Amsterdam.

Aerocondor: Daily flights to Colombia.

LAV: Many daily flights to Caracas.

KLM: Daily flights to Amsterdam, Lisbon, Madrid, Frankfurt and Zurich.

Ferry: Ferry's Del Caribe S.A. runs a regular service with a new modern ferry which carries 1,200 people and 120 automobiles. This ferry has regular service between Curacao and Coro, Venezuela on Monday, Tuesday, Wednesday and Thursday. On Thursday the ferry also goes to Aruba and Punto Fijo, Venezuela.

DEVELOPMENTS: There is a Container Terminal under construction South of Admiral Brion Wharves. Length of quay 480 m. Total area 90,000 sq.m. Terminal is due to come into operation in late 1980.

SERVICES: *Salvage, etc.:* A supply vessel named "Orca" is permanently stationed at Willemstad by "Smit Tak International Antilles N.V." on a 24 hours service base. She is provided with extensive salvage equipment such as pumps, hoses, burning and welding equipment and an hydraulic crane with a capacity of 10 tons.

Facilities for divers such as compressors, decompression tank, etc., are on board. The ship is furthermore very suitable for bringing stores, spare parts, packed oil products, crew on board, passing, or on the roads, waiting ships.

Underwater Cleaning/Underwater Services Smit Tak (Antilles) N.V.:

Cleaning of submerged hull sections of ships while afloat. This cleaning can take place while the ship is moored in the main harbour at Willemstad and also at other locations, such as Caracas Bay, Bullen Bay and St. Michiels Bay.

Cleaning of cruise ships takes place while bunkering and the passengers are ashore.

Smit Tak (Antilles) N.V. has developed its own underwater cleaning apparatus which cleans ships up to 250,000 d.w.t. within 24 hours. Also the rudder and propeller are properly cleaned. The cleaning does not affect the paint but only removes the very thin upper layer of spent anti-fouling paint, leaving the active anti-fouling exposed.

Smit Tak (Antilles) N.V. carries out various kinds of underwater works e.g. sealing off sea-intakes and ropeguard, all other kinds of cutting and welding works, underwater inspections, made by certified divers, which can be combined with photographing of bottom condition in colour and black and white. Closed circuit underwater television with video-tape recorder is available.

Smit Tak (Antilles) N.V. is the largest professional salvage and underwater cleaning company in the Netherlands Antilles and has experienced divers able to make certified damage reports.

Peters Divers Company Ltd.: The following underwater services are carried out by Peters Divers Company Ltd. Underwater hull cleaning by means of the "Scamp" makes it possible to clean the largest V.L.C.C.'s during loading or discharging.

The average cleaning time for a V.L.C.C. is 12 hours. Underwater T.V. system for underwater surveys and inspections are available.

Further underwater services are: welding, cutting, photographing of the bottom condition, etc. in colour and black and white, sealing of intakes, etc. All inspections are carried out by licensed marine engineers.

AUTHORITY: The Harbour Master. (Who is also General Manager of the Harbour and Pilot Service.)

AGENT: SEL Maduro & Sons (Curacao) Inc., Maduro Plaza, POB 304, Willemstad, Curacao, Netherlands Antilles. Tel. 76900. Telex: 1092 Selms NA. Cables: "Maduroship".

NOTES

New Caledonia

NOUMEA: 22.16 S. 166.27 E. (See Plan Book)

DOCUMENTS:
- Ship's Register.
- Safety Certificates. (Checked on arrival by Port Authority).
- Cargo Manifests for Noumea (5).
- Cargo Manifest, in transit (1).
- Passenger List (5) even if nil.
- Crew List (5).
- Crew Personal Effects List (1).
- Stores List (1).
- Drugs and Narcotics (1).
- Plants and Animals List (1).
- Guns and Ammunition List (1).

PILOTAGE: Compulsory for foreign vessels (exemption for vessel with French registery under 60 m. LOA), pilotage rendered day or night.

Pilot boats are wooden launches about 15 m. long, with black hull, equipped with VHF (permanent reception on Channel 16).

Two access channels to Noumea through reef.

Boulari Channel: (22° 30′ S., 166° 26′ E.)

Pilot boards 1 mile off, on the Leads of Amedee lighthouse

Havannah Channel: (22° 21′ S., 167° 03′ E.)

Pilot boards off Goro lights on the Leads of Cap N'Dua.

In bad weather, pilot launches remain on leads as close as possible to entrance.

Pilot should be ordered at least 6 office hours before departure or moving.

ANCHORAGES: In Great or Small Road. Prohibited zone shown on chart in vicinity of under water sealine.

RESTRICTIONS: Vessels may enter and anchor at any time, mooring may be effected at night.

MAX. SIZE:

Cargo vessels: Max. draft 10.30 m.

Tankers: Max. LOA – 300 m. Max. draft 14.80 m.

HEALTH: Unless vessels have signalled that there is suspected disease or fever on board, free pratique is given automatically by radio request to the Capitaine du Port or by the Pilot.

RADIO: All messages by coast station Noumea, call sign FJP. Harbour Master's office equipped with VHF, Channels 16, 12 and 14, operated during normal working hours.

TUGS: Tug's service is compulsory. One tug of 1,200 h.p. and 1 of 720 h.p. available to assist.

BERTHING:

Petite Rade (Small Road):

Berth	*Length (m.)*	*Depth (m.)*
Main Wharf (Berth Nos. 1–3)	438	5.50 – 7.50
Coaster Wharf	190	3.00 – 5.50
Coastal Trader Wharf	140	3.00 – 4.50
Tourist Vessel Wharf	75 (with 2 dolphins 155 m. apart)	9.50 (For vessels up to 170.0 m. LOA)

Grande Rade (Great Road):

Berth	*Length (m.)*	*Depth (m.)*
Coaster Wharf	140	3.80
Main Wharf (Berths Nos. 4–7)	680	9.50 – 10.30

Note: Access to berth No. 4 limited to 8.80 m. by shoal 70 m. off wharf.

There is one mooring buoy 160 m. from the N.W. corner and in line with the main wharf.

BULK HANDLING FACILITIES:

Grain: 2 grain silos of 815 tonnes.

Cement Berth: Private berth located in Baie de Numbo. Initially designed for vessels of LOA 135 m. but can handle vessels with a max. LOA not exceeding 168 m. and draft not exceeding 9 m. Vessels berth alongside dolphins with mooring buoys fore and aft. Middle dolphin equipped with crane, hopper and conveyor. Fresh water available.

Usine le Nickel: Private wharves with 3 berths for ore carriers, tankers and freighters.

Quai Sud: 1 berth, length 170 m., depth 9 m. Equipped with 3 shore cranes for unloading ore carriers.

Quai Nord Ouest: 2 berths. Total length 397 m. Berth No. 3/4 depth 9 m. Berth No. 5/6 depth 10 m. Equipped with 3 gantry shore cranes for unloading ore carriers.

Also see "Tankers".

STEVEDORES: Service provided by four private companies. 2 or 3 days' notice required to arrange work.

MEDICAL: Doctors, hospital, and 3 private clinics available. Smallpox vaccinations are compulsory.

TANKERS:

SBM: (Societe le Nickel):In the entrance to Grande Rade. Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m.

Baie des Dames: (Mobil Oil Co.).

1. At mooring buoys. Max. LOA 200 m. and max. draft 10 m.
2. Alongside "T" shaped wharf with dolphins and mooring buoys. Max. LOA 100 m. and max draft 5 m. Berth for oil and gas carriers.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays; rate, 40 t.p.h.

FUEL: Several grades available from Shell, Mobil and Total.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores if required.

CUSTOMS ALLOWANCES: 200 cigarettes per man. Additional allowance can be made after 10 days. Max. 3 bottles spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

CONSULS: Australia, Belgium, Indonesia, Italy, Norway and New Zealand are represented locally.

SURVEYORS: Lloyds Register, Germanischer Lloyd, Nippon Kaiji Kyokai and B.V.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

CARGO GEAR: Ships gear normally used. Possibility of hiring cranes 10 ton – 104 tons.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

TIME: GMT plus 11 hours. No alterations during the year.

HOLIDAYS: 1st January, Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

POLICE/AMBULANCE/FIRE: Police, Tel. 17; Fire, Tel. 18; Ambulance, Tel. 27.21.21.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Radio Telephone. Service available.

VHF. Available to Harbour Office and pilot station during office hours 0700 to 1100 hrs. and 1330 to 1730 hrs. Monday to Friday 0800 to 1100 hrs. on Saturdays. Pilot vessel when at Havannah Passage keeps VHF watch one hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The three leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Depth of Water. The least sounding taken at No 1 Berth was 32 ft., the other two berths are said to have 33 ft. of water at them.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Documents:
- 1 Cargo Manifest.
- 1 List of Dangerous Cargo.
- 2 Crew Lists.
- 1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
- 1 Bonded Stores List.
- 1 Health Form.

OUTPORTS:

Shore Installations with dolphins and mooring buoys loading ore carriers with conveyor belts.

Baie Ugue – East Coast: Ore carriers: up to 170 m. long.

Poro – East Coast: Ore carriers and tankers: up to 170 m. long.

Kouaoua – East Coast: Ore carriers: up to 150 m. long.

Thio – East Coast: Ore carriers and tankers: up to 170 m. long.

Nepoui – West Coast: Ore carriers: up to 148 m. long.
Tankers: up to 100 m. long.

AUTHORITY: Port Autonome de Noumea.

New Zealand

GENERAL: All ports.

The New Zealand Ministry of Agriculture and Fisheries requires a Shipmaster's Bond and Guarantee (Form Ag.L35) to be completed in triplicate if vessel is carrying animals, i.e. cats, dogs, fish, birds, etc.

In addition, the Masters of all overseas vessels are required to complete in duplicate a Ship's Meat Locker Certificate (Form Ag.L36).

All goods of an agricultural nature are held by Customs Department until they have been inspected and a Permit to Land (Form Ag.G.78) issued by the Ministry of Agriculture and Fisheries.

Crews signing off are required to check with the Port Agriculture Officer and obtain Release/Treatment of any agriculture items which they wish to take ashore.

SHIPMASTER'S REPORT: August 1980.

Health: Coming from an Australian port the clean bill of health was accepted.

Meat chamber of ship's provisions is sealed when contents are from outside New Zealand.

Documents:

2 Poison Lists (if there is poison in the cargo).

2 Reports of Pillaged Cargo (marks and numbers).

Cargo Gear: When working general cargo with derricks "in union purchase" without preventor guys, ship (via Agent) must seek an exemption from Regulation 2 (a) of the General Harbour (Safe Working Load) Regulations 1935 Amendment No. 5 by applying for dispensation from the Chief Surveyor of Ships Marine Department, Ministry of Transport, Private Bag, Wellington.

AUCKLAND: 36.51 S. 174.45 E. (See Plan Book)

PORT LIMITS: South of a line drawn from Toroa Point to the S.W. Point of Rakino Island.

DOCUMENTS:

3 Copies Passenger List.
3 Copies Crew List.
1 Copy Search List (Form 2).
1 Copy Stores List (Form 3).
1 Copy Prohibited and Restricted Immigrants.
1 Copy Poisons List.
1 Copy Animals and Birds List.
1 Copy List of Firearms (not cargo).
1 Copy Arrival Manifest (Form 1), plus 2 for other ports visited (Reg. Form 16 refers).
1 Copy of List showing the gross tonnage of cargo for discharge in New Zealand.
3 Copies Shipmaster's Bond and Guarantee (Form Ag.L35).
2 Copies Meat Locker Declaration (Form Ag.L36).

PILOTAGE: Vessel approaching port to give 24 hours notice by radio. A second notice confirming or amending first to be sent 4 hours before expected time. Signal Station on Mt. Victoria, call sign "Auckland Harbour Radio", calling frequency 2182 kHz, working frequency 2012 kHz. VHF, call sign "Auckland Harbour Radio", Channel 12 and 16. Continuous listening watch on Channel 16.

Pilot launch is 20.0 m. long, single mast, painted white. Name is *Akarana*. Standard flag and lights are shown. Word "Pilot" painted in black on white above cabin. Pilots board 1 mile North of Rangitoto Beacon, but will proceed farther when necessity arises. Good pilot ladder with manrope required to within 5 ft. of water-line with proper lighting at night. Heaving lines will be needed for mail.

ANCHORAGE: For vessels waiting Pilot: (Bearings and distances from Rangitoto Beacon). Gulf Anchorage No. 1 bearing 000° distance 2 miles; No. 2 bearing 006° distance 2.5 miles; No. 3 bearing 012° distance 3 miles.

All inner anchorages in pilotage area can be indicated by Pilot. All anchorages are in 11 to 18 fathoms with good holding ground.

RESTRICTIONS: Ships may enter harbour at any time of day or night. Main channel has least depth of 11 m. chart datum. Vessels with greater draft must wait for tide to make and enter at Harbour Master's orders. Tankers not berthing immediately on arrival anchor as directed at one of Gulf Anchorages.

MAX. SIZE: No limits, within reason, on the length or breadth. Controlling depth at chart datum: entrance 11 m.; Rangitoto Channel 11 m.; anchorages 9.8 to 18.29 m.; berths 6.09 to 12.20 m.

HEALTH: 12–24 hours before arrival time, despatch message to Port Health, Auckland. Message to state ETA, last port, and date of departure therefrom, number of crew, number of passengers and state of health and indicate if there is a doctor amongst the crew. 12 hours before arrival confirm ETA.

Doctor boards by way of vessel's shipside gangway (not pilot ladder) when in harbour. This gangway to be ready immediately on arrival in order to avoid any delay. A responsible person should meet doctor at head of gangway and conduct him to appropriate person.

Papers required:

Completed Maritime Declaration of Health.
De-rating Certificate.
Complete Crew List with dates of last smallpox vaccination.
N.B. Crew and Passenger Lists to be certified as being correct by the Master.
List of Addresses of Disembarking Passengers.
List of Dangerous Cargo on board.

Pratique is granted initially, and covers all subsequent coastal movements in New Zealand for that voyage. Radio pratique can be granted only after prior approval from New Zealand Health Department.

Vessels requesting pratique should exhibit appropriate International Code Signals by day and night until pratique is granted.

RADIO: Station for routing traffic to the Auckland area is Auckland Radio. Call sign ZLD. Working both W/T and R/T on continuous watches.

VHF: See "Pilotage".

RADAR: Radar station with range of 72 km. located on Mt. Victoria 36° 49′ 42″ S., 174° 47′ 57″ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on radar screen. Responsibility for the use of this information rests entirely with Master of vessel.

TUGS: 4 tugs available. Tugs join vessel East of Eastern Tide Wall. Tugs supply lines at no extra charge.

BERTHING: Tankers berthing at Eastern Tide Wall, BP Depot, must berth in accordance with weather and tidal conditions. Tankers must arrive at Pilot station not later than half an hour before sunset, otherwise berthing will be postponed until following morning.

Depth of water: Bledisloe 10 m.; Captain Cook 8–10.5 m.; Eastern Tide Wall 10–10.5 m.; Hobson 4–6 m.; Jellicoe 9–11 m.; Kings 8.5–9.5 m.; Marsden 2.8–8 m.; Princes 9–11 m.; Queens 9–10.5 m.; Wynyard 8–11 m.; Freyberg 10–11 m.; Fergusson 11–12.2 m.

CRANES: At Fergusson Container Terminal there is 1 twin lift container crane of 45.72 tonnes capacity and 2 single lift container cranes of 40.64 tonnes capacity. In the conventional cargo port quay-side cranes of 3 or 5 tonne capacity are provided at all except 2 berths. At the bulk fertiliser berth there are four 5 tonne capacity multi-wire grabbing cranes and at the bulk sugar berth there is a 5 tonne capacity gantry grabbing crane. Self propelled floating crane 101.6 tonnes capacity.

BULK CARGO FACILITIES: *Cement:* A special berth is provided where bulk cement is discharged pneumatically via pipe-line to privately owned silos. Depth at chart datum 6.0 m., quay length 94 m.

Sugar: Bulk sugar is discharged at Chelsea Wharf. This wharf is equipped with a 5 tonne capacity gantry grabbing crane and a conveyor system connected to the refinery store. Depth at chart datum 9.9 m. Quay length 91 m.

1 berth is set aside for the discharge of bulk fertiliser bases. Six 5 tonne capacity multi-wire grabbing cranes and 6 rail mounted hoppers of 10.7 cu.m. capacity are available. Depth at chart datum 11.0 m. Quay length 335 m.

4 other berths can also be made available for discharge of dry bulk cargo as required.

SPECIALISED CARGO HANDLING FACILITIES:

Tanker Terminals: 2 berths are at a continuous quay 486 m. long, depth at chart datum 9–11.0 m. The third is a dolphin berth, depth at chart datum 10.5 m. All the berths are connected by pipe-line to adjacent tank farms.

Container and Ro/Ro Facilities: Fergusson Wharf Container Terminal: Quay length 610 m. Depth at chart datum 12.2 m. The terminal is equipped with 3 Vickers Hoskins/Paceco gantry container cranes, 2 single lifts of 40.64 tonnes capacity and a twin lift of 45.72 tonnes capacity. Total back-up area of the terminal is 21.71 ha. of which 17.41 ha. is used for container handling and storage and 4.30 ha. is used for container repairs and LCL containers. Included in the latter area is the Monash Street Container Base which provides 7,432 sq.m. of covered transit storage for LCL cargo. Rail exchange sidings are located immediately adjacent to the terminal. There are power outlets for 1,424 refrigerated containers. Container terminal equipment includes 17 straddle carriers as well as various tractors, trailers and fork lift trucks. The terminal is operated by the Auckland Harbour Board.

Freyberg Wharf: A common user ro/ro berth for quarter ramp vessels up to 228 m. in length is provided at Freyberg Wharf.

Bledisloe Roll-on Terminal: Quay length No. 1 berth 137 m., No. 2 berth 224 m. Depth at chart datum 9.5 m. Each berth is equipped with a link span with a fork lift axle load capacity of 56.9 tonnes and a low loader capacity of 182.9 tonnes. No. 2 berth can accept ships equipped with a port quarter ramp. A total back-up area of 4.8 ha. is provided including a cargo shelter of 4,000 sq.m. and rail exchange sidings. The terminal is operated by Union Steam Ship Company.

BRIDGES: Navigation in daylight hours only under Auckland Harbour Bridge. Navigation span is 138 ft. to 131 ft. above MHWS for 250 ft. each side of centre. Only ships berthing at Chelsea Wharf sugar berth need pass under the bridge.

STEVEDORES: Labour commences at 0730 hrs. In order to ensure labour for this time ETA should be received at Agent's office before 1500 hrs. previous day, or before 1500 hrs. previous Friday for a Monday start. Delays on radio messages may be up to 3 hours.

MEDICAL: In case of urgent medical attention being required, Agents can arrange for doctor to board in stream at any notice. Hospital and ambulance services available 24 hours. If any smallpox vaccinations have expired this must be included in ETA advice.

TANKERS: See "Special Cargo Handling Facilities".

Any size pipe-lines can be used, oil companies have all reducing pieces needed.

No facilities for slop discharge.

DENSITY: Always 1025.

FRESH WATER: Fresh water always available. Delivery rate 80 t.p.h., through canvas hoses. AHB supplies all equipment.

FUEL: Light fuel oil, diesel, gas oil and heavy fuel are available. To be ordered in ETA notice.

FIRE PRECAUTIONS: In addition to usual precautions, Class I tankers are under extra security with a nightwatchman from Harbour Master's staff in addition to the normal tanker guard.

CONSULS: (Consuls, Trade Commissioners, etc.): Australia, Belgium, Brazil, Great Britain, Costa Rica, Denmark, El Salvador, Fiji, Finland, France, Germany (West), Greece, Ireland, Italy, Japan, Korea (South), Nauru, Netherlands, Norway, Peru, Philippines, Portugal, Sweden, Switzerland, Tonga, Turkey, U.S.A., Venezuela, Western Samoa.

REPAIRS: Any ship repairs can be carried out. A slipway can take vessels of 600 tons displacement and up to 64 m. LOA.

DRY DOCKS: Max. size of vessel that can be accommodated in Calliope dry dock is 181.35 m. LOA and 19.6 m. beam. Water on sill at MHWS 10 m.

SURVEYORS: American Bureau of Shipping, Bureau Veritas (Paris), China Corporation Register of Shipping, Det Norske Veritas, Germanischer Lloyd, Lloyds Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale, USSR Register of Shipping.

GANGWAY/DECK WATCHMEN: Watchmen are necessary. Best to use crew.

OPENING/CLOSING HATCHES: Crew can open completely mechanical hatches only. All other hatches opened by waterside workers.

CERTIFICATES: Register, De-ratissation, Load Line, Safety Equipment, Safety Radio, Articles of Agreement, are main Certificates required.

CUSTOMS ALLOWANCES: 1 bottle of spirit (in use) *or* 1 bottle of wine (in use) *and* 12 quart bottles (or the equivalent) of beer, 200 cigarettes *or* half a pound of tobacco *or* 50 cigars. For ship use only. To be declared on Search List. Also gifts up to a total value of $10.0 may be landed.

CARGO GEAR: Preventer guys must be entirely wire. All blocks and shackles must be moused. Safety strops on all heel blocks. All wires, ropes, chains and blocks to have Certificate of Test.

REPATRIATION: All facilities exist for repatriation.

AIRPORT: 23 km. from harbour to airport. Served by all major international airlines.

TIME: Local time is GMT plus 12 hours, add 1 hour for Summertime, October to March.

HOLIDAYS: Only the Container Terminal works during the following holidays. New Year's Day (1st January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waitangi Day early February. In addition, each Province has an Anniversary Day and a Waterside Workers' Picnic Day. In Auckland these are in last half January.

POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.

TELEPHONES: Telephones at all berths. Cost is $3.02 fee phone per day, plus the cost of any overtime incurred in connecting or disconnecting any such telephone. Telephones (coin operated) may be hired for use of crew on application to Post Office.

SERVICES: Services include tank cleaning, compass adjusting, all cargo surveying, average adjusting, etc. Tank washings may be pumped to road tankers.

GENERAL: *Refuse Disposal:*

It is important that no refuse be allowed to pass into tidal waters either directly or indirectly. This is covered by strict Government Regulation.

Masters should ensure that refuse is lowered into refuse boat "Manui" and not thrown into boat from any great height.

No refuse will be collected from stern of vessel as this is hazardous for collection craft. A suitable site in way of the flat side of the vessel on off shoreside should be chosen.

SHORE LEAVE: Crew members may go ashore.

IDENTIFICATION CARDS: Not required.

REGULATIONS: All guests aboard vessel in the evening must have passes signed by the Master. All visitors' passes expire at 2300 hrs. All ships in port are subject to the Rules and Regulations contained in the Harbours Act 1950, and the By-laws of the Auckland Harbour Board. On first visit to the Port copies of these and other relevant Regulations are supplied to ships.

DELAYS: During 1979 average delay 10 hours for container ships. Seldom any delays awaiting other berths.

DEVELOPMENTS: Kings Wharf is to be demolished and replaced by a heavy duty quay. This project is in the planning stages.

AUTHORITY: Auckland Harbour Board.

BLUFF: 46.37 S. 168.22 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory. Pilots board vessels from a launch within a 3 mile radius of signal station on Stirling Point, and always well to seaward of 6 fathom line, approx. 2 miles South of Bluff Entrance Light. Arrangements regarding boarding will be made by radio-telephony or wireless-telegraphy.

Vessels, other than those which are exempt from pilotage, must not proceed inside Bluff Foreshore Light without a Pilot.

Pilots do not usually board vessels between sunset and sunrise except in reasonable weather.

Caution: Vessels stopping to pick up a Pilot are particularly warned not to approach entrance shoal too closely, especially during flood stream as stream sets strongly on to entrance shoal, North-Eastward.

Coastal Pilots: Coastal Pilots are available on 24 hours notice for piloting service from Tairoa Head to Milford Sound.

ANCHORAGE:

Southward of Stirling Point: In fine weather, vessels missing tide may anchor in 10 to 12 fathoms with Stirling Point lighthouse bearing about 356° and Dog Island lighthouse bearing about 108°.

Eastward of Dog Island: Anchorage for vessels delayed longer than 6 hours awaiting to enter Bluff is situated 5 miles East of Dog Island.

Safe anchorage in heavy Westerly weather may be found off the N.W. coast of Stewart Island between Otaku Point and Gull Rocks, keeping about 1 mile offshore.

RESTRICTIONS: The safest time to enter the harbour is at slack water. Strict attention should be paid to signals passed from the signal station on Stirling Point. No vessel should attempt to enter without a Pilot, unless possessing local knowledge.

Least depth in fairway is 28 ft. on Northern edge of Channel Rocks; also 25 ft. (about 1 cable West North-Westward of the tidal beacon).

MAX. SIZE: Length, 620 ft., overall beam, 95 ft. Maximum draft permissible in approach channel: 30 ft. 0 in. at HW, 22 ft. at LW. The Board has been carrying out extensive blasting and dredging in the entrance channel and it is anticipated that a further increase in the present port draft of 30 ft. in the entrance channel will be made but this will be publicised at the time when it can be confirmed.

HEALTH: Radio pratique available at Berth.

RADIO: A signal station is situated on Stirling Point and is connected by telephone with harbour officials. A continuous watch is maintained and vessels can communicate by the International Code of Signals or the Morse Code. There is a radio-telephone at signal station. Call sign is "Bluff Harbour Radio", calling frequency is 2,182 kc/s, and the working frequency is 2,012 kc/s. VHF radio having Channels 16 and 12. Watches are maintained from 33 to 40 minutes past the hour, every hour. After radio-telephone contact has been established further listening watches can be made by mutual agreement.

TUGS: Two tugs are available. Both twin-propulsion Voith Schneider vessels of 1,200 i.h.p. and 15.3 tons static pull and 2,600 h.p. and 30 tons. Both vessels are equipped for fire fighting and salvage.

BERTHING:

	Berth No.	*Dredged depth LW (draft 2 ft. less or maximum)* ft.	in.
Island Harbour:			
	1	26	
	2	26	
	3A	30	
	3	35	
	4	35	
	5	35	
	6	25	
Town Wharves:			
	11	31	6
	12	29	6
	14	26	6
Tiwai Wharf:		38	

STEVEDORES: Agents require ETA in advance to arrange labour for cargo handling.

MEDICAL: Port doctor available through Agents. Nearest hospital is at Invercargill City, 16 miles from Bluff. Medical service whilst at sea; through Awarua radio.

TANKERS: Tankers are berthed at No. 11 berth only, Town wharf. Side connections are to be used. Only 1 pipe-line connection on wharf.

It is not permitted to commence the discharge of oil cargoes during the hours of darkness. No vessel carrying a cargo of motor spirit or having discharged such cargo will be handled during the hours of darkness.

Oil cargoes for Tiwai Point discharged at Tiwai Wharf.

DENSITY: 1025.

FRESH WATER: Available alongside all berths.

FUEL: Bunkering facilities are available. Boiler fuel is supplied by 8 in. diameter pipe-line located at No. 11 berth, Town wharf. Delivery rate 240 t.p.h. Limited quantities of coal, light diesel oil and lubricating oil can be arranged for delivery by road or rail to the wharves.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Usually carried out by stevedores, unless automatic then by crew.

CUSTOMS ALLOWANCE: See "Auckland".

IDENTIFICATION CARDS: Not required.

REPAIRS: Major repair work can be undertaken by the following: 2 small machine shops at Bluff; a foundry at Invercargill; a slipway for vessels of up to 500 tons displacement at Bluff. A diver is available for underwater inspections through Agents.

REPATRIATION: Facilities exist.

AIRPORT: Internal air services from City Airport, Invercargill, 16 miles by road. Connecting with international airports of Christchurch, Wellington and Auckland.

TIME: GMT plus 12 hours. Summer Time GMT plus 13 hrs. from November to February inclusive.

HOLIDAYS: Christmas Day; Boxing Day; New Year's Day; Second of January; Watersiders' Picnic Day (4th Monday, January); Good Friday; Easter Saturday (except by special arrangement); Easter Monday; Easter Tuesday; Labour Day; Anzac Day; Reigning Sovereign's Birthday.

POLICE/AMBULANCE/FIRE:

	Tel. (Emergency)	*(Other)*
Ambulance	Bluff 111	Inv'gill 4119
Police	Bluff 111	8844
Fire Brigade	Bluff 111	

TELEPHONES: By arrangement, all vessels can be connected with telephone system.

SERVICES: Compass adjusting, refuse collection daily.

SHORE LEAVE: Allowed.

AUTHORITY: Southland Harbour Board.

GISBORNE: 38.42 S. 178.02 E. (See Plan Book)

PORT LIMITS: All of Poverty Bay within a line from the Northern point of Young Nick's Head to Tuaheni Point.

DOCUMENTS: See "Auckland".

PILOTAGE: Telegraphic address – Harbour Master, Gisborne. Advance notice – 24 hours of ETA and further confirmed at 4 hours of ETA. VHF Channel 16 and 12.

Pilot boat is painted white with word "Pilots" on both sides, 45 ft. in length; exhibits pilot flag or lights. Pilot boards on line of leads (332°) 2 miles from breakwater light.

ANCHORAGE: Vessels awaiting Pilot and berth anchor with Tuaheni Light bearing 084° 3.2 miles in 10 fathoms of water.

RESTRICTIONS: Vessels may be berthed at night according to size, draft and weather conditions.

MAX. SIZE: Maximum length, 570 ft. OA. Beam, No restriction. Draft, 29 ft. at HW, 25 ft. at LW; there can be slight variations according to heights of tide and weather conditions.
HEALTH: Same procedure as "Auckland".
RADIO: Auckland Radio ZLD, Wellington ZLW.
RADAR/VHF: Radar service available – arrangements can be made through Signal Station by means of VHF Channel 16.
TUGS: Tug joins vessels in channel outside breakwater. Normally use tugs lines, no extra charge.

A twin screw Schottel Rudder/Propeller 22 m. steel tug is in service. Bollard pull 14 tonnes, 1,000 h.p.
BERTHING: 700 at 32 ft. depth LW; 1,400 ft. at 18 to 20 ft. depth LW. *Moorings:* Shore hawsers placed on vessels on arrival.
SPECIALISED CARGO FACILITIES: Two 1,000 tons for bulk grain etc. silos behind No. 7 berth and a conveyor for loading grain etc. in ships. Loading rate 400 t.p.h. There is also a fish unloader, rate 40 t.p.h.
STEVEDORES: Advice of ETA and particulars of stowage required in order that required number of gangs can be ordered. Hours of work, Monday to Friday, 0700–1200 hrs., 1300–1800 hrs.; Saturday, 0700–1200 hrs.
MEDICAL: No advance advice required for medical attention. Full hospital facilities available.
TANKERS: Tankers discharge fuel oil and bitumen.
DENSITY: 1025 at all stages of tide.
FRESH WATER: Available by 2.5 ins. hoses at approx. 40 t.p.h. per hose.
FUEL: Fuel is at present only available by rail tanker and should be ordered through ship's Agent in advance.
DEVELOPMENTS: It is expected that present overseas berth will be increased from 700 ft. to 1,300 ft. within about 3 years.
GANGWAY/DECK WATCHMEN: Ships at present provide own watchmen.
OPENING/CLOSING HATCHES: Stevedores normally carry out this work.
CUSTOMS ALLOWANCE: See "Auckland".
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Normal maintenance repairs.
DRY DOCKS: One 400 ton slipway.
REPATRIATION: Full facilities available for effecting crew changes and repatriation. However, no seaman's pool operating at Gisborne. Replacement crew must be obtained from either Auckland or Wellington.
AIRPORT: 3.5 miles. Regular internal service.
TIME: Standard Time is related to the meridian of 180° *East,* i.e. 12 hours ahead of GMT.
AUTHORITY: Gisborne Harbour Board.

LYTTELTON: 43.35 S. 172.42 E. (See Plan Book)

PORT LIMITS: All those tidal waters of the Port of Lyttelton comprised within the area enclosed by the arc of a circle having a radius of 3 nautical miles from the Northernmost point of Adderley Head.
DOCUMENTS: Customs procedure. Overseas vessels, on arrival in New Zealand, should have following papers ready to produce to Customs Officers:

Particulars of Ship's Certificates.
List of Persistent Oils (Tankers only).
Notification of Liability to pay entry tax (Fishing vessels only).
Register.
Names of Owners and Agents.
Crew List.
Passenger List.
List of Prohibited or Restricted Immigrants.
Search List.
Stores List.
List of any stock or birds on board.
List of Poisons.
List of Firearms.
Statement of excess Tonnage of Cargo.
Statement of quantity of Fuel Oil in double bottoms.
Declarations by Passengers arriving in New Zealand.
Baggage Declarations by Passengers for duty purposes.
On departure for overseas, Master or his Agent is required to produce:
Manifest of Cargo.
Stores List.
Crew List.
Passenger List (if any).
Clearance from the Marine Department (if a British ship).

A home trade vessel under *transire* is required to produce her cargo book to Collector of Customs and such particulars as to passengers, crew, and cargo as the Collector may at any time demand. Cargo book shall contain name and port of registry of ship, Name of Master, and date of arrival at, and departure from each port. Particulars as to dates of arrival and departure must be entered not later than 24 hrs. after time of such arrivals and departures.
PILOTAGE: Masters requiring services of a Pilot must notify Harbour Master of their estimated time of arrival and max. draft not later than 1600 hrs. on day prior to arrival (Monday to Friday). If estimated time of arrival is on a Saturday, Sunday or any public holiday which falls on a Monday, notification must be given before 1600 hrs. on previous Friday. International Code of Signals or Morse Code used for communicating with signal station. Station also equipped with radio telephone. Call sign is "Lyttelton Harbour Radio", calling frequencies is 2182 kc/s and working frequencies are 2012 and 2162 kc/s, a continuous listening watch being maintained. Radio telephone equipment also installed in the tug, pilot cutter and Harbour Master's office, and same call signs, frequencies and watches are employed. VHF in operation on International Channels 12, 14 and 16.

Pilot vessel is 16.46 m. in length. Equipped with radar, radio telephone and echo sounder. The pilot vessel is located at the tug wharf in inner harbour and any vessel awaiting arrival of the Pilot, should anchor about 1.5 miles to seaward of Godley Heads, in a depth of 16 m. to 18 m. and await instructions.

The limit of pilotage is a line joining Godley and Adderley Heads.

Every facility must be provided to ensure safe boarding of the Pilot.
ANCHORAGES: *Camp Bay:* Permission must be obtained from the Harbour Master before using this anchorage and draft of vessel is restricted to 8.5 m. All vessels drawing more than 8.5 m. whether awaiting a Pilot or not must use the outside anchorage. Vessels using Camp Bay anchorage should anchor with the anchorage lighted leading beacons situated on the Southern shore of Camp Bay, in transit, bearing 195.5°. Each beacon is painted white and exhibits a fixed red light. Vessels may anchor to the Westward of this bearing but must not proceed Westward of a line bearing 345° from the rear anchorage beacon.
Note: Anchoring in or near the dredged channel which extends 2 km inside Heads is not permitted.
RESTRICTIONS: Cargo vessels not berthed during hours of darkness, except at Cashin Quay.

Tankers are berthed during hours of daylight only. All vessels can depart from their berths during hours of darkness. Vessels holding pilotage exemptions may also enter or depart during the hours of darkness.

The following are the controlling depths at mean low water springs, mud bottom in each case;

entrance to port 14.6 m.
dredged channel 11.30 m.
inside anchorage 11.0 m. (Camp Bay)
approaches to berth 11.3 m. – 9.8 m.
alongside berths 12.20 m. – 8.60 m.

MAX. SIZE: Max. draft permissible for entering or leaving: 11.28 m. at high water and 9.75 m. at low water. Vessels drawing less than 9.75 m. can enter at any state of the tide. Max. size permissible for entry: length 260 m. at Cashin Quay, any additional length contact Harbour Master, 230 m. at Inner Harbour. No limit on vessel's beam.
HEALTH: Master of every ship about to enter a New Zealand port shall, not later than 12 hrs. and not earlier than 24 hrs. before expected time of arrival at that port, inform Port Health Officer by radio of last port of call, date of departure therefrom, and state of health of vessel.

Arrival of vessels. On arrival, vessel showing International Code quarantine signal, should proceed to inspection to await arrival of Port Health Officer. Inspections are normally carried out at berth.

Radio pratique. Certain ships may be granted pratique by radio and hence need not be visited by a Port Health Officer, provided that medical officer carried as part of ship's complement.

Maritime Declaration of Health. Master of all vessels arriving in New Zealand from any port beyond New Zealand shall complete and deliver to Port Health's Officer a maritime declaration of health countersigned by the ship's medical officer, if required.

Crew List and Passenger List. Master of every ship liable to quarantine should be prepared to furnish Port Health Officer a list of all passengers, showing in respect of each passenger, name, sex, race, age, and port of embarkation; and a list of crew giving the name, race, and rating of each member.
RADIO: Wellington Radio, call sign ZLW; Awarua, call sign ZLB; or Auckland, call sign ZLO.
TUGS: Normally join vessel at Parsons Rock Beacon. Tug lines are used, charge for which is included in the overall hire for tug. Number of tugs required depends on type of vessel and draft.
BERTHING: Requirements for berthing at berths 2, 3, 4, 5, 6 and 7 for vessels over 1,000 tons net are; bow out, the anchor to be used and gangway turned in until vessel secured at berth.
STEVEDORES: Waterside labour can be ordered after arrival of ship at 0630 hrs. up to 0900 hrs. For work on Saturdays orders must be placed by 0900 hrs. Friday. Saturday afternoon work to be ordered by 1030 hrs. Saturday.

For supplementary hours labour must be requisitioned by 1500 hrs. previous Friday and confirmed by 0700 hrs. Monday and daily.
SPECIALISED CARGO HANDLING FACILITIES:

No. 1 Breastwork, Inner Harbour: Grain silos. 2,000 tons capacity, 250 t.p.h. loading rate for coastal shipments.

No. 1 Cashin Quay: Bulk Loading Facilities: Woodchips, grain, etc.

No. 2 East: Bulk cargo discharges: 6×5-ton electric cranes, 3×100-ton mobile bulk hoppers.

Gladstone Pier, West: Roll-on/Roll-off Coastal and Trans-Tasman Cargo Terminal.

No. 2 Jetty West, Inner Harbour: Roll-on/Roll-off, Passengers and Cargo Terminal.
MEDICAL: Hospital facilities are available at Christchurch, 9 miles from port, and international regulations apply in regard to inoculations, vaccinations, etc. Agents can be notified at any time of medical allocation required, preferably with 24 hours notice.
TANKERS: All tankers berth alongside oil wharf in Inner Harbour. One berth only is available with a max. draft of 11.28 m. A 10 in. line is used for discharging and loading with suitable fittings for reduction to 8 in. Slop or oily residue facilities are not available.

Oil hoses can be connected and disconnected during hours of darkness with Harbour Master's permission. Side connections are connected to discharging arms situated at the middle of the oil wharf.

Berthing is generally starboard to, head out.
DENSITY: 1025, salt water.
FRESH WATER: Available at all berths delivered by hose at a discharge rate of 20 t.p.h.

FUEL: Bunkering facilities available: Oiler fuel oil, supplied by 4 in. and 6 in. diameter bunker hose connected to an 8 in. diameter pipe-line, located on the oil wharf.

FIRE PRECAUTIONS: Tankers are not permitted to immobilise engines at the oil wharf. Repairs may be carried out at other wharves with Harbour Master's permission. Boiler and galley fires are not required to be extinguished when loading or discharging. All scuppers are to be plugged and cemented in case of spillages.

DEVELOPMENTS: The new container terminal at Cashin Quay No. 3 was first used by "ACT 2" in June 1977 and has the following facilities: Heavy duty berth 285 m., depth alongside 12.2 m., draft 11.28 m., terminal area 8ha, container slots 1600 stacked two high, reefer electrical connections 546, one Paceco 40 tonne single-lift container crane, seven Clark No. 520 straddle carriers – forklifts, container washing and repairs, CFS – No. 2 transit shed 6680 sq.m., Operator – Lyttelton Harbour Board.

GANGWAY/DECK WATCHMEN: All ships must be provided with a watchman whilst at oil wharf; a shore watchman is also required. Watchmen can be ordered at any time by contacting Seamen's Union at Lyttelton.

OPENING/CLOSING HATCHES: This work is carried out by waterside labour.

CUSTOMS ALLOWANCES: 8 ounces and/or 200 cigarettes per man. 1 bottle of wine and/or 1 bottle of spirits per man.

IDENTIFICATION CARDS: Passes are necessary at oil wharf but not required otherwise.

CONSULS: At Christchurch.

Australia	66-221	Japan	60-446
Belgium	77-905	Netherlands	65-669
Denmark	899-099	Norway	65-079
Finland	60-709	Sweden	65-179
France	60-085	U.S.A.	65-864
Italy	62-799		

REPAIRS: Major work can be undertaken at Lyttelton where a machine shop and foundry are available.

DRY DOCK: A graving dock is available for vessels up to 6,500 gross tons and dimensions of dock are floor length 137.15 m., top length 146.75 m., top width 25 m., entrance width 18.90 m., width in way of ships bilge 16.61 m., sill depth at MHWS 6.63 m. A patent slip is available for vessels up to 231 tons.

REPATRIATION: Facilities are available.

AIRPORT: Distance from Christchurch – 6 miles, served by regular airlines.

TIME: Local time is 12 hours ahead of GMT, no alteration to clocks.

N.Z. daylight time from 0200 hrs. (NZST) on last Sunday in October until 0200 hrs. (NZST) on the first Sunday in March – 13 hours ahead of GMT.

HOLIDAYS: Holidays throughout year shall be New Year's Day; Anzac Day; Provincial Anniversary Day; Waitangi Day; Good Friday; Easter Monday; Labour Day; Birthday of Reigning Sovereign; Christmas Day; Boxing Day; and the Harbour Board's employees picnic day (to be held on same day as the Waterside Workers' Union picnic day. No cargo work is carried out on these days.)

POLICE/AMBULANCE/FIRE: For emergency calls from ships telephones, dial 111 and ask the operator for service required.

TELEPHONES: Arrangements can be made with Harbour Master for telephones to be placed on board.

SERVICES: Tank-cleaning and tank-washing facilities are available as well as a compass adjuster.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: Lyttelton Harbour Board, Christchurch.

NAPIER: 39.29 S. 176.54 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Vessels should advise ETA and draft to Harbour Master Napier 24 hours prior to arrival, ETA to be confirmed or amended 4 hours before original ETA or 4 hours before arrival, whichever first.

VHF pilot boat and watchtower. Listen Channel 16. Work Channel 12.

Pilot boat 45 ft. long, painted white, funnel green over blue with white dividing band and red spoked wheel on white disc and black top. Pilot boards inward vessels on main Southern leads 2 miles East of roadstead buoy. For vessels in excess of 7.31 m. draft Pilot may, by arrangement, board at North Pania buoy.

ANCHORAGES: Anchorage 1 mile East of roadstead buoy. 9 fathoms. Bottom sand and mud.

RESTRICTIONS: Vessels are berthed between 0500 hrs. and sunset. Vessels up to 28 ft. 6 in. draft may berth at any state of tide.

MAX. SIZE: Max. LOA 750 ft.; beam, no limit; draft, 34 ft.

HEALTH: Cable port health Napier 24 hours before arrival. Doctor will board on arrival.

RADIO: Radio telephone - Napier Watchtower listens 2182 kc/s for 15 mins. Call sign "Napier Harbour Radio" at following times; 0400, 0800, 1200, 1600, 2000, 2400 hrs., and by arrangement. Working frequency is 2162 kc/s. VHF listening watch as above for R/T and continuous during office hours.

TUGS: Two tugs available.

BERTHING: Vessels at max. draft limited to HW. Notification must be received before 1500 hrs. on Friday for any shipping movement over weekend and 1500 hrs. on day preceding public holidays.

SPECIALISED CARGO FACILITIES: Wood pulp store situated adjacent Higgins Wharf South, area 126,000 sq. ft. with 27 ft. clear height.

Bulk fertiliser store adjacent Higgins Wharf, capacity 60,000 tons.

Electric power and storage for 240×20 ft. reefers. 30,000 sq. ft. container packing and unpacking shed. 4 acre paved dry box yard. Serviced cleaning yard for 20×20 ft. reefers. Tank for tallow and edible oils.

STEVEDORES: ETA required for discharging ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advice number of gangs able to work. All work done by ship's gear.

MEDICAL: No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance.

TANKERS: Standard size discharge lines. All connections supplied by oil companies. Five berths, max. draft 34 ft.

DENSITY: Variable.

FRESH WATER: Available all berths 20 t.p.h. per hose.

FUEL: 220 and 1,000 sec. Oil available ex-pipe-line at 110 t.p.h. Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 weeks notice. No residue service available.

FIRE PRECAUTIONS: Watchman supplied on wharf at ship's expense when tankers discharging.

GANGWAY/DECK WATCHMEN: Cargo watchmen supplied on request at current award rates.

OPENING/CLOSING HATCHES: Hatches normally opened and closed by stevedores unless automatic type.

CERTIFICATES:

Ship's Register
Health Certificate
Cargo Safety Certificate
Radio Safety Certificate
Load Line Certificate

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

REPAIRS: First class service available.

REPATRIATION: On arrangement with Customs and vessel's Agents.

AIRPORT: Hawke's Bay Airport, served by internal airline 3 miles from port.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day (last Monday in January) (vessels berthed but cargo not worked on any of these holidays); Anniversary Day (2nd to last Monday in January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (nearest Monday 25th October); Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Emergency telephone 111.

TELEPHONES: Connection all berths.

SHORE LEAVE: No restrictions.

AUTHORITY: Hawkes Bay Harbour Board.

NELSON: 41.17 S. 173.17 E. (See Plan Book)

PORT LIMITS: Within 3 miles radius of Nelson Lighthouse.

DOCUMENTS: See "Auckland".

PILOTAGE: Compulsory for vessels of 100 g.r.t. and over. If possible 24 hours notice of ETA to Harbour Master. Confirm ETA before 1600 hrs. Friday if arriving during weekend or public holiday.

Radio telephone 2182 kc/s. and 2162 kc/s., call sign "Nelson Harbour Board". Listening watch 10 minutes every 4 hours commencing at 0000 hrs. After contact has been established a further listening schedule can be arranged.

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels about 1.5 to 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., mud, with Boulder Bank lighthouse bearing 130° distance 8 cables. Pilot vessel 40 ft. planing hull, speed 19 knots, painted orange.

ANCHORAGES: Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.

RESTRICTIONS: Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 380 ft.) enter port on flood tide and usually swing and berth port side to.

MAX. SIZE: Max. permissible length 630 ft. Beam no limit. Draft limits 30 ft. Max. draft at Main Wharf is 26 ft.

HEALTH: Doctor clears vessel after berthing. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.

RADIO: ZLW Wellington Radio; ZLB Awarua Radio; ZLD Auckland Radio.

TUGS: Two tugs available, joins vessel inside harbour. Tug's own line used on berthing. Tugs are equipped for fire-fighting.

BERTHING: Vessels should endeavour to make their arrival as early on flood tide as possible.

SPECIALISED CARGO-HANDLING FACILITIES: Facilities are available at one general cargo berth for discharging motor spirits and oil. Another berth is used for loading wood chips pneumatically (the loading equipment is owned by Nelson Pine Forest Limited, Nelson). Common user Roll-on/Roll-off Link span.

STEVEDORES: Labour ordered 0700 hrs. for weekday work; 0900 hrs. Friday for Saturday work. ETA should be received by Agents before these times.

MEDICAL: Advise Agents of any medical attention required, giving up to 24 hours notice. Hospital facilities are obtainable. Smallpox vaccination certificates are required.

TANKERS: Diameter of discharge pipe, 10 in. white products; 8 in. black oil. No slop discharge facilities. Oil tanker berth, one only. Max. draft at berth 26 ft.

DENSITY: Average sea water, 1025.

FRESH WATER: Obtainable at any time. Approximately 20 t.p.h. delivery rate.

FUEL: Marine fuel oil, gas oil. Notice required, 24 hours.

GANGWAY/DECK WATCHMAN: Watchman necessary but usually provided by ship's crew. Shore watchman can be engaged if requested by vessel. Cost in accordance with national award.

OPENING/CLOSING HATCHES: By stevedores only.

CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: Deck and engine repairs are possible. (No underwater damage repaired.)
DRY DOCKS: Slipway available for up to 1,500 ton vessels.
REPATRIATION: Facilities exist.
AIRPORT: Distance 3 miles. Served by internal airline only.
TIME: GMT plus 12 hours. Daylight saving in Summer months, advance clocks 1 hour.
HOLIDAYS: New Year's Day (1st Jan.); 2nd Jan.; Picnic Day (usually near end Jan.); Anniversary Day (1st Monday in Feb.); New Zealand Day (6th February); Good Friday; Easter Monday; Queen Elizabeth II Day (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day. No cargo work on these days.
POLICE/AMBULANCE/FIRE: Police 88309; Ambulance 88299; Fire 81589; Emergency calls, dial 111.
TELEPHONES: Can be connected on board.
SHORE LEAVE: Allowed.
SHORE POWER: 400 v., 3 h.p. 50 Hz, 60 amps max.
AUTHORITY: The Nelson Harbour Board.

NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.03 E. (See Plan Book)

PORT LIMITS: All waters contained within the area of a circle with radius 2.5 nautical miles whose centre is the trig station on Mount Moturoa in position 39° 03′ 56.8″ S. 174° 01′ 44.9″ E.
DOCUMENTS: *Customs:* See "Auckland".

Agriculture: Shipmaster's Bond List. Meal Locker Declaration Form AGL 36 (2 copies).

Health: Maritime Declaration of Health (issued by Port Health Officer).
PILOTAGE: Compulsory. Telegraphic address "Harbour Master, New Plymouth". 3 days notice preferable with 1 day confirmation. VHF Channel 16. R/T 2182 kc/s.

Pilot boat white with buff deckhouse, either "Rawinia" or "Pilot" in black on side. Pilot taken on board about 1.5 miles due North of Main Breakwater Head.
ANCHORAGE: Vessels can anchor to the West of a line due North from the Main Breakwater head seaward of the 10 fathom line. Good holding on sandy bottom. Not recommended in Northerly weather conditions.
RESTRICTIONS: Ships not berthed during hours of darkness although permitted to sail. Draft max. 30 ft. (9.15 m.) may be exceeded after prior consultation with Harbour Master. Ships under 21 ft. not affected by state of tide. In range 21 ft. to 30 ft. (9.15 m.) time of berthing relevant to high tide.
MAX. SIZE: Max. size 700 ft. (213.4 m.) overall, breadth no limit.
HEALTH: Port doctor boards on arrival at berth. In event of suspected disease on board, will board in pilotage area. Pratique automatic if vessel has already called at another New Zealand port.
RADIO: Radio telephone system operates watches for 15 minutes every 4 hours from midnight. Call sign New Plymouth Harbour Radio, call frequency 2182 kc/s. Working frequency 2012 and 2162 kc/s. 24 hour watch maintained on VHF Channel 16. ETA cables generally received through Wellington Radio. All outward messages routed through Wellington Radio.
TUGS: One tug available. 700 h.p.
BERTHING: In general all ships are swung in basin coming alongside berth stern first. Shore moorings are used.

Breakwater: Length, 122 m.; width, 10 m.; depth alongside LWOST, 5.5 m. For use by oil field barges, supply vessels and fishing vessels. Road transport only.

Moturoa Wharf: Length, 335 m.; width, 27.4 m.

East side of wharf: 1 berth 260 m. long, depth alongside LWOST 10 m. Four 3 tonne portal cranes (5 tonne at reduced radius) 1 berth 76 m. long, depth alongside LWOST 4.9 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7.9 m. Bunkering point on No. 2 berth. All classes of bulk oil may be discharged at No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.

Newton King Wharf: Being demolished and replaced with jetty for tanker use only. During reconstruction only one tanker berth available on this wharf. Expected completion 1980.

Blyde Wharf: West side of the wharf: length, 426 m., width of apron, 19 m.; width including open storage, 82 m.; depth alongside LWOST, 11 m. Rail and road transport may be used to load and discharge cargo. Open hard standings for transit cargo storage are available, a small container facility is provided.

East side of the wharf: Length, 80 m.; width, 5.5 m. and 13.4 m.; depth alongside LWOST, 5.5 m. Road transport only. For use by oil field supply vessels.

One mobile Lima heavy lift crane capacity 70 tons at 12 ft. from wharf edge to 25 tons at 40 ft. from wharf edge available at No. 2 berth, with restricted loading may be used on Blyde No. 1 also.
STEVEDORES: Labour must be engaged between 0700–0900 hrs. Monday to Friday. Agents should be advised ETA at least 24 hours, preferably 72 hours, in order arrange cargo if vessel loading. Normal cargo working hours Monday–Friday 0700–1200, 1300–1700 hrs. Saturday 0700–1200 hrs. Supplementary hours may be worked Monday–Friday. 1700–2300 hrs. if labour available. No work on Sundays.
MEDICAL: Hospital services available.
TANKERS: Black oils 10 in. pipe-line; white oils 8 in. pipe-line. 3 of 4 berths available for tankers, max. draft 30 ft. (9.15 m.). Private de-ballasting tank available 8,000 tonnes. Condensate S.G. 0:7738 Loading rate about 1,250 t.p.h.
DENSITY: Sea water.
FRESH WATER: Available all berths from main supply at about 100 t.p.h. Cost 56 cents per metric ton.
FUEL: Light fuel oil pipe-line connected all berths, except Blyde Wharf. Gravity fed at about 100 t.p.h. Can be arranged at 24 hours notice.
FIRE PRECAUTIONS: Tanker berths closed to public with Harbour Board watchman in attendance.
GANGWAY/DECK WATCHMEN: Available but not necessary.
OPENING/CLOSING HATCHES: Stevedores must carry out this work.
CERTIFICATES:
Normal Safety Certificates.
Ship's Register.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
CONSULS: None available locally.
REPAIRS: All repairs except underwater work of a major nature.
REPATRIATION: Facilities exist.
AIRPORT: 7 miles from city, 10 miles from port. Served by domestic service only, 2 flights Northbound and Southbound each daily.
TIME: 12 hours ahead of GMT. N.Z. Daylight time observed.
HOLIDAYS: New Year's Day; 2nd January; Stevedores Picnic (4th Monday in January); Waitangi Day (6th February); Provincial Anniversary Day (2nd Monday in March); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day.
POLICE/FIRE/AMBULANCE: Telephone numbers respectively, 75449, 75505, 75439.
TELEPHONES: Can be connected on board.
GENERAL: Ship's garbage must be in covered containers supplied by Harbour Board and removed daily. Any meats on board vessel on arrival which have been supplied from other than Australia or New Zealand will be sealed off and fresh supplies obtained.
SHORE LEAVE: No restriction.
DEVELOPMENTS: New reclamation of 23 acres providing berths for 2 overseas vessels. Is now fully operational. These berths are suitable for handling heavy lifts. PAD type roll-on/roll-off vessels, limited container use and a container cleaning installation is provided.
AUTHORITY: Harbour Master, Taranaki Harbours Board.

AGENT: Newton King Ltd., Shipping Department, 232 Devon Street East, (PO Box 244), New Plymouth, New Zealand. Telegrams, "Kingship". Tel. 75719 (10 lines) Business, 83174 Residence. Telex, N.Z 3275, Answerback "Newking".

ONEHUNGA: 36.56 S. 174.47 E. (See Plan Book)

PORT LIMITS: All that area of water contained within an area bounded to seaward by an arc of a circle 4 miles radius from the Southern extremity of Paratutai Island.
DOCUMENTS: See "Auckland".
PILOTAGE: Not compulsory, but arrangements can be made with the Harbour Master at Auckland to supply the services of a Pilot if required. A Pilot will then board a vessel off Te Pirau, situated about 2 miles N.E. of South Head main light.

Pilotage District: All those waters of the Manukau Harbour contained within a line drawn 180° to the South shore from Jackie Hill on Kaiteke Point 015.5° – 2.85 miles approximately from the Southern extremity of Paratutai Island.

The signal station is equipped with both medium frequency and VHF radiotelephone. Call sign is "Manukau Harbour Radio" and VHF Channel, 10, 11, 12, 13, 14 and 16.

Listening watches are maintained as follows—
0800 to 0830 – Call 2182 kHz, work 2012 kHz.
0830 to 0900 – Calling and working 2012 kHz.
1800 to 1830 – Calling 2182 kHz, working 2012 kHz.
1830 to 1900 – Calling and working 2012 kHz.
0800 to 0900 – VHF Channel 16.
1800 to 1900 – VHF Channel 16.
Other times by arrangement.

Note: Should a vessel be crossing the bar during the scheduled watch periods, the signalman will be working on 2012 kHz with that vessel and not listening on 2182 kHz.

Vessels equipped with radiotelephone must maintain contact with the signal station while working the bar.

Weather conditions permitting, information concerning bar conditions will be supplied on request to the signal station. Such information can only be regarded as a guide, as observations are made from the signal station which is situated about 5 miles from the bar and elevated 243.84 m. (800 ft.).

Radiotelephone – Onehunga: A radiotelephone is installed at the office of the Officer-in-Charge at Onehunga. The call sign is "Onehunga Harbour Radio" and the working frequency 2012 kHz.

Vessels equipped with radiotelephone, when within Puponga Point, must maintain a listening watch on 2012 kHz for information relative to berthing, harbour traffic or other harbour conditions.

No regular watches are maintained.
ANCHORAGES: After crossing the bar it is not advisable to anchor until after rounding Puponga Point, if proceeding to Onehunga; or after rounding Kauri Point (situated about 15 miles S.E. of Puponga Point), if proceeding to the Southward.

Prohibited anchoring and fishing area: Within an area extending 2 miles from Destruction Gully front beacon in a 182° direction and having a width of 152 m. (500 ft.) on each side of the transit of Destruction Gully beacons.

Prohibited Anchorage: Within 91 m. (300 ft.) of a sewage submarine pipe-line laid in a 152° direction across Wairopa Channel about 1 mile Westward of Onehunga Wharf. On the Northern shore, 2 white triangular beacons, each bearing the word "Sewer" in black letters, mark the middle of the prohibited anchorage. The pipe-line lies approximately 3 m. (10 ft.) to the Eastward of the beacons when in transit.

Prohibited Anchoring and Fishing Area: Anchoring and fishing are prohibited within an area bounded by a line commencing at the South end of Renton Road (Lat. 37° 00.08′ S., Long. 174° 45.2′ E.); thence running 180° for 2,590 m.; thence 090° for 5,291 m.; thence 050° to the shore. The Northern boundary commences at Nganui Point (Lat. 37° 00′ S., Long. 174° 48.4′ E.); thence 090° to the opposite shore.

The above area, adjacent to Auckland International Airport, is marked by following lights and beacons, bearings and distances from Aero light (37° 00′ 48″ S., 174° 47′ 31″ E., approx.).

Light F. 058° 45′ – 1,936 m.
Beacon 259° 30′ – 3,185 m.
Beacon 220° 45′ – 2,848 m.
Beacon 183° 15′ – 1,890 m.
Beacon 143° – 2,317 m.
Light Beacon Qk.Fl. 239° – 3,642 m.
Light Beacon Fl.R.2 secs. 122° 45′ – 3,466 m.
Light Beacon Fl.R.2 secs. 112° 45′ – 3,261 m.
Light Beacon Fl.R.2 secs. 108° 30′ – 2,453 m.

RESTRICTIONS: Berthing and unberthing during the hours of darkness is not recommended.

	Controlling Depths Below Chart Datum	*Nature of Bottom*
Entrance to port (Southwest Channel)	5.48 m.	Sand.
Anchorages	5.486 m. – 7.62 m.	Mud, Shell, and sand.
Channel	3.048 m.	
Approaches to berth	3.048 m.	
Berth (Onehunga)	3.3 m. – 4.7 m.	

MAX. SIZE: LOA, 95 m. Beam, No limit. Draft 4.7 m.
HEALTH: See "Auckland".
RADIO: See "Auckland".
VHF: See "Pilotage".
RADAR: No radar.
TUGS: 1 twin screw *Manukau* is available. 52.5 tonnes gross, 400 b.h.p., static pull 3.5 tonnes. Tug is equipped with both medium and VHF Radiotelephone.
BERTHING: The principal wharf is situated at Onehunga and is a ferro-concrete structure 293 m. in length which includes a launch jetty of 17 m. at the Eastern end, and with a width of 49 m. A grid for the use of small craft has been constructed immediately North of the wharf. There is a small jetty at Cornwallis.

The deck level of the wharf is 6.401 m. above chart datum.

The wharf is connected to the railway system and the distance from the outside face of the wharf to the centre of the railway track is 3.73 m.
CRANES: No quay-side cranes. Two 12.5 tonne capacity mobile cranes available. For heavier loads cranes available for hire from outside port.
BULK CARGO FACILITIES: Eastern end of quay is equipped with a pipe-line for the discharge of bulk cement to adjacent privately owned silos.
SPECIALISED CARGO HANDLING FACILITIES: No facilities.
BRIDGES: None.
STEVEDORES; Arranged by Agents. See "Auckland".
MEDICAL: See "Auckland".
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Boiler fuel oil, diesel oil, and lubricating oil are available from tank wagons; delivery at the rate of 13,500 litres per hour through a 50 mm. hose. Coal is not kept in stock but can be obtained.
CONSULS: See "Auckland".
REPAIRS: Outside firms are available to do machine shop and foundry work.
DRY DOCKS: No facilities.
SURVEYORS: See "Auckland".
GANGWAY/DECK WATCHMEN: See "Auckland".
HATCHES: See "Auckland".
CUSTOMS ALLOWANCE: See "Auckland".
CARGO GEAR: See "Auckland".
REPATRIATION: Full facilities exist.
AIRPORT: 8 km. from port. Served by major international airlines.
TIME: See "Auckland".
HOLIDAYS: See "Auckland".
POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.
SERVICES: No special services.
SHORE LEAVE: Crew members may go ashore.
REGULATIONS: See "Auckland".
IDENTIFICATION CARDS: Not required.
DELAYS: Seldom any delays.
DEVELOPMENTS: None currently in progress.
AUTHORITY: Auckland Harbour Board.

OPUA: 35.19 S. 174.07 E. **(See Plan Book)**

PORT LIMITS: Commencing at Northern extremity of Cape Wiwiki, thence by a right line to the Eastern extremity of the Nine Pins, thence by a right line to the North Western extremity of Cape Brett.
DOCUMENTS: See "Whangarei".
PILOTAGE: Compulsory Southward of a line from the Western extremity of Kororareka Point following a true bearing of 253° towards the flagstaff at Waitangi Treaty House. Pilotage shall be optional within the waters contained Northward of the above mentioned line and Westward of a line commencing from the Eastern extremity of Tapeka following a 350° True bearing to the Eastern extremity of the Black Rocks, thence in 271° True direction to the mainland. Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal weekday working day. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies Harbour By-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth. Pilot vessel under private contract – No VHF contact — Pilot from Whangarei.
ANCHORAGE: Renown Anchorage as per Bay of Islands Chart N.Z. 5122.
RESTRICTIONS: Veronica Channel dredged to 7 m. at Chart Datum. Maximum Draft is 8.53 m.
RADIO: See "Whangarei".
TUGS: Available by arrangement with Northland Harbour Board, Whangarei. At least 72 hours notice required.
BERTHING: Total length 214 m., width 12.5 m., overseas berthage on Eastern side of wharf. Depth at berth is 9.45 m. at MLWS. Wharf is serviced by rail.
CARGO HANDLING: Ships own gear. 2 permanent gangs available subject to Stevedore requirements as per Whangarei.
MEDICAL: Hospital and Ambulance at Kawakawa, 12.8 km. (8 miles) from Opua. Port Doctor at Paihia, 8 km. (5 miles) away.
DENSITY: 1025.
FRESH WATER: Fresh water available – 200 tonnes in storage. 40 cents per 1,000 litres.
FUEL: By arrangement with Oil Companies via road transport.
CUSTOMS ALLOWANCE: See "Whangarei".
CONSULS: See "Whangarei".
REPATRIATION: See "Whangarei".
TIME: See "Whangarei".
HOLIDAYS: See "Whangarei".
POLICE/AMBULANCE/FIRE: See "Whangarei".
TELEPHONES: Telephones available.
SHORE LEAVE: See "Whangarei".
SURVEYORS: See "Whangarei".
AIRPORT: See "Whangarei".
REGULATIONS: See "Whangarei".
DELAYS: See "Whangarei".
AUTHORITY: Northland Harbour Board.

OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): 45.46 S. 170.43 E. **(See Plan Book)**

PORT LIMITS: The harbour limits are defined by a line extending from Heyward Point Trig Station in an 020° T direction for 3 miles thence 126° T for 1.75 miles thence 200° T to the shore off Howlett Point.
DOCUMENTS: See "Auckland".
PILOTAGE: Address "Harbour Master, Dunedin." Through coastal radio stations ZLW (Wellington) or ZLB (Awarua) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. Subsequent contact with port private radio station Taiaroa Heads on 2182 kc/s. or VHF Channel 16. Pilot boat is 16.76 m., white launch, also fitted with same frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 170° distant 2 miles; good anchorage with Taiaroa Head Lighthouse bearing 160° – 2 miles, depth 12 fathoms. Pilots can board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 hrs. in order to be alongside berth ready to take labour on board at normal commencing hour of 0700 hrs.
ANCHORAGES: With Taiaroa Heads Lighthouse bearing 160° distant 2 miles, good holding ground in all weathers, safe except in very strong Easterly gales which are extremely rare. If this position is already occupied by another vessel, there is ample room close Westward, Northwestward, and Northward. Depths 12 to 16 fathoms.
RESTRICTIONS: Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Otherwise ships are not boarded between midnight and 0500 hrs. as no working time is gained by so doing, unless vessel requires HW for transit.
MAX. SIZE: For berthing at *Port Chalmers:* Max. draft 11.58 m. at high water, 10.97 m. at low tide. Channel is worked as required by circumstances; it is not restricted to slackwater. Max. size of ship 259 m. length, larger vessels will be considered individually

For berthing in the upper harbour at *Dunedin* or *Ravensbourne,* max. draft 7.92 m. high water, 6.4 m. zero tide; max. length 184 m.
HEALTH: Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting free pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if free pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.
RADIO: Through Awarua Radio ZLB or Wellington Radio ZLW.
RADAR/VHF: Port radio station at entrance Taiaroa Head (Harbour Radio) maintains 24-hour watch on R/T 2182 kc/s. and VHF Channel 16. Radar operated at station on request has range in excess of 20 miles to North and East.
TUGS: Tugs used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.
BERTHING: Some restrictions for larger vessels berthing with flood tide at Beach St. Wharf Port Chalmers.
CRANES: 2×5 ton electric cranes at Beach Street Wharf, Port Chalmers and 4×5 ton electric cranes at Dunedin (2 cranes in tandem may lift 9 tonnes).

The Container terminal is equipped with 2 Vickers Hoskins Paceco 40 tonne Mach Container Gantry Cranes with an outreach of 33.22 m. and a backreach of 10.67 m.
STEVEDORES: Labour for Saturday work must be ordered by 0830 hrs. Fridays, otherwise by 1430 hrs. for following day. Advise Agents of firm ETA in time to judge this. Evening shift work to 2300 hrs. can be arranged when labour available.
MEDICAL: Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available.

Top priority given arrangements for landing urgent cases for medical treatment.
TANKERS: Diameter of lines 200 mm.; minor slop facilities only; one tanker discharge berth 222.5 m. long, 8.53 m. depth alongside at low water. Max. size ship 184 m. long; draft for channel transit 7.92 m.
DENSITY: Harbour density 1024 all states of tide.
FRESH WATER: Fresh water available all berths, approx. delivery rate 20 t.p.h.
FUEL: Bunkers available at oil berth; all grades up to 1,000 secs. Redwood.
GANGWAY/DECK WATCHMEN: Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by oil company. Ships required to maintain own gangway surveillance.
OPENING/CLOSING HATCHES: Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.
CERTIFICATES: Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Rats) or Exemption Certificate.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required for British subjects. Alien identification cards to be retained on board in case of need.
CONSULS: Consular Agencies: France, Norway, Denmark, Sweden, Germany, Italy, Netherlands, Portugal.
REPAIRS: All types deck and engine repairs possible; good machine shops, etc.
DRY DOCKS: None.
REPATRIATION: Repatriation arrangements can be made.
AIRPORT: Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes from Dunedin City by car.
TIME: N.Z. Standard Time throughout year is GMT plus 12 hours, except that Summer time now operates from last Sunday in October to first Sunday in March. (Add 1 hour).
HOLIDAYS: As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic day (Monday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday. General cargo not worked on these days nor on Sundays: tankers discharge 365 days: ships arrive and depart regardless of holidays. Container ships worked all days except Good Friday and Anzac Day.
POLICE/AMBULANCE/FIRE: Police 776011; Ambulance 777111; Fire Brigade 779111; Hospital 740999; Emergency (serious) dial 111 and ask for any service needed.
TELEPHONES: Slot telephones can be put on board with all local calls free, others by cash in slot.
GENERAL: No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 1.52 m. and 2.44 m.).
SERVICES: Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available.
SHORE LEAVE: Crew members not restricted ashore.
REGULATIONS: No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.
DELAYS: Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 762 mm. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.
AUTHORITY: Otago Harbour Board.

PICTON: 41.17 S. 174.00 E. (See Plan Book)

PORT LIMITS: A straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore of the mainland. A straight line drawn between East Head and West Head, Tory Channel Entrance.
DOCUMENTS: See "Auckland".
PILOTAGE: Pilotage is compulsory inside a straight line drawn in a 180° direction from Snake Point to the opposite shore, including all the waters of Tory Channel. Pilotage in the Outer Reaches of Queen Charlotte Sound and in Pelorus Sound is optional. Unless otherwise requested, Pilot will board vessels between Long Island and Motuara Island. By arrangement with the Harbour Master, Pilots will board vessels 7 cables East of Snake Point, where a Pilot is not required in the optional pilotage area. By arrangement with the Harbour Master, vessels may enter and leave via Tory Channel, subject to weather, when Pilot will board and leave 1 mile S.E. of West Head Light. Application for a Pilot must be made at least 4 hours before the estimated time of arrival. For vessels arriving at night or during the weekend, application should be made no later than 1530 hrs. on the last previous working day. Pilot boat 14.6 m. in length equipped with VHF radio Channel 16. Call sign "Picton Pilot Launch".
ANCHORAGE: Except during strong N.W. winds, there is a good anchorage Northward of Mable Island in 16 fathoms for vessels of all sizes.

Quarantine Anchorage. Within the navigable area to Westward of Mable Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mable Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.
RESTRICTIONS: Controlling depth in approaches to anchorage is 13 m. MLWOS.
MAX. SIZE: Max. length 201 m. Draft, 11 m. aft, 8 m.–10 m. forward depending on length. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.
HEALTH: First entry at a New Zealand port pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the quarantine anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further pratique is required.
RADIO: Port is equipped with medium frequency and VHF, call sign "Picton Harbour Radio", calling frequency 2182 kc/s. Watch is maintained Monday to Friday, 0900 to 0933, 1140 to 1203, 1540 to 1603 hrs. daily and at other times by arrangement. In addition the following schedule is maintained for communication with the road/rail ferries: 0103, 1140, 1640, 2020, 2050 hrs. Sundays only: 1603 hrs.
TUGS: None.
BERTHING: One overseas wharf 240 m. length with accommodation for two vessels. Depth at wharf up to 11.58 m.

Two road/rail ferry berths 152 m. long with modern terminal facilities for roll-on/roll-off traffic.
STEVEDORES: Agents will provide gangs and other facilities provided Master gives prior notice of his requirements.
MEDICAL: It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at the port and the main hospital at Blenheim, 35 km. by road. Ambulance service available.
DENSITY: 1025.
FRESH WATER: Supplies available at 30 t.p.h. Cost 22 cents/1,000 litres.
FUEL: By tank wagon only.
GANGWAY/DECK WATCHMEN: Required by general harbour regulations and is generally carried out by ship's deck hands.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: See "Auckland".
CARGO GEAR: Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.
IDENTIFICATION CARDS: Not required.
CONSULS: At Wellington.
REPAIRS: Small repairs undertaken by three companies.
REPATRIATION: Crew changes can be made.
AIRPORT: Woodbourne – 22 miles by road from Picton, served by feeder services to Wellington – Christchurch. Local seaplane service from Picton Harbour.
TIME: GMT plus 12 hours, Daylight saving time, plus 1 hour, in force from October to March.
HOLIDAYS: New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, Watersiders' Workers Picnic Day, New Zealand Day.
POLICE/AMBULANCE/FIRE: Police, tel. 439; Ambulance, through doctor or in case of emergency tel. 207; Fire, ring exchange operator.
TELEPHONE: Facilities exist to place telephones on board.
SHORE LEAVE: Allowed.
AUTHORITY: Marlborough Harbour Board.

TAURANGA (Mount Maunganui): 37.39 S. 176.11 E. (See Plan Book)

PORT LIMITS: An arc of a circle of 2 nautical miles radius running from the landward boundary of the foreshore on Matakana Island, and thence into the Bay of Plenty to a position intersection of a right line with North Rock Light, bearing 273°; thence to North Rock Light; thence in a 180° direction to the landward boundary of the foreshore, and having as its centre, trig. station A, Mount Maunganui, Block 6 Tauranga Survey District.
DOCUMENTS:
3 Crew Lists
3 Passenger Lists
1 Search List (on regulation form)
1 Bonded Store
1 Gift List
1 Inward Report Check List (C. Form 98)
1 Declaration by Master of Restricted Immigrants
1 M.O.T. Declaration of Safety Certificate
1 Maritime Declaration of Health
1 Cargo Manifest (for each Port of discharge)
1 De-Rat
1 Clearance, Last Port
1 Poisons on Board
1 Firearms on Board
1 Ship's Papers
PILOTAGE: Pilotage is compulsory for merchant vessels of over 100 tons net tonnage; Pilot boards vessel about 2 miles N.E. of North Rock light structure. If due to adverse weather conditions, the Pilot is unable to embark, the pilot launch may, in certain circumstances, lead the vessel into smoother waters and embark abreast No. 2 light buoy. All vessels inward bound must give 24 hours notice by radio of their expected time of arrival off the port limits. If bound from Auckland or near ports, vessels send their expected time of arrival immediately on departure from that port.

A second message confirming or amending the first is to be sent 4 hours before the ETA. Should, however, the vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before the ETA given in her original message.

All communications, which should be addressed to "Harbour Master, Tauranga", will be attended to at all hours of the day or night.

The pilot launch, which is 15 m. in length, is painted white and equipped with R/T 2182 kHz, 2162 kHz, and 2012 kHz, VHF Channels 16, 14, 12, 8 and 6, and radar.

Vessels awaiting to enter Port may find suitable anchorage in 12 fathoms, 2 miles N.E. of Mount Maunganui. The holding in sand and shell is good in all but extreme conditions.

ANCHORAGES: 3 sheltered anchorages are situated in the Western Channel of Tauranga Harbour, these include the Quarantine and Explosive Anchorage, and are available for vessels of 152 m. and a maximum draft of 6.00 m. (H.W.).

RESTRICTIONS: Vessels may enter, berth, unberth, or depart during hours of darkness in fine weather. Tankers are handled during daylight only except tankers in ballast and gas free which may sail at night. Vessels over 95 m. generally enter or depart on HW or LW slack.

MAX. SIZE: Max. length permissible is 225 m. (229 m. at Harbour Master's discretion), no restrictions on beam. Max. arrival and departure draft at high water is 10.7 m. and at low water 9.20 m.

HEALTH: Radio notification to be sent to "Port Health Tauranga", regarding state of health of crew and ETA 24 hours before arrival.

Pratique is granted by Port Health Officer on arrival. Notification should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port. Radio pratique may be granted in case of passenger vessels or such vessels as carry a doctor on board.

RADIO: Nearest coastal radio station to Port of Tauranga is "Auckland Radio" – call sign ZLD.

The Harbour Board Watch Office, call sign "Tauranga Harbour Radio", is fitted with VHF and R/T; a continuous listening watch is maintained on Channel 16 and 2182 kHz.

RADAR/VHF: Radar is fitted to the pilot launch and 1 tug. VHF is fitted to both tugs and pilot launch. Channels 16, 14, 12, 8 and 6 available.

TUGS: 2 tugs are available, each with a bollard pull of approximately 28 and 15 tons. They usually join inward vessels in the vicinity of the Harbour entrance. Tug's lines are normally used, for which there is no extra charge.

BERTHING: Berthing normally takes place 30 minutes after negotiating harbour entrance at HW or LW slack. The quay type concrete wharf 1,842 m. in length, (nominally eleven berths), is fitted with wooden spring piling and rubber buffers. A linkspan is situated in the centre of the wharf area.

A 40 tonne SWL multi-purpose crane is in operation on the Southernmost 100 m. of Mount Maunganui Wharf.

STEVEDORES: ETA to stevedoring companies is usually worked in conjunction with ETA to Harbour Master.

MEDICAL: Unless specifically required for arrival, Agents do not require advice. Local medical practitioners are consulted and services of one public and one private hospital are utilised. Smallpox certificates are required.

TANKERS: Discharge of black and white products is done through a single 2540 mm. pipe-line. The flexible connection between the discharge lines and ship is 2030 mm. There are no slop facilities available.

Chemical tankers are loaded and discharged at the same berth, No. 9, where the max. permissible draft is 9.75 m.

After August 1980 tankers will use the new tanker berth, max. draft 10.7 m.

DENSITY: Salt water, 1025.

FRESH WATER: Fresh water is supplied by pipe-line at 20 tonnes per hour, prior arrangements must be made with the Harbour Master for quantities in excess of 1,000 tonnes.

FUEL: Bunkering connections are placed at Nos. 1, 2, 3, 4, 5, 6 and 9 berths. Quantities of L.F.O., 200 secs, Redwood No. 1 and H.F.O. 1,000 secs, Redwood No. 1 can be supplied by prior arrangement with the Oil Companies.

FIRE PRECAUTIONS: In addition to the normal precautions, a fence is erected around tankers to prevent unauthorised access to the berth. A Watchman from the Harbour Master's Staff is also placed on duty at the gate. Both tugs are equipped for fire-fighting.

GANGWAY/DECK WATCHMEN: Ship's watchmen are usually employed by overseas ships.

OPENING/CLOSING HATCHES: Usually performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco. 1 part bottle of spirits or wine.

IDENTIFICATION CARDS: Not required.

REPAIRS: All types of engine and deck repairs are possible. A slipway can take vessels of 610 tonnes displacement and up to 56 m. length.

REPATRIATION: All facilities exist.

AIRPORT: The airport is situated 1.6 km. from the wharf and is served with regular internal flights to other main centres where overseas flights may be connected with.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day and Anniversary Day, both in latter part of January; Waitangi Day, 6th February; Good Friday; Easter Monday; Anzac Day, 25th April; Queen's Birthday, 1st June; Labour Day, 26th October; Christmas Day and Boxing Day (12 days).

POLICE/AMBULANCE/FIRE: All connected through automatic exchange. Emergency No. 111.

TELEPHONES: Telephones are placed on board all ships when they arrive.

SERVICES: Local compass adjusters and Surveyors are available. Ships stores can be provided by local Providore firms. Fumigation can be arranged. Ships' garbage is collected daily. No facilities for discharge of tank washings exist.

SHORE LEAVE: Crew are permitted ashore at Master's discretion.

DEVELOPMENTS: A bulk cement and tanker berth is under construction and due for completion in August 1980.

AUTHORITY: Bay of Plenty Harbour Board. Mount Maunganui.

AGENT: Russell & Somers (Bay of Plenty) Limited, 194 Maunganui Road, POB 5087, Mount Maunganui. Tel. 53059. Telex: 2942 "Lumberco". Cables: "Rusticated" Mount Maunganui.

TIMARU: 44.24 S. 171.19 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory, and Pilots are available day and night. A vessel requiring a Pilot should remain 1.5 miles seaward of Eastern Extension Mole, near and to South of entrance beacon. Vessels should not proceed Northward of line of leading lights on Benvenue Cliff.

ANCHORAGES: A vessel should anchor in a depth of not less than 12.8 m., sand, and Eastward of harbour light structure, and not within 1.5 miles of Eastern Extension Mole.

RESTRICTIONS: Tidal conditions may affect time of entering harbour.

MAX. SIZE: Length, 198 m. O.A. 227 m. if fitted with bow and stern thrusters; Beam, no limit; Max. permissible draft 9.35 m. HWOST. Time of berthing vessels of over 6.4 m. draft will depend on tidal conditions and at Harbour Master's discretion.

HEALTH: Due to exposed nature of anchorage, incoming vessels are examined and pratique is granted after a vessel berths. In event that vessel is quarantined, she will be required to return to anchorage without any contact being made with shore.

RADIO: Timaru Harbour Board has a radio telephone station equipped with both medium frequency and VHF installations.

Call sign "Timaru Harbour Radio", calling frequency 2182 kc/s., working frequency 2162 kc/s. Fixed watches maintained for a period of 15 minutes every 4 hours, e.g.: 0345–0400, 0745–0800, 1145–1200, 1545–1600, 1945–2000, 2345–2400 hrs. (New Zealand Standard Time) and at other times mutually arranged. VHF call sign is "Timaru Harbour", Channels 6, 12, 16.

TUGS: 1 tug, 1100 h.p. and Pilot launch/tug, 500 h.p. available.

BERTHING: Berthing space available, 947 m. with 9.75 m. at LWOST, 197 m. with 9.29 m. at LWOST. and 378 m. with 8.48 m. at LWOST. Loading and unloading by ship's gear; railway lines on all wharves. Rail to Christchurch and Dunedin.

SPECIALISED CARGO HANDLING FACILITIES: *All weather mechanical loaders:* 4 all-weather mechanical meat loaders. Each machine is capable of loading 720 units per hour, to a max. of 2,500 units per hour. Also butter, cheese, frozen vegetables can be handled. Can be used to unload suitable cargoes e.g. fruit.

Ro/ro facilities available for coastal vessels.

Roll-on/Roll-off Container Terminal: Terminal available for handling overseas ro/ro vessels. Port currently handles ScanCarrier ro/ro service to Continent. Discharge and loading by ship's equipment. Containers handled by forklift, crane/ship's gear. Container cleaning and inspection facilities available.

BULK HANDLING FACILITIES: Two silos with total holding capacity of 2,200 tonnes. Loading rate, 300 tonnes/hr. into vessel; into silo 120 tonnes/hr. A modern bulk handling installation with 7 silos providing storage for 8,500 tonnes of lucerne or 9,500 tonnes of grain. Loading in rates by road and/or rail transport, up to 300 tonnes per hour. Ship loading rates, lucerne 680 tonnes per hour, grain 800 tonnes per hour. Inert gas protection provided for lucerne. Wharf conveyor has maximum belt rate of 1,000 tonnes per hour. Plant able to handle lucerne, all grains and certain types of minerals.

Fertilisers and Sulphurs discharged through 6 mobile hoppers 27 cu.m. capacity each.

CRANES: One 20 tonne mobile crane, one 20 tonne crawler crane, one 6.7 ton crawler crane.

STEVEDORES: Gangs must be ordered before 0700 hrs. weekdays, and before 0900 hrs. Friday for Saturday work.

MEDICAL: Full medical facilities are available as required, including an excellent public hospital.

TANKERS: 1 tanker berth, discharge through 8 in. hoses.

DENSITY: Specific gravity 1025 at all states of tide.

FRESH WATER: Available at all berths, delivered at up to 25 t.p.h.

FUEL: Bunkers available, heavy and medium fuel oil. 24 hours advance notice required.

FIRE PRECAUTIONS: When tankers are discharging, access to wharf is prohibited except to those holding passes. Fire-fighting equipment is placed in readiness on wharf.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

SURVEYORS: Lloyd's Surveyor – Captain A. Grieve.

REPAIRS: Most deck and engine repairs can be undertaken.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: Two flights each day to and from Wellington. Christchurch International Airport is 160 km. north of Timaru.

TIME: Approximately March–October New Zealand Standard Time (GMT plus 12). Approximately November–February New Zealand Daylight Saving Time (GMT plus 13). Actual dates of changeover to and from Daylight Saving Time decided annually.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day (port holiday Monday of the week in which 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Dominion Day (third Monday in September); Labour Day (last Monday in October); Christmas Eve (work ceases midday); Christmas Day; Boxing Day. Work can be arranged only by private negotiation on a voluntary basis.

POLICE/AMBULANCE/FIRE: Emergency No. 111 and ask operator for service required. Other than emergency calls: Police, 84-199 Timaru; Ambulance, 80-467 Timaru; Fire Brigade, 7089 Timaru.

TELEPHONES: Can be supplied to vessels at all berths.

SHORE LEAVE: Allowed.

DEVELOPMENTS: The depth in the entrance channel is being deepened to 9.75 m. LWOST.

Planning for heavy duty berth and reclamation areas. Fishing Boat Harbour being developed to service both local and foreign deep sea fishing vessels.

AUTHORITY: Timaru Harbour Board.

WANGANUI: 39.57 S. 175.00 E. (See Plan Book)

PORT LIMITS: Arc of a circle of 3 nautical miles radius centred at the flagstaff at Castlecliff, sited 39° 56′ 49″ S. 174° 59′ 23″ E.
DOCUMENTS: See "Auckland".
PILOTAGE: If Wanganui is first N.Z. port, initial application for Pilot and vessel's ETA should be passed to local Agent by radio through one of three Post Office radio stations. If not first N.Z. port, this information should be given to local Agent by Agent at previous port. Final details settled when R/T contact made between pilot station and ship.

Pilot launch "Karere", LOA, 41 ft. painted white, high midship wheelhouse. Pilot boards at anchorage position. International signals for Pilot should be used if no R/T contact made.
ANCHORAGES: One anchorage for vessels awaiting to enter.
RESTRICTIONS: Port worked day or night at high water when bar conditions are suitable.
MAX. SIZE: Length 350 ft., beam 60 ft., draft dependent on bar depths at particular time but usually 15 ft. max. at high water springs. No installations outside main port area.
HEALTH: See "Auckland".
RADIO: Wellington Radio ZLW. R/T frequencies 2182, 2162, 2012.
VHF: Channels 16 and 14.
TUGS: No tug available. Pilot launch used for swinging.
BERTHING: Berthing takes place at high water slack.
SPECIALISED CARGO-HANDLING FACILITIES: *No. 6 Berth:* pipe-line for bulk cement connecting wharf with adjacent silos.

No. 1 Wharf: direct handling into cool store for fruit.

Portable hoppers used for bulk cargoes to load directly into road trucks.

There are no facilities for containers, roll-on/roll-off traffic, liquid chemicals or LPG carriers.
CRANES: One mobile crane, capacity 4 tons.
STEVEDORES: Requirements for labour should be given with ETA and request for Pilot. At least 24 hours notice required.
MEDICAL: 24 hours notice required if possible. Hospital facilities available. Inoculations, certificates, etc.
DENSITY: 1020 at HW. 1005 at LW. These figures vary greatly according to amount of freshwater in river.
FRESH WATER: Plentiful supply through wharf hose connections. Rate of delivery depends on height of ship's filling pipe above wharf level.
FUEL: All grades available but ship has to pump out of road tankers. Amount of notice depends on grade required.
GANGWAY/DECK WATCHMEN: Watchman necessary, either crew member or shore watchman.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: Minor deck and engine repairs possible.
REPATRIATION: Facilities exist but more easily accomplished at a main port.
AIRPORT: About 6 miles. Airport caters for internal services only.
TIME: N.Z. Standard Time (12 hours in advance of GMT). N.Z. Daylight time (13 hours in advance of GMT) is kept from last Sunday in October until first Sunday in March.
HOLIDAYS: As Auckland, except Anniversary Day holiday which is that held in Wellington Province. No cargo is worked on these days.
POLICE/AMBULANCE/FIRE: Ambulance, 53909; Police, 54488; Fire Brigade, Wanganui, 58505; Fire Brigade, Emergency 111.
TELEPHONES: Arrangements can be made for placing telephones on board.
SHORE LEAVE: Allowed.
DELAYS: Fresh onshore winds could make entrance unworkable for a vessel waiting to enter. Cargo work stops in rain and in unusually strong wind. Bunkering would be slow if large amount of bunkers required.
DEVELOPMENTS: Development plan in course of preparation but as yet no details of size of any possible new installations or draft increases.
AUTHORITY: Wanganui Harbour Board.

WAVERLEY HARBOUR, North Island:
39.50 S. 174.37 E.

LOCATION: Waverley Harbour is located on the West coast of the North Island of New Zealand in the Northern end of the South Taranaki Bight.
PORT LIMITS: Waverley harbour is defined as being all that area of water bounded by the line of mean high water spring tides, and having as its seaward limit the arc of a circle of 2 nautical miles radius centred at 39° 49.6′ S. 174° 36.5′ E, near the mouth of the Wairoa Stream.
DOCUMENTS: Besides the Port Health Doctor, other Government personnel boarding the vessel by helicopter for inward clearance are: 1 Port Health Officer, 1 Customs Department Officer, 1 Agriculture Department Officer.

Port Health Officer will inspect Deratisation Certificate and (possibly with Agriculture Officer) inspect food store rooms, refrigerated spaces, galley, pantry, etc.

Customs Officer: The Customs Boarding Officer acts for the Immigration Department and the Marine Department and will inspect the following ship's documents: Register, Loadline Certificates, Safety Equipment Certificates, Radio Certificates.

The following documentation is required on Inward Clearance:

1 copy Form 1A General Declaration
1 copy Form 1B Cargo Declaration
1 copy Form 1C Crew List
1 copy Form 1D Passenger List
1 copy Form 3A Ship's Stores List
1 copy Reg Form 2 Search List
1 copy Declaration re Safety Certificates
1 copy List of Poisons
1 copy List of Firearms

For Outward Clearance (Customs):

2 copies Form 1A General Declaration
2 copies Form 1B Cargo Declaration
2 copies Form 1C Crew List
2 copies Form 1D Passenger List
2 copies Form 3A Stores List
1 Passenger Arrival Card for any Crew or Passenger leaving vessel.

Agriculture Officer: on arrival:

2 copies of Ship's Meat Locker
Reg. 1966 Agl. 36.

The Boarding Officer will inspect the vessel's meat locker and inspect the garbage containers.

Australia, United States, Canada and New Zealand meat not loaded in the place of origin, and Japanese meat will be sealed up on vessel's arrival by the Agriculture Officer.

At sailing time, the Agriculture Officer may attend to check on garbage, sealed lockers, etc., together with the Customs Officer, who issues the Port Clearance, to check if all crew are aboard, and that the Bonded Stores Seal is intact.
NAVIGATION AIDS: SBM – radar reflector, white flashing light, one flash every 9 seconds, range 6 miles.

Leading Lights: In transit bearing 355° 33′.
Range Lights: In line bearing 312° 03′.

All four light towers are of louvred timber construction, painted white with vertical centre line painted red.

The pumphouse building immediately to the West of the two leading lights is prominent with a radar visibility to 15 miles.

PILOTAGE: Pilotage is compulsory for Waverley Harbour and under control of the Waverley Harbour Master.

It has become customary for vessels to await the Pilot in a position 2 miles South of the SBM. Vessels equipped with VHF will be contacted accordingly when within range. Information on weather conditions and time of Pilot boarding will be advised through this media.

Due to the nature of the coastline adjacent to Waverley Harbour and the weather conditions experienced, the transportation of the Pilot (and other port official personnel) is effected by helicopter, from a pad adjacent to the Administration building. It must be ensured that radio antennas running respectively from foremast to bridge and bridge to aft, as the case may be, are lowered clear in good time prior to the arrival of the helicopter and the landing area cleared of loose gear and portable foam fire equipment properly charged, available for immediate use at the landing area.

Berthing to the S.B.M. is normally effected in daylight only, dependent on weather conditions, visibility and flying conditions being acceptable to the helicopter pilot and in concurrence with the Master of the vessel.

For night flying a wind sock will be erected for the helicopter pilot's observation of wind direction, and vessel is to be floodlit overall.
ANCHORAGE: The recommended anchorage off the port is a rectangular area 0.75 miles East and West, and 1 mile North and South of a position 3 miles South of the SBM. The bottom is sandy in 11 to 12 fathoms and the holding ground is reported fair.

A safe anchorage for vessels having to leave the buoy and/or to await suitable weather to moor to the buoy is recommended in Golden Bay. Distance is approximately 90 miles S.W. of Waverley, the approaches are clear and the lights on Farewell Spit and Separation Point, of 15 miles and 12 miles respectively, most reliable. The holding ground is good and depth of water 15 to 16 fathoms.
WEATHER: The Harbour and SBM is exposed to the West through South to South-east. The swell conditions caused by Westerly and South-westerly weather are considerably reduced by the shallow ground to the Westward, but Southerly swell rolls in unhindered. Very sudden changes of weather are experienced on this coast with the rapid movements Eastward of cold fronts over the Tasman Sea.
PRATIQUE: Vessels arriving at Waverley on consecutive voyages Japan/New Zealand and with all personnel holding valid International Certificates for smallpox should radio to "Health, Wanganui" 24 hours before arrival Waverley, advising number of passengers and crew, and "All Healthy" in which case pratique is automatically granted without any acknowledgement to the vessel.

If a vessel has any suspected diseases on board and if any crew member does not hold a valid International Certificate for smallpox, this information should be stated in the radio message to "Health, Wanganui". The Port Health Doctor will then attend on board on arrival for inspection of all International Health Certificates, and carry out vaccinations as required.

The doctor will supply on arrival N.Z. Maritime Declaration of Health Form H-Q2 for completion by the vessel. It is customary to procure an additional form for the following voyage to facilitate easy inward health clearance thereafter.
RADIO: There is no Government Radio Station at Waverley. Vessels trading to Waverley use ZLD Auckland Radio, ZDB Awarua Radio, or ZLW Wellington Radio.

Advice of Arrival: Vessels to radio ETA to "Wavemarine" Waverley on departure from last port, and 48 hours and 24 hours prior to arrival.

In addition to the vessel's ETA to "Wavemarine", arrival draft and details of the hatch loading plans should be advised.

Vessels equipped with VHF should listen in on Channel 14 (156.7 mHz) when in range of Waverley Harbour.

Base Station is at the Shiploading Pump Station, on board the tender vessel *Otapiri* and a remote control unit is fitted in the main administration building. Mobile units are also employed during the loading operation.

Base Station Channels are:

Channel 6 – 156.3 mHz Intership.
Channel 9 – 156.45 mHz Private and Loading.
Channel 14 – 156.7 mHz Port Operations/Docking.
Channel 16 – 156.8 mHz Safety.

Meteorological information for shipping is broadcast by the Coast Radio Stations ZLW, ZLB and ZLD at frequent scheduled times. ZLW broadcast by radio telegraph on 417.5 kHz, ZLD 487.5 kHz.

BERTH DESCRIPTION: The single point mooring buoy of 11 m. diameter is moored in 57 ft. at low water, 1.5 miles from the shore in position 39° 51′ 02.2″ S. 174° 35′ 52.14″ E.

BERTHING: Vessels will be secured to the S.B.M. by a single 21 in. nylon hawser with chafing chains at each end.

When the carrier approaches the buoy, the tender vessel "Otapiri" will receive a 3 in. messenger rope from the carrier. "Otapiri" will then shackle the messenger to a 10 in. polypropylene pick-up rope. The carrier heaves the messenger and pick-up rope inboard until the chafing chain passes through the bull nose.

Dedicated ships secure the chafing chain to a quick release hook fitted for this purpose.

Ships without a quick release hook should advise "Wavemarine" by radio on departure from last port.

It is essential that two or three good heaving lines be available with the messenger rope in the first instance to pass to the tender vessel, to avoid any delays in mooring.

HOSES: The floating loading hose string comprises eleven 35 ft. lengths of hose, with the shipboard end supported by a steel buoy. After mooring is completed the tender vessel will tow around the floating hose underneath the pick-up derrick, plumbed over the manifold connection on the port side of the foredeck abaft the forecastle head. The pick-up buoy of the hose-end will have shackled into it a 30 ft. length of polypropylene, of 7 in. circumference, to which is attached a 100 ft. length of 2.25 in. circumference for passing to the vessel. The 7 in. polyprop is hove up to the rail and hooked into the vessel's cargo hook. The flange elbow with attached camlock coupling is then hove up and connected to the vessel's deck hose manifold. The hose is presently supported on the ship's derrick and stayed fore and aft after coupling up has been completed.

It has been estimated that after the iron sand slurry has been loaded, and the excess water decanted from the surface of the cargo, that the bulk density of the iron sand should be 190 lb. to the cubic foot.

LOADING: All compartments to be loaded should be clean with all drain sumps and double bottom butterworth hole filter places clear.

If weather conditions permit, the vessel should arrive with the after hatch lid of each hold open to facilitate visual inspections of the hold decanting eductors.

FRESH WATER/FUEL: Not available.

REPAIRS: Emergency repairs can be arranged, including radio.

MEDICAL: The Port Health Doctor is a qualified doctor of medicine and can be acquainted of any medical problems affecting any crew member; the necessary arrangements can then be made for treatment aboard or ashore, as convenient.

CUSTOMS ALLOWANCES: See "Auckland".

CONSULS: There are no consular representatives at the port of Waverley.

REPATRIATION: Lists of personal effects, accounts of wages, etc., of any vessels' personnel left ashore, hospitalised or deserted, should be available to Agent as early as possible.

A letter of authorisation is required if the Agent is to provide accommodation, meals, medical attention, transportation or travel expenses, and/or cash advances for account of vessel.

SHORE LEAVE: Shore leave for vessel's personnel is not practicable.

GENERAL: No Port Authority personnel remain on the vessel during the loading period at the SPM Buoy.

The Marine Department require that all vessels, while moored, "shall at all times be kept in readiness to proceed to sea".

The Pilot who is the loading master for Waipipi Iron Sands Limited will accept the Notice of Readiness for the vessel, and acts as Agent for all the vessels requirements. It is customary for the Pilot/Loading Master/Agent to be accommodated on board the vessel during her period on the buoy.

Whistle signals in an emergency may be used for medical, police, etc., as required.

Storing is accomplished by helicopter, cost of which is borne by the ship.

No garbage is to be thrown over the side of the vessel whilst she is on the New Zealand coast and moored to the buoy. Garbage must be retained on board and not dumped until the vessel is one day's steaming clear of the Northern point of New Zealand.

AUTHORITY: Waipipi Iron Sands Limited.

WELLINGTON: 41.18 S. 174.46 E. (See Plan Book)

PORT LIMITS: All the waters comprised within the harbour of Wellington having as their outward seaward limit the arc of a circle running from the landward boundary of the foreshore at Fitzroy Bay and thence into Cook Strait and thence to the landward boundary of the foreshore at Island Bay, such arc being an arc of a circle 3 nautical miles radius and having its centre at a point on the Outer Rock in the harbour of Wellington.

DOCUMENTS:

Port Health Authorities:

Maritime Declaration of Health (1 copy).

Crew List, stating name, rank, sex, nationality and date of smallpox vaccination. (1 copy).

Port Health Officer will also wish to sight each member of crew's Smallpox Vaccination Certificate.

Current International Derating Exemption Certificate.

Customs Authorities: See "Auckland".

Agent:

Crew List, stating name, occupation, rank, sex and nationality (1 copy).

Freight Manifest (3 copies).

Note: Manifests should be airmailed by loading port to arrive in New Zealand at least one week prior to vessel's arrival.

Stowage Plan, airmailed same as Manifest (2 copies).

Agricultural Authorities:

Port Agriculture Inspection Instructions – Ship's Meat Locker Regulations 1966.

PILOTAGE: Compulsory, pilot vessel is not normally on station outside entrance, and all vessels requiring a Pilot are required to give 24 hours notice by radio of their expected time of arrival off port limits. A second notice confirming or amending the first is to be sent 4 hours before expected time of arrival. In event of a ship expecting to arrive earlier than the time given in 24-hour message, 4-hour message shall be sent 4 hours before the new expected time of arrival. Should vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before expected time of arrival given in her original 24-hour message. All communications which should be addressed "Harbour Master, Wellington", will be attended to at all hours of the day or night.

Should it not be possible to give previous notice of arrival it may be up to 1.5 hours after a vessel is sighted by signal station on Beacon Hill before a Pilot can board.

Pilots normally embark or disembark South of Pencarrow Head, but in the event of heavy Southerly weather, it may be necessary to embark or disembark Pilot in smooth water at or near the compulsory limit.

ANCHORAGES: Depth in anchorages up to 60 ft.

Fairway: Within portion of harbour lying inshore and to Westward of a line drawn from Easternmost point of Oriental Bay, in a 344° direction, to Kaiwharawhara Shore.

Inner Anchorage: Within portion of harbour laying between the Eastern boundary of fairway anchorage and a line drawn from Point Jerningham, in a 354° direction to Kaiwharawhara Shore.

Outer Anchorage: Within portion of harbour Eastward of inner anchorage.

Note: Vessels anchoring in outer anchorage should take up a position well up towards Kaiwharawhara.

Explosives Anchorage: Within that portion of the harbour contained in a circle with a radius of 0.3 nautical miles having as its centre a point bearing 000° true, distant 1.45 nautical miles from Point Halswell Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions.

Caution: It is advisable when anchoring (especially when in light draft) to drop two anchors in an Easterly and Westerly direction, veering from 75 to 90 fathoms of cable, as it frequently blows hard with heavy gusts of wind off the high land that surrounds harbour, causing a vessel to sheer about. In very strong winds a ship will lie much easier by having both anchors down. A strict watch should be kept.

Prohibited Anchorages: Anchorage is prohibited within 500 ft. of the jetty situated on the N.E. side of Somes Island.

RESTRICTIONS: Controlling channel depth is 37 ft. 09 in. below chart datum. All vessels may enter, berth, unberth, or depart during the hours of darkness. Tankers do not usually berth or depart during the hours of darkness. Berthing is carried out at any state of the tide.

Tides: Rise of tide varies between 0.75 m. and 1.35 m. Tidal rate neaps 2 knots, springs 2.5 knots.

MAX. SIZE: Max. draft 33 ft. LW with no swell. Size no limit.

HEALTH: *Health Officer's Examination Ground:* Within that portion of the harbour contained in a circle with a radius of 0.2 nautical miles, having as its centre a point bearing 347° (true), distant 0.56 nautical miles from Point Jerningham Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions. Until pratique has been granted vessels arriving from ports beyond New Zealand must not proceed inwards beyond the limits of this area.

RADIO: Medium frequency; Call sign is Wellington Harbour Radio, calling frequency only 2182 kHz, working frequency 2012 kHz. Vessels working on the port and calling 2182 kHz should listen for reply on 2012 kHz. A continuous watch is maintained on 2182 kHz.

VHF: Call sign "Wellington Harbour Radio", on Channel 16. Working Channel 12 and Channel 14. A continuous watch is maintained on Channel 16.

Port operations. Vessels equipped with radio-telephone when within harbour limits must maintain a listening watch on 2182 kHz or Channel 16 to ensure immediate contact if required. Only calls for information on harbour conditions, berthing or safety of navigation will be accepted.

Vessels are notified of their berth by radio telephone (VHF or MF) or morse lamp from Beacon Hill (viz Wellington Harbour Control). On occasions this may be confirmed by Pipitea Tower.

Note: Beacon Hill and Pipitea Wharf signal stations, pilot launches and tugs are equipped with both medium frequency and VHF radio-telephone. Harbour Master's Office and all Pilots are equipped with VHF radio-telephone.

TUGS: The Harbour Master may direct the Master of any vessel to engage the services of a tug, and also direct the manner in which the tug shall be used. 3 × 2,700 b.h.p. Voith Schneider tugs, guaranteed bollard pull 28/31 tons, speed 12 knots, also equipped for fire fighting and salvage duties. The tugs are owned by Wellington Harbour Board.

*Linkspan variable width 5 flaps to 20 ft. max.
†Linkspan.
‡Linkspan facilities served by rail.

STEVEDORES: Available. No particular ETA advice required except as normally sent by Master.
MEDICAL: 4 hour's notice is sufficient for Agent to mobilise the service concerned. For minor attention it is sufficient that Master advises Agent on arrival. Hospital facilities are available. Current International Certificates of Vaccination against smallpox are required by the Authorities.
TANKERS: Tankers can berth alongside Point Howard Wharf, Aotea Quay, Burnham, Seaview and Miramar Wharves. Side connections are to be used at all wharves. During hours of darkness pipe-line must not be disconnected without first obtaining permission from Harbour Master. All precautions must be taken to avoid oil pollution of harbour. Scuppers must be plugged and sawdust kept at hand in case of spillage.

Point Howard and Seaview wharves are exposed to weather and in the event of a Southerly gale special attention must be paid to vessel's moorings.

No facilities are provided for discharge of tank washings other than when a vessel is on the floating dock.

Details of pipe-lines serving these wharves are as follows: Miramar Wharf, one 8 in. pipe, one 12 in. pipe; Point Howard Wharf, two 10 in. pipes, one 6 in. pipe, four 8 in. pipes, one 9 in. pipe, two 4 in. pipes (chem. products); Aotea Quay, one 8 in. pipe, one 12 in. pipe; Burnham Wharf, one 12 in. pipe (jet fuel).

Seaview Wharf is an oil tanker wharf 97.5 m. in length, berthing dolphins 190 m. apart, mooring dolphins 213 m. apart, size of vessel 213 m. maximum, designed for vessel draft of 12.8 m. (See harbour entrance max. draft).
DENSITY: 1025.
FUEL: Available at tanker discharging wharves.
FRESH WATER: Available at all wharves, delivered by hose (4 hoses per vessel max.), 50 t.p.h.
DRY DOCKS: *Floating Dock:* A floating dock capable of lifting vessel of 17,272 tonnes displacement is available.

Slipway: Patent slipway available to accommodate vessel up to 508 tonnes.

Floating Crane: Harbour board has an 80 ton revolving and self-propelling floating steam crane of sufficient radius and height to serve the largest vessels when floating in light draft conditions.
REPAIRS: Major repairs can be undertaken. There are machine shops and foundries. Diving equipment and the services of trained divers are available for underwater inspections and repairs. Marine Radio and Radar Services, compass adjusters.
GANGWAY/DECK WATCHMEN: Shore watchmen available.
OPENING/CLOSING HATCHES: Work normally carried out by stevedores. Only time crew are to open and close top hatches is when advised by stevedore. In case of hydraulic hatches in tweendecks, crew are to open and close, not stevedores.
CERTIFICATES: Customs Department require ship's Register on arrival. Marine Department require:
- Load Line Certificate.
- Tonnage Certificate.
- Certificate of Registry.
- Convention Certificates, i.e.
  - Safety Equipment Certificate.
  - Safety Radio-telegraphy Certificate.
  - Safety Construction Certificate.
  - Exemption Certificate (if any).
  - If passenger ship, Passenger and Safety Certificate.
  - Cargo Gear Register.
  - Certificates for all Cargo Gear, i.e. runners, spans, shackles, swivels, etc.
- Deratification Certificate.

CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
CONSULS: Arab Republic of Egypt, Argentina, Australia, Austria, Belgium, Great Britain, Canada, Chile, People's Republic of China, Czechoslovakia, Denmark, Ecuador, Finland, France, Federal Republic of Germany, Greece, Iceland, India, Indonesia, Ireland, Italy, Japan, Republic of Korea, Malaysia, Mexico, Netherlands, Norway, Papua New Guinea, Philippines, Singapore, Poland, Portugal, Romania, South Africa, Switzerland, Thailand, U.S.A., U.S.S.R., and Yugoslavia.
REPATRIATION: Facilities are available for crew changes and arranging any necessary repatriations.
SHORE LEAVE: Crew members are allowed shore leave at all times.
AIRPORT: Situated 4.5 miles S.E. of City Wharves by road; regular internal and Australian services.
TIME: Local time is GMT plus 12 hours in Winter, (Daylight saving during Summer months).
HOLIDAYS: New Year's Day (1st January); 2nd January; Wellington Province Anniversary Day (22nd January); Waterside Workers Union Picnic Day (generally observed on Monday of the week 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday Observance (first Monday in June); Labour Day (fourth Monday in October); Christmas Day (25th December); Boxing Day (26th December).
Note: Pilotage services available public holidays. Container vessels at container berths work on public holidays.
POLICE/AMBULANCE/FIRE:

	Routine	*Emergency*
Wharf Police	723-000	Dial 111 and ask operator for service required
Ambulance	722-999	
Fire Brigade	850-188	

TELEPHONES: Vessels may be connected to telephone system at city berths by application to the Harbour Master.
GENERAL: Garbage may only be disposed of in accordance with strict Government regulations. The normal method of disposal is overside to self-propelled garbage vessel in special cans supplied. Daily collections are made or as arranged through the Harbour Master.
SERVICES: *Shore Electricity:* Available at all berths. Type AC, voltage 230-400, cycles 50, amperage 60.
DEVELOPMENTS: *Containers:*

Thorndon Container Wharf situated South of Aotea Quay breastwork has a quay length of 584 m. for two berths, depths at low water 12.5 m. Three container gantry cranes, one transfer terminal container crane, eighteen straddle carriers, five fork lifts, one travel lift, six 20 ton container trailers and thirteen battery fork lifts for vanning operations.

The Wellington Container Terminal area for handling up to 100,000, 20 ft. containers annually will be 60 acres (24.3 hectares) comprising 40 acres (16.2 hectares) operating and marshalling area, 10 acres (4 hectares) rail and road access 9 acres (3.6 hectares) depot working buildings etc. 1 acre (0.4 hectare wash area).

Container stacking: General cargo 2,309, reefer 1,376, empties 1,824, total 5,500 two high.

Kaiwharawhara: Future reclamation for bulk handling container and roll-on berths.
AUTHORITY: Wellington Harbour Board.

WHANGAREI: 35.45 S. 174.21 E. **(See Plan Book)**

PORT LIMITS: From a point due South of the summit of Sentinel Rock, thence to a point 5 cables due East of Sentinel Rock, thence to a point 5 cables due East of Bream Head, thence to a point 5 cables due East of Tutukaka Head, thence to Tutukaka Head.
DOCUMENTS:
- 3 copies Passenger List.
- 3 copies Crew List.
- 1 copy Search List (Form 2).
- 1 copy Stores List (Form 3).
- 1 copy Prohibited and Restricted Immigrants.
- 1 copy Poisons List.
- 1 copy Animals and Birds List.
- 1 copy List of Firearms (not cargo).
- 1 copy Arrival Manifest (Form 1).
- 1 copy List showing the gross tonnage of cargo for discharge in New Zealand.

PILOTAGE: Compulsory. Pilots embark on the line of leads 141°/321° at the seaward extremity of Pilotage District, i.e. up to 1.5 miles South-Eastward of the Fairway Buoy. In heavy Easterly weather, it may be necessary for pilot vessel to lead ship in through the Outer Channel and embark in the lee of Frenchman Island.

Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal week-day working hours. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies a set of Harbour bylaws. Pratique, agriculture and customs clearance is normally undertaken on arrival at berth.

Pilot boat is equipped with VHF. Working frequency is Channel 12, but Channels 6, 8 and 16 are also fitted. Pilot vessel *Manaia* – call sign ZM3830; pilot vessel *Ngapuhi* – call sign ZM2146. Range approximately 20 miles. *Manaia* painted blue, varnished housing, yellow funnel: *Ngapuhi* painted blue, white housing, yellow capping rails – pilot ladder with manropes required.
ANCHORAGE: Is situated 5 to 10 cables. Eastward of the Fairway Buoy in 12 to 20 fathoms (21.63 m. – 36.57 m.) of water in the section enclosed by the Fairway Buoy bearing 225° T to 315° T. Holding ground good in fine sand, but exposed to Easterly weather.
Harbour Anchorage. At Marsden Point, 2 cables West of Passage Island light, in 5 fathoms (9.14 m.) of water. Max. draft 7.31 m. (24 ft.). Good holding ground, sand and shell bottom.

RESTRICTIONS: Controlling depth in entrance channel 15.24 m. (50 ft.) MLWS. Depth in upper harbour channel maintained at 8.53 m. (28 ft.) MLWS.

MAX. SIZE: Marsden Point: Oil Refinery dolphin berths, LOA no restriction, draft 15.24 m. (50 ft.), Cargo berth LOA 182.88 m. (600 ft.), draft 8.52 m. (28 ft.)

Port Whangarei: LOA 182.88 m. (600 ft.), draft 9.44 m. (31 ft.).

HEALTH: All vessels examined by Health Officer on arrival.

RADIO: The station is Marsden Point, Whangarei. Call sign "Whangarei Harbour Radio" Continuous 24-hour watch is maintained on VHF Channels 16 and 12, range 40 miles. Medium frequency, listening watch on 2182 kc/s., working frequency range 200 miles. Station transmits on 2012, 2045, 2162 and 4139 kHz.

RADAR: Tugs and pilot boat *Manaia* fitted with radar.

TUGS: Available. Tugs equipped with VHF. Tugs usually secure to vessels entering in vicinity of Frenchman Island. Numbers of tugs normally used are 1 tug for vessels up to 25,000 d.w.tonnes, 2 tugs for vessels up to 45,000 d.w.tonnes, 3 tugs for vessels up to 65,000 d.w.t. 4 tugs over 65,000 d.w.t. Unberthing: 1 tug is normally required for vessels under 25,000 d.w.t., and 2 tugs for all other vessels, subject weather conditions.

BERTHING: Marsden Point Oil Berths (2) – operated by the New Zealand Refining Company, Marsden Point. LOA no restriction. Max. draft 15.24 m. N.Z. Refining Co., places restrictions on vessels in excess of 125,000 tonnes displacement.

Marsden Point Cargo Berth (1), LOA 182.88 m., max. draft 8.53 m.
Port Whangarei berths (3), LOA 182.88 m., max. draft 9.44 m.
Portland berths (2), bulk cement berth LOA 82.89 m., max. draft 5.63 m. cargo berth LOA 106.68 m., max. draft 5.63 m.

SPECIALISED CARGO HANDLING FACILITIES: Portland bulk cement loading jetty. Port Whangarei, 7 portable hoppers for use discharge of bulk cargoes. Cargon system of butter loading.

STEVEDORES: Confirmation of arrival time 4 hours before ETA or revised ETA, whichever is earlier is required. Notice of arrival during a week-end or public holiday must be given not later than 1400 hrs. on the last working day preceding arrival.

MEDICAL: Hospital and dental services available.

TANKERS: Are berthed at all hours day and night. Vessels of 30,000 d.w.tonnes and upwards are usually berthed portside to berth at slack water, and should position ship's gangway 6.09 m. (20 ft.) upstream of hose connections prior to arrival.

Slop reception facilities are available. Diameter of load and discharge line 10 in. ASA.

DENSITY: 1025.

FRESH WATER: At Northland Harbour Board wharves by hose 20 t.p.h. at 40 cents per 1,000 litres. Refinery jetties limited and arranged by Refinery.

FUEL: Available from berths (viscosities 3,500 secs. red 1. 1,500 secs. red 1 and MDO).

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes or 0.5 lb. tobacco or 50 cigars permitted each crew member. Wine/spirit: one opened bottle wine/spirits for each crew member.

A New Zealand flag ship arriving from overseas may have a concessionary allowance.

IDENTIFICATION CARDS: Refinery passes are required when berthed at the Refinery wharves. Passes are brought on board by Agent.

CONSULS: None.

REPAIRS: Most repairs undertaken.

DRY DOCKS: None. 1 slipway capable of receiving vessels up to 1,500 d.w.tonnes.

REPATRIATION: Facilities exist.

TIME: GMT plus 12 hours. Daylight saving time observed from early October to early March.

HOLIDAYS: The following are recognised holidays: New Year's Day; 2nd January; Anniversary Day (usually last week January); Waitangi Day (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waterside Workers Picnic Day.

POLICE/AMBULANCE/FIRE: Telephone 111 for emergency, and ask for service required.

TELEPHONES: Available at wharves.

SHORE LEAVE: Allowed.

FIRE PRECAUTIONS: Fire fighting tug on duty 24 hours a day. Tankers to have fire wires fore and aft.

SURVEYORS: Lloyds – New Zealand Government, Marine Division of the Ministry of Transport.

AIRPORT: 12.8 km. (8 miles) from Port Whangarei; regular daily internal flights.

SERVICES: Tank cleaning, radio and radar repairs. Compass adjuster from Auckland.

REGULATIONS: Issued by Pilot on arrival.

DELAYS: Tidal delays and berth vacancies.

AUTHORITY: Northland Harbour Board.

NOTES

Please also advise Shipping Guides Ltd.

Nicaragua

CORINTO: 12.30 N. 87.11 W. **(See Plan Book)**

ARRIVED SHIP: Vessels are considered as arrived only after having negotiated the entrance channel and are safely inside the proper harbour; vessels at the Pilot station are not considered as having arrived.

DOCUMENTS:
For the official clearance, the following authorities will board the vessel:
The Port Captain
The Public Health Delegate
The Delegate from the Ministry of Agriculture and Livestock
A representative of the Port Authority
Two Customs Officers
A representative of the steamship agency.

Each vessel must present documents legalised by the Nicaraguan Consul from the port of origin of the cargo as well as from the last port of call before Corinto. The documents required are the following:

From the port of origin of the cargo:

	Legalised	Non-legalised
Cargo Manifest	3	18
Bills of Lading	—	2
Tally Books	—	14

From the last port of call:

Manifest	3	18
Clearance	1	—
Crew List	—	6
Passenger List	3	6
Stores List	—	6
Health Declaration	—	1
Voyage Memorandum	3	10

In the cases where there is no Nicaraguan Consul at the port of origin of the cargo or at the last port of call, the documents may be legalised by the Consul of a friendly nation or can be certified by some competent authority of the port certifying that there is no Nicaraguan Consul in said port. When a vessel brings cargo for Corinto from the last port of call, then it must also bring both sets of documents mentioned above, the manifest in the second group being replaced by the Cargo Manifest.

Once these documents are satisfactorily received, the vessel is declared in "free pratique" or rather, officially cleared and numbered by the Port Authorities; it will then blow.

Vessels are cleared, numbered and attended in their successive order of arrival with the exception of vessels loading perishable cargo (bananas). In Corinto there is no preferential treatment given to these vessels since they operate on their own special berth.

To clear the vessel for sailing, the only requirement is the presentation of a Customs Solvency Certificate and the Clearance for the next port of call extended by the Port Captain.

Customs: Customs assigns two Customs Guards to each vessel docked or anchored, the vessel being under the obligation to provide these guards three meals daily. Besides meals, guards on anchored vessels must be given a cabin since watches are made in shifts.

PILOTAGE: The Port Authority must receive in writing from Agents advice regarding vessels ETA 72 hours prior to vessels arrival and a confirmation 12 hours. There is no VHF apparatus in use, therefore all advice must be sent through Agents by cable via Balboa or Limon station. Pilotage is compulsory on all vessels exceeding 500 gross registered tons or exceeding 7 ft. draft. Pilot boards 1 mile off Isla de El Cardon.

ANCHORAGE: The anchorage inside the harbour can accommodate 6–10 vessels, depending on size and draft.

RESTRICTIONS: The port is open 24 hrs.; however, entry is restricted in accordance with tide and vessels draft. Access channel and turning basin dredged to 13.35 m. Due allowance should be made for heavy swell if necessary. Speed limit 8 knots in Corinto Bay, and 5 knots in the vicinity of berths or other craft.

MAX. SIZE: Maximum permissible length 650 ft., 80 ft. beam. Draft controlled by depth of water in approach channel and state of swell.

HEALTH: After entry and vessel has berthed or anchored, 3 long blasts are given requesting free pratique; after these blasts the Authorities board the vessel together with the Agent's representative and proceed with distribution of the documentation. In the event of any suspected disease on board, the action to be taken will be given by the Representative of the Health Department. There is no automatic pratique even though vessel is proceeding from another port in the same country.

Although the port is open 24 hours, vessels arriving after 2100 hrs. are not boarded by the authorities until 0600 hrs. the following day, unless the vessel will berth and commence operations immediately. This being the case, free pratique is granted regardless of the hour. This arrangement is restricted to 0100 hrs. as gangs are not allowed to commence operations after that hour.

RADIO: ETA cables are generally routed via NBA Balboa Station or TIM Limon station, and received through Tropical Radio & Telegraph or All America Cable.

VHF: The Port Authority has a VHF station to communicate directly with all vessels nearing the port.

TUGS: Compulsory for berthing and unberthing. The tug joins vessel just after vessel passes Buoy No. 7. Tug's lines are generally used: however, at times ship's lines are used. There is no charge for use of tug's lines. 1 tug of 1,100 h.p. and one launch of 167 h.p. available.

BERTHING: There is no preferential berthing, and berthing is indicated by the Port Authority. Vessels are attended to in the manner "first come first served".

Berthing facilities are as follows:

1. Container Pier, length 240 m. Depth alongside 13.35 m. (Designed for 25,000 d.w.t. vessels).
2. Concrete Pier (Container Pier extension of this Pier). Length 370 m. (2 berths). Depth alongside 13.35 m.
3. A special berth with conveyor-belt system for loading of carton boxes such as bananas, frozen meat, as well as the handling of inbound and outbound cargoes such as fertiliser and cottonseed meal. Bananas can be loaded into 4 hatches at one time at a rate of 4,500 boxes per hatch per hour. Depth alongside at low water is 35 ft.

Port Authority equipment includes fork-lift trucks with capacity up to 7,000 lb. and 3 barges (2×60 ton and 1×80 ton capacity).

CRANES: Two mobile cranes, capacity 75 tons and 12.5 tons.

STEVEDORES: *Working Hours:* The Port gives service 24 hours a day under the following schedule:

From 0700 to 1200
From 1300 to 1800
From 1900 to 2400
From 0001 to 0600

Each shift is of 8 hours. Meal hours are from 0600 to 0700; 1200 to 1300 and 1800 to 1900. The first shift commences at 0700 and is completed at 1600; the second shift is from 1600 to 2330. When a vessel announces with sufficient anticipation its intention to work during night-time continuously until the following day then a second shift does not work a full 8 hours but is relieved at 2200 hours and completely new gang takes over from 2200 until 0600 the following day.

When a vessel does not wish to work during the entire night, it may do two things: (1) Suspend all operations at 2330; (2) Work with the gangs of the second shift up until 0230 hours of the following day after which time the gangs of said second shift cannot continue working. Normally gangs are called at the following fixed official hours: 0630, 0930, 1230, 1530, 1830 and 2130, however on special occasions and with the approval of the syndicate, it is possible to integrate gangs at any hour of the day.

Average Cargo Handling Rates:

Exports:	Tons of 1000 kilos per gang hour
Cottonseed meal in bulk	48
Raw sugar in bulk-dumped by hand	48
Cottonseed in bags	45
Coffee in bags	45
Sesame seed in bags	45
Cotton in bales of 250 kilos each	40
Frozen meat	28
Lumber	12

Imports:	Tons of 1000 kilos per gang hour
Drums	40
Wire rolls	40
Bulk cargo (discharged by clam-shells)	35
Fertilisers – insecticides in bags	30
Vehicles (by weight)	30
Paper rolls	27
Wheat (by aspirators)	20
Oats (by aspirators)	15
General cargo	15

MEDICAL: There are several doctors in the port and most of the Agents have a particular doctor to their service. Hospital facilities are also available. No particular inoculation is required.

TANKERS: The only tankers which frequent this port are those of Esso Standard, Parcel Tankers and the Athel Line. There is one tanker berth; depth alongside 13.35 m. and each of the above-mentioned companies have their particular load/discharge lines.

The Esso tankers only discharge oils, the Athel tankers load out molasses, the Parcel tankers discharge solvents and occasionally others load out cotton seed oil.

There are 9 lines belonging to the consignees ranging from 4 in. to 12 in.

Loading rates:		Tons (1000 kilos) per hour
Molasses	12 in. pipe	140
Bunker or asphalt	8 in. pipe	409
Aviation gasoline	6 in. pipe	237
Hexane	6 in. pipe	240
Aromatics	6 in. pipe	203
Chemical Products	6 in. pipe	210
Turpentine	6 in. pipe	125
Coconut oil	4 in. pipe	60
Lubricants	4 in. pipe	45
Tallow	4 in. pipe	35

DENSITY: (Average) Rainy season 1014, dry season 1020.

FRESH WATER: Fresh water is available and is supplied from connections on the pier, by gravity, at a rate of approximately 10 t.p.h.

FUEL: Corinto cannot supply bunkers. In emergencies small quantities of bunkers and/or diesel oil may be supplied by private firms.

GANGWAY/DECK WATCHMEN: After entering, 2 Custom Officers are placed on board all vessels and their meals must be furnished on board.

OPENING/CLOSING HATCHES: If vessel is equipped with regular hatch boards or pontoons, stevedores open and close hatches as well as swing out booms. However, if covers are of the McGregor type or mechanical, the crew has to do the job.

CERTIFICATES: Ship's Registry Certificate is required from ships making their first call at the port.

CUSTOMS ALLOWANCE: There is no limit on tobacco allowance to be held out of Bond but crew members are only permitted to take 2 packages of 20 cigarettes ashore. Crew not permitted to take any alcohol ashore. Anyone trying to do so will be subjected to heavy fine through Master of their vessel.

IDENTIFICATION CARDS: Crew members allowed ashore if they wish to do so after being previously identified by means of a seaman's book or a passport. This document is kept by the Customs Guard at the foot of the gangway and given back to the Crew member when he returns to the vessel.

CONSULS: In Corinto

Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Honduras
Mexico
Sweden
Venezuela

REPAIRS: There are no shipyards; no large-scale repairs available. Small motors and generators may be repaired in shops in Corinto and Chinandega.

AIRPORT: The airport at Managua is approximately 150 km. from the port and served by regular airlines with daily flights.

REPATRIATION: Can be effected.

SERVICES: *Provisions:* There are several ships chandlers operating in the port who are in position to supply vessels with provisions necessary and required by stewards, engine or deck departments.

Laundry: The same ships chandlers can take care of any amount of laundry. Drycleaning can be done by these suppliers in the nearby city of Chinandega.

Cleaning: There are special gangs of labourers in the port who work on vessels doing odd jobs such as cleaning, chipping, painting, etc.

Transportation: For anchored vessels, there is a very efficient ship-to-shore launch service.

There is taxi service available for transportation by day or night to any part of the country. There is an air-conditioned express bus service between Corinto and Managua under the following schedule:

From Corinto	0400 hrs.	arrive Managua	0645 hrs.
From Corinto	0600 hrs.	arrive Managua	0845 hrs.
From Managua	1445 hrs.	arrive Corinto	1800 hrs.
From Managua	1745 hrs.	arrive Corinto	2030 hrs.

Hotels: There is a small third-class hostel in the port, however in the city of Chinandega there is the Hotel Cosiguina with all the modern conveniences and facilities desired. Chinandega is connected to Corinto by a modern highway.

TIME: Local time is Central Standard Time, GMT minus 6 hours. There are no alterations during the year.

HOLIDAYS: Official holidays are: January 1st (New Year's Day); Holy Thursday; Good Friday; May 1st (Labour Day); May 3rd (Local Patron Saint's Day); July 14th (Annullment Chamorro-Bryan Treaty); September 14th (San Jacinto Independence Battle Day); September 15th (Independence Day); October 12th (Columbus Day); December 25th (Christmas Day).

In accordance with regulations, no work will be done on these days, however, from experience, we know that with the only exception of May 1st (Labour Day), all other holidays are workable under special arrangement.

POLICE/AMBULANCE/FIRE: Police 269; Ambulance 313; Fire 421.

SHORE LEAVE: Allowed. See "Identification cards".

DEVELOPMENTS: Projected installation of bulk handling plant, additional warehouses and extension of pier 1,500 ft. with 2 transit sheds, new administration building, stevedores shed, equipment shed and repair shops; re-designing of range lights and buoys and increasing amount of same, also area for Industrial Park.

A 40 ton container handling crane, 70,000 lb. capacity front loader, tractors and trailers have been ordered for the container berth.

AUTHORITY: Autoridad Portuaria de Corinto.

PUERTO CABEZAS: 14.01 N. 83.23 W.

DOCUMENTS:

1 Clearance from Last Port.
10 Voyage Memorandums.
11 Crew Lists.
10 Passenger Lists.
10 Stores Lists.
1 Bill of Health.
12 Ballast Manifests.
13 Manifests of Cargo.
4 Bills of Lading.
10 sets Tally Books.

PILOTAGE: ETA required 24 hours before arrival at the port. The Pilot uses a boat with an outboard motor and boards about one mile off the port. Agent advises the Pilot the date of arrival, he goes out when he sees vessel.

ANCHORAGE: Vessels can anchor about 0.5 mile South of the wharf. Depths in anchorage 20-22 ft.

MAX. SIZE: Max. length, 400 ft. Draft 19 ft. 6in. Difference between high and low tide is 18 in.

HEALTH: The inspection takes place on arrival. It is not necessary when the vessel comes from some other port in Nicaragua.

RADIO: The Nipco has a radiophone for personal use, but they make contacts with vessels. The frequency is 2738. It is better to use or send radiogram via Radio Tropical in Managua.

TUGS: There is no tug service.

BERTHING: There is wreck in front of the wharf. The location is: 14° 0′ 57″ North, 82° 22′ 4″ West, 1,200 yd. from wharf end.

STEVEDORES: The Agent advises stevedores arrival of vessel. They discharge 8 tons of general cargo each hatch (one gang) per hour.

MEDICAL: Not necessary to advise the need of a doctor, only for emergencies. One hospital and two other doctors, apart from the official doctor of the port.

TANKERS: There are 2 pipes of 6 in. diameter on the wharf. There is no special berth for oil tankers.

DENSITY: 1025.

FRESH WATER: The fresh water is carried to the wharf by truck or from one pipe on the wharf. The boiler water gets to the vessel by the pipe on the wharf.

FUEL: Gasoline, diesel oil and lubricants are supplied by Texaco. Arrangements are made at the arrival of the vessel.

GANGWAY/DECK/WATCHMEN: It is not obligatory. It is customary to have two custom guards in the gangway.

OPENING/CLOSING HATCHES: The opening and closing of hatches is done together by the crew of the vessel and the stevedores.

CUSTOMS ALLOWANCES: Each of the crew can take 2 packs of cigarettes with the seal broken, and one bottle of wine or liquor opened.

IDENTIFICATION CARDS: Not needed, just passport or seaman's book.

CONSULS: Only consul of Panama available locally.

REPAIRS: Minor repairs only can be effected.

REPATRIATION: It is possible and only a passport needed. Necessary to go to the capital by air, thence to any part of the world.

AIRPORT: Distance of airport from wharf is about 2 kilometres. Service every day to the capital except Sundays and holidays. The name of the only airline is Lineas Aereas de Nicaragua (Lanica).

TIME: Local time is Central Standard Time, GMT minus 6 hours.

HOLIDAYS: Holidays are 1st January; Holy Thursday; Good Friday; 1st May; 14th July; 14th and 15th September; 12th October and the 25th December.

SHORE LEAVE: The crew is allowed to go ashore after the vessel is received by the Authorities.

DEVELOPMENTS: A hydrographic survey has been completed in the port zone and surrounding area to establish the best place for future port facilities or whether expansion should be made to the existing port. This survey is being effected in view of projected installation of paper and pulp industry and forthcoming development of agricultural and mineral products which could be exported through the port.

The Port Authority is taking the necessary steps to get technical and financial help to make a general survey of the zone in order to find an adequate and/or protected site to place the new port installations. Port plans are combined with the paper and pulp industry, which is supposed to be installed in the next few years.

DELAYS: Delays in berthing can be expected from bad weather.

AUTHORITY: Port Administration in Puerto Cabezas and General Ports Direction in Managua.

PUERTO SANDINO: 12.12 N. 86.46 W.

DOCUMENTS:

Clearance from previous Port.
6 copies Voyage Memorandum.
6 Stores Lists.
6 Passenger Lists or negative declaration, 3 to be visaed.
6 Crew Lists.
8 Cargo Manifests, 3 to be visaed.
8 Tally books.
6 Lists of Mail, Explosives or Drugs if carried.

9 crew lists and 6 store lists should be despatched by the Nicaragua Consul at loading port if possible, otherwise they are forwarded by Agents from the Panama Canal.

PILOTAGE: Optional by local Pilots. Leading lights are installed, at the entrance to the port, prominently sited on a hill. Several buoys indicate exact anchorage positions.

Tankers: A Pilot is provided by the oil company in agreement with the Panama Canal Authority. Pilot boards about 0.5 mile West of the sea berth.

ANCHORAGE: About 1.75 miles off port entrance, depth is 30 ft. at low water, and about 45 ft. at high water.

RESTRICTIONS: Port is open day and night without exception.

MAX. SIZE: Tankers at Sea Line Terminal up to 850 ft. length and 41 ft. draft.

HEALTH: Port Health inspector boards all vessels on arrival.

RADIO: There is a radiotelephone installation at the Customs office. No VHF.

TUGS: Not available for manoeuvring vessels. 5 small tugs employed for shifting lighters.

BERTHING: No quays for ocean-going vessels. Vessels work cargo to lighters at the anchorage.

STEVEDORES: Port has 4 gangs of 40 men each for boarding vessels.

TANKERS: *Sealine Terminal.* The sea berth is situated in approximate location 12° 10′ N. 86° 49′ W., about 2 miles off shore in a depth of 47 ft. There are 5 mooring buoys, 2 at the bows and 3 at the stern of the vessel. The first lines to the buoys should each consist of 2 good ropes lashed end to end to effect the length required. 5 lines are normally used at each end of the vessel.

Strong winds may delay berthing or cause vessel to vacate the berth once moored. Sailing at night is not recommended for safety reasons. The discharge hose is lifted on the port side by ship's crew.

MEDICAL: Doctor available in case of emergency. Nearest hospital at Leon, 35 km. away.

FRESH WATER: Not available for supply to ships.

FUEL: Not available for supply to ships.

OPENING/CLOSING HATCHES: Normally performed by stevedores. Mechanically operated hatches are opened by ship's crew.

CUSTOMS ALLOWANCES: Each crewman allowed two packets of cigarettes. No wine/spirits allowed to be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required for going ashore.

CONSULS: Nearest at Leon, 35 km. distant.

REPAIRS: Small items for repair can be sent to Leon.

REPATRIATION: No facilities for crew changes. If crew member left behind, Agents are responsible for his repatriation at vessel's expense.

AIRPORT: Las Mercedes international airport at Managua, 75 km. away.

TIME: Central standard time, GMT minus 6 hours. No alterations.

HOLIDAYS: All holidays can be worked.

POLICE/FIRE/AMBULANCE: Police available locally. Nearest fire and ambulance stations are at Leon, 35 km. away.

SHIPMASTER'S REPORT: 1976.

Port authorities board the vessel at 0600 hrs., either at outer anchorage or at discharging anchorage. There is no night work performed unless the vessel reaches discharging anchorage with last daylight.

In general, stevedores are well acquainted with handling cars. Vessels carrying cars, for Pto. Sandino should avoid loading No. 1 hatch for this port. As there is a permanent swell at anchorage, barges cannot lie safely under No. 1 hatch.

There is a Pilot available, on request, who also acts as stevedore-foreman.

SHIPMASTER'S REPORT: 1978

Approach: Coastwise from the North, no difficulties being encountered.

Anchorage: Vessel anchored in position with the rear leading light bearing 088°(T) – 2.1 miles, starboard anchor used, 4 shackles in 8 fathoms of water.

It is advisable to run in to the anchorage slightly to the North of the leading line, thus avoiding the shoal patches on and to the Southward of the line. The anchor should, however, be let go right on the leads, otherwise the vessel will be required to shift anchorage, as happened in our case.

Buoyage was as per B.A. Chart 1960.

Point Penas del Tiscuco: Now has a large power station on it, not shown on the Chart. This is a good land mark when making the port. The shape of the point, as observed on Radar, appeared slightly different from the shape shown on the Chart.

Pilotage: Pilot is available if required, but was not used. I would advise a deep-draft vessel to take a Pilot.

Communications: For long distance communications, it is best to maintain radio watches.

The Charter's Agents have a VHF set in their Office at Corinto and contact can be maintained for day to day matters in this way.

Charter's Agents: They have a resident water clerk at Pto. Sandino, who can be contacted on Channel 27, VHF. He is available from 0800 to 1200 hrs. and from 1400 to 1800 hrs.

Under normal circumstances, a representative from Corinto will meet the vessel on arrival and visit her prior to departure, but this was not possible on this occasion.

Documents required: As per "Guide to Port Entry".

Officials: Were helpful. 1 Customs guard is on duty at all times, but the Guards are regularly relieved from the shore and the ship is not required to provide accommodation for them.

Cargo Work: Continuous and fast. Large, modern lighters, towed by powerful tugs, were used. Due to the swell, these lighters ranged heavily alongside. Although the lighters were well fendered, several indentations were caused in the ship's side. Delays due to lack of lighters were minimal.

Rate of discharge, net of delays, was 60 tons per gang hour, steel coiled rod.

Pratique: Granted on arrival.

Provisions: Not purchased.

Fresh Water: Unobtainable.

Shore Leave: Under normal circumstances, can be arranged by catching a ride on the lighters.

AUTHORITY: Administracion de Aduana. Puerto Sandino.

NOTES

Please also advise Shipping Guides Ltd.

Nigeria

GENERAL

Documents: The Port Authorities have to be provided with 7 copies of the Cargo Manifest 14 days before the vessel berths, otherwise berthing will not be possible.

In the near future 12 copies of the Cargo Manifest and 5 copies of the Freighted Manifest will be required.

Shipmaster's Report: 1978.
No ship is to enter Nigerian waters unless issued with a Ship's Entry Number.

Accurate ETA required:
The following circular has been received from the Nigerian Ports Authority (N.P.A.):
Quote:

It is observed with regret that ships arrive in our territorial waters/roads long before their published Expected Time of Arrival, thus building up unnecessary congestion which Decree 40 of 1975 (now Act 40) was promulgated to check. The effect of this phenomenon is that the control built into the 'Ship Entry Notice' is neutralised and abused.

To give the desired effect to the control of ships inflow as intended in the 'Ship Entry Notice' no ships arriving seven days earlier or later than their Expected Time of Arrival will be treated as Arrived Vessels and therefore will not be accorded berthing facilities. Action will be taken to clear such ships from our roads to the high seas and such Owners or Agents will be blacklisted.

With the Federal Government's relaxation of import restrictions which is followed by a progressive rise in the number of ships calling, the need for rigid application of the provisions of Act 40 cannot be over-emphasised. It will therefore be to the best interest of all concerned to co-operate in this direction with a view to controlling a possible build-up of waiting vessels.

Shipping companies are invited to take advantage of other ports outside Lagos and Port Harcourt, where facilities are under-utilised, such as Calabar and the Delta ports.
Unquote.

Thefts from vessels at anchorage: There have been several recent reports of vessels being boarded and robbed of ship's stores (tarpaulins, paint, ropes, etc.) while the vessels were laying at anchor in the Lagos Roads and the Bonny River.

In some cases the thieves were seen to be armed.

We regret to have to caution Masters of the danger of theft, and to ensure attractive goods are kept under safe lock. Guards should be posted at night, whether in port or in the roads. Alternatively, while in the roads, vessels could steam out a further few miles out of reach of small boats.

BONNY: 04.26 N. 07.09 E. (Inshore Terminal)
04.11 N. 07.14 E. (Offshore Terminal)
(See Plan Book)

OPERATORS: The Shell Petroleum Development Company of Nigeria Ltd.

DOCUMENTS:

4 Crew Lists.
1 Vaccination Lists.
1 Maritime Declaration of Health.
4 Lists of Last Port of Call (6 weeks).
4 Lists of Birds & Animals.
4 Passenger Lists.
2 Stores List.
2 Personal Effects List.
4 Arms & Ammunition Lists.
1 Clearance Last Port.

Agent: Requires NPA lights and buoy dues form.

PILOTAGE: *Inshore berths:* Pilotage is compulsory. Pilots board off Fairway Buoy; incoming ships must *not* enter Bonny Channel without a Pilot on board. With special arrangement vessel could proceed to "N" buoy where Pilot boards.

Offshore berths (SBMs): Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout and acts as loading master. On arrival at anchorage contact Berthing Master on VHF Channel 8 call sign "Ocean Berthing Master".

N.B. Also contact Bonny Terminal on Channel 8 on arrival at Offshore anchorage to ensure vessels arrival etc. is recorded.

ANCHORAGES: *Inner Berths:* West of Fairway Buoy in 8–9 fathoms.

Outer Berths: 3 miles South of manifold platform in position 4° 11.2′ N. 7° 14.2′ E.

Vessels must not proceed inshore of this position without a Pilot. When at anchor listening watch must be kept on VHF Channel 8 and this Channel must not be used for intership communication.

RESTRICTIONS: Berthing possible both day and night but this is dependent on the state of the channel lights.

The maximum draft to which a vessel can load at Bonny is governed by three factors *viz.*

1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at the present time Datum depth is 11.25 m. (36 ft. 11 in.)

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances are as follows.

			ft.	ins.
(January 1st–February 15th	1/1-15/2	=	2	6
	16/2-15/3	=	2	9
	16/3-31/3	=	3	0
	1/4-30/4	=	3	3
	1/5-15/5	=	3	6
	16/5-31/5	=	3	9
	1/6-31/8	=	4	0
	1/9-15/9	=	3	9
	16/9-30/9	=	3	6
	1/10-15/12	=	3	3
	16/10-31/10	=	3	0
	1/11-15/12	=	2	9
	16/12-31/12	=	2	6

Thus it can be seen that the max. draft at any particular time is equal to:

Datum Depth plus Height of Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

		ft.	in.
Datum Depth	=	36	11
Height of Tide	=	+ 7	0
Underkeel		43	11
Clearance Allowance		3	9
Max. Draft	=	40	2

MAX. SIZE: *Inshore Terminal:* Min. size approximately 18,000 tonnes or 152.4 m. (500 ft.). Max. length 320 m. (1,050 ft.). Max. beam no restriction. Max. draft, see "Restrictions".

Offshore Terminal: Min. size 45,000 tonnes s.d.w.t. Max. size 300,000 tonnes s.d.w.t. Max. length no restriction. Max. beam no restriction. Max. Draft 22.8 m. (75 ft.).

HEALTH: Q flag to be shown on arrival, except if from another Nigerian port, yellow fever and smallpox inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisable. Valid Yellow Fever and Smallpox Certificates to be produced for all crew members. Also Deratisation Exemption Certificate.

RADIO: Original ETA message should be sent via Lagos Radio to the Lagos Agents at least 72 hours before arrival. 48 hours before arrival at the Fairway Buoy a further ETA message should be sent to Lagos Agents. When anchored at the Fairway Buoy contact Bonny Terminal on Channel 8, passing date and time of arrival (same for Harbour Master Bonny), keeping watch on VHF Channels 8 and 16. Failure to comply with the requirements for ETA messages may result in delays in berthing the ship.

BERTHING: *Inshore Terminal:* There are 3 berths (CBMs) designated A, B and C, from upstream. A and C consisting of 5 buoys (1 astern, 1 on each quarter, 1 ahead and 1 on the inshore bow). A and C are flood tide berths. B is ebb and flood tide berth consisting of 6 buoys, the 6th buoy is on the offshore bow or quarter depending on which direction the ship is berthed.

Tankers berth on the flood tide (or ebb at berth B) using the offshore ships anchor as an additional mooring point. Ships moor by means of 40 mm. wires (provided by the Terminal) one 40 mm. wire is picked up from each of the buoys and ship's ropes are not normally used. Mooring is carried out by ship's crew; and care must be taken to ensure that the mooring wires are laid out in a seamanlike manner to prevent runs and kinks forming in the wires. Mooring wires must not be kept on tension winches, but stoppered off by means of Carpenter's stoppers provided by the Terminal, and then "turned up" on the bitts. Two men from the Terminal are put on board the vessel to assist the ship's crews position and set up the Carpenter's stoppers.

Vessels must be equipped with hose handling derricks with a SWL lifting capacity of not less than 5 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny, but slops cannot be accepted ashore. Maximum loading rate: 5,000 t.p.h.

Grades handled: both light and medium crudes.

Offshore Terminal: Two SBM's fitted with two 16 in. double nylon mooring lines and 1 hose string terminating in two 16 in. diameter end hoses.

No. 1 SBM is S.S.W. of the Platform. No. 2 SBM is S.S.E. of the Platform and they are designated Bonny West and Bonny East respectively.

Berthing effected under guidance of berthing master and local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to re-align vessel.

Vessels must be equipped with hose handling derricks with a capacity of not less than 7 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny but slops cannot be accepted ashore. Max. loading rate: Light crude 48,750 bbls.p.h.; Medium crude 35,000 bbls.p.h.

HOSES: *Inshore Terminal:* Vessels should endeavour to present two 12 in. diameter 150 ASA connections on the port side of the vessel when berthing at A and C berths. On B berth two 16 in. 150 ASA connections should be provided on the port or starboard sides of the vessel - dependent on whether the vessel is berthing on ebb or flood tides. Vessel's hose handling derrick to be rigged and plumbed overside. Hoses will be connected by shore labour, but winchmen must be supplied to operate the ship's lifting gear. The derrick runner must be equipped with a suitable hook. The estimated weight of each hose string at berths A and C, when lifting with the ship in light condition is between 3 and 5 tonnes. Ships fitted with only 5 tonne derricks should exercise care when lifting to avoid shock loads. On "B" the estimated lifting weight is between 5 and 7 tons.

Weight of Hoses: Indication only of approximate weights of hose strings in tonnes (including fittings, floats, and pick-up buoy). Assumed total lift of 7.6 m. (25 ft.) above deck level and vessel in light draft condition with hoses full of crude oil SG 0.850.

d.w.t.	*16 in. I.D. Hoses* tonnes	*12 in. I.D. Hoses* tonnes
100,000	8.3	4.9
70,000	7.5	4.5
50,000	7.3	4.4
35,000	7.1	4.2
18,000	6.3	3.7

Offshore Terminal: Port or starboard side amidships (dependent on which SBM is used). Vessels should endeavour to present two 16 in. standard 150 ASA connections on arrival. Ships crew are required to connect and disconnect the hoses under the advice of the berthing master and/or his assistant. A derrick SWL at least 7 tonnes must be rigged ready on both port and starboard sides and plumbed clear of this side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: Indication only of approximate weights 16 in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys with all hoses full of crude oil SG 0.850. Assumed lift is 7.6 m. (25 ft.) above deck level, with vessel in light draft condition.

d.w.t.	tonnes
200,000	8.9
100,000	8.1
70,000	7.3
50,000	7.0
35,000	6.9

SHORE LINE SYSTEM: *Inshore Terminal:* Crude oil is loaded at berths A, C, D via 32 in. submarine lines and 2 strings of flexible hoses each consisting of 3 lengths of 16 in. hose and 3 lengths of 12 in. hose at the ship end, and via a 28 in. submarine line and 2 strings of 16 in. flexible hose at berth B. Reducers are made available by Terminal on request.

Offshore Terminal: Vessels load through SBM from shore through a 48 in. diameter line, thence through a 24 in. diameter floating hose which is terminated by a "Y" piece and two 16 in. diameter hose tails which connect to the ships manifold. Loading rates up to 6,500 t.p.h. may be expected. The 48 in. submarine loading line from the Terminal is some 20 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

BALLAST: No facilities for dirty ballast, no tank cleaning facilities.

MEDICAL: Hospital at Bonny.

DENSITY: *Inshore Terminal:* 1015 at Low Water particularly during rainy season.

Offshore Terminal: Salt.

FRESH WATER: Available by barge at rate of 15 t.p.h. 48 hours advance notice required as barge comes from Port Harcourt.

FUEL: Available only by barge from Port Harcourt.

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle of spirits per officer per 7 days.

IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.

CONSULS: Nil.

REPAIRS: Nil. See "General".

REPATRIATION: Possible via Port Harcourt and Lagos.

AIRPORT: 28 miles by river, to Port Harcourt, then 7 miles by road, twice daily to Lagos, no international flights.

TIME: GMT plus 1, no change.

POLICE/AMBULANCE/FIRE: Contact Via Harbour Master or Shell, VHF Channel 8.

SHORE LEAVE: Not permitted.

GENERAL: Accommodation ladder must be rigged – used in conjunction with pilot ladder at offshore terminal – and for direct access in inshore terminal.

Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice. Contact terminal VHF Channel 8 in first instance.

Pollution of the sea by dirty ballast bilge discharge or any other means will result in heavy fines, or in severe cases, imprisonment.

Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be reported to the Agent.

Nigerian flag to be flown.

Air letter forms are not acceptable unless with Nigerian stamps.

Delays: Inshore berths: None if the 4 channel buoys are lit. Otherwise, only daylight pilotage.

Offshore berths: Worst weather period June–September when heavy swell may be encountered.

Immobilisation of engines: Not permitted at the berth. Not permitted at SBM's. Not advised at sea anchorage due to indifferent holding ground and the existence of obstructions and foul ground in the vicinity.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as Shell can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ship's personnel. However, as further guidance and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during loading operations and is provided with walkie-talkie radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell Tanker Port Performance Time Sheet by ship and shore personnel at all terminals. Only crude oil is handled at Shell terminals, loading temperatures and specific gravities of the two grades of crude, Bonny Light and Bonny Medium are reasonably constant and are approximately:

Bonny Light	0.823 at loading temperature
Bonny Medium	0.890 at loading temperature

Early Departure Procedure: A modified early departure procedure is in operation at Bonny Offshore Terminal. Masters are requested to sign all documents in blank, retaining in their possession Masters' consignee copies. On completion of loading, the berthing Master will supply Masters with a copy of the figures required for the completion of the retained documents. Masters requested to complete these before the departure of the vessel. Customs and Agency representatives will normally board vessels during the daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road Apapa. POB 265, Apapa. Tel. 47770. Telex 21 244. Cables: "Freight Lagos".

BRASS RIVER (Offshore Terminal): 04.04 N. 06.17 E.

SHIPMASTER'S REPORT: 1976.

DOCUMENTS:

1 Maritime Declaration of Health.
2 Vaccinations Lists.
6 Crew Lists.
4 Passengers Lists.
2 Stores Lists.
2 Personal Effects Lists.
4 Arms and Ammunitions Declarations.
4 Lists of Animals and Birds.
4 Lists of Ports of Call (last 6 weeks).
Clearance last port.

APPROACHES: Coast line is well defined on high definition radar at a distance of 12 to 15 miles and sounding machine will assist efficently while approaching.

Terminal consists of a central platform showing two flashing lights (one red and one white) – letter "U".

Two SBM's: No. 1 situated 1 mile East of the platform is equipped with a Racon (letter "A"). No. 2 situated 1 mile West of the platform.

PILOTAGE: Berthing Master will board the vessel 2.5 miles North East of the platform. Contact "Brass Terminal" on VHF Channel 16 for berthing instructions and immediately on anchoring to ensure that vessel's arrival is recorded.

ANCHORAGE: 2.5 miles N.E. of the platform.

RESTRICTIONS: Vessels berth in day hours only.

MAX. SIZE: About 250,000 d.w.t.

PRATIQUE: Agent, Health and Customs Officers board at same time as Berthing Master.

RADIO: ETA to be given via Lagos Radio, 120, 72, 48 and 24 hours before arrival at the Terminal anchorage.

TUGS: None available.

BERTHING: Effected under the guidance of Berthing Master assisted by a party of 4 Nigerian people and ship's crew.

Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch, in the event of the vessel riding up on the SBM, may make fast and tow to realign the vessel.

Each SBM is fitted with 2 nylon mooring ropes connected on a single chain and two hose strings with 16 in. end hoses. Position of hoses connection: amidship port side. Vessel should endeavour to present on arrival 2×16 in. connections on port side. A derrick of 7 to 10 tons SWL with a suitable hook must be rigged ready on port side.

MEDICAL: No facilities but assistance may be given on an emergency basis.

FUEL: Not available.

FRESH WATER: Not available.

DENSITY: About 1025.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL: Crude oil handled is: Light Nigerian Crude API=44.0. Temperature about sea temperature, R.V.P.=10.5. Two of the four Nigerian crew stay on the forecastle head and maintain security watch throughout loading operations. Accommodation must be provided for Berthing Master and 2 men. Accommodation ladder is not required. Pilot ladder or pilot hoist are more suitable because of the swell. Immobilization of engine is not permitted at SBM's.

Early Departure Procedure: Masters are required to sign all documents in blank. On completion of loading, seals are controlled by customs officer and Agents complete Master's and Consignee's copies of documents whilst ship is disconnecting and leaving berth.

SHIPMASTER'S REPORT: May 1980.

Documents: 5 each of Passengers or Nil passengers, Nil stowaways, Nil distressed seamen, Nil birds and animals, Narcotics List, Ports of Call, Clearance Last Port and 3 copies Deviation Cable.

Customs: All lengths of cloth to be placed under seal.

TERMINAL OPERATOR: The Nigerian AGIP Oil Co. Ltd.

BURUTU (inc. Warri): 05.21 N. 05.31 E. (See Plan Book)

DOCUMENTS:

(a) Ship Entry Notice, SEN. (See "Lagos").

(b) 14 days prior arrival Agent requires:
- 12 Copies of Manifest.
- 5 Stowage Plans.
- 5 Hatch Lists.

(c) On arrival Master to present:
- 7 Ports of Call Lists.
- 8 Crew Lists.
- 5 Kroo Boy Lists.
- 2 Vaccination Lists.
- 5 Animal Lists.
- 4 Arms and Ammunition Lists.
- 1 Extra Manifest for Transhipment (if applicable).
- 1 Store List.
- 1 Crew Declaration List (crew belongings).
- 1 Maritime Declaration of Health.
- 2 Narcotics List.
- 2 Parcel Lists.
- 5 Passenger Lists.
- 1 Stowaway List.

All above to be prepared and if not applicable to be marked nil. Other forms prepared by Agent and furnished on arrival.

PILOTAGE: Compulsory. Berthing in daylight only. Approaching Escravos fairway buoy, Master to contact Escravos Pilot on VHF Channel 16. Pilot will take vessel to Bennet Island where Master to contact Harbour Master Warri on VHF Channel 16 for pilotage to Warri.

ANCHORAGES: 1 anchorage known as "the pool", opposite Okorodudu Town; max. draft for pool anchorage 14 ft. MLWS. Further anchorage at Forcados for vessels waiting to proceed to Burutu or Warri.

MAX. SIZE: Restricted only by draft. Official depth 21 ft. MLWS, governed by actual depth on Escravos bar which does vary from time to time and being dredged for increased draft. Latest information always available from Nigerian Ports Authority, Lagos. Also see "Berthing".

HEALTH: International pratique regulations prevail. Pratique *not* necessary when coming from another port in Nigeria.

RADIO: Station, Port Burutu. Watch kept from 0730–1200, 1400–1700 hrs. on week-days and 0730–1200 hrs. on Saturdays on 2182 kc/s R/T and Channel 16 VHF.

TUGS: No tugs available.

BERTHING: No specific requirements to berthing. Berth number is hoisted on flagpole situated on No. 4 berth. Ships berthed in order of arrival.

Warri		*Length (m.)*	*Draft (m.)*
1	Buoys Fore and Aft	160	6.4
2	Buoys Fore and Aft	191	6.4
3	Single Buoy	No limit	6.4
4	Main Wharf	160	6.4
5	Canal Berth	322	6.1

Warri New Port: Total length of quay is 1,600 m. Depth 11.50 m. MLWS. Max. draft 9.50 m. 6 berths available to handle 1 Roll-on/Roll-off vessel and 9 medium size cargo vessels.

Facilities available: Bollards; water and fire hydrants; telephone connections; crane rails and electric sockets for future harbour cranes; transit sheds and warehouse; stacking and open storage areas; control tower (height 40 m.); Port Engineer's Office, workshop and stores; Port Health, Police, Customs and Fire Services; bonded warehouse, security fence which is illuminated at night.

Private container handling facilities: 1×35 ton fork lift, 2×8 ton mobile cranes.

Burutu

2 vessels normally berth alongside the wharves. The main wharf being some 750 ft. in length and a smaller wharf of some 300 ft. There is plenty of water alongside these berths and the depth that a vessel can load to is controlled by the Burutu flats which are 13 ft.

1×25 ton and 6×2 ton diesel cranes available for handling lighters only.

STEVEDORES: Advice given on radio during transit Escravos-Burutu is quite adequate. Normal rates approximately 13/15 ton per hook hour.

MEDICAL: Fully equipped hospital under supervision of resident medical officer situated at Burutu.

TANKERS: Only small coastal tankers use Burutu to periodically replenish bulk tanks, which have capacity for 1,800 tons gas oil and 900 tons fuel oil, used primarily for consumption by local vessels.

DENSITY: Brackish.

FRESH WATER: Available.

FUEL: Available.

FIRE PRECAUTIONS: Small fire station situated in port area. No specific fire precautions required.

GANGWAY/DECK WATCHMEN: Considered advisable to have gangway/deck watchmen.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, except in ships fitted with McGregor hatches.

CUSTOMS ALLOWANCE: 200 cigarettes; part bottle.

IDENTIFICATION CARDS: Either discharge books, or passports advisable.

CONSULS: No consulates at Burutu.

REPAIRS: Dockyard has 4 slipways which can accommodate most creek and river vessels up to tonnage of 600 tons. Management of dockyard in hands of qualified engineers who are able carry out afloat, hull and/or machinery surveys as required. Limited deck, hull and engine repairs can be carried out.

REPATRIATION: Facilities exist for individuals but not for crew changes.

AIRPORT: Small airstrip 1.5 hours away by launch, where daily scheduled flights by small twin-engined aircraft operate to Lagos.

TIME: GMT plus 1 hour.

HOLIDAYS: See "Lagos".

POLICE/AMBULANCE/FIRE: No telephone numbers – all these services available in port area.

TELEPHONES: Facility available for connecting telephones on board.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Nigerian Ports Authority, Burutu.

AGENT: Intertrans (Nigeria) Ltd., 4 Khalil Road, POB 374, Warri. Tel. Warri 341. Telex via Lagos 21.244. Attention "Warri".

CALABAR: 04.57 N. 08.27 E.

Situated on right bank of Calabar River, 42 miles from sea.

DOCUMENTS, and all general information, refer to "Lagos".

PILOTAGE: Pilotage is compulsory, and vessels drop anchor at Buoy 9 or Parrot Island, and call the Harbour Master or Pilot on VHF Channel 16 or by Radio Telephone 2182 kc/s between the working hours of 0700 to 1200 and 1400 to 1630.

MAX. SIZE: The max. recommended draft for vessels using the port of Calabar is 5.94 m., which is, at present, governed by a depth of water on Duke Town Crossing of 3.66 m. Max. LOA 160 m.

New Port: Max. LOA 150 m. Max. draft 9.0 m. (HW) 7.0 m. (LW).

BERTHING:

Berth	*Length (m.)*	*Max. Draft. (m.)*	*Remarks*
Pool Anchorage	—	—	3 Ocean going vessels
Jackson Wharf	27	5.79	1 Coastal going vessel
Milerio Wharf	61	7.32	1 Ocean going vessel
Ivy Wharf	41	4.27	1 Ocean going vessel
Cement Wharf	75	5.79	1 Ocean going vessel

New Port: 4 quays each 215 m. in length.

Facilities:

a) 3 transit sheds each measuring 175 m. long and 40 m. wide for import cargo.

b) 2 transit warehouses with same dimensions as (a) for export cargo.

c) Deep wells, 2 water tanks with capacity of 24,000 litres of water each.

d) Transformer station, Customs warehouses and a major workshop for the port.

e) The new port occupies an area of approximately 38 hectares of land and has a fully buoyed river channel, 70 nautical km. long and 150 m. wide.

FRESH WATER: Available.

AIRPORT: At Calabar.

AUTHORITY: Nigerian Ports Authority.

AGENTS: Intertrans (Nigeria) Ltd. P.O. Box 10, Calabar. Tel: 175 Telex: via Lagos 21244. Att: Calabar.

DEGEMA (Including Abonnema): 04.44 N. 06.46 E.

LOCATION: Degema and Abonnema are very close to each other on the Sonbreiro River and are divided by a Creek through which launches and small craft sail to Port Harcourt.

PILOTAGE: Compulsory through Boler Creek. Pilots embark at Bonny.

BERTHING: The ports are approached from Bonny via Boler Creek, which has a depth of 4.88 m. at HW. Anchorages for 3 vessels in harbour to load/discharge, max. draft 16 ft. (limited by depth of Boler Creek). Cargo is handled by lighters.

Bulk Oil Plants of Nigeria Ltd. operate a berth for the loading of bulk palm oil onto main line vessels.

AUTHORITY: Harbour Master, Port Harcourt.

ESCRAVOS: 05.30 N. 05.00 E. (See Plan Book)

DOCUMENTS: Required and brought out by Pilot:
- 4 Nigerian Ports Authority/Masters Declaration.
- 2 Customs and Excise (Form C 13).
- 4 Ship's Report (Gulf) } on behalf of Agent.
- 2 Requests for Service } on behalf of Agent.

The sailing clearance will be completed after B/L figure of cargo loaded is available, and will be delivered to the ship before sailing.

PILOTAGE: Compulsory. Boarding area is in a position 3 miles W.N.W. of the berth operation platform.

Supervisor Pilot's Report: From my personal experience here at the Tank Farm, I can add that in poor visibility or when Tankers approaching this Terminal are having difficulties with their Radars, I am guiding them to proper anchorage using a small R.D.F. which is located at the local airport – Heliport in the Tank Farm and used by local aircraft traffic. The signal comes as "ES" (· · · ·) on 305 kcs and gives a good bearing from a distance of 30 miles. This is not an official Navigational Aid, but I have used it successfully for many years and besides, when you have nothing else in the area, this is a great help to obtain a line-position.

NAVIGATION AIDS: Berth Operations Platform is a conspicuous steel structure 85 ft. high and is approx. 1 mile from Berth No. 2, between the berth and the shore. On top of this structure is a heliport, which at night is surrounded by red lights. In the event of a power failure a green intermittent light will be shown from one corner of the seaward side of the platform.

A RACON reflector is mounted on this platform for easy identification of the Gulf Sea loading area. Radar transmission from the incoming vessel triggers the RACON Unit which responds with the Morse Code letter "G" (– – ·), followed by a solid tail. This signal is observed visually on the ship's radar screen and appears very close to the point where the radar echo of the berth operations platform itself should appear.

ANCHORAGE: Vessels required to anchor on arrival will anchor in position approx. 3 miles W.N.W. of the berth operations platform, i.e. in a position Lat. 05° 31′ 00″ N., Long. 04° 57′ 30″ E., or as otherwise instructed.

On approaching the terminal, VHF contact can be established with the Mooring Master on Channel 10 and 16 and the vessel will be advised of which berth has been nominated for her cargo. At the same time, the vessel will be advised where the Mooring Master will board. In cases where VHF contact is not made, the vessels will remain in the anchorage area until such time as contact is made by radio or the pilot boat. Vessels are advised to anchor only in the stated area due to the existence of submarine pipe-lines in other areas.

Anchorage is forbidden in the mooring area.

RESTRICTIONS: Mooring and unmooring operations will be undertaken by day and by night under normal weather conditions.

Notice of Readiness will be accepted by the Company representative on arrival providing that the ship is in all respects ready to load.

MAX. SIZE: The Escravos Terminal consists of two Single Buoy Mooring Berths Nos. 2 and 3 only, the conventional Sea Berth (Berth No. 1) having now been de-commissioned.

The location of the Sea Terminal Berth No. 2 (SBM) for vessels up to 120/150,000 d.w.t. (depending on draft and larger tankers taking part cargo only with permitting weather conditions) is off the North of the Escravos River in a position Lat. 5° 30′ 37″ N., Long. 4° 59′ 25″ E., and has a min. depth of water of 72 ft. at LWS.

Berth No. 3 (SBM) for 350,000 d.w.t. vessels is situated 4.25 miles W.S.W. of No. 2 berth in a position Lat. 5° 29′ 29″ N., Long. 4° 55′ 54″ E., and has a min. depth of 105 ft. at LWS.

RADIO: Vessels bound for Escravos must advise their ETA to Gocon, Lagos, 72 hours and 24 hours before arrival – the message to contain the vessel's name, ETA, Master's name. A 24 hour watch is maintained on VHF Channels 10 and 16, in the Senior Mooring Master's Office, and ships are usually able to make contact on this Channel at a distance of 20 to 30 miles on the seaward side of the Berth Operations Platform. Channel 10 is used for internal traffic and ship berthing operations.

MOORING: Before arrival at the pilot boarding area, it will be necessary to ensure that the following moorings are ready for use on arrival at the berths:

Two mooring ropes on forecastle – buoyant lines if possible, e.g. polypropylene, on the forecastle head.

When the vessel is within reasonable distance of the buoy, 2 ship's lines will be carried by the mooring launch to the floating buoy lines and secured to same, these lines will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that a chain is attached to them. This chain is to be secured to the bitts in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chains will absorb any chafing if the buoy line crosses the bow. There is one buoy line.

Power must be available at all times on deck winches and windlass while vessel is at the berth.

A mooring line must be available aft, secured to the bitts and of sufficient length to enable a tug-boat to pick up the eye and tow on it to realign the vessel if necessary. If available, a buoyant line is also preferred in this position.

CARGO: Nigerian Light Crude - API 37° approx. Temperature 85° F. (fairly steady throughout the year).

HOSES: Lifting, connecting, disconnecting, lowering and other handling of hoses will be performed by the ship's crew, as advised by the Company representative, and where possible the Company will provide a pipe-line gang to assist the ship's crew. At all times handling of hoses will be performed by the ship's crew, as advised, and a deck officer must be in attendance.

Both derricks must be rigged and ready for use on arrival and vessels are cautioned that the weight of each hose is at least 5 tons under favourable conditions. Where possible, it is requested that the derrick runner is on one winch and the topping lift on another, as this will make the hose-handling operation much smoother and faster. In any case, members of the ship's crew will be required to operate the winch or winches.

As no equipment will be supplied from the shore; it is essential that all vessels nominated for this port have an adequate supply of gaskets, nuts, bolts, spanners, tools, etc. ASA reducers for use with the Camlock connections can be supplied in an emergency in the standard sizes. Failure to have these items will lead to delay in berthing and could even lead to a situation where the vessel was not accepted by the port. Such delays would be for the ship's account.

Berth No. 2: Loading is through an SBM which is approx. 40 ft. in diameter and held in position by 4 chains secured to piles sunk into the seabed. 1×24 in. floating hose is secured to buoy and has 2×12 in. tailing pieces attached to it with 12 bolt holes ASA 150 flanges; they are also fitted with Camlock connections.

Berth No. 3: Same as No. 2 but improved type and more heavily moored with 8 chains secured to piles sunk into the seabed. There is 1×24 in. floating hose with 2×16 in. tailing pieces. These are ASA flanges with Camlock connections, similar to those at Berth No. 2.

BALLAST: *Deballasting and Loading Procedures:* Vessels proceeding to Escravos to load must arrive with sufficient clean ballast for safe manoeuvring. A vessel arriving with dirty ballast will incur costly delays as it is not permitted to discharge dirty ballast to the sea. The "Load on top" system is accepted at this port and vessels are requested to arrive with the slop tank "settled out" as far as is possible and so avoid any chance of pollution of the Terminal waters from this particular tank.

The Nigerian Government has very strong views on pollution and vessels are warned that a very careful watch is kept at all times to ensure that pollution does not take place, or that if pollution should occur it is controlled as quickly as possible.

All vessels are cautioned to keep a close watch on the floating hose (or hoses) towards the end of deballasting, as it is possible, under certain conditions of weather and tide for the hose to become trapped under the fore-foot of the vessel. Should this situation appear likely to arise vessels are requested to attempt to keep the fore-foot submerged by transfer of water or bunkers, etc. If the hose becomes foul, it must be disconnected and towed clear causing considerable delay to the vessel.

During the hours of darkness it is requested that searchlights from bridge wings and approved floodlights be used to illuminate the surrounding water to facilitate detection of oil and assist generally in loading operations. Vessels are advised that failure to supply sufficient lighting could result in cargo operations not being allowed during the hours of darkness. Such delay would be for the ship's accounts.

After the ballast tanks have been inspected and found to be satisfactory, deballasting will commence on the advice of the Company Representative. When all the ballast has been discharged, the tanks will again be inspected and if ready for cargo a dry certificate, if presented, will be signed by the Company representative. In any case, cargo will be loaded when both ship and shore are ready to commence operations. In no circumstances will the vessel be expected to load at a faster rate than that requested by the Master. It is the ship's responsibility to check that the requested loading rate is not being exceeded. The Company for their part will make every effort to maintain the requested rate and will advise of any alteration of loading rate immediately; prior warning being given if circumstances permit.

Simultaneous Deballasting and Loading: In order to reduce the turn around time at this Terminal, but with close attention to safety, vessels will be permitted to load cargo and discharge ballast simultaneously, provided that no contamination of cargo or pollution of the Terminal waters can occur. Vessels desirous of adopting this method of loading can do so, but will be required to advise the Company in writing, stating that the vessel accepts full responsibility if this method of loading results in contamination of cargo and/or pollution of the Terminal waters.

Throughout the deballasting and cargo operations, a deck officer must be on deck with sufficient crew members to safely handle the operation. Company representatives will be on board throughout to co-ordinate terminal and marine operations and will be in constant communication with the terminal by portable and/or ship's VHF sets. Before loading commences the amount of cargo required must be given to the Company Representative in writing and the Terminal will, in conjunction with the vessel, arrange to stop the flow of cargo at this predetermined figure.

THERE ARE NO FACILITIES AVAILABLE TO DISCHARGE EXCESS CARGO SHOULD THE VESSEL OVERLOAD.

The Company Representative will advise on the detailed procedure for shutting down and disconnecting, but briefly, after cargo is completed and oil has ceased to flow, loading valves on the shore and Berth Operation Platform (BOP) will be closed. Then and not before, the vessel's manifold valves may be closed.

Do not close ship's valves against incoming oil as such procedure creates excessive pressure which may damage hoses, terminal facilities, or ship's piping.

Figures taken after completion will be passed to the shore by VHF and a ship/shore difference obtained. On request, full sets of cargo papers will be prepared and delivered to the Master as speedily as possible. However the briefer form of documentation is used at this terminal, and the remainder of the documents will be forwarded by airmail. At the same time the Company will arrange clearance for the vessel.

Loading signal to be displayed is the International Code flag "B" from a conspicuous halyard during the hours of daylight. During the hours of darkness a red light visible all around the horizon at a distance of at least one mile is to be exhibited.

REPAIRS: No facilities of any kind are available at this port.

Under no circumstances are engine repairs or the immobilisation of main engines permitted within the port limits.

REPATRIATION: Not permitted except in grave emergency and then only if the person concerned holds all the necessary valid certificates and documents, e.g. valid Smallpox, Cholera and Yellow Fever Certificates.

WEATHER AND CURRENTS: Wind and swell are mostly from a South-westerly direction. The weather is generally good from November to May, but is unfavourable during the wet season, i.e. May to November. For approximately 75% of the year the current sets in a N.N.W. direction and for the remainder of the year it is reversed, i.e. S.S.E. The strength of the current varies from 0.5 to 1.5 knots, and the currents frequently reverse direction very quickly causing the vessel to yaw (swing) heavily at the berth.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: Not available except in an emergency.

STORES: Stores are not available at this Terminal and urgent spares/equipment forwarded by air can take up to three (3) weeks to clear formalities. In view of this it is essential that Gulf be advised of the airway bill number at the earliest opportunity to avoid further delays.

NATIONAL FLAG: Available from the Company.

GENERAL: In view of the exposed location of the berths, the Mooring Master and pipe-line gang will have to remain on board throughout the vessel's stay at the berth and, therefore, it will be necessary for the vessel to arrange food and accommodation for this period. A pipe-line gang will usually consist of four men, but this number may be varied at the discretion of the Company.

It is assumed that the Mooring Master will be accommodated in the Pilot Room; but where such a room does not exist on board, then accommodation equivalent to a minimum standard required for a Senior Officer is to be provided. In the case of meals, due allowance and provision is to be made for the fact that irregular hours of work by day and night may be involved.

TIME: Local time is GMT plus one hour throughout the year.

SHORE LEAVE: In view of the isolated positions of the buoy moorings (approx. 15 and 19 miles from shore) Masters are strongly advised not to grant shore leave. The weather and swell conditions could result in persons being injured either embarking or disembarking from the vessel, and in addition the boat journey will take approx. 2-2.5 hours. Should the weather deteriorate, it could mean delay to the vessel as outward clearance would not be granted until all the crew were on board the vessel. As the terminal does not own any suitable boats, it would be necessary for the vessel to charter one for shore leave purposes.

In view of the foregoing, the terminal does not recommend shore leave being granted.

AUTHORITY: Gulf Oil Company (Nigeria) Limited.

FORCADOS (Offshore Terminal): 05.10 N. 05.10 E.

(See Plan Book)

DOCUMENTS:

Port Health:

4 copies Crew List.
3 copies Vaccination List.
3 copies Maritime Declaration of Health.
5 copies List of Last Ports of Call (6 weeks).
4 copies List of Animals and Birds.
4 copies Passenger List.

Customs:

1 copy Crew List.
1 copy List of Last Ports of Call (6 weeks).
2 copies List of Animals and Birds.
1 copy of Passenger List.
1 copy Stores List.
1 copy Personal Effects List.
2 copies Arms and Ammunition List.
1 copy Clearance Last Port.

Agent:

2 copies Crew List.
2 copies List of Last Ports of Call (6 weeks).
2 copies Passenger List.
Vaccination booklets for all crew members to be produced.
Deratisation Exemption Certificate to be produced.

APPROACHES: An efficient sounding machine and a high definition radar will assist in making the terminal for the first time. A heavy cluster of radar echoes from the Escravos area may be recorded on passing the 100-fathom line. On making the 20 fathom line, it is reported that the coastline from North Point to Moore Point and from South Point to Ajamabri shows on the radar screen with good chart comparison.

Once the vessel's position is ascertained and the course for Forcados adopted, the first and most obvious sighting, at night, will be that of the platform, which is marked with numerous fixed lights at several levels. The platform, which also serves as a helicopter platform, is in close proximity to the two SBM's.

PILOTAGE: Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout. Contact Berthing Master on VHF Channel 8. Call sign "Forcados Pilots". *N.B.:* Also contact "Forcados Terminal" on Channel 8 immediately on anchoring to ensure that vessels arrival is recorded and that berthing turn will be in correct sequence.

ANCHORAGE: 3 miles West of or 2 miles N.W. of Production Platform in position 5° 10′ 17″ N. 5° 10′ 42″ E.

Vessels must not proceed inshore from these positions without a Pilot. When at anchor a listening watch is to be maintained on Channel 8 and this Channel must not be used for ship-to-ship exchanges.

Note: A 14-mile 48 in. pipe-line extends from the coast at South Point near Forcados to the manifold Platform and hence to the SBMs. Vessels are warned not to anchor in the vicinity of the pipe-line.

RESTRICTIONS: Vessels berth at any state of tide, night or day.

MAX. SIZE: Min. size 45,000 tonnes. Max. size 254,000 tonnes. Max. freeboard during loading 60 ft. No restriction on length and beam. Max. draft 65 ft.

PRATIQUE: Health and Customs Officers board at a convenient hour come from Forcados, 20 miles distant from the buoys. Normally travel by high-speed launch, but may occasionally use helicopter.

RADIO: ETA to be given via Lagos Radio, 72 hours before arrival and re-confirm 48 hours before vessel's ETA at the terminal anchorage.

TUGS: No tugs required and none available.

BERTHING: Effected under guidance of Berthing Master and/or local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a floating mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to realign vessel.

There are two SBMs each fitted with two 15 in. nylon moorings and 1 hose string 840 ft. long with 2×16 in. end hoses. No. 1 SBM is South of platform and No. 2 is West.

Position of hose connections: Amidships port or starboard side depending on seasonal conditions. Vessels should endeavour to present 2×16 in. (400 mm.) (150 ASA) connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick, SWL at least 7 tonnes, must be rigged ready on both sides and plumbed clear of ship's side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: Indication only of approximate weights 16 in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys) with all hoses full of crude oil SG 0. 850. Assumed lift is 7.6 m. (25 ft.) above deck level, with vessel in light draft condition.

d.w.t.	tonnes
200,000	8.9
100,000	8.1
70,000	7.3
50,000	7.0
35,000	6.9

Loading: Load-on-top system operates at Forcados but slops cannot be accepted ashore. Maximum loading rates 11,000 t.p.h.

A single grade of crude oil is handled which is known as "Forcados Blend".

Shore Line System: Vessels load through SBM from shore through 48 in. line to SBM. The 48 in. submarine line to the SBM is some 14 miles in length, therefore great care must be exercised during loading when ships valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ships manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

MEDICAL: No facilities for medical attendance but assistance may be given only on an emergency basis.

FUEL: Not available.

FRESH WATER: Not available.

DENSITY: Approximately 1025.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL:

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as Shell can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ships' personnel. However, as further guidance, and in absence of any instructions to the contrary, ships are expected and nominations of vessels are accepted by Shell on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during Loading Operations and is provided with "walkie-talkie" radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Shell Tanker Port Performance Time Sheet by ship and shore personnel at all Terminals. Only crude oil is handled at Shell terminal, loading temperature and specific gravity of the grade of crude. Forcados Blend is reasonably constant and is approximately: 0.886 at loading temperature.

Immobilization of engines: Not permitted at SBMs. Not advisable at sea anchorages as there are many obstructions if vessel drags anchor.

Restrictions which may cause delays: Weather. Worst period June–September when heavy swell may be encountered.

Early departure procedure: A modified early departure procedure is in operation at Forcados offshore terminal. Masters are requested to sign all documents in blank, retaining in their possession Master's consignees copies. On completion of loading, the Berthing Master will supply Masters with a copy of the figures required for the completion of the retained documents. Masters are requested to complete these before the departure of the vessel. Customs and agency representatives will normally board vessels during daylight hours. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials.

WATCHMEN: Whilst berthed at an SBM, a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness and advise Berthing Master on the approach of local small craft.

SHIPMASTER'S REPORT: The SBM's are situated about 11 miles offshore.

Moorings: Starboard derrick topped and doubled up. If accommodation ladder rigged then on port-side. Not necessary for vessels up to 50,000 d.w.t.

Hoses: All sizes of reducers available.

SHIPMASTER'S REPORT: 1979.

Documents: Ship's stamp to be on all documents.

5 lists ports of call; 5 arms and ammunition (3 for Agent, 2 for Customs); 4 each of vaccinations; nil passengers; nil stowaways; crew labour list (presumably DBS); 1 copy of diversion cable; 4 lists "Nil" animals or birds.

Pilotage: Require accommodation ladder with pilot ladder for large vessels due to swell.

VHF: Channel 8 for all communications with Pilot, Loading Terminal, and Cargo Operations.

Berthing: Line required aft should preferably be polypropylene or one that floats.

Tankers: Loading temperature about 99°F, will vary slightly depending on loading rate.

TERMINAL OPERATOR: The Shell Petroleum Development Co. of Nigeria Ltd.

LAGOS (including Apapa and Tin Can Island): 06.27 N. 03.24 E.

DOCUMENTS:

Documentation Procedures:

1) By Federal Decree 2 months prior to vessel's arrival the Agent requires certain information from the Principal in order to register the vessel with NPA for obtaining the Ship Entry Notice (SEN).

Without issued SEN the vessel cannot enter Nigerian territorial waters (30 nautical miles off).

2) 7 days prior to arrival Agent requires:
10 Manifests.
3 Stowage Lists.
3 Hatch Lists.

In addition for the preparation of preliminary manifest the following is required:

Shipper, name and address.
Consignee, name and address.
Cargo Marks.
Cargo Quantities (numbers).
Cargo description.
Whether freight prepaid or collect.
Estimated time of departure from port of loading.

3) On arrival at Lagos, Master must be prepared to present:

5 Ports of Call Lists (last voyage).
5 Crew Lists.
4 Kroo Boy Lists.
4 Animal Lists.
4 Arms and Ammunition Lists (if none on board only 2).
1 Extra Manifest for transhipment (if applicable).
1 Stores List.
1 Crew Declaration List (Personal effects).
1 Declaration of Health.
1 Vaccination List.
1 Narcotics List
1 Parcel List.
5 Passengers Lists.
1 Stowaway List.

Where not applicable all documents still to be prepared bearing the marking "Nil".

Other forms prepared by the Agent and furnished on arrival.

4) For departure all documentation prepared by the Agent.

Berthing Procedures:

1) Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

2) Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approximately 30 miles)

3) On arrival at anchorage Master to contact Lagos Port, Call Sign "East Mole Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office for identical information. Thereafter watch on VHF as per Agent's instructions.

4) Only on arrival and strictly after declaration can Agent book Pilot and time for boarding will be advised.

5) The pilot station (Call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

6) The Agent with the Health, Immigration and Customs and Excise authorities board the vessel after berthing.

Unberthing Procedures:

1) Agent prepares (outward) Customs clearance and delivers a copy to Master.

2) Agent books Pilot and advises time for boarding.

3) Vessel keeps continuous watch on VHF for instructions from the Chief Pilot's Office.

PILOTAGE: Compulsory. Hoist "G" flag. Agent to give notice of ETA to Harbour Master as early as possible. Contact Pilot by VHF Channel 16. No pilot boat stationed outside. Daylight service only.

Only on arrival, and strictly after declaration, can Agent book Pilot; time for boarding will be advised.

The Pilot station (call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

ANCHORAGES:

	Length	*Draft*
Pool 1	480 ft.	24 ft.
Pool 2	600 ft.	28 ft.
Pool 3	450 ft.	26 ft.
Pool 4	450 ft.	26 ft.
Badagry Creek	380 ft.	22 ft.

Vessels not permitted to remain at anchor at Pool 1 during hours of darkness due to poor holding ground.

4 vessels, maximum length 380 ft. can anchor at Badagry Creek Anchorage. Max. draft 22 ft.

RESTRICTIONS: Draft only. Vessels of more than 600 ft. LOA are not allowed to be brought into the port. Depth over bar 9.14 m. at LW. Max. draft Lagos Port 8.23 m.

MAX. SIZE: See "Berthing" and "Restrictions".

HEALTH: Port Health Officer boards vessel on arrival. ETA's must be advised by ship or Agent direct to Port Health. Pratique automatic when from Nigerian port. Also see "General".

RADIO: Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival, enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approx. 30 miles).

On arrival at anchorage, Master to contact Lagos Port, call sign "Signal Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office identical information. Thereafter watch on VHF as per Agent's instructions.

TUGS: No specific joining position, depending on tide and on Pilot's request, otherwise close to berth. Normally ship's line used. 2 tugs 1,280 h.p., 3 tugs 1,490 h.p. and several smaller for towing lighters. 24 hour service available. Also see "General".

BERTHING: Cargo for Apapa and Lagos should be stowed separately on all liner ships as the Apapa wharves have rail connections to the North.

No specific arrival time is required for berths, except for Petroleum Wharf where tankers need high water. Berthing on ebb tide required for Fish Wharf and Ijora Wharf.

Berth	*Max. Length (m.)*	*Max. Draft (m.)*

The third Apapa wharf extension is now completed and in full use. Container quay, gantry cranes installed, with stacking area for ro/ro and containers. General cargo quay 525 m. with ro/ro ramp. Depth alongside 13.5 m.

Tin-Can Island Port, Lagos: Tin-Can Island Port (TCIP) is situated N.W. of Apapa, North of Badagry Creek. TCIP was opened in 1977 and is a self-contained operational unit with 5,000 kw. diesel generating station. Berth No's 1–8: Max. draft 8.0 m. Berths No. 9, 9A and 10: Max. draft 7.3 m.

Accommodation: Area 73 hectares, quay length of 2.5 km. Extensive quay apron 40 m. wide with berthing capacity for 10–15 vessels depending on size of vessels.

Roll-on/Roll-off facilities: Bulk berth for handling bulk commodities. 2 service berths for tugs and light crafts; quayside depth of 11.5 m. below mean Springtide water level (MSLW), although ultimate depth will be 13.5 m.

Dredged Channel is 200 m. wide with Turning Basin.

2 fresh water wells (250 m. deep) with purification plant.

10 quayside cranes – 8 of 6,000 kg. at 28 m. radius, 2 of 10,000 kg. at 25 m. radius, transit sheds and warehouse each of 7,000 sq.m. area.

CRANES: 35 quay cranes from 2.5 to 5 tonnes capacity; 2 floating cranes of 50 and 100 tonnes capacity; 77 mobile cranes from 6 to 50 tonnes capacity; 307 forklift trucks; 93 tractors; 5 freight lifters; 16 conveyors and 188 trailers.

STEVEDORES: Available. First shift: 0730–1530 hrs.; 2nd shift: 1530–2330 hrs.; 3rd shift: 2330–0730 hrs. Overtime is paid for extra duty.

MEDICAL: Agents to be given advance notice of medical attention required as early as possible. Hospital facilities available. International Certificates of smallpox and yellow fever required.

TANKERS: 3 berths operated by the Port Authority. Length 177 m. Max. draft 7.62 m. No night berthing. Water and bunkers available. (Subject to tidal restriction).

DENSITY: 1012.

FRESH WATER: Delivery by barges at between 20 to 40 t.p.h. Advance notification needed.

FUEL: Fuel oil available, coal bunkers obtained from Ijora Wharf. A guarantee of sufficient bunker to last the period of stay on a berth will be one of the conditions to be satisfied before a vessel is allocated a berth.

FIRE PRECAUTIONS: Tankers and vessels with explosives: fire-boat always in attendance with fire-control depot ashore working in conjunction with the Harbour Master on VHF Channel 16. Port area tugboats also equipped for fire fighting.

GANGWAY/DECK WATCHMEN: Advisable, available if required.

OPENING/CLOSING HATCHES: Stevedores/crew.

CUSTOMS ALLOWANCES: Tobacco allowance: 200 cigarettes per person, re-issue after 8 days. Wine/Spirit: 1 part bottle, re-issue to officers after 4 days.

IDENTIFICATION CARDS: Passports or identity cards.

CONSULS: Most countries maintain Embassies/High Commissions or Consuls.

REPAIRS: Major repairs available.

DRY DOCKS: Authority maintains large, well-equipped dockyard, which, while primarily for maintenance of Authority's own fleet, provides facilities to commercial interests. In installation is modern floating dock which has lifting capacity of 4,000 tons. Max. draft 18 ft. Synchro-lift available lifting capacity 100 tons max.

In addition to facilities offered by Authority's dockyard, major shipping agencies in port maintain dockyard installations, including slipways for raking smaller vessels and lighters; can provide first-aid repair for main line vessels.

Bull Nose – No. 1 – can accommodate a vessel of 380 ft. in length and max. draft 16 ft. 6 in.

Bull Nose – No. 2 – can accommodate a vessel of 250 ft. in length and max. draft 16 ft. 6 in.

REPATRIATION: Facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Ikeja 14.4 km. from port, served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Fixed: New Year's Day (1st January); National Day (1st October); Christmas Day (25th December); Boxing Day (26th December). Variable: Good Friday; Easter Monday; Eid-El-Fitir Festival; Eid-El-Kebir Festival; Maolud Nabiyyi (Mohammed's Birthday). Port closed on National Day, Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police Apapa 45798, Lagos Custom 20030; Ambulance Apapa 41341/227; Fire Apapa 41741, Lagos Custom 20777, General Emergencies 199.
TELEPHONES: No arrangements for telephones on board.
SERVICES: Small services available.
SHORE LEAVE: Crew members allowed ashore after clearance by Port Health and Immigration Authorities.
GENERAL: Notice issued by the Harbour Master in May, 1976:
Will all ships' Agencies note that from the date of this circular letter, Lagos Radio has been instructed to reject any telex messages from any ship addressed to the Harbour Authority unless the itemised particulars are included:

(a) Ship's name.
(b) Ship's call sign.
(c) Ship's Agent's name.
(d) Ship's length overall.
(e) Ship's tonnage loaded.
(f) Ship's draft.
(g) Nature of cargo (i.e. cement, general cargo, etc.).
(h) Last port of call.

Notice issued by the Nigerian Federal Ministry of Health in May, 1976:
Please communicate to all Masters that request for radio pratique either by international sanitary codes or otherwise must state clearly the following:

(a) Last port of call;
(b) number of crew;
(c) vaccination and inoculation of crew;
(d) date and time of arrival;
(e) condition of ship;
(f) number of passengers onboard;
(g) name of Agent.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa, Lagos. P.O. Box 265. Tel. 47770, 47776, 47779. Cables "Freight Lagos". Telex 21244.

PENNINGTON OFFSHORE TERMINAL:

04.15 N. 05.36 E. (See Plan Book)

OPERATORS: Texaco Overseas (Nigeria) Petroleum Company.
COURTESY FLAG: All vessels must exhibit the Nigerian National Ensign from their foremast or as appropriate while in the vicinity of the moorings.
LOCATION: The floating storage vessel, is the VLCC m.v. "Oloibiri" (272,535 d.w.t.) moored to SPM–A, one of two single point mooring berths.

1. SPM-A is located approximately 20 miles off the mouth of Fishtown River in a position
Lat. 4° 14′ 35.2″ N.
Long. 5° 36′ 53.2″ E.

2. The Export Tanker Buoy (SPM-B) is capable of accommodating vessels up to 250,000 d.w.t. and is located at
Lat. 4° 15′ 0.0″ N.
Long. 5° 36′ 10.5″ E.

on a bearing of North 60° West and a distance of approximately 5,000 ft. from SPM-A. The minimum water depth at SPM-B is approximately 88 ft.
APPROACHES: Incoming tankers should make their terminal approach from a Westerly direction to a point not less than 2 miles Westward of the Export Tanker Berth. At this location the Mooring Master will board the vessel, or will direct the vessel to the Anchorage (2.5 miles S.W. of the terminal).
DOCUMENTS: Following documents required by Customs and Health Officials.

Last Port Clearance.
Ship's Register.
3 copies Vaccination List.
1 copy Stores List.
1 copy Crew Declaration.
4 copies Crew List.
4 copies Passenger List.
5 copies Animal List.
4 copies Ports of Call (last 6 weeks).
5 Arms and Ammunition List.
3 copies Stowaway List.
3 Crew Labour Lists.
20 Copies Dry Tank Certificated.

Also on arrival, 20 copies of Readiness Letters.

Before sailing and immediately upon completion of loading, vessel must provide 20 copies of Ullage Report.

Government Officials representing various departments may, at their discretion, board the vessels in the Terminal area.
PILOTAGE: (See "Approaches"). The Company Mooring Master, together with Customs Officials will board incoming vessel about 2 miles Southwestward of the Terminal Export buoy. Vessel's Master will be advised on approach to the berth details in respect of mooring, unmooring, connecting and disconnecting hoses, loading operations and departure from the berth.

Vessels are requested to have a combination ladder safely and securely rigged for immediate use, and long enough to reach the Mooring Master's launch. A light line should be ready to take on board the Mooring Master's radio and/or briefcase.

The Mooring Master will remain on board during loading operations and he will be in direct control of all ship communications while in Terminal area.
RESTRICTIONS: Operation of the terminal is on a 24 hour, seven days a week basis, weather and other circumstances permitting.
MAX. SIZE: Max. d.w.t. 250,000 tons.

RADIO: Vessels proceeding to be loaded at the Terminal must cable their ETA to the Company (Cable Address: "Topcon – Lagos") 96 hours and again 24 hours prior to arrival. The Company in Lagos will then notify the Chief Mooring Master on board the Special Purpose Vessel. Also as early as possible prior to arrival, vessels should establish direct communication with the Terminal. The Terminal radio station watch keeping is for 5 minutes at 0700 – 1100 – 1500 – 1900 hrs. GMT.

Call Letters: 5 NDF (Oloibiri)
On A1 Listen on 8362 – 8365 kHz
On A2 Listen on 500 kHz.

Ship to Terminal communication while vessels are in the export tanker berth will be by portable VHF radio-telephone units, provided by Terminal.

The Company Mooring Master will advise ship's Master regarding emergency whistle signals set up for use in event radio-telephone units become inoperative. Use of ship's radio station and/or battery charging is prohibited while loading is in progress.
VHF: When in VHF range vessels shall contact the Terminal on VHF Channel 16 (156.8 mHz).
TUGS: *SPM Vessels:* The Terminal will have available 2 line handling vessels and one SPM-Hose maintenance vessel. These 3 vessels are under the control of the Mooring Master and are used to assist the mooring of the Tanker as required. These service vessels are not available to the Tanker for any other work.
READINESS: The Company will make every effort to load vessels upon arrival, or as promptly as berth is available, weather permitting.

"Notice of Readiness" will be accepted as at time of arrival, provided vessel is in all respects ready to load.

Arrival time will be considered as at the time Mooring Master boards vessel, or at the time vessel anchors off the terminal, which ever occurs first.

The Mooring Master may reject a vessel if in his judgment she is not properly equipped or suitably manned, or if, upon inspection, he deems her to have dirty ballast or tanks unsuitable for cargo. However, Company will not issue any certificate or representation purporting to state that vessel's tanks, pipes and pumps and appurtenances are clean or acceptable for receiving cargo nor will the Company assume any responsibility for "contamination of cargo aboard ship caused by condition of ship's tanks, pipes, pumps or appurtenances".

The vessel shall have in readiness 2 nylon ropes with a minimum diameter of 2 in., each approximately 200 ft. long and each terminated with 2×2.25 in. joining shackles to attach and retrieve the SPM mooring lines.

Vessels must be adequately equipped with blocks, tackle and booms to hoist the floating hose string in a safe, efficient and expeditious manner. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect cargo hoses system.
BALLAST: Absolutely no provision is made for dirty ballast. Vessels with dirty ballast will be rejected and all costs therefrom will be to the vessel's account.

It is the Ship Master's responsibility to see that no oil or oily ballast is pumped or spilled overboard. Drip pans must be used at all times and all scuppers must be plugged. The waters in and adjacent to the Terminal must not be polluted, and only clean oil-free ballast and/or clean bilge water may be discharged at the Terminal.

As soon as practicable after arrival, and prior to acceptance for loading, all vessel's tanks will be inspected for evidence of oil in ballast, and during discharge of ballast, similar inspections will continue. If evidence of oil appears at these inspections, the vessel may have to vacate berth. Upon her return, vessel will be obliged to tender new "Notice of Readiness".

If, during the first inspection or during process of loading it is revealed that vessel's tanks are not oil-tight, she will be rejected, or refused further loading.

In addition to lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate the area around the ship to satisfaction of the Mooring Master, in order that any oil on the surface of the sea may readily be detected and appropriate action taken. Vessels unable to illuminate sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for working on deck during night operations.

In the event any vessel should accidently discharge dirty ballast or spill oil in the vicinity of the Terminal, the Company shall have the right to take any action that may be necessary to clean up or remove any contamination or pollution resulting from such discharge of dirty ballast or spillage. In addition, the Company shall have the right to settle any claims of third parties arising from such contamination or pollution. All costs and expenses incurred by the Company to carry out the cleaning up of such contamination or pollution or the settlement of third party claims, shall be the joint and several liability of the Vessel, its Owners and Managers, and the Company shall be entitled to claim reimbursement accordingly in any jurisdiction.

Vessels properly equipped will be encouraged to discharge clean ballast and load simultaneously.
BERTHING: All manoeuvring of vessels within the loading berth area is to be done only in accordance with advice of the Company's Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety and manoeuvring of the vessel. Vessel's Master or a qualified Deck Officer must be on bridge at all times during manoeuvring.
EXPORT TANKER BERTH FACILITIES: The Export Tanker Buoy is a conventional SBM which is 10 m. in diameter and held in position by 6 chains secured to piles sunk in the seabed. Two mooring hawsers with one chain and a single floating hose string extend from the buoy.
CONNECTING MOORING LINES: When the vessel is within reasonable distance of the SPM-B, ship's line will be carried by a line handling launch to the floating buoy line and secured. This line will then be heaved aboard. As the buoy ropes come clear of the water it will be

noted that chains are attached to them. This chain is to be secured to the bits in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow. Power must be available at all times on all winches and windlass while vessel is at the berth.

HOSES: The hose system is 910 ft. long (26 sections) terminating in a 12 in. hose.

LOADING: During loading, the International Code Flag "B" shall be displayed from top-mast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile, and showing unbroken light all around the horizon.

Raising, connecting, disconnecting and lowering of the floating hose system will be performed by vessel's crew under direction and supervision of an appropriate vessel's Officer as advised by the Mooring Master, who will remain on board while the vessel is in moorings.

After the vessel is securely moored the floating hose will be lifted to the rail on the starboard side amidships. The weight of the lift is approximately 5 tons and is lifted with the vessel's gear. The Mooring Master advises the vessel's personnel in the lifting, connecting, disconnecting and lowering of the hose system. A vessel's Deck Officer must be present, and direct the crew in all hose handling. There must be sufficient crew on deck to perform this work.

The vessel's Master is responsible for own vessel at all times. The max. loading rate is about 15,000 b.p.h. and the Company Mooring Master will advise in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the Terminal facilities. Manipulation of the vessel's valves is the direct responsibility of vessel's personnel.

Prior to commencement of loading, the Chief Officer will assure the Mooring Master that sea suction valves are *closed* and he will make note to that effect in Mooring Master's log before cargo loading is started. Final ullaging and computation of cargo will be done by an Officer of the vessel who will hand this information to the Mooring Master for transmittal to the Terminal for use in comparing metered-out cargo.

Caution: The incoming oil stream is controlled by the Terminal and it is extremely dangerous to close a cargo valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hoses, piping or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Emergency Signal: When normal ship-to-Terminal communications fail, the emergency signal to stop the flow of oil will be a continuous blast on the whistle until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations will be shut down until communications can be re-established.

Fire on Board of Export Tanker: The emergency signal must be given immediately to the Terminal. A vessel's Deck Officer with sufficient crew members must be ready and when so ordered by Mooring Master, close the manifold, disconnect the hose and standby on fo'castle ready to let go of the mooring line.

Terminal Stops: Request for the Terminal to stop the flow of cargo at a predetermined tonnage must be made in writing. Requests must include the statements that the Company will not be held responsible for any error and in case of overloading, the excess cargo cannot be pumped back to the Terminal. Some delays are always incurred when such a Terminal stop request is made.

SAFETY: The vessel's personnel are responsible for the safety of the vessel, and must take all necessary precautions whether or not so advised by the Mooring Master. Any safety precautions imposed by the Company Mooring Master and disregarded by ship's Officers or Crew, will be considered just cause for rejection of the vessel and all expenses and liabilities related thereto will be for account of the tanker.

Not less than 1 Deck Officer and 3 seamen shall be available on deck at all times while vessel is in the moorings.

One of those to be kept always on look-out on the bow to avoid contact with the SBM.

Power must be available at all times on deck winches and windlass while vessel is in the moorings.

The presence of unauthorized craft alongside is extremely hazardous and Masters are requested to require all unauthorized craft to clear the vessel's side prior to ballast pumping and cargo loading.

Mooring Masters are authorized to shut down loading operations during severe electrical storms, if another vessel or craft of any description comes alongside the loading vessel, and under any other circumstances which imperil loading operations.

MEDICAL: Medical assistance on an emergency basis only.

REPAIRS: No facilities of any kind are available. Pennington Offshore Terminal is considered an open roadstead and under no circumstances may engines be shut down for repairs while a vessel is moored in the Export Tanker Berth. The vessel must be able to depart from the berth immediately on instructions to do so.

WEATHER/CURRENTS: Wind and swell are mostly from a S.W'ly direction. The weather is generally good from November to May but is unfavourable during the wet season months of May to November. The currents are irregular and at times strong. The Mooring Master will provide the Master with this information when boarding the vessel.

FRESH WATER: Not available.

FUEL: Not available.

STORES: Not available.

REPATRIATION: Not permitted except in grave emergencies.

SHORE LEAVE: Not permitted.

GENERAL: Cargo inspection services are available from E. W. Saybolt and Co. S.A. who have offices in Lagos. The use of this service will be for account of vessel or Consignee.

Cash and laundry service not available.

AGENCY: The Company does not perform general agency functions. Owners of vessels calling at the Terminal may arrange for their own Agents, although due to the location of the Terminal there are no Agent's offices in the area. For this reason the Company will arrange for the minimum agency service necessary to document and clear vessel and export cargo through Nigerian Customs. Costs of this Agency service will be charged back to appropriate parties.

NOTE: Should any vessel or craft sink or become an obstruction in the vicinity of the Terminal or at the Terminal, the Terminal Operator shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the owners. All expenses of such removal shall be borne by the vessel or craft or by those owning it at the time of the accident causing the obstruction, and the Terminal Operator shall be entitled to reimbursement by them for any such expenses incurred by it.

PORT HARCOURT (incl. Okrika): 04.46 N. 07.00 E.

DOCUMENTS: Ship Entry Notice, See "Lagos".

14 days prior arrival Agent requires:

- 10 Manifests.
- 3 Stowage Plans.
- 3 Hatch Lists.

On arrival at Port Harcourt, Master to present:

- 7 Ports of Call Lists.
- 7 Crew Lists.
- 2 Kroo Boy Lists.
- 3 Animal Lists.
- 5 Arms and Ammunition Lists.
- 1 extra Manifest for transhipment is applicable.
- 4 Stores Lists.
- 3 Crew Declaration Lists (belongings).
- 1 Declaration of Health List.
- 4 Vaccination Lists.
- 3 Narcotics Lists.
- 2 Parcel Lists.
- 6 Passenger Lists.
- 2 Stowaway Lists.

Where not applicable, forms to be marked "nil". All other forms including departure documentation prepared by Agent.

PILOTAGE: Compulsory from Bonny Fairway buoy. The pilot station for Port Harcourt is at Bonny, 15 miles from Fairway Buoy, 28 miles from Port Harcourt. The Harbour Master keeps watch on VHF Channels 16 and 14 and on 2182 kHz from 0700 hrs. to 1800 hrs. Pilot boards at Fairway Buoy from pilot-cutter green hull, stone colour superstructure.

Position of Fairway Buoy: 4° 12′ 56″ N., 7° 00′ 28″ E.

It should be noted that Bonny is an Oil Terminal and as such heavy traffic of tankers is continuous. In extreme circumstances vessels may be requested by Harbour Master to pass the channel from Fairway Buoy at Bonny, and anchor at Bonny without a Pilot, in which case latest Notices to Mariners should be studied in order not to damage oil pipe-lines in prohibited anchorage areas.

ANCHORAGES: Position West of Fairway Buoy, depths 8–9 fathoms. Also on Bonny River at Bonny Town.

RESTRICTIONS: Night pilotage available for tankers at Bonny only. Vessels for Okrika and Port Harcourt can only navigate during daylight.

Bonny channel is 11.73 m. deep and Okrika is 9.14 m. deep at Chart Datum.

MAX. SIZE: Max. draft is 7.62 m. at HW, minimum depth in approaches 5.49 m. Datum. Max. length 600 ft., no restrictions on beam. Ebb tide reaches a max. of 3 knots off the berths and 2.5 knots in the river, flood tide 2.5 knots off berths and in the river.

Berth No.	*Length (m.)*	*Max. Draft (m.)*	*Remarks*
1	158	7.92	
2	158	7.92	
3	158	7.92	
4	110	7.92	
5	128	7.92	
6	134	7.92	
7	134	7.92	
8	137	7.62	Coal berth with conveyor to storage hoppers.
9	143	7.62	B.O.P. berth for loading palm oil by direct pipe-line and unloading explosives.
10	137	6.71	Kidney Island.
11	137	6.71	Timber Buoys.
12	107	6.55	Poo Anchorage.
Lighter Berth	8	1.83	
Tanker Buoys	244	6.71	

HEALTH: Q-flag to be shown on arrival, except if from another Nigerian port. Yellow fever and smallpox inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisory.

TUGS: One tug available, 1,490 h.p.

RADIO: Master to cable "Agent" Lagos via Lagos Radio ETA 7, 4, 3, 2 and 1 day prior arrival. Master to contact Bonny Harbour Master on VHF Channel 14 on arrival at anchorage giving all vessel and cargo particulars, Agent's name, SEN No., and date of issue.

Master also required to advise Port Harcourt Harbour Master identical information through Lagos Radio and to contact Port Harcourt Agent on VHF Channel 14, keeping watch on this Channel per Agent's instructions.

BERTHING: *Main Quay:* The main Quay is 3,459 ft. long and capable of berthing 7 vessels.

The old quays at Port Harcourt have been completely reconditioned to enable them handle bigger ships. Dredging in front of these quays is in progress and when completed ships with drafts of up to 29 ft. will be able to use these berths.

B.O.P. Berth. This berth lies outside the Quay area, and is for the loading of palm oil by means of a direct pipe-line from the installation of

Bulk Oil Plants (Nigeria) Limited. It consists of a central "T" jetty with dolphins and is capable of berthing vessels up to 480 ft. in length. It is also used for the discharge of explosives as such cargo is not permitted to be handled across the general cargo Quay.

Oil is supplied by a 6 in. diameter pipe at a maximum rate of 250 t.p.h.

Okrika Oil Refinery: Okrika lies on the Bonny River, 56 km. from the sea. The approach over the bar is by a channel 12.8 km. in length, dredged to a depth of 11.58 m. Chart Datum. The river from Bonny to Okrika has been dredged as necessary to a depth of 8.84 m. Chart Datum. The bar channel and river are well buoyed with light buoys, port and starboard. There are also beacons in the river. Jetty at the oil refinery suitable for berthing coastal and ocean tankers up to 33,000 d.w.t. The jetty is "L" shaped with a square dolphin at the end of the arm. Ocean tankers secure on the outside of the jetty making fast to two sets of mooring dolphins each end. The coastal vessels and barges are berthed on the inside of the jetty. Oil is supplied via gantry hoses on either side.

Max. draft limit for tankers sailing from port 9.75 m., draft for berthing 7.92 m.

Fresh water available from the jetty.

The tug based at Port Harcourt is available if required.

Pilotage is compulsory from the Fairway Buoy to the Refinery Jetty except for Naval vessels and vessels of less than 1,000 tonnes whose Master holds a licence issued by the Nigerian Ports Authority. All vessels using the Refinery Jetty will berth and unberth on the flood tide only during daylight hours until further notice.

Coal Handling Facilities: Facilities for loading coal have been completed and a conveyor capable of loading about 60 t.p.h. is working. Max. draft at the coal berth is 7.62 m. This berth is situated at the Northern end of the Port, berth No. 8.

STEVEDORES: Gang requirements and hatch distribution should be included in 48 hours ETA cable to Agent. Discharging general cargo 8 tons per gang/hour, cement 15 tons per gang/hour, bagged cargo 20 tons per gang/hour, loading produce 15–20 tons per gang/hour.

MEDICAL: Doctors available 24 hours, but limited supply of medicaments. Yellow fever, cholera and smallpox vaccination required.

DENSITY: Appx. 1015.

FRESH WATER: No restriction, from barge (15 ton/hour). From quay low pressure, max. 8 ton/hour.

FUEL: Most standard lubricants available, fuel available by barge or road tanker. Requirements by 48 hours ETA cable.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by crew.

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle spirits per officer per 7 days.

IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.

REPAIRS: Only very minor repairs available, no spares.

REPATRIATION: Possible via Lagos.

AIRPORT: Port Harcourt 11.2 km. from port. Twice daily flights to Lagos, no international flights.

TIME: GMT plus 1 hour, no changes during the year.

HOLIDAYS: See "Lagos".

POLICE/AMBULANCE/FIRE: All can be contacted by tel. 999.

SHORE LEAVE: Allowed provided crew carry passport or seaman's book.

DEVELOPMENTS: Four berths are planned on a new site at Port Harcourt.

SHIPMASTER'S REPORT: 1977.

The ETA for this port should be sent via Lagos Radio, but much earlier than 48 hours. Better as soon as possible, for communication between Lagos and the out-ports is poor.

The normal practice at the moment is that the Master enters the Bonny River himself after permission from Bonny Harbour Master. The anchorage position on Bonny roads is given by Harbour Master and vessel can proceed as far as buoy 1A. (A few miles up Bonny River).

Discharging at Port Harcourt not only occurs alongside, but from Dawes Island upwards to Port Harcourt. Ships are discharged while laying at anchor. No buoys available. The cement cargo ships especially are discharged this way.

At Dawes Island the Bonny River Pilot leaves the ship and is replaced by a Port Harcourt Pilot.

Tugs are not available for mooring.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Limited, PO Box 622, Port Harcourt, tel. 8059, 8062, 8053. Telex Freight Lagos 21244 attention – Port Harcourt.

QUA IBOE: 04.20 N. 07.59 E. (See Plan Book)

LOCATION: The Terminal is located on the Eastern side of the estuary of the Qua Iboe River in approximate position Latitude 4° 33′ 00″ N., Longitude 7° 59′ 30″ E.

The crude oil storage facilities consist of seven tanks each of 500,000 barrels capacity.

At the present time considerable work is being carried out in the area.

ESSENTIAL REQUIREMENTS:

1. No dirty ballast.
2. Advise arrival time.
3. Vessel to have ready prior to arrival:
   (a) Two ships' ropes on the bow, or long nylon messenger 1.5 in. diameter. One floating ships rope (polypropylene) on the stern for the mooring boat to tie-up.
   (b) Port side derrick, and gear rigged to lift floating hoses.
4. Mooring Master meets vessel in the suggested safe anchorage area.
5. Have pilot accommodation ladder combined, ready *or air hoist.*
6. Make a lee for the Mooring Master to board the vessel.
7. The Master of the vessel is responsible for the safety of his ship at all times.
8. Ship's crews perform all operations of mooring, unmooring, connecting and disconnecting hoses on board ship.
9. No shore leave.
10. Whilst arriving fly the Nigerian Ensign (Green-White-Green, vertically arranged). By day: Fly flag "Q" for quarantine service. By night: Display red over white light.
11. Nigerian time is GMT plus 1 hour.
12. No supplies of any kind, no medical services (except in cases of emergency) or other services are to be expected at Qua Iboe Terminal.
13. No Agency.

DOCUMENTS:

The following documents are required by the Nigerian Government Customs Representative at Qua Iboe Terminal.

1 Copy Crew List
1 Copy Ports of call within the last three months
2 Copies List of Birds and Animals
1 Copy Passenger List
1 Copy Store's List
2 Copies List of arms and ammunitions
1 Copy Crew personel effects List

Attached to the store list, should be a list of Narcotics.

If the vessel has a clearance for another port the deviation cable has to be shown to the Customs Officer.

PILOTAGE: Vessels loading at Qua Iboe will be boarded by a Company Mooring Master either at the anchorage or where directed.

The Mooring Master will advise the ship's Master in regard to the approaches to the berth; and the mooring, unmooring, connecting, disconnection of hoses, departure from the berth and loading operations.

All vessels must have upon arrival a pilot ladder in good, clean condition safely and securely rigged. A vessel arriving with freeboard of 30 ft. or more must use its accommodation ladder in conjunction with the pilot ladder unless a "pilot hoist" or similar arrangement is available.

In the event that a vessel is deemed by the Mooring Master to be improperly or insufficiently equipped with adequate mooring facilities, lines or gear, then he shall so inform the ship's Master. In such an event the vessel will not be brought into the mooring until satisfactory gear or equipment is provided.

ANCHORAGE: Numerous submarine pipe-lines and structures exist in the approaches and close vicinity of the loading berths.

Under no circumstances whatsoever should vessels anchor except in the approved anchorage described below.

The safe Anchorage Area is located two (2) miles Southeast of the Berth operation platform (BOP) and clear of the SPM's between the parallels of Latitude 4° 10′ North and 4° 13′ North and meridian 8° 03′ East and 8° 07′ East.

Vessels bound for the Qua Iboe Terminal should proceed with extreme caution from the Southeast to the safe Anchorage Area. If uncertain of the vessel's position because of poor visibility stay Southeast and clear of the safe Anchorage Area until visibility has improved.

HEALTH: Pratique may be granted by radio (Lagos Radio).

The vessel should have a clean Bill of Health or an equivalent document from the last port of call. The vessel's Master and all members of the crew shall possess International Certificates of Health showing valid Smallpox, Cholera and Yellow Fever Vaccination Certificates.

MAX. SIZE:

Berth	*Length*	*Beam*	*Draft*
No. 2 (SPM1)	No restriction	No Limit	72 ft.
No. 3 (SPM2)	No restriction	No Limit	72 ft.

RADIO: Cable address: Mobil Oil Lagos. Telex No. 21228.

Vessels proceeding to load at Qua Iboe must radio:

1. MOBIL OIL, Lagos indicating their cargo requirements and ETA 7 days prior to arrival. When their passage time is such as to not permit a 7-day ETA then the maximum possible advance notice of arrival and cargo requirements must be given.
2. MOBIL OIL, Lagos, confirming or amending the ETA given in (1) above at 72 hours and 24 hours prior to arrival.
3. The Nigerian Government Port Health Officer at Lagos at least 72 hours before arrival advising the following:
   (a) Vessel's name and call sign.
   (b) ETA Qua Iboe Terminal
   (c) Last port of call
   (d) Cargo requirements
   (e) Number of crew and whether healthy or not
   (f) Whether or not a doctor on board
   (g) Requesting free pratique.

If the request for free pratique is granted the Port Health Officer will so advise the vessel by radio. If the request has not been radioed to the vessel, the yellow flag "Q" by day or red over white lights by night must be displayed on arrival at Qua Iboe.

In addition, as soon as possible prior to arrival vessels should establish direct communication with the Terminal ("Qua Iboe Control") on VHF international calling Channel 16 (156.8 mHz). After initial contact communication will continue on Channel 14 (156.7 mHz) or on others as advised by Qua Iboe Control.

Vessels not equipped with VHF or whose equipment is not fully functional should advise MOBIL OIL, Lagos, at the time of their ETA messages previously referred to.

The (BOP) Berth Operation Platform is fitted with a racon and transmits the Morse signal "K" (—·—). All vessels equipped with 3 cm. radar will be able to pick this up on their radar screen. Covering distance approximately 17-20 miles.

After direct contact has been established with the vessel, Qua Iboe Control will transmit to her, giving preliminary requirements and Berthing instructions.

TUGS: None. Terminal launches assist in berthing.

BERTHING: The tanker loading facilities consist of two berths:

No. 2 Berth: A single point mooring (SPM) buoy located in a position Latitude 4° 13′ 05″ N., Longitude 8° 02′ 45″ E., approximately 19.4 nautical miles S.E. of the terminal tank farm. Depth of water at the manifold 85 feet.

No. 3 Berth: A single point mooring (SPM) buoy located in a position Latitude 4° 13′ 30″ N., Longitude 8° 03′ 30″ E., approximately 18.8 nautical miles 165° from the terminal tank farm. Depth of water at the manifold 85 ft.

All vessels must be equipped with adequate on-deck and overside lighting. A spotlight should be rigged on the bridge when berthing during the hours of darkness.

To assist in the vessel's turnaround, tankers should have all booms and cargo gear rigged on the port side as advised by radio from the Terminal before the ship is boarded by the Mooring Master.

Berthing Requirements: No. 2 and 3 Berths: All vessels proceeding to the SPM must secure their anchors with chain stoppers or compressors. Floating hoses taken aboard on the port side.

The moorings have been designed in general accordance with the recommendations of the SPM Forum. The mooring lines consist of two 15 in. or 18 in. braided nylon ropes each 160 ft. long with floats attached.

In order to have the mooring lines aboard, the vessel should have ready on the forecastle a rope messenger at least 5.5 in. in circumference and a minimum length of 120 fathoms. The messenger is led through a fairlead, large enough to permit the entry of a 3⅞ in. dia. chafing chain, on port side or centre line (Panama Lead) down to the water clear of the ship's bow. This messenger should have a good lashing attached to the eye.

The Terminal Launch crew then make this fast to a 600 ft.×12 in. plaited polypropylene buoy approach or pick up rope and then the ship is hove steadily towards the buoy until the chafing chain lies across the fairlead. The chafing chain then will be shackled to a heavy wire strop, which has been placed over a suitable set of bitts. The wire strops and shackle are provided by the Terminal and put on board as the ship approaches the buoy.

HOSES: *Tanker on Light Draft: Weights of hose strings for multi-buoy moorings:* Indication only of approximate weights of hose strings in *long tons* (including fittings) with all hoses full of crude oil S.G.0.850. Assumed total lift 25 ft. above deck level.

Tanker on Light Draft: Weights of Hose strings for SPM: Indication of hose strings approximate weights of hose strings in *long tons* (including fittings and floats) with all hoses full of crude oil S.G. 0.850. Assumed total lift 25 ft. above deck level.

Size of Tanker	Inside Diameter of Hoses 12 in. – 16 in.×30 ft.
285,000 d.w.t.	6.8 tons
200,000 d.w.t.	6.0 tons
100,000 d.w.t.	5.2 tons
80,000 d.w.t.	5.0 tons
50,000 d.w.t.	4.5 tons

LOADING: The Mooring Master will inspect the vessel's cargo tanks and will sign the dry certificate prior to the commencement of loading.

The Mooring Master may reject a vessel if it is not upon inspection properly equipped or if it is not suitably manned or if deemed to have dirty ballast or tanks unsuitable to receive cargo. Any vessel rejected because of being insufficiently equipped, will automatically nullify her (NOR) "Notice of Readiness" and will not be accepted until satisfactory evidence is produced, that the vessel's gear is in good working condition.

The ship's Master or a suitable Qualified Officer must be on duty on the bridge at all times while the ship is manoeuvring, mooring and unmooring or whenever requested by the Mooring Master.

All mooring, unmooring and hose connection and disconnection must be carried out by the ship's crew under the supervision of a suitable qualified Officer acting on the advice of the Mooring Master.

Ship's port loading manifolds should be prepared for two 12 in. hose connections prior to arrival at the Qua Iboe Terminal. Sundry equipment should include tools to connect the hoses, nuts, bolts, gaskets and rope strops as none of these items are supplied by the Terminal. All 12 in. hoses have ASA flanges.

The Notice of Readiness will be signed by the Mooring Master on behalf of the Company. The time for giving the Notice of Readiness is the time of the vessel's arrival at the usual anchorage, or the time of boarding of the Mooring Master, whichever is the earlier. Notice of Readiness will not be accepted unless the vessel is ready to load.

Loading rates will vary according to conditions but can be expected to be up to 65,000 bbls. per hour at the SPM's.

Information as to the anticipated loading rate should be obtained from the Mooring Master who will also advise the expected specific gravity and loading temperature.

The maximum possible notice in regard to slowing the loading rate for "topping off", etc. should be given to the Mooring Master.

Pressure Surges: Because of the long lengths and large diameters of the pipe-lines, ships' loading valves must not be closed against the flow of oil. Vessels provided with mechanically or hydraulically operated valves whose closing time is less than thirty seconds must advise the Mooring Master accordingly. In such circumstances the loading rate may have to be reduced.

BALLAST: There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Masters are required to sign oil pollution advice form letters on arrival. If a vessel is observed to be discharging dirty ballast, then it may be liable to prosecution or penalty and all further discharge will cease. The discharge of oil from bilges or other spaces is similarly strictly prohibited.

A vessel must have sufficient ballast for safe manoeuvring into the berth.

DENSITY: 1018.

FRESH WATER: Not available.

FUEL: Not available.

STORES: Not available.

MEDICAL: Only emergency medical facilities.

TIME: Nigerian local time is GMT plus 1 hour throughout the year.

CUSTOMS ALLOWANCES: Nigerian Government Customs Officials will board the vessel as soon as possible after arrival to give inward clearance and "free pratique" service. Nigerian Government Regulations are strictly enforced.

Cigarettes, cigars, tobacco, matches, spirits, wines, perfumes, arms, ammunition and possible other items have to be locked under Customs seal from time of arrival of ship in port until time of leaving territorial waters.

Each person is allowed 200 cigarettes per week of stay or equivalent amount of tobacco or cigars in lieu thereto. Each person is allowed 1 bottle of spirit and 1 case of beer. Special allowances are made for Masters under special circumstances. If the slop chest items and the bonded store items are not combined in one locker, the Customs Officer has to be informed.

REPATRIATION: Crew changes not possible.

SHORE LEAVE: Not possible.

GENERAL: *Agency:* The Company will handle documentation requirements for vessels loading at the Terminal. It does not carry out general vessel agency functions. Ship's mail and personal mail will be handled through the Mooring Master.

Early Departure Procedure: The Early Departure Procedure will be used at the Qua Iboe Terminal.

Courtesy Ensign: All vessels must exhibit the Nigerian National Ensign from the foremast or as appropriate while in the vicinity of the moorings.

"B" Flag: During loading, the International Code Flag "B" must be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red all around light must be displayed where it can best be seen.

Communications at the Berth: The primary system of communication with the Terminal while in berth shall be through the Mooring Master by means of portable VHF units provided by the Company.

Charts: The following charts and nautical publications may be used to assist vessels bound for Qua Iboe.

British Admiralty chart: No. 1860
British Admiralty Sailing Direction: Africa Pilot Vol. I
U.S. Naval Oceanographic chart: No. 2352, 2353
U.S. Naval Oceanographic Sailing Directions No. 50-S. West Coast
Also appropriate tide and tidal stream tables.

Safety Precautions:

(a) The ship's engines must remain ready with full power for immediate use. No repairs of any sort will be permitted in the moorings.

(b) Fire Fighting equipment shall be in instant readiness throughout the vessel and additional extinguishers available at the loading manifold. Fire hoses must be connected at all fire stations and ready for immediate use.

(c) Not less than one deck officer and three seamen shall be available on deck at all times while vessel is in moorings.

(d) Power must be available at all times on all deck winches and on anchor windlass while vessel is in moorings. Vessels moored to SPM to have engines in hand.

(e) All deck scuppers must be plugged tight before connecting the submarine and deck hoses, and remain plugged until all hoses are disconnected.

(f) Adequate deck lighting must be available for night mooring and loadings. A good floodlight will be required to illuminate the area around the submarine and cargo hose connections during cargo loading operatings. During the discharge of ballast and loading of cargo at night, the sea area around the vessel must be adequately lighted.

(g) No transistor radio sets or other electrical appliances may be used on deck unless certified for use in hazardous petroleum areas.

(h) Smoking will not be permitted on deck whilst in the moorings and will only be permitted in places approved by the Mooring Master. All alleyway doors to passageways, leading to deck areas are to be kept closed during cargo transfer operations.

(i) The I. O. T. T. S. G. Check List will be used jointly by vessel's staff and Mooring Master in order to arrive at a mutually agreed safety standard.

AUTHORITY: Mobil Producing Nigeria, Lagos.

SAPELE (incl. Koko): 05.55 N. 05.42 E.

PORT LIMITS: Escravos Fairway Buoy.

DOCUMENTS: See "Burutu".

PILOTAGE: Compulsory. Approaching Escravos fairway buoy Master to contact Escravos Pilot on VHF Channel 16. Pilot will take vessel to Bennet Island where Master to contact Harbour Master Sapele on VHF Channel 16 for pilotage to Sapele.

ANCHORAGES: At Bennet Island. Also for ships max. LOA 112 m. at Ogharife. Safe arrival draft 19 ft.

RESTRICTIONS: None under normal conditions.

MAX. SIZE: Max. permissible length 239.57 m., draft 16.5 ft. plus tide for the day, minus Master's underkeel clearance. (June 1980 – Max. draft 19 ft.).

HEALTH: Normal International Regulations, but between ports in Nigeria nothing required.

RADIO: ETA and ETD best passed via Lagos Radio to Lagos Agents, who in turn advise local Agents. Port Authority operate VHF Channels 16, 14, 13, 12, 11 and 9.

TUGS: None available.

BERTHING: Mooring/unmooring normally done in daylight hours.
Sapele:

Berths	*Type*	*Berth Length (m)*	*Depth (m)*
1	Anchorage/Stern to Buoy	164.592	7.315
2	Anchorage/Stern to Buoy	168.250	7.620
3	Anchorage/Stern to Buoy	239.573	6.706
4	Anchorage/Stern to Buoy	177.699	6.706
5	Anchorage/Stern to Buoy	175.565	7.315
6	Anchorage/Stern to Buoy	208.483	7.620
7	Anchorage/Stern to Buoy	151.790	7.620
8	Anchorage/Stern to Buoy	117.043	7.925
9	Anchorage/Stern to Buoy	151.790	6.706
10	Anchorage/Stern to Buoy	96.926	7.925

14	Anchorage/Stern to Buoy	208.483	6.706
15	Anchorage/Stern to Buoy	160.934	6.706
16	Anchorage/Stern to Buoy	224.942	6.096
17	Anchorage/Stern to Buoy	202.997	7.010
18	Anchorage/Stern to Buoy	—	5.791
A.T. & P.	Wharf I	122	4.88
A.T. & P.	Wharf II	122	4.67

Koko: One wharf length 137.16 m., depth 7.315 m. Also see "Shipmaster's Report".
STEVEDORES: Handled by Shipping Agents.
MEDICAL: Local general hospital.
TANKERS: Only small coastal tankers.
DENSITY: River water almost fresh at all states of tide.
FRESH WATER: Available by barge.
FUEL: Available from Warri. Diesel available locally.
GANGWAY/DECK WATCHMEN: Supplied by Shipping Agents.
OPENING/CLOSING HATCHES: Either by crew or stevedores.
CUSTOMS ALLOWANCE: (Tobacco/wine allowance): 200 cigarettes per person per week. 1 bottle per officer per week.
CARGO GEAR: No extra requirements.
IDENTIFICATION CARDS: Seamen's identity card.
CONSULS: None.
REPAIRS: No facilities.
DRY DOCKS: None.
REPATRIATION: By road to Lagos/Benin and international airways.
AIRPORT: Local airline operates between Warri and Lagos several times daily and also through Benin City airport. Distance to Warri 48 kilometres, and to Benin 52 kilometres.
TIME: GMT plus 1 hour.
HOLIDAYS: Port only closed Christmas Day, Good Friday and Republic Day.
POLICE/FIRE: Police Sapele 19. No fire service.
TELEPHONES: No facilities exist for placing on board.
SERVICES: None.
SHORE LEAVE: Allowed.
DEVELOPMENTS: The Nigerian Government plans to build a new port complex at Ogorode, near the flour mills at Sapele. Scheduled for completion in March, 1982, the new port will have six berths each of about 200 m. in length, plus one Ro/Ro installation. The expected draft alongside will be 10.5 m. There will be an increase in draft after the completion of the port.
SHIPMASTERS REPORT: 1977 (Koko).
Documents: Livestock list also required.
Pilotage: Request Creek Pilots through Escravos Pilot on VHF Channel 16. The Pilots are local fishermen and race each other to the vessel to offer their services. They will not proceed beyond the breakwater. Special care must be taken when entering, as many of the buoys are out of position.

A strong N.W. current runs by the breakwater, also there is a heavy swell which makes steering difficult.

Draft varies but seems to be not less than 18 ft. at LW, to 24 ft. HW. In Escravos not only a Pilot boards the ship but a helmsman too. The latter is quite useful especially in the narrow part of Nanacreek.

Koko has a VHF station Channel 16 for port operations.

Cargo shed capacity is insufficient, so more often than not this shed is full and cargo is discharged into "direct delivery". But because of the bad infrastructure of this port and the frequent lack of lorries, this discharge is a slow operation (sometimes less than 100 tons per day).

Ships waiting for berthing at Koko can anchor downstream or upstream of the berth. The anchorage is good and the "Creekpilots" stay on board, i.e. they stay till the ships return to Escravos, where they boarded.

Repatriation: By road to Warri and there by small plane to Pt. Harcourt or Lagos.
AUTHORITY: Nigerian Ports Authority.
AGENT: Alraine (Nigeria) Ltd. Private Mail Bag 4030, Sapele Tel. 177. Telex: Lagos 21244.
N.B. Correspondence should be addressed to Warri office, see "Burutu".

GENERAL:

REGULATIONS FOR USING THE COMMON SEA-LINE APPROACH TO THE PORT AREAS IN GRENLAND:

Pursuant to the second paragraph of Section 18 of the Act of 24th June 1933 relating to the Harbour Administration, cf. Royal Decree of December 1977, the Ministry of Fisheries lays down the following provisional regulations:

1. Introductory Provisions

1.1 *Aim:* The aim of these regulations is to ensure the safety of shipping and the local environment in the Grenland area.

1.2 *Definitions:* For the purpose of these regulations the following shall mean:

Vessel: any vessel of 50 g.r.t. and above, including vessels without displacement and seaplanes used or usable as a means of transport by water, as well as all vessels which tow or push other vessels or objects.

Dangerous Cargo: — cargo classified under the International Maritime Dangerous Goods Code when the quantity carried is 5 tons or more (IMDG Code).

— cargo classified under the IMCO code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (Chemicals Code).

— cargo classified under the IMCO code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (Gas Code).

— cargo carried in bulk with a flash point lower than 61°C.

1.3 *Application:* These regulations shall be applicable to vessels navigating the waters North of a line through the North point Molen — North point Sasteinen.

Vessels which have been carrying dangerous cargo, and which in ballast are not gas-free, shall be regarded as vessels with dangerous cargo. In addition, for the transportation of chlorine, special rules laid down by the Maritime Directorate shall apply.

2. Specific Provisions

2.1 *Sea-Traffic Co-ordination Centre:* The function of the Sea-Traffic Centre will be to co-ordinate sea traffic within the area for which the Centre is responsible, and at the same time to contribute to ensuring that all traffic proceeds safely and effectively.

With the help of communication equipment and other technical aids, the Sea-Traffic Centre shall pass on information to the vessels, thus providing them with a surer basis for decisions regarding the vessels' passage and navigation.

The Sea-Traffic Centre may initiate such safety measures as are deemed necessary to ensure sea traffic the maximum degree of safety at all times.

The Sea-Traffic Centre may not interfere actively with the individual vessel's passage and navigation. The Shipmaster has sole responsibility for all aspects of the vessels passage, navigation and manoeuvring.

It is the responsibility of the Sea-Traffic Centre to see that these regulations, as well as instructions issued pursuant thereto, are observed.

Inward vessels or vessels already in the waters shall direct all reports and questions connected with the vessel's passage and navigation to the Sea-Traffic Centre over the VHF radio-telephone Channel 11, or by telephone or telex. Other radio messages concerning the vessel's business operations shall be transmitted via the nearest coastal radio station.

2.2 *Clearance:* Vessels intending to use these waters must obtain permission from the Sea-Traffic Centre before the vessel may enter the waters or leave the quay or anchorage.

Clearance must be obtained in good time and at least one hour before the vessel arrives at or shall enter the waters concerned. Vessels carrying dangerous cargo moreover required to give at least 24 hours' notice of their port of arrival.

Requests made to the Sea-Traffic Centre for clearance must contain the following information:

(a) Name of vessel.
(b) Call sign.
(c) Nationality.
(d) Length.
(e) Breadth.
(f) Draft.
(g) g.r.t.
(h) Port of destination.
(i) Type of cargo.
(j) Amount (in tons) of dangerous cargo.
(k) Expected time of arrival.
(l) Expected time of departure.
(m) Name of Shipmaster.

Furthermore, the vessels may be required to give the Sea-Traffic Centre such information as may be deemed necessary to ensure that all traffic proceeds safely and effectively.

In addition, attention is drawn to the reporting requirements in connection with notification of position and the ordering of Pilots.

2.3 *Notification of position and VHF radio-telephone listening duty:* Vessels intending to use the waters defined under item 1.3 must have maritime VHF radio-telephone equipment in proper working order.

Notification of Position: Vessels shall report their position when:

(a) passing the line through North point Molen — North point Sasteinen
(b) leaving quay or anchorage
(c) arriving at quay or anchorage.
(d) passing any other position determined by the authorities.

Such notification shall contain the following information, dependent on whether the vessel is inward or outward bound.

Inward:

— name of vessel
— time of passing the line through North point Molen — North point Sasteinen
— expected time of arrival at quay or anchorage
— time of arrival at quay or anchorage

Outward:

— name of vessel
— time of departure from quay or anchorage
— expected time of passing the line North point Molen — North point Sasteinen
— time of passing the abovementioned line.

Notification of position shall be addressed to the Sea-Traffic Centre (Trafikksentralen), Brevik, via VHF Channel 11.

If the notification of position cannot be delivered direct to the addresses's VHF station, it must be sent without delay by other means, in port by ordinary telephone/telex or at sea via Tjome radio.

Listening duty: While underway in the area, all vessels passing through the stated waters must listen to VHF Channel 11.

This provision regarding listening duty also applies to pleasure craft equipped with a VHF radio-telephone.

2.4 *Use of Norwegian State Pilot:* Pursuant to Section 5 in the Pilot Service Act, on 21st June 1978; the Ministry of Fisheries laid down regulations regarding the compulsory use of Pilots for vessels passing through the waters North of a line between North point Molen — North point Sasteinen.

2.5 *Ordering of Pilots:* Vessels for which it is compulsory or which wish to use a Pilot must as far as possible comply with the 'Provisions for prior notification in regard to ordering of Pilots' included in the Pilotage Book (Losboken) and in Information to Seafarers No. 1. In addition, the following provisions apply to the ordering of Pilots for vessels which are arriving in or leaving ports in the waters described under item 1.3:

— Vessels approaching from the sea and desiring a Pilot shall as far as possible order a Pilot 24 hours in advance and thereafter confirm arrival at pilot station 2 hours in advance.

— Vessels lying in port and desiring a Pilot shall as far as possible order a Pilot 4 hours in advance and thereafter confirm departure from the port 2 hours in advance.

Orders for Pilots shall be addressed to the Sea-Traffic Centre in Brevik.

2.6 *Limited visibility:* If due to fog, rain, snow, air pollution or other factors, visibility is reduced to less than 1 nautical mile (1,852 m.) in these waters or parts thereof, the Sea-Traffic Centre shall stop or detain all vessels with dangerous cargo.

2.7 *Capacity restrictions:* Below follow the maximum permitted length, breadth and draft for vessels intending to pass respectively Dypingen, Kalven and Brevikstrommen.

Dypingen	
Length	600 ft.
Breadth of vessel with dangerous cargo	80 ft.
Breadth of vessel otherwise	85 ft.
Draft	34 ft.
Kalven	
Length	600 ft.
Breadth	95 ft.
Draft	34 ft.
Brevikstrommen	
Length	600 ft.
Breadth of vessel with dangerous cargo	80 ft.
Breadth of vessel otherwise	85 ft.
Draft	32 ft 6 in.

2.8 *Traffic separation:* Between Langesundbukta and Brevik, two separate marked fairways have been established. The Sea-Traffic Centre shall indicate, after consultation with the Shipmaster and Pilot, which fairway is to be used when the vessel obtains the clearance signal to proceed into these waters.

2.9 *Safety zones:* Off the quays at Rafnes and Heroya, safety zones have been established as indicated in Chart Nos. 5, 473 and 474. Only vessels proceeding to or from quays and installations or on fully documented assignments within these zones may cross the boundaries of the zones.

2.10 *Anchorages:* Two anchorages have been set aside in these waters which must be used if it is necessary for the vessel to anchor.

Helgeroafjorden: South of a line through Fugloyskjaer light beacon —Amlirogna light beacon.

Frierflaket: East side of Frierfjorden, between Versvikbukta and the Hydro plant, but not within 300 m. of the quays.

Anchoring outside these two areas should be avoided.

Before anchoring, the vessel must have obtained clearance from the Sea-Traffic Centre.

For reasons of safety the Sea-Traffic Centre may order a vessel to proceed to the designated anchorage if the situation so requires.

2.11 *Use of Tugs:* The Sea-Traffic Centre may, after consultation with the Shipmaster and Pilot, require vessels with dangerous cargo to use tugs in manoeuvring in to and away from the quay and during passage in these waters, if this is deemed necessary for reasons of safety.

2.12 *Towlines:* During inward and outward passage, vessel with dangerous cargo shall have made fast and lowered to the water fore and aft a non-sparking non-flammable towline with eyelet.

2.13 *Pleasure-craft traffic:* Pleasure-craft and open boats shall as far as possible keep out of the way of larger vessels and commercial vessels. Insofar as feasible they shall keep close to shore within a maximum distance of 100 m.

Pleasure-craft — including open boats — shall not cross the shipping lane or fairway in such a way that this might disturb the passage of vessels which can only proceed with safety in such lanes or fairways. Attention is drawn to Sections 9 and 44 in the International Regulations for Preventing Collisions at Sea.

3.0 *Exemption:* In exceptional cases the Coast Directorate may grant exemption from these regulations. Requests for exemption must be submitted in writing to the Coast Directorate, preferably one month prior to the arrival of the vessel.

4.0 *Penal provisions:* Anyone wilfully or negligently violating these regulations shall be punished in accordance with Section 418 in the Penal Code, unless stricter penal provisions are applicable.

5.0 *Entry into force:* These regulations shall enter into force on 1st August 1978.

AGOTNES: 60.25 N. 05.01 E. (See Plan Book)

DOCUMENTS:

1 General Declaration.
1 2 Cargo Declarations.
1 Stores List.
1 Health Declaration.
1 Personnel Effects.
2 Manifests.

PILOTAGE: Usual entrances to port at Korsfjord and Fedje.

Provisions for Advance Reports in connection with the ordering of Pilots. Issued by the Director of Pilotage.

1. Vessels approaching from the sea and desiring a Pilot should order the Pilot at 24 hours notice insofar as possible and confirm arrival at pilot station at 2 hours notice.

The advance order can be sent in the following manner:

a. From ships at sea over radio direct to the sea pilot watch (calling frequency 2182 kc/s from 2 minutes past until 10 minutes past each full hour, or over VHF-radio telephone, calling frequency 156.80 mc/s, Channel 16).
b. From ships at sea over coastal radiostation to pilot station or pilot office.
c. From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey the report to the sea pilot station.

2. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.

3. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order state the name and destination of the vessel and whether 1 or 2 Pilots are desired.

4. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.

5. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.

ANCHORAGE: About 1,600 ft. North of CCB quay, depths from 29 to 74 m.
MAX. SIZE: Water depths up to 60 ft. at quayside.
HEALTH: No Certificates required. In event of any disease or fever, contact Agents.
RADIO: All messages to Agents via Bergen or Rogaland Radio.
VHF: Bergen Radio on Channel 16 or direct on Channel 10.
TUGS: Available upon request. Vessel's lines usually used. No extra charge for tug's line.
BERTHING:
West side, quay of 100 m. long. Depth of water 60 ft.
East side, quay of 105 m. long, Depth of 14 m.
North West side, quay of 120 m. long. Depth of 7.2 m.
CRANES: 1 Mobile crane 280 tons lifting capacity. 1 Mobile crane 50 tons lifting capacity. 1 Mobile crane 40 tons lifting capacity. 2 Mobile cranes 25 tons lifting capacity. Also 45 tons floating crane available upon request.
BULK CARGO FACILITIES: For drilling mud and cement only.
SPECIALISED CARGO HANDLING FACILITIES: Loading/unloading carried out by Mobile cranes and trucks.
BRIDGES: Bridge between Knarrevik and Drotningsvik. Height at mean level 50 m.
STEVEDORES: Provided by Coast Centre Base.
MEDICAL: 4 hospitals available (Bergen).
DENSITY: About 1024.
FRESH WATER: Can be supplied alongside the quay.
FUEL: Gasoil No. 0401 can be supplied alongside the quay.
CONSULS: (in Bergen). Belgian, Brazilian, British, Danish, Finnish, French, Greek, Islandic, Dutch, Panama, Peruvian, Portuguese, Spanish, Swiss, Swedish, Turkish, German, Uruguay, Austrian.
REPAIRS: All repairs possible.
DRY DOCKS: Available in Bergen. 3 Dry docks 365 ft. long with 12.5 – 21 ft. depth on blocks.

1 floating dock for vessels up to 10,000 g.r.t. and 2 smaller floating docks. Largest vessel 51,839 g.r.t.

Draft 34 ft. 4 in. Drafts up to 35 ft. can be accommodated.

SURVEYORS: Lloyds, A.B.S. and Norske Veritas.
GANGWAY/DECK WATCHMAN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCE: 0.75 litres of spirit and 200 cigarettes for each member of the crew.
REPATRIATION: All facilities available for crew changes.
AIRPORT: 35 km. from Bergen Airport served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: New Years Day (January 1st); Maundy Thursday; Good Friday; Easter Monday; May 1st; May 17th; Ascension Day; Whi Monday.
POLICE/AMBULANCE/FIRE: Bergen 002; Bergen 003; Bergen 001 respectively.
TELEPHONES: No arrangements for connection on board ships. Telephone box on quayside.
SERVICES: Compass adjuster, Radio/Radar service. Also calibration of the Direction Finder, Ships laundries.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
AGENTS: A.S. Coast Center Base Ltd. & Co. 5363 Agotnes. Tel: (05 33 40 00. Telex: 42 835 ccb n. Cable: Ceeceebee.

ALESUND: 62.27 N. 06.09 E. (See Plan Book)

DOCUMENTS:

1 Crew List.
1 Passenger List.
1 Customs Documents.
1 Health Documents.
3 Manifests.
3 Bills of Lading.
1 Ship's Papers.
1 Stores Lists (provisions).

PILOTAGE: From open sea, Pilot is taken on board at Rundo pilot station. Watch 24 hours a day. To be called 3-4 hours before ETA by VHF 16, or radio.
ANCHORAGE: On the North side of the town in Valderhaugfjorden in depths of 20 m. to 60 m.; bottom, sand and mud.

On the South side of the town in Aspovagen in depths of 20 m, to 40 m., bottom mud.

RADIO: Alesund Radio 2182. VHF 16. Harbour Office is manned 24 hours. Tel.21425.
TUGS: Meet vessel normally before entering the harbour, or by order.
BERTHING: At the Southern Harbour there are the following commercial quays:

Storneskaia: East side, length 85 m., depth 13 m. to 7 m. On this side Ro/Ro berth available. South side, length 150 m., depth 13 m. Warehouse cap. 1,600 sq. m.

Prestekaia: South side, length 220 m., depth 13 m. West side, length 43 m., depth 5 m. min. Warehouse cap. 4,100 sq. m.

Skutevika: Special quay for fishing vessels, length 300 m., depth 6 m. Only mooring on N.E. side. Quay, length 40 m., depth 7 m.

Sjogata: Mooring quay, length 200 m., depth 9 m. At Northern Harbour there is one commercial quay.

Skansekaia: North side, length 190 m., depth 13 m. South side, length 150 m., depth 5 m. This quay forms protection for a small inner harbour with several smaller quays.

STEVEDORES: Obtained by Agent who requires ETA 12 hours before ships arrival.
CRANES: Mobile crane to lift 18 tons available. Floating to lift max. 100 tons available.
CONTAINERS: Depot for *C.T.I.* containers.
FRESH WATER: Available.
FUEL: Bunkering facilities from all major oil companies. Loading by barge or pipeline at berth.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: This work is normally carried out by crew.
CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS: Available. Floating dock 380 ft. by 50 ft. to lift 3,000 tons Three patent slips for vessels up to 700 tons.
AIRPORT: Alesund airport, Vigra. Passenger flights (three times a day to and from Oslo. Trondheim, Bergen.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st May; 17th May.
POLICE/AMBULANCE/FIRE: Police 21321; Ambulance 23348; Fire 014.
TELEPHONES: No arrangements for placing telephones on board.
AUTHORITY: Alesund Havnevesen.

ALVIK: 60.26 N. 06.24 E.

Alvik located in inner part of Hardangerfiord. Ferrosilisium works Vessels from abroad may call Haugesund for inward Customs clearance.

DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs' district.
BERTHING: Quay No.1, length 80 m. 2 cranes, 7.5 and 9.5 tons. Quay No. 2, length 90 m. 1 crane 7.5 tons.
AUTHORITY: Alvik Port Authority.

ARDALSTANGEN: 61.14 N. 07.42 E. (See Plan Book)

Dangerous Cargo List.

PILOTAGE: Compulsory. Main entrance to port at Marsteinen Lighthouse (pilot station) 60° 24′ N. 5° 18′ 50″ E. 24 nautical miles from town, but vessels from South may enter at Skudesnes (88 nautical miles) and from North at Fedje pilot station (32 nautical miles). VHF Channel 16. Practically no tide. Port free of ice throughout whole Winter and well sheltered from all winds. Sound signals for Pilot, 3 long and 1 short. Harbour pilotage not compulsory but advisable.

ANCHORAGE: Puddefiord. Good holding grounds. Depth 10 to 50 fathoms of water.

RESTRICTIONS: Vessels can enter day and night.

MAX. SIZE: Max. draft 35 ft. Vessels up to 50,000 tons have been berthed at Dokkeskyaersquay. Oil installation up to 30,000 d.w.t.

HEALTH: See "Documents". If vessel carries quarantine flag on contagious diseases, radio communication should be sent to Agents for instructions, otherwise no special regulation.

RADIO: Communication to Agent should be sent through Rogaland Radio or Bergen Radio.

VHF: VHF radio for port operations. Call sign "Bergen Port Radio".

TUGS: 2 tugs, each 1,000 h.p. available. Ship's lines to be used, contractors Bergen Steamship Co. Tugs normally join vessel at Puddefiord or subject to requirements.

BERTHING: Berthing instructions from Harbour authorities through Agent's office.

CONTAINER FACILITIES: Container terminal at Dokkeskjaerskai area. The quay is 130 m. long with a depth of 9 m. at MW. One 50 ton container crane. It is intended for bow/stern loaders and is equipped with a ro/ro bridge with an axle load of 60 tons and 15,000 sq.m. area for storage and container handling.

BRIDGES: A bridge between Knarrevik and Drotningvik is completed. Height of bridge from the water will be 50 m. at mean water level. Bridge position will be 5 miles from harbour in the entrance to port from South.

STEVEDORES: Stevedoring arranged by Agents subject to requirements. 24 hours notice, important obtain in good time accurate ETA. Ordinary working hours at port 0730-1530 hrs. Saturdays until 1300 hrs.

CRANES: 15 shore cranes, lifting capacity 6 tons.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Discharge lines usually 6 and 8 in. No slop (residues) discharge facilities. Number of tanker berths 5: Shell, Esso, Fina, Mobil Oil, and BP. Max. drafts 30 ft.

DENSITY: Salt water.

FRESH WATER: From all quays and wharves with exception of some oil berths where water barge necessary.

FUEL: All grades of diesel, fuel and gas oil including lubricating oil available at all wharves in main entrance. Supplies also from barge subject reasonable notice.

FIRE PRECAUTIONS: No special precautions. Special harbour fire-fighting boat. As usual no smoking permitted during discharge operation.

GANGWAY/DECK WATCHMEN: Obtainable subject inquiry for 12 hours watch from 1900 to 0700 hrs.

OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.

SHIP'S CERTIFICATES: All certificates to be on board. Ship's tonnage certificate to be produced to Custom authorities upon arrival.

CUSTOMS ALLOWANCE: Tobacco, 20 cigarettes per day or 20 grams tobacco per crew member. Wine and/or Spirit, 1 bottle spirit or wine for consumption on board allowed per crew member.

IDENTIFICATION CARDS: Not required.

POLICE/AMBULANCE/FIRE: Police 51040; Ambulance 70111; Fire 71171.

TELEPHONES: Can be placed on board at no extra cost.

REGULATIONS: *Regulations requiring the use of Pilot Services in the Grenland Area.*

In pursuance of Section 5 of Act No. 2 of 9th April 1948 relating to the Pilot Service, cf. Royal Decrees of 29th April 1977, the Ministry of Fisheries lays down the following regulations:

Section 1

State Pilots shall be used by vessels of 100 g.r.t. and above navigating the waters North of a line through the North point Molen - North point Sasteinen.

Section 2

The Coast Directorate or anyone it so empowers may grant exemption from the provisions in Section 1 in respect of vessels of under 500 g.r.t. which are not carrying dangerous cargo, provided that the Shipmaster is able to satisfy the authorities that he has obtained, through regular calls at ports in the area, a comprehensive knowledge of these waters and is conversant with the rules and regulations currently applicable with respect to passage and navigation in these waters. Requests for exemption shall be addressed to the Coast Directorate and forwarded via the Pilot Master in Porsgrunn.

Exemption thus granted may be revoked at any time.

Section 3

Anyone wilfully or negligently violating these regulations shall be punished in accordance with Section 418 in the Penal Code, unless stricter penal provisions are applicable.

Section 4

These regulations do not entail any changes to the rules concerning the use of State pilots for foreign non-military vessels of 50 g.r.t. and above laid down by Royal Decree of 9th February 1968 concerning provisions on prohibited zones in Norwegian territorial waters.

Section 5

These regulations shall enter into force on 1st September 1978.

Also see "General" before first port.

SHORE LEAVE: Crew members allowed ashore.

AGENT: Stiansen & Wiborg A/S, P.O. Box 85, 3951 Brevik. Tel. (035) 70040 and 70833. Telex 21338 STIWI N. After hours Tel: (035) 70835 and (035) 70833. Cables: "STIWI".

BRONNOYSUND: 65.30 N. 12.13 E.

DOCUMENTS: See "Bergen".

PILOTAGE: Pilot ordered through Harbour Office tel. 20 078. Cable address "Losforman".

ANCHORAGE: Prestoytaren. 65° 29.0′ N. 12° 11.5′ E. Depth 28 ft. to 180 ft.

MAX. SIZE: Largest ship approximately 5,000 g.r.t. Depth at Port Authorities quay 18 ft. to 24 ft. LWOST.

At tanker installations:

A/S Norwegian Esso	16 ft. LWOST
A/S Norske Shell Central fishing port	15 ft. LWOST
A/S Norsk Olje, Salhus	16 ft. LWOST
A/S Algea Produkter	14 ft. LWOST
Central fishing port	15 ft. LWOST

RADIO: Rorvik radio station call signal: "LGY". Hours of attendance 0800 to 2100 hrs.

TUGS: None.

BRIDGES: Bronnoysund Bridge, max. clearance – 30 m. spring high tide.

VHF: Bronnoysund Port Radio. Channel 16 – 156.800 mHz; Channel 12 – 156.600 mHz primary work; Channel 14 – 156.700 mHz secondary work; Channel 13 – 156.650 mHz pilotage work.

STEVEDORES: Bronnoysund Discharge and Loading Society tel. 20 326.

MEDICAL: Nearest hospital Sandnessjoen 67 km.

FRESH WATER: Delivered by hose to all Port Authority Berths.

FUEL: Delivered to all berths, 24 hour service.

GANGWAY/DECK WATCHMEN: Watchmen at gangways and pilot ladders optional. Can be ordered through Bronnoysund Discharge and Loading Society.

OPENING/CLOSING HATCHES: Usually by port workers.

CUSTOMS ALLOWANCES: Master 400 cigarettes or 40 grams tobacco; all other crew 200 cigarettes or 20 grams tobacco. Wine/spirits Master 2 litres; all other crew 0.75 litre.

IDENTIFICATION CARDS: Crew to possess identification card with passport photo.

CONSULS: None.

REPAIRS: Limited deck and engine repairs. Turner's shop and welder's shop available.

AIRPORT: Regular traffic North and South daily.
TIME: GMT plus 1 hour.
HOLIDAYS: During Sunday and holidays not permitted discharge/load between 1000 to 1300 hrs., but dispensation can be obtained.
POLICE/AMBULANCE/FIRE: Police 20 400; Ambulance 20 800; Fire 20 000.
AUTHORITY: Harbour Master.

DRAMMEN: 59.45 N. 10.13 E. (See Plan Book)

DOCUMENTS:
Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Customs Lists for crew members and passengers.
Bills of Lading.
3 Manifests for every port of discharge.
PILOTAGE: Give 6 hours notice by R/T 2182 kc/s or VHF Channel 16 to "Faerder Pilot". Coast stations "Tjome Radio" LGT or "Farsund Radio" LGZ can also be used. Harbour Pilots ordered through ship's Agents. Harbour pilotage is not compulsory.
ANCHORAGES: Pilot service supplies information regarding anchorages.
RESTRICTIONS: Svelvikstrommen Channel, depth 10 m. equipped with beacons and radar reflectors for safe navigation.
During ice-breaker season, which may last from end-December, to middle-March, ice breaker is in radio contact with port and with ships needing assistance.
MAX. SIZE: Max. draft for main harbour 30 ft., otherwise no restrictions.
HEALTH: International procedure followed to obtain pratique. In case of suspected diseases or fever inform Port Authorities, tel. 81 88 90. When arriving from a Norwegian port pratique automatic.

*Special arrangement for stern and bow ramps
†Size of vessels decided by max. draft 30 ft.
‡Special arrangements for ramps (small ships)

Container and Ro-Ro Facilities: Three Ro-Ro quays for containers, vehicles and trailers.

1. Holmen South Ro-Ro:
   Max. Depth 25 ft.
   Length (Approx.) 300 ft.
   Beam 33 ft.
   Height of working ramp 3 ft.
   Mooring boat advisable when berthing.
2. Holmen East Ro-Ro:
   Max. Depth 18 ft.
   Length (Approx.) 350 ft.
   (i) Inside ramp: Beam 30 ft., Height 5 ft.
   (ii) Outside ramp: Beam 30 ft., Height 1 ft. 6 ins.
3. Risgarden Ro-Ro:
   Max. Depth 30 ft.
   Beam 105 ft.

Length of vessels berthing is dependable of max. draft.
Height of working ramp 6 ft.
Fruit Storage 21,600 sq. ft. Air conditioned fruit-storage.
Also see "Tankers".
STEVEDORES: Labour must be ordered latest 1530 hours day before arrival. Saturdays before 1230 hrs. Working hours: Monday to Friday from 0700 to 1600 hrs. with breaks from 0900 to 0930 hrs. and 1300 to 1330 hrs.
Saturday from 0700 to 1230 hrs. with break from 0900 to 0930 hrs.
Overtime can be arranged through Agent.
MEDICAL: In case of emergency, notice regarding required medical treatment must be given as soon as possible. First class hospital facilities available. No special inoculation or fever certificates necessary, except those according to international health regulations.
TANKERS:
Tronstad Berth
Wooden quay 92 m. long, max. draft 32.81 ft. (10 m.). Fresh water available.
Pipeline connections: Gas oil 8 in.; light fuel oils 9 in.; asphalt 8 in.
Holmen South Berth
Concrete quay, max. draft 29.53 ft. (9 m.). Fresh water available.
Pipeline connections: Gas oil 8 in.; light fuel oils 8 in.; paraffin 6 in. heavy fuel oil 4 in.
B.P. Berth, Solumstrand
9 m. wide quay at end of pier, max. draft 16.4 ft. (5 m.).,
Pipeline connections: Light gas oil 6 in.; petroleum 4 in.; white spirit 3 in.; propane 2 in.
Bakketomta Berth, Lierstranda
Concrete quay, 23 m. long, max. draft 16 ft. (4.88.m.).
Pipeline connections: Super petroleum 8 in.; petroleum 8 in. light fuel oil 8 in.; gas oil-paraffin 6 in.; white spirit 4 in.
Esso Berth, Solumstrand
Concrete quay, 23 m. long, max. draft 16 ft. (4.88 m.).
Pipeline connections: Light fuel oil 6 in. and 4 in.; gas oil 6 in.; petroleum 6 in. and 4 in.
Folakroken Quay: New Berth: Gullaug explosives factory. Situated 6 nautical miles North of Svelvik Narrows on East side of Dramsfjorden

Length	114 ft. (35 m.)
Depth alongside	19 ft. (6 m.)

DEPTHS: Chart depths vary only slightly owing tidal fluctuations. Exceptional conditions, such as snow melting in Spring, heavy rainfall and prevailing strong Southerly or Northerly winds will cause stronger currents and a variation in water levels.
FRESH WATER: Delivery by hose available anywhere at any time.
FUEL: Tronstad berth: gas oil 200 sec. Holmen S.: fuel 2000 sec., marine diesel 200 sec. Bakketomta Lierstrand: Bunkering by tanklorry possible if necessary. Esso Solumstrand: gas oil visc. 1,2 at 20 degrees cel.; diesel visc. 1,7 at 20 degrees cel. Lubricating greases and oils available.
FIRE PRECAUTIONS: International danger signals and precautions practised. Wires for towing must be ready for immediate use. In case of fire on board or in vicinity, vessel must leave quay and harbour as soon as possible.
GANGWAY/DECK WATCHMEN: Watchmen recommended, through Agent.
OPENING/CLOSING HATCHES: If necessary hatches can be opened or closed by stevedores, but usually by crew.
CERTIFICATES: Usual ship's certificates according to international regulations.
CUSTOMS ALLOWANCE: Tobacco, 200 cigarettes/100 grams of tobacco allowed weekly. Wine or Spirits, 1 bottle wine or spirits usual weekly allowance.
CARGO GEAR: International Safety Regulations followed.
CRANES: 12 electric cranes 3-10 tons, 2 mobile cranes 10-50 tons, 2 electric cranes for discharging of coal, capacity 500 t.p.d. each.
IDENTIFICATION CARDS: Not required.
CONSULS:

REPAIRS: Shipyard facilities for all kinds of deck and engine repairs available.
DRY DOCKS: 2 floating docks, 20,000 and 3,000 tons capacity. Nearest dry docks in Horten and Oslo. Distance by sea respectively 24 miles and 46 miles.
REPATRIATION: All facilities available.
AIRPORT: Nearest airport Oslo Airport, Fornebu, situated 16 miles by road from Drammen. Regular services to all parts of the world.
TIME: GMT plus 1 hour.
HOLIDAYS: On Saturdays work stops at 1230 hrs., but if ships can be finished, loading and discharging is continued to 1900 hrs.
All Sundays; 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; Ascension Day (17th May); Whit Monday; Christmas Day; 26th December.
On Easter, Whit, Christmas, and New Year's Eve work stops at 1400 hrs.
POLICE/AMBULANCE/FIRE: Fire-alarm accidents 832020; First-aid station 831585; Hospital 834585; Police 838170; Taxi 835060.
TELEPHONES: Telephones can be connected if ordered.
GENERAL: Notice will be given to local Agents regarding changes or new developments which can affect usual procedure in port.
SERVICES: Ice-breaker assistance available during winter months.
SHORE LEAVE: No restrictions on shore leave when all formalities in order.
DELAYS: Delays may occur, when very heavy traffic cause shortage of labour.
AUTHORITY: Drammen Havnevesen.

EGERSUND: 58.27 N. 06.00 E.

DOCUMENTS: Health Certificate (forms obtainable from Customs when entering harbour). Crew List, Dangerous Cargo List, Ship's Register. Vessels bound for Egersund must be provided with document signed by Master, setting out specification of cargo to be discharged Egersund, also quantities all provisions and stores on board. Document must include name, tonnage, port of registration, last port, next port, and number of crew and passengers on board.
PILOTAGE: Pilot – if necessary – to be ordered latest 3 hours prior arrival pilot station. Order to be given to Pilot office – telephone 91.328 or to ship's Agent, giving ETA, name of vessel, gross tons, where Pilot required, draft in feet, and discharging/loading place. Vessels entering Egersund liable to inward and outward pilotage dues, mileage money according distance piloted; and pilot dues, whether services of Pilot used or not. Pilot station lying on Eigeroy – and Pilot available for

Southern and Northern entrance, from pilot boat. Southern entrance mostly used, max. draft 31 ft. In case of using Northern entrance, ship has to pass bridge between Eigeroy and the continent. Max. height 23.5 m. Max. draft 16 ft.
ANCHORAGE: Any place in harbour available for anchorage. Especially used is Hovlandsviken – 36 ft. draft.
MAX. SIZE: Largest vessel which has entered Egersund – 45,000 d.w.t. Max. draft 31 ft. In harbour there are 2,000 ft. of quayage with 18 ft. – 27 ft. alongside.
RADIO: Rogaland Radio and Farsund Radio.
TUGS: Not available in Egersund.
STEVEDORES: Ordered by Agent – no ETA to stevedores necessary. Time for ordering gangs for next morning must be given by 1300 hrs. day before.
FRESH WATER: Can be delivered at most discharging/loading places.
FUEL: Gas oil and Light Marine Diesel oil available.
GANGWAY/DECK WATCHMEN: Available – but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed open and close.
CERTIFICATES: On first call Registered Tonnage Certificate necessary – thereafter not required unless gross/net tonnage changed.
CUSTOMS ALLOWANCE: (Dependent size – destination, etc.) each crew member is allowed 100 cigarettes, 20 cigars or 100 grams tobacco and one bottle spirits.
CARGO GEAR: No additional requirements. One 150 ton crane, one 30 ton crane and some mobile cranes 5-15 tons available.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark and Sweden.
REPAIRS: All minor repairs possible. Service station for electronic aids.
HOLIDAYS: Work can usually be arranged on all holidays.
POLICE/AMBULANCE/FIRE: Police 91.600; Fire 91.500; Hospital/Ambulance Tel: 044-90022
AUTHORITY: Egersund Havnevesen.

FLORO: 61.31 N. 05.02 E. (See Plan Book)

DOCUMENTS:
2 Manifests.
Crew List.
Provisions List.
Health Document.
Passenger List.
PILOTAGE: Nearest station Fedje (60° 51′ N., 04° 37′ E.). Distance to Floro harbour about 52 nautical miles. Pilot boat a white-painted cruiser-type marked "OS" on both sides of bow.

Fixed watch on Fedje island covers both Holmengra and Hellesoy. VHF Channels 8, 12 and 16. Listening first 10 minutes of every hour. ETA 24 hours before arrival. Telegram "Feielos". If bad weather, Pilot to be picked up on Eastern side of Fedje Island.
ANCHORAGE: No anchorages close to pilot station. Floro harbour: space of about 1 sq. km., depths from 15 to 30 fathoms.
RESTRICTIONS: Tide difference about 1.5 m. Max. draft entering Floro harbour 40 ft.
MAX. SIZE: Entering Floro harbour: No restrictions in main harbour concerning length and breadth. Max. draft berthing: "Gunhildvagen" (herring factory) 25 ft. and length of 120 m.

NB. – "Gunhildvagen" lies outside main harbour, and has narrow entrance. Weather permitting, ships of 100 m. length and breadth 20 m. can pass.
BERTHING: *Vestlandske Kjopelag:* A bulk grain/molasses terminal for vessels up to 6,000 d.w.t. Berth length, 100 m. Depth alongside 7.0 m. Storage capacity 20,000 tons of Grain/Molasses.

Fugleskjaerskaia: The deep-sea pier to the West of Fugleskjaerskaia is in operation. Fugleskjaerskaia now offers 500 m. of pier frontage, depth from 16 ft. to 43 ft. New section: 36 m., 18 ft. depth; 140 m., 33 ft. depth; and 1 berth 43 ft. depth.

The extension of Fugleskjaerskaia provided 21,000 sq.m. new cargo handling space. A ro/ro facility is also provided, max. axle load 60 tons.
STEVEDORES: ETA before 1600 hrs. for gangs required next morning.
MEDICAL: Hospital close to harbour, and available any time.
TANKERS: Harbour is only used by small tankers, about 500 to 1,000 reg. tons.
FRESH WATER: Only available alongside berth. Delivery about 30 t.p.h., possibility of 60 t.p.h. At Fugleskjaerskaia fresh water available at a rate of 200 t.p.h.
FUEL: Ordinary fuel. Diesel and gas oil delivered by truck. Ships up to about 1,000 reg. tons receive oil bunkers directly by berthing bunker station. Fuel barge containing 1,600 cu.m. of diesel moored to the West of Fugleskjaerskaia.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Mostly done by crew.
CREW IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Most repairs possible.
DRY DOCKS: None. There is a new berth at Ankerlokken Shipyard. Length 100 m. Depth alongside 9–10 m.
AIRPORT: Regular service with DeHaviland Twin Otters, 5 flights to Bergen and 2 to Aalesund each day. (Runway 860 m.).
TIME: GMT plus 1 hour.
HOLIDAYS: Cargo work can be arranged any time, holidays included.
POLICE/AMBULANCE/FIRE: Police 42101; Ambulance 41011; Fire 41000.
TELEPHONES: Can be arranged on board alongside wharf.
SHORE LEAVE: Permitted.
SERVICES: Servicing for all kinds of ships navigation instruments can be arranged, except adjusting radio bearings.
GENERAL: The nature of the traffic in the harbour has changed, currently one offshore drill rig is supplied from Fugleskjaerskaia, two more will be supplied from the month of May (1980). Bulk tanks for cement and baryte have been erected on the quay.

A new offshore supply base is being planned in Botnanes to the East of the harbour, and ground might be broken in mid 1981.
AUTHORITY: Harbour Master. Floro Havnevesen.

AGENT: K. Jansen, Shipping Agent, Stevedore, Shipbroker. Telephones: (057) 42303 A.O (057) 41322–42277. Telex: 40214 Jans PO Box 15.

FRAFJORD: 58.51 N. 06.17 E. (See Plan Book)

SHIPMASTER'S REPORT: May 1979.

Vessel loading stones.

The berth at Frafjord is situated at the Eastern end of the Fjord leading to Frafjordsoyr (58° 50′ 40″ N., 06° 17′ E.) and consists of an angled quay 15 m. in length.

The Pilot is embarked at Kvitsoy pilot station and vessel then proceeds to Stavanger for customs clearance and agency work due to the remoteness of the loading berth. Pilots are changed at Stavanger and this Pilot remains on board until Kvitsoy outwards.

Approach to the berth is made at right angles with three shackles out on the starboard anchor until the headline and forward spring can be passed to the quay, the vessel is then turned on the anchor.

The quay is made of wood and is in poor condition with one end and bollard damaged. On the quay a single fixed conveyor is situated with a mobile extending arm and this is fed from a bin filled by tip-up lorries. The approximate lorry load is 13 tonnes. The extending arm can be remotely controlled in and out but is not quite long enough to adequately fill the outboard side. If loading mixed stones the lighter stones can be projected outboard. The loading foreman tended to be inexperienced and care has to be taken not to let the height of the stow build up too much and also along the inboard side as a slight starboard list is preferable due to the shallow areas of water on the inboard side and slack ropes aft will facilitate a general movement to the deeper water, (by sliding off the bottom).

No. 2 hold is loaded completely and then the stern is canted into deeper water in order to load in No. 1. The sequence that was adopted by this vessel was to load 750 tonnes in the after end of No. 1 followed by 750 tonnes in the forward end of No. 2 and then 700 tonnes in the after end of No. 2. This increased the after draft to approximately 6.3 m. The stern was then canted out into deep water and the final 800 tonnes was loaded forward. The vessel has to be constantly moved along the quay in order to get an even stow height approximately one-third the way up the hatch coaming.

The bollards on the beach are very badly positioned and the ones on the quay which were used for the springs were on the verge of being ripped out, one already having done so on the damaged end of the quay.

Loading commenced at 1600 hrs. on 11th May and ceased at 2215 hrs. that day, resumed at 0720 hrs. on 12th May and completed at 1000 hrs. on 12th May. 3010 tonnes of stone chippings were loaded, final draft being, forward 5.32 m., aft 5.66 m. No gangway can be used, only pilot ladder.

Little wind was experienced during our stay but I would consider that any adverse weather conditions during berthing, loading or unberthing must make this a dangerous operation.

FREDRIKSTAD 59.12 N. 10.57 E. (See Plan Book)

DOCUMENTS:
Bill of Health.
2 Crew Lists.
2 Passenger Lists.
2 Custom List for Crew members and Passengers.
Bill of Lading.
3 Manifests for each port of discharge.
PILOTAGE: Compulsory. Pilot boarding at Faerder Lighthouse, 59.2 N. 10.32 E. Agents report vessel's ETA to pilot station and vessel to give a couple of hours' notice by R/T 2182 kc/s. or VHF Channel 16 to Faerder Pilot. Coast station Tjome Radio LGT or Farsund Radio LGZ can also be used. Harbour Pilot and tugs, when necessary, will be arranged by Agents to meet at Belgen.
ANCHORAGES: Safe anchorage for larger vessels Belgen, East entrance. For smaller vessels anchorage to be pointed out by Pilot or Harbour Master.
RESTRICTIONS: Max. draft, East entrance 36 ft.; West entrance, 17 ft. Otherwise no restrictions.
HEALTH: See "Documents".

If vessel carries Quarantine Flag for contagious diseases, radio communication should be sent to Agent for instructions, otherwise no special regulations.
RADIO: Communication to Agent through Tjome Radio or Rogaland Radio.
TUGS: Three tugs, 750 h.p., 1,200 h.p. and 2,700 h.p. Stronger tugs can be ordered from Oslo if necessary.
BERTHING: As instructed by Harbour Master through Agent, depending on vessel's draft and size.
East River Berths:
Oera Quay:
Southern part, max. draft 34 ft.
Northern part, max. draft 28–33 ft.
Denofa Lilleborg Quay:
Max. draft 33 ft., 5 m., off the quay.
Additional facilities:
4 warehouses, each at 2,000 sq.m. with cooling 300 sq.m.
4 ordinary cranes up to 10 tons.
1 mobile harbour crane up to 36 tons.
2 Ro/Ro terminals with an open area of about 40,000 sq.m.

STEVEDORES: To be arranged by Agent subject to requirements. 24 hours notice important to obtain in good time accurate ETA.

Ordinary working hours 0700 to 1530 hrs.; Saturday until 1230 hrs. Bulk cargoes are usually discharged in shifts until Saturday 2200 hrs., in the extent stevedores available.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Discharge pipe-lines usually 6 and 8 in. No slop (residues) discharge facilities. Tanker berths are at BP and Denofa/Lilleborg.

Sulphuric Acid is loaded at Oera Quay.

DENSITY: Brackish water, 2.7% salt water.

FRESH WATER: From shore or by barge.

FUEL: All grades available. For larger quantities, delivery arranged by barge.

GANGWAY/DECK WATCHMEN: Obtainable.

OPENING/CLOSING HATCHES: Crew members allowed to open and close hatches.

SHIP'S CERTIFICATES: To be produced to Customs Authorities on arrival.

CUSTOMS ALLOWANCES: *Tobacco:* 20 cigarettes or 20 gms. tobacco per man, per day. *Wines/Spirits:* 1 bottle of spirits or wine for consumption on board per crew member.

IDENTIFICATION CARDS: Not required, except at the quay of Defona/Leborg, when Master, upon arrival, will receive a sufficient number of cards for filling-in for each crew member, to be shown when passing the gate.

CONSULS: Danish, French, Finnish, Dutch, Swedish.

REPAIRS: All repairs possible.

DRY/FLOATING DOCKS:

A/s Fredrikstad mek Verksted: Dry dock 945 ft. length, 126 ft. breadth, 25 ft. draft when docking. Floating dock, 900 tons, 181.6 ft. length, 52.6 ft. breadth, 14 ft. draft when docking.

Sarpsborg mek Verksted: Floating dock, 3,000 tons, 380 ft. length, 55 ft. breadth, 18 ft. draft when docking.

REPATRIATION: All facilities available.

AIRPORT: Fornebo, Oslo, 110 km. From Fredrikstad. Frequent connection by train.

TIME: GMT plus one hour.

HOLIDAYS: New Year's Day (1st January); Maundy Thursday; Good Friday; Easter Monday; Labour Day 1st May); Ascension Day (11th May); Constitution Day (17th May); Christmas Eve; Christmas Day; New Year's Eve.

POLICE/AMBULANCE/FIRE: Police, tel. 17700; Doctor, tel. 13333; Hospital, tel. 11080; Ambulance, tel. 13000; Fire, tel. 12345.

TELEPHONES: May be installed on board at the quay of Oera.

SERVICES: Compass adjusting, laundry, ship chandler for delivery of provisions and bond stores.

SHORE LEAVE: No restrictions.

GLOMFJORD: 66.50 N. 13.57 E.

DOCUMENTS:

3 Crew Lists.
Customs List.
Shipping Manifest.
Health Statement.
Bill of Lading.
Ship's Certificate of tonnage.

PILOTAGE: Pilot station, approach from South, is Aasvaer, Lat. 66° 17′ N. Long. 12° 18′ E., VHF/radio telephone, frequency 2182.

Pilot station, approach from North, is Fleinvaer, Lat. 67° 13′ N., Long. 13° 42′ E. Order Pilot over Bodo Radio, tel. Bodo 22115.

ANCHORAGE: No berth for anchoring in Glomfjord but possible anchor at Sandaabukten close to Glomfjord.

MAX. SIZE: Quay length 317 m. and depth 8 m.

HEALTH: Health certificate – only for first port in Norway.

RADIO: Sandnessjoen or Bodo Radio station.

VHF: On quay. Call: Hydro Glomfjord Port station on Channel 16.

TUGS: None.

BERTHING: No specific requirements relating to berthing.

STEVEDORES: In accordance with Charter Party.

MEDICAL: Medical aid in Glomfjord, and hospital in Bodo.

TIDE: Difference between high and low water about 3m.

FRESH WATER: Alongside quay.

FUEL: None.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Usual certificates.

CUSTOMS ALLOWANCES: 200 gm. tobacco or 200 cigarettes per man. 0.75 litre spirits or 0.75 litre wine per man.

CARGO GEAR: Discharging by cranes on quay. Loading by conveyor.

IDENTIFICATION CARDS: Usual passport necessary.

CONSULS/REPAIRS/REPATRIATION: None.

AIRPORT: Airport in Bodo.

TIME: GMT plus 1 hour.

HOLIDAYS: See "Drammen".

POLICE/AMBULANCE/FIRE: Police station 52147 Glomfjord.

TELEPHONES: On quay.

REGULATIONS: No particular or unusual regulations. Control by passing gate between dock area and surrounding field.

SHIPMASTER'S REPORT: 1976

Anchorage: The nearest anchorage to the berth, which is part of Norsk Hydro's chemical plant is Sandabukta, about 6 miles away. It is safe and sheltered and the Agent will board there. Communication with Glomfjord is by VHF Channel 16 or via the local boatman with whom private arrangements for shore leave are possible.

Clearance: Ship is boarded on arrival at the anchorage by the Glomfjord Customs officer who also acts as Immigration and Port Health.

Weather: This vessel called at Glomfjord in April but weather conditions were not attractive. Frequent snow squalls reduced visibility to zero but were usually short-lived.

Pilotage: There are no harbour Pilots at Glomfjord. If proceeding direct to berth, sea Pilot will put ship alongside. If awaiting berth at Sandabukta anchorage, Pilot leaves there and it is normal for ships to complete the passage unaided. A Pilot can be obtained from Bodo but is not always available. If another ship is arriving at the anchorage, Pilot will transfer.

AUTHORITY: Norsk Hydro a.s. Glomfjord Fabrikker.

HALDEN: 59.08 N. 11.25 E. (See Plan Book)

DOCUMENTS: See "Bergen".

PILOTAGE: Pilot boat at Faerder light station. Pilot boat at Herfol Losstation-Hvaler. Ordering usually over Radio Land Station. Tjome Radio = LGT (also VHF). Signals according to ordinary international requirements. Exact area for Pilot boat: Faerder light station (Store Faerder); Herfol pilot station; Hvasser pilot station.

ANCHORAGE: At Faerder light station in Oslofiord-Singlefiorden West side.

RESTRICTIONS: No special restrictions but larger vessels have to take necessary care with passing Svinesund. The tide current altering according to high and low water time.

MAX. SIZE: For the harbour inside Svinesund (Main Harbour) length 560 ft., beam 70 ft., draft. 25 ft.

HEALTH: Pratique, ordinary.

TUGS: If wanted; outside Sponviksskansen light with the entrance to Svinesund. Usual, ship's lines.

RADIO: All radio services over Tjome Radio-Land Station (use the ordinary international frequency — (600-705-800 m.).

BERTHING:

Quay	*Depth* *(ft.)*	*(m.)*
Ytre Molbrygge	23	7.2
Indre Molbrygge	23	7.2
Jernbanebryggen	22	6.9
Krankaien	27	9.0
Brokaien	23	7.2
Sundsbryge	16	5.3
Felleskjopet	16	5.0
Corn Silo	12	3.8

TANKERS: Max. 20,000 d.w.t. are received.

FRESH WATER: Available; good quality.

FUEL: Available.

FIRE PRECAUTIONS: According to Harbour regulations.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Carried out by crew.

IDENTIFICATION CARDS: Required.

REPAIRS: Only small repairs carried out.

DRY DOCKS: None.

REPATRIATION: No facilities.

AIRPORT: Nearest Fornebu–Oslo.

POLICE/AMBULANCE/FIRE: Fire 81212; Police 82250.

TELEPHONES: None available for shipboard use.

SHORE LEAVE: Allowed.

HAMMERFEST: 70.40 N. 23.40 E. (See Plan Book)

DOCUMENTS: See "Bergen".

PILOTAGE: Entering from sea, a state Pilot is compulsory as one has to pass through prohibited sea area. Pilot should be ordered 4 hours in advance, and boards ship at Tarhalsen (situated at Eastern-most tip of Soroy island). Harbour Pilot boards outside harbour breakwaters.

ANCHORAGE: Anchoring in harbour or as appointed by the state Pilot or harbour Pilot.

MAX. SIZE: Alongside quay ships up to 30,000 g.r.t., with draft max. 30 ft. For anchorage no limitation.

RADIO: Hammerfest Radio, equipped with VHF.

TUGS: One small tug, bollard pull 6 tons.

STEVEDORES: Normal working hours: Monday–Friday 0700–1630 hrs.

MEDICAL: Hospital facilities available at Hammerfest.

TANKERS: Discharge line 8 in.

DENSITY: Salt water.

FRESH WATER: Capacity 300 t.p.h. at Harbour Board quay, no water barge.

FUEL: All grades, except heavy fuel oil, available.

CUSTOMS ALLOWANCES: See "Stavanger".

IDENTIFICATION CARDS: Not needed.

CONSULS: French, Danish, Finnish, Icelandic, Netherlands and Swedish Vice-Consuls.

REPAIRS: Slipway for smaller ships, up to 200 ft. Only minor repairs and radar repairs available.

DRY DOCKS: None.

REPATRIATION: Daily connection by ship and air.

AIRPORT: Hammerfest Airport. Regular service several times a day.

AUTHORITY: Hammerfest Havnevesen.

HARSTAD: 68.48 N. 16.39 E. (See Plan Book)

PORT LIMITS: Inside a straight line from Trondenes Church to Stangnes Light.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
Derat Certificate.

PILOTAGE: If entering via Andenes, 12 hours advance notice of ETA in order to arrange Pilot. If entering via Lodingen, 2 hours notice. VHF Channel 16 both at Lodingen and on pilot-cutter at Andenes. 24 hour watch maintained.

ANCHORAGE: Inside harbour limits, fairly good anchorages available, Pilot will assist.

RESTRICTIONS: No restrictions, only all foreign ships must have a Coast Pilot on board in inland waters.

MAX. SIZE: Any sizes can anchor in harbour.

HEALTH: In case of suspected disease doctor has to be called by radio before entering. After calling at another Norwegian port and no disease, pratique is not necessary.

RADIO: Routing of ETA cables to Agents at Harstad is best over Harstad Radio. VHF installed at Harbour Office.

TUGS: Two small tugs available.

BERTHING: Public quays of 680 m. Private quays of 1,200 m.

MEDICAL: No advance notice required. Hospital facilities available. No medical information required if no suspected disease on board.

SPECIALISED CARGO-HANDLING FACILITIES: One coal bunkering station; draft about 24 ft.; equipped with crane.

Two mobile cranes, capacity 30 tons each.

Trucks: 1×20 tons, 1×10 tons. Also fork lift trucks between 1 and 6 tons.

TANKERS: Two berths. Esso 33 ft. Norol 36 ft.

TIDE: Rise in tide about 6 ft.

FRESH WATER: Available at most quays day and night.

FUEL: All grades available. In the Winter 3–4 hours notice required.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES: Usual International certificates.

CUSTOMS ALLOWANCE: Tobacco: 200 cigarettes or equal amount of tobacco. Wine and/or Spirits: Spirit half a bottle per person.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Danish Vice-Consulate:
Tore Hunds gt. 7 – 9400 Harstad. Tel. 0 82 62080.
Finnish Vice-Consulate:
Rikard Kaarbøs gt. 2 – 9400 Harstad. Tel. 0 82 64990
German Vice-Consulate (Western Germany):
Torfinns gt. 7 – 9400 Harstad. Tel. 0 82 61472.

REPAIRS: All types of repairs possible.

DRY DOCKS: 1 dry dock 110 m. long, 17 m. wide. Capacity: 8,000 d.w.t.

REPATRIATION: Facilities available.

AIRPORT: Airport of Evenes, about 45 minutes (45 km.) drive from Harstad by road.

TIME: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged on holidays, except 1st and 17th May, Easter Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police: 62010; Ambulance: 64900; Fire: 64580.

TELEPHONES: Available, can be arranged by Agent or Dockyard.

SERVICES: Harbour Office: Tel. 082 62880 and 62459. The Norwegian Government has decided that Harstad is to be the main base for most of the oil activity North of 62° N., and the town and the harbour are under construction to meet future requirements in this connection.

SHORE LEAVE: Allowed.

DEVELOPMENTS: *Sor-Stangnes:* New harbour development area of about 40 acres. It will be possible to build a quay of 550 m. length and a minimum depth of 10.0 m.

AUTHORITY: Harstad Havnekontor.

HEROYA: 59.07 N. 09.38 E.

DOCUMENTS:

Clearance documents – forms obtainable from Custom officers on arrival.
Derating Certificate.
Bill of Lading.
Manifest.
2 Crew Lists.
Ship's Register.

PILOTAGE: Ships Agent gives ETA Pilot station 24 hours before arrival and direct to Pilots 2 hours before arrival. Telegraphic address: Pilotstation, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy Langesund bay, 58° 55′ N.; 09° 44′ E. Flag, sound and morse signal: G. Pilotage compulsory for all foreign vessels but dispensation can be obtained for smaller Scandinavian vessels. Also see "General" before first port (Agotnes).

ANCHORAGES: All anchoring at Frierfjorden. Also see "General" before first port (Agotnes).

RESTRICTIONS: No restriction on night entry except for large vessels when Pilots prefer daylight. Also see "General" before first port (Agotnes).

MAX. SIZE: Max. draft 32 ft. 6 in., max. length 600 ft. entering Kjorttingen between Langesund and Brevik. Also see "General" before first port (Agotnes).

HEALTH: See "Documents". Norwegian Health Certificate required on clearance inwards.

RADIO: Cable Agents giving ETA, draft and cash required via Tjome Radio/LGT or Farsund Radio/LGZ.

TUGS: Tugs join at berthing place. Ship's lines used.

BERTHING: No specific requirements relating to berth.

CARGO HANDLING FACILITIES: On the East side of the river, a berth of 800 ft. length, 20 to 21 ft. alongside. A new quay for vessels up to 10,000 tons, 26 to 27 ft. depth, specially for handling bulk cargoes.

No berth equipped for handling roll-on/roll-off traffic, but berth available for liquid chemical and LPG carriers.

Oil pier Norsk Hydro A/S, vessels up to 20,000 d.w.t.

Main quay Norsk Hydro A/S, length 1,838 ft., draft 26 ft. to 34 ft. 6 in.

Western quay Norsk Hydro A/S, length 1,263 ft., draft 26 ft. to 32 ft. 6 in.

CRANES:

Main quay Norsk Hydro A/S:
4 cranes reaching 10-11 m. outside quay border capacity 6 tons.
2 cranes reaching 18 m. outside quay border capacity 6 tons.
3 elevators for loading of bagged cargo reaching 16 m.
Western quay Norsk Hydro A/S:
2 cranes reaching 18 m. outside quay border capacity 7 tons.
1 crane reaching 15 m. outside quay border capacity 8 tons.
1 crane reaching 9 m. outside quay border capacity 3 tons.
3 elevators for loading of bagged cargo reaching 8 m.
Deep Water Jetty:
2 cranes reaching 16 m. outside quay border capacity 10/12 tons for bulk cargo only.
1 crane capacity 5 tons for handling of stores, etc.

BRIDGES: Brevik bridge max. height 45 m. Porsgrunn bridge (VHF Channel 12) only when proceeding to Menstad, Borgestad, Waterloo and Skien, liftbridge with breadth of 30 m. Sound signals for passing bridge inward, 1 long and 2 short. Outward signals, 1 long and one short.

STEVEDORES: Ordered by Shippers/Receivers or Agents.

MEDICAL: All medical assistance to be arranged via Agents.

TANKERS: Discharge lines 4 in., 6 in., 8 in.

DENSITY: Brackish 4–6 in. allowance.

FRESH WATER: Obtainable various quays.

FUEL: All grades available.

FIRE PRECAUTIONS: Tankers discharging, smoking only by officers in saloon, crew in messroom.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Crew normally open and close. Otherwise according Charter Party.

CERTIFICATES: Registered tonnage certificate; Derating certificate. Otherwise normal international certificates.

CUSTOMS ALLOWANCES: 400 cigarettes for the Master and 200 for each crew member. *Wine and/or spirits,* 4 bottles spirit for Master and half bottle for each crew member.

CARGO GEAR: No additional requirements, but using vessel's rain tents.

IDENTIFICATION CARDS: Only necessary at quays belonging to Norsk Hydro. Special identification cards will be delivered to Master on arrival.

CONSULS: Belgium 20083 (Skien), Denmark 50069, Germany 25093 (Skien), Holland 22742 (Skien), Finland 52620.

REPAIRS: Repairs possible.

DRY DOCK: Draft 14 ft ., length 155 m., breadth 20 m., also 4 smaller docks.

REPATRIATION: Facilities exist for effecting crew changes and repatriation.

TIME: GMT plus 1 hour.

LARVIK: 59.03 N. 10.02 E. (See Plan Book)

PORT LIMITS: The official port limits for the port of Larvik is a line from Stensnes in East to Rodbergodden in West. Notices of Readiness for loading or discharging, however, will be accepted when the vessel is anchored in any of the anchorages in inner Larvik Fjord.
DOCUMENTS:
Maritime Declaration of Health.
Tolliste i.e. tobacco & curio list for total number of crew.
1 "Varefortegnelse med proviantliste", i.e. cargo & provisions list. (2 copies required for bulk cargoes).
"General-varefortegnelse", i.e. list of general cargo – 3 copies required.
3 Ship's Manifest.
3 Bills of Lading.
Customs Officer will accept tobacco & curio lists, also provision lists filled in on foreign forms, if all goods correctly stated.

PILOTAGE:

1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours notice insofar as possible and confirm arrival at pilot station at 2 hours notice:
   (a) by telephone or telegram from ship to the pilot office concerned or sea pilot station over an official coastal radio station.
   (b) by telephone or telegram from broker/shipowner to the pilot office concerned or sea pilot station.
2. For direct connection between ships desiring Pilot and the pilot service, VHF-radio telephone Channel 16 (156.8 mHz) shall be used for calling and reply, and a VHF-radio telephone ship-to-ship Channel or harbour Channel shall be used for conversations. Ships not equipped with VHF-radio telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether one or two Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions came into force on the 1st January 1971.

Description of pilot boat: white painted, teak wheelhouse,, 2 masts, "Los" on both sides of bow. Light and sound signals: international signal "G" with flag, sound or light. Exact area where pilot vessel situated when on station: "Rakke" sound and light buoy, 5 cables off. In poor weather Pilot will board vessels off "Ramsholmflu" light and bell buoy. If Pilots not available, pilot vessel will conduct vessels to safe anchorage.

Please note: The following temporary changes regarding the pilot service. From October 1st 1976 and until further notice the pilot station is keeping radio watch all days between hours 0900 to 2000 hrs. only. All vessels requiring Pilot to enter the Port of Larvik should advise their requirements and give their ETA's during said hours.

ANCHORAGE: Safe anchorages at end of fjord, West side. Masters should consult Pilots and/or charts before anchoring. Ample water and good holding ground for all sizes of vessels.

MAX. SIZE: Largest vessel berthed at Larvik Canal Quay, LOA 644 ft. 8 in., breadth 83 ft. 3 in., max. draft 32 ft. 6 in.

HEALTH: Advise Agents of any suspected disease or fever on board by radio or telephone before entering. Vessel will then anchor in anchorage and be boarded by state doctor. When vessel is healthy, Custom Officer will grant pratique.

RADIO: Tjome Radio LGT, Rogaland Radio LGQ.

TUGS: No tugs at Larvik. Tugs to be ordered via ship's Agents from Fredrikstad or Porsgrunn. If tugs required Agents should be given 12 to 24 hours notice. Tugs join vessel in fjord off harbour breakwater. Extra charges for use of tug's lines.

BERTHING:

Revquay West (Vester Revkai): Length 118 m. Depth alongside 9 m. Newest quay for general and miscellaneous cargo. New warehouse, measuring 1600 sq. m. Asphalted area outside measuring 10,000 sq. m. Railway track.

Adjacent to this quay is the roll-on/roll-off berth. Max. length vessels 150 m. Depth alongside 8 m.

Kanalquay (Kanalkaia): Kanalquay North – length 335 m. Depth. 10 m. Kanalquay West – length 120 m. Depth 6 m. Kanalquay South — length 90 m. Depth 5 m.

Facilities available at Kanalquay and Revquay West: Railway tracks, 4 portable electric cranes,capacity 6-23 tons, 3 mobile cranes, capacity 14-30 tons. Portable pneumatic grain discharging plant, capacity 85,000 tons. Warehouses measuring 4,000 sq. m.

Outdoor storage area: 20,000 sq. m.

East Pier (Ostre Brygge): Length 130 m. Depth 8 m. New Ferry quay with roll-on/roll-off facilities. Car park for 560 cars or 52 lorries/trailers 18 m.

West Pier (Vestre Brygge): Depth—East side 6 m. West side 7 m. Ferry quay with roll-on/roll-off facilities on both sides. Good parking. Passenger terminal. Customs.

Private Wharves: Treschow-Fitzoe Pulp Quays—West side: Length 50 m. Depth alongside 5 m. East side: Length 90 m. Depth alongside 6.3 m.

B.T. Transport A/S: Length 50 m. Depth 3-11 m.

STEVEDORES: Gangs to be ordered before 1600 hrs. and cranes before 1500 hrs. for following day. During office hours 2 hours notice required.

MEDICAL: No advance notice required, unless in urgent medical cases and when ambulance needed. No particular inoculations required.

TANKERS: For larger oil-tankers for asphalt works, 8 in. connections required; for coasting vessels, 6 in. connections used. Fuel oil and diesel oil shipped in coastal vessels require 6 in. connections; kerosene, white spirit and gasoline, 4 in. connections. No slop tanks. 2 berths for tankers, 1 for larger vessels and 1 for coasters. Max. draft in both berths 32 ft. 6 in.

DENSITY: Salt water, brackish at times.

FRESH WATER: Delivered by hose from wharf.

FUEL: Fuel oil, gas oil, diesel oil, delivery rate by tank lorry 20 t.p.h.

FIRE PRECAUTIONS: Any vessel discharging benzine must have city fireguard on watch. 30 m. clearance required to next vessel. Ships loading explosives require fireguards on watch on board.

CONSULS: Denmark, telephone 262.

REPAIRS: Some small repairs possible and electrical repairs.

DRY DOCKS: None.

AIRPORT: About 30 km. to airport.

HOLIDAYS: New Year's Eve no work after 1230 hrs.; New Year's Day no work; Maunday Thursday, Good Friday no work; Easter Eve no work after 1230 hrs.; Easter Sunday no work; Easter Monday, May 1st and 17th no work; Ascension Day no work; Whitsun Eve no work after 1230 hrs.; Whit Sunday 1st no work; Whit Sunday 2nd, Christmas Eve no work after 1230 hrs.; Christmas Day no work, and December 26th no work.

POLICE/AMBULANCE/FIRE: Police 170; Ambulance 18; Fire Brigade call the switchboard.

MAALOY: 61.55 N. 05.07 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Health List.
3 Manifests.
1 Bill of Lading.
Goods Lists including Stores, 3 if general cargo and 1 if goods or oil in bulk.

PILOTAGE: Harbour Pilot available, ordered from Harbour Office, tel. 51278. No coastal Pilots in harbour. Coastal Pilots ordered from Bergen through Maaloy Skipsekspedisjon, tel. 51077, and must be requested at least 24 hours before arrival.

ANCHORAGE: Good holding ground in about 17 fathoms of water 300 m. off-shore from middle of harbour.

MAX. SIZE: Entrance from South through main channel 33 ft. and entrance from North about 60 ft.

RADIO: Nearest radio station, Alesund Radio and Floro Radio.

VHF: Maaloy Harbour Radio on Channel 16 from 0800 – 1600 hrs. every day except holidays.

TUGS: No tugs operate in Harbour.

BERTHING: The main quay 160 m. long and from 24 to 36 ft. deep alongside. No cranes available at the dock. New quay, length 108 m. Depth alongside 12 m. – 15 m.

CARGO HANDLING: Special berth equipped with a roll-on/roll-off berth in connection with quay 225 ft. long, from 18 to 36 ft. depth alongside.

STEVEDORES: From Maaloy Skipsekspedisjon.

MEDICAL: Nearest hospital Nordfijordeid Sykehus, 1 hour by car.

FRESH WATER: Available at main quay and delivered from a fresh-water line at quay.

FUEL: Bunkers available from Esso, Shell, B.P. and Mobil Oil. Three bunker barges available.

GANGWAY/DECK WATCHMEN: Available in the harbour.

OPENING/CLOSING HATCHES: Done by crew.

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirits: 200 cigarettes or 100 gm. tobacco. 1 bottle of spirit and 1 bottle of wine.

CONSULS: No consuls.

REPAIRS: Minor repairs only possible.

AIRPORT: Nearest airport Floro, 1 hour by boat, and Flesland Airport (Bergen) 8 hours night service by sea.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; Easter Sunday; Easter Monday; Thursday and Friday before Easter; 1st May; 17th May, Whit Sunday and Whit Monday; Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police tel. 51-175; Fire and Ambulance contact telephone station.
TELEPHONES: Can be placed on board and cost same as on shore.
SERVICES: No tank cleaning services available. Compass adjusting.
SHORE LEAVE: No restrictions about shore leave.
AUTHORITY: Harbour Master.

MANDAL: 58.02 N. 07.29 E.

DOCUMENTS:
Bill of Measurement.
General Cargo List (two copies).
Cargo and Provisions List (ship's stores).
Derating Certificate.
Maritime Declaration of Health.
Tobacco list.
PILOTAGE: Pilot station on Oksoy lighthouse outside Kristiansand. Telephone 32834 via Kristiansand radio.
ANCHORAGE: Mannefjorden. Depth approx. 30 ft. Bankefjorden, shallow entrance with approx. depth 15 ft.
MAX. SIZE: Ship up to approx. 12,000 g.r.t. No tide problems. Oil carriers to installations outside main port area up to 20,000 tons.
HEALTH: Contact Agent for pratique.
RADIO: Farsund Radio or Kristiansand Radio.
TUGS: One small 200 h.p. tug available in harbour. Heavier tugs must be ordered from Kristiansand at 5 hours notice.
BERTHING: Mandal main harbour is Kleven, situated 1 km. East of Mandal town. There is also some kind of a harbour in Mandal River, running through town. Entrance to Mandal River is dredged to 15 ft. In South-easterly strong winds it can be impossible to go up the river. Kleven harbour is a good harbour in all weather conditions. There is 1 × 90 m. quay 30 ft. deep and 1 × 45 m. quay 17 ft. deep.
STEVEDORES: 6 hours notice to Agents to arrange gangs.
MEDICAL: No advance notice required. Hospital facilities available.
DENSITY: 1026.
FRESH WATER: Delivered by local firemen. Rate of delivery 20 t.p.h.
FUEL: At Oil installation inside Harbour limit.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Certificate of Nationality.
CUSTOMS ALLOWANCE: Tobacco: 200 gm. Tobacco or 200 cigarettes. Wine and/or Spirits: 2 litre alcohol for ship's Master, 0.75 litre for crew.
IDENTIFICATION CARDS: Not needed.
CONSULS: Sweden 62521; Finland 61288; Denmark 61799.
REPAIRS: All types of deck and engine repairs can be carried out.
DRY DOCKS: None.
AIRPORT: Kristiansand Airport at Kjevik. Distance from Mandal 64 km. Airport served by regular airlines.
TIME: GMT plus 1 hour.
HOLIDAYS: The only holidays that one cannot arrange cargo work Christmas Eve (after 1400 hrs.), Christmas Day, Easter Day, 1st May, 17th May (Independence Day). The rest of the year cargo work can be carried out day and night.
POLICE/AMBULANCE/FIRE: Police 61211; Ambulance 61113; Fire 61112.
TELEPHONES: Telephones available at quay.
SERVICES: No services for tank cleaning. Compass adjusting and all kinds of electronic repairs.
SHORE LEAVE: No restrictions.
AUTHORITY: Mandals Havnevesen.

MO-I-RANA: 66.19 N. 14.08 E.

PORT LIMITS: The vessel is considered to be an "arrived vessel" when within the Haukneset port lighthouse – about 2 nautical miles from the port.
DOCUMENTS:
1 Cargo List.
1 Stores List.
1 Sealing Certificate.
1 Health Certificate.
2 Crew Lists.
2 Passenger Lists.
(All Forms obtainable from Customs by clearance on board).
PILOTAGE: Asvaer Pilot Station 66° 17′ N. – 12° 09′ E. (lighthouse). Order preferably through Agent or direct to station 24 hours before arrival. 2 boats: L/K "Asvaer" and L/K "Asvaer II" both painted white, 2 yellow masts and yellow funnel. "LOS" painted in black on both sides. Radio (frequency 2182) and VHF Channel 16. Pilots embark at Asvaer Lighthouse. Pilots advise alternative place or anchorage if necessary. Pilot compulsory unless vessel ballasting for loading at another port in Norway.
ANCHORAGE: In the fjord at Utskarpen Bay to be advised by sea Pilot. Anchorage in the inner harbour to be advised by the harbour Pilot.
HEALTH: See "Documents". No animals allowed on shore.
RADIO: From South; Rogaland Radio/LGQ, LGW, LGB. Within 24 hours off; Rorvik Radio/LGD. From North; Vadso/LGV or Hammerfest/LGI or Tromso/LGE or Bodoe Radios/LGP.
VHF: At Harbour Office call sign. "Mo Port Radio" Channel 16. At A/S Norsk Jernverks quay call sign. "Jernverks quay" Channel 9.
TUGS: Available and recommended for vessels above 13,000 d.w.t. 24 hours notice to be given. Ships' lines used.
BERTHING: Harbour Pilot recommended but not compulsory for small vessels. Details given through Pilot/Harbour Pilot.

Koksverket Pier	37 ft. depth alongside
Town Pier	25 ft. depth alongside
Jernverket Pier (Steel)	26 ft. depth alongside
Andfiskaa Pier	23 ft. depth alongside

CARGO HANDLING FACILITIES: The harbour has the following facilities for handling cargoes, Norsk Koksverk A/S pier depth 36 ft.; length 427 ft. and 295 ft., North and South side handling following cargoes: ore, coal, coke, tar, bensol, ammonia and oil.

A/S Norsk Jernverk Quay: handling ore, coke, steel products and general cargoes. Length of quay, 823 ft.; depth 25 ft. A/S Bleivassli Gruber Pier, length 115 ft.; depth 23 ft. Has equipment and elevator for handling pyrites – fast loading. The Town Quay (Harbour Board Quay), length 823 ft. and depth 18 to 26 ft., handling general cargoes of all kind, with up to 15-ton lifts.
STEVEDORES: Ordered by Agents preferably in office hours 0900–1600 hrs. Exact time for commencement of work to be arranged with Agent. Vessels to pay for waiting hours for workers if delay not reported. If such report after office hours, vessel to pay for 2 hours.
MEDICAL: If in need of doctor/dentist preferably inform Agent from sea if vessel stays only 1 day.
FRESH WATER: Available at all piers from shore installations.
FUEL: All types available.
GANGWAY/DECK WATCHMAN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open/close.
CUSTOMS ALLOWANCES: Per 10 days in Norway per crew member – 200 cigarettes or 200 gm. tobacco and 2 packages cig. paper, and 1 bottle spirits.
CARGO GEAR: Winchmen from shore required.
REPAIRS: Small damages can be repaired.
AIRPORT: 12 km. to local airport "Rana Airport" connection with Bodoe (North) twice per day and Trondheim (South) twice per day.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Thursday before Good Friday; Good Friday; Easter Monday; Labour Day; National Day (17th May); Ascension Day; Whit Monday; Christmas Day and Second Christmas Day. No work can be arranged on any of these days.
TELEPHONES: Accidents/hospital: 51233; Ambulance: 51510; Fire: 51222 and Police: 51122.
SHORE LEAVE: No restrictions.
AUTHORITY: Port Manager, Mo Havnevesen.

MOLDE: 62.44 N. 07.10 E.

DOCUMENTS:
Health Certificate.
Crew Lists.
Passenger List.
Dangerous Cargo List.
Ship's Register.
PILOTAGE: Telegraphic address "Alesund Radio". Address of pilot station "Rundo".
ANCHORAGE: A well-protected harbour. Depth from 15 to 20 fathoms. Tide rises about 6 ft.
MAX. SIZE: Passenger vessels of 25,000 g.r.t. berth at Storkaia.
RADIO: Alesund Radio.
VHF: Molde Harbour Radio, Channel 16 and 12.
TUGS: None. Tugs called from Alesund.
BERTHING: Depths alongside quay 25 to 32 ft. LW.

A new port, 2 km. from the town. Two quays with roll-on/roll-off ramps. Depth alongside No. 1 – 6 m. and No. 2 – 12 m.
CRANES: 150 ton crane and 20 ton mobile crane.
STEVEDORES: Available, ordered by Agents.
MEDICAL: Hospital available.
FRESH WATER: By shore installation.
DENSITY:1025.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: By crew or stevedores.
IDENTIFICATION CARDS: Not required.
REPAIRS: Most repairs possible.
SURVEYORS: Norske Veritas.
POLICE/AMBULANCE/FIRE: Police 51111; Ambulance 52011; Fire 51100.
AIRPORT: Aaro Airport, 4 km. from town.
SHORE LEAVE: Possible, no restrictions.
AUTHORITY: Molde Havnevesen, Molde.

MONGSTAD: 60.49 N. 05.02 E.

OPERATORS: Oil refinery operated by Rafinor A/S & Co., Mongstad, which company is owned by Norsk Hydro A/S, Norsk Olje A/S and Den Norske Stats Oljeselskap A/S (Statoil).
DOCUMENTS:
3 copies Crew List.
1 copy Crew Effects Declaration.
2 copies Ships Stores Declaration.
1 copy Health Declaration.
1 Passenger List (if any).
IMCO standard forms in most cases required.
On ship's arrival the following documents must be available:
Letter of Registry, Outward Clearance from last port of call, Deratting or Deratting Exemption Certificate, and Certificates of Insurance for Civil Liability for Oil Pollution Damage. Non-member registered ships of the International Convention on Civil Liability for Oil Pollution Damage 1969, must after 30th June, 1976, carry a Certificate issued by Maritime Directorate, PO Box 8123, OSLO-Dep., Oslo, Norway. Before this date

Certificates issued by Denmark, Sweden and U.K. covering non-Convention registered ships, will be recognised.
PILOTAGE: Compulsory. Vessels will be berthed/unberthed by Pilots from Fedje Pilot station (Position 60° 51′ N., 04° 39′ E.). Contact Pilots on VHF Channel 16, 2/3 hours notice required.
ANCHORAGE: N.W. of refinery area. However, not well sheltered and holding ground not good. No anchorage for VLCC's.
MAX. SIZE: Draft limitation at Crude Jetty 72 ft.
HEALTH: International procedure followed to obtain pratique. In case of suspected disease or fever on board, the port authorities to be informed in advance.
RADIO: Cable Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirement. For the refinery's guidance also cable flange dimensions on ships' headers, cargo quantities acceptable and order of loading, quantity of clean ballast and estimated time for discharge, size of cargo to be discharged and max. pumping rates, max. acceptable loading rates, quantity of tank washings and estimated time for discharge.
TUGS: Two tugs of 2,650 b.h.p., each – bollard pull 36.5 tons situated at the refinery. Additional tugs available from Bergen.
BERTHING:

Berth No. 1 (for crude) – draft limitation 72 ft., min. length 124 m., depth 125 ft.

Berth No. 2 (products) – draft limitation 38 ft., min. length 69 m., depth 59 ft.

Berth No. 3 (products/coasters) draft limitation 22 ft., min. length 36.5 m., depth 25 ft.

Berth No. 4 (petrol coke) draft limitation 21 ft., min. length 50 m., depth 24 ft.

CARGO HANDLING FACILITIES:

Berth No. 1 – 4 × 16 in. plus 2 × 16 in./10 in. Woodfield autoflowbooms.

Berth No. 2 – 4 × 10 in. plus 2 × 8 in. Autoflowbooms.

Berth No. 3 – 2 × 8 in. plus 2 × 6 in. Autoflowbooms.

BALLAST: Deballasting facilities available at jetty Nos. 2 and 3. Tankage capacity 27,000 cu. m. All ballast to be discharged ashore.
MEDICAL: Medical attention available. Hospital facilities at Bergen.
DENSITY: Salt water.
FRESH WATER: Available from the jetties. Cost per ton Nkr. 2.50.
FUEL: All grades available.
FIRE PRECAUTIONS: Special safety regulation forms given when berthed.
CONSULS: Consuls available at Bergen from the following countries: Austria; Belgium, Brazil, Denmark, Finland, France, Great Britain, Greece, Iceland, Italy, The Netherlands, Panama, Peru, Portugal, Spain, Sweden, Switzerland, Turkey, Uruguay, West Germany.
REPAIRS: Repair shop facilities available. Repair work must not be commenced without the agreement of the Port Captain.
SURVEYORS: The following Classification Societies represented by Surveyor at Bergen: American Bureau of Shipping, Bureau Veritas, Det Norske Veritas, Germanisher Lloyd and Lloyd's Register of Shipping.
GANGWAY/DECK WATCHMEN: Available.
CUSTOMS ALLOWANCES: 200 cigarettes or 200 gm. tobacco and 1 bottle spirit or 2 bottles of wine, each man.
REPATRIATION: All facilities. Bus or Taxi transport to international airport.
AIRPORT: Flesland Airport, approx. 86 km. (54 miles) distance from Mongstad. Distance Bergen to Mongstad approx. 45 km.
TIME: Central European time i.e. GMT plus one hour.
POLICE/AMBULANCE/FIRE: Police telephone Knarvik 350504 and 350505. Ambulance and Fire fighting brigade available at the refinery.
TELEPHONES: No telephones on board. Long distance calls to be arranged via Agent. Local calls from Gatehouse.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes delivered on board on arrival.
PORT REGULATIONS: *Moorings:* Mixed moorings in the same direction are not allowed. Wire ropes shall have nylon "tails" not longer than 12 m. Nylon "tails" are available for purchase. Due to occasionally heavy swell in the fjord, particular attention is paid to the moorings.
AUTHORITY: Rafinor A/S & Co.

MOSJOEN: 65.51 N. 13.11 E. **(See Plan Book)**

DOCUMENTS:
- Health Certificate.
- Crew List.
- Passenger List.
- Ship's Register.
- Cargo List.
- Bonded Store List.

PILOTAGE: Pilot station at Asvaer, location 66° 15′ 9″ N. 12° 18′ 03″ E. Telegraphic address: Pilot Station, Asvaer. VHF Channel 16. Telegraph ETA 24 hours prior to arrival. Piloting around clock.
ANCHORAGES: Hellesvik. Location 66° 01′ 30″ N. 12° 54′ 20″ E.
RESTRICTIONS: No restrictions night entry. If draft above 33 ft. enter on high tide and commence discharging immediately.
HEALTH: Free pratique given automatically when "Q" flag not to be flown.
MEDICAL: Master to advise prior to arrival if medical attention required. Hospital facilities available.
RADIO: Rorvik Radio LGD.
TUGS: Stationed at Sandnessjoen. Have to be ordered through Agents 24 hours prior to arrival. Normally used by vessels above 20,000 d.w.t.
BERTHING: Draft above 33 ft. berthed only on high tide and commence discharging immediately. No restrictions on length and breadth.

Crane for bulk cargo (alumina), capacity 300 t.p.h. Mosjoen Aluminiumverk, private berth. Maximum outreach from quay – 15 m.

No other special facilities (roll-on/roll-off facilities may be constructed).
STEVEDORES: Ordered through Agents. No ETA to stevedores necessary.
DENSITY: Brackish in port.
FRESH WATER: Supplied from installations at berth.
FUEL: Gas oil, delivered by lorries.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Performed by vessel's crew.
CUSTOMS ALLOWANCE: 1 bottle spirits, 200 cigarettes, 200 gm. tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Minor repairs possible.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Good Friday; Maunday Thursday; Easter Monday; Workers' Day (1st May); 17th May; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Fire 70222; First Aid 70800; Police 71611.
AUTHORITY: Mosjoen Havnevesen.

NAMSOS: 64.28 N. 11.30 E.

DOCUMENTS:
- Crew list.
- 2 Passenger lists.
- 2 Health Certificates.
- Manifests.
- Ship's papers.

PILOTAGE: Sea pilot stationed at Namsos. Contact through Rorvik Radio. Pilot boat: white painted 46 ft. long. Usual signals. Pilot boards at 64° 38′ N. 10° 51′ E. Pilot can be ordered by ship's Agent.
ANCHORAGE: Good anchorage inside harbour.
MAX. SIZE: Vessels up to 15,000 d.w.t. have entered harbour. 3 small oil berths with depth 18 ft. L.W.
HEALTH: Normal Norwegian regulations.
RADIO: Rorvik Radio. No radar or VHF service in the harbour.
TUGS: No tugs in Namsos. 1 tug stationed at Bangsund and can be hired.
STEVEDORES: Notify day before arrival to arrange gangs.
TANKERS: 3 tanker berths 18 ft. alongside L.W.
DENSITY: Average density 1020 in Spring, and in Summer 1015.
FRESH WATER: Available by hose. Capacity 10-15 t.p.h.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores operate hatches.
CERTIFICATES: Usual international certificates.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Small repairs available.
REPATRIATION: Organized by seamen's office.
AIRPORT: 4 km. from town. Regular service twice a day South and North.
TIME: European standard time. GMT plus 1 hour.
POLICE/AMBULANCE/FIRE: Police 72151; Ambulance 72500; Fire 72000.
TELEPHONES: Can be placed on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: None expected.
AUTHORITY: Namsos Havnevesen Boks.

NARVIK: 68.26 N. 17.25 E. **(See Plan Book)**

DOCUMENTS:
- Health Declaration in Norwegian form (if not available another form is possible).
- 6 Crew Lists.
- 1 Provision List.
- 1 Private Customs List.
- Passenger List.

PILOTAGE: Tranoy Pilot station. Position 68° 11′ N. 15° 34′ E. Pilots request 24 hours notice. Cable address: Tranoy Pilot station. Before arrival pilot station Pilots should be called on VHF Channel 16.

Distance from Tranoy to Narvik is 46 miles. The Harbour Pilot will board and assist during berthing.
ANCHORAGE: Narvik Harbour. Pilot will advise anchorage.
RESTRICTIONS: No restrictions on night entry.
HEALTH: Free pratique, otherwise see "Documents".
RADIO: Cable Agents giving ETA, draft and cash required. Radio station: Rogaland Radio/LGB but other stations can be used.
TUGS: Must be employed for tankers. 3 tugs available, capable of assisting vessels up to 250,000 d.w.t.
VHF: Local and long-distance calls may be ordered through Harstad Radio on Channel 16.

Port frequency is Channel 14, on which vessels may communicate with the port ferry launch and Agent (ore-loading vessels).
BERTHING: Ore piers No. 3 and 4: Max. depth alongside is 13.5 m. at LWOST, and max. draft on departure 13 m. A deeper sailing draft may be permitted if tide and weather conditions are favourable but the Master will be liable for any damage caused by a vessel with draft over 13 m.

2 boom-type shiploaders are available, on each side of the pier. If 2 vessels are loading simultaneously, 1 on each side of the pier, then only 1 loader may be used by each vessel. The designed capacity of each loader is 4,500 t.p.h. but average capacity of each loader is 2,000/3,000 t.p.h. depending on quality and kind of ore to be loaded.

Maximum outreach from fender line is 15 m. The height from the water to the top of the vessel's coaming must not exceed 13 m. (Pier 3) and 11 m. (Pier 4).

The length of the ore pier is 250 m. on the outside (No. 3) and 220 m. on the inside (No. 4).

The shiploaders are able to travel over a distance of 145 m. so larger vessels (65,000 tons d.w.t.) may have to shift during loading operations. The length of the vessel from the bow (or bulbous bow) to the aftermost loading point must not exceed 202 m.

The limit on beam is 37-38 m. for ore/bulk carriers and 39-40 m. for OBO vessels (approx.)

A stowage plan is to be handed to the Agent and foreman on arrival, stating the quantity in metric tons and loading rotation of the hatches, also the estimated draft on sailing.

Weighing: Electronic conveyor weighing with an average accuracy better than ±0.15%.

New Ore Pier No. 5:

The quay is 208 m. long and has a water depth of 27.5 m. which allows tonnages of about 350,000–400,000 d.w.t. One shiploader with a loading capacity of 11,000 tons of ore or 7,500 tons of pellets per hour is available. Provision is made for an additional shiploader to be constructed later.

Vessels of max. 150,000 d.w.t. may be loaded without shifting while larger vessels will have to be shifted along the pier during loading.

Fagerneskaien: Situated in the Southern part of the harbour, may be used by iron ore vessels during repairs, etc. Length of quay 230 m. Depth alongside at LW 15 m.

STEVEDORES: Ordered by Agent. Not necessary to contact stevedores.

Working hours: Ordinary working hours 24 running hours, except Saturday 2200 to Sunday 0600 hrs.

Loading does not take place on the following holidays:

December 24th	1300 hrs. –	December 26th	2200 hrs.
December 31st	1300 hrs. –	January 1st	2200 hrs.
Maundy Thursday	1400 hrs. –	Easter Monday	2200 hrs.
Whitsun Eve	1400 hrs. –	Whit-Monday	2200 hrs.
April 30th	2200 hrs. –	May 1st	2200 hrs.
May 16th	2200 hrs. –	May 17th	2200 hrs.

CRANES: Fixed crane, SWL 5 tons, is available at Fagerneskaien (deep-sea wharf), and mobile cranes can be hired from local companies.

DENSITY: 1020.

FRESH WATER: Ore berth has supply of fresh water. Otherwise delivery by tugs.

FUEL: Only clean oil (diesel) and lubricating oil available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: May be handled by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 gm. tobacco and 0.75 litre spirit or 2 bottles of wine. Must be declared on Customs list together with radios, tape recorders, binoculars, etc.

IDENTIFICATION CARDS: Not required.

CONSULS: Swedish, Danish, British, West German.

REPAIRS: Only small deck and engine repairs possible.

SURVEYORS: Lloyds representative and surveyor are available at the port.

DRY DOCKS: None.

AIRPORT: Narvik Airport, 5 minutes by taxi from the port. Local commuter service with connection to the nearest major airports.

Evenes Airport, 1.5 hours by bus from Narvik. Regular service to Oslo (Fornebu Airport) and other major Norwegian airports.

REPATRIATION: Facilities exist for crew change and necessary repatriation.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day; May 1st; May 17th; Easter; Christmas Day; December 26th.

POLICE/AMBULANCE/FIRE: Police 41060; Hospital 44044; immediate help 4300 (only at night time); Ambulance 43600; Fire 41122.

LAUNCHES: The Agent will supply a time table and tickets on arrival. If a launch is required, the "B" flag or red light should be displayed from the signal mast.

TELEPHONE: Vessels alongside the piers may hire a telephone but continuous telephone watch should then be kept on board.

SERVICES: Compass adjusting can be arranged when necessary.

SHORE LEAVE: Allowed.

AUTHORITY: Narvik Port Authority.

OSLO: 59.54 N. 10.43 E. (See Plan Book)

DOCUMENTS:

Maritime Declaration of Health.
Sealing Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Lists Crew Personal Effects.
Provisions List.
3 Cargo Manifests.
Certificate of Tonnage.
Dangerous Cargo List.

PILOTAGE: Compulsory. Pilot boards at Faerder Lighthouse, 50 miles from docks. Give 6 hours notice by R/T 2182 kHz or VHF Channel 16 to "Faerder Pilot".

ANCHORAGE: Good sheltered anchorage in Western Harbour Basin, depths up to 20 m.

RESTRICTIONS: Vessels may enter at any time. No tide or current.

MAX. SIZE: Vessels up to 34 ft. draft may berth at Filipstad Quay and Sjursoya Quay.

Tankers: Up to 36 ft. draft at Oslo, or 38 ft. draft at Fagerstrand.

HEALTH: International procedure followed to obtain pratique. In case of suspected disease or fever on board, inform the Harbour Master's office in advance. When arriving from a Norwegian port, pratique is automatic.

RADIO: Communicate through Oslo Radio, call sign LGO. Harbour Master's Office equipped with VHF, Channel 16.

TUGS: Sufficient tugs available for all requirements.

BERTHING: Instructions given from Harbour Master. Masters of ships are requested to send their ETA to the Harbour Master's Office through Oslo Havne radio, VHF Channel 16.

Filipstad Quay: Up to 11 m. depth alongside.
Sjursoya Quays: Up to 11 m. depth alongside.
Vippetangen: Up to 8 m. depth at Pier No. 2.
Pipervika: Up to 12 m. depth at Akershus Pier.
Bjorvika: Up to 7 m. depth at Lang Quay.
Bispevika: Up to 9 m. depth at Sorenga Pier.
Gronlia: Up to 8 m. depth alongside.
Kongshavn Quays: Up to 7 m. depth alongside.
Bekkelget: Up to 11 m. depth alongside.

BULK CARGO FACILITIES: Container traffic handled at Filipstad, Bekkelaget and Sjursoya North.

Sorenga Pier equipped for palletised cargo handling and containers, ro/ro.

12 berths for roll-on/roll-off traffic. Container crane for 20 ft., 30 ft. and 40 ft. units, up to 30 tons (net) and container handling equipment, quay cranes and mobile cranes and new floating ro-ro ramp.

Sjursoya North: Cement, phosphate, grains, molasses and containers.
Sjursoya South: Gasoline and oil and propane gas.
Bekkelaget North: Molasses, general cargo and oil.
Sorenga: General cargo and containers.
Kongshavn: Building material.

STEVEDORES: Arranged by Agents. Working hours 0700-1600 hrs., Saturdays overtime is voluntary.

TANKERS: Also see "Slagen".

Oslo: Oil pier at Sjursoya, depth alongside 12 m. A tug required to stand by during discharge.

Fagerstrand: Terminal operated by Norske Braendselolje A/S situated in Oslo fjord, 12 miles S. of Oslo. 1 berth for tankers up to 30 ft. draft. 1 berth for tankers up to 38 ft. draft.

MEDICAL: All facilities available. Masters to advise by radio prior to arrival if medical attendance required on board.

DENSITY: Salt water, 1025.

FRESH WATER Available by pipeline from all quays.

FUEL: All grades available, ex-wharf at many quays. Can be delivered by barge.

FIRE PRECAUTIONS: 2 boats fully equipped with fire-fighting equipment.

CUSTOMS ALLOWANCES: 200 cigarettes allowed weekly, 1 bottle spirit weekly, for each man.

CARGO GEAR: International Safety Regulations to be observed.

IDENTIFICATION CARDS: Not required.

CONSULS: Following countries are represented at Oslo:

Australia
Austria
Bangladesh
Brazil
Canada
Chile
Colombia
Costa Rica
Cyprus
Denmark
Dominican Republic
El Salvador
Finland
France
Gambia
Germany
Ghana
Great Britain
Greece
Guatemala
Haiti
Honduras
Iceland
Indonesia
Ireland
Italy
Ivory Coast
Jordan
Korea
Lebanon
Lesotho
Liberia
Lichenstein
Luxembourg
Madagascar
Malaysia
Mexico
Monaco
Morocco
Pakistan
Panama
Peru
Philippines
Portugal
Senegal
Seychelles
Singapore
Soviet Union
South Africa
Spain
Sudan
Sweden
Switzerland
Thailand
Tunisia
Turkey
Uruguay
Venezuela

REPAIRS: All types of hull and machinery repairs can be effected.

DRY DOCKS: 1 floating dock with lifting capacity of up to 19,000 tons (197.5 m.×23 m.×7.9 m.) and 1 graving dock (172 m.×23 m.×6.7 m.)

REPATRIATION: All facilities available without restrictions.

AIRPORT: Fornebu Airport situated 8 km. from city centre. Regular services to Europe, South America, Far East and U.S.A.

TIME: Local time, GMT plus 1 hour.

HOLIDAYS: January 1st; Good Thursday; Good Friday; Easter Monday; May 1st; May 17th; Whit Monday; Christmas Day; Boxing Day.

No cargo work normally on Saturday, Sunday and Holidays.

POLICE/FIRE/AMBULANCE: Police, tel.: 11.00.11; Fire, tel.: 42.99.00; Ambulance, tel.: 20.10.90.

TELEPHONES: Can be placed on board vessels at most quays.

SHORE LEAVE: No restrictions.

DEVELOPMENTS: Extensions of the land areas in the port by approx. 200,000 sq. m. Quay extensions of 1,000 m. Storage halls in hills 100,000 sq. m. or more, sheds and service buildings.

AUTHORITY: Port Director, Oslo Havnevesen.

RISOR: 58.43 N. 09.14 E.

DOCUMENTS:
3 Crew Lists.
3 Customs Lists.
Ship's Register.
Bill of Lading.

PILOTAGE: Contact Arendal Pilot.

ANCHORAGE: In 15 fathoms depth.

MAX. SIZE: 10,000 d.w.t., draft 28 ft.

RADIO: Farsund and Tjomoy Radio. VHF Channel 16. No radar.

TUGS: No tugs for berthing.

STEVEDORES: Available 24 hours notice of ETA required.

FRESH WATER: Available by pipe-line at berth.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: May be performed by ship's crew.

CUSTOMS ALLOWANCE: Tobacco: Wine/Spirits: 200 cigarettes per crew member for 10 days. 3 bottles spirit for ship's Master only for 10 days.

IDENTIFICATION CARDS: Not needed.

CONSULS: French and Swedish.

REPAIRS: No shipyard.

AIRPORT: 10 miles; every day service.

TIME: GMT plus 1 hour.

HOLIDAYS: Work can be arranged by 100% overtime.

TELEPHONES: Can be arranged on board.

AUTHORITY: Harbour Master, Risor Havnekontor.

SARPSBORG: 59.17 N. 11.07 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
3 Manifests.
1 Bill/Lading.
2 Tobacco/spirit Lists.

PILOTAGE: Pilot ordered by Faerder Losstasjon or Herfol Losstasjon via Tjome Radio. Harbour office can be contacted by VHF. Pilotage compulsory for all vessels of 100 g.r.t. and over.

ANCHORAGE: Between Struten Light and Stromtangen Light.

MAX. SIZE: 24 ft. draft.

HEALTH: No particular action necessary, but Agent to be informed.

RADIO: Tjome Radio.

VHF: Harbour Master's office, Channels 16 and 12. Day and night service.

TUGS: Small harbour tug available.

BERTHING: A roll-on/roll-off berth has been built to handle vessels of up to 6,000 tons gross. Depth alongside 28 ft. Vessels will moor alongside the old Alvim pier enabling them to work through the side doors and stern doors.

STEVEDORES: Ordered through Agent.

MEDICAL: If medical attention necessary Agent must be informed in advance.

FRESH WATER: Only at Alvim Kai, average 15 t.p.h.

FUEL: Fuel obtained only with tank cars.

GANGWAY/DECK WATCHMEN: No gangways from shore. Watchman can be obtained.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: 100 gm. tobacco or 200 cigarettes per crew member. Wine 1 litre per member or 1 bottle of spirit.

IDENTIFICATION CARDS: Have to be used for Melloes Quai only.

CONSULS: Denmark, Finland, Iceland, Sweden and Greece have vice-consulates.

REPAIRS: Deck and engine repairs possible.

DRY DOCKS: One for 3,100 tons d.w.t.

REPATRIATION: No facilities.

AIRPORT: Fornebu Airport 110 km. from Sarpsborg. Served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January; 1st May; 17th May; 25th/26th December. No work on these days.

POLICE/AMBULANCE/FIRE: Police 52000; Ambulance 52040; Fire 51234.

TELEPHONES: No arrangements exist for placing telephones on board.

SHORE LEAVE: No restriction.

AUTHORITY: Harbour Master, Sarpsborg Havnevesen.

SAUDA: 59.40 N. 06.22 E. **(See Plan Book)**

DOCUMENTS:
Health Certificate.
Crew List.
Derating Certificate.
Ship's Register.

PILOTAGE: Skudefjorden Pilot Station, tel. 047-58337 (or pilot boat "Skudefjord" on VHF). Kvitsoy, position 59° 05′ N., 05° 20′ E.

ANCHORAGES: Safe anchorages everywhere in Sauda Harbour area.

RESTRICTIONS: No restrictions night entry – but sea Pilots usually refuse to take in vessels over 10,000 d.w.t. between 1800 hrs. and 0600 hrs. during Winter time, November-January.

MAX. SIZE: *Sauda Smelteverk A/S* (Private Quays): Draft 30 ft. – but vessels over 30 ft. are allowed to get alongside at owner's own risk. Length no restriction. Breadth, 75 ft.

Official Quays: Length of quays – 230 ft. and 200 ft. Max. draft 13 ft.

RADIO: Cable Agents giving ETA, draft and cash requirement via Rogaland Radio.

VHF: VHF installed at Smelteverk.

TUGS: Not necessary.

BERTHING: May take place at any time provided quay available.

(1) Import Quay: 250 m. long. 2 unloading towers with a capacity of about 3,500 tons ore per day.

(2) Export Quay: 115 m. long. 2 loading cranes with a capacity of about 1,600 tons ferro alloys per day. One loading machine with capacity 400 t.p.h.

STEVEDORES: Ordered by Agents. Normal working hours 0700–2300 hrs. and on Saturday 0700–1200 hrs.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required aboard. Modern hospital.

DENSITY: Brackish in port area, average salinity 2.39%.

FRESH WATER: Good fresh water available, delivery irrespective of quantity.

FUEL: No fuel available at Sauda, must be ordered from Stavanger.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Crew allowed open and close.

CERTIFICATES: Registered Tonnage Certificate required.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per crew member (Master – double allowance). Wine/Spirit, 3 bottles for Master and 1 bottle either spirit or wine for each crew member.

CARGO GEAR: No additional requirement.

IDENTIFICATION CARDS: Admittance cards to be filled in to pass the gate.

CONSULS: No consulates at Sauda. Nearest in Stavanger.

REPAIRS: Minor repairs possible.

DRY DOCKS: No dry dock at Sauda. Nearest in Stavanger and Haugesund.

REPATRIATION: Any repatriation may take place.

AIRPORT: Stavanger and Haugesund.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (May 1st); National Day (May 17th); Ascension Day; Whit Monday; Christmas Day; Second Christmas Day (December 26th) (no work on these days).

POLICE/AMBULANCE/FIRE: Police 93266; Ambulance 92811 or 92511; Fire 93222

TELEPHONE: If wanted, telephone may be placed on board (apparatus No. 52163) free of charge.

REGULATIONS: Strictly prohibited throw wastes or garbage into sea within port area.

DELAYS: All vessels loaded/unloaded in turn, very seldom any congestion in port.

AUTHORITY: Sauda Havnestyre.

AGENT: Sauda Smelteverk A/S, 4201 Sauda. Tel. 92511 or 92570. Telegram "Saudecia". Telex 33166 EFPCO N.

SKIEN (incl. Menstad and Vollsfjorden): 59.12 N. 09.38 E.

DOCUMENTS:

Clearance documents, forms obtainable from Customs Officers on arrival.
Deratisation Certificate.
Bill of Lading.
Manifests.
2 Crew lists.
Ship's Register.

PILOTAGE: Ship's Agent gives ETA pilot station 24 hours before arrival and direct to Pilots 2 hours before arrival. Telegraphic address: Pilot station, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy, Langesund bay, 58.55 N. 09.44 E. Flag, sound and morse signal "G". Pilotage compulsory for all foreign vessels but dispensation can be obtained for smaller Scandinavian vessels.

MAX. SIZE: Between Porsgrunn and Skien, Norsk Hydro have loading place, Menstad, for vessels up to 425 ft. length and max. draft 18 ft. 06 in. Between Menstad and Skien Grain Silo for vessels with max. length 425 ft. and max. draft 18 ft. 06 in. At Skien vessel's length must not exceed 335 ft. and max. draft 18 ft. 06 in.

RESTRICTIONS: No restrictions on night entry for vessels of above mentioned sizes.

BRIDGES: On passage from sea, vessels pass Porsgrunn where there is a lifting bridge with breadth 30 m. Signals for passing bridge inward: 1 long and 2 short sound signals. Outward signals, 1 long and 1 short sound. There is also a bridge at Brevik: Max. height 45 m.

RADIO: Tjome Radio/LGT or Farsund Radio/LGZ.

TUGS: One tug available.

BERTHING: Also see "Max. Size".

Bridges: From sea vessels pass Brevik bridge, max. height 45 m.

Aircable: At Kjeoya there is an aircable which permits an airdraft of max. 37 m.

Tugs: A number of tugs are available.

Berthing: 2 quays, No.1; length 135 m (ro-ro facilities with ramp of 20 m. breadth in operation) depth from 8.5 to 11 m. No.2; length of quay 125 m. but open to sea with mooring pillar at 250 m. from ro-ro ramp. This quay has ro-ro facilities with ramp of 30 m. breadth, and depth of 11 m. for full length.

Cranes and Ro-Ro Materials: No stationary cranes, any size of mobile crane and floating cranes up to 250 tons available. Container truck of 30 tons lift/capacity, Tugmaster of 21 tons towing power, Forklifts from 3 – 6 tons, Warehouse 3,000 sq.m. Unlimited open space.

Density: Practically fresh water.

DENSITY: At Menstad and Skien practically fresh water.

STEVEDORES: Ordered by Agents.

FRESH WATER: Obtainable.

GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCES: 400 cigarettes and 4 bottles spirit for the Master. 200 cigarettes and half a bottle spirit for each crew member.
CONSULS: Belgium, Holland, Sweden, Germany, Finland.
REPAIRS: All repairs possible. Dry dock: Lifting capacity: 2,000 tons. Radar/radio services can be arranged through Agents.
MEDICAL: All medical assistance to be arranged via Agents.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Eve (half day); Easter Monday; Labour Day (1st May); Ascension Day; National Holiday (17th May); Whit Monday; Christmas Eve (half day); Christmas Day; (26th December), New Year's Eve (half day).
REPATRIATION: Facilities exist for effecting crew changes and repatriation.
AIRPORT: International at Oslo and Skien airport.
AUTHORITY: Skien Havnevesen.

SLAGEN: 59.20 N. 10.31 E. (See Plan Book)

LOCATION: A/S Norske Esso's Slagen Refinery is located on the West coast of the Oslo Fjord near Tonsberg, about 20 miles from the Ferder Light House. The Marine Terminal, a finger pier, is located at Slagentangen, near the refinery.

DOCUMENTS:

Ship's Register (Certificate)	(For customs examination)
Deratting Certificate	(For customs examination)
Health Declaration	(For customs examination)
Cargo Manifest	(For consignee)
3 Copies Provision List	(For customs information)
3 Copies Crew List	(For customs and terminal information)
1 Copy Personal Effects List	(For customs information)

NOTE: Crew list to show date and place of birth for each crew member.

PILOTAGE: Pilotage is compulsory for all foreign flag ships. The pilot boats lay in a harbour on Hvasser Island from where a radar and VHF watch is kept. The pilot station listens out on Maritime Channel 16 and when your ship is about 10 miles from Ferder Island (Store Faerder) contact should be made. You will be given instructions as to where and how the Pilot will board. The Pilot boards East of Ferder Island from a 20 m. long white boat marked LOS and capable of doing 18 knots. In bad weather, ships of less than 10,000 d.w.t. may have to proceed in as far as Fulehuk before a Pilot can board.

The pilotage service is provided by the Norwegian Government. There are about 50 Pilots all recruited from the Norwegian Merchant Navy after they have obtained a 1st Mate's licence. Only Pilots with at least 10 years service pilot large tankers.

Berthing Pilot: A Berthing Pilot will board off Lysboye from one of the berthing tugs. He will come equipped with a portable VHF set with which to talk to the tugs and will also advise mooring procedures.

The Berthing Pilots are also Norwegian Government Pilots from the Horten Pilotage District. There are only 3 Pilots, all senior men recruited from other pilotage districts and their experience factor is high.

APPROACHES: The approaches to the Oslo Fjord via the Skagerrak are free of any particular navigational dangers and there is deep water close to the Norwegian coast.

Tankers of 40,000 d.w.t. or larger are requested to keep a minimum distance of 15 nautical miles off the Norwegian coast until entrance to the Oslo Fjord, where traffic separation scheme is in force inside territorial waters.

There are no particular navigational difficulties in the Oslo Fjord, all depths of less than 35 m. (115 ft.) can be easily avoided.

Deep draft vessels (40,000 d.w.t. and larger) in fully loaded condition, should exhibit the internationally recognised 3 red vertical lights at night and a black cylinder by day, indicating that the vessel is hampered in her ability to comply with the Steering and Sailing Rules and that other vessels should not impede her safe navigation in the Fjord.

Navigation Aids:
Norske Esso has provided two leading light/marks, one on the jetty itself and one on shore at Stubrekk. These lights when in line bear 309° true and mark a deep approach (least depth 25 m., 82 ft.) between Lysboye and the Slagen Terminal jetty.

ANCHORAGE: North of pier head. Particulars regarding anchorage will be given by Pilot.

MAX. SIZE: Tankers up to 350 m. length and 66 ft. draft can be berthed. Berth No.1 designed for vessels 250,000 d.w.t. Depth of water alongside 69 ft.

HEALTH: Clearance is effected on arrival. International procedure followed to obtain pratique. In case suspected disease or fever on board inform port authorities in advance.

RADIO: 72 hours prior to arrival at pilot station, radio Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirements. ETA should be repeated 48, 24 and 12 hours prior arrival pilot station. All radio messages should be transmitted via Rogaland Radio, and when within closer range via Tjome Radio. When Pilot has embarked, contact should be established with Slagen Harbour Office via VHF Channel 16 or 14 for exchange of information prior to berthing, such as berth availability, current, wind, draft, ballast to be discharged, etc.

TUGS: A total of 8 tugs ranging from 1,100 to 5,200 b.p.h. can be made available to shipping at Slagen. However, none of the tugs are normally stationed at the terminal, except when a vessel of 20,000 d.w.t. or larger is discharging or loading. On such occasions one or two tugs will be kept on stand by at the terminal. If additional tugs are required they must be ordered from Horten or Oslo.

The number of tugs required for berthing are ordered by the Agent in accordance with the berthing Pilot's advice. All tugs are diesel powered, single screw, single rudder and suitable for towing on the hook or alongside. When on the hook, ship's towlines are used.

The tugs are normally made fast enroute between the Slagentangen light buoy and the terminal.

Communications: All communications between Pilot and tugs will be made over the Pilots' portable VHF. Should there be any breakdown, ship's whistle will be used. It is very important that communications within the ship between bridge, forecastle head and poop be good, particularly on the larger ships.

BERTHING: The main effect on ship handling in the berth approaches comes from the current, which for most of the time sets S.E. across the jetty which is aligned N-S. Ships berthing on the West side of the jetty (Berths 2 and 3) will tend to set down onto the berth. The marine terminal has a current speed and direction meter and advises the Pilot.

A submersible oil boom enclosing the pier is anchored on the sea bed, and the boom and its system of anchorage will be damaged if vessel's anchors are dropped in the shaded area on plan. *Except in emergency situations anchors should not be used within the shaded area.* Manoeuvres to and from the berths should be discussed with the Harbour Office which will give you information on currents.

Ice affects navigation at the terminal about every six years, and Pilots use special manoeuvres to deal with ice situations.

The Terminal: The terminal consists of a finger pier. On the East side (Berth No.1) the water depth is 21 m. (69 ft.) and vessels with max. length 365 m. (1200 ft.) and max. draft 20.1 m. (66 ft.) can be accommodated. On the West side (Berth Nos. 2 & 3) there is a water depth of 11.5 m. (37 ft. 9 in.). The West side is mainly used for coasters and barges, but vessels up to a max. length of 192 m. (630 ft.) with max. draft 10.6 m. (34 ft. 9 in.) can also be accommodated on this side of the pier.

Fendering: On Berth No.1, the breasting face is protected with timber-faced gravity fenders and timber-faced panels backed by laminated rubber units. Berths Nos. 2 & 3 are fendered with timber-faced panels backed by rubber tubing.

Limitation on Berthing Speeds/Angles: On Berth No. 1, the *maximum* speed of approach ranges from 8.15 m. (26.5 ft.) per minute for a fully loaded 100,000 d.w.t. tanker to 5.19 m. (17 ft.) per minute for a fully loaded 250,000 d.w.t. tanker. (See Plan). For the larger tankers, the target should be 1 m. (3 ft.) per minute. The speed of approach is monitored by Doppler Radar and the Pilot is kept frequently informed of the speed. The angle of approach should be as small as possible, a parallel landing being the target.

Berthing: Tankers for Berth No. 1 are usually berthed port side to, by paying off the bow to starboard and having tugs push the ship bodily, against the prevailing current, on to the berth. Headlines are usually run out first to the Northern-most dolphin.

The larger ships berthing on Berths Nos. 2 and 3 usually go port side to berth with tugs on the hook holding the ship off against the current. The approach to Berths Nos. 2 and 3 is normally facilitated by the fendered sliding front.

Moorings: Moorings are taken ashore by mooring boats and lifted onto dolphin/jetty by power capstans.

Shore Moorings Used: On Berth No. 1 a 48 mm. (1.875 in.) diameter shore-based mooring wire is placed on board large tankers as an extra aft back spring. The wire has an eye which is put over the bitts after being taken on board by rope messenger. No shore moorings are used on Berths Nos. 2 and 3.

Gangway: At Berth No. 1, near the Southern end of the breasting island, there is a telescopic hydraulic operated gangway reaching a deck height of about 22 m. above sea level. Also a portable gangway is available to accommodate handy size vessels. Whenever the latter one or when the vessel's own gangway is used, the vessel shall provide a safety net under the gangway, and a lifebuoy with not less than 15 fathoms of line attached should be positioned near the gangway for use in an emergency.

Cautionary Advice, Mooring Supervision: Breast moorings at the jetty have a scope of only 25 m. (82 ft.). The offsetting current at Berth No. 1 makes the tending of moorings during the discharge of a tanker with large light freeboard a very important operation and should only be done under the supervision of a ship's officer.

The area dredged to 21 m. is limited, and a VLCC needs to take care that it does not get too far to the South. When in position, there is 25 m. (82 ft.) clearance between the stern and the edge of the dredged area. It is for this reason a shore wire backspring is provided.

It is of the utmost importance that large vessels, in particular, are moored adequately and that moorings are carefully tended.

Before hard arms are connected, the ship's moorings and the mooring equipment are checked by the terminal personnel.

Special Regulations: If the wind speed reaches 20 knots or offsetting current reaches 0.6 knots, the discharge of a VLCC is stopped and the arms drained. All tank lids and ullage plugs must be closed and a tug will be ordered to stand by.

If the wind speed reaches 25 knots or offsetting current reaches 0.7 knots, the arms will be disconnected and the ship ordered to stand by for possible departure.

Weather forecasts in addition to actual current and wind velocity readings are available from the terminal office.

Preparation of Manifold Area: All crude ships should arrive with manifold stripped to the outboard 12 in. flange. All derricks, stays, radio aerials etc. should be removed from the vicinity of the manifold to be used.

Ullaging, temperatures, waterfinding, etc.: On arrival ullages, temperatures and water dips should be taken by ship's personnel in co-operation with terminal representative. Vessel equipped with an inert gas system will be requested to depressurize tanks sufficiently to allow for sampling, ullaging, temperature and water dipping on arrival, and for checking of oil and residues left on board after completion of discharge.

Deballasting Facilities: All ballast must be pumped ashore unless from segregated tanks. Maximum quantity receivable, if advanced notice given, is 12,000 cu.m.; any quantity greater than this will cause delays.

Restriction on concurrent loading, discharging, ballasting, deballasting

Max. back pressure at ship's manifold:

No concurrent loading, discharging, ballasting, deballasting is allowed unless the two systems are entirely separate. Should a discharging ship require to reduce her freeboard due to weather or hard arm/hose limitation, she will be required to stop all cargo operations while ballast is taken on. The responsibility for ensuring remaining cargo is not contaminated by water rests with the ship. Maximum back pressure at ship's manifold is 10.55 kg./sq.cm. (150 p.s.i.).

HOSES:

Grades of Cargo, Bunkers Handled, Connections and Lines:

Crude oil and most grades of clean and dirty products and pressurized LPG are handled at the terminal.

Berth No. 1: Crude oil is received/shipped via 4×12 in. fully counterbalanced hard arms with 12 in. ASA flanges. Maximum pressure at ship's rail 12 kg./sq. cm. (170 p.s.i.).

Clean products are handled through 2×10 in., dirty products through 1×10 in. and bunkers through 1×8 in. all fully counterbalanced hard arms. The 8 in. bunker arm can also be used for loading dirty products. LPG is handled through 1×3 in. hose or through 1×4 in. half hose half metal arm.

Berth No. 2: Dirty products are handled through 1×10 in. and 1×6 in., clean products through 2×8 in. all half hose half metal arms. Also 1×12 in. fully counterbalanced hard arm available for clean products.

Berth No. 3: (Coaster berth). Dirty products are handled through 1×6 in., clean products through 1×6 in. and LPG through 1×4 in. all half hose half metal arms.

All flanges are to ASA Standard.

There are no check (non-return) valves in the import lines; and, therefore, the contents of shore tanks which are situated on high ground will flow back into ship if allowed to do so.

The crude oil discharge rate is up to 10,000 t.p.h., 1 booster pump of 400 cu.m./hr. capacity is used on steam cracked naphtha imports.

BALLAST: Shore ballast capacity 100,000 bbls. All ballast to be discharged ashore.

MEDICAL: Medical attention and hospital facilities available.

DENSITY: 1017 – 1020.

FRESH WATER: Fresh water is available ex jetty at a rate of 30 cu.m. an hour. Water is supplied by 2 in. hose and is metered. Cost is $1 per ton. Quality is good. Quantity required must be included in arrival cable.

Distilled Water: Distilled water is not normally available and can only be supplied with great difficulty. Maximum notice must be given. It is expensive.

FUEL: All main grades of bunkers, lubricants and hydraulic oils are available. Quantities and specification required must be included in the cable of advice of ETA. Lubricants and hydraulic oil are available in bulk as well as barrels.

FIRE PRECAUTIONS: Special safety regulation forms given when berthed.

GANGWAY/DECK WATCHMEN: Oil Pollution/Safety Inspector placed on board all vessels over 20,000 d.w.t.

CUSTOMS ALLOWANCE: 200 cigarettes/or 200 gm. tobacco and 1 bottle spirits for each man.

IDENTIFICATION CARDS: Gate pass delivered to ship when berthed.

CONSULS: Denmark, Finland, France, Great Britain, Netherlands, Spain, and Sweden have representatives in Tonsberg. W. German consul in Sandefjord. All countries represented in Oslo.

REPAIRS: All kind of ship repairs can be undertaken by nearby ship yards. Service for radio, gyro, radar, echo sounder, data bridge, etc. available. Also classification surveyors representing NV, LR or AB can be called upon.

No ship may immobilize its engines, steering gear, etc. while alongside the Slagen jetty.

DRY DOCKS: Available at Sandefjord about 35 miles from Slagen.

REPATRIATION: Changes of crew are available. Transportation by train and plane from Oslo (about 100 km. from Slagen), passenger lines from Oslo. Hotel accommodation available at Tonsberg (10 km. from Slagen).

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day; Maunday Thursday; Good Friday; Easter Monday; Labour Day (1st May) 17th May; Ascension Day; Whit Sunday and Whit Monday; Christmas 25th and 26th: Discharging/loading all days.

POLICE/AMBULANCE/FIRE: Police Tonsberg 13355; Ambulance/Fire local at the refinery.

TELEPHONES: Available at berth.

SERVICES: Tanker cleaning services available at Horten, about 15 miles from Slagen.

GENERAL: *Safety:* A safety inspector will attend the vessel upon arrival, complete a safety check-list and remain on board during cargo and bunkering operations.

Oil Pollution, Clean-Up Facilities: A very serious view is taken of oil pollution of Norwegian coastal waters and every effort must be made to prevent it.

Should oil pollution occur, it must be reported and tackled at once.

The terminal has supplies of oil dispersant, spill booms, sawdust and two mechanical removal devices. These will be used to combat any oil pollution and costs will be billed to your ship if the ship is responsible for the pollution.

Firefighting Facilities: The terminal is equipped with comprehensive fire fighting facilities including an 800 cu. m./hour fire pump, a supply of foam compound, remote-controlled elevated foam cannons and other fire hydrants, hoses, etc. A tug which stands by the terminal has fire fighting facilities and other fire fighting tugs can be summoned in an emergency.

Shore Steam, Shore Electricity: Normally not available.

Stores: All regular ship's stores, laundry and other similar facilities can be supplied by local ship's chandlers.

Tank Cleaning: Tank cleaning and gas freeing are not allowed alongside.

SHORE LEAVE: Shore passes are issued on board on arrival and each crew member must be in possession of a shore pass before he goes ashore.

AUTHORITY: A.S. Norske Esso, Tonsberg.

AGENCY: Several shipbroker firms are established in Tonsberg and may be called upon as acting Agents for owners and/or charterers. A/S Norske Esso, S & T Dept. act as general Agent for all Exxon owned tonnage, cable address "Essoship" Tonsberg.

STAVANGER: 58.58 N. 05.44 E. (See Plan Book)

DOCUMENTS:

Declaration of Health, 1 copy.

List of Goods, including stores, 1 copy.

Crews Lists of Goods liable to duty, 1 copy.

List of Goods, 2 copies for each port of discharge. All Bills of Lading to be entered with marks, numbers, weight and quantity.

General List of Goods, one copy.

A form for entering ports of call where discharging will take place.

PILOTAGE: Vessels approaching from sea and desiring a Pilot should order at least 24 hours notice in so far as possible and confirm arrival at Pilot station at 2 hours notice. Advance order can be sent in following manners:

(*a*) From ships at sea over radio direct to Sea Pilot watch (calling frequency 2182 kc/s, from 2 minutes past until 10 minutes past each full hour, or over VHF radio-telephone calling, frequency 156.80 mc/s; Channel 16).

(*b*) From ships at sea over coastal radio station to pilot station or pilot office.

(*c*) From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey report to sea pilot station.

Vessels lying in port and desiring Pilot will order Pilot from nearest pilot office during its office hours and if possible at 4 hours notice.

Vessels approaching from sea as well as vessels lying in port shall when making an advance order state name and destination of vessel and whether 1 or 2 Pilots are desired.

Pilot will be despatched to ships in accordance with advance orders, and vessels are therefore requested to comply with foregoing rules as far as possible in order to avoid having to wait for Pilot.

International provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to radio communications or as sole communication in emergencies.

Pilots are taken on board at:

A. Feistein Lighthouse, 19 miles South of Stavanger, or in bad weather 6 miles North of lighthouse under the lee of Rott.

B. Skudefjorden, 18 miles N.W. of Stavanger. In bad weather under the lee of Karmoy or Kvitsoy, as weather permits.

Pilot boats are stationed at Tananger and Skudesneshavn. No boats are out cruising.

ANCHORAGE: Found in the Byfjord, 3 nautical miles North of Stavanger. Harbour pilots recommended when anchoring.

MAX. SIZE: Largest depth alongside goods and passenger quays is 30 ft. Depth alongside oil refinery 16.5 m. Max. draft for tankers, 48 ft.

RADAR/VHF: Radar service for inner harbour.

TUGS: Normally used.

BERTHING: The coasting and the foreign trade is located in the Western harbour, comprising the 2 main quays, namely the Skagen Quay and the Strand Quay. These quays measure 1,600 m. with depths alongside 24 to 30 ft.

The quays are equipped with one 6 ton crane and eight 3 ton cranes. A floating crane with a lifting capacity of 65 tons available.

Grain: Rogaland Felleskjop: Capacity for storing 72,000 tons quay length 190 m., depth alongside 48 ft. Discharging capacity 200 t.p.h. Stavanger Havnesilo: Storing capacity 140,000 tons, quay length 170 m., depth alongside 51 ft. Discharging capacity 500 t.p.h.

Roll-on/roll-off: Traffic is offered by a ferry berth constructed for ships up to 10,000 g.r.t., depth alongside 30 ft.

Containers: Sandvika Container Quay. Length 170 m., depth alongside 40 ft., also fitted with ro/ro facilities for vessels up to 20,000 g.r.t.

Offshore oil-exploration bases: Aker-Norsco A/S at Risavik, Tananger, North Sea Exploration Services A/S, Dusavik, Stavanger.

STEVEDORES: No particular ETA advices required.

MEDICAL: Agents should get advance notice to secure speedy service. Hospital facilities available.

TANKERS: Discharge at Sola refinery terminal where there are 3 berths, depth alongside up to 16.5 m. It is intended to enlarge these facilities to accommodate 200,000 d.w.t. vessels with restricted draft.

Esso Norske: 3 nautical miles South of central harbour, depth alongside 45 ft.

Norske Shell A/S: 14 nautical miles S.W. of central harbour, depth alongside 38 ft.

Norske Braendselolje A/S: 7 nautical miles South of the central harbour.

Texaco Oil: 1 nautical mile from central harbour, depth alongside 25 ft.

A/S Kulimport: Coal and coke. Length of wharf 116 m., depth alongside 27 ft.

DENSITY: 1025, no change in relation to state of tide.

FRESH WATER: Delivered from quay or from water boat.

FUEL: Normal grades available without advance notice.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually carried out by crew.

CUSTOMS ALLOWANCE: Tobacco: 20 cigarettes per day. Wine and/or Spirit: 2 bottles of wine or 1 bottle of brandy.

CONSULS:

AGENT: C. Middelthon's Dampskibsexpedition, Skansegt. 13–15, POB 27, 4001 Stavanger. Tel. 21040. After office hours: 24936; 32541. Telex: 33034 "Cmdex".

SUNNDALSORA: 62.41 N. 08.36 E.

DOCUMENTS:

- 2 Crew Lists
- 2 Passenger Lists
- Declaration of Health
- General Declaration
- Cargo List
- Cargo Manifest
- Personal Effects List

PILOTAGE: Telegraphic address of Pilot Station: "Grip Pilot". Description of Pilot Boat: White hull, orange wheelhouse, length 43 ft., speed 18 knots. The Pilot has to be taken on board 1 nautical mile East of Grip Lighthouse (Latitude: 63° 14′ N., and Longitude: 07° 37′ E.), no alternative area. No anchorage for vessel awaiting Pilot.
ANCHORAGE: Poor conditions in the Sunndalsfjord. Possible to anchor at Freifjord and Bolgsvaet West of Kristiansund.
RESTRICTIONS: No restrictions.
MAX. SIZE: Max. draft 34 ft.
HEALTH: "Declaration of Health" to be issued before arrival.
RADIO: Rogaland Radio and (20–30 hrs. before arrival) Alesund Radio.
VHF: For inner harbour on Channel 16 (normally in use when mooring).
RADAR: No Port Radar Service.
TUGS: Not available in Sunndalsora. Nearest Alesund, steaming time about 12 hours. Tugs only required when Pilot/Master find it necessary.
BERTHING: Length of quay: 1,007 ft. Low water depth: 34 ft. Load/discharge normally by shore equipment.
CRANES: 2×6 tons, 1×10 tons and 1×50 tons.
BULK CARGO FACILITIES: 1 grab crane 280 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: No notice required.
MEDICAL: Doctors available in Sunndalsora. Nearest hospital: Kristiansund or Molde (60 miles from Sunndalsora).
TANKERS: The usual rules for tankers to be complied with.
DENSITY: Average density of the port 1019 – 1020.
FRESH WATER: Available.
FUEL: Available in smaller quantities (from Mobil and BP).
FIRE PRECAUTIONS: No specific precautions.
CONSULS: None. Nearest at Kristiansund: Great Britain, Denmark, Finland, France, Holland, Portugal, Sweden, West Germany.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Nearest Kristiansund (Norske Veritas) and Bergen (Lloyds).
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing to be carried out by crew.
CUSTOMS ALLOWANCE: Quantity permitted for each Crew member to be held out of bond: 200 cigarettes or 200 gm. tobacco, 1 bottle spirit and 1 bottle of wine.
CARGO GEAR: Load /discharge effected by shore gear.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: Kvernberget (Kristiansund) and Aro (Molde), both at 60 miles distance and with regular air service.
TIME: GMT plus 1 hour.
HOLIDAYS: May 1st and May 17th. No cargo work can be arranged on those days.
POLICE/AMBULANCE/FIRE: Police Tel.: 91166, Ambulance (doctor) 91479, Fire 91122, Lifeguard 91933.
TELEPHONE: On request, telephone may be rented from Ardal og Sunndal Verk a.s.
SERVICES: Not available. Nearest Kristiansund or Molde.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Ardal og Sunndal Verk a.s. demands identification cards, obtained from Dock Master.
REGULATIONS: Forbidden to take photographs within boundaries of Ardal og Sunndal Verk a.s.
DELAYS: Usually no delay if notice of arrival given to Agent in good time.
DEVELOPMENTS: No developments expected in foreseeable future.
GENERAL: No cargo on Saturday and Sunday.
AUTHORITY: Sunndal Havnevesen, Sunndalsora.

SVOLVAER: 68.14 N. 14.35 E.

DOCUMENTS:

- 2 Crew Lists.
- 2 Passenger Lists.
- Custom Documents.
- Stores List.
- Manifest.
- Bill of Lading.
- Ship's Papers.
- Valid Deratisation Exemption Certificate.

Ships arriving from Finland, Denmark, and Sweden need Customs permit from last port.
PILOTAGE: Vessel approaching Svolvaer may call Bodo Radio, 2182 kc/s. by radio asking for Svolvaer harbour pilot. Telegraph ETA Svolvaer 24 hours before arrival. All communication with harbour pilot boat on VHF Channels 16 and 12. Exact position for pilot boat is 68° 11′ 30″ N. 14° 36′ 00″ E. In the event of bad weather call Lodingen Pilot station, position 68° 24′ 00″ N. 16° 02′ 00″ E., via Bodo Radio for further information. Different types of pilot boats are used, but usually the pilot boat flies pilot flag. No special requirements for boarding, except usual pilot ladder.
ANCHORAGES: Boundaries for safe anchorage 68° 13′ 36″ N. 14° 37′ 00″ E., 68° 13′ 48″ N. 14° 36′ 12″ E. Depth in area about 25 fathoms.
RESTRICTIONS: Ships of 2,000 tons or more berthing at daylight only.
MAX. SIZE: Max. permissible length 520 ft., draft 30 ft.
HEALTH: Pratique is automatic given by radio. Vessel only required fly yellow flag. In event of any suspected disease or fever on board call Svolvaer Harbour Master by telephone via Bodo Radio (2182 kc/s.).
RADIO: Call Bodo Radio by R/T 2182 kc/s. or VHF-Channel 16. Svolvaer Harbour office VHF-Channel 16/12.
TUGS: Small tugs available.
STEVEDORES: All information regarding gangs, loading and discharging rates can be obtained by calling ship's Agent in Svolvaer via Bodo Radio.
MEDICAL: Hospital facilities available.
TANKERS: There are 2 discharging berths for oil carriers in Svolvaer. Diameter of lines at B.P. berth 6 in. and 8 in., at Shell 8 in. At the Shell berth tankers moor stern to and discharge through stern lines.
DENSITY: Density in port is 1025.
FRESH WATER: Delivered from piers by hose with a rate of about 20 t.p.h. Water is also available at B.P. berth.
FUEL: All kinds of fuel oil are available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally done by ship's crew but can also be done by stevedores.
CERTIFICATES: Ship's Register Certificates.
CUSTOMS ALLOWANCE: Tobacco: Quantity for each crew member is 20 cigarettes or 20 gm. tobacco and 20 leaves cigarette papers per day. Wine and/or Spirit: For crew members 1 bottle spirit or wine (0.75 litre) for each passenger 0.25 litre.
IDENTIFICATION CARDS: Not required.
CONSULS: Swedish and Italian consulates. Lloyd's sub agent.
REPAIRS: Nearly all types of engine and deck repairs. Both for internal combustion and turbine engines.
DRY DOCKS: No dry docks in port, only slipways for ships up to 240 ft.
REPATRIATION: Facilities for effecting crew changes are available.
AIRPORT: Four km. from town. Nearest main airport is Bodo.
TIME: Local time is GMT plus 1 hour.
HOLIDAYS: Official holidays stated by Norwegian Government.
POLICE/AMBULANCE/FIRE: Tel. 70177.
TELEPHONES: Phones on pier.
GENERAL: Svolvaer is the main port in Lofoten Island, and a typical fishing harbour. Radar, Decca, Radio and VHF service, and all other electrical services can be executed.
SERVICES: Compass adjusting.
AUTHORITY: Harbour Master, Svolvaer.

THAMSHAVN (Thamshamn): 63.20 N. 09.52 E.

DOCUMENTS:

- Health Certificate.
- Crew List.
- Passenger List.
- Store list.
- Bill of Lading.
- 3 Manifests.

PILOTAGE: 24 hours prior arrival Grip, Pilots can be ordered by cable to "Loskontoret, Kristiansund N." or by telephoning Kristiansund Pilot Office, tel. 74333 during office hours, and 74595 private. Pilots can also be ordered by radio through Kristiansund Radio or through Agents. Use Channel 16 for VHF., contact to Kristiansund Pilot Office, or pilot boat. Pilot boat equipped with radio telephone 2182, carries red and white flag during day and white and red light during night.
ANCHORAGE: Vessels should anchor 150 m. off piers where depth between 26 and 30 m. Anchoring between piers and buoys is not permitted.
MAX. SIZE: Depth at Import Quay 20 ft. MLW. Ships of 28 ft. draft can load at Pyrites Quay.
RADIO: Vessel should route ETA cables to Agent through Rogaland Radio or Aalesund Radio.
TUGS: No tugs needed or available.
BERTHING: Berthing only between 0700 and 2400 hrs.
CARGO HANDLING: 1 berth is specially equipped for handling of pyrites in bulk. Ships of 28 ft. draft can load at the pyrites quay. Loading by conveyor. There are no berths equipped for containers or roll-on/roll-off traffic, nor berths handling liquid chemicals or LPG carriers.

STEVEDORES: Arranged by Agent. No ETA to stevedores necessary.
MEDICAL: Hospital facilities available.
FRESH WATER: Available, delivered from berth.
FUEL: No fuel supplies available. Nearest port for such supplies is Trondheim.
GANGWAY/DECK WATCHMEN: Not compulsory, and this service is left to the discretion of the Master.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Each crew member allowed 20 cigarettes on shore. When leaving ship, 200 cigarettes and 1 bottle of wine or 1 bottle of spirit permitted.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest consul available in Trondheim.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
AIRPORT: Nearest airport, Vaernes, 62 miles N.E. Served by regular airlines with several flights per day.
TIME: GMT plus 1 hour.
HOLIDAYS: January 1st; Easter Holidays; Ascension Day; Whit Monday; 1st and 17th of May; December 25th and 26th.
POLICE/AMBULANCE/FIRE: All mentioned services obtained through Agent or by contacting local telephone exchange.
TELEPHONES: No facilities for placing telephones onboard ships.
SERVICES: Provisions available.
SHORE LEAVE: Permitted.
DEVELOPMENTS: A new pier is to be built in 1981.
AUTHORITY: Orkla Industrier A/S., Lokken Verk.

TONSBERG: 59.16 N. 10.25 E.

DOCUMENTS:
Ship's Register.
Crew Lists.
Customs Manifest for each crew member (cigarettes, spirits, etc.).
Store List. Cargo Papers. Health Certificate.
PILOTAGE: Sea Pilots obtainable from Ferder Pilot Station. Pilots normally take vessels to berth; also Harbour Pilot on the spot.

TIME: Local time, GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police 51271 or 51593 Vadso; Ambulance 51845 or 51691 Vadso; Fire 51122 or 51554 Vadso.

AUTHORITY: Vadso Havneseven.

NOTES

Please also advise Shipping Guides Ltd.

Sultanate of Oman

GENERAL: *Navigation Notice No. 110/80.*

TEMPORARY LAID UP ANCHORAGE SOUTH OF LATITUDE 24° IN THE TERRITORIAL WATERS OF THE SULTANATE OF OMAN.

All vessels anchoring South of the Latitude 24° parallel and within 12 miles of Sultanate of Oman's territorial waters for the purpose of waiting for orders or in order to carry out engine repairs should anchor within the following designated anchorage.

Within the Latitude 23° 53′ North and the coast line of Oman, and between Longitude 58° 10′ East and 58° 28.5 East.

In no case shall vessels anchor in any other part of the territorial waters of Oman, except in case of emergencies, engine failure, etc.

In all cases vessels shall indicate their anchorage position to Mina Qaboos Port Control whether within the designated anchorage or not and be serviced by Agent from the Sultanate of Oman and pay the local dues as affected from time to time.

Charts Affected: B.A. 2851; U.S.H.O. 62390.

Authority originating above information: Sultanate of Oman, Ministry of Communications. Maritime & Sea Ports Affairs.

MINA-AL-FAHAL: 23.39 N. 58.32 E. (See Plan Book)

DOCUMENTS:

Required on arrival (provided by vessel):

2 copies Crew List and 2 copies of Vaccination List.

All other necessary papers will be supplied on arrival by the Berthing Master.

PILOTAGE: The Berthing Master will board incoming tankers off Fahal Fairway Buoy, or as directed by VHF. Tanker should arrive at this position, make a good port lee, and take way off.

Harbour steaming is deemed to start at this point. The port side derrick should be rigged and crew standing by at the derrick ready to lift the mooring equipment from the launch when the Berthing Master comes on board.

The pilot access should be in good condition, clean and ready on the port side. Tankers of 70,000 tons Summer deadweight and above in ballast or partly loaded condition should have either a pilot hoist or a combination of accommodation ladder and pilot ladder rigged.

ANCHORAGE: If a vessel is required to anchor the information will be passed by VHF. The normal tanker anchorages are:–

A. Fahal Is. Lt. Brg. 015° × 1.0′
B. Fahal Is. Lt. Brg. 045° × 1.3′
C. Fahal Is. Lt. Brg. 075° × 1.0′
D. Fahal Is. Lt. Brg. 115° × 1.0′

The coastal tanker anchorage is:–
Fahal Is. Lt. Brg. 340° × 1.1′

Cargo ship anchorage area:–
A. Fahal Is. Lt. Brg. 340° × 2.0′
B. Fahal Is. Lt. Brg. 345° × 1.6′
C. Fahal Is. Lt. Brg. 000° × 1.7′
D. Fahal Is. Lt. Brg. 015° × 1.6′

Ships proceeding to an anchorage within the Port Area should pass North of Fahal Island and under no circumstances enter the prohibited area unless instructed to or accompanied by a Mina al Fahal Berthing Master.

RESTRICTIONS: Open sea approaches.

MAX. SIZE: No length limitation. Draft up to 96 ft. Tankers up to 550,000 d.w.t. can be accommodated.

HEALTH: When advising ETA, include in message whether any sickness on board.

Port Health Officer boards with Berthing Master, this Officer will carry out any necessary vaccinations. 'Q' flag to be flown until pratique granted.

RADIO: ETA messages should be sent to "Petromar Muscat" via Muscat Radio (call sign A4M). If no contact can be established with Muscat Radio, the message should be sent through an alternative coast station such as Bahrain Radio.

The message should contain the following information.

(a) ETA in local time and date in plain language to avoid multilation.
(b) Whether there is any sickness on board.
(c) Whether any crew require medical treatment and very briefly the nature of the complaint.
(d) Last port of call.

VHF communications should be established as soon as possible calling Fahal Control on Channel 12. The range is about 80 miles to the Northward but only 20 miles to Eastwards because of screening by mountains. Channel 19 area basically long range while the working Channel is Channel 12 and is manned 24 hours a day by either Fahal Control or Fahal Pilots. The station may call vessels on Channel 16, although a permanent watch on Channel 16 will *not* be maintained. The mooring launches are also equipped with Channels 16 and 12 but mooring operations are carried out using UHF radio sets.

TUGS: None available and not required.

BERTH DESCRIPTION: 3 single buoy moorings with floating hose strings. SBM lights are ISO.W.

SBM No. I: Crude export and marine fuel oil import and export.

This buoy is served by 2 × 30 in. submarine crude lines and 2 × 10 in. submarine fuel lines each 10,300 ft. long.

The floating crude hoses are 2 × 810 ft. long × 20 in. reduced to 16 in. for manifold connection. Same hoses are used for fuel oil imports these lines having a displacement connection ashore for emptying the crude content. Bunkering is by a single 12 in. hose 820 ft. long.

This buoy is capable of handling any vessel up to 554,000 d.w.t. tonnes and max. sailing draft allowed at this SBM is 64 ft.

SBM No II: For crude and bunker export and is served by 1 × 40 in. submarine crude line and 2 × 10 in. submarine fuel oil lines each 13,980 ft. long. The floating crude hoses are approx. 2 × 1,100 ft. long x 20 in. reduced to 16 in. at manifold connection. Bunkering is by a single 12 in. floating hose. Maximum size ship 550,000 d.w.t. tonnes and max draft of 96 ft.

SBM No. III: Products imports only (Gas Oil, Mogas, Jet-A1) served by 2 × 10 in. submarine hoses, length 8,003 ft. Floating hoses are 660 ft. in length with 8 in. manifold connections. Max. size of ship is 100,000 tons and max. sailing draft allowed at this SBM is 46 ft.

Loading crude is by gravity and rates vary. If loading from upper tank farm 9,000 t.p.h. but only 5,500 t.p.h. if loading from lower tank farm.

Bunker rate is approx. 450 t.p.h. bunker discharge at SBM-I maximum 3,000 t.p.h. maximum back pressure 150 p.s.i.

BERTHING: Vessels berth head to buoy and are provided with 2 x 4.5 in. mooring snotters picked up from the mooring launch when the Pilot boards. Vessels over 230,000 d.w.t. tonnes are provided with two 15 in. × 80 ft. nylon braidline snotters. Connection at SBM-III is to two 12 in. plaited nylon lines 150 ft. long; at SBM-I and SBM-II to two 15 in. plaited nylon lines 150 ft. long. A suitable messenger rope should be provided by ship. An Assistant Berthing/Loading Master will advise in all mooring and hose connection operations which are carried out by ships staff.

HOSE CONNECTIONS: Ships port side derrick must plumb over relevant manifold. This derrick should be ready on arrival at the pilot boarding area to pick up the mooring gear and reducers (if necessary) safety chains etc. for hose connection. Derrick to be in good condition and be rigged for a SWL of a minimum of 10 tons for SBM-I and II and 5 tons for SBM-III.

BALLAST: No facilities for reception of dirty ballast.

Tankers should arrive with clean ballast, lines and pumps and no oil should be released into the sea.

MEDICAL: Medical treatment can be given by Petroleum Development (Oman) Ltd.'s medical staff to crews of ships on Time Charter to Shell International Marine on ships using P.D. (O) Ltd.'s tanker agency facilities. A charge of R.O.24 is made per hour for launch hire and transport facilities. Dental treatment available but at least 24 hours notice required.

REPAIRS: It is not permitted to immobilise main engines whilst moored to the SBM's; under no circumstances should the propeller be turned in the ahead direction.

DENSITY: Approximately 1026.

FRESH WATER: Not available.

FUEL: Fuel oil only available. Limited store facilities and at least 24 hrs. notice is required.

A wide range of marine lubricants is available and is supplied in drums. At least 24 hours notice is required for supplying lubricants.

REPATRIATION: Crew changes are possible at Mina-al-Fahal provided the Agent receives 72 hours notice (excluding Fridays and Holidays), (24 hours notice if using Petroleum Development as Agent) giving full particulars of embarking/disembarking crew, such as full name, nationality, place and date of berth, passport/seaman's book number with date and place of issue and expiry date, and also destination for repatriation of disembarking crew members, to enable Agents to obtain necessary permits and arrange air passages.

N.B. If the information required as above is received on a Thursday or a day preceding a holiday, the time mentioned of 72 hours will not be sufficient as no permits can be obtained from the Authorities during holidays.

Note: Notice for crew change to be given as soon as possible as the issue of N.O.C's. (Non Objection Certificates) can take up to 7 days.

TIME: GMT plus 4 hours all year round.

SHORE LEAVE: Not possible.

GENERAL: *Liquor.* Trading in liquor strictly prohibited and no alcoholic drink should be offered to Arab nationals.

AUTHORITY: Petroleum Development (Oman) Limited.

AGENT: See "Port Qaboos" (Mutrah).

Petroleum Development (Oman) Ltd. can also act as Agent. Petromar Muscat are on VHF Channel 12.

PORT QABOOS (Mutrah): 23.37 N. 58.34 E. (See Plan Book)

Muscat has ceased to be a commercial port and instead vessels now call at Port Qaboos.

PORT LIMITS: From the level of high water springs at a point near Ras Kab at Long. 58° 33.2′ East on a line due North to Lat. 23° 41′ North;

Thence due East to Long. 58° 35.6′ East;

Thence due South to Jazirat Muscat;

Thence in a generally Southerly direction by the line of high water on the Western side of Jazirat Muscat to Pinnacle Rock;

Thence S.W. to the Easternmost point of Siraz al Gharbiyah;

Thence by the line of high water springs to the point of commencement.

DOCUMENTS:

Required on Arrival:

4 Copies Crew List.
1 Copy Maritime Health Declaration form with ports of call from commencement of voyage.
3 Copies of Crew Personal Declaration List.
3 Copies of Ships Bonded Stores List.
2 Copies Vaccination List.
6 Copies Passenger List.
3 Copies in transit Passenger List.

To be airmailed in advance:
3 Copies Hatch List, and other details of vessel (Flag, Draft, LOA, Last Port, Next Port, G.R.T., etc.).
3 Hazardous Cargo Lists.
3 Heavy Lift Lists.
5 Copies Cargo Stowage Plans.
9 Copies Cargo Manifest.
1 Copy Freight Manifest.
2 Copies Bills of Lading.

Customs and Immigration requirements for vessels entering and leaving ports: 24 hours advance notice, cargo manifest and passenger list, crew personnel declaration. No cargo vessel is allowed to enter until immigration formalities are completed off the port.

PILOTAGE: Compulsory for vessels other than exempted vessels as defined in Port Rules and Regulations.

Arrival notice requirements: ETA, LOA, draft 72 hours, 48 hours, 24 hours before arrival. Berthing and unberthing – 24 hours a day.

MAX. DRAFT: Depth of entrance channel 34 ft. at LAT. Also see "Berthing".

TUGS: Three twin screw tugs, 1,400 h.p., 1,600 h.p. and 2,000 h.p. Tugs normally join vessel 1 mile N.N.W. of breakwater light.

APPROACH: Port Qaboos has a very open approach with a deep water anchorage. The hilly coast is radar conspicuous. Lights on Fahal Is., Jazirat Muscat and the Breakwater make night navigation fairly simple. There is no appreciable current once inside the bay.

Ship Masters calling at Mina Qaboos are advised that vessels navigating under their charge and approaching Mina Qaboos whether from East or West must first pass 5 cables Eastwards of Mina Al-Fahal Fairway Buoy before making final approach to Mina Qaboos anchorage or breakwater head for picking up Pilot.

In no case should they keep close-in to Khawr Muscat entrance or remain waiting in the prohibited anchorage area.

ANCHORAGE: Vessels should anchor Northwest of the breakwater within the area enclosed by the following perimeters:

1. A line extending 060° (T) from Port Qaboos breakwater.
2. The Western most extremity of Port Qaboos.
3. A line extending 325° (T) from Muscat forward leading light after crossing perimeter (1).

All areas described above are clearly defined in the current edition Admiralty Chart No. 2869.

Prohibited Anchorage Area: The area enclosed by the following perimeters is a prohibited anchorage area:
North boundary: The parallel of Lat. 23° 41′ 00″ N.
East boundary: The meridian of Long. 58° 36′ 00″ E.
South boundary: Sultanate of Oman coastline.
West boundary: Muscat forward leading light bearing 145° (T) from seaward and Port Qaboos breakwater light bearing 240° (T) from seaward.

Severe penalties are imposed for vessels infringing the above prohibited areas.

HEALTH: International Health Regulations apply. Pratique may be granted by the Harbour Master on receipt of following information:

1. All Smallpox/Cholera vaccinations valid.
2. Valid Derat Certificate.
3. No sickness on board.
4. No sickness at last Port.
5. Country of origin and date of departure.

Pilot will issue Health Form on boarding. Port Health require:
1 Crew List
1 Vaccination List
Valid Derat Certificate
Last Port Clearance

RADIO: Port control can be contacted on VHF Channel 16 or Channel 14 or on R/T via Muscat Radio. 24 hours operation except Friday when hours of operation depends on actual movement in the Port.

BERTHING: There are 9 deep water berths: 3 coaster berths and 1 berth for launches. The berths vary in length from 76 to 228 m. and are sheltered by a breakwater on one side and cliffs on the other. Nine berths can take vessels of up to 36 ft. draft and the remaining 3 are reserved for shallow draft vessels drawing 12/16 ft. of water.

Supporting the berths are 9 modern transit sheds facing broad uncluttered aprons, providing both covered and open storage space. Two berths front directly on to large open areas ideally suited for rapid discharge of containers and oversized units requiring direct delivery.

Berth	Length		Depth at LAT	
No.	(ft.)	(m.)	(ft.)	(m.)
1	600	183	41	12.5
2	600	183	41	12.5
3	750	228	32	9.8
4	600	183	30	9.1
5	600	183	30	9.1
6	650	198	30	9.1
7	600	183	30	9.1
8	600	183	30	9.1
9	450	137	13	4.0
10	500	152	13	4.0
11	600	183	30	9.1
12	250	76	10	3.1
13	500	152	7	2.2

Nos. 1 and 2, 4, and 5, 7 and 8 berths are "in line", therefore larger vessels can occupy part of a second berth when necessary.

Transit sheds and cold storage facilities: 9 transit sheds and 1 cold store adjacent to the port, capacity of cold store 3,000 tonnes plus cool rooms, blasting facility and ice making plant. Facilities for electrical connection of refrigerated containers with Kheops and Wilco Plugs.

SPECIAL HANDLING FACILITIES: Bulk Cement Silos: Capacity 6,000 tons, supplied by underground pipe line from the berth.

Grain Silos: Capacity 30,000 tons supplied by quayside underground conveyor from the berth. The expansion of grain silo capacity from 30,000 tons to 60,000 tons is underway.

In conjunction, 2 km. from the port, a highly automated mill produces various flour and animal feed products for local consumption and export.

The port has modern container and Ro-Ro handling equipment, including a Mafi-type roll trailer system, backed up by mobile cranage of up to 150 tons capacity and heavy fork-lifts.

Construction of a container terminal is underway and will be completed by November 1981. This will be equipped with highly sophisticated 35 ton gantry cranes supported by 5 heavy duty forklifts. The terminal will have a large storage yard to accommodate about 1,500 TEU's.

At present containers can only be accepted from self-sufficient vessels. Containers are transported by trailers and handled in stacking area by mobile crane or forklift truck. Reliance Mercury Tractors of 160 b.h.p. with Mafi-type trailers are available for Ro-Ro vessels. Lash and BACAT service.

CRANES: 11 Mobile Cranes 3 tons – 35 tons, 1 Mobile Crane 70 tons, 1 Mobile Crane 150 tons, 56 Fork Lift Trucks 4,000 lbs. – 16,000 lbs., 1 Fork Lift 35 tons, 12 Tractors and 26 Trailers available.

There are no fixed quay cranes.

STEVEDORES: The labour position is fair, except in the date-picking season June to August.

Landing rates: bagged cargo 4/600 tons per day; general 200 tons per day; timber 100/150 tons per day during fair weather provided no congestion on jetty and if cargo stowed in more than 3 hatches.

Working Hours:

Saturdays/Wednesdays	Day Shift	0700 — 1300	
		1300 — 1500	Lunch Break
		1500 — 1700	
		1700 — 1900	On overtime
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Thursdays	Day Shift	0700 — 1400	
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Fridays	No Day Shift		
	Night shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	

MEDICAL: Port Clinic and Government hospitals available.

CONSULS: Egypt, France, Germany, India, Iran, Iraq, Jordan, Korea, Kuwait, Pakistan, Qatar, Somali Democratic Republic, Sudan, U.A.E., U.K., U.S.A.

FRESH WATER: Available at all berths.

FUEL: Gas oil only on berths. Other fuels can be supplied by arrangement with owners Agent. Marine lubricating oils available.

SERVICES: Fresh and dry provisions from chandler. Limited availability of ship and engine room stores.

GANGWAY/DECK WATCHMEN: A Port Services Corporation watchman will be present on board throughout the stay of the vessel in port, and the vessel must provide him with food and accommodation during the stay. The same is applicable in the case of tally staff.

REPATRIATION: Is now possible if Masters give full particulars of the seamen to be repatriated by telegram at least 72 hours earlier. This also applies to embarking crew members. The 72 hours notice is not enough in the case of a Friday, or any other holiday which falls in between.

CUSTOMS ALLOWANCES: Vessels will no longer be permitted to have free use of their stores (Tobacco goods, Alcohol, etc.) whilst in the confines of the port.

On arrival in port, an allowance will be given by the Customs Boarding Officer and the surplus stores will then be placed under Customs Seal.

The allowance will be:
200 cigarettes or 50 cigars or 250 gm. tobacco.
One bottle (1 litre) alcoholic spirit.
One bottle (1 litre) wine.
24 cans beer.
Various used personal effects such as radios, cameras, etc.

Should a vessel remain in port for more than 4 days, an issue of stores will be given upon request being made to the Customs Authorities.

These Regulations also apply to ships at the Anchorage.

SHORE LEAVE: Crews are only allowed ashore between the hours of 0700 – 1900.

GENERAL:

Ships arriving at Port Qaboos:

Ships may approach Port Qaboos without a Pilot as far as the perimeter of the limits of the port. No ship shall proceed through the entrance to or from the port without the permission of the General Manager or the Harbour Master.

All ships, other than expected ships, shall be under the pilotage of a Pilot appointed by the Port Authority when under way within the limits of the port. The ship shall have rigged and ready for use a pilot ladder of modern pattern, in good repair and provided with reliable manropes. Such pilot ladder shall be well illuminated between dusk and daybreak. The ship shall have a boat-rope ready rigged from the break of the forecastle to abaft the pilot ladder.

No ship shall enter or leave Port Qaboos unless her draft marks are correctly shown and clearly visible.

Every ship shall at all times when entering, navigating in or leaving the port have both anchors ready for immediate use.

Ships proceeding to berth at the port premises shall have no list and shall be trimmed upright.

Before entering Port Qaboos every ship shall hoist the following flags: The ship's signal letters. The "Q" flag, International Code, unless the Port Health Officer has previously given pratique. The "H" flag, International Code, denoting that a Pilot is onboard. The "I" flag, International Code, if the ship is carrying passengers.

Until pratique has been granted communication between ship and shore shall be made by: Flag hoist, using the International Code of signals, Morse Code, by signal light, or radio-telephone on approved frequencies, which will be promulgated for use for such purpose.

Conduct: The Master or Owner of every ship shall be held directly responsible for the proper conduct and behaviour of the crew of such ship while in the port and for strict observance of the laws of the Sultanate of Oman, particularly those laws concerning the sale, transference or consumption of any narcotic or alcoholic or intoxicating drink of any kind.

Flags: Every merchant ship within Port Qaboos between the hours of sunrise and sunset shall fly her national flag and the national flag of the Sultanate of Oman.

Repairs: The Master of any ship wishing to carry out major engine repairs or adjustments, which will affect the mobility of the ship whilst in the port shall make written application to the Harbour Master so to do. The Harbour Master shall give his permission or otherwise in writing.

Safety of ships and persons: The Master of every ship anchored or moored in the port or berthed at the port premises shall, unless the Harbour Master concede some relaxation in this port rule, at all times retain on board sufficient crew to work or move the ship.

Ships berthing and unberthing at the port premises: No person shall swim from any ship berthed at the port premises.

No person shall make fast or anchor any country craft or boat of any kind at any quay, wharf, pier or landing place or at any steps provided thereat in the port premises except with the prior permission of the Harbour Master.

Pollution: It shall be unlawful to throw, discharge or deposit, or cause, suffer, or procure to be thrown, discharged or deposited, either from or out of any ship, barge or other floating craft of any kind, or from the shore, wharf, manufacturing establishment or mill of any kind, any refuse matter or other substance of any kind or description whatever into the waters of the harbour; and it shall be unlawful to deposit, or cause, suffer or procure to be deposited, material or any kind in any place, or on the bank of any water, where the same shall be liable to be washed into such water, either ordinary or high tides, or by storms or floods or otherwise, whereby navigation within the corporate limits of the harbour shall or may be impeded or obstructed, provided that nothing herein contained shall extend to, or apply to, or prohibit operations in connection with the improvement of the port of Qaboos or the construction of public works considered necessary and proper by the Port Authority and provided further than nothing herein contained shall extend to, apply to, or prohibit the depositing of any material above mentioned in such navigable waters within such limits as may be defined, and under such conditions as may be prescribed by the proper officer of the Sultanate of Oman.

It shall be unlawful for any person, or corporation to deposit, place, or discharge into the waterways of Port Qaboos, either directly or through private or public sewers, any sanitary sewage, butcher's offal, garbage, dead animals, gaseous liquid or solid matter, oil, gasoline, residium of gas, calcium chloride, trade waste, tar or refuse or any other matter, which is capable of producing floating matter or scum on the surface of the water, sediment in the bottom of the waterways, or the odours and gases of putrefaction.

Vessels discharging ballast, oil from bilges or tanks or solid matter into the waters of Port Qaboos will be reported to the Pollution Control Officer and be subject to a fine of R.O. 500.00 for each offence, imposed by and payable to Port Qaboos. Such fine shall be in addition to any other fines, which may be levied for the same offence by the Sultanate of Oman.

Ships Leaving Port Qaboos: Port Rules applying to ships arriving at Port Qaboos apply equally, in so far as they are relevant, to ships leaving the port.

Merchant ships shall fly the "P" flag International Code, for 24 hours before sailing from the port.

The Port Authority may refuse to give the Master of any ship outward clearance, unless and until all charges due in respect of the ship and any penalties, to which the ship or her Master are due, have been paid or secured to the satisfaction of the Port Authority.

The Working of Cargo at Port Qaboos: Ships may be permitted to discharge or load cargo in the anchorage if a berth is not available at the port premises or if in the opinion of the Port Authority the ship's cargo is more suitable for handling to or from barges or lighters.

The Master or Owner of any ship shall be held responsible for any loss or damage arising from careless or improper slinging of cargo onboard such ship.

Any cargo, cargo-handling equipment or ship's gear, which may be dropped overboard shall at once be reported by the Master or appointed Officer to the Port Authority and shall be immediately recovered by the ship's personnel if it is reasonably possible so to do. Failing this, it may be recovered by the Port Authority at the ship's expense. The Port Authority shall not be responsible for any damage to or loss of cargo, equipment or gear so recovered.

The Master of every ship discharging or loading cargo in the port, whether at anchor or berthed alongside shall provide drinking water for all cargo handling labour and all other persons appointed and directed to be on board such ship in connection with the discharge or loading of cargo.

If the labour or transport allocated or engaged for the purpose of landing, loading or transshipping cargo from or to any ship is not fully continuously employed by reason of a fault or action attributable to such ship, the expenses incurred thereby shall be paid by such ship.

In the event of any accumulation of cargo or goods upon the quay or jetty or in a lighter for any cause that may appear reasonable to them, the Port Authority may require the ship discharging such cargo or goods to suspend or reduce the rate of discharge of such cargo or goods.

The Port Authority may refuse to permit cargo to be landed from any ship until suitable shed or open storage space or other accommodation is or becomes available for such cargo.

Delivery of cargo or goods shall not be deemed to have been made to the Port Authority until such cargo or goods have been brought into the port premises and until the Port Authority accepted delivery of such cargo or goods and have issued an official receipt therefor to the Master of the ship discharging such cargo or goods or to the ship's Agent or to any other person duly authorised so to do, conveying such cargo or goods to the port premises.

DEVELOPMENTS: See "Special Handling Facilities".

AUTHORITY: General Manager, Port Services Corporation Ltd., Muscat.

AGENT: Gulf Agency Co. (Oman) L.L.C., PO Box 3740, Ruwi, Sultanate of Oman. Tel. Mutrah 734888, 773374. After Hours 702249. Telex 3284 ("Gacship MB"). Cables "Confidence", Muscat. VHF Channel 16. Call sign "Confidence Muscat".

PORT RAYSUT (Salalah): 16.56 N. 54.01 E.

(See Plan Book)

PORT LIMITS: The water limits of the port are bounded by the parallels of 16° 55′ 30″ N. and 16° 56′ 50″ N., and by the meridian 54° 01′ 30″ E. to the Eastward. To the West the limit follows the coastline from its Northern interception with the headland of Ras Raysut.

The land limit to the port area follows the line of the outer security fence across the neck of the Ras Raysut headland.

DOCUMENTS:

4 copies of Crew Lists and Passenger List (if any).
Valid Vaccination Certificate.
Valid Derat Certificate.
Last Port of Clearance.
Customs Documents.
8 copies of Manifest.
Ships papers and Ships Certificates.
2 copies of Stowage Plans.
2 copies of Hatch List.

PILOTAGE: Compulsory for vessels of more than 100 n.r.t., except Port Authority craft and naval ships of Oman. Pilots wait near the East breakwater, vessels are to proceed to the entrance of the harbour on request either from Pilot or harbour control. Pilot boat has a black hull with white superstructure and an Oman National flag on the mast. Boats keep VHF radio watch on Channel 12. The entrance of the harbour is marked with a Buoy-Flashing Green light for a duration of 1 second in every 5 seconds.

ANCHORAGE: The Roads of Raysut offer an open sea anchorage with a sandy bottom. The depth at the entrance of the Buoy is 13 m. and North-Eastward it increases, however anchorage position at present is given to all vessels upon reporting by VHF radio. Anchorage positions are set with 0.5 miles between each ship in a minimum of 10 m. of water for large vessels, less depth of water as required for coaster vessel.

RESTRICTIONS: None.

MAX. SIZE: Max. draft for cargo vessels is 10 m. and tankers 12 m. Vessels will be brought to the berths regardless of the tide conditions since the port operates as a year round all weather port. Barges are available free of charge to vessels arriving on liner-terms and all other vessels will negotiate barge charges.

HEALTH: Quarantine procedures are followed and all ships upon arriving must fly flag "Q" until completion of quarantine procedures. Public health requires certificates of vaccination for cholera and yellow fever. Derat certificate also required.

RADIO/VHF: For advance ETA data the harbour control listens on 2182 kHz and works on 2584 kHz. VHF watch is kept on Channel 16 and other Channels available are 12, 10 and 6. The service is available from 0700 to 2000 hrs., however it is the intention to extend round the clock. Area weather available on request.

RADAR: None available at present.

TUGS: Join vessels along with the Pilots. 2 more powerful tug boats (1,500 h.p.) of harbour/ocean going type fitted with fire fighting and salvage facility have been acquired by the port. This makes the total number of tugs available 4.

BERTHING: The new harbour provides a quay of 522 m. with a depth of water 10 m. Also available: 200 m. length with 8 m. depth and 510 m. length with 4.5 m. depth. An oil terminal of 140 m. length with 12 m. depth. 1 ramp for small landing craft.

CRANES: There are 5 mobile cranes in the port operating in the range of 2 to 5 tons. There is 1 mobile crane rated at 15 tons, 1 rated at 20 tons, 1 rated at 30 tons, 1 rated at 70 tons. The cranes are placed at any berth as requirements become necessary.

4 quay side cranes and 1 container crane will be installed soon. 1 container fork-lift will be delivered early 1981.

BARGES: 3×350 ton barges are used by ocean-going vessels in deep water anchorages. Vessels arriving under liner terms receive free barge facility. Vessels arriving under charter, terms are negotiated as to charges for barge facility.

SPECIALIZED FACILITIES: There are no special facilities at this time. Ro/Ro services are carried out in the existing port at present. However such vessels must meet the standard requirements for entry to the berth. There are no bulk handling facilities.

BRIDGES: None.

STEVEDORES: Arrangements must be made through the Agent for max. notification of arrival to arrange gangs. Minimum notification 24 hours. All cargoes handled. Normal working hours from Saturday to Wednesday 0700 to 1500 hrs. Thursday from 0700 to 1300 hrs. with no lunch break.

Working hours are subject to change during the month of Ramadan.

Overtime would be charged to hours worked outside the normal working hours. Overtime will be worked at the request of the Agent and will be worked on Fridays and public holidays at special request.

MEDICAL: Agents handle all medical matters. A hospital is available in the town of Salalah (17 miles away). Also see "Health".

TANKERS: At this time closed to tankers. Other than those in present service.

FRESH WATER: For vessels at berths, Agents must arrange for tank truck delivery from Salalah. However, work is in progress for the construction of pipe-line carrying fresh water to the harbour and is expected to be completed soon. For ships at anchorage there are no means of delivery at this time.

FUELS: Available to ships at the berth, must be arranged by the Agent.

FIRE PRECAUTIONS: Fire hydrants available through the Port facilities.

CONSULS: None available at present.

REPAIRS: No facilities at present.

DRY DOCKS: None available.

SURVEYORS: Lloyd's representative is Oman United Agencies in Salalah.

GANGWAY/DECK WATCHMEN: Not required except as deemed necessary by the Captain of the vessel and then he must supply his own.

HATCHES: Opening and closing hatches is normally done by the crew but arrangements may be made with the port for provision of this service. Agents can advise.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 250 gm. of tobacco. 1 bottle (1 litre) alcoholic spirit. 1 bottle (1 litre) wine. 24 cans of beer and various used personal effects such as radios, cameras, etc.

CARGO GEAR: Normally handled by shore equipment and shore gear. Any special lifting equipment required must be provided by the vessel. Ships in the anchorage are normally expected to supply all gear required. The port has rental gear for those vessels requiring same.

REPATRIATION: Permitted, arrangements may be made by the Agent for this service. Crew changes may be effected at this port.

AIRPORT: Salalah International Airport. Distance 25 km.

TIME: Time local is GMT plus 4 (Delta Time).

HOLIDAYS: All Muslim holidays are observed. Working hours are reduced during the period of Ramadan. Special National days celebration is held from 17th to 21st November each year. Working of overtime may be arranged during most of the holiday periods, Agents can advise.

POLICE/AMBULANCE/FIRE: The port has police available at the port at all times. Ambulance service must come from Salalah at this time. The port has the only telephone service and the police located within the port also maintain telephone service. Required numbers are familiar to all persons in these two areas.

A complete fire fighting system is installed in the Port with fire hydrants distributed through the jetty capable of handling all kinds of fire. The new tug boats are fitted with fire fighting facilities.

TELEPHONES: For any long distance calls Omantel maintains office in Salalah where calls may be placed and paid for. For local calls the port will permit the use of port phone on a limited basis.

SERVICES: None available at this time.

SHORE LEAVE: Captain, First Officer and Chief Engineer are permitted restricted shore leave but all other members of the crew are restricted to the ship or port area.

IDENTIFICATION CARDS: Seamans book or passport are sufficient for those persons going ashore.

REGULATIONS: No vessel shall enter the port area unless authorised by the Harbour Master. The Harbour Master may at his discretion refuse to allow vessels, with the exception of vessels in distress, to enter the port, and may order from the port any vessel with the exception of vessels unfit for sea, which does not have business within the port, or is in breach of these Regulations.

No vessel shall anchor, or weigh anchor or move within the port area except when and where required by the Harbour Master.

No water ballast which is not free from oil or other harmful contaminants, shall be discharged into the waters of the port area. In case of the pumping of bilges or pollution by oil or harmful contaminants into the waters of the port area, the vessel will be responsible for any fines imposed by the Port Authority and any compensation or other damages.

Should fire break out aboard any vessel the Master should make an immediate signal either by a continuous sounding of long or short blasts on the ship's whistle or siren or by ringing of a fire bell.

In cases of adverse weather it is the sole responsibility of the Harbour Master to decide whether the sea conditions are suitable for handling cargo with barges in the Anchorage or whether the day will be declared a "Weather non-working day".

Masters shall be responsible for the adequate provisions of safety equipment and lights on board whilst cargo is being handled.

Conveyance of alcoholic liquor, other than manifested cargo under Customs supervision, from any vessel to the shore or from one vessel to another is prohibited.

No unauthorised person may enter the port area. Visitors to vessels are prohibited except by permission of the Harbour Master.

Ship's personnel and passengers are not permitted ashore except by permission of the Immigration Authorities and the Harbour Master.

Every merchant vessel in port shall fly her national flag, and the national flag of Sultanate of Oman, between sunrise and sunset.

GENERAL: See above. The port operates on a year round basis today with the exception of vessels requiring barging. All barging is closed from mid-June to late September depending on the sea state. Coaster vessels are berthed on a year round schedule but must be prepared to leave the berth under hurricane conditions.

SHIPMASTER'S REPORT: 1978.

Best Anchor Position: Easternmost rock off Ras Risut bearing 195°T×1 mile for vessels up to 30 ft. draft (B.A. Chart No. 3784).

Documents: Derat Certificate. Last port clearance. Vaccination list. (Bond not sealed).

Pilotage: Only vessels up to 300 ft. length with maximum draft of 17 ft. are berthed alongside. Pilotage is compulsory.

Radio: Send ETA, draft, LOA, g.r.t., n.r.t., cargo to discharge, last port, to: General Manager, Port Raysut, Salalah, Sultanate of Oman, giving 48 hours, 36 hours, 24 hours notice.

Barges: There are 3×250 ton barges, into which cargo is discharged at anchorage. Two more such barges are expected by end of 1978. These are flat top dummy barges on which cargo is stowed by fork-lift. Fork-lifts are available at anchorage.

Labour: A gang consists of 10 men. They are government employees. Presently port is short of gangs. Vessel must supply own men to operate winches.

Fresh water: Available only at berth. Supplied by trucks at the rate of USD 7.5/ton. NOT available at anchorage.

Provisions: Presently the port Quarantine Officer does shipchandling. However it is better to buy the provisions from a supermarket.

Shore Leave: Crew can go ashore from anchorage either by shore tugs which tow the barges or by ship's lifeboat. Must carry passports/CDCs. Taxis available to go into town of Salalah which is at a distance of 25 km.

Airport: Daily flight to Muscat.

Telex-Telephone-Cable-Posts: Facilities available by "Cable & Wireless" offices.

Hospital: Very good.

Workshop: Nil.

Fuel Oil: Not available.

General: Cargo is not worked during the monsoon period due to heavy swell, i.e. from 1st week of June to end of September.

Cost of barges at anchorage is 1 Rial per ton of cargo loaded. Such charges to be paid by the ship or her Agent prior to ship's departure.

Presently 6 berths are under construction which are expected to be ready by end of 1980. These will accommodate vessels up to 32 ft. draft.

AUTHORITY: The Port Manager, Directorate General of Communications, Salalah, Sultanate of Oman.

AGENT: See "Port Qaboos".

NOTES

Please also advise Shipping Guides Ltd.

Pakistan

KARACHI: 24.49 N. 66.59 E.

DOCUMENTS: *Required before vessel's arrival:*

2 copies Freight Manifest.
2 sets Bills of Lading.
3 copies Stowage Plan.
2 copies Passenger Manifest.
3 copies Cargo Manifest.
3 copies Hatch Lists.
1 copy Exception Lists.
6 copies Passenger Lists.

With vessel:

2 copies Cargo Manifest.
Last Port Clearance Certificate.
6 copies each Passenger List, disembarking and transit.
2 copies List of favour parcels.

The following special Pakistan forms are brought on board by Agent for completion on arrival:

2 Customs Arrival Reports.
2 Opium and Dangerous Cargo Certificates.
2 Ship's Currency Lists.
6 Deck Cargo Certificates.
1 Company's Arrival Report.
1 Ship's Crew Advance (if required).
1 Expiry date of Ship's Certificate.
1 Same Bottom or In Transit Cargo.
1 Water Indent.
*10 Crew Lists.
3 Stores Lists.
3 Property Lists.
7 Cargo Gear Information Forms.

*If this is ready prior to arrival, please attach to this form.

Metric weights and measures to be used on Particulars of Cargo, Tonnage Certificates, Stevedoring Bills, Manifests and Bills of Lading.

PILOTAGE: Pilotage is compulsory for ship of 200 n.r.t. and upwards. Pilot boards at the Outer Anchorage.

Vessels are piloted day and night, subject to tides, length and draft, to berths lying on the East and West of the fairway, which is 4.27 miles long. Pilotage distance is about 5 to 6 miles.

ANCHORAGE: Outer Anchorage where ships await berth safe except during the S.W. monsoon from mid-May to September. During monsoon no anchorage is recommended. Vessels should anchor a safe distance outside the breakwater within Lighthouse bearings 045° and 025°. Depth of water at the anchorage is about 9 fathoms.

RESTRICTIONS: Datum depth is 27 ft. Vessels with a draft in excess of 32 ft. are not permitted to enter Karachi due to varying depths at berths, and silting in the ship channel.

Berthing at any time, except vessels with bridge aft which permitted daylight only.

Sailings permitted during flood tide only. Tankers with LOA over 525 ft. Permitted to sail on flood tide during daylight hours only. Vessels with bridge aft permitted to sail on flood tide during daylight hours only.

MAX. SIZE:

	Length	*Draft*
Bulk carriers and general cargo (dry cargo)	945 ft.	32 ft.
Bulk oil tankers, white oil product	550 ft.	32 ft.
Bulk oil tankers, black oils.	650 ft.	32 ft.
New oil pier No. 4	800 ft.	32 ft.

HEALTH: The Port Health Authorities give automatic clearance on receipt of a "clean" standard quarantine message and this will be conveyed by the Pilot. However, ships from Yellow Fever areas must be cleared during daylight hours by the Port Health Officer on arrival alongside. On sailing to ports outside India and Pakistan, a medical inspection takes place on the day before sailing. It is, in theory, necessary for a member of the crew to be present at this inspection, although usually the inspection is only a formality. All vessels required obtain Immigration Clearance on arrival.

All vessels which have touched any port or ports between Port Sudan and Durban, on the East Coast of Africa, including these ports, are considered "suspected" vessels on account of Yellow Fever and Jigger and may not have communication with the shore till cleared at berth by the Port Health Officer, who attends only between sunrise and sunset, except in special circumstances. The incubation period for Yellow Fever under the rules is given as 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for Jigger.

RADIO: Port Authorities equipped with VHF radio-telephone, calling Channel 16, working Channel 12. Control Station call sign "Manora Pilot Control".

Vessels should establish radio contact with control station as soon as they are within VHF range.

Use of Channel 12 is restricted to the following: Ships while entering harbour are to maintain watch on Channel 12 as soon as Pilot boards. Ships in harbour scheduled to sail are to keep a listening watch half an hour before sailing till their clearance from the port.

"Intercommunication with the ships, other than Pilot Control, at outer anchorage or ships in harbour on Channel No. 12 and 16 is strictly prohibited. The Manora Pilot Control Station is equipped with multi-channel VHF Radio Telephone sets which are operating on International Maritime Channels 8, 9, 11, 12 and 16 subject to above restrictions."

TUGS: There are five diesel tugs all owned by Port Trust. Four tugs have bollard pull varying from 10 to 18 tons and one tug has 27 tons bollard pull.

Towage inside the harbour is rendered by Port Trust on signal from Pilot. Towage is not provided outside the breakwater except in very special circumstances at the discretion of the Deputy Conservator, subject to weather permitting and availability of tugs on special terms and conditions.

BERTHING: There are 17 berths at East Wharves, total quayage 8,622 ft. Berth Nos. 1 to 17 are on a concrete quay wall of the latest type. All berths are rail-served. Berth lengths vary from 470 ft. to 550 ft. Available depths vary from 26 ft. to 31 ft. There are 8 berths at West Wharf and their length varies from 550 ft. to 700 ft. Depths available vary from 29 ft. to 31 ft.

There are three Bulk Oil Piers having length of 425 ft., 644 ft. and 750 ft. which can accommodate tankers of overall length between 525 ft. and 650 ft. Also see "Tankers".

Moorings: Three moorings of 700 ft. each and one Lash Mooring of 1,000 ft. have been laid and are commissioned for accommodating the vessels of sizes between 600 ft. and 850 ft. respectively.

STEVEDORES: Working Hours: Monday through Thursday and Saturday, day shift: 0730–1130 and 1230–1630 hrs. On Fridays day shift: 0730–1230 and 1400–1630 hrs. Mondays through Saturday, night shift: 1900–2300 and 2300 to 0330 hrs. next day.

Overtime periods: 0330–0630, 1130–1230, 1630–1830 hrs.

TANKERS: Mineral oils discharged at the Bulk Oil Pier, 3 berths, and at West Wharf berth 20. Heavy grades may be discharged at the steamer wharves but dangerous petroleum only at the Oil Pier.

Vegetable oils are handled at both the terminals mentioned above, and at East Wharf berth 9.

New Oil Pier No. 4: Completed 1978. Max. LOA 800 ft., max. beam 100 ft., max. loaded draft 32 ft., max. size 75,000 d.w.t. and 95,000 tons, max. gross displacement.

Slop reception facilities: Not available.

Also see "Berthing".

FRESH WATER: Fresh water is available at East and West Wharves and at Oil Piers. The ships at Moorings are supplied fresh water by barges.

FUEL: In addition to coal, 3 grades of petroleum are available – furnace oil, light diesel oil and high speed diesel oil. Furnace oil can be supplied by pipe-line at all berths. Light diesel only at berths 1 to 4. At other berths supply is made by tank wagons and lorries. Large quantities can be supplied by pipe-line at the Bulk Oil Pier only.

REPAIRS: Repairs can be carried out at the anchorage except in the monsoon season. 2 ship repair jetties are available in the port. In addition, Karachi Shipyard and Engineering Works Ltd. provide all kinds of repair and ship-building facilities.

DEVELOPMENTS:

A 20 acre container freight station to be built near the Keamari Oil Installation will be available by mid-1981. There will be accommodation for 10 container vessels.

Port Qasim: New port under construction 30 miles S.E. of Karachi. The first phase of Port Qasim, to be completed in 1980. It includes construction of 7 multi-purpose berths and 1 steel mill terminal to handle iron ore and coal for the Karachi Steel Mills, and dredging of the approach channel to take vessels of up to 50,000 d.w.t.

The first 4 multi-purpose berths are expected to be available within 2 years to take ships of up to 50,000 d.w.t. The second phase of the port will be completed in 1984-85 and will add 12 high throughput berths.

HOLIDAYS: Eid-ul-Azha; Muharram; Defence of Pakistan Day (23rd March); Eid e Miland un Nabi; Independence Day (14th August) Defence of Pakistan Day (6th September); Jamat-ul-Wida; Eid-ul-Fitr; Anniversary of Death of Quaid-e-Azam; Christmas Day (25th December).

TIME: GMT plus 5 hours all year round.

AIRPORT: Karachi Airport, 7 miles from city. International connections to all parts of the world.

SHORE LEAVE: Shore passes are granted by Immigration Authorities when they first go on board and must be returned on departure of the vessel. These passes permit entry/exit to the docks until 2300 hrs. This latter regulation is not strictly enforced.

Indian crew are not allowed ashore except in emergency. An Immigration policeman will remain on board in port where Indian crew are carried. This policeman will ask for some sort of accommodation. This need only be given if it does not cause inconvenience to the ship.

GENERAL: The Karachi Port Authorities advise that in order to avoid delays to ships requiring abreast berths for working cargo, it has been decided not to berth more than 1 vessel for receiving supplies of fresh water and bunkers. Ships due to call at Karachi are therefore *recommended to arrive with sufficient fresh water and bunkers to last for two or three weeks from the date of arrival at the outer anchorage.*

SHIPMASTER'S REPORT: January 1980: Survey Vessel.

Approaches/Pilotage: There were a large number of ships anchored in the approaches – even in the "Prohibited Anchorage Zone".

Port Control system: Contact must first be made by Aldis lamp, and a vessel's arrival is not acknowledged until this has been done. On our first visit we had some trouble as the actual Signal Station is not at the position marked "Signal Station" but at 24° 48.8′ N., 66° 57.0′ E. marked F.S. on the Chart. I was politely informed on the VHF that unless I contacted them by Morse lamp, they would not be able to speak to me on the VHF.

The Pilot boards 2 miles S.W. of the breakwater – if vessel comes closer it will be sent out again. Manropes are required for the ladder.

Quarantine: The normal message should be sent 24 hours before arrival. A doctor boarded on arrival alongside, and required Vaccination Lists, together with the Maritime Declaration.

Port Officials: Immigration/Docks/Customs: A vessel bound for Karachi would do well to get a set of local forms from the Agent in advance.

The main Customs Declaration is very detailed.

Ship's own Personnel Effect Declaration lists showing, in addition, beer, watches, cameras, and foreign currency, were accepted.

At least 12 copies of the Crew List on arrival are required, plus 2 Sailing Crew Lists.

When all other Officials have finished, the Customs seal up the Bond.

Special Warning: Pakistan is a Muslim country. Notices should be displayed warning that it is prohibited:

1. To use cameras.
2. Give drink to locals.
3. Change money without obtaining a proper receipt.

Berths: We called at Karachi twice, and each time, in spite of a very full port, Agent managed to obtain a berth alongside.

Explosives: Loaded ex-barge, whilst alongside. No problems. Shore stevedore gang used.

Bunkers: Ex-road wagon, well organised and quick.

Water: Ex-quay. Good rate. Good quality.

Lube Oils: Received two drums of Stern Tube Oil, which we had not been able to obtain elsewhere.

Divers: The services of a diver were used to clear fouling from engine cooling water intakes.

Ship Chandler: Only fresh vegetables and some chickens were purchased, but these were good quality.

Laundry: Good and fast.

Watchmen: Supplied by Shipwrights.

With the rise and fall of tide in Karachi, the gangway needed constant attention. Nothing was reported stolen.

Repatriation: Possible.

AUTHORITY: Karachi Port Trust.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Panama

AGUADULCE: 08.14 N. 80.30 W. (See Plan Book)

LOCATION: The port of Aguadulce is located 4.5 km. from the coast on the Palo Blanco inlet in the Bay of Parita, Pacific coast of Panama.

The port consists of a single quay 70 m. long used mainly for shipment of bulk sugar and molasses to ports in the U.S.A.

DOCUMENTS: The same documents are required and the same procedures are followed as for Almirante, Armuelles and Bahia las Minas. See "Almirante".

PILOTAGE: There is an official pilotage service with Pilots available 24 hours a day. Pilotage is compulsory for all vessels greater than 150 g.r.t., wishing to enter and leave the port. To request the Pilot, the vessel's Agent must make arrangements with the National Port Authority. The pilot station is in Aguadulce. Vessels can also ask for Pilot by calling the National Port Authority on Channel 12 VHF.

The pilot launch is blue, with a white superstructure and flies a blue pennant. Vessels can communicate with the launch on Channel 12 VHF.

ANCHORAGE: Vessels must await the Pilot at the anchorage located near the sea buoy which is painted white with a white light flashing every 2 seconds. Position of the buoy is Lat. 08° 13′ N., Long. 80° 25′ W. Depth of water at the buoy's location is 22 ft., average low tide, and in places one mile to the N.E. it increases to 30 ft.

RESTRICTIONS: The port is on an inlet. It has an access channel 13 km. long from the sea buoy. The width of the channel varies from 200 m. in its widest part down to 75 m. at its narrowest.

The channel is marked by buoys which are lit and in accordance with the uniform lateral signalling system, and coming from the sea the buoys on the starboard are red with even numbers and red light and those to the port side are black with odd numbers and white lights.

The port is tidal and vessels may only enter and leave on the high tide. At low water the access channel has depths of less than 3 ft. for which reason the max. draft permitted in the port is 19 ft. with 18 ft. high tides. Furthermore, inside the inlet there are fairly sharp curves which do not permit entry of vessels greater than 100 m. overall length and 2,500 g.r.t. In the future it is planned to dredge the access channel to provide minimum depths of 10 ft. at low tide.

HEALTH: As with other Panamanian ports, the doctor boards the vessel with the other officials of the reception commission. If there is any infectious illness on board, the Master must communicate this to the Port Authority by VHF Channel 12.

VHF: The Port Authority has VHF equipment. Call on Channel 12. It operates throughout the day.

TUGS: None available.

BERTHING: There is a main quay 70 m. long with an average low water depth of 10 ft. There is also a small quay 30 m. long which is not used. The quay has a fender system. There is also a dolphin type quay for shipment of molasses, and a 50 m. berth for sugar carriers, which has automatic sugar loaders.

No loading equipment available. Unloading must be by ship's gear. There are belt type sugar loaders. Mobile cranes can be contracted in Aguadulce.

There are two storage tanks for molasses of 1,000,000 and 500,000 gallons capacity respectively.

There are also open air facilities for storage of general cargo.

STEVEDORES: Loading and unloading work is carried out by a gang of local workmen contracted by the ship's Agent, via their representative.

FRESH WATER: Available via tanker lorries. No supply via pipes in tne port.

FUEL: None available.

POLICE/AMBULANCE/FIRE: Available in the town of Aguadulce 5 km. from the port.

REPAIRS: No facilities.

PROVISIONS: Supplies available in Aguadulce.

TIME: GMT minus 5 hours.

CONSULS: None; the nearest are in Panama City 193 km. from the port by road.

MEDICAL: Hospital in Aguadulce.

CUSTOMS ALLOWANCES: See "Almirante".

TELEPHONES: Telephonic communication from the port by public telephone by micro-wave to any part of the world. No facilities for phones on board vessels.

DENSITY: Approximately 0.9971 gm/c.c. at 85° F.

SHORE LEAVE: No restrictions.

REPATRIATION: There are Immigration Officials on the quay. Repatriation presents no difficulty.

COMMUNICATIONS: The port is connected to the town of Aguadulce by an asphalt highway 5 km. long.

Aguadulce is connected to Panama City by road, the capital being 193 km. distant.

AIRPORT: At Aguadulce there is a small airstrip. There is an airport at Chitre 60 km. from Aguadulce and where a local airline effects two trips between this town and the airport of Paitilla in Panama.

AUTHORITY: National Port Authority.

ALMIRANTE (Bocas del Toro): 09.18 N. 82.23 W. (See Plan Book)

LOCATION: Located in Almirante (Bocas del Toro) Bay, on the N.E. end of the Atlantic coast of Panama.

The Port of Almirante consists of a pier 305 m. long used for loading bananas. The port is used principally by reefer vessels coming from Europe and bound for European ports.

The port was built by the United Brands Company and later transferred to the Government. Currently, it is rented by United Brands but is administered by the National Port Authority.

DOCUMENTS:

2 General declarations.
1 Clearance from previous port.
5 Cargo manifests or declaration that no cargo is carried.
2 Crew lists.
4 Passenger lists or declaration that no passengers are carried.
2 Supplies declarations for crew or declaration that there are no supplies.
2 Crew personal effects declarations.
1 Maritime Health Declaration.
2 Mail lists.
1 Bill of lading (1 copy of each).

The above documents must be presented by the Master of the vessel when the reception commission boards the ship, this commission comprising the following: Port Authority, Customs, Immigration, Health (Doctor), Vegetable Health and National Guard.

Once the reception commission finds the documents to be correct, free pratique is given enabling the vessel to commence operations.

PILOTAGE: Pilotage is compulsory for vessels entering Almirante.

The service is provided by a private Pilot who has his station in the town of Bocas del Toro. To request his services, the Agent must make arrangements with the Port Administration. Vessels using Almirante frequently take the Pilot on board in the Bay of Almirante, in front of the town of Bocas del Toro. The pilot cutter is blue with white superstructure, and has VHF radio. To communicate with the cutter, call up on Channel 12 VHF.

The Port Authority has established an official pilotage service, and all arrangements for the services of the Pilot must be made with the Port Authority. For vessels arriving for the first time in Almirante, they must anchor outside the entrance of Bocas del Toro aligned at 150° to 180° to Toro Point and 8 cables off. At this point, they must await the Pilot.

ANCHORAGES: Within the Bay of Almirante there are good locations with depths up to 90 ft.

In front of the quay there is space to anchor with depths of 50–60 ft.

RESTRICTIONS: The entrance channel has a minimum depth of 30 ft. and is marked by buoys and light floats as indicated on the Port Nautical Charts. Also see "Developments".

Shipmaster's Report: The water depths on passing Bocas del Toro are greater than 30 ft. as you follow the charted course lines.

Proceeding at a reduced speed consisting of "dead slow" and "stop", with enough manoeuvrability, to minimise the vessel's pitching, you can enter or leave the Bocas del Toro with a draft of 26 ft. without any difficulties.

On entering and leaving I was forced by cargo circumstances to berth with a 26 ft. deepest draft, and never had less than 10 ft. below my vessel's keel (deepest section), at low water.

MAX. SIZE: There are no restrictions as to beam and size of vessel; but as far as draft is concerned this must not exceed 30 ft.

Bocas del Toro can be entered and left with drafts of 29 ft. without difficulty.

HEALTH: The doctor on boarding the vessel with the Reception Commission receives his documents and declares free pratique.

In the event of illness on board, Agent must be advised by VHF radio and this will be passed on to the doctor.

RADIO: Cables for and from the Agent are sent by radio operated by Tropical Radio Telegraph Co. The Port Authority has VHF and SSB equipment. The SSB equipment operates on the call-up frequency of 7447.5 kHz.

VHF: VHF communications can be made on Channel 12 at a distance of 30 miles from the port. Furthermore, United Brands Co. has VHF equipment which receives calls on Channel 16.

TUGS: None available.

BERTHING: A banana quay 653 ft. long with a single mooring frontage and with 4 automatic banana loaders. It is recommended that vessels moor on the starboard side. Also there is a general cargo quay 350 ft. long which has pipes for discharge of refined oil. The max. depth at the quays is 30 ft.

STEVEDORES: Loading work is carried out by the local Workers Union. The Agent must make contact with United Brands Co. for these workers.

FRESH WATER: Available throughout the year. The pumping capacity is 2–3 t.p.h.

FUEL: Not available.

REPAIRS: No facilities for repairs to vessels.

PROVISIONS: Obtainable in the local market; but it is preferable for provisions to be obtained in Colon.

TIME: GMT minus 5 hours.

CONSULS: Costa Rica, El Salvador, Honduras, Nicaragua.

MEDICAL: A modern hospital is available in Changuinola 20 km. from Almirante. Almirante also has a small hospital.

CUSTOMS ALLOWANCES: The customs offices are in the port vicinity. Permitted quantities are 2 packs of cigarettes of 20 packets each per crew member and 2 bottles of whisky or other alcoholic drink per crew member for consumption on board.

TELEPHONE: There is a micro-wave telephone service to Panama and other places in America. The Port Authority has telephones in their offices, but there are none available for installation on vessels.

OPENING/CLOSING HATCHES: Carried out by stevedores.

DENSITY: 1.022 gm./cu.cm.

SHORE LEAVE: No restrictions.

POLICE/AMBULANCE/FIRE: Available in Almirante.

REPATRIATION: Can be effected without difficulty.

AIRPORT: There is a small airport at Changuinola 21 kms. from Almirante, which connects the province of Bocas del Toro with the rest of the Republic. There are 2 flights a day between the airport of Changuinola and Tocumen in Panama City. Changuinola is connected with Almirante by railway.

DEVELOPMENTS: It is planned to reposition the buoys marking the port entrance channel for the purpose of obtaining a minimum depth of 32 ft. along the whole of the port access channel.

SHIPMASTER'S REPORT: 1978.
Position: 29° 17.4′ N., 82° 23.5′ W.
Pilot: Compulsory. The boarding position of the Pilot varies, however he usually boards in the region of No. 10 Beacon. If he should be moving another vessel at the time of arrival, he requests vessel to proceed towards the berth and he will board the vessel about 1 mile off the berth. Occasionally he will board vessel as far out as Cape Toro. Notice of arrival is required 24 hours in advance via the Chirique Land Co.
Restrictions: Vessels able to enter and leave at any stage of the tide. It is not recommended to manoeuvre in hours of darkness as the lights on the buoys are not reliable in the Bocas Del Toro Channel. Max. size vessel at the Banana berth is 650 ft. and the deepest draft 26 ft. Bocas Del Toro has a buoy channel least depth 30 ft.
Health: Quarantine officials require 24 hour notice of arrival.
Tugs: No tugs available.
Radio: NBA (Balboa); WAX; WNU (Sliddel).
VHF: Pilot and Port Authority on VHF Channel 16. Agent on Channel 16 and 14.
Berthing: The Banana berth has 4 elevators. Distance from Bocas Del Toro to the berth is 17 miles. Max. size of vessel that can safely berth is 650 ft. Deepest draft is 32 ft. alongside, however there is a 27 ft. patch about 200 ft. off the berth. (See Plan Book). Draft limited to a max. of 26 ft. The channel from sea to berth is said to be swept to 30 ft. The nature of the bottom at the berth is sand and mud with occasional patches of coral.
Consuls: Honduras, El Salvador and Costa Rica.
Services available: Fresh water (however pressure very low during the day); Fresh provisions; Repair facilities (Small); Machine shop; Small air strip; Doctor and hospital.
General:
Bocas del Toro Channel: Prior to arrival confirm with Chiriqui Land Co. (Agents) that all buoys are in position and none missing. Channel is swept to a depth of 30 ft. but as can be seen on American Chart 28044, just North of No. 5 buoy a 25 ft. patch exists and the opposite side a 28 ft. patch. "Salen" confirmed max. safe draft is 26 ft.

On occasions quite a heavy swell is present causing vessel to pitch, on the way out it is usually noticeable about No. 5 Buoy.

Pilots: There are 3 Pilots, all live at Bocas. They use a small open type "dug out" boat with an outboard engine. Reputed to do 9 knots. They usually board off No. 10 beacon. Our Pilot required the port accommodation ladder. The others use the pilot ladder. They leave at the same place near beacon No. 10.

Mooring at Banana Pier: Morning time is usually the best, quiet, no wind, but by mid-afternoon it is usually blowing off the berth. Difficulty arises as there are no tugs and no mooring boats to take the lines. Good idea to have some extra light heaving lines ready with weights on the end.

Cargo: If Almirante is the last port for loading insist on filling No. 1 hatch before No. 5 (have only got 4 elevators). This guarantees any cartons "shut out" or rejected by the quality control will leave No. 5 light and not No. 1. This helps the draft situation.

Cargo gear: Have derricks lifted ready and the starboard banana lids open all the way down. Leave the port ones closed.

Fresh Water: Usually none available November to April, but the rest of the year it is about 2 t.p.h. They had a booster pump but at present it is burnt out. During the day the pressure is not good enough to reach the tanks, night time is a little better. Good idea to arrive with starboard side empty as they do not have enough hose or pressure to reach the port side.

Contract Work: Contractor Mr. Julio Wood. Very good for engine room scavenge spaces. Only average for painting on deck as they are not used to stages. They have no paint floats. Rate U.S. Dollars 1.50 per man/per hour. Foreman 2 Dollars. Vessel also has to pay 13% social security.

Recreation: A trip to a banana plantation can be arranged via the office, also includes the packing section and Banana Puree factory. Leave the ship at 0700 hrs. Train goes at 0730 hrs. to Farm 8. Had party of 16 and met by school bus. The club house has golf course, tennis courts and large swimming pool. Worth taking swimming gear.

In Almirante, crew are made welcome at the "Lions Club" which has a Ten Pin Bowling alley. Film shows on Thursdays and Saturdays all free of charge.

AUTHORITY: National Port Authority.

BAHIA LAS MINAS (Colon): 09.24 N. 79.49 W.

(See Plan Book)

LOCATION: Situated 11 km. to the East of the entrance of the Panama Canal on the North Coast.

DOCUMENTS:

- 2 General declarations.
- 1 Clearance certificate from last port of call.
- 5 Cargo manifests, or declaration to the effect that no cargo is carried.
- 4 Passenger lists, or declaration that no passengers are onboard.
- 2 Supply lists, or declaration that no supplies are carried.
- 2 Lists of Crew's personal effects, or declaration that none carried.
- 1 Maritime health declaration.
- 2 Mail lists or declaration that no mail is carried.
- 2 Crew lists.

PILOTAGE: Compulsory for all vessels entering the port and is offered by the Pilots of the Marine Department of the Refineria Panama S.A.

Vessels must await the Pilot beyond buoy No. 1 painted white, with a flashing white light every 3 seconds. The best position for anchoring is near buoy No. 1 in position Lat. 09° 25′ 30″ N. Long. 79° 49′ 35″ W. where there is a depth of 63 to 66 ft.

Vessels wishing to enter the port may call up the Port Authority on VHF Channel 12 or Refineria Panama on VHF Channel 16.

The Pilot craft has a black hull and white superstructure. When weather conditions are bad, a tug is used for boarding vessels.

The boarding ladder is placed in accordance with conditions of the sea.

Vessels may also ask for a Pilot via their Agents who will communicate the request to Refineria Panama. In this case, they must give an ETA 12 hours in advance.

RESTRICTIONS: The port of Bahia las Minas is mainly an oil port, specialised in importing crude oil and exporting refined products, being operated from an oil aspect by Refineria Panama S.A., and administered by the National Port Authority.

Apart from the tanker quays, there is a small quay for handling general cargo, length 90 m. This quay is administered and operated by the National Port Authority. The access channel to the port has a width varying from 300 m. in its widest part to 100 m. in its narrowest part, and a minimum depth of 40 ft. at the tanker quays. However, the general cargo quay can only take vessels of up to 23 draft. Tidal variation in this port is less than 1 ft., and so there are no restrictions for entry and leaving relating to tides.

The port access channel is marked with light buoys positioned in accordance with the International Buoy System, i.e. coming from the sea, buoys painted red with red light on the starboard side, and buoys painted black with white light on the port side.

MAX. SIZE: The port can be used by vessels up to 240 m. LOA at its tanker installations and their draft may not exceed 40 ft.

The general cargo quay can be used by vessels up to 152 m. LOA and 23 ft. draft. However, restrictions in vessels' lengths vary when the quay is used by Ro/Ro vessels which tie up by the bow or the stern, and in this case vessels up to 600 ft. length are permitted.

HEALTH: When a vessel arrives it must hoist the yellow flag of the International Signalling Code. Free pratique will be granted by the reception commission after handing over of documents (See "Documents".) In the case of illness on board, this must be communicated to the vessel's Agent so that he may pass on the information to the Authorities. The vessel may not moor or carry out any operations until the doctor has come on board and verified that the illness does not constitute any danger.

RADIO: Vessels may communicate via the coastal station of the Panama Canal. Generally speaking, the same ships' agencies operating in the Canal are those who represent vessels arriving at Bahia las Minas.

VHF: The Port Authority has VHF equipment at Colon which operates 24 hours a day on Channels 12 and 16.

For calls to the Port Authority, Channel 12 must be used. Refineria Panama also has VHF radio equipment and calls must be made via Channel 16.

RADAR: There is no radar service.

TUGS: Refineria Panama S.A. supplies this service to vessels which may require it. There are 4 tugs available. Generally, tugs work at the bow and stern of the ship, and lines must be fixed by the vessel's crew.

BERTHING:

Quay	*Length*	*Depth (Average low tide)*
Tanker quay	140 m.	40 ft.
2 lighter quays (refined products)	75 m. each	20 ft.
General cargo quay	90 m.	23 ft.

CRANES: There is no cargo handling equipment on the general cargo quay. All unloading must be by ship's gear.

SPECIAL CARGO FACILITIES: The dry cargo quay is used by Ro/Ro vessels making regular trips between Miami and Panama. The port offers unloading and loading services to these vessels.

The oil quays have special equipment for unloading and loading oil and its derivates.

STEVEDORES: These are provided by the Colon Port Workers' union, and must be contracted by the ship's Agent.

FRESH WATER: Available.

FUEL: Pipe-lines are available at all oil quays, but no such facility is available at the general cargo quay.

PROVISIONS: These can be obtained in the town of Colon via local suppliers, the Agent making the necessary arrangements.

DENSITY: 1.0212 grams per cu.cm. at 85° F.

TIME: Local time is GMT less 5 hours.

CONSULS: U.K., Norway, South Africa, Sweden, Denmark, Finland.

MEDICAL: Hospital available in the town of Colon 15 minutes from the port.

TELEPHONE: None available for connection to vessels. Available in the Port Authority offices. Tel: 42-1658.

AIRPORT: There is a small runway at Colon. At Panama, 90 kms. from Colon, is the airport of Tocumen, which is an international airport, served by the main world airlines.

HOLIDAYS: 1st January, 10th January, Mardi Gras, 1st May, 11th October, 2nd and 3rd November, 8th and 25th December.

POLICE/AMBULANCE/FIRE: Available in Colon. Refineria Panama has a small fire brigade, and also in the town of Colon, 15 kms. away, there is a fire brigade.

REPATRIATION: This can be done without difficulty via the Immigration offices.

SHORE LEAVE: No restrictions; but due to the distance between the port and Colon, a taxi service must be used. The tariff in a Refineria Panama taxi to Colon is approximately 5 U.S. dollars.

SERVICES: No special services offered. In the ports of the Canal it is possible to have compass adjustments, laundry, chemicals, etc.

AUTHORITY: National Port Authority.

BALBOA: 08.58 N. 79.34 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Depth about 40 ft. low water. Vessels in excess of 38 ft. 6 in. draft not handled during period 2.5 hours before and 2 hours after low water.

Tankers working cargo restricted to 700 ft. length and 36 ft. salt water draft.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

BERTHING: No specific requirements as to arrival times. Nine berths available.

(Pleasure yachts under 65 ft. length, may be permitted to dock at Panama Canal Yacht Club or Balboa Yacht Club after clearance by Boarding Officer and after Master has received permission from Port Captain, Customs authorities and Yacht Club Officials concerned. Chief Customs Inspector shall have authority to grant or deny such permission at his discretion.)

Rodman Naval Station: Piers can accommodate vessels of 700 ft. length and up to 39 ft. draft for oil discharge, bunkers or stores.

Panama Canal Co. Dock:

Dock	*Usable length*	*Maximum S.W. draft*
4	492 ft.	30 ft.
6	742 ft.	36 ft.
7	1,058 ft.	34 ft.
8	470 ft.	26 ft.
14	775 ft.	36 ft.
15	1,146 ft.	40 ft.
16	742 ft.	38 ft.
18–A	500 ft.	39 ft.
18–B	500 ft.	35 ft.
18–C, D	1,000 ft.	40 ft.

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement.

TANKERS: 2 berths for vessels discharging, max. draft 36 ft. (Under certain conditions 40 ft. draft can be accommodated).

FRESH WATER: Available.

FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

Vessel's personnel are to connect and disconnect all fuel lines aboard the vessel. The vessel is also to supply necessary fittings to match U.S. standard 4 in. and 6 in. 150-pound flanges.

A bunkering area has been established in the Pacific Anchorage.

REPAIRS: Emergency repairs possible.

DRY DOCK: Length 1044 ft., generally reserved for Canal vessels, but arrangements may be made for emergency dry-docking.

POLICE/AMBULANCE/FIRE: Police 104, Fire 103.

TELEPHONES: May be placed aboard through arrangement with Agent.

SHORE LEAVE: Generally permitted.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of Inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. Eight hours is considered excessive.

AUTHORITY: National Port Authority.

AGENT: C. Fernie & Co., Inc. Apartado 212. Cable Address: "Fernie-Balboa". Also VHF. Telephone Nos.: 52 5657-5371. After office hours telephone numbers: Panama City 26-0165 or 64-9181.

All communications should be directed to Cristobal, Republic of Panama.

COLON: 09.21 N. 79.54 W. (See Plan Book)

LOCATION: Located in the Bay of Limon, the port of Colon constitutes Quay No. 3 in the area of Fort Jessep.

GENERAL:

Shelter: All the quays are protected from the sea by the breakwater which protects the canal entrance in the Atlantic sector.

General description: The port of Colon (Quay No. 3) is used by small vessels of length not greater than 100 m. engaged in coasting trade between Colon and Bocas del Toro, and international trade between Colombia and Panama.

Port maritime access: The Colon port access is the same as that which leads to the port of Cristobal in the Canal.

Nature of bottom: Soft mud and clay.

DOCUMENTS: The same documents are required and the same procedures are followed as at Bahia las Minas.

PILOTAGE: No pilotage service at Colon. Vessels berth and unmoor under the orders of their Masters.

RESTRICTIONS: The port is restricted to vessels of length not greater than 100 m. due to the size of the quays. Draft at the berths varies from 8.5 to 20 ft., which also restricts the size of vessels.

Aids to navigation: The port entrance channel has no aids of its own for navigation. Maritime accesses are however marked clearly by the Panama Canal Commission.

HEALTH: Same as Bahia las Minas.

RADIO: Vessels can communicate with the Port Administration on Channel 12 VHF.

TUGS: None at Quay No. 3, but they may be contracted in the Canal.

BERTHING:

Berth	*Length*	*Depth (average low tide)*
Quay 1	55 m.	16 ft.
Quay 2	58 m.	16 ft.
Quay 3	82 ft.	10 ft.

STEVEDORES: All loading and unloading operations are carried out by the Union of Port Workers of Colon. The ship's Agent must make the necessary arrangements.

CRANES: None.

FRESH WATER: Available.

FUEL: Available at the quay by pipe-line. Also Refineria Panama supplies fuel in the Bay of Colon by means of lighters.

PROVISIONS: Available in Colon.

DENSITY: 1.0212 grams cu. cm. at 85° F.

TIME: GMT less 5 hours.

CONSULS: Norway, UK, Sweden, Denmark, Finland.

MEDICAL: In the town of Colon.

TELEPHONE: Available in the offices of the National Port Authority. Telephone 47-9181.

POLICE/AMBULANCE/FIRE: Available in Colon.

AUTHORITY: National Port Authority.

CRISTOBAL: 09.21 N. 79.54 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)

PORT LIMITS: Ship's arrival time is normally determined by their passage between the breakwater lights. Those that anchor outside the breakwater by arrangement with the Port Captain are timed as arrived when they drop anchor.

PILOTAGE (Also see "Panama Canal"): Pilotage into Cristobal not compulsory, although services of Pilot outside breakwater are available on request.

Vessels arriving outside Cristobal Breakwater who have requested an outside Pilot are required to *heave to and make a good lee.*

A pilot ladder rigged with appropriate spreaders and well illuminated at night to be provided by vessel. Accommodation ladders not acceptable for embarking Pilots outside breakwater.

Marine Director's Notice to Shipping Agents No. 8–74:

1. A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal Waters.
2. The pilot ladder shall conform to Regulation 17, Chapter V of the International Convention for the Safety of Life at Sea 1960 (SOLAS) and to all additional recommendations of the International Maritime Consultative Organisation (IMCO).
3. The accommodation ladder may be turned in and secured after the Pilot has boarded the vessel in the anchorage, provided the freeboard does not exceed 9 m. (30 ft.). If the freeboard exceeds 9 m., the accommodation ladder may not be turned in until the last Panama Canal employee boards prior to arrival at the locks.
4. A pilot hoist may be used provided the design and construction of the hoist and ancillary equipment are of such a standard as to ensure an effective and safe means of embarkation and disembarkation. The pilot hoist should only be used when:
    - *(a)* A conventional pilot ladder is rigged and ready for immediate use but triced up well clear of the hoist;
    - *(b)* A lifeline attached to a safety stop and a lifebuoy fitted with a self-igniting light are ready for immediate use.

ANCHORAGE: Vessels will ordinarily proceed to anchorage area according to length and draft unless otherwise directed. Arriving vessels expected anchor as far to South and inward from main channel in their anchorage area as is consistent with safety. Vessels anchoring in non-designated areas may be required to move.

Anchorage Area "A". For all ships with a deep salt-water draft of not less than 34 ft. and not in excess of 39 ft. Minimum charted depth is 40 ft.

This area starting at Lat. 9° 23′ 21″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. However, restricted area North and East of Buoy 2, as charted, must be observed. Explosive sector charted in this area to be avoided whenever possible.

Anchorage Area "B". For all ships with salt-water draft under 32 ft. Minimum depth is 29 ft. Explosive sector restricted to vessels carrying explosives or specially designated vessels. All ships of such length are under no circumstances swing into Anchorage Area "A".

This area starting at Lat. 9° 22′ 48″ N., Long. 79° 56′ 15″ W.,
thence to Lat. 9° 22′ 32″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 42″ N., Long. 79° 56′ 41″ W.,
thence to Lat. 9° 21′ 52″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 21′ 56″ N., Long. 79° 55′ 48″ W.,
thence to Lat. 9° 22′ 14″ N., Long. 79° 56′ 15″ W.,
thence due North to starting-point.

Anchorage Area "C". Required pilotage waters for inbound vessels.

This area starting at Lat. 9° 21′ 25″ N., Long. 79° 55′ 21″ W.,
thence to Lat. 9° 21′ 25″ N., Long. 79° 56′ 00″ W.,
thence to Lat. 9° 20′ 48″ N., Long. 79° 55′ 57″ W.,
thence to Lat. 9° 20′ 27″ N., Long. 79° 55′ 21″ W.,
thence due North to starting-point. Restricted area East and South of Buoy 2, as charted, must be observed.

Anchorage Area "D". For all ships of over 350 ft. in length and a deep salt-water draft of less than 35 ft. except where minimum charted depth is 32 ft.

This area starting at Lat. 9° 23′ 19″ N., Long. 79° 55′ 15″ W.,
thence to Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 54′ 55″ W.,
thence to Lat. 9° 22′ 02″ N., Long. 79° 55′ 15″ W.,
thence due North to starting-point.

Anchorage Area "E". For all ships less than 350 ft. and small craft. Minimum charted depth of water is 24 ft.

This area starting at Lat. 9° 22′ 55″ N., Long. 79° 54′ 21″ W.,
thence to Lat. 9° 22′ 27″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 53′ 54″ W.,
thence to Lat. 9° 22′ 22″ N., Long. 79° 54′ 21″ W.,
thence due North to starting-point.

Anchorage Area "F". For small craft and yachts. Pilotage for this area will be decided by Cristobal Port Captain, based on merit of each individual case. Under no circumstances may a vessel proceed to this area prior to being cleared by Boarding Officials. (Bounded by Channel Buoy "3" by a direct line through Buoys "A," "B," "C," "L4," "L2" and return to Buoy "3".)

Outer anchorage area. Established North-West of Cristobal breakwater have the following co-ordinates: Commencing at Lat. 09° 23′ 14″ N. Long. 79° 55′ 21″ W. (West breakwater light); thence to 09° 24′ 40″ N. 79° 56′ 00″ W. (buoy "A", whistle sea buoy); thence to 09° 24′ 40″ N. 79° 57′ 00″ W.; thence to 09° 23′ 14″ N. 79° 57′ 00″ W.; thence due East to starting point.

During periods of harbour congestion, large, deep-draft vessels and/or any vessel so directed may anchor outside the breakwater in the approved area. Such vessels must advise Cristobal Signal Station, by VHF Channel 12, the time of passing sea buoy, in order to establish order of transit. Masters will be given a definite time to enter the breakwater, where the vessel will be met by transit Pilot(s) and boarding officials.

Vessels must strictly adhere to the breakwater entry times as given, in order that transit schedule can be maintained.

Prohibited Anchorage. Eastern side of channel, Canal waters South of Lat. 9° 22′ 02″ N. to Mole Buoy in order to give clear access to Colon Harbour. Also, no vessel or craft may proceed South of Latitude 9° 21′ 25″ N. prior to being cleared by Boarding Officials. No vessel may anchor with any part of the vessel in the main channel or closer than 300 yards to either East or West breakwater lights.

In cases due to harbour congestion, any vessel may be directed to anchor to Westward outside breakwater entrance and given an order as to the time it is to pass through the breakwater entrance.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Draft 40 ft.

RADIO: The Port Captain may be contacted via VHF Channel 12. Commercial telephone calls and messages to Agents may be made via Panama Radio, VHF Channel 16.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

BERTHING: No specific requirements as to arrival times. Fifteen cargo and bunkering berths.

Cristobal Harbour Controlling Depths:

Dock	Berth	Usable Length (ft.)	Max. S.W. Draft (ft.)	Max. Lgth. of Ship at Max. Draft (ft.)	Beam Limit (ft.)	Total Lgth. Avail. of Dock Face (ft.)	Remarks

16	E	458	29.5	300	None	458	FO-HDO-LDO-Water, Gasoline
Mindi		275	26	492	None	275	No Services

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 07.00 hrs. or 17.00 hrs. commencement.

TANKERS: Four berths available.

FRESH WATER: Available from piers.

FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

The Southern part of Anchorage C, Cristobal Harbour, has been designated a limited bunkering area for vessels whose draft is too great to use the East breakwater bunkering area.

Pilotage is compulsory out and into this area for vessels and bunkering barges.

Also see "Balboa".

REPAIRS: Emergency repairs possible.

DRY DOCK: (Not available for commercial activities). Length 386 ft., breadth 60 ft., depth over blocks 20 ft. 6 in. MLW.

POLICE/AMBULANCE/FIRE: Police 104, Fire 103.

TELEPHONES: May be placed aboard through arrangement with Agent.

SHORE LEAVE: Generally permitted.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 hrs. to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. 8 hours is considered excessive.

SHIPMASTER'S REPORT: July 1979.

Bottom Cleaning: Following a recent bottom clean of this vessel in Cristobal by 'Subservices, Inc.' I now forward two items of information which may prove useful to other Shipmasters.

a) Because of the nature of the sea bottom in Cristobal, 'Subservice' required approximately 10 ft. beneath the keel. In anything less, the water displaced by the machine disturbed the mud sea bottom reducing underwater visibility.

b) Contrary to advice received from the local signal station the deepest water was found in a position where the West Breakwater light bore 000° True at 3 cables. Due to the proximity of vessel to fairway a running moor was used. Average depth was 50 ft.

AUTHORITY: National Port Authority.

AGENT: C. Fernie & Co., Inc. Apartado 5042, Cable address: "Fernie-Cristobal". Telephone Nos.: 45-1133 (5 lines). Telex Nos.: ITT–3482020, or 3482035. Also VHF. After office hours telephone numbers: 45-2017 or 45-2495 or 45-2278.

PANAMA CANAL (entering **Cristobal** or **Balboa**) (See Plan Book)

§ Indicates Panama Canal – Code of Federal Regulations Number.

REGULATIONS: The following are some of the important Canal Regulations.

§101.2 Boarding of arriving vessels:

(a) Arriving vessels that are subject to quarantine inspection and arriving vessels that are exempt from quarantine inspection due to compliance with §61.171 of this chapter and intend to transit the Canal without first docking normally will be boarded upon arrival. The boarding will occur inside the breakwater at the Atlantic entrance to the Canal or off the seaward end of the dredged, marked channel at the Pacific entrance. It will be performed by a Panama Canal boarding officer in accordance with the procedures and during the boarding hours established for the respective ports by the Canal authorities. When such vessels are not boarded immediately upon arrival, they shall anchor in a designated anchorage area and await the boarding officer.

(b) Arriving vessels that are exempt from quarantine inspection due to compliance with §61.171 of this chapter and intend to dock at their port of arrival may proceed to the dock without awaiting a boarding officer. Customs, Immigration and admeasurement functions relating to such vessels will be performed by a boarding officer after the vessel docks. (38 FR 3963, Feb. 9, 1973)

§101.3 Functions of the Boarding Officer:

The boarding officer shall perform the functions of admeasurer for the purpose of determining Panama Canal tolls; shall make inspections for the purpose of insuring compliance with quarantine. See "C.F.R. Regulations".

§101.4 Measurement of vessel making maiden transit:

A vessel that arrives after 2000 hrs. and is to make her maiden transit will normally be admeasured on the following day.

§101.5 Compliance with quarantine and immigration instructions:

(a) In the case of vessels subject to quarantine inspection, all persons shall comply strictly with instructions from the boarding officer until such time as pratique is granted.

(b) In the case of vessels subject to immigration inspection, all persons shall comply strictly with instructions from the boarding officer in all matters concerning immigration inspection; and, until the vessel has been granted immigration clearance, no person other than the boarding officer and the Pilot shall go aboard or leave the vessel unless authorised to do so by the Boarding Officer.

§101.6 Identification signals:

Every vessel shall hoist its signal letters when approaching and entering a terminal port, and those arriving at night shall promptly signal their names, by flashing light, to the signal station. This communication of the vessel's name by signal letters or flashing light is mandatory even though the vessel communicates by voice radio. The signal station on Flamenco Island is equipped with voice radio for communication with vessels approaching the Pacific entrance to the Canal on the following frequencies: International Calling and Distress 2182 kc/s and Panama Canal Commission 2846 kc/s.

§101.1 Visual-signal stations at Canal approaches:

The established visual-signal stations with which vessels may communicate upon arriving at the Canal approaches, by means of International Code and flashing light, are located on the seaward end of Pier 6, Cristobal, and on Flamenco Island at the Pacific entrance. Such stations are also utilised to assist in control of traffic at the terminal ports. Both signal stations are equipped with VHF Channels 12 and 16.

Cross Reference: See Part 123 for provisions respecting radio communication by vessels prior to arrival and while they are in Canal waters.

§103.7 Temporary holding of vessels:

The Canal authorities may hold a vessel for the purpose of investigating any claims or disputes that may arise, or any formal or informal complaint or allegation of a violation of the laws of the Canal or of the United States or of the provisions of this chapter. A vessel may also be held until, in the opinion of the Canal authorities, its tenderness, trim, list, cargo, hull, machinery, and equipment have been put into such condition as will make the vessel reasonably safe for her passage through the Canal. No claim for damages shall be allowed or considered because of any such temporary holding of vessels.

§103.8 Order of transiting of vessels:

The Canal authorities may dispatch vessels through the Canal in any order and at any time they may see fit. Priority of arrival at a terminal does not give any vessel the right to pass through the Canal ahead of another that may arrive later, although order of arrival will be consideration in determining the order of passage.

§103.4 Load and trim:

(a) A vessel shall not be permitted to transit the Canal if she:

(1) Has a list of more than 10 degrees; (2) Is so tender or otherwise so loaded as to dangerously affect her stability or manoeuvrability; or (3) Is so trimmed as to dangerously affect her manoeuvrability.

(b) A vessel having a list of between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to adversely affect her manoeuvrability, may be permitted to transit in the discretion of the Port Captain, provided the Master thereof, in the presence of the Pilot, signs an undertaking, for the said vessel, her owners, operators, or any other persons having any interest in her, and for himself, releasing the Panama Canal Commission from and indemnifying it against, any loss, damage, or liability incurred by the Panama Canal Commission.

§103.10 Vessels required to be equipped with certain indicators:

(a) All vessels in excess of 150 ft. in length shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(b) All vessels with beams in excess of 80 ft. shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(c) All vessels in excess of 150 ft. in length which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(d) All vessels with beams in excess of 80 ft. which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(e) Any vessel which fails to meet the requirements of this section may be denied transit. If the Canal authorities decide that the vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with other requirements of this section, the vessel may be allowed to transit after the Master thereof, in the presence of the Pilot, signs an undertaking for the vessel, her Owners, Operators or any other persons having any interest in her, and for himself, releasing the Panama Canal Commission from and indemnifying it against any loss, damage or liability incurred by the Panama Canal Commission.

§103.22 Vessels at fuel berths:

A vessel at a fuel berth shall keep up steam and be ready to move on short notice unless special authority to the contrary has been obtained from the Panama authorities.

§103.23 Vessels at wharves; fire watch; gangways:

A vessel lying at any pier, dock, or wharf shall at all times keep a satisfactory watch for fire and have suitable fire-fighting apparatus ready for immediate use. Any such vessel shall also keep each gangway which is in use, whether such gangway has been supplied by the vessel or by the Panama Canal Commission properly illuminated when necessary, and properly secured at all times, moving or adjusting the same to allow for rise and fall of the tides and/or other changed circumstances. In addition, a safety net shall be properly rigged beneath each gangway.

§103.27 Clear view forward from the bridge and steering light requirement for certain vessels:

(a) A vessel may not be navigated in Canal waters unless there is a clear, unobstructed view forward from the bridge.

§109.5 Ship's gear to be ready during transit; test:

Before beginning transit of the Canal, a vessel shall have hawsers, lines and fenders ready for passing through the locks, for warping, towing, or mooring as the case may be; and shall have both anchors ready for letting go. The Master shall assure himself, by actual test, of the readiness of the vessel's main engines, steering gear, engine room telegraphs, whistle, rudder-angle and engine-revolution indicators, and anchors. During the transit, at all times while a vessel is underway or moored against the lock walls, her deck winches, capstans, and other power equipment for handling lines, as well as her mooring bitts, chocks, cleats, hawse pipes, etc., shall be ready for handling the vessel, to the exclusion of all other work.

OIL POLLUTION: Every vessel subject to the Federal Maritime Commission's oil pollution financial responsibility requirements, must maintain on board and make available to Panama Canal Commission boarding inspectors the original or copy of its certificate. Any vessel that does not have the necessary certificate on board will not be permitted to transit the Panama Canal. The 1969 CLC Certificate is also required where applicable.

If pollution occurs the Master's appearance in court may be required with possible heavy fine and attendant delays.

DOCUMENTS: All documents listed below shall be ready for immediate delivery to boarding inspector when he boards vessel upon each arrival of vessel in Canal waters.

Documents required	*From ships which transit Canal. (number of sets)*
(1) Ship's information and quarantine declaration (Panama Canal Form 4398)	1
(2) Clearance from last port	*1
(3) All certificates of a sanitary nature	*1
(4) Passenger list: Passengers transitting only (on Panama Canal Form 20)	**2
(5) Passenger list: Passengers for discharge (on Panama Canal Form 18–9)	**1
(6) Crew list (on Panama Canal Form 1509–10)	2
(7) Store list	†1
(8) Cargo declaration (Panama Canal Form 4363)	1
(9) Manifest of local cargo	0
(10) Panama Canal tonnage certificate	1
(11) National register	1
(12) General arrangement, capacity, tank and engine room plans	‡1
(13) Report of structural alterations and of changes in use of tanks or other spaces since last transit	1
(14) Declaration by all vessels except ships of war of all arms and munitions of war aboard. Explosives are declared separately	**2
(15) Declaration as to vessel's port(s) of departure, destination, and ports of call, within the last three months, with the corresponding actual or approximate dates	1

*For examination and possible retention.

**Not required unless such persons or cargo are carried.

†Required if ship during transit is laid up for repairs, regardless of whether passengers or cargo are taken on or discharged.

‡For taking up and subsequent return through Agent or otherwise.

Documents required at ports. In case a vessel takes on or discharges passengers or cargo at only 1 Canal port and does not transit Canal. The following documents are required by the Panamanian Authorities:

4 Copies Crew List.
2 Copies Stores List.
3 Copies Passengers Disembarking List.
2 Copies Passengers in Transit List.
4 Copies Personal Effects List.
4 Copies Cargo Manifest.

Crew List. For purposes of additional identification of Crew members, all copies of crew list shall include for each seaman the serial number of his certificate of identification, continuous discharge book, passport or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as family name, shall be shown for all seamen.

Passenger list. All copies of passenger lists shall be accurate and legible and shall be delivered to boarding inspector. The list shall show passengers in alphabetical order. Passengers who are to be discharged at Canal ports shall be listed separately from other passengers aboard who are only to transit Canal. In event any passenger listed for discharge fails to disembark, or any passenger listed for transit disembarks, notice shall be given promptly by Master through his ship's Agent to Port Captain and a supplementary passenger list (same number of copies as is required for an original list of disembarking passengers) showing required information concerning such passengers shall be furnished promptly to Chief Customs Inspector prior to clearing Canal waters.

(It is understood that "Advance Documents" are no longer required by Authorities. However, Agents request copies of Crew and Passenger Lists in advance, which should, if possible, be airmailed from last Port).

PILOTAGE: *§105.4 Pilotage changes:* Pilotage for vessels in transit through the Canal is free; but whenever any vessel, while in Canal waters, discharges or receives freight or passengers, or remains for the purpose of effecting repairs, or makes either terminal a port of call, it is liable for the applicable port pilotage charge established by the Canal authorities.

§105.5 Pilotage beyond Atlantic Breakwater

Should a vessel desire a Pilot to meet it outside the Atlantic breakwaters, such vessel shall remain there and make signal to that effect.

§105.6 Status and function of Pilot

The Pilot assigned to a vessel shall have control of the navigation and movement of such vessel.

§105.1 Pilots required

(a) Except as provided by §§105.2 and 105.3, no vessel shall pass through the Canal, enter or leave a terminal port or manoeuvre within the Canal waters lying inside the Canal entrances without having a Panama Canal Pilot on board.

(b) Normally, a vessel will, unless advised to the contrary by the Port Captain, be boarded by the Panama Canal Pilot inside the breakwater at a point North of the Mole Beacon at the Atlantic entrance and in the Merchant Vessel Anchorage to seaward of Buoys 1 and 2 at the Pacific entrance.

(c) Normally a Pilot will relinquish control of the navigation and movement of a vessel proceeding seaward when the vessel passes the Mole Beacon, Atlantic entrance, or Buoys 1 and 2, Pacific entrance. A Pilot shall not, however, relinquish control at the Mole Beacon of a Northbound vessel which is to anchor in Limon Bay, but shall take the vessel to anchor.

Shelter for Pilots: Purpose of platform is to provide a shelter from sun and rain for Pilots working near bow of vessel and to provide adequate visibility around the locks to reduce danger of damage.

Platforms are required on:

(a) All vessels that are 100 ft. or more in extreme beam with bridge aft; and

(b) All vessels that are 95 ft. to 99.9 ft. extreme beam with bridge 600 ft. or more from the bow measured at the outside of the wheelhouse at the centreline.

Platform to be erected at position which is farthest forward at extreme beam and not more than 6 in. inboard from the vertical plane of shell plating. 1 on each side of the vessel. Awning made of suitable material. Deck of wood or other suitable material with non-skid surface.

Vessels equipped with previously approved design may continue to use platforms of that design until they require replacement.

Further inquiries on this subject should be directed to Port Captain Balboa/Cristobal.

The vessels mentioned above require 4 Pilots, 2 forward and 2 aft, when transitting the locks of the canal.

STEERING LIGHT: All vessels with the bridge more than 250 ft. from the stem must have a steering light at or near the stem. The light may be any colour except white, green or amber, must not be visible forward of the beam, and must be of such an intensity and so fixed as to be clearly visible from the navigation bridge.

ANCHORAGES: No vessel shall anchor within navigable waters of the Canal in other than a designated anchorage.

1. *Merchant Vessel Anchorages.* (a) *Atlantic entrance merchant vessel anchorage.* An area to the West of the Canal channel bounded as follows: Starting at a point "A", located in position 9° 21′ 25″ N., 79° 55′ 31″ W., and marked by gas buoy No. 2, thence 900 yd. 270° true to a point "B" located in position 9° 21′ 25″ N., 79° 55′ 58″ W., thence to lighted buoy "1", thence to lighted buoy "H", thence due North to a point "C" located in position 9° 22′ 07″ N., 79° 56′ 41″ W., thence 2,800 yd 59° true to a point "D" located in position 9° 22′ 50″ N., 79° 55′ 29″ W., and thence to the starting-point. The line extending due West from the Cristobal Mole through lighted beacon No. 1 and lighted buoy No. 2 (9° 21′ 25″ N.) marks the Southern limit of the anchorage area. No vessel shall pass this line without having been passed by the boarding officer and without having a Canal Pilot on board.

(b) Gatun Lake anchorage basin. An area immediately East of the Canal channel line, bounded by a line extending to a point 450 yd., 120° true from the East wing-wall at the South end of Gatun Locks, thence 690 yd., 148° true to flashing white lighted buoy "A" thence 700 yards, 070° true to flashing white lighted buoy "1" thence 1,130 yards, 148° true to quick flashing white lighted buoy "3" thence 2,800 yards, 224° true through fixed white lighted buoy "5" and black can buoy "7" to the Canal channel line at flashing white lighted buoy "9"; the channel prism being the Westerly boundary line of the anchorage area.

(c) *Pacific entrance merchant vessel anchorage.* An area bounded as follows: beginning at a point in position 8° 51′ 50″ N., 79° 30′ 00″ W., marked by a lighted whistle buoy which is painted with alternating black and white vertical stripes and which shows short-long flashing white light every 8 seconds, i.e. light 0.4 seconds, eclipse 0.4 seconds, light 1.6 seconds, eclipse 5.6 seconds; thence due East to Long. 79° 28′ 00″ W.; thence due North to Lat. 8° 54′ 31″ N., thence due West toward Flamenco Island Light to a point 8° 54′ 31″ N., 79° 30′ 46″ W.; thence S.W. touching the N.W. corner of San Jose Rock to position 8° 53′ 27″ N., 79° 31′ 23″ W., marked by canal-entrance lighted buoy No. 2, thence S.E. to the point of beginning.

2. *Anchorage areas for ships loaded with hazardous cargoes.*

(a) *Atlantic end.* Area included in rectangle 1,000 yd. wide immediately South of West breakwater, starting at a point on West breakwater 1,000 yd. from West Breakwater Light and thence extending Westward 2,000 yd. along breakwater.

Cristobal: Grade "A" Explosives Anchorage (over 5 tons) and all LNG and LPG Tankers loaded or not Gas free.

Area bounded by:

Lat.	09° 24′ 40″ N.	Long.	79° 57′ 00″ W.
Lat.	09° 24′ 40″ N.	Long.	79° 56′ 29″ W.
Lat.	09° 23′ 53″ N.	Long.	79° 56′ 29″ W.
Lat.	09° 23′ 53″ N.	Long.	79° 57′ 00″ W.

(b) *Pacific end.* Area South of Naos Island bounded on the East by a line drawn South (True) from entrance gas buoy No. 1; on the South by a line drawn East (True) from Tortolita Island, and on the North and West by the curve of 30 ft. depth.

Vessels carrying explosive cargoes shall anchor in the explosive anchorage areas, on arrival at the Panama Canal, and there await instructions.

MAX. SIZE: N.B. The following paragraphs serve as an approximate guide to permitted size of vessel in transitting Canal, but Owners and Operators should always seek official clarification and ruling from: The Marine Director's Office, Panama Canal Commission, APO, Miami 34011, U.S.A.

MARINE DIRECTOR'S NOTICE TO SHIPPING AGENTS No. 27-76
SUBJECT: Size and Draft Limitations of Vessels
REFERENCE: (a) Marine Director's Notice to Shipping Agents No. 1-75 dated January 17, 1975.
ENCLOSURES: (1) Bilge radius versus safe draft.
(2) Bilge information needed prior to initial transit.

1. Reference (a) is cancelled.
2. *Definitions.*

TFW: Tropical fresh water of Gatun Lake, density 0.9954 gm/cc at 85°F. (Transition to fresh water frequently alters the trim of large vessels 3 in. to 4 in. by the head.)

Published TFW maximum draft: Deepest point of immersion in Gatun Lake waters as promulgated by the Marine Director because of Gatun Lake level or by limitations deemed necessary because of restrictions in the Canal.

Maximum authorised transit draft: Deepest point of immersion in TFW of a particular vessel permitted at anytime, Gatun Lake level and Canal restrictions permitting.

Commercial Vessel: A self-propelled vessel other than a naval, military or other public vessel.

Integrated tug-barge combination: A barge that is specifically configured to receive a tugboat and with the tug, becomes, in effect, a single self-propelled unit.

Non-self-propelled vessel: A vessel which either does not have an installed means of propulsion, or has an installed means of propulsion which is not functioning during transit.

Barge: A flat-bottomed vessel of full body and heavy construction without installed means of propulsion.

3. *Maximum authorised transit draft* of vessels with draft in excess of 35 ft. 06 in.

Prior to the initial transit of a vessel whose transit draft will exceed 35 ft. 06 in., Owners, Operators, or Agents must supply in full the information required in enclosure (2) and request the maximum authorised transit draft for the vessel (deepest point of immersion TFW) from Port Captain, Balboa or Port Captain, Cristobal, depending on the arrival port, not later than 2 weeks prior to loading of the vessel. This request will be returned with the approved maximum authorised transit draft stamped thereon.

4. *Draft during initial transit.*

The initial transit is permitted at the maximum authorised transit draft. After the initial transit, unless the vessel's Agent or Owner is notified of any restrictions imposed by Canal authorities, this maximum authorised transit draft will remain in effect.

5. *Minimum transit drafts, measured in salt water.*

All vessels transiting the Canal should have sufficient ballast to permit safe handling during transit. The following are minimum salt water drafts for ships anticipating transit.

Length	*Minimum Drafts*
Up to 425 ft.	–Trimmed so Pilot can see the ranges over the forecastle from centre of navigation bridge
Over 425 ft.	– 8 ft. forward, 14 ft. aft, TSW
Over 475 ft.	– 18 ft. forward, 20 ft. aft, TSW
Over 525 ft.	– 20 ft. forward, 22 ft. aft, TSW
Over 580 ft.	– 22 ft. forward, 24 ft. aft, TSW
Over 625 ft.	– 24 ft. forward, 26 ft. aft, TSW

Drag must not adversely affect manoeuvrability.

6. *Maximum length.*

a. The maximum length overall including bulbous bow for a commercial vessel acceptable for regular transit is 900 ft., except passenger and container ships may be 950 ft. overall.

b. The maximum length for integrated tug-barge combination acceptable for regular transit is 900 ft. overall including tug. Tug-barge combination must transit together as one unit with the tug supplying the propelling power.

c. The maximum aggregate overall length for non-self-propelled vessels acceptable for transit is 850 ft. including accompanying tugs. Accompanying tugs must lock through with the non-self-propelled vessel.

7. *Maximum beam.*

a. The maximum extreme beam for a commercial vessel and the integrated tug-barge combination acceptable for regular transit is 106 ft.

b. Wider commercial vessels including integrated tug-barge combination up to an extreme beam of 107 ft. may be permitted to transit on a one-time delivery basis only with the deepest point of immersion not exceeding 37 ft. TFW.

c. The maximum extreme beam for non-self-propelled vessels (other than integrated tug-barge combinations) acceptable for transit is 100 ft.

8. *Previous Approvals and Delivery Transits.*

Vessels approved for regular transit prior to this Notice whose maximum beam or length slightly exceed the limits set forth in paragraphs 6 and 7 may continue to transit on a regular basis. After the date of this Notice approval will not be given for transit of other commercial vessels whose extreme beam exceeds 106 ft. by any amount except for vessels transiting on a one-time delivery basis.

9. *Release from liability.*

Masters of vessels will be required to execute a form undertaking to release the Panama Canal Commission from liability in case of accident and to indemnify the Commission for damages sustained in the following instances:

a. When a vessel transits at less than the minimum drafts in paragraph 5, has a list in excess of three degrees, or is so loaded or trimmed that manoeuvrability is adversely affected.

b. When a vessel transits on a one-time delivery basis with extreme beam exceeding 106 ft.

10. *Denial of transit.*

Vessels will be denied transit under the following circumstances:

a. When the vessel's maximum point of immersion exceeds its maximum authorised draft.

b. When the vessel's maximum point of immersion exceeds the published TFW maximum draft then in effect.

c. When the length overall including bulbous bow exceeds that stated in paragraph 6 above unless the vessel was approved for regular transit prior to this Notice.

d. When the extreme beam exceeds that stated in paragraph 7 above by any fractional amount however minor unless the vessel was approved for regular transit prior to the date of this Notice.

e. Unusual vessels requiring both lock lanes simultaneously.

11. *GENERAL.*

a. Vessels of 100 ft. beam and over whose list, trim or handling characteristics are such as to endanger themselves, Panama Canal appurtenances and/or a third party, may have such further limitations placed on them as Canal authorities deem necessary to ensure reasonable safety.

b. The draft of non-self-propelled barges 550 ft. or more in length may be limited, when in the opinion of Canal authorities, such limit is necessary to ensure reasonable safety.

c. Vessels may transit with deck cargo protruding over one side only not to exceed 15 ft., but the maximum beam, including protrusions must not exceed 85 ft.

d. Non-self-propelled vessels, other than integrated tug-barge combinations, will be accepted only on an individual basis; advance permission for initial transit as a non-self-propelled vessel is required. Displacement of these vessels is limited to 35,000 tons and the draft requirements of paragraph 5 are applicable. Riding crews must be provided in sufficient numbers, as required by the Port Captains, to safely handle towboat lines and boarding ladders, and to assist in mooring.

e. The numerous constraints affecting the transit schedules of vessels and tows make it important that information provided in advance of the initial transit of the vessel include a capacity plan, general arrangement plans, engine room plans, and whenever possible, a photostatic copy of national register, load line certificate and Panama

Canal tonnage certificate. This advance information will minimise the time spent aboard the vessel by Panama Canal officials before commencement of the initial transit.

Enclosure 1.

TABLE OF LIMITING DRAFTS DUE TO BILGE RADIUS CONTACTING CHAMBER BATTERS

(Allows for 6 in. thick rubber fenders on lock walls at batter locations).

	Radius of Turn of Bilge (feet)				
in.	1 ft.	2 ft.	3 ft.	4 ft.	5 ft.
0	35 ft. 08 in.	36 ft. 06 in.	37 ft. 04 in.	38 ft. 02 in.	39 ft. 00 in.
1	35 ft. 09 in.	35 ft. 07 in.	37 ft. 05 in.	38 ft. 03 in.	39 ft. 01 in.
2	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 04 in.	39 ft. 02 in.
3	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 05 in.	39 ft. 03 in.
4	35 ft. 11 in.	36 ft. 09 in.	37 ft. 07 in.	38 ft. 05 in.	39 ft. 03 in.
5	36 ft. 00 in.	36 ft. 10 in.	37 ft. 08 in.	38 ft. 06 in.	39 ft. 04 in.
6	36 ft. 01 in.	36 ft. 11 in.	37 ft. 09 in.	38 ft. 07 in.	39 ft. 05 in.
7	36 ft. 02 in.	37 ft. 00 in.	37 ft. 10 in.	38 ft. 08 in.	39 ft. 06 in.
8	36 ft. 03 in.	37 ft. 01 in.	37 ft. 11 in.	38 ft. 10 in.	
9	36 ft. 03 in.	37 ft. 01 in.	38 ft. 00 in.	38 ft. 10 in.	
10	36 ft. 04 in.	37 ft. 02 in.	38 ft. 00 in.	38 ft. 10 in.	
11	36 ft. 05 in.	37 ft. 03 in.	38 ft. 01 in.	38 ft. 11 in.	

Example: To find draft of ship having a radius-of-turn-of-bilge of 4 ft. 4 in. read across top of table to column headed 4 ft. thence down column opposite 4 in. – read 38 ft. 5 in.

Note: Dead Rise not included in above tabulations and must be added to above readings.

Enclosure 2.

INFORMATION NEEDED PRIOR TO INITIAL TRANSIT THROUGH THE PANAMA CANAL

Bilge Information

Name of vessel .... Date.................

Authorised Tropical Fresh Water Load Line ....

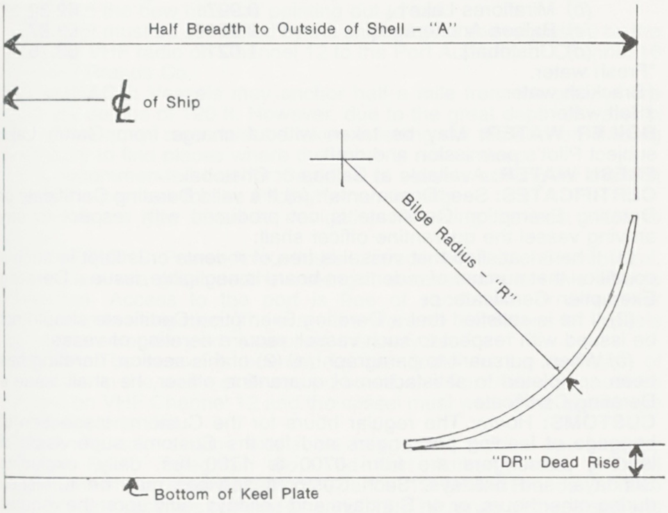
Admeasurer .... Certified as Correct..

Master – Owners – Agents

1) "A" – Half breadth of vessel to outside of shell ....

2) "R" – Radius of turn of bilge (ft. & in.) ....

3) "DR" – Dead rise at side of vessel (in.) ....



Notes:

1. The Panama Canal Commission is not responsible for damage to bilge keels resulting from transit through the locks.
2. On an off centre lockage with the vessel touching the lock wall, the turn of the bilge will clear the lock-wall batters at the most critical point as shown in Enclosure (1).

HEALTH: Application for radio pratique is available to all vessels arriving in Panama Canal waters. Radio pratique is a quarantine clearance by radio, based upon information from the vessel prior to its arrival at Balboa or Cristobal and past experience with the vessel and its personnel. A limited number of vessels will be sampled for compliance with the required standards of health and sanitation on board. The sampling will generally be done on a random basis and will provide a measure of the success of the programme.

It should be emphasised that radio pratique applies only to the quarantine section of the required forms and documents for the Panama Canal. All vessels must still complete the required boarding forms, and in most cases, be prepared to receive the Panama Canal Boarding Inspector on arrival in Canal waters. Such forms as crew and passenger lists, ship's information forms, and the cargo declaration must always be completed for presentation to the Panama Canal officials.

Attached is a listing of the items to be reported prior to arrival in the Canal waters. The information is similar to that now required of vessels requesting radio pratique in U.S. ports. In addition, there are some special circumstances that make additional information necessary.

The manner of reporting the information required should be clear and orderly as specified in 35 CFR, section 123.4, listing information required in advance. The request for radio pratique should originate from the Master and can be submitted directly by radio or through the vessel's local Agent. The local Agent should submit his request with all the required information to the Admeasurement Office at the port of arrival of the vessel. The local Agent will be notified when radio pratique is granted or refused and the Agent will communicate this information to the ship.

It is hoped that vessels will take advantage of radio pratique when arriving for transit and that in as many instances as possible it may be able to grant this time saving privilege.

Radio Pratique Programme

1. *General*

(a) The granting of radio pratique is an Office of Health and Safety responsibility designated to the Industry and Health Division. (35 CFR 61.264) see below.

§61.264 Radio Pratique; vessels only.

The Quarantine Officer in charge may grant pratique by radio to a vessel upon the basis of information regarding the vessel, its cargo and persons aboard, received prior to arrival of the vessel, when in his judgement, and in accordance with instructions by the Chief, Industrial and Health Division, the entry of the vessel will not result in the introduction, transmission or spread of communicable diseases.

(b) In order to process the details of this programme more expeditiously, communication may be held between the quarantine offices and the ship's Steamship Agent representing the vessel hereinafter called local Agent.

(c) All vessels coming to the Panama Canal may request radio pratique by means of the ETA radio message or through the ship's local Agent.

(d) Requests for radio pratique may be submitted to the Admeasurement Office at the port of arrival at least 24 hours and not more than 48 hours before vessel is scheduled to arrive.

2. *Specific Requirement for Each Voyage*

(a) The vessel will be maintained free from rats and vermin.

(b) The Derating Certificate or Derating Exemption Certificate must be valid (i.e. date of issue not more than 180 days prior to date of arrival at the Panama Canal).

(c) Vessels arriving within 15 days from the ports designated in the Aedes Aegypti Indices Bulletins must be disinfected with the aerosol described in the Aedes Aegypti Indices Bulletin No. 8, 1970.

(d) The restrictions imposed in 61.281 through 61.302, "Importation of Certain Things", Title 35 CFR, must be strictly adhered to and followed.

3. *Action taken by the Quarantine Officer in Charge**

(a) Radio pratique *may* be granted by the Admeasurement Office upon request from the vessel or through the ship's local Agent representing the vessel provided it is documented by ship's radio.

(1) If the information requested in the Appendix hereto is complete; *and,*

(2) If the Quarantine Officer in charge* is of the opinion that the vessel is reasonably free from any condition either from a health or sanitation standpoint that might introduce illness into the Canal.

(b) Radio pratique may be denied by the Quarantine Officer in charge:

(1) If the requested information is incomplete; or,

(2) If the Quarantine Officer in charge* feels that medical or sanitary reasons prevail requiring careful inspection upon arrival of the vessel.

*Or designated representative.

4. *For Sampling and Surveillance of Compliance Purposes*

After the information supplied by the Shipmaster has been reviewed the Quarantine Officer in charge* will advise the ship's local Agent concerned whether radio pratique has been granted or denied and if any restrictions or limitations have been imposed. He will also inform the Marine Traffic Controller, and the Immigration and Customs office whether radio pratique has been granted or denied.

*Or designated representative.

5. *Action taken by Ship's Local Agent*

(a) The ship's local Agent may submit requests for radio pratique to the Admeasurement Office if the vessel has not done so by radio. The information required is listed in the Appendix hereto. Such requests should be submitted, properly documented by ship's radio, not later than 24 hours before the vessel is scheduled to arrive nor earlier than 48 hours before the expected arrival of the vessel.

(b) The ship's local Agent will advise the vessel which he represents whether radio pratique has been granted or denied; and any restrictions or limitation imposed.

6. *Action taken by Panama Canal Commission Boarding Inspectors*

On vessels that have been granted radio pratique, the Panama Canal Commission Boarding Inspector will:

(a) Ascertain that the Ship's Master has completed the Ship's Information and Quarantine Declaration (Form 4398) *except* the "quarantine data" portion at the bottom of the form; and,

(b) Otherwise process the vessel (e.g. for Admeasurement, and any other non-quarantine requirements) without any further questioning on quarantine matters. This processing may be either in the bay or at the dockside at the discretion of the Admeasurer Watch Supervisor. Passengers that are disembarking from vessels may be processed by the Immigration Service at the docks.

(c) Vessels that are denied radio pratique or have failed to request radio pratique, will be cleared through Quarantine by the Panama Canal Commission Boarding Inspector in the prescribed routine manner.

7. *Action taken by Shipmasters*

(a) Shipmasters should request radio pratique directly by radio or through the Agent representing them in the Panama Canal and supply the information requested in the Appendix hereto.

(b) Shipmasters should take cognizance of the requirements listed in paragraph 2, "Specific requirement for each voyage", above.

(1) If granted radio pratique, they may enter the anchorage area flying the quarantine flag; they must however comply with any restrictions or limitations imposed by the Quarantine Officer in Charge.

(2) Unless the boarding of docking vessels is scheduled to take place at the pier, vessels *must* await boarding by a representative of the Panama Canal authority.

(3) If denied radio pratique, vessels must be cleared for Quarantine in the prescribed routine manner; that is enter the Canal waters flying the quarantine flag and must await processing by the Panama Canal Commission Boarding Inspector.

(4) It is important that the Shipmasters remember that in all instances all forms regularly required are to be completed prior to arrival for presentation to the Boarding Inspector.

Appendix

Information required by Quarantine Officer in Charge from Shipmaster requesting radio pratique through ship Agency representing him at the Panama Canal.

Full name of vessel.

Country of registry.

International radio call letters.

Estimated date of arrival and port.

Whether docking at Balboa or Cristobal and reason therefor.

List of ports of call within past *15* days prior arrival.

Report any illness or communicable diseases on board.

Report any death occurring on board since departure from last port and cause, if known or suspected.

Report the number of smallpox vaccinations required.

Report the number of passengers to be disembarked and port of disembarking (e.g. Cristobal or Balboa).

Report the date of the Derating Certificate or Derating Exemption Certificate.

Record the number, kind, and origin of all animals aboard and if any are scheduled for disembarking.

Report the origin or source of the meat in the ship's stores.

Only vessels in the following categories need still be subject to "on board" public health clearance upon arrival:

A. Vessels which, during the 15 days prior to arrival in the Canal ports, have or have had on board passenger or crews with any of the following conditions or symptoms of illness:

1. Temperature of 100° F (38° C) or greater *(a)* which persisted for 2 days or more: or *(b)* which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*
2. *Prolonged diarrhoea* (lasting 1 full day or more).

B. Occurrence of death on board for any reason.

C. Vessels which have been in a country infected with smallpox during the 15 days prior to arrival in the Canal.

D. Vessels which have been in a country infected with plague in the 60 days prior to arrival in the Canal.

RADIO: Balboa Naval Radio NBA.

1. *Signal Stations:* (a) Visual-signal stations established for communication on arrival Canal approaches by International Code and/or flashing light, at seaward end of Pier 6 Cristobal, and on Flamenco Island at Pacific entrance.

(b) Flamenco Island and Cristobal Signal Station also contactable on VHF Channel 12 frequency 156.6 Mc/s., and R/T 2182, 2638 and 2846 kc/s. – call letters WHC.

(c) Vessels of 85 ft. beam and above awaiting transit at Balboa anchorage should keep VHF radio watch on Channel 12 for transit orders.

(d) Arriving ships may communicate with Port Captain's Office, Cristobal through Cristobal Signal Station Radio communication is maintained on international maritime VHF Channel 12 (156.6 Mc/s.) through "Cristobal Radio".

2. *Advance information required by radio from vessels approaching Canal:* Vessels approaching Canal should communicate by radio to the Port Captain, through Balboa Radio Station, call letters NBA, at least 48 hours in advance of arrival in Canal, the information required below. If radio communication can be established earlier than 48 hours in advance of arrival, required information should be furnished at time such communication is first practicable.

(a) All items of information listed below, unless previously communicated through Agents or otherwise to Canal authorities, shall be transmitted to Port Captain using phonetic alphabet letters to identify items, as follows:

ALFA – The Panama Canal Identification Number of the vessel.

BRAVO – Estimated date and time of arrival, port of arrival and request for Canal transit if desired.

CHARLIE – Estimated draft upon arrival, in feet and inches (fore and aft).

DELTA – Any changes in the vessel's name, country of registry, structure, or use of tanks that have occurred since the vessel last called in the Canal waters.

ECHO – Will the vessel dock at Balboa or Cristobal? What is the reason for docking? If it is for cargo operations, fuel or water, give the tonnage involved in each case. Is there any other reason the vessel will not be ready to transit upon arrival? What is the reason?

FOXTROT – The nature and tonnage of any deck cargo.

GOLF – If the vessel is a tanker, state names and grades of cargo carried. State names and grades of the cargo last carried in each empty tank which is not gas free.

HOTEL – If the vessel is carrying explosives as cargo, state the grade of each explosive and the amount, in tons of each grade.

INDIA – Quarantine and immigration information:

(1) Is radio pratique desired?

(2) State the ports at which the vessel has called within 15 days preceding its arrival at the Canal.

(3) State all cases of communicable disease aboard and the nature of the disease or diseases, if known.

(4) The number of deaths which have occurred since departure from the last port and the cause of each death, if known.

(5) The number of smallpox vaccinations required.

(6) The number of passengers disembarking and their port of disembarkation.

(7) The number of ports of origin of any stowaway and a brief description of the identity papers of each stowaway.

(8) The number, kind and country of origin of any animals aboard. Are any animals to be landed?

(9) The country of origin of all meat, whether carried as cargo or as ship's stores.

(10) Has the vessel called at a port in any country, infected with foot-and-mouth disease or rinderpest during its present voyage? Countries considered to be infected are:

(a) All countries East of the 30th Meridian West longitude and West of the International Date Line except Australia, Channel Islands, Fiji, Greenland, Iceland, Japan, New Zealand, Northern Ireland, Norway, Republic of Ireland.

(b) All countries of South America;

(c) Curacao (the leeward islands of the Netherlands Antilles);

(d) Cuba;

(e) Martinique;

(f) Guadaloupe.

(11) Specify whether the vessel has a valid Derating Certificate or a Derating Exemption Certificate issued 180 days prior to arrival.

The following additional information shall be transmitted via radio to the Port Captain from all vessels as applicable:

(1) Vessels approaching from the Pacific shall report actual time of passing Cape Mala, or the latitude of Cape Mala, and the vessel's speed.

(2) Vessels approaching from the Atlantic shall report 12 hours prior to arrival at Cristobal any change of 1 hour or more in the expected time of arrival.

(3) Any other matters of importance and interest.

Timely receipt of the above information will facilitate the transit or docking of arriving vessels. Failure to comply with these reporting requirements may subject a vessel to delay since vessels which do comply will receive priority of service and handling over those which do not.

DENSITY: On several occasions vessels arriving for transit have been found to be over authorised draft after entering Gatun Lake. Overdrafts in these instances have been caused, it is believed, by assuming fresh water densities different from what actually exists in Canal.

Using distilled water as 1.000 at 3.98° C, water densities have been determined to be as follows:

	Density	
Location	*Gm./cc. 85° F*	*Lbs./ft^3 85° F*
(a) Gatun Lake*	0.9954	62.21
(b) Miraflores Lake†	0.9971	62.32
(c) Balboa Anchorage‡	1.0219	63.87
(d) Cristobal‡	1.0212	63.76

*Fresh water.

†Brackish water.

‡Salt water.

BOILER WATER: May be taken without charge from Gatun Lake subject Pilot's permission and draft.

FRESH WATER: Available at Balboa or Cristobal.

CERTIFICATES: See "Documents". *(a)* If a valid Derating Certificate or Derating Exemption Certificate is not produced with respect to any arriving vessel the quarantine officer shall:

(1) If he is satisfied that vessel is free of rodents or is kept in such a condition that number of rodents on board is negligible, issue a Derating Exemption Certificate; or

(2) If he is satisfied that a Derating Exemption Certificate should not be issued with respect to such vessel, require derating of vessel.

(b) When, pursuant to paragraph *(a)* (2) of this section, derating has been completed to satisfaction of quarantine officer, he shall issue a Derating Certificate.

CUSTOMS: Hours: The regular hours for the Customs inspection of baggage of landing passengers and for the Customs supervision of landing passengers are from 0700 to 1700 hrs. daily, excluding Sundays, and holidays. Such Customs services may be furnished during other hours, or on Sundays and holidays, only upon the request of the Master or authorised Agent.

Allowances: Tobacco, Wine and/or Spirits at Master's discretion sufficient for immediate consumption. Alcohol not permitted to be taken ashore.

CONSULS:

Norway: Royal Norwegian Consulate General: Consul General for Panama, R. P., Terence O. Ford, Office: 28–25–2347.
Residence: 28–24–1884.

Norwegian Consul, Cristobal, G. R. Morland, Fenton Bldg. 45–1155.

Norwegian Consul for Balboa, Arne Hauge, Office 52–5053.

Republic of South Africa: Consul for the Republic of South Africa, Henry I. Darlington, Office: 28–23–0834.
Residence: 28–23–6779.

Sweden: Royal Swedish Consulate General, Edificio Melinda, Via Argentina, Panama 28–23–9694.

Denmark: Royal Danish Consulate General, Consul General for Panama.
Residence: 45–1155.

Royal Danish Consulate for Colon and Cristobal.
Residence: 3–2361.

REPATRIATION: Crew members may be discharged only with consent of the Immigration Service. Before such consent may be given, the Chief Immigration Inspector at port concerned shall be furnished a memorandum in triplicate showing name, age, nationality, and rating of the crew members proposed to be discharged.

When crew members are signed on a vessel, a memorandum in triplicate showing name, age, nationality, and rating of crew members signed on shall be furnished to Chief Immigration Inspector at the port concerned.

Arriving crew members and particularly visiting Superintendents should if possible possess Panamanian visas.

AIRPORT: Tocumen International Airport located outside Panama City. 18 miles from Balboa; 48 miles from Cristobal, served by all major scheduled international airlines operating in Southern hemisphere.

HOLIDAYS: January 1st; January 9th; Good Friday; Carnival Tuesday (day before Ash Wednesday); May 1st; August 15th (Pacific side only); October 11th; November 3rd; November 5th (Atlantic side only); December 8th; December 25th.
TIME: EST. No alterations to clocks necessary throughout the year.
LOCKS: Gatun Locks (Atlantic side) raise and lower vessels 85 ft., Miraflores (nearest to Pacific) 54 ft. and Pedro Miguel (Pacific side) 31 ft.
AUTHORITY: Panama Canal Commission.

AGENT: See "Cristobal".

PUERTO ARMUELLES (Chiriqui): 08.17 N. 82.52 W. (See Plan Book)

SECTION A: GENERAL CARGO PORT.
SECTION B: OIL TERMINAL.

SECTION A: GENERAL CARGO PORT.

LOCATION: Puerto Armuelles is located on the Pacific coast of the Republic of Panama.

Puerto Armuelles is a port solely used for the export of bananas, is operated by United Brands Co., and administered by the National Port Authority of Panama.
DOCUMENTS: Same documents and the same procedure as Almirante.
PILOTAGE: United Brands Company has a Pilot who is available 24 hours of the day. Pilotage consists in mooring the vessel at the quay from the anchorage, for which the vessel must position a ladder on the port side. The pilot launch is white and has no VHF radio. The mooring operation is fairly complicated and United Brands provide a gang of men who board the vessel and manipulate the cables used in the mooring process. Mooring at the quay is always done on the starboard side of the vessel and the bow must be pointing out to sea.

The Pilot must be contacted by the ship's Agent and requested by the vessel by VHF radio on Channel 12 to the Port Authority or Channel 16 to United Brands Co.
ANCHORAGE: Vessels may anchor half a mile from the pier, where there are depths of 120 ft. However, due to the great depth of water in front of the quay, care must be taken in letting out the anchor, it being necessary to find places where the water is not so deep.

It is recommended that for Captains of vessels arriving for the first time in the port ask for the Pilot when anchoring.

There is no type of aid to navigation indicating the best place to anchor.
RESTRICTIONS: Puerto Armuelles is located in the Bay of Charco Azul, where there are great depths making it unnecessary to have aids to navigation. Access to the port is free of sandbanks or any other obstruction to navigation. There are therefore no restrictions for vessels wishing to enter the port, except on the quay itself.
HEALTH: The vessel is boarded by the doctor in the operation of clearance. In the event of illness on board, the Port Authority must be advised on VHF Channel 12 and the vessel must wait at the anchorage for the doctor's visit.
RADIO: A radio service exists via telegraphic cables operated by Tropical Radio Telegraph Co. The Port Authority has VHF/FM equipment which receives calls on Channel 12. United Brands Co. also has VHF and receives calls on Channel 16. The range of these stations is 50 nautical miles. The Port Authority also has SSB equipment which takes calls on frequency 7447.5 kHz.
TUGS: None available.
BERTHING: The quay consists of a pier with a single berth 137 m. long and 40 ft. minimum depth. Vessels must moor on the starboard side.

The quay has 4 banana loaders with a loading capacity of 42 boxes of bananas per minute, each weighing 42 pounds. There is no other type of loading equipment.

Since the quay is located in a position open to the sea a set of 3 mooring buoys is used to keep vessels away from the N.E. side of the pier.
STEVEDORES: Loading and discharging work is carried out by the Union of Port Workers. The vessel's Agent must contract the services of the workers via United Brands Co.
FRESH WATER: Supplied at the rate of 2 t.p.h.
FUEL: Diesel fuel can be supplied by pipe-line from the pier.
REPAIRS: No facilities available.
PROVISIONS: Can be obtained locally or in the town of David 100 kms. away.
TIME: GMT less five hours.
CONSULS: Costa Rica, Nicaragua, Colombia.
MEDICAL: There is a modern hospital in Armuelles.
POLICE/AMBULANCE/FIRE: Available in Armuelles.
CUSTOMS ALLOWANCES: See "Almirante".
TELEPHONE: Micro-wave connects Armuelles with any country in America or Europe. No facilities for telephones on board vessels.
OPENING/CLOSING HATCHES: Carried out by port workers.
DENSITY: 1.0219 gm/c.c. at 85°F.
SHORE LEAVE: No restrictions.
REPATRIATION: Can be effected without difficulty.
AIRPORT: Armuelles has a small airstrip for light aircraft. However, the town of David 100 kms. away by road from Armuelles has a larger airport. There are 2 daily flights by local commercial lines between David and the airport of Tocumen in Panama; thus repatriation can be effected without difficulties.

SHIPMASTER'S REPORT: February 1979.
Documents: Same as for "Almirante", and if no cargo to land at this port, 6 copies of a "Nil" declaration.
Pilotage: Arranged through Agent. Pilot and mooring gang board 0.75 miles East of pierhead by port accommodation ladder, from an old ship's lifeboat painted white.
Anchorage: 1 mile East of pierhead in depths of 30 fathoms or more. Bottom is very steep-to, in less depth vessel can be too close to shallow water. Recommend U.S. Chart 21581, 'Ports and Anchorages S. Coast of Panama' be obtained.
Restrictions: Almost none, depth alongside over 40 ft., breadth is no restriction, berthing face is about 550 ft. long, but vessels up to about 680 ft. long could be berthed, bows projecting from pier.
Health: Pratique given by doctor on arrival. If any suspected disease, vessel should advise Agent by radio beforehand. Meat products which are not usually acceptable to U.S.D.A., are generally sealed up as in U.S. Ports.
Radio: Balbao Radio.
VHF: Channel 16 for Pilot.
Tugs: None.
Berthing: Pier about 2,000 ft. long, lies in South-easterly direction from the shore line, vessel berths starboard side alongside on the N.E. face, seaward end.

Three buoys are moored 250/300 ft. off the berth and are used to hold off the pier, the vessel being moored about 10 ft. off at all times due to swell. Port anchor is let go approaching the berth and ship's lines used to position vessel, then very heavy mooring springs are secured, 4 at each end. Ship's lines remain on buoys for holding off. On sailing Pilot does not board, only berthing gang who leave by accommodation ladder to boat after vessel is off the berth.
Fuel: Not available.
Fresh Water: Piped to pier, ample hydrants, charge U.S. $150.00 irrespective of amount taken.
Repairs: Workshop and electrical repairs can be undertaken by arrangement.
Fresh Provisions: Available.
Time: GMT minus 5 hours.
Medical: All facilities available.
Customs Allowance: No restrictions as long as nothing landed, bond is sealed on arrival.
Opening/Closing Hatches: Ship's crew. For banana loading starboard side elevator hatches only.
Shore Leave: No restrictions.
Operators: Chiriqui Land Company.

AUTHORITY: National Port Authority.

SECTION B. OIL TERMINAL.

OPERATORS: Petroterminal de Panama, S.A., Apartado 26, Puerto Armuelles. Telex: 368350 (PETROPA). Tel: 5-7261, 5-7246, 5-7200 and 5-7252.
LOCATION: The PTP transhipment Terminal is located on the Western side of Bahia de Charco Azul in position 8° 12.5′ North, 82° 53′ West, on the Eastern side of the Burica Peninsula, approximately 3.5 miles South of Puerto Armuelles.
DOCUMENTS: The following documents are required for entry and clearance:

Crew List (12 Copies).
Stores List (12 Copies).
Medicines and Narcotics List.
Passenger List (12 Copies) (Nil return required).
Cargo Manifest (12 Copies) (Nil return required).
Vaccination List (12 Copies).
Health Declaration (12 Copies).
Clearance from last port (2 if possible).

PILOTAGE: Pilotage to and from the Terminal Jetties is compulsory. Pilotage and towage services are available on a 24 hours basis and supplied by the Terminal on the terms set out in the Terminal's Pilotage/Towage Contract, which must be signed by all Masters.

Three tugs of more than 4,200 h.p. are available and usually will make fast alongside. Tug's lines are used for making fast to vessel.
Pilot Station: For discharging vessels, the pilot station is 3.5 miles S.E. of Jetty No. 2. For loading vessels, the pilot station is 3 miles East of Jetty No. 1.

Ships should make a lee for the Pilot and the ladder should conform to normal international standards. Discharging vessels should place the ladder on the port side when on Northerly heading. Loading vessels should place ladder on the starboard side when on a Westerly heading.

Vessels with a freeboard of 30 feet or more shall provide suitable accommodation ladder, in addition to pilot ladder.
APPROACHES: Approaches to the Terminal are from the South to the S.E. (See Plans).
Lights:
1. Isla Burica 08° 01.5′ North, 82° 52.5′ West (approx.), this light is now operated by solar panel/batteries and has twin lanterns in same structure. Visible 12 miles.
2. Puerto Armuelles (Banana Pier) 08° 16′ North, 82° 52′ West. An occulting light is exhibited from the head of the pier.
3. At the Terminal, flashing lights are exhibited from the extremities of the berths.

No. 1 Berth: Flashing red every second.
No. 2 Berth: Flashing red every second.
No. 3 Berth: Flashing white every second.

ANCHORAGE: The area immediately to the East of the Terminal is very deep.

The North East area of the Bahia Charco Azul is believed to be the appropriate area to anchor. Insufficient detail is known about the location to make recommendations, but the holding ground is reported to be good.

Radio contact should be maintained with the Terminal via VHF Ch. 16.

MAX. SIZE: 265,000 d.w.t.

HEALTH: In accordance with standard international practice, ships are required to display International Code Signals for vessels requiring free pratique and these should be displayed until pratique has been granted.

N.B. The Autoridad Portuario Nacional (A.P.N.) permits employees of P.T.P. to board vessels (before the ship receives free pratique) for the purposes of setting loading arms. Discharge of ballast may commence in case of a vessel with ballast. Discharge of cargo *is not* permitted. Employees of P.T.P. are not permitted in ship's accommodation areas before clearance.

RADIO: *Notices/Time of Arrival:*

Eta's:

All communications should be in local time. ETA's should be received by the Terminal at least 72 hours prior to arrival and any variation of more than 4 hours should be advised.

ETA's should be sent via ship's Agents who will notify the Terminal. The ETA cables should include the following:

1. Name of vessel.
2. ETA Puerto Armuelles.
3. Draft on arrival, fore and aft.
4. For discharging vessels: B/L, gross and net barrels of oil to nearest barrel.
   For loading vessels: ballast for discharge ashore to nearest 1,000 barrels.
5. Any conditions which will effect loading or unloading operations.
6. Deviations from the recommended deck fittings. (See "Berthing/Loading").
7. Water request, if any.

Notice of Readiness: Notice of readiness is considered to be received by the Terminal if either:

1. Vessel tenders the Notice of Readiness to load or discharge upon arrival at the Pilot Station.

2. When a berth is not available and a vessel elects not to close the port, it may tender its Notice of Readiness at a distance of 15 miles from the Terminal. In this case notice is considered received at this time *plus 2 hours.*

VHF: Vessels approaching the Terminal should establish VHF communication as soon as they are within range (about 50 miles).

The Terminal keeps a listening watch on Channel 16; call sign "Petroterminal Control" or "Control". Vessels which have to lay-off the Terminal should maintain a listening watch on Channel 16.

The Terminal also uses Channels 11, 12, 13, 14.

The Terminal tug boats and line handling boats are also equipped with Channels 11, 12, 13 and 14.

The Terminal radio monitors Channels 11, 13, 14, 16 at all times. Other Channels are also available.

TUGS: See "Pilotage".

BERTHING/LOADING:

A. Mooring & Connecting

1. *Mooring Pattern:* At both Berth No. 1 and No. 2 the normal mooring pattern will be:

FORWARD	AFT
3 Headlines	3 Stern Lines
3 Breast Lines	3 Breast Lines
2 Spring Lines	2 Spring Lines

Discharging vessels will normally berth with port side to Berth No. 1. Loading vessels will normally berth port side to No. 1 or No. 3, and starboard side to No. 2 berth. Any variation will be advised by the Berthing Master and Masters should advise any preference prior to arrival. *Mixed moorings are undesirable,* e.g. a wire and fibre rope in parallel service is undesirable due to unequal elasticity. All moorings must be arranged so that loss of effect cannot occur when slacking off or heaving in on one line, as required, due to the rise or fall of the vessel during loading or discharge operations. It is imperative that spring lines be adequate to maintain a minimum fore and aft movement of the vessel to remain within the limitation of movement of the loading arms.

Wire ropes may be used and are preferred for spring lines.

Flow Rates: Terminal can receive crude oil at 100,000 b.p.h. or more. Terminal can receive ballast water at 30,000 b.p.h. or more. Discharge pressure of 125 p.s.i.g. at ship's rail is permitted. The crude oil loading rate is 48,000 b.p.h. by pumping. Higher rates can be given on request.

In the event of a vessel requesting a shore-stop, Masters should understand that Petroterminal accepts no responsibility for any errors in quantity.

Loading Arm Connections: (See also Section B and C below).

a. Preferred connections for discharging vessels are 4 each 16 in. ANSI 150# flanges on the port side.

Standard flanges are required.

(1) Non-standard flange thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 in. of straight pipe (free of supports, lugs, or reducer) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 10 ft.-10 ft.-10 ft. or less between centres. In no case can the distance be less than 5 ft 3 ins., 3 ft. 7 ins., 5 ft. 3 ins.

b. Preferred connections for loading vessels are 4 each 12 ins. ANSI 150# flanges on the starboard side.

(1) *Standard flanges are required.* Non-standard flanges thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 ins. of straight pipe (free of supports, lugs, or reducers) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 10 ft.-10 ft.-10 ft. or less between centres. In no case can the distance be less than 5 ft. 3 ins., 3 ft. 7 ins., 5 ft. 3 ins.

B. Berth No. 1 (See Plan).

Berth No. 1 is designed for discharging or loading vessels of 28,000 to 265,000 d.w.t., without draft limitation. Least depth alongside is 80 ft. Jetty head is connected to shore by trestle.

Gangway: Hydraulically operated telescoping gangway from loading platform to ships deck is provided.

Loading Arms: Four Mannesmann 16 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 16 in., 14 in. and 12 in. standard flanges. All arms are capable of transfer of crude oil and ballast water.

Crane: A 1 ton capacity crane for handling of supplies, etc., is installed.

Breasting Dolphins: Four single steel tube breasting dolphins equipped with pivoting timber-faced fenders are installed. The two outer dolphins are spaced approximately 380 ft. apart and are equipped with double quick release hooks and power capstans. The two inner dolphins are spaced approximately 260 ft. apart and are similarly equipped.

Mooring Dolphins: There are four mooring dolphins. All are equipped with 3 quick release hooks and power capstans.

C. Berth No. 2 (See Plan).

Berth No. 2 is designed for discharging or loading vessels of 28,000-90,000 d.w.t. without draft restriction. Least depth alongside is 55 ft. Jetty head is connected to shore by a trestle.

Gangway: A hydraulically operated telescoping gangway from loading platform to ship's deck is installed.

Vessels with amidships houses are sometimes better off berthing port side to if their house is in the gangway landing area. Check berth measurements first.

Loading Arms: Four Mannesmann 12 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 12 in., 10 in. and 8 in. standard flanges.

Crane: A 1 ton hydraulic crane for supplies, etc., in installed.

Breasting Dolphins: Two single steel tube breasting dolphins equipped with pivoting timber faced fenders are installed. The distance between dolphins is 260 ft. Each dolphin is equipped with two quick release hooks and a powered capstan.

Mooring Dolphins: There are four mooring dolphins, all are equipped with 3 quick release hooks and power capstans.

D. Berth No. 3 Platform (See Plan).

Designed for loading vessels up to 60,000 d.w.t. without draft restriction. Least depth alongside 50 ft. Jetty is connected to shore by submarine line only.

Loading Arms: Three Mannesmann 12 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 12 in., 10 in. and 8 in. standard flanges.

Gangway: A hydraulic gangway is provided.

Crane: A 1 ton capacity crane for handling supplies is fitted.

Breasting Dolphins: Two breasting dolphins are spaced 200 ft. apart fitted with pivoting timber faced fenders.

Mooring Dolphins: Four mooring dolphins equipped with two quick release hooks remotely controlled from the loading platform

Inert Gas: Per User's (Sohio) request: Inert gas vessels will not be requested to depressure for ullaging or sampling unless there is reason to suspect an error.

THERE ARE NO CHECK VALVES IN THE TERMINAL PIPELINES AT THIS TIME – PLEASE CHECK PROCEDURES PRIOR TO COMMENCEMENT OF OPERATIONS.

BALLAST: *The discharge overboard of dirty ballast water is PROHIBITED.* All ballast water shall be pumped ashore unless it is carried in segregated ballast tanks and is free of oil.

The Terminal has 3×120,000 bbl. tanks for the reception of dirty ballast water. Ballast water which has been chemically treated must remain on board. Ship will advise the Terminal of the quantity of ballast to be discharged ashore prior to commencement of discharge.

Crude Oil Washing: Crude Oil Washing is, in general, prohibited. Exceptions can be made only if:

1. In the opinion of the Terminal Representative, no delays to other vessels will occur.

2. Terminal user (e.g. Sohio, Arco and Exxon) requests this service.

MEDICAL: Doctor will only board vessel in cases of emergency. There are limited medical and dental services available. Treatment should, when possible, be arranged via Ship's Agent in advance.

FRESH WATER: Fresh water can be supplied, as available, via the Jetty connections. Prior notice is requested. Maximum delivery is 200 tons.

FUEL: There are no bunkers available.

EARLY DEPARTURE PROCEDURE: All vessels are requested to use an Early Departure Procedure. (E.D.P.).

(A). If the Master of a vessel consents to use the E.D.P. it will be implemented in the following manner:

1. The Master will sign a letter agreeing to the use of E.D.P.
2. The cargo documents and other relevant forms will be placed aboard the vessel.
3. On completion of loading, the vessel's tanks will be gauged by the vessels appointed cargo inspector, whose inspection is expected to be completed prior to sailing.
4. The vessel will sail.
5. The Terminal will transmit Bill of Lading figures to the vessel by VHF radio. The cargo documents are to be completed by the Master.
6. Written confirmation of these figures will be provided by the vessel's Agent in the Canal.

(B). If the Master of a vessel does not agree to use E.D.P. the vessel will be unberthed immediately after loading and should proceed to the pilot station. Terminal's Representative will bring papers by launch or tug.

(C). Vessels will be requested to unberth once loading arms have been disconnected regardless of the time set on the sailing board. A terminal launch will be available for returning crew to vessel.

INSPECTION: *Petroleum/Tank Inspection (Caleb-Brett):* This will be carried out by Inspectors appointed by the User.

The approximate average analysis of the Prudhoe Bay Crude is:

Gravity at 60°F	26-7 API
Sulphur	0.2% by weight
BS+W	0.2%
Temperature	55°-85°F

SAFETY: *Smoking Regulations:* Smoking is PROHIBITED in the following locations:

1. Entire Terminal area.
2. Aboard Launches.
3. On Jetties and in motor vehicles inside the Terminal, except inside designated buildings.
4. On ships except in places designated by the Master and agreed by the Terminal's Representative. In accordance with IOTTSG; two locations only will be established in the after end of the vessel.

N.B. If an oil spill occurs on Jetty or ship, all smoking will be PROHIBITED until the spill has been removed.

Emergency Procedure: For cases of fire on vessel, in addition to the normal ships alarms, Masters are requested to sound a prolonged blast on the main whistle of not less than 10 seconds duration. If the vessel is discharging or deballasting it should:

1. Immediately cease operations.
2. Initiate fire fighting procedures.
3. Be prepared to unberth at short notice.

If loading cargo, the Terminal will, on hearing the signal, immediately stop all operations and:

(I.) Initiate fire fighting procedures from Jetty.
(II.) Put Terminal emergency plan into effect.
(III.) Disconnect loading arms.
(IV.) Order tugs to vessel and make preparations for unberthing.

Vessels at other berths should also cease operations and be prepared to put to sea.

Fire Protection System: Each Jetty is equipped with:

1. Water spray system underneath.
2. Hydrant system on platform.
3. Two 500 g.p.m. remote operated monitors. These are connected to discharge with either water or foam.

The plant water supply is by diesel driven pumps at two locations and the total water flow is 7,000 g.p.m.

Anti-Pollution Equipment at Petroterminal:

1. 34 Foot Marco Skimmer Craft.
2. 40×100 ft. (4,000 ft) Acme Jaton. Containment boom 6 in. diameter float with 0.25 in. Chain Ballast fitted with quick latch couplers, each coupler has eye bolt assembly for body and anchor attachments.
3. 12 ACME Tow bridles for boom.
4. 10 Sets anchor and boom assembly – 20 lb. anchors.
5. 8 Spools 0.5 in. polypropylene rope.
6. 20×5 gallon (100 gals.) Montgomery boom cleaner.
7. Protective clothing.
8. Shovels, bags, tools, etc.
9. Stripping pump.
10. 40 gal. containers.
11. Two tugs equipped to spray chemicals.

Sorbents:

12. 100 bales – 3M type 156 (0.375 in. thick×18 in.×18 in.×100 sheets per bale).
13. 10 Rolls – 3M type 100 (36×150 ft. ea. per roll).
14. 100 Boxes – ACME Sorbent # 8 (8 in. dia.×10 ft. lengths×2 per box).
15. 100 Boxes – ACME Sorbent # 5 (5 in. dia.×10 ft. lengths×4 per box).

Chemicals:

16. 10×5 gals. Shell oil Herder.
17. 1500 gals. Corexit 9527 concentrated dispersant.

GENERAL: *Charts and Publications:* Charts Ref. USHO 21580 and BA 1928.

Sailing Directions: USHO PUB 153. B.A.N.P. No. 8 Pacific Coasts of Central America and United States Pilot.

Tides: The maximum tidal range is 12 ft. The mean range is 7.6 ft. The tidal flow in this area is, at present, ill defined.

Currents: Currents in the area are not well defined.

Launch Service: The Terminal's launches are intended for Terminal use only.

They may be hired by prior notice, depending on operational requirements.

Crew members and visitors use the launches at their own risk.

A launch service may be provided at No. 3 Berth, depending on terminal requirements. Masters should enquire about this service on arrival.

AGENT: Fernie (Puerto Armuelles), S.A., Apartado 22, Puerto Armuelles, Chiriqui, Republic of Panama. VHF: Call on Channel 16. Working 6, 8, 10, 11, 14. Telephone: 70-7301 or 70-7200. Cables: "FERNIE". Telex: 368-7508.

With the exception of times vessels are actually in or approaching Puerto Armuelles (i.e. within V.H.F. range) all other communications should be directed to "FERNIE CRISTOBAL".

VACAMONTE: 08.52 N. 79.40 W. (See Plan Book)

LOCATION: The fishing port of Vacamonte (under construction) is located 27 km. S.W. of Panama City, in Arraijan District, Province of Panama.

DOCUMENTS: General Declaration (2 copies); Cargo Manifest (5 copies); Crew List (2 copies); Passenger List (4 copies); Customs Documents – Messroom List (2 copies).

Health Documents (2 copies).

Declaration of the Crew Effects (2 copies).

PILOTAGE: Pilot service is compulsory for any vessel greater than 150 g.r.t. that enters or leaves the Port. Pilot can be contacted on VHF Channel 15.

MAX. SIZE: The Port can receive vessels up to 3,000 tons with maximum length of the vessel of 120 m. and with draft of 7 m.

RADIO: S.S.B. with the following frequencies:

2182.00 – Channel 1
2638.00 – Channel 2
2738.00 – Channel 3
4139.50 – Channel 4
4358.80 – Channel 5
7447.50 – Channel 6

For calling use Channel 1.

VHF: Station has 55 channels, when calling use Channel 15 (156.750 mHz).

TUGS: 2 tugs of 700 h.p. each.

BERTHING:
Tuna fleet facilities: Pier: Head-length 132 m. Width of pier 12 m. 2 inside berths each 60 m. The "T" head pier can accommodate 4 tuna vessels at the same time. The area surrounding the pier has a depth of 9 m. at MLWS.

Potable water and fuel obtainable at the pier.

Shrimp fleet facilities: 2 piers which are able to receive 8 vessels at any one time. Fuel and potable water available.

There are 2 additional piers where vessels are able to undertake repair operations.

Fresh fish market: 1 marginal pier which is able to accommodate 8 vessels at one time. Adjacent to the pier is a fish cleaning station and 2 cold rooms.

Freight elevators: 1 freight elevator of 10 tons capacity. 10 freight elevators of 2 tons capacity.

CRANES: 4 modern cranes (P & H) of 15 tons capacity.

GENERAL: *Officials:* Customs, Immigration, Health and Agriculture Quarantine Officials stationed at the port.

Services: First Aid, fire truck and security personnel available.

The port is serviced by the Inter-American Highway and it takes 40 minutes to get to the city.

Ship chandlers will be available from Panama City, 30 minutes away by road.

Vacamonte is located 20 kms. Southwest of Balboa. Panama City is served by a modern airport with connections all over the world.

AUTHORITY: National Ports Authority.

NOTES

Please also advise Shipping Guides Ltd.

Papua New Guinea

GENERAL:

APPLICABLE TO ALL PORTS IN PAPUA NEW GUINEA
(See also details under individual ports) **(See Plan Book)**

DOCUMENTS: International conditions i.e. at the first port of call in Papua New Guinea the following inward Customs documents are required to be handed to Customs Department within 24 hours of ship's arrival.

3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.
3 Copies List of Crew.
3 Copies Articles in private possession of officers and crew Form 5.
3 Copies Stores List.
2 Copies Immigration Restriction Ordinance List (Form 6) being complete list of passengers disembarking and in transit.

If other than first port of call:
3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.
Outward Customs Clearance from last port of call.

RESTRICTIONS: Night berthing is not recommended, but is subject to weather conditions in Lae, Rabaul and Port Moresby.

HEALTH:

(a) Vessels arriving directly from Australia. Pratique is given by radio to vessels which voyage directly from Australia to a Papua New Guinea port, Master of vessel notifies Quarantine Officer at the port of entry to which he is proceeding of ETA, the number of passengers and crew and whether there is any sickness aboard. This notification from Master is sent not longer than 24 hours and not less than 12 hours of ETA. If there is no sickness aboard a reply is sent stating that pratique is granted, and when a vessel arrives the actual pratique form is delivered to Master of vessel or to Collector of Customs to hand to Master. Full pratique is given.

(b) Vessels arriving from a Foreign Port. All vessels which arrive from a foreign port must anchor in the designated position and await arrival of a Quarantine Officer who boards the vessel by himself – no other person (except a Pilot) is to be allowed on board vessel until pratique has been granted. If a Pilot is on board he must remain on board until pratique is granted.

Smallpox: All passengers and crew are required to be in possession of a valid International Certificate of Vaccination against smallpox on arrival in the country.

Cholera: All passengers and crew are required to be inoculated against cholera if the vessel is expected to arrive at a port in the country within 7 days of leaving an area where cholera is either endemic or is present.

Note: The presence on board of a qualified doctor will normally assist in the granting of pratique.

RADIO: 2 radio stations are available.

(a) Port Moresby Radio – Call sign P2M operating between the hours of 2100 – 1000 hrs. GMT.

(b) Rabaul Radio – Call sign P2R operating 24 hours per day.

These stations are generally used for all contact with agents or Government Departments, etc.

VHF: VHF services are available at:

a. Port Moresby – Channel 16 and 12
Call Sign "Moresby Harbour Control"
b. Lae – Channel 16 and 12
Call Sign "Lae Harbour Control"
c. Rabaul – Channel 16 and 12
Call Sign "Rabaul Harbour Control"
d. Kieta – Channel 16 and 12
Call Sign "Kieta Harbour Control"
e. Madang – Channel 16 and 12
Call Sign "Madang Harbour Control"
f. Anewa Bay –Channel 6, 12 and 15
Call Sign "Anewa Bay Pilots"

Normal working hours are 0745 till 1606 hrs. local time, except for Anewa Bay where hours are 0700 till 2300 hrs. local time.

RADAR: No port radar services exist in Papua New Guinea.

TUGS: Berthing. Tugs are available in Port Moresby, Lae and Anewa Bay.

CRANES: There are no wharf mounted cranes in Papua New Guinea, however, mobile cranes are available in most main ports capable of lifting up to 20 tonne containers. Shippers are advised though to check this before shipping and with heavier loads prior advice and approval must be sought from the relevant Port Authority.

BULK CARGO FACILITIES: Except for Anewa Bay (copper concentrate) and the Jant Wharf at Madang (Woodchip), no bulk cargo facilities exist in Papua New Guinea. (Details of the above are given in the appropriate port summaries).

CONSULS: The following Consulate and Commission services are available.

American Consulate General, P.O. Box 3492, Port Moresby.	Phone 211447
Australian Consulate General, P.O. Box 1180, Lae.	Phone 423000
Australian High Commission, P.O. Box 9129, Hohola.	Phone 259333
British High Commission, P.O. Box 739, Port Moresby.	Phone 212500
German Honorary Consulate, P.O. Box 1549, Boroko.	Phone 256311
Indonesian Embassy, P.O. Box 7165, Boroko.	Phone 253116
Italian Consulate, P.O. Box 276, Lae.	Phone 423987
Embassy of Japan, P.O. Box 3040, Port Moresby.	Phone 211800
New Zealand High Commission, P.O. Box 1144, Boroko.	Phone 259444
Phillipines Embassy, P.O. Box 5916, Boroko.	Phone 256577
Sweden Consulate, P.O. Box 1228, Boroko.	Phone 255411

MEDICAL: Medical attention is available in most Papua New Guinea Ports, however as much advance notice as possible should be given by contacting the nearest radio station.

DRY DOCK: No dry dock or major repair facilities exist in Papua New Guinea.

GANGWAY WATCHMEN: Not usually necessary.

HATCHES: Opening/closing usually carried out by crew.

CUSTOMS ALLOWANCES: Entry regulations permit 200 cigarettes or 1lb. of tobacco, and 40 oz. of wines or spirits.

Crew members may hold 200 cigarettes and 1 carton of beer (or 1 bottle of spirits) out of bond per week.

CARGO GEAR: Wharf equipment supplied by stevedores, load/discharge by ship's gear.

REPATRIATION: Possible, but not recommended.

TIME: Local time in all ports is 10 hours ahead of GMT.

HOLIDAYS: The only days on which cargo cannot officially be worked are Good Friday and Christmas Day.

TELEPHONES: Not available at present for ship to shore connection.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Generally a seamans book is held at the main entrance to the port. Individual passes are not normally required for crew.

BERTH RESERVATIONS: A berth reservation system applies for all overseas vessels at all Papua New Guinea Harbours Board ports.

At Anewa Bay cargo vessels must vacate berth for concentrate carriers.

Samarai does not handle overseas traffic.

AITAPE: 03.08 S. 142.21 E. (See Plan Book)

(See General section on Papua New Guinea ports).

PILOTAGE: Not available.

TUGS: Not available.

RADIO: Communications not available.

BERTHING: Position of wharf 03° 08.51′ S., 142° 21.24′ E. Length of berthing head 18.3 m. (60 ft.). Width 6.2 m. (20.3 ft.). Height of deck above L.A.T. 2.5 m. (8.3 ft.). Minimum depth of water at L.A.T. at wharf head 4.3 m. (14 ft.) – subject to seasonal change. Maximum tidal range 1.4 m. (4.6 ft.)

STEVEDORES: *Working hours:* 0700–1200 hrs., 1300–1800 hrs.

FRESH WATER: Not available to ships.

FUEL: Not available.

CUSTOMS ALLOWANCE: 200 cigarettes or 250 grams tobacco. 1 litre of spirits or 1 litre of wine or 6 beers (total 4.5 litres) for each 7 days. Aitape is not a port of entry.

AUTHORITY: The District Officer acts as Port Manager. Port dues are collected by an Agent.

ALOTAU: 10.19 S. 150.27 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary: From a position in 10° 20′ S. 150° 26′ E. bounded on the West by a straight line due North to the coastline. From the same point bounded on the South by a straight line due East to a position in 10° 20′ S. 150° 28′ E. thence bounded on the East by a straight line due North to the coastline.

PILOTAGE: Pilotage is not compulsory. There are no pilots stationed at Alotau but a pilot will attend from Port Moresby given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: Within 300 m. radius of a position with the light structure on the extreme West point of Sanderson Bay bearing 030° (T) distant 850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Port Moresby Radio (P2M).

ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Alotau.

TUGS: Not available.

BERTHING: Overseas wharf is 93 m. long, height of deck above L.A.T. 2.4 m., minimum depth of water at face at L.A.T. 10.0 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

Coastal Wharf: Length 55.8 m. (183 ft.). Minimum depth of water 4.9 m. (16 ft.).

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

Licenced Stevedores: Alotau Stevedoring and Transport Pty. Ltd., P.O. Box 28, Alotau.

TANKERS: Bunker and discharge facilities are not available.

FRESH WATER: Available in limited quantities and restricted periods of the year. Prior application to be made to the Port Manager.

REPAIRS: No facilities available.

AIRPORT: Gurney Airport approximately 20 km. from Alotau is served regularly but not daily.

POLICE/AMBULANCE/FIRE: Police: Alotau 611222. Hospital: (No separate Ambulance) Alotau 611200. Fire: Service shortly to be in operation.

DELAYS: Delays at Alotau are most unlikely.

DEVELOPMENTS: No further developments are likely in the foreseeable future.

GENERAL: Covered Storage Area for Overseas Cargo – 1,874 sq.m. Open Storage Area – 7,640 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Alotau.

ANEWA BAY: 06.11 S. 155.32 E.

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary: A line joining the Southern end of Takenupei Island and Karikiberia Shoal.

PILOTAGE: Compulsory. The pilot boarding ground is North of a line joining Takenupei Island and Karikiberia Shoal.

ANCHORAGE: Anchorages are available at Port Authorities advice.

VHF: "Anewa Bay Pilots" Channel 6, 12 and 16.

TUGS: Available.

BERTHING: Wharf (position 6° 11.25′ S., 155° 32.7′ E.) is 77 m. long with mooring dolphins 59 m. Eastward and 59 m. Westward. The maximum draft permitted alongside is 12 m. and a d.w.t. of 40,000 tonnes.

Vessels may berth either port or starboard side to although normally the latter. Load/discharge is by ship's own gear (except under special arrangement).

STEVEDORES: The Port Authority operate their own stevedoring functions.

Working Hours: 0700–1500 and 1500–2300 hrs.

TANKERS: A bulk oil discharging gantry is sited at the Western end of the overseas wharf. Max. discharging rate 4,000 t.p.h. Mooring dolphins are located 59 m. and 107 m. Eastward and 59 m. Westward of the wharf.

FUEL: Bunker facilities are not available.

FRESH WATER: Available up to a limit of 250 tonnes delivered at a rate of 25 t.p.h., subject to seasonal availability.

REPAIRS: No facilities available.

AIRPORT: Aropa airport is 32 km. distant and is served daily by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police: 951222. Ambulance: 956166. Fire: 951333.

DELAYS: Delays are only likely if an ore carrier should make port and the consequent priority system is applied.

DEVELOPMENTS: Enlargement of general cargo facilities are planned by the Port Authority.

GENERAL: Covered Storage: 5,130 sq.m.

SHIPMASTER'S REPORT: 1975.

Documents:

Crew List. (2 Copies of Papua & New Guinea forms to be filled in on arrival at pilot station).

Ship's Stores List. (2 copies of P.N.G. forms to be filled in on arrival at pilot station).

Crew Declaration Form: – (2 copies of P.N.G. Form 5 – Articles in Private Possession of Officers & Crew to be filled in on arrival at pilot station).

Vaccination Certificates of all crew members for sighting.

Pilotage: Two Pilots, employees of the Bougainville Copper Company Ltd., are available 24 hours a day. Pilot boards in position 06° 07′ S. 155° 35′ 18″ E. Pilot vessel is a small tug called the "Loloho", which has a dark blue hull and white superstructure. Pilots listen on VHF Channels 6 and 16. ETA's will have been passed to the Pilots by the ship's Agents, as per charter party, but pilot boat should be advised by VHF when vessel is two hours and one hour respectively from Pilot station. Channel 6 is monitored by Pilots Monday–Friday, 1730–0215 hrs. and when vessels are expected. Pilotage is compulsory.

Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 700 ft.

Pratique: Immigration officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.

Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot office. Honiara Radio may also be used for messages to the ship's Agents.

Tugs: Only one tug, the "Loloho", is available. This is a very small tug which "assists" vessels when berthing and unberthing. No lines used. Tug of little use to larger vessels.

Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch covers are not more than 36 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.

Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 140 tonnes are available. Shore gangway is normally used.

Medical: There are good hospital facilities in both Anewa Bay itself and also in nearby Kieta. Advanced notice of required medical attention not normally necessary.

Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 700 ft.

Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.

Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.

Fuel: Not available.

Consuls: None.

Repairs: No facilities.

Dry Docks: None close by.

Surveyors: None.

Hatches: Steel hatch covers to be opened and closed by crew.

Customs Allowances: 200 cigarettes and one bottle spirits per person.

Repatriation: Regular flights from Kieta Airport (24 kms. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port.

Time: GMT plus 10 hours.

Shore Leave: All crew members are allowed ashore. No shore passes required.

Delays: No delays normally experienced, but possible up to 24 hours max.

General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

AUTHORITY: Bougainville Copper Ltd., Panguna, Bougainville. Port Superintendent/Harbour Master, Arawa, Bougainville.

BUKA: 05.26 S. 154.40 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PILOTAGE: Not available.

TUGS: Not available.

RADIO: Not available.

BERTHING: Wharf position: 05° 26′ S., 154° 40.4′ E. Length 31.4 m. (103 ft.) Width 5.2 m. (17 ft.). Berthing dolphins 9.2 m. (30 ft.) off each end. Height of deck above MLW 2.22 m. (7.3 ft.). Minimum depth of water at MLW 3.65 m. (12 ft.).

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS: Not Port of Entry.

AUTHORITY: Port Manager, Buka.

DARU: 09.04 S. 143.12 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).

PILOTAGE: Not available.

RADIO: Not available.

TUGS: Not available.

BERTHING: Position of wharf: 09° 04′ S. 143° 12.6′ E.

Length of wharf head 29.6 m. (97 ft.). Average width 12.2 m. (40 ft.). Height of deck above LAT – 4.8 m. (15.7 ft.) min. depth of water LAT 2.4 m. (8.0 ft.)

The wharf head is connected to the shore by a wharf bridge length 120 m. (394 ft.) and causeway 220 m. (720 ft.).

FRESH WATER: Not available.

FUEL: Available by road tanker. Supplier – Caltex.

CUSTOMS: Port of Entry.

AUTHORITY: Port Manager.

KAVIENG: 02.35 S. 150.48 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

Large vessels should approach from the Nusa Channel where the port limits are as follows:

From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in 2° 37.87′ S., 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.

Pilot Boarding Ground: Within 300 m. radius of a position with Eastern extremity of Edmago Island bearing due North 900 m.

ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).

ANCHORAGE: Anchorage may be obtained in sand with depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.

RADIO: Not available.

TUGS: Not available.

BERTHING: Overseas wharf is 93.8 m. long, height of deck above LAT 2.7 m., minimum depth of water at face at LAT 7.0 m.

Vessels may berth port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800–1200, 1300–1600 hrs. Evening shift 1600–1900, 2000–2400 hrs.

Licensed Stevedores: Burns Philp (N.G.) Ltd., P.O. Box 48, Kavieng.

FUEL: Bunker facilities available for diesel at wharf from Caltex and Shell

FRESH WATER: Available in limited quantities, prior application to be made with the Port Manager.
REPAIRS: No facilities available.
AIRPORT: Kavieng airport is some 5 km. from the wharf and is served by daily Air Nuigini flights.
POLICE/AMBULANCE/FIRE: Police: 942222. Ambulance: 942040. Fire: 942000.
DELAYS: Delays at Kavieng are most unlikely.
DEVELOPMENTS: Development of Kavieng port is under consideration at the present time.
GENERAL: Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kavieng.

KIETA: 06.13 S. 155.38 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).

PORT LIMITS: Seaward Boundary

By a straight line bearing 328° (T) from a point in 6° 10′ S., 155° 42.3′ E., on the seaward edge of Gero Reef to a point in 6° 07.1′ S., 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.
PILOTAGE: Compulsory – Daylight hours only.

Pilot boarding ground: Within 400 m. radius of 6° 07.6′ S., 155° 40.3′ E.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul. No VHF facility.
ANCHORAGE: There are no recommended anchorages for large vessels in Kieta harbour.
BERTHING: Overseas wharf 122 m. long, height of deck above LAT 3.0 m., minimum depth of water at face at LAT 7.5 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 required. Working hours: Day shift 0800–1200, 1300–1600. Evening shift 1600–1900, 2000–2400.

Licensed Stevedores: Rabaul Stevedores Ltd., P.O. Box 37, Kieta.
TANKERS: Discharge carried out at Anewa Bay.
FRESH WATER: Not usually available, however application can be made to the Port Authority in an emergency.
AIRPORT: Aropa airport is some 19 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police: 951222. Hospital (no separate ambulance): 951266. Fire: 951333.
DELAYS: Delays can occur occasionally at Kieta but of fairly short duration rarely exceeding 48 hours.
DEVELOPMENTS: None.
GENERAL: Covered Storage: 2,230 sq.m. Open Storage: 14,720 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kieta.

KIMBE: 05.33 S. 150.09 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.
A line from Gigo Point due North for 1,695 m., thence in a straight line due East for 6,821 m., thence in a straight line due South for 2,438 m. to the Eastern extremity of Telagavu Point.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: Within 400 m. radius of 5° 31.5′ S., 150° 12′ E. ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R). No VHF facility.
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Kimbe.
BERTHING: Overseas wharf is 60.9 m. long, height of deck above LAT 3.1 m., min. depth of water at outer face at LAT 10.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/Discharge is by ship's own gear (except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a min. of 24 required. Working hours: 0800–1200, 1300–1600, 2000–2400 hrs.
Licensed Stevedores: Kimbe Bay Shipping Agencies, P.O. Box 27, Kimbe.
TANKERS: Discharge facilities only, for oil products. Palm oil loading over main wharf.
FRESH WATER: Available but may be restricted at times during the year. Prior arrangement should be made with the Port Authority.
AIRPORT: Hoskins airport is approx. 50 km. distant and is served by Air Nuigini several times a week.
POLICE/AMBULANCE/FIRE: Police: 935022. Hospital (no separate ambulance): 935142. Fire: No service available.
DEVELOPMENTS: A small ships jetty adjacent to the barge ramp is to be built in 1981.
GENERAL: Covered Storage: 745 sq.m. Open Storage: 6040 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Kimbe.

LAE: 06.44 S. 146.59 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: A straight line bearing 167° (T) from Voco Point to a point at the Northern most extremity of Parsu Point on the Salamaua Peninsula.
PILOTAGE: Pilotage is compulsory – 24 hours a day.

Pilot Boarding Ground: Within 400 m. radius of a position with the S.E. corner of the main wharf bearing 295° (T) distant 1,850 m.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call "Lae Port Control" then to Channel 12 or 6 for working Channels.)
ANCHORAGE: There are no recommended safe anchorage areas for large vessels in the Port of Lae.
BERTHING: Overseas wharf is 430 m. long, height of deck above LAT 2.7 m., min. depth of water at face at LAT 11.0 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ships own gear (except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a min. of 24 required. Working hours: Day shift: 0800–1200, 1300–1700, 1800–2200. Evening shift: 2200–0200, 0300–0800 (limited gangs).
Licensed Stevedores: Bunting Stevedores Pty. Ltd., P.O. Box 170, Lae. Robert Laurie (N.G.) Pty. Ltd., P.O. Box 1032, Lae. Rabaul Stevedores Ltd., P.O. Box 434, Lae. United Stevedores Ltd., P.O. Box 1405, Lae.
MEDICAL: Maximum possible notice should be given so that full arrangements can be made with regard to hospitalisation, etc. Full hospital facilities are available approximately 2.5 miles from the wharf.
TANKERS: Discharge and bunkering facilities are available for all ship requirements.
FRESH WATER: Sometimes restricted but generally available at the rate of 30 t.p.h.
REPAIRS: No repair facilities available.
SURVEYORS: Lloyds Agent.
AIRPORT: Lae airport at Nadzab is approximately 40 km. distant. Serviced daily by Air Niugini flights.
POLICE/AMBULANCE/FIRE: Police: 422222. Ambulance: 421211. Fire: 424333.

Fire alarms are connected to the Gatehouse which has a direct telephone link to the Police station for emergency purposes.
DELAYS: Lae is the largest and busiest of the country's ports (except for Anewa Bay) and at times delays for up to 48 hours can be expected.
DEVELOPMENTS: A new sheltered tidal basin will be built over the next few years to the West of the existing port. Completion expected in 1984.
GENERAL: Covered Storage: 14,285 sq. m. Open Storage: 37,000 sq.m.
SHIPMASTER'S REPORT: 1978

Approaches: No difficulties were encountered either approaching or leaving. There is deep water close to the shore. Muddy water from the outflow of the Markham River is encountered off the port, but is of no navigational significance.

Wharf: Modern, well-fendered and convenient. Currents and tides alongside are irregular and unpredictable, being almost entirely influenced by the discharge from the Markham River. A tanker berth, consisting of concrete dolphins, is under construction close Eastwards of the main wharf and a pile-driving barge is operating. When berthing, some vessels use the off-shore anchor but under normal conditions this appears to be unnecessary and can in fact be something of an embarrassment when leaving. We did not use either anchor or tugs, weather conditions being good. Powered line boats are available and were used. There is a depth of water alongside of about 11 m.

Anchorage: The usual anchorage is as described in Pacific Islands Pilot Vol. 1, 9th Edition and Supplement No. 5 of 1976. We lay quietly to the port anchor in 30 m. of water, with 4.5 shackles in the water, in position with the Northern of the 2 beacons shown on Chart Aus. 385 bearing 268°(T) distant 2.1 miles approximately.

It is not customary to take a Pilot for the anchorage.

Pilotage: Compulsory when berthing and unberthing.

Tugs: There are 3 in the port, privately owned. As most of their income is derived from sources other than berthing and unberthing ships, their availability is uncertain. No doubt a vessel requiring a tug or tugs would be able to make advance arrangements.

Communications: Vessel came from Gladstone, Queensland, and our advices were sent through P2M, Port Moresby Radio, no difficulties being encountered.

Pilots and Harbour Control are available on Channel 16, VHF, when shipping movements are expected.

Documents required:

5 Passenger Lists
5 Crew Lists
7 Inward Customs Manifests
3 Lists of Crew Effects
3 Stores Lists.
2 Arms and Ammunition Lists

We were able to obtain local forms prior to arrival, and experienced no problems. Also see 'Pratique'.

Officials: The Bond and Beer Rooms are sealed on arrival. The Customs stuck rigidly to the rules and confiscated any undeclared goods, particularly alcohol, cigarettes and what they judged to be pornographic literature. No fines were levied nor charges brought.

The Port Authority allocates berths and decides priorities for vessels.

During our stay, and for a considerable period prior to then, the port had been very busy.

Depending upon the nature of her cargo and the rate of discharge, it is possible for a vessel to reserve a berth in advance.

Because such a vessel arrived when we were alongside and neither our cargo nor our rate of discharge brought us into the berth reservation category, we were obliged to go out to anchor until a berth again became available.

Cargo Working: Our cargo for Lae consisted of 1,524 tonnes of bulk wheat in No. 1 hatch and 9 containers, the heaviest of which was 19.76 tonnes, on No. 2 hatch. The containers were discharged in 3 hours 20 minutes by ship's gear, no problems being encountered.

Our grain cargo was discharged in 36 hours, including time taken rigging and unrigging the sucker and adjusting the length of the suction pipe. Thus, an average rate of 42.3 m/t.p.h. was achieved.

Grain is discharged by means of a portable sucker, weighing approximately 3.5 tonnes, placed on the hatch lids, where it stays throughout discharge. From the sucker, the grain is transferred to a hopper ashore and from there to lorries that transport it to the Mill, about 1 km. away. No significant delays on account of a lack of transport were encountered.

Working Hours: The standard working day is from 0800 hrs. to 2400 hrs. On 2 occasions, once successfully, attempts were made by receivers to start work at 0700 hrs.

The vessel being on Voyage Charter, receivers made strenuous efforts to arrange for discharge after midnight, but without success. They are also investigating making grain discharge an all-weather operation. This could easily be achieved by rigging a tent over the sucker and open portion of the hatch, but whether Union and/or Government Rules would permit this is another matter.

Pratique: If coming from Australia or New Zealand, pratique is not required, nor is a Health Declaration. Nevertheless, radio pratique was requested but no reply was received.

Provisions: Available but very expensive. We stocked up prior to departure Gladstone and this proved to be a wise decision.

Fresh Water: Available from the wharf, at a rate of 15 tonnes per hour. This is well water and not used by the local residents, who collect the rainwater off their roofs. To be on the safe side it was treated with Chloride of Lime.

Repairs: Only minor repairs can be undertaken. We called in a local firm for some non-urgent burning and welding work, but they were unable to do anything due to a products tanker discharging astern of us. The Chief Engineer reports that appearances suggest that competent work would be done, but that prices would be rather high.

Currency: The unit of currency is the Kina. On June 23rd, 1978, the Kina was worth Australian $1.2232 and 75.29 pence sterling.

Weather: Was hot and humid, with temperatures ranging from 23.2°C to 28.2°C. During the afternoons a South-Easterly breeze, about Force 2-3 usually came up, dying away in the evenings. Rain showers were prevalent, night and morning.

Health: Local residents confirmed that malaria is present at Lae and the usual precautions were taken on board.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Lae.

LORENGAU: 02.01 S. 147.16 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the Eastern extremity of Hauwei Island by a straight line due North for 2,050 m., thence by a straight line due East for 2,920 m., thence by a straight line due South for 2,000 m. to the Old Light House on Ndrilo Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang given 48 hours notice of the ship's intention to call at Lorengau.

Pilot Boarding Ground: Within 400 m. radius of a position with Ndrilo Island Old Light House bearing 127° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed at not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: Anchorage may be obtained in soft mud in depths of about 30 m. anywhere in Seeadler Harbour but an anchorage in position Bear Point 210° (T) 2,600 m. is recommended.

BERTHING: Nabu wharf at Lorengau is 15.2 m. long with a berthing dolphin 25.9 m. from the Northern end of the wharf. The height of the deck above ISLW is 2.9 m., minimum depth of water at face at ISLW 5.1 m.

Nabu wharf is not suitable for large ships but overseas vessels occasionally use the wharf at Lombrum Naval Base in position 2° 02.1′ S., 147° 22.6′ E., which now lies within the declared port of Lorengau, however the continued use of this facility is in doubt.

Berthing at Nabu wharf may be delayed during the N.W. season, December–March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required.

TANKERS: Discharge facilities are available at Nabu wharf.

FRESH WATER: Limited supplies available, prior application to be made to the Port Authority.

AIRPORT: Momote airport is some 45 kms. from Lorengau and is served by Air Nuigini but not daily.

POLICE/AMBULANCE/FIRE: Police: Lorengau 409122. Hospital (no separate ambulance): 409055.

FIRE: No services available.

DELAYS: Delays at Lorengau are most unlikely.

DEVELOPMENTS: No development for the port is envisaged in the near future.

GENERAL: Covered Storage: None. Open Storage: Very little.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Lorengau.

MADANG: 05.13 S. 145.49 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

By a straight line due East from the Easternmost extremity of Kramket Island to position 5° 11.9′ S., 145° 51.5′ E., thence due South to position 5° 13.5′ S., 145° 51.5′ E., thence by straight line due West to a point on the Easternmost extremity of the Kalibobo (Schering) Peninsula known as Cape Kusseron.

PILOTAGE: Compulsory – Inwards during daylight hours only. Outwards during the hours 0600–2400.

Pilot Boarding Ground: Within 400 m. radius of a position with the Coastwatchers lighthouse bearing 260° (T) distant 1,800 m.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul. No VHF facility.

ANCHORAGE: Anchorage area is inside the Dallman Passage in the area to the North of the main channel bounded by Beliau Island to the West and Kramket Island to the East. Depth of water, 40 m. Good holding ground in soft mud. Ships should not proceed to anchorage area without Pilot's advice.

BERTHING: Overseas wharf 137.1 m. long, height of deck above ISLW 3.1 m., minimum depth of water at face at ISLW 10.1 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

A separate facility to serve woodchip vessels (and Caltex tankers) only is situated within Binnen Harbour West of the main wharf facilities.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required. Working hours: 0800–1200, 1300–1800 and 1900–2400.

Licenced Stevedores: Rabaul Stevedores Pty. Ltd., P.O. Box 226, Madang. B. J. Back Pty. Ltd., P.O. Box 642, Madang.

TANKERS: Discharge at main wharf for both Shell and Mobil. Caltex discharge by floating pipe-line while moored at the Jant woodchip facility.

FUEL: Bunkering for overseas vessels not available.

FRESH WATER: Only very limited supply available dependent on season, prior arrangement must be made to Port Authority.

REPAIRS: A coastal slipway at Madang but only minor deck repairs could be carried out to overseas vessels.

SURVEYORS: Lloyds agents, The Manager, Burns Philp (N.G.) Ltd., P.O. Box 605, Madang.

AIRPORT: Madang airport is 6 km. from the port and is served daily by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police: 822222. Ambulance: 822022. Fire: 822777.

DELAYS: Although there is only one overseas berth at the main wharf, Madang delays are not common and are of short duration when they do occur.

DEVELOPMENTS: When traffic justifies expenditure an extension of the overseas wharf Eastward will be undertaken.

GENERAL: Covered Storage: 2,500 sq.m. Open storage: 5,575 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Madang.

ORO BAY: 08.54 S. 148.29 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the extreme North point of the mainland on the South side of the entrance to Port Harvey by a straight line due North for 2,935 m. thence by a straight line due West for 2,760 m. to the coastline.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby or Lae given 48 hours notice of the ship's intention to call at Oro Bay.

Pilot Boarding Ground: Within 300 m. radius of a position with the North corner of Oro Bay wharf bearing 225° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed at not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: In sand and mud at 15 m. depth may be obtained on the leading marks 239° (T) distant 400 m. from the North corner of the wharf.

TUGS: None available.

BERTHING: Wharf is 60.3 m. long, height of deck above ISLW 2.5 m., min. depth of water at outer face at ISLW 11.4 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

Berthing may be delayed during the N.W. season, December – March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 required.

Licensed Stevedores: Musa Agencies: P.O. Box 143, Popondetta. Carnell Carriers: P.O. Box 151, Popondetta.

TANKERS: No discharge or bunkering facilities exist at present.

FRESH WATER: Not available.

AIRPORT: Popondetta airport is 40 km. from the port and is served by Air Nuigini, but not daily.

POLICE/AMBULANCE/FIRE: Police: 297122. Ambulance: No service available. Fire: 297144.

DELAYS: Delays at Oro Bay are most unlikely.

DEVELOPMENTS: The area around Popondetta is being developed as major palm oil plantations and this could eventually lead to expansion of the port.
GENERAL: Covered Storage: 739 sq.m. Open Storage: 4645 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Popondetta.

PORT MORESBY: 09.29 S. 147.09 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
A straight line bearing 300° (T) from a point at the South Western extremity of Nateara Reef to a point at the Southernmost extremity of Sinari Reef.
PILOTAGE: Pilotage is compulsory – 24 hours a day.
Pilot boarding ground: Within 300 m. radius of a position Basilisk Beacon bearing 065° (T) distant 1,500 m. *OR* in bad weather the pilot boarding ground will be withdrawn inside the Basilisk Passage to a position Basilisk Beacon 220° (T) 950 m.
ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (call sign P2M).
Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call "Moresby Pilot" thence switch to Channel 12 for working Channel).
ANCHORAGE: Vessels may, subject to permission being granted by the Pilotage Authority, proceed inwards without a Pilot to an anchorage area in the outer harbour centred in position North Point Manubada Island 090° (T) 1,275 m.
Depth of water 27 m. Good holding ground in soft mud and sand.
VHF: Call sign "Moresby Port Control" Channels 16, 12, 8 and 6. Listening watch during normal working hours and outside hours when vessel expected.
BERTHING: A new heavy duty multipurpose berth has opened, 125 m. long, 10 m. minimum depth at LAT, deck height 4.3 m. above LAT. The old overseas berth is 213.3 m., height of deck above. LAT 4.4 m., min. depth of water at outer face at LAT 7.6 m., 4.6 m. on the inner North Eastern arm, 3.8 m. on the inner South Western arm.
The old wharf is a "T" head structure and vessels may berth either side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift: 0800–1200, 1300–1700, 1800–2200 hrs. Night shift: 2200–0200, 0300–0700 hrs. (limited gangs).
Licensed Stevedores: Port Services Ltd., P.O. Box 699, Port Moresby.
TANKERS: Tankers may discharge at Oil Company buoys N.W of the wharf area, max. draft 13 m. The discharge is through submarine pipe-lines.
Berthing and unberthing of tankers from the buoys is in daylight hours only. Bunkering facilities for overseas vessels will be accommodated at the new facility late in 1980.
FRESH WATER: Available at the rate of 20 t.p.h.
REPAIRS: A small slipway for coastal vessels only is situated adjacent to the old main wharf.
AIRPORT: Jacksons Airport, Papua New Guinea's only international airport is 13 km. from the wharf and is served by flights to and from Australia daily, to Manila, Hong Kong, Japan, Singapore and Honolulu weekly as well as almost daily flights to all main internal centres.
POLICE/AMBULANCE/FIRE: Police: 258122. Ambulance: 256822. Fire: 255188, 253400, 212332.
DELAYS: The port now has 3 overseas berths although only 1 of these is capable of handling direct container traffic. Some delays can be expected at peak times.
DEVELOPMENTS: A new deep sea berth backed by land fill reclamation is now in operation.
GENERAL: Covered Storage: 7,875 sq.m. Open Storage Area: 38,590 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Port Moresby.

RABAUL: 04.12 S. 152.10 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
By a straight line due South from a point on the Easternmost extremity of Matupi Island for 4,375 m. to a position in Lat. 4° 16.8′ S., Long. 152° 11.8′ E., thence by a straight line due West to a point on the S.E. extremity of the land known as Vulcan.
PILOTAGE: Compulsory – 24 hours a day.
Pilot Boarding Ground: Within 400 m. radius of a position with Matupi Island light house bearing 360° (T) distant 1,830 m.
ETA at pilot boarding ground not less than 12 hours prior to arrival via Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (Rabaul Radio – (P2R)).
ANCHORAGE: There are no recommended anchorage areas for large ships, but anchorage in approx. 30 m. of water may be obtained in good holding ground in a position lower leading light bearing 015° (T) distant 1,110 m.
BERTHING: There are two overseas berths. Bay Road wharf is 152.4 m. long, height above MLW 2.8 m., min. depth of water at LAT 10.2 m.
Blanche Street Wharf is 121.9 m. long. Height of deck above MLW 2.8 m. Minimum depth at LAT 7.9 m.
Vessels may berth either port or starboard side to at either wharf at the discretion of the Port Authority.
Load/discharge is by ship's own gear (Except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a min. of 24 hours required.
Working Hours: Day shift: 0800–1200, 1300–1600 hrs.
Evening Shift: 1600–1700, 1800–2400 hrs.
Limited work after midnight.
Licenced Stevedores: Rabaul Stevedores Ltd., P.O. Box 271, Rabaul. Burns Philp (NG) Ltd., P.O. Box 87, Rabaul.
TANKERS: Discharge facilities are available for overseas vessels at the Blanche Street Wharf.
FRESH WATER: Available at a rate of 25 t.p.h., supply sometimes restricted. Prior arrangement to be made with the Port Authority.
REPAIRS: Only light deck repair facilities available.
SURVEYORS: Lloyds Agent, Burns Philp (N.G.) Ltd., P.O. Box 87, Rabaul.
AIRPORT: Rabaul airport is 4 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police: 922222. Ambulance: 922162. Fire: 921411.
DELAYS: Delays at Rabaul are unlikely.
DEVELOPMENT: The only development planned at Rabaul for the next few years are new coastal facilities.
GENERAL: Covered Storage: 9,640 sq.m. Open Storage: 18,600 sq. m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Rabaul.

SAMARAI: 10.36 S. 150.39 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward boundary.
From a point on the Northernmost point of Samarai Island due North for 800 m. thence due West for 1,300 m. thence due South for 1,000 m. thence due East for 1,000 m. to a point on the N.W. coast of Samarai Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby given 48 hours notice of the ship's intention to call at Samarai.
Pilot boarding ground: within 300 m. radius of a position with the North corner of Samarai main wharf bearing 180° (T) distant 1,850 m.
ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Samarai.
BERTHING: No overseas shipping. New coastal wharf, depth alongside 7.8 m. completed.
Vessels may berth either port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.
TANKERS: Discharge only at main wharf.
FUEL: Diesel available by pipe-line. Supplied by Shell.
FRESH WATER: Very limited quantities available at times, prior arrangements to be made with Port Authority.
AIRPORT: There is no airport at Samarai. The nearest airport is at Gurney, outside Alotau.
POLICE/AMBULANCE/FIRE: Police: Samarai 225. Ambulance (Hospital) Samarai 222. Fire: No service available.
DELAYS: Delays at Samarai are most unlikely.
GENERAL: Covered Storage: 390 sq.m. Open Storage: 140 sq.m.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Samarai.

VANIMO: 02.41 S. 141.18 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).
PILOTAGE: Not available.
TUGS: One tug 150 b.h.p.
BERTHING: Position of wharf: 02° 41.09′ S, 141° 17.84′ E. Length 18.7 m. (61.5 ft.); width 6.1 m. (20 ft.). Minimum depth alongside at LAT 4.9 m. (16 ft.).
FRESH WATER: Not available to ships.
FUEL: Distillate available by road tanker.
AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Vanimo.

WEWAK: 03.34 S. 143.39 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
From Wewak Point by a straight line due North for 2,900 m. thence by a straight line due East for 3,725 m. thence by a straight line due South for 4,780 m. to a point 800 m. due East of Cape Boram, thence to Cape Boram.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang, Port Moresby or Lae if given 24 hours notice of the ship's intention to call at Wewak. A Pilot will shortly be stationed at Wewak.
Pilot Boarding Ground: Within 800 m. radius of position 03° 32′ S., 143° 39.5′ E.
ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Wewak.

BERTHING: Overseas wharf is 73.1 m. long, height of face above Chart Datum is 3.5 m., min. depth of face at Chart Datum is 6.7 m.

Vessels may berth port side to only.

Load/discharge is by ship's own gear.

Berthing may be delayed during the N.W. season December – March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

Working Hours: Day shift: 0800–1200, 1300–1600. Evening shift: 1600–1900, 2000–2400. 2 hours extension to finish possible.

Licenced Stevedores: Sepik Coastal Agencies, P.O. Box 118, Wewak. Wewak Stevedores, P.O. Box 27, Wewak.

TANKERS: No overseas discharge or bunkering facility exists.

FRESH WATER: Not available.

AIRPORT: Wewak airport is 5 km. from the port and is served regularly by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police: 862222. Ambulance: 862166. Fire: 862122.

DELAYS: Delays at Wewak are unlikely but if they do occur are of short duration.

DEVELOPMENTS: The port development plan which is unlikely to take effect for a few years, calls for a land backed facility off the causeway joining the land to the existing wharf.

GENERAL: Covered Storage: 1,500 sq.m.
Open Storage: 2,320 sq.m.

AUTHORITY: Papua New Guinea Harbours Board, Port Moresby. Port Manager, Wewak.

NOTES

Peru

ATICO: 16.14 S. 73.43 W.

Atico is an open roadstead and unprotected. The main activity is the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
TUGS: 1 available.
LIGHTERS: 3 available, 100 tons each.
CRANES: None.
STEVEDORES: See "Pimentel" for working hours and overtime rates. There are 2 gangs available.
MEDICAL: Available at Mollendo.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Heavy swell in the Winter months, June–September.
AGENTS: See "Callao".

CALLAO: 12.03 S. 77.10 W. (See Plan Book)

DOCUMENTS:

Airmail copies must be presented to Port Authorities 72 hours before arrival of vessel as otherwise vessel will be fined. No docking is allowed until Cargo Manifests and Cargo Plan are presented.

Vessel copies to be delivered on Clearing vessel inbound on arrival when Health, Customs and other Authorities board.

	By Air	*By Sea (With the Vessel)*
Cargo Manifests, including additionals. Must be faithful copies of Bills of Lading descriptions	5	*7
Same Manifests, but freighted	5	2
Cargo Manifests covering cargo shortshipped but manifested on previous vessels calling at Callao	5	*7
(If Master Stencils are airmailed, the required number of Manifests will be printed)		
Transit Cargo Manifests	–	3
Freighted copy of each Bill of Lading	–	4
List of Containers with their numbers	2	2

*Must be made out on LAFTA Forms (See "Shipmaster's Report").

PILOTAGE: Pilots must be requested by Agent and board ships outside of port at anchorage. Various pilot launches painted white, black and red.
ANCHORAGE: Very large area to the West of entrance buoys.
RESTRICTIONS: Vessels of up to 32 ft. draft may enter at any time. Vessels of more than 32 ft. draft must enter at high water. Pilots available 24 hours.
MAX. SIZE: Length and breadth practically unlimited, draft 32 ft. plus height of tide making allowance for keel clearance.
HEALTH: Cable Agent requesting free pratique. Agent must be notified in advance if any illness or disease suspected on board. Free Pratique is hardly ever given unless Health Officer and Captain of the Port and other Officers board.
RADIO: Radio Costera, OBC3, 460, 500, 8546, VHF 16 and 14 (Peruvian Navy 24 hours).
Arrival Advice: 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: Port Authority Tugs join vessel once inside mole, 1 or 2 as required, using vessel's lines, later passed to pier. 4 tugs available 2 at 175 h.p. 1 at 500 h.p. and 1 at 800 h.p.
BERTHING: There are 9 piers with a total of 24 berths, 22 for large vessels, and 2 for coasters.

The various berths of the port can be subdivided into areas for their appropriate usage as follows:

	Quays	*Berths*
General cargo	1, 2, 3, 4, 5	1A, 1B, 2A, 2B, 3A, 3B, 4A, 5A, 4B.
Dry bulk cargo	11, 9	11A, 11B, 11C, 9A, 9B, 9C.
Liquid bulk cargo (Oil derivates)	7	7A, 7B.
Minerals	5	5B, 5C, 5D, 5F.
Logistic supplies and coastal vessels	9, 10	9D, 10A, 10B.

All piers except the petrol pier are connected to railway system for unloading and loading to railway wagons.

Within port limits anchorages can be used for discharge of livestock, scrap and occasionally for general cargo after permission obtained from the Port Authorities.

Berths 5B, 5C, 5D and 5E are equipped with conveyor belts for shipping granulated bulk ore.

Berths 9A, 9B and 9C have a conveyor belt for shipping fishmeal in pellets.

For discharge of grain, there are three pneumatic mobile suction towers and silos with a capacity up to 23,000 tons. The average rate of discharge of the pneumatic towers is 100/150 t.p.h. for two towers and 300 for one tower.
STEVEDORES: No particular advice necessary but Agent must receive Stowage Plan beforehand to advise Port Authority of planned operation.
Working Hours: 1st shift 0700–1200 hrs. and 1300–1600 hrs. 2nd shift 1700–2400 hrs. Both are compulsory, except 2nd shift on Sundays and Holidays. 3rd shift 0100–0700 hrs., optional, except after Sundays and Holidays when not worked. There is an additional charge of 25% for the 3rd shift.
Lighters: In the port, a lighter service is provided by private concerns to enable vessels to discharge at moorings, and thus reduce the time they are at the quays.
CRANES: There are a number of cranes with lifting capacity from 4 to 50 tons. The Callao Naval Base has a floating crane with a lifting capacity of 80 tons, which can be called upon if necessary.
MEDICAL: Advance information as to sick crew members not required but helpful. Ample first class facilities in the Lima area. Smallpox vaccination cards required.
TANKERS: *Petroleum Pier: Pier No. 7:* Max. depth 35 ft., however, depth in approaches to berth is 33 ft. at HW and 31 ft. at LW, max. length about 200 m.

There are numerous loading and discharge pipe-lines of different diameter to handle oil derived products.

These lines can be used simultaneously at the berths A and B, but also depending on store facilities on shore or delivery into trucks.
Discharging pressure of the lines: 100 lb. per sq. in. for 12 to 22 in. lines. On the pipe-line of 6 inches it is possible to reach a pressure of 250 lb. per sq. in., for discharge of LPG.
Connections: There are connections from 4 to 10 in. for all kind of flanges.
Water: Supply of water is possible, 40 t.p.h.

Discharge of ballast or slops inside mole prohibited. Tankers loading Fishoil must arrive free of ballast.
DENSITY: Sea water.
FRESH WATER: All berths equipped with fresh water supply at an average rate of 30 t.p.h.
FUEL: The following are available from Petroleos del Peru, Bunker "C" 3,500 seconds, Petroperu No. 5 (intermediate 4) 400 seconds, Diesel 2 (marine diesel) 100 seconds.
FIRE PRECAUTIONS: Use of Port Authority Fire Equipment mandatory during discharge of petroleum products with charge for service. Safety equipment charge accessed to all vessels on tonnaged moved.
GANGWAY/DECK WATCHMEN: Recommendable.
CERTIFICATES: All may be required but normally only the de-ratting certificate is asked for. If Ratguards are not used on all lines, vessel liable to fines.
CUSTOMS ALLOWANCE: Any amount over normal consumption usually cause difficulties including searching.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Authorisation required for all crew members.

REPAIRS: Normal Deck and Engine repair facilities available through private companies in Lima and Callao.
DRY DOCKS: Major repairs can be undertaken by the Naval Industrial Department, including careening and repairs in dock.
(*a*) Dry dock – length 632 ft., width 82 ft., depth 21 ft.
(*b*) Floating dock 107 – length 408 ft., width 48 ft., depth 20 ft.
(*c*) Floating dock 106 – length 288 ft., width 46 ft., depth 14 ft.
SURVEYORS: Lloyd's Register of Shipping, ABS, R.I., and N.V.

REPATRIATION: All foreign crew members who do not have Peruvian Visas which only obtainable abroad, must be repatriated by quickest means (Air) by Agent, paying all detention expenses. Peruvian and foreign crew members available.

AIRPORT: Lima/Callao within city limits has regular direct international service to North and South America, Europe and Far East.

HOLIDAYS: Only 1st May when work is not available.

SHIPMASTER'S REPORT: September 1980.

The following notes are to be read in conjunction with the appropriate section of "Guide to Port Entry" 1979–1980 edition.

Navigational Notice: All vessel navigating in Peruvian waters to a distance of 200 nautical miles from the coast are required to radio their position, course, speed and destination every 12 hours to: "Capitania General de Costera y Capitania de Puerto Callao" via Callao Radio which is very difficult to contact as naval traffic appears to be their main concern. Other coastal radio stations are even less available.

Documents: Cancel all reference to LAFTA documents which are now obsolete and also there is no longer any visaed or consular items to obtain. The requirements for air mailed copies still remains for bills of lading, cargo manifest and contents list where applicable. The remaining requirements are the same as listed.

Pilotage: The Pilots boarding station is 1.25 miles 095° from that marked on BA: Chart 1853.

Anchorage: Very large area to the North and West of entrance leading line. The area to the South is reserved for Peruvian naval and merchant vessels which navigate therein without lights on occasions.

Restrictions: The max. draft dictated by the entrance channel is 33 ft. 10 in. (10.30 m.). On occasions with a max. tide, vessels in excess will be docked but the chances are based upon the Pilots willingness. With a 3 ft. (1 m.) rise this vessel charted a minimum under keel clearance of 1.3 ft. on a draft of 34 ft. 3 in. within the channel outside the breakwaters.

Density: This was checked daily and found to be 1027.5 to 1028 in berth 11.

Berthing: For discharge of grain there are 3 pneumatic suction towers on rails with 3 suction pipes to each. The two Southern units are reserved for loading road trucks while the third and most Northern discharges onto the silo belt only. Thus delays may be experienced due to lack of trucks and subsequent order of discharge regulated to accommodate this factor. There is a minimum depth of 36 ft. by hand lead at this berth.

Fresh Water: Very early request via Agent and follow up. Max. 10 t.p.h.

Gangway/Deck Watchmen: The strictest watch must be maintained at ALL hours for persons who board to steal. The worst are those whose identity card is for "Tribulante" indicating a seafarer, for they know where most ships officers stow gear and where the keys to the chartroom are, etc. A patrol is required as well as a static gangway watch. Cargo thieves are very well organised.

Ashore no person should travel alone in Callao or Lima.

Port Authority Permits: These are required for repairs, overside painting, etc., and a 3 man inspectorate will board to check progress and conditions.

AUTHORITY: Port Captain, Terminal Maritimo de Callao.

AGENT: "La Hanseatica" S.A. – General Agents, Ship Agents, Brokers, Enrique Canaval Moreyra 340, floor 9 and 10, Lima 27 (San Isidro), PO Box 3049, Lima 1. Tel. 406447. Cable "Hanseat". Telex 25279–20029–20464.

CHANCAY: 11.35 S. 77.16 W. (See Plan Book)

Chancay is an unprotected open roadstead about 31 miles North of Callao. The main activities are the loading of fishmeal and discharging of fertilisers.

PILOTAGE: Compulsory. The Port Captain currently acts in this capacity.

ANCHORAGE: There is a good anchorage, in 5 and 8 fathoms of water, on a sand and mud bottom, located in the outer area of the bay, which is 1 mile long by 0.5 miles wide.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 2 Tugs of 56 h.p.

BERTHING: There is a pier for loading barges.

LIGHTERS: 12 lighters with a capacity of 40 tons each.

CRANES: 2×14 tons capacity.

STEVEDORES: The same system applies here as throughout the Republic, the tariff only altering according to the number of workers employed.

3 shifts and 2 more if necessary.

MEDICAL: Medical consultations possible.

FRESH WATER: Not available.

FUEL: Not available.

AUTHORITY: Port Captain.

AGENT: See "Callao".

CHIMBOTE: 09.05 S. 78.37 W. (See Plan Book)

Chimbote is a berth port with possibilities to load and discharge from and into lighters if berths are not available. Main activity: Loading of fishmeal and minerals; discharging of iron, steel, and general cargo.

DOCUMENTS:

For Entry

2 Entry Declarations (Form No.1).
1 Departure License of the last foreign port en route.
1 Maritime Health Declaration (Form No. 2).
2 Passenger Lists with entry baggage (Form No. 3).
1 Consular Roll of the last foreign port en route.
1 Consular Passenger List of the last foreign port.

Customs Administration

1 Original Cargo Manifest(s) with the Consular stamp. (Form No.4).
The envelope(s) from the Consul, enclosing copies of the Consular invoices, bill of lading and cargo manifest for the port with the Consular stamp.
1 Cargo Manifest (Form No.4).
1 Cargo Manifest of cargo, but with further destination for another national or foreign port (Form No. 4).
1 Cargo Manifest in transit.
1 Gross or Net Tonnage Certificate, with Consular visa.
1 Unaccompanied Baggage List (Form No. 5).

Customs

1 Entry Declaration (Form No. 1).
1 Cargo Manifest(s) for port without Consular visa (Form No. 4).
1 Manifest of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
2 Passenger Lists with entry baggage (Form No.3).
2 Not Accompany Baggage Lists (Form No. 5).
1 Crew Personal Effect List.
1 Store List, food and spirits.
1 Mail List.

Port Administration

1 Entry Declaration (Form No.1).
1 Passenger List with entry baggage (Form No. 3).
1 Not Accompany Baggage List (Form No. 5).
3 Cargo Manifests for the port, without the Consular visa (Form No.4).
3 Manifests of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
3 Sets of Bills of Lading.

Refer to "San Nicolas" for further information on Consular endorsement.

PILOTAGE: Compulsory. Official Pilot boards vessels at entrance to bay and leads ship to appropriate anchorage according to draft. Private Pilot to moor to the quays of the "Corporacion Peruana del Santa" and to "Sogesa". Vessels enter the inner roadstead, through Southern side of each channel. Depart through Northern side of channel.

ANCHORAGE: Good anchorages in bay according to draft. Anchorages are of mud and sand. Best place to anchor ship of medium draft is inner side of Paso del Norte, 6 fathoms deep, near port and safe. Another good anchorage for ship of medium draft is with Island bearing 170° and Rosas Blancas bearing 275°, 6 fathoms deep.

HEALTH: Health authorities board on arrival.

RADIO: Hablanaves Radio at Talara and Trujillo (Buenos Aires), Radio Costera at Callao.

Arrival Advice: 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 6 private, 3 of 80 h.p., 1 of 60 h.p. and 1 of 165 h.p. and 1 of 180 h.p. The Port Authority has two tugs, 1 of 400 h.p. and 1 of 200 h.p.

BERTHING: 3 Piers available.

No. 1 Pier: Length 158 m., width 16 m., depth alongside 27 ft. – 28 ft.

No. 2 Pier: Used only for the loading and discharge of lighters (fishmeal). Length 54 m., width 18.40 m. Average depth 4.5 m.

No. 3 Pier: Operated by Siderperu. Length 265 m., width 25 m., depth alongside 28 ft. – 31 ft. There are two bridges for discharging coke and minerals by clamp. (Total capacity 300 t.p.h.)

LIGHTERS: 12 for dry cargo: 2 at 150 tons and 10 at 50 tons. 10 tanklighters with a total capacity of 1,300 tons.

CRANES: 5 cranes: 3×17 tons, 1×13.8 tons and 1×6.25 tons capacity.

STEVEDORES: See "Callao".

MEDICAL: Agent arranges emergency attention. Hospital and private clinic available.

TANKERS: Three zones for load/discharge of fish-oil and lubricants. Ship loads fish-oil by barges being anchored. Discharge of fuel when ship anchored to buoys by means of submarine lines.

FRESH WATER: Two barges to supply fresh water to ships, one of 40 metric tons and other one of 25 metric tons. Fresh water available at Pier No. 1.

FUEL: Available by tanker lorries if special arrangements are made.

DEVELOPMENTS: New quays to be built.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary.

OPENING/CLOSING HATCHES: This job is carried out by stevedores.

CUSTOMS ALLOWANCE: Tobacco: 10 packets per person per week. Wine and/or Spirits: With approval of Customs, within normal consumption.

CARGO GEAR: Vessel's derricks used, the quay has fixed crane for 50 metric tons and three mobile cranes for 15 tons.

IDENTIFICATION CARDS: Needed for both crew and passengers.

CONSULS: Only the Vice-Consul of Spain and Panama.

REPAIRS: Only minor repairs are possible.

DRY DOCKS: "Sima" have a 15,000 ton floating dock.

REPATRIATION: Facilities for crew changes and arranging any necessary repatriation.

AIRPORT: Port has landing place for planes, but it is only for national use, not for international flights.

TIME: GMT minus 5 hours, all year round.

HOLIDAYS: Cargo work can be arranged on holidays with an extra 100% charge over basic pay. The only exception is 1st of May, on which cargo work cannot be arranged.

TELEPHONES: No arrangements for placing telephones on board. They are about 50 m. from ship.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: Not allowed to use wireless when ship is in port. Nor allowed to put any boat on the water without permission of Capitania del Puerto. Not allowed to throw any waste or litter into bay. Not allowed to make unnecessary sound signals.

GENERAL: *Swell Period:* February/March and June/October.

AUTHORITY: Capitan de Puerto – Direccion Capitania de Puerto Chimbote.

AGENT: See "Callao".

CONCHAN: 12.10 S. 77.00 W.

Tanker Buoy berth about 30 miles South of Callao.
DOCUMENTS: Tankers calling at Conchan must first call at Callao anchorage to be received and cleared by Authorities. Not necessary to call at Callao after discharge as clearance is simultaneous with reception.
PILOTAGE: Private Pilot boards vessel at Callao anchorage and either remains on board or returns to take vessel out, as required by Master.
BERTHING: Vessels moor to buoys. One submarine line of 16 in. reducing to 12 in. at vessel's connection, running 1,000 m. from shore opposite Conchan refinery.
LAUNCH: Launch service between Conchan and Callao or Conchan and Fish Pier at Barranco, southern suburb of Lima during vessel's stay in port.
GENERAL: Two Customs police and two refinery employees board at Callao and remain on vessel during discharge.

AGENT: See "Callao".

ETEN: 06.56 S. 79.52 W. (Port closed)

Eten is about 348 miles North of Callao. The port is an unprotected open road. All cargo operations are undertaken by lighters. The main activities are the export of sugar and import of fertiliser and general cargo.
PILOTAGE: Not available.
ANCHORAGE: Vessel anchor about 0.5 mile off the Mole Head in 7–8 fathoms, near the anchorage place of the lighters mooring out at sea, if draft requires, as loading progresses.
RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs of 80 h.p. each.
LIGHTERS: 13 lighters with a total capacity of 635 tons.
BERTHING: There is a pier for handling barges.
CRANES: 3 steam cranes, 2 × 2 tons and 1 × 15 tons. 1 diesel crane of 3 tons capacity.
STEVEDORES: See "Pimentel".
FRESH WATER: Not available.
MEDICAL: There is a hospital at Chiclayo 15 km. from the port. .
CONSULS: Vice-consul of the Netherlands.
GENERAL: *Swell periods;* Eten being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June/September and the Easter week.

AGENT: See "Callao".

GENERAL SAN MARTIN: 13.48 S. 76.17 W. (See Plan Book)

PISCO: 13.43 S. 76.14 W.

PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 16 tugs available. 10 h.p. – 800 h.p.
BERTHING: 1 quay with 4 berths each 175 m. in length. Max. draft 32 ft. (25,000 tons). Cargo is loaded by portable conveyor belts.
LIGHTERS: 28 wooden lighters for general cargo, total capacity 1,800 tons. 5 steel lighters (not immediately available), total capacity 600 tons. 3 lighters for liquid cargoes, total capacity 500 tons.
CRANES: 1×13.61 tons, 1×22.68 tons and 1×6.25 tons capacity.
STEVEDORES: *Working Hours:* 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2400 hrs., 0100 – 0700 hrs.
109 stevedores available.
MEDICAL: There is a hospital available.
TANKERS: *Submarine Pipe-line:* The pipe-line belongs to Petro-peru. Position 13° 36′ 20″ S., 76° 15′ 54″ W. Length of pipe-line 700 m., diameter 8 in. Pilotage is compulsory. Depth of water 7.5 fathoms. Pumping rate 70-75 t.p.h.
FRESH WATER: Available.
FUEL: Not available.

AGENT: See "Callao".

HUACHO: 11.07 S. 77.37 W.

Huacho is an unprotected open roadstead about 69 miles North of Callao. The main activity is the loading of fishmeal and minerals and discharging of fertilisers.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in open roads.
RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs available, 1 each at 50, 60, 72 and 180 h.p.
LIGHTERS: 29 lighters, total capacity 1,450 tons.
BERTHING: There is a pier for mooring barges, length 223 m.
CRANES: 3×13.60 tons each.
STEVEDORES: See "Pimentel" for working hours and overtime rates. 4 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Frequently during the Winter months (May–September).

AGENT: See "Callao".

HUARMEY: 10.06 S. 78.10 W.

Huarmey is an unprotected open roadstead for the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and Agent.
TUGS: 4 tugs available, 2 × 145 h.p. and 1 each at 120 h.p. and 165 h.p.
LIGHTERS: 18 at 50 tons each.
CRANES: 1 of 2 tons capacity and 1 mobile crane.
STEVEDORES: See "Pimentel" for working hours and overtime rates. 3 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* June to August.

AGENT: See "Callao".

ILO: 17.39 S. 71.21 W. (See Plan Book)

DOCUMENTS:
6 Entry Declarations.
4 Passenger Lists (disembarking).
4 Passenger Lists (in transit).
3 Personal Effects Lists.
3 Stores Lists.
1 Maritime Health Declaration.
3 Sets Cargo Manifest.
10 Cargo Manifest.
Refer to "San Nicolas" for further information on Consular endorsement.
PILOTAGE: No pilot station; there is a Pilot in the Capitania del Puerto, who should be notified in advance by Agents. Two hours notice of ETA required. Pilot boards at anchorage 800 m. from extension of the SPCC quay.
ANCHORAGES: 400 m. to the North of the end of the SPCC quay, in 15 fathoms depth.
MAX. SIZE: See "Berthing".
HEALTH: Pratique given by Captain of the Port. In cases of suspected illness a doctor should be requested in advance. When the ship arrives from another Peruvian port free pratique is automatic.
RADIO: Cables connect with National Communications network. ETA sent to Port Authority and to Agencies.
TUGS: 1×690 h.p. tug available.
BERTHING: Berthing anytime. There are two piers, one belonging to Southern Peru Copper Corp. and one to ENAPU.
SPCC: Two vessels are able to berth alongside. Length of pier 520 ft., width 60 ft. Depth alongside varies from 35 ft. to 50 ft.
ENAPU: Length of pier 300 m., width 27 m. Depth alongside varies from 18 ft. to 60 ft. Vessels able to berth both sides. South side depth 18 ft. at inner end, 54 ft. at outer end. North side depth 24 ft. inner end, 60 ft. outer end.
STEVEDORES: Stevedores come under the Capitania del Puerto and are ordered by Agents.
Loading Rates: Copper sheets loaded 65 metric t.p.h. Fish-flour loaded at 100 metric t.p.h. in an 8-hour shift.
Working Hours: 0700-1200, 1300-1600, 1700-2400, 0100-0700 hrs. Ten gangs available of nine men each.
MEDICAL: Medical assistance ordered by Agents. Hospital "El Centro de la Salud", and the Saint Geronimo Hospital.
TANKERS: *At Ilo:* Discharge line diameter 10 in., 2 lines, connection to the ship's manifold 8 in., connection and flexible line, working pressure 100 lb. A buoy mooring berth.
Depth of water 40 ft. pumping rate 80-90 t.p.h. Vessels of Petroperu have preference.
Punta Tablones: Discharge line diameter 12 in., connection to the ship manifold 8 in. Flexible connection line, working pressure 100 lb. or 400 barrels per hour. A buoy mooring berth.
Max. length 750 ft. Depth of water 40 ft.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Watchmen provided by Agents when necessary.
OPENING/CLOSING HATCHES: Strictly forbidden for the crew; must be done by stevedores.
CERTIFICATES: When the ship comes from foreign port it is compulsory to produce Certificate of Gross Tonnage.
CUSTOMS ALLOWANCE: Tobacco: 10 packets per person. Wine and/or Spirits: Sufficient for meal times. Normal crew consumption only.
IDENTIFICATION CARDS: Agents arrange for cards to be signed by Port Authority for each crew member.
CONSULS: None.
REPAIRS: Some minor repairs.
REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation. Those who are going to be repatriated must have a permit from the Port Authority to be allowed ashore.
AIRPORT: Ilo Airport, 8 kms. Scheduled flights twice a week on Tuesdays and Saturdays and regular airport in Tacna at 1.5 hours by taxi, scheduled flights twice daily to Lima.
TIME: GMT minus 5 hours. No alterations during the year.
HOLIDAYS: 1st January (New Year); Maundy Thursday and Good Friday (change every year); 1st May (Labour Day); 29th June (Saint Peter and Saint Paul); 28th and 29th July (Motherland Days); 30th August (Saint Rosa of Lima); 1st November (All Saints Day); 8th December (Our Lady); 25th December (Christmas).

Holidays which are not in the Calendar but are considered Holidays with reference to payments to the workers: 6th January (King's Day); 19th March (Saint Joseph); Corpus Christi (varies every year); The evening of the 24th June (India man day); 30th July (Motherland Day); 15th August (Feast of the Assumption); 24th September (Las Mercedes); 12th October (Race Day); 27th November (Tarapaca Battle); 9th December (Ayacucho Battle).
POLICE/AMBULANCE/FIRE: Southern Copper Corporation operate fire service. Police, tel. No. 3; Ambulance, tel. No. 3.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore and identify themselves with cards signed by Capitania del Puerto given through ship's Agents.
GENERAL: Tank cleaning and well cleaning must be done 5 miles leeward of port. Not allowed to unload explosive cargo.
DELAYS: Only delays when quay is occupied by two ships. In the load/unload operations the port can attend to 4 ships simultaneously and 4 more when new quay (that is now being built) is finished.
DEVELOPMENTS: Terminal quay of 900 ft. long is now being built.
AUTHORITY: Capitan del Puerto, who is a Navy Officer.

AGENT: See "Callao".

LA PAMPILLA: 11.55 S. 77.09 W.

Tanker Buoy Berth about 30 miles North of Callao.
DOCUMENTS, ETC.: As for Callao.
Tankers calling at La Pampilla must first call Callao anchorage to be received and cleared by Authorities. Not necessary to call Callao after discharge as clearance simultaneous with reception.
PILOTAGE: Pilot boards vessel at Callao anchorage and either remains on board or returns by launch to take vessel out, as required by Master.
BERTHING: Vessels moor to buoys. 1 submarine line of 18 in. reduced to 10 in. at vessel's connection running 1,500 m. from shore opposite La Pampilla refinery. Max. size 200,000 d.w.t. or 250,000 d.w.t. with part load.
LAUNCH: Launch service between La Pampilla and Callao during vessel's stay in berth.
GENERAL: 2 Customs police and 2 refinery employees board at Callao and remain in vessel during discharge.

AGENT: See "Callao".

MATARANI: 17.00 S. 72.07 W. (See Plan Book)

Matarani is a berth port. Main activity: loading of minerals, wool, coffee, skins, tin-ingots, discharging general cargo. Matarani is an important transhipment port for cargo to and from Bolivia.
PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent through Radio Station in Naval Station, frequencies as per Calloa.
TUGS: 1×780 h.p., 1×690 h.p. and 1×800 h.p.
BERTHING: 1 quay with 4 berths. Length 540 m., width 20.15 m. Vessels of 570 ft. length can berth. Depth alongside 30 ft.
Berth 1A, 1B and 1C each 150 m. length. Berth 1D presently length 90.50 m., but being lengthened to 132.9 m. length.
CRANES: 5×10 tons, 4×6.25 tons and 1×20 tons lifting capacity.
MEDICAL: A hospital is available.
STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1700–2400, 0000–0600 hrs.
9 gangs available of 15 men each.
FRESH WATER: Available.
FUEL: Not available.
DEVELOPMENTS: A Ro/Ro slipway is under construction at the Southern end of Muelle de Atraque.
GENERAL: *Swell Period:* From June to August.

AGENT: See "Callao".

PACASMAYO: 07.24 S. 79.35 W.

DOCUMENTS:

- 3 copies Voyage Log Extract.
- 2 originals and 5 copies of Entry/Exit Declaration, endorsed by Consul.
- 8 copies of Passenger Lists for the Port.
- 8 copies of Transit Passenger List.
- 4 copies of Store List.
- 4 copies of Personal Belongings Manifest.
- 13 copies of Cargo Manifest.
- 1 Maritime Health Declaration.
- 2 Crew Lists.
- 1 Vaccination List.

When this is the first Peruvian port, Gross Tonnage Certificates.
When having cargo for the port, Statement of Cargo, endorsed by Consul.
When Pacasmayo is the first or last port called, Lists or Manifests of cargo in transit (2 copies each).
Refer to "San Nicolas" for further information on Consular endorsement.
PILOTAGE: The port has no Pilots because it is an open bay. Vessels have free pratique after boarding by port officials.
ANCHORAGE: To the South of an East-West line from the quay as there are obstacles to the North.
APPROACHES: Reference points are the lighthouse of Cruz Punta Pacasmayo with a range of 12 miles, and during the day the cylindrical tower of cement factory with a height of 50 m. situated in the S.E. of the bay. On the head of the quay there is also a small iron tower of 9 m. height with a permanent red light of 2 miles visibility. The quay is very old and only flat boats can moor.
MAX. SIZE: Wide anchorage without problems concerning length or breadth. Recommended draft 4 fathoms, but it is possible to find 6, 8 or 10 fathoms towards the West. Current from South to North at an average of 6 knots.
HEALTH: Sanitary control is carried out by the health doctor who comes on board with port officials. Normally, captains notify any suspected illness or any other information by telegraph.
TUGS: They only operate to bring or take out flat bottomed barges once the vessel is moored.
BERTHING: Vessels anchor in open bay. There is an Iron Quay for the use of barges, length 533 m., width 10 m., depth at west end 3 m.
LIGHTERS: 9 lighters with a total capacity of 400 tons.
CRANES: 1×1 tons, 2×3 tons.
STEVEDORES: Agents order the number of gangs required. These gangs work at a tariff hour/ton and the amount is controlled by the Port Captain. The number of gangs (9 men each) depends on loading/discharging speed required and on the number of holds and winches available, For overtime rates see "Pimentel".
MEDICAL: Can be provided by Centro Preventivo del Area de Salud or by Hospital Regional de Chepen, 35 km. from port (150 beds).
DENSITY: Salt water.
FRESH WATER: Not available.
FUEL: Not available.
OPENING/CLOSING HATCHES: These operations are carried out by the stevedores.
SHIP CERTIFICATES: Deratisation or Fumigation Certificate; Vaccination Certificate for Crew and Passengers; Tonnage Certificate when coming from abroad.
CUSTOMS ALLOWANCE: Only tobacco, wines, spirits required for normal consumption, which must be included in vessel's stores list.
CARGO GEAR: Ships gear used.
IDENTIFICATION CARDS: Not required unless leaving the vessel.
CONSULS: There are no Consuls in the port.
REPAIRS: There is a small workshop in the port for minor repairs such as soldering, etc. There is no foundry.
DRY DOCKS: Nearest at Callao.
REPATRIATION: Members of crew of passengers can be repatriated subject to Port Authorities permission and passport control.
AIRPORT: There is a small emergency airport 2 km. from the port where planes can land.
TIME: GMT minus 5 hours. During the 3 months of Summer clocks advance 1 hour.
HOLIDAYS: Holidays have been restricted. The national official holidays are: 27th and 28th July (National Independence Days); 1st January (New Year); 25th December (Religious Fete); Maundy Thursday and Good Friday; variable days and 1st May (Workers' Day).
POLICE/AMBULANCE/FIRE: Police 2126; Ambulance 2225; Fire 2081.
TELEPHONES: It is not possible to instal telephones on board. Communication by walkie-talkie radio.
GENERAL: Fresh and dry provisions can be supplied, such as meat, poultry, vegetables and fruits.
SERVICES: There is no tank-cleaning equipment and the discharge of tank washing and any other kind of garbage is forbidden, for the bay is a bathing area.
SHORE LEAVE: Allowed.
DELAYS: The vessel is anchored on arrival. Delays can occur due to heavy sea or rain in case of cement loading.
DEVELOPMENTS: When the mines of Micchiquillay (copper) start working, the embarking capacity of the port has to be 100,000 tons per month, consequently it is planned to build a quay for minerals or otherwise a floating island 6 miles from the port for embarking in gross raw materials by pipe-lines.
AUTHORITY: Captain of the Port.

AGENT: See "Callao".

PAITA: 05.05 S. 81.07 W. (See Plan Book)

DOCUMENTS:

- 5 Copies Peruvian "Declaracion de Entrada".
- 13 Crew Lists.
- 5 Cargo Manifests, from each port where cargo loaded, or negative.
- 5 Copies of each Bill of Lading.
- 3 Personal Effects Lists.
- 13 Stores Lists.
- 1 Tonnage Certificate from first and last port.
- 1 International Maritime Health Certificate.
- 13 Passenger Lists, disembarking, or negative.
- 13 Passenger Lists, in transit, or negative.
- 1 Clearance from last port.
- 1 Sealed envelope from Peruvian Consulate addressed to Customs.

(Documents should be visaed by Peruvian Consulate.)
PILOTAGE: Compulsory. There are two Pilots, on 24 hour service. Arranged by Agent. The boat is an old disembarking launch, hoisting blue flag with a white "P" Pilot will board after free pratique has been granted by Port Captain and Health Authorities.
ANCHORAGE: Recommended 5° 04′ S. 81° 07′ W.
RESTRICTIONS: Draft restricted to 31 ft. at low water.
MAX. SIZE: Length and breadth practically unlimited.
HEALTH: Agent will notify Health Authorities about the vessel's arrival.
RADIO: Recommended Balboa Radio.
Arrival Notice: 24 hours Notice of Arrival should be sent to the Captain of the Port and Agent.

TUGS: 1 tug of 850 h.p., 1 tug 360 h.p. and one launch 60 h.p. used by the Pilot.
BERTHING: One finger pier, length 475 m. width 36 ft. Four berths available, depths are as follows:

No. 1A (North-west Berth)	32.0 ft.
1B (North-east Berth)	32.0 ft.
1C (South-west Berth)	23.8 ft.
1D (South-east Berth)	22.9 ft.

A safety margin of 3 ft. should be observed. It is advisable to request (from Pilot) berths "B" or "D", if empty, due to the prevailing winds. The berths have good fenders.

Cranes with capacity of 25,000, 15,000 and 10,000 lbs. available.
STEVEDORES: Arranged by Agent at 24 hours notice.
Working Hours: 0800-1200, 1300-1700, 1700-2400 and 0000-0700 hrs.
Night Work: Possible, as long as it is ordered in plenty of time.
10 gangs of 9 men each available per shift.
MEDICAL: There is a local hospital with all facilities.
TANKERS: There are 4 mooring buoys 0.25 m. East of the finger pier. Facility is the property of Petro-Peru. Oil loaded and discharged by submarine pipe-line.
DENSITY: 1030.
FRESH WATER: There are 3 drinking water hydrants on each side of the pier. Vessels require pumps to take on water from the storage tank (capacity 14 tons).
FUEL: Not available.
FIRE PRECAUTIONS: Port Authority fire equipment stationed at the end of the pier.
STORES: Fresh provisions available.
GANGWAY/DECK WATCHMEN: Available on request.
CERTIFICATES: Not requested.
CUSTOMS ALLOWANCE: Two cartons and one bottle per person.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Not required.
CONSULS: Ecuador.
REPAIRS: No facilities.
REPATRIATION: Allowed on request to the Port Captain.
GENERAL: Painting and chipping ship's side restricted. Very strict concerning rat-guards, throwing of garbage, etc.
AIRPORT: Piura, airport 55 km. with domestic flights to Lima International Airport.
HOLIDAYS: 1st May only.
AUTHORITY: Captain del Puerto.
AGENT: See "Callao".

PIMENTEL: 06.50 S. 79.56 W. (See Plan Book)

Pimentel is an unprotected open road port, loading/discharging only from/into lighters. Clearance is possible day and night, including Sunday and holidays, but of course with overtime additionals. Main activity: Sugar export, import of fertilisers and general cargo.
PILOTAGE: Not available.
ANCHORAGE: Vessels usually anchor about 1.5 miles off the Pier Head in 7-8 fathoms, near to the anchorage place of lighters mooring out at sea if draft requires, as loading progresses.
RADIO: *Arrival Notice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 2 at 82 h.p., 2 at 120 h.p. and 2 at 134 h.p.
LIGHTERS: 15 lighters with a total capacity of 1,170 tons.
CRANES: On the mole there are 3 diesel cranes each 3 ton capacity, 3 steam cranes with 4, 6 and 15 ton capacity. Max. dimensions of Cargo 27 ft. (length)×15 ft. (wide)×21 ft. (height).
STEVEDORES: *Working Hours:* 0700–1100 and 1300–1700 hrs. Overtime (plus 100%) 1100–1300 and 1700–2400 hrs. Overtime (plus 200%) 0000–0700 hrs.
On Sundays and holidays an additional 100% to the above-mentioned tariffs.
MEDICAL: There is a hospital at Chiclayo 15 km. from the port.
TANKERS: *Submarine Pipe-line:* Diameter 8 in. max. draft 18 ft. 1 pipe-line for clean products and 1 for dirty products. Length of pipe-line 1,770 m.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Vice-consul of the Netherlands.
SURVEYOR: Mr. Manuel S. Reyes H., sub-agent of Lloyd's of London.
GENERAL: *Swell Periods:* Pimentel being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June-September and the Easter week.
AGENT: See "Callao".

PUERTO CHICAMA: 07.42 S. 79.26 W.

Puerto Chicama is about 295 miles North of Callao. Fishmeal is loaded from lighters in an open roadstead.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor about one mile from the Mole.
RADIO: *Arrival Advice:* Advise general Agents in Lima who will telephone Port Agents.
TUGS: 3 tugs available, 1 of 65 tons and 2 of 80 tons each.
BERTHING: 1 Pier, length 324 m.
LIGHTERS: 20 lighters with a total capacity of 1,000 tons.
CRANES: 4 cranes, 2 of 2 tons, 1 of 4 tons and 1 of 6 tons.
STEVEDORES: Working hours are from 0700-2400 hrs. These hours may be exceeded to complete loading. Five gangs of 9 men are available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* During the months of June, July and August.
AGENT: See "Callao".

SALAVERRY: 08.13 S. 78.59 W. (See Plan Book)

DOCUMENTS: See "Callao".
PILOTAGE: Compulsory.
RESTRICTIONS: Harbour entrance is sand and liable to silting. Advisable to check draft requirements in advance, as depths are subject to latest dredging. Designed depths: Entrance channel 11.0 m. Basin 10.0 m. Berths 11.0 m.
MAX. SIZE: Approx. 25,000 d.w.t. with up to 29 ft. draft. Draft varies greatly and quickly due to heavy constant sanding, although dredging is practically continuous.
HEALTH: Cable Agent requesting free pratique. Agent must be notified in advance if disease suspected on board.
RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs available, 1 each at 690 h.p., 190 h.p., 85 h.p. and 40 h.p.
BERTHING: *No. 1 Pier:* Length 225 m. Vessels able to berth both sides. Max. draft 28 ft. There are pipes installed for the discharge of liquids and loading of molasses and alcohol.
No. 2 Pier: Length 230 m. Vessels able to berth both sides. Max. draft 28 ft. This pier is specially for the loading of sugar in bulk, 2 loading bridges available, loading rate 300 metric t.p.h. each.
STEVEDORES: *Working hours:* 0700–2300. Sugar and molasses in bulk loaded 24 hours a day. 10 gangs available of 9 men each.
CRANES: 1×22.68 tons, 1×13 tons, 2×6.25 tons and 1×4.5 tons.
MEDICAL: At Trujillo, 15 km. from the port.
TANKERS: *Submarine Pipe-line:* Length 700 m., diameter of 10 in., depth 26 ft.
FRESH WATER: Available. Capacity of shore tank 800 tons.
FUEL: Not available.
REPAIRS: Workshops available.
GANGWAY/DECK WATCHMEN: Recommended.
CUSTOMS ALLOWANCE: Any amount held over normal consumption may result in Customs search being imposed.
IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Required for all crew members.
HOLIDAYS: Only 1st May when work is not available.
CONSULS: Nearest at Callao/Lima.
GENERAL: Due to constant swell and undertow which, during Winter months, May/September, may even close port, it is recommended vessel moor with greatest possible number of synthetic lines which must be constantly adjusted, otherwise usual line breakage will increase.
AGENT: See "Callao".

SAN NICOLAS: 15.14 S. 75.14 W. (See Plan Book)

LOCATION: The port of San Nicolas Bay is located between the parallels of 15° 09′ 30″ S. and 15° 14′ 30″ S.

The harbour and its approach were surveyed in 1962 by the Peruvian Navy Hydrographic Service and the following charts were published in 1965: Chart 2218, scale 1:40,000 shows the San Juan and the San Nicolas Bay, Chart 2220 shows the Southern part and the pier area of San Juan Bay. Chart 2231 shows the Southern part and the pier area of San Nicolas Bay. The last two mentioned charts have a scale of 1:10,000 and 1:20,000 and were revised in 1972.
DOCUMENTS: The following documents are required for presentation to the port officials on arrival:

a. If San Nicolas is the first Peruvian port of call:

	Total	Port Capt.	Customs	Immi-gration	Agent
Clearance from previous port.	1	1	—	—	—
Health Declaration (Declaracion Maritima Sanidad). Form Organizacion Mundial de Sanidad. Reglamento No. 2 Anexo 5. (Master may prepare this upon arrival on form furnished by Agent if none available onboard).	2	1	—	—	1
General Declaration. Form No. 1 "Declaracion General". Instructions on reverse side of forms to be provided by Agent.	6	2	2	—	2
Crew Lists, Form No. 3, instructions on reverse side of forms to be provided by Agent.	6	2	2	1	1
List of passengers to San Nicolas from all ports of call, or statement that there are no passengers for San Nicolas.	6	1	2	1	1
Manifest of cargo (Sobordos) for San Nicolas, original visaed by the Peruvian Consul.	6	2	3	—	1
Manifest of cargo in transit	3	1	1	—	1
Store Lists, including itemized list of slopchest. It is most important that exact quantities of all stores be shown. Vessels at time of reception by Customs Officers will have physical check made, all quantities found is excess of those listed will be confiscated and vessel fined.	4	—	2	—	2
Bill of Lading (If there is any cargo to this port).	4	—	2	—	2

	Total	Port/ Capt.	Customs	Immi-gration	Agent
Crew's Personal Effects Declaration. It is most important that all cigarettes, tobacco, wine, spirits, radio sets, binoculars, cameras and all new articles in possession of officers and crew be shown in this declaration.	3	—	2	—	1
Crew List – Forms provided by the Agency.	8	2	4	—	2
Passengers Baggage Declaration (Itemized List)	3	—	2	—	1

Note: If no Peruvian Consul exists at the port of departure or within 50 kms. radius, then the documents which require consular visa should be signed by a consul of a friendly nation stating that there is no Peruvian Consul. If no consul of any nation exists at the port of departure, the documents above mentioned must bear a certificate signed by an official of the port stating that no consul of any nation exists at the port of departure or within 50 km. radius.

b. **If vessel calls at a Peruvian port prior to San Nicolas:**

	Total	Port/ Capt.	Customs	Immi-gration	Agent
Declaracion General	8	2	4	—	2
List of Passengers to San Nicolas from the past Peruvian port of call.	7	2	3	1	1
List of Stores including itemized list of slopchest.	4	—	3	—	1
Passengers' baggage declaration.	5	—	4	—	1
Crew's personal effects declaration.	4	—	3	—	1
Crew List	7	2	4	—	1
Manifest of cargo. Visaed by Peruvian consul, if coming from foreign port.	6	2	3	—	1
Manifest of cargo in transit	3	1	2	—	—

The above has been up-dated according to new Peruvian Government Regulations issued by Supreme Decree No. 036-72C, December 22nd, 1972.

According to this decree, all consular documentation applies only to vessels transporting commercial cargo either to this port or in transit. Therefore, all vessels arriving in ballast, have no need of any consular documents. The Masters must be sure to get the corresponding clearance from the previous port, and to fill in the official forms provided by the agency.

If the vessel has no forms on board, they will be filled in after arrival, and an extra set provided for the subsequent voyage.

Please note that the tonnage certificate, which was a "must" in the past, is no longer required, and therefore the Peruvian Authorities have not only simplified the system, but no consular charges are being made for vessels in ballast. On the other hand, controls are very strict and any attempt to contraband of goods is heavily fined; the same applies to any contravention of port regulations, which are internationally known, such as anti-pollution measures, use of the radio whilst at anchor, disorderly conduct of crew members, etc.

Entrance of visitors on board is also strictly controlled, and all visitors must be provided with an authorization slip issued by the Port Captain at the request of the Agent. Guests can go on board only at the request or with the authorization of the Master, who will deliver a list with the names of the guests to the Agent, in order to obtain the corresponding permit.

Normally Masters can change foreign currency in the local banks. Any crew member or passenger going ashore with foreign currency should change his money in the bank. But this is not now a strict regulation, as it was before. For security sake, however, it is better to change money in the bank or in the Agency Office. The Agency will help the Master with Peruvian cash advances, that he might require, or will direct crew members through proper channels to the local banks; but in emergency be sure first that you are changing your money in a reliable place.

c. **The following documents should be available for inspection:**

Ship's Papers.

Valid Fumigation or Exemption Certificate.

Crew's Identity Documents.

International Vaccination Certificates of all persons aboard.

List with following data: Date and port of issue of Ship's Register, date and port of issue of Health Certificate, date of vessel's building and yard, list of ports of call with dates during previous four months.

PILOTAGE: Pilotage is compulsory for berthing. When approaching the pier, the docking speed should not be more than 50 m. per second, or about 1 knot. No vessel may proceed to the pier until permission to berth has been granted. No vessel is permitted to berth alongside San Nicolas pier without an authorised Docking Pilot on board. While loading, during periods of heavy swells and surge a Pilot will be on board permanently. Masters are requested to make arrangements and facilities available.

Upon arrival in port, vessels must anchor and wait for reception. Official time of arrival is the time of anchoring. The starboard accommodation ladder must be rigged for Port Officials and Agency representatives. Ships approaching San Nicolas must fly their national, Peruvian, call letters and quarantine flags.

ARRIVAL ADVICE: All vessels proceeding to San Nicolas to load iron ore will radio Empresa Minera del Hierro del Peru. Cable address: HIERRO-PERU, and AGNAV SAN NICOLAS their ETA 5 days, 48 hours and again at 24 hours prior to arrival. When vessels have direct contact with station "OAS", a pre-stowage hatch list must be radioed to AGNAV, giving tonnage per hatch and loading sequence. The coast radio station "OAS" located in San Juan Bay should be contacted as soon as vessel is within range. Berthing instructions and other messages from the port Agent at San Nicolas will be transmitted via this station. The port agency is Agentes Navieros San Nicolas, S.A., telegraphic address AGNAV TELEX 20005PE SAN NICOLAS. Any inquiries regarding berthing, loading, etc., will be answered promptly when messages are sent via station "OAS". Changes in ETA should be sent via "OAS" whenever possible in order to reach the port agency with the least possible delay. Radio contact must be made 48 hours prior to arrival specially on week-ends and holidays.

Anything not related with vessels calling San Nicolas or San Juan, should be addressed to the Management Office in Lima, Paseo de la Republica 3587, 8th Floor or to Box 1229, Telex 20005PE, Tel. 410636.

BREAKWATER: A 2,653 ft. long breakwater has been built in order to reduce the effects of the swell alongside the pier. The breakwater is at the West side of the pier 875 yards off and does not run parallel to the pier, but at N. 36° 35′ 28″ E. angle. The North end of the breakwater is 1,430 ft. from the North end of the dolphin, but the perpendicular distance from the pier to the closest point of the breakwater is only 1,090 ft.

At the North end of the breakwater there is a lighthouse with the following characteristics: Fixed red light, visible 3 miles.

AIDS TO NAVIGATION:

a. San Juan Lighthouse, located on Pt. San Juan, Lat. 15° 21′ 27.2″ S., Long. 75° 10′ 49.1″ W. Characteristics: 2 w.fl. ev. 22.5 sec. light 0.4 sec. eclipse 3.6 sec. light 0.4 sec. eclipse 18.1 sec. Height of light over sea level 85.03 m. vis. 22 miles. Sector illuminated 360°. Type building: Circular concrete tower, white.

b. San Nicolas Lighthouse, located on Pt. San Nicolas in Lat. 15° 15′ 11.0″ S., Long. 75° 15′ 20.6″ W. Characteristics: 1 w.fl. ev. 4 sec. Height of light over sea level 58.60 m. vis. 20 nautical miles. Sector illuminated 360°. Type building: Square steel and plastic tower, painted 2 sides black and 2 sides white.

c. Fixed red light, vis. 3 nautical miles, located on the head of the San Nicolas pier.

d. Around the dolphin which is North of the pier head, there are 9 red lights, 10 ft. above the water level and lower than the dolphin deck, visible only from 1 mile distance.

e. There is a radio beacon located on 15° 21′ 27″ S. and 75° 10′ 09″ W., transmitting on 395 kHz – 24 hours and signal letters SJN.

f. In position Lat. 15° 14′ 36.5″ S. and Long. 75° 14′ 08.5″ W. exists a luminous buoy with following characteristics: 1 green flash ev. 4 sec. light 0.4 sec. eclipse 3.6 sec. sector illuminated 360° vis. 3 nautical miles. Height 5 ft.

ANCHORAGE: The anchorage recommended for vessels waiting for berth is in inner portion of the bay, North of the parallel and East of meridian through San Nicolas Point in depths of 15 to 20 fathoms. When anchoring, it is essential to leave sufficient sea room, about 0.75 miles for ships to manoeuvre in and about the berth.

Wreck of M/S *Templar* lies in position: Lat. 15° 13′ 27″ S., Long. 75° 15′ 01″ W., or 341° from the pier head, distance 1.6 nautical miles. The obstruction lies in approximately 150 ft. of water. Clearance above the obstruction is 60 ft. Do not anchor in the vicinity of the wreck.

MAX. SIZE: The following are the max. permissible vessel's characteristics, to be accepted at the Hierro-Peru – San Nicolas loading pier:

LOA – 1050 ft.

Max. beam – For OBO's, or bulk carriers 155 ft. (47.25 m.)
For ore carriers or O/O 161 ft. (49.00 m.)

Max. draft – 59 ft. (17.98 m.)

Max. distance from vessel's port side to port entrance of hatch coaming 55 ft. (16.77 m.)

Max. airdraft – 40 ft. 3 in. (12.26 m.)

RADIO: Coast Radio Station "OAS" is located in port of San Juan and serves both San Juan and San Nicolas. This station listens on 500 kc/s. 1200/2200 GMT each day. It handles traffic on 410, 425, 444, 448, 454, 468, and 480 kc/s.

There is a new transmitter with the following frequencies schedule:

8,680 kHz – GMT 1600/1630; 2000/2030
16,978 kHz – GMT 1330/1400; 1630/1655; 2100/2200

TUGS: 2 small tugs available at 150 h.p.

BERTHING: *Pier and Mooring Facilities:* The pier is located at the South side of the bay and is built on a North-South direction. It is constructed of pre-stressed concrete steel pipe-lines with deck 1,000 ft. long and 50 ft. wide. The deck is 11 ft. 3 in. above mean low water.

At the pier head, a 50 ft. diameter mooring dolphin has been constructed to make fast the stern lines of any vessel bigger than 900 ft. overall length. Distance from Northern end of pier to Northern end of dolphin 198 ft.

There are 3 big bollards, 2 pelican hooks and an electric winch to make fast the stern lines. There is also a connecting bridge from the pier to the dolphin, which is 148 ft. long.

There is a fendering system on both sides of the pier consisting of wood pilings and a continuous rail of laminated lumber and rubber cylinders which keep vessels 5 ft. from the concrete pier. On the West side of the pier (ore-loading side) there are 28 mooring cleats, 12 bollards and 3 double mooring bitts. At the centre of the pier-head there is 1 bollard. On the East side of the pier there are 23 cleats, 2 bollards and 1 double mooring bitt. The loading berth on the West side of the pier has been deepened.

The original depth in the berth was 42 ft. at the shore end and 59 ft. at the seaward end. The new depth is 62 ft. all alongside the pier and up to 300 ft. Westward from the pier fender, except in the place known as "anchor pocket" which is located between the pier-head and the dolphin. The anchor pocket is 70 ft. deep, 250 ft. long and 300 ft. wide. When docking the 2 anchors are let go in that pocket where enough water exists to prevent any collision of the ship with her own anchors.

The East side of the pier still has the original depth.

The bottom alongside is mud and sand. The ore ship loader has a pier straddle clearance height of 14 ft. and width of 12 ft. thus restricting the size of cargo parcels placed on the pier when the gantry is positioned inshore.

Berthing and Mooring: Vessels calling at San Nicolas for the discharging of general cargo must berth on the East side of the pier with the starboard side of the ship to the pier. Such vessels use their own regular mooring lines. Only ore in slurry form is loaded at this side through 20 in. pipe-lines.

Ore vessels berth at the West side of the pier with the port side of the ship to the pier. Wires are not permitted as moorings to the pier except when attached to tension winches.

VERY IMPORTANT: While vessels are alongside the pier, engines must be ready for immediate use. Sufficient crew must be on deck at all times to tend mooring lines and heave in the slack as loading progresses. Failure to do so may result in a discontinuance of loading and the vessel being moved out from the berth.

Loading and Unloading: Loading is generally carried out at the rate of about 2,500 long tons p.h. Vessels arriving with 50 tons of cargo or less may have a choice of barge rental while at anchor in the bay or have pier discharge subject to loading operation or other cargo vessels discharging at the pier.

Loading: Prior to commencement of loading the Master or Chief Officer will deliver to the port Agent a pre-stowage plan with the following information:

Total cargo required, calculated tonnage per hatch, sequence of loading, fuel on board, water and stores on board in long tons, and calculated draft and trim upon completion of loading.

Tonnage on board at any stage of the loading is available from the Loading Master, the Pilot on board, or at the scale house at the upper end of the pier. In order to avoid last minute delays, it is very important that a constant check be made of vessel's draft, ballast left to discharge and cargo on board during the entire loading. *Any change in tonnage of cargo required must be reported to the Port Agent or Loading Master not later than when there is approximately 2,000 long tons remaining for completion of loading, and always in writing.*

It is convenient to check drafts, ballast and tonnage of cargo on board each time the loading gantry shifts from one hatch to the next. While loading is actually in progress in a hatch, no loading interruptions are permitted except in case of emergency. At the termination of each pouring, a slip stating cargo loaded and draft readings, will be delivered to the Chief Officer.

In calculating the tonnage required to fully stow a hold, it should be remembered that cargo is spout trimmed only.

No trimmers are available at San Nicolas. Vessels will depart from the pier immediately upon completion of loading.

The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he must advise the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Captain.

Delays of port operations, as well as delays of other vessels waiting to berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, *are chargeable to the vessel which causes the delay.*

Clearance papers, bills of lading, statement of facts and all necessary papers for clearance of the vessel will be delivered shortly after completion of loading, outside of the pier by boat. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when other vessels are waiting for loading turn.

Slurry: For the new Marcona flow system a 20 in. diameter pipe-line has been installed and vessels adapted for slurry transportation can load either at the East or West side of the pier, depending on size and draft of the vessel. Hourly loading rate is about 1,250 long tons per hour.

CRANES: Nil.

MEDICAL: Medical attention may be arranged through the port Agent's office. No person will be attended unless he is provided with a letter from the Master authorising such treatment. All costs incurred will be for the vessel's account.

Send radio message advising how many people require medical attention in order to make proper appointments with doctors at San Juan Hospital. Otherwise the medical inspection will be very difficult.

STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1800–2400, 0100–0700 hrs.

TANKERS: On the West and East side piers there are 3 raisers to which 3×8 in. diameter hoses can be connected to a main pipe-line of 16 in. diameter for the discharging of bunker C. Flanges are U.S. Standard (ASA). Location on the pier is for midship connection on vessels. Maximum pressure permissible is 125 lb. p.s.i. and maximum temperature 135° F. The length of the 16 in. pipe-line from the manifold on the pier to the storage tanks is 4,840 ft. There are 2 storage tanks of 67,000 bbls. each and 1 storage of 252,000 bbls. The height of the tanks above MLW is 142 ft. to the bottom and 190 ft. to the top of the tanks. The intakes to the tanks are at the top.

Diesel oil is discharged on the East side of the pier, using one hose to an 8-in. diameter pipe-line. Flanges are U.S. Standard (ASA) with 8 bolt holes. The length of the 8 in. pipe-line from the hose connection to the storage tanks is 3,706 ft. Maximum permissible pressure is 125 lb. p.s.i. There are 2 diesel oil storage tanks of 7,340 bbls. each (total capacity 14,680 bbls.).

The height of the tanks above MLW sea level is 145 ft. to the bottom of the tanks and 177 ft. to the top of the tanks. Intakes to the tanks are at the top. There is no booster pump on the pipe-line.

There is a crew on the pier to sling the hoses; the vessel's crew is required to operate the winch, boom, hoist the hoses on board, and connect same to vessel's manifold.

BALLAST: Special attention is called to ballast requirements of vessels which do not need ballast in order to enter under the loading boom. Such vessels are required to carry sufficient ballast for safe handling during berthing. It is permissible to discharge clean ballast at the pier.

A ballast discharge rate of 4,000 long tons per hour is recommended. Any delay in loading operations due to slow deballasting, is not only on account of the vessel, but if any other vessel is waiting for loading turn, the vessel slowing down the loading process is liable to be undocked in order that the vessel waiting for turn to load may be docked. All time lost and expenses for undocking and redocking the vessel is for owners account.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Recommended by crewmen to prevent stowaways.

OPENING/CLOSING HATCHES: Stevedores/crew.

CARGO GEAR: Ore-loading boom extends 60 ft. from face of pier fender, and can be retracted from this position to a minimum length of 29 ft. Gantry with loading boom is mobile. Range of its mobility is 900 ft. starting at a point 110 ft. from the head of the pier. Shifting of vessels during loading is therefore not required. When not loading, the gantry is parked at the inner end of the pier, and its boom with the loading conveyor belt is raised in a vertical position. In the most vertical position the boom has a clearance of about 4 ft. inside the face of the dock fender.

After the gantry has been moved into loading position, the boom is lowered to horizontal position. Height from water to underside of boom is 41 ft. Vessels must be ballasted so that height of any coaming or any other objects in the vicinity of the hatch where loading is to start will not exceed 40 ft. above waterline.

IDENTIFICATION CARDS: Required (Seaman's Book or Passport).

CONSULS: At Lima.

REPAIRS: Except in extreme emergency, ship repairs cannot be effected at this port.

TELEPHONES: Available, Masters are able to communicate with any port in the world.

REPATRIATION: In cases where crew changes are to take place in San Nicolas, at least 7 days advanced cable notice is required to obtain the necessary Immigration Authorities permission. The advanced cable must set forth name, nationality and passport number. If the above is not complied with, crew changes cannot be carried out. The above applies also to passengers.

HOLIDAYS: See "Ilo".

GENERAL: *Reception:* Official hours for Port Officials are from 0700 to 1100 and 1300 to 1800 hrs. Monday to Friday. Upon request, Port Officials will board vessels at any time day or night, Sundays and holidays included. Overtime for such service is for account of vessels. Office hours for loading operations are from 0800 to 1600 hrs. Monday to Friday, Saturday 0800 to 1200 hrs.

Emergency Signals: A number of short blasts on the whistle indicates an emergency. The whistle will not be used except for emergency in accordance with Peruvian regulations.

Provisions: Provisions are available from a local ship chandler. Cable address: PRONAMAR SANNICOLAS. Cold, chilled and dry stores available upon arrival. Mailing address: Pronamar y Cia., S.A. c/o. Empresa Minera del Hierro del Peru. Apartado 1229, Lima, Peru. Neither Agnav or Hierro Peru has any interest in this independant company.

Stowaways: Unauthorised persons should not be allowed on board the vessel. Cases of attempted stowaways have occurred. Masters must take all necessary care and precautions to insure against unauthorised personnel being on board while in port.

Stowaways aboard on arrival should be reported to the Port Captain in order that the necessary steps be taken to prevent their unauthorised landing. It should be noted that all costs for the repatriation of stowaways is for account of the vessel concerned.

Crew members left ashore at time of departure: Masters are requested to have all vouchers and lists of personal effects (in triplicate) prepared for delivery to port Agent as soon as possible covering deserters and hospitalized crew members.

A letter of authorisation is required when the port Agent is expected to provide hotel accommodation, meals, medical attention, transportation travel expense, and/or cash advanced for account of vessel.

No man may be paid off from a foreign vessel without prior permission from the Port Captain. Under Peruvian Law, Agents are responsible for repatriation of all foreign seamen left in Peru. Masters will be requested to sign letter of indemnity covering seamen landed for hospitalization, paid off, or desertion. Disembarking of crew or passengers for reasons other than emergency is not permitted at this port, unless the prior authorisation of Peruvian Immigration and Maritime Authorities is granted to that effect. Authorisation for disembarkation requires at least 7 days prior notification by radio. The notification must provide names, passport number, age and nationality of persons to be embarked or disembarked.

WEATHER: There is generally a prevailing S.E. wind which may vary from a light breeze to a strong wind. The months of May, June, July, August and September are Winter months. Swell and surge are occasionally experienced in the port.

At the pier head there is installed a swell recorder and a wind indicator whose readings are given to the Pilots by walkie-talkie.

SHORE LEAVE: Shore leave may be granted at the Master's discretion. All crew members must be issued ship's passes before proceeding ashore. These must be shown to the Immigration Authorities when required. Peruvian laws and Immigration Regulations must be strictly adhered to in order to avoid unnecessary difficulties. Crew members are not permitted to travel 100 km. outside of San Nicolas – San Juan port areas without written authorisation or pass from the Master approved by Immigration Authorities.

CONDITION OF CARGO HOLDS: On general cargo vessels, it is recommended that the battens be removed from the lower part of the lower holds and also, if possible, the ladders leading to the same. Exposed deep tank covers on all vessels must be securely bolted down.

The above recommendations and requirements are given in order to prevent damage at the discharging port.

Prior to loading, remove all hatch beams in the upper and lower decks and swing all cargo booms to starboard side clear of the hatches. In ore or bulk carriers none of the above is required.

Cargo holds must be properly cleaned. In this respect special care must be taken where vessels prior to their arrival at San Nicolas have carried the following cargoes: Gypsum, Phosphate, Pyrite, Coal, Sulphur, Silica, Aluminium, Sand, Gravel, or Quartz, or any other ore containing Arsenic, Phosphorus, Sulphur, Silica, Aluminium, or Copper.

Prior to commencement of loading, cargo holds will be inspected by a representative of the Shippers. It is recommended that the Master or a ship's officer accompany the cargo hold inspector during the inspection.

NOTICE: *Delivered to Masters upon Arrival.*
To: Master M.S.S. ______________________
From: AGENTES NAVIEROS SAN NICOLAS, S.A.
Subject: *Peruvian Regulations*

Please be advised of the following regulations, which we recommend to pass on to your crew for guidance:

Item 1 – *Officers or crew members are not allowed to cross the gate – in or out*

If they do not show an identification permit signed by the Master of the vessel or their respective seaman's book.

Problems derived for not complying with this regulation are for vessel's account.

Crew members can travel no further than 100 kms. outside of San Juan. Nasca is the furthest place they can go without special permit.

Item 2 – *Peruvian Post Regulations Prohibit to put Scotch Tape to any kind of Mail.*

Mail with scotch tape will be rejected.

All official and crew mail should be delivered to the Agents only. Any mail delivered to other persons is not under our responsibility.

Item 3 – *Crew members are not considered Tourists*

For this reason they are not permitted to take any articles ashore (cameras, transistors, etc.). If they do that without the respective permission obtained through the Agency, the articles will be confiscated (Law No. 16185 Repression to Smuggling).

Item 4 – *Port Regulation*

Vessel will Depart from the Pier Immediately upon Completion of Loading.

The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he MUST ADVISE the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Captain, San Nicolas.

Delays of port operations, as well as delays of other vessels waiting for berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, ARE CHARGEABLE TO THE VESSEL WHICH CAUSED THE DELAY.

Clearance Papers, Bill of Lading, Statement of Facts and all necessary paper bills for clearance of the vessel will be delivered shortly after completion of loading. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when another vessel is waiting for loading turn.

AGENTES NAVIEROS SAN NICOLAS, S.A.

Acknowledged: ______________________________
Master's signature & stamp of Vessel; Date & Hours received

MAIL: All mail received for holding by the port Agent, will be delivered to the vessel upon arrival. For quickest delivery, mail should be addressed as follows: c/o Agentes Navieros San Nicolas, S.A., Apartado 1229, Lima, Peru.

Officers or crew members should be advised that duties will be charged by the Peruvian Customs Authorities on contents of parcels mailed to them at Peruvian ports. Outgoing ship and crew mail will be accepted ONLY directly from the Master or his designated officer. The vessel will be billed the corresponding amounts for postage. Mail should be delivered to the agency not later than 3 hours prior to departure in order to close the vessel's accounts prior to departure.

AGENT: Agentes Navieros San Nicolas, S.A. P.O. Box 1229 Lima. Cables: "Agnav Sannicolas".

SUPE: 10.48 S. 77.45 W.

Supe is about 84 miles North of Callao. Cargo operations are undertaken in an open unprotected roadstead. The main activities at the port are the loading of fishmeal and discharging of fertilisers, cellulose and chemical products.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

RADIO: *Arrival Advice:* 24 hours Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 8 tugs available, 1 of 65 h.p., 2 of 85 h.p., 4 of 134 h.p., and 1 of 165 h.p.

BERTHING: There is a pier for mooring barges length 331.5 m.

LIGHTERS: 32 (14 of wood and 18 of steel) for dry cargo only. The capacity of the lighters varies from 50 to 100 tons. Total capacity being 2,100 tons.

CRANES: 3×9 tons and 1×11 tons.

STEVEDORES: See "Pimentel" for working hours and overtime rates. 5 gangs of 9 men available.

MEDICAL: There is a hospital at Barranca.

TANKERS: *Submarine Pipe-line:* One line 10 in. diameter for dirty products and one line 8 in. diameter for clean products. Depth of water 48 ft. At Paramonga there is a 10 in. line, depth 36 ft.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* June/August.

AGENT: See "Callao".

TALARA: 04.35 S. 81.17 W.

DOCUMENTS, and all general information, refer to "Callao".

PILOTAGE: Compulsory. In the vicinity of Talara there are several off-shore oil drilling platforms and near the entrance to the port there is a shallow of 24 ft.

ANCHORAGE:

Summer	04° 34′ 09″ S.	81° 17′ 36″ W.	9.25 Fathoms
Winter	04° 34′ 12″ S.	81° 17′ 29″ W.	10 Fathoms
3rd Place	04° 34′ 03″ S.	81° 17′ 42″ W.	6-10 Fathoms

RADIO: Arrival Notice should be sent at least 24 hours before arrival to Captain of the Port and Agent via the government radio station OAH. Station on 500kc/s. from 0800 to 2400 hrs.

TUGS: 1×13.5 h.p.

BERTHING: At Talara there are 2 berths for loading fuel and water; 1 is a regular quay, the other a petroleum berth in which vessels lie, moored to dolphins alongside hose platform.

Quay length 385 ft., depth alongside 18 ft. to 34 ft.

Petroleum berth, length 585 ft., depth alongside 34 ft.

Talara is mainly a bunkering port as it is the main port for the Northern Peru Oilfields. The little general cargo discharged is done at the quay; bunkering being done at the quay and at the dolphin berths.

Larger vessels load/discharge into lighters at anchorage. Seven lighters are available, total capacity 1,400 tons.

CRANES: 3×5 tons, 1×31 tons and 1×22.5 tons.

TANKERS: See "Berthing".

Submarine Pipe-lines: 12 in. diameter. Vessels with a max. draft of 36 ft. can moor to the pipe-line.

STEVEDORES: It is possible to work 24 hours a day with interruptions at meal hours. 3 gangs of 16 men each available. Overtime only charged for Sundays and holidays at 50%.

FRESH WATER: Available alongside berths.

FUEL: Available alongside berths. Bunker "C" 3,500 seconds, Petroperu No. 5 (Intermediate 4) 400 seconds, Diesel 2 (marine diesel).

MEDICAL: A private clinic is available.

CONSULS: Panama and Nicaragua.

REPAIRS: Minor repair facilities.

GENERAL: Smoking is prohibited on deck, at the piers and near the refinery installation.

AGENT: See "Callao".

NOTES

Please also advise Shipping Guides Ltd.

Philippines

GENERAL

DOCUMENTS: *To be submitted in all Government & Private ports:*

1 copy of Quarantine Pratique.
6 copies of the Inward Cargo Manifest for all cargoes to be discharged in the Port.
2 copies of Cargo Storage Plan or Hatch List.
3 copies of Store List.
3 copies of Passenger List.
4 copies of the Crew List.
4 copies of the Crew Declaration List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition Inventories.
3 copies of List of Drugs and Narcotics.

Original copies of all through cargo manifest destined to other ports to be deposited with the Customs Inspector on board and to be returned to the Master prior to the departure of the vessel.

Clearance from the last port.

SHORE LEAVE: Nationals of countries with whom the Philippines maintains diplomatic relations are allowed ashore after securing a pass from the Immigration Officer in the Port.

REGULATIONS: We quote below pertinent sections of PPA Administrative Order No. 13–77 regarding PPA General Port Regulations on Arrivals/Departures of Vessels and Berthing Regulations:

Article II – Arrivals and Departures

Section 4. *Notice of Arrival* – The Owner or Agent of every vessel other than a vessel of 100 g.r.t. or less, intending to call at a port shall, within the time specified in Section 29 of these Regulations, prior to the ETA, give notice in writing to the Authority of its arrival, and make application for a berth if it is intended to berth at the wharf, pier, or anchorage within the Port, Port District or harbour limits.

Section 5. *Particulars to be furnished* – The notice of arrival and the Application for a Berth shall be a form prescribed by the Authority and shall contain full particulars regarding:

(a) Name of vessel and its flag.
(b) The Gross Registered Tonnage (g.r.t.) and Net Registered Tonnage (n.r.t.).
(c) Draft, LOA, and beam.
(d) Names of the Owner, Master, ship's Agent in the port of call.
(e) ETA and ETD of vessel.
(f) Tonnage of cargo to be discharged and loaded.
(g) Dangerous Cargo (Whether to be discharged or not).
(h) Number of passengers, disembarking and embarking.
(i) Any other pertinent information relating to the working (e.g. heavy lifts) or safety of the vessel in the port.

Section 6. *Hoisting of National Colours* – The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted its national colours and signal letters, if any. The national colours shall continue to be exhibited while the vessel remains in port.

Section 7. *Immigration and Quarantine Signals* –

(a) The Master of every vessel arriving from a foreign port shall exhibit the Customs, Immigration and Quarantine signals as prescribed by those government agencies. Such signals shall remain hoisted until the proper officer has given the permission to lower those signals.
(b) No vessel other than an authorised vessel shall approach within 200 m. to a vessel which is exhibiting the Immigration, Health, or Customs signals. An authorised vessel shall mean an Immigration, Health, Customs, Pilot Launch, or Philippine Coast Guard (PCG) vessel.
(c) No person other than a Pilot or authorised government officer(s) may board or disembark from any vessel coming from a foreign port until the vessel is cleared by the Immigration, Quarantine, Customs and PCG officers and the respective signals have been lowered.

Section 8. *Securing of Vessel before Discharge/Loading* – Every vessel entering a port shall be anchored or properly secured to a wharf, pier, or buoy before commencing the loading or discharging of cargo, and/or the embarkation or disembarkation of passengers.

Section 9. *Port Clearance* – No vessel shall leave a port unless in possession of a valid PPA Port Clearance issued by, or on behalf of, the Authority, in addition to the requirements of other government agencies and the final clearance issued by the PCG.

Article IV – Berthing

Section 29. *Berthing Regulations* –

(a) The allocation of a berth belonging to, or operated by, the Authority shall be at the Authority's discretion.
(b) A vessel shall be considered for berthing allocation only after the Agent of said vessel has filed an application for berth.
(c) All applications for berthing at pier/wharf/anchorage shall be submitted 24 hours before arrival for vessels on scheduled runs and 36 hours for tramping vessels (without regular schedules). In either case application should be filed within sufficient allowable time.
(d) All applications received after berthing meeting shall be deliberated upon the following day before the actual arrival of the vessel.
(e) No vessel shall be berthed or unberthed alongside a wharf or pier belonging to, or operated by, the Authority without its permission or contrary to its directions, nor shall any vessel occupy a berth other than the berth allocated to said vessel.
(f) First-come-first-served basis shall be the general rule in determining berthing priorities of vessels, subject to the exceptions hereunder provided. Vessel's arrival will mean the time a vessel drops anchor at the Anchorage Area when there is no available area or the time a vessel reaches the Port's Boarding Area when a berth is available.
(g) When the available berthing space is inadequate for berthing a larger vessel having the priority to berth, the smaller vessel next in priority which can be accommodated shall be allowed to berth on condition that should additional space be made available such that the larger vessel can be accommodated, the smaller vessel shall be moved to the anchorage to allow the larger vessel to berth.
(h) The Pilot manoeuvring a vessel to berth shall be advised by the Authority as to the position or berth which the vessel will occupy and the vessel shall comply with the directions or instructions therefor of the Authority and/or the Pilot.
(i) When a vessel scheduled to berth encounters some mechanical troubles thereby restraining said vessel from docking, an allowance of one (1) hour shall be given for repairs. If after the lapse of this grace period, said vessel is still inoperative, the priority to berth shall be passed on to the vessel having the next priority to berth.
(j) Vessels with berthing priority but scheduled to depart the following day shall be allowed to berth to allow passengers to disembark. Provided, however, that said vessel shall pull-out from berth to give way to passenger vessel scheduled to depart on the same day.
(k) Any vessel intending to berth solely for the purpose of loading fresh water, bunkering or victualling, before such vessel will be able to depart for another port, shall be given priority over other vessels, provided that such stay shall not exceed the time fixed by the Authority.
(l) Government-owned vessels on official business, vessels of foreign government not engaged in foreign trade, vessels under stress, and vessels carrying perishable articles or goods shall be given berthing priority over other vessels.
(m) Whenever practicable, passenger liner or tourist vessel shall, subject to the discretion of the Port Manager/OIC, also be given priority of a limited number of hours stay at berth over purely cargo vessel.
(n) Berthing priority of any vessel shall not be waived in favour of another vessel.
(o) Vessels waiting for cargoes shall be moved to anchorage to allow the next vessel to berth. However, said vessel shall be allowed to berth again, provided that cargoes for loading are ready, unless another vessel is allowed to take the berth temporarily by the Authority.
(p) Domestic vessels may be allowed by the Authority to dock at berths designated for foreign vessels if there are no other vessels waiting to dock at such berths.
(q) Shut-down time caused by heavy rains and other major calamities or accidents which will stop work on a vessel shall be excluded from the time limitation prescribed herein. However, breakdown of lifting gear and also loading of fresh water, bunkering and victualling which should be done simultaneously with cargo handling operations shall not be considered as reason for time extension.

ANTIMONAN: 14.00 N. 121.55 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976.

Berth in position 14° 00′ 30″ N., 121° 55′ 30″ E. Vessel required to be ballasted to one third deadweight. Tidal range 6 ft. Nature of bottom at berth, mud and sand. Density 1025. Anchorage 0.5 mile S.E. of jetty.

Terminal Information: Ship's hoses used to rail only. Length of shoreline, 3,000 ft. diameter 8 in. Products handled at the berth, coconut oil and pellets of copra.

Port Information: Pilotage compulsory. Notice of 24 hrs. and 12 hrs. required. Pilot boards from a small catamaran flying the pilot flag. Boarding position 2 miles S.W. of the port. Vessel is able to enter or leave at any stage of the tide. Vessel cannot enter after dark and it is not advisable to leave after dark as some of the piles on the sea bed near the jetty are broken. Also there are no navigation lights in the bay and many vessels are fishing. Max. LOA 650 ft. Max. beam 100 ft. Max. draft 44 ft. No tugs available. Radio station used, Manila, though messages delayed in receipt at Antimonan.

Facilities available: Fresh water in small quantities for cash. Fresh provisions, groceries and meats in small amounts, doctor and hospital. No repair facilities, laundry, fuel or slop facilities.

Improvements: The face of the jetty is being piled and breasting dolphins created. Completion expected by mid 1977.

At the present time a barge is inserted between the ship and jetty as the piling is broken.

APARRI (Including Port Irene, San Vicente, Claveria and Divilacan): 18.22 N. 121.38 E. (See Plan Book)

PORT LIMITS: Quarantine anchorage or loading point.

DOCUMENTS: *Before the vessel's arrival:*

Submit/transmit to Philippine Ports Authority (PPA-PMU) Aparri, the vessel's Notice of Arrival, at least 48 hours before ETA for foreign vessels and 24 hours before ETA of domestic vessels.

Upon vessel's arrival:

Submit to PPA-PMU-Aparri a copy of the following documents:

Inward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels)
Passenger Manifest
Crew List
Stowage Plan/Hatch List
Transit Cargo/Manifest (if any)
Oath of Master
Vessel's Roll Book – to be temporarily filed
Vessel's Information Sheet – to be accomplished

Before Vessel's departure:

Submit to PPA-PMU-Aparri a copy of the following documents:

Outward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels)
Passenger Manifest
Transit Cargo Manifest (if any)
Oath of Master

Entrance and clearance formalities in the traditional sense of the terms of foreign and domestic vessels shall remain with the Bureau of Customs until Port Management Unit's own clearance is duly stamped in the Manifest and after all port charges, fees, dues and other charges had already been paid.

Payment of charges leviable against the vessel and cargo shall be made either in cash, Manager's or Cashier's Check to the Port Management Unit.

Notice must be transmitted to Port Management Unit Office of Aparri when Export Entry is processed and Wharfage fee is paid to the Philippine Ports Authority – Manila.

PILOTAGE: ETA to be sent to Aparri Pilotage Station, Aparri, Cagayan.

Pilot Boat is a motorised launch.

ANCHORAGES:

Port of Aparri: Boundaries – Lat. 18° 22′ 39″ N., Long. 121° 35′ 33″ E. Depth – 11 fathoms.

Port Irene: Boundaries – The portion between Nulton Pt. and Batulinao Pt. This bay known as Casambalangan. Depth – 12 m.

San Vicente Port: Boundaries – Lat. 18° 30′ 43″ N. Long. 122° 08′ 26″ E. Depth – 15 fathoms.

Sub-port, Claveria: Boundaries – Between Centenela and Lacaylacay Pt. Depth – 15 fathoms.

Port of Divilacan: Depth – 11 fathoms.

RESTRICTIONS: Enter channel at daytime only.

RADIO: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

VHF: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

RADAR: Pagasa Weather Bureau Radar, located in Bukig, Aparri, Cagayan.

TUGS: Available at Claveria, Aparri and Port Irene.

BERTHING:

Port of Aparri: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.

Port Irene: One available berth. Ship to pier with ship's derricks. Cargoes to be handled at a specified reclaimed area.

San Vicente: Anchorage area.

Sub-port, Claveria: Anchorage area. Ship's side loading and ship's own derricks. Cargoes handled at Shipper's warehouse log pond.

Port of Divilacan: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shippers log pond.

CRANES: Truck mounted cranes.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridges.

STEVEDORES: North Luzon Stevedoring and Lighterage Service, Aparri, Cagayan.

MEDICAL: Aparri Hospital.

TANKERS: River stream-draft 16 ft. Discharge lines are through depot discharging pipe-lines Aparri, Cagayan.

DENSITY:

Port of Aparri: 30%.
Port Irene: Salt.
San Vicente Port: 30%
Sub-port, Claveria: 30%
Port of Divilacan: 30%

FRESH WATER: None.

FUEL: Diesel, gasoline and kerosene.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: None.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMAN: Available from Stevedore in Aparri.

HATCHES: Normally carried out by crew and stevedore.

CARGO GEAR: Cranes.

REPATRIATION: With permission of Bureau of Immigration, Aparri, Cagayan.

AIRPORT: Flights Monday, Wednesday and Friday.

TIME: GMT plus 8 hours.

HOLIDAYS: Philippines Ports Authority, operations personnel served Special and legal holidays.

POLICE/AMBULANCE/FIRE: No telephone. Aparri Integrated National Police Station, Aparri, Cagayan. Aparri Emergency Hospital, Aparri, Cagayan. Aparri Fire Department, Aparri, Cagayan.

TELEPHONES: None.

SHORE LEAVE: Request permission from the Bureau of Customs.

SERVICES: None.

IDENTIFICATION CARDS: Issued by the Bureau of Customs and Philippine Ports Authority.

REGULATIONS: See "General" before first port.

DELAYS: Weather conditions.

AUTHORITY: The Collector of Customs, Bureau of Customs, Aparri, Cagayan.

BATAAN (Limay): 14.30 N. 120.38 E.

(A) BATAAN. (B) BATAAN – SEA BERTH.

SECTION (A)

See "General" before first port.

PILOTAGE: Pilotage is compulsory, Pilots assigned by the Manila Pilots Association. Pilot boards vessel just off the berth.

ANCHORAGE: There is a good anchorage with depth of 9.1 m.–11.3 m.

RESTRICTIONS: Approaches are open deep water. Vessels may berth and unberth at any hour and any stage of the tide. Keel clearance of 10 ft. required.

MAX. SIZE: LOA 1,000 ft. Max. draft 52 ft. at conventional buoy mooring. See "Section B".

RADIO: Manila Radio. At the berth, shore communication with vocaline JRC 475 transceivers on 465 Mc/s.

HEALTH: Port health officials board with the Pilot. Radio request for free pratique can be made prior arrival.

TUGS: Available.

BERTHING:

Private Piers

	Length (m.)	*Width (m.)*	*Depth (m.)*
Bataan Refining Corp.	343.20	15.90	9.90 to 30.00
Planters Products	317.99	n.a.	14.60
LPG Pier	24.60	3.00	5.40

DENSITY: 1025.

MEDICAL: Doctor and hospital facilities available. Advance notice required of any medical attention needed.

TANKERS: *Products Pier:* Inner berth depth 13 ft. Outer berth depth 32 ft. Can accommodate vessel up to 530 ft. length. No slop discharge facilities available. Also see "Shipmaster's Report – September 1980" and "Section B".

FRESH WATER: Not available at berth. Can be supplied by barge.

FUEL: Bunkers, fuel and diesel, obtainable from berth, advance notice required.

REPAIRS: No facilities available.

CERTIFICATES:

Certificate of Registration.
Certificate to Operate.
Certificates of Officers and Engineers (Licenses).
Officers and Seaman's book.

CUSTOMS ALLOWANCE: 200 cigarettes for each crew member, and 1 bottle of liquor for each crew member.

IDENTIFICATION CARDS: Essential.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship's Agent and the Foreign Embassy concerned.

TIME: Local Civil Time is 8 hours ahead of GMT throughout the year.

HOLIDAYS: New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December). When any holiday falls on a Sunday, the following day (Monday) is by law considered a public legal holiday. As a general rule, employees of the government in the Philippines do not work on Saturdays. Cargo work on board vessels on these holidays can be arranged.

GENERAL: Customs Inspector and two guards accommodated on board during vessels stay.

SHIPMASTER'S REPORT: November 1979.

LIMAY: 14° 34′ N. 120° 36′ E.

Documents: 3 copies of Visaed Crew List. The form for the crew list should be in the approved form and these are available from the Philippines Embassy at the loading port.

4 Copies of Ship Stores List.
7 Copies of Ordinary Crew List.
1 Copy of Maritime Declaration of Health.

Approaches: This is a very minor port with 1 berth for discharging dry cargo and 1 berth for tankers. The only conspicuous land mark is a single gantry crane. Limay Port Authority has a VHF station and can be contacted on Channel 13. The vessel has to clear Health and Immigration prior to berthing. The quarantine anchorage and pilot boarding ground is between 14° 30′ N. – 14° 31′ N. and 120° 37′ E. – 120° 38′ E. Immigration and Health Authorities board the vessel (generally only during daylight, especially since the weather deteriorates at night) on arrival and clear the vessel.

Pilotage: Pilotage is compulsory. 2 Pilots are available. The Pilots are from Manila and they are stationed at Limay for 2 weeks duration on rotation.

Port: The dry cargo berth is about 500 m. long consisting of 3 concrete dolphins on either side of the crane. The crane is gantry type with 6 tons SWL grabs. The berth juts out from the land and the discharged cargo is directly taken into the factory by conveyor. If there are no breakdowns cargo can be discharged at up to 3,500 tons per day.

Bulldozers are used to collect the cargo in the hold. The crane is fixed and the vessel has to be warped fore and aft if cargo has to be discharged from more than one hold. Stevedores work 24 hours. Berth is mainly used by the Farm Products Co., which imports muriate of potash and urea. They export NPK fertiliser. The maximum depth found alongside by hand lead and line was 48 ft. and minimum 41 ft.

There is one wreck near the dry cargo berth where a tanker blew up and sank. The position of the wreck is approximately 14° 30.3′ N. 120° 37.3′ E. which is marked by an unlit buoy.

Tugs: 2 tugs are available. They are normally stationed at Manila and brought to Limay when vessel berthing/unberthing at Limay. 6 hours notice has to be given. The large tug is 750 b.h.p.

As per "Pilot" during the months of October–November the surface current runs North–South and the undercurrent which is very strong runs East–West. Due to this, it is very "tricky" while berthing and unberthing. Tankers are not berthed or moored during night. Dry cargo vessels may be berthed at night if weather is good. The pier is not very well lit. Moreover very often empty barges etc., may be in the fairway to the berth and thus makes berthing or unberthing more difficult.

Density: Between 1017 and 1020 reducing during rains.

Fresh Water: Not available from the jetty. If required water can be supplied by barges from Manila, if given prior advice. It is expensive due to transportation.

Fuel: Can be arranged from Manila.
Repairs: Not available.
Stores: Available but expensive compared with Manila.
Watchman: It is advised to take watchman due to piracy which was reported recently. Generally watchmen are arranged by the Agents.
Hatches: To be opened by the ship's crew.
Customs Allowance: 1 bottle spirit and 200 cigarettes per crew member.
Cargo Gear: Not required.
Repatriation: Can be arranged. The nearest airport is at Manila which is 2 hours by car.
Shore Leave: Shore leave is allowed. But no crew are allowed to pass through the factory. Boat has to be arranged to take crew to the nearest village next to the factory. The nearest town is Balanga which is the capital of the District. Small mini buses run frequently between Limay and Balanga which is about 20 miles away by these buses.
Medical Facilities: Good medical facilities are available at Manila.

SHIPMASTER'S REPORT: September 1980.
Locally the port is known as Limay, Bataan. VHF Channel 11 appears to be used for all communications. 7 copies each of all forms.

If any crew members being repatriated then Agents require their full names, nationality, ages, and passport or seaman's books number in advance.

Hand soundings alongside South side of jetty indicated 38 ft. and 34 ft. at Eastern end and about 450 ft. Westward (inshore) respectively at LW.

Liberty boat from vessel to shore as crew personnel are not allowed through refinery. Vessel loaded Mogas at rates of between 250 and 450 t.p.h. Good holding ground in the anchorage off berth in Manila Bay.

SBM for VLCC's being constructed in approximate position 14° 31.7′ N., 120° 38.8′ E. (See "Section B").

Experienced a strong Southerly current, about 4 knots, the day after a typhoon passed about 100 miles to the North. This current due to flood waters leaving the bay.

3×500 h.p. tugs used for berthing, only pushing, do not make fast. 2.5 hours to Manila by bus. No shore passes required. Fresh water by barge from Manila but very expensive. I was advised that the first 137 tons would cost £285.00 including tug. For the next 163 tons tug and barge would cost £841.00.

AUTHORITY: Bureau of Customs.

SECTION (B).

LOCATION: The Seaberth of Bataan Refining Corporation is located at Limay Town in Bataan Province.

The berth is a conventional buoy mooring system and is located in position 14° 32.1′ North., 120° 35.9′ East.

The enterprise is owned by Petrophil and Mobil and operated by the Bataan Refining Corporation.

Products handled: Crude oil, NSFO and jet fuel.

DOCUMENTS: Also see "Health".
Immigration: Vessels coming from countries where Filipino Consular Authority is available are required to have, on arrival, visaed crew lists. However, in the event that the vessel, for some reason, is not able to obtain a visaed crew list, this requirement is waived, provided the Agent furnishes a guarantee for payment of the visa fee.

When the vessel has on board personnel from countries without political relations with the Republic of the Philippines, at least 2 Immigration Officers remain on board during the vessel's stay in port. These personnel are forbidden to leave the vessel and are not granted shore leave.

The following documents are required by Immigration on arrival:
Visaed Crew List (1 original and 1 copy).
Ordinary Crew List (12 copies).

Customs: Bonded lockers containing spirits, cigarettes, etc., are required to be sealed. Each crew member is allowed to retain 1 carton of cigarettes. Cigarettes in excess should be placed in bonded lockers.

A Customs Inspector and 2 guards will remain on board throughout the vessel's stay in port. Food and a spare cabin should be provided for them.

The following documents are required by Customs:
Crew Personnel Effects List (6 copies).
Stores List (6 copies).
Firearms and Ammunitions List (6 copies).
Bonded Stores List (6 copies).
Narcotics List (6 copies).
Currency belonging to Crew and Ship List (6 copies).
Last Port Clearance.
Ship's Register.

Outward Clearance: This clearance is granted by the Coastguard which boards the vessel prior to departure and effects the clearance on board.

Also, an Immigration Inspector goes on board, just prior to departure, and musters the crew and verifies that all crew members are on board.

The following documents are required for the outward clearance:
Port Clearance.
Immigration Clearance.
Customs Clearance.
Coastguard Clearance.

The above documents are prepared and arranged by Agent.

APPROACHES: *From End of Sea Passage to Pilot Station:*
Manila Bay is entered between Limit Point and Cochinos Point. The entrance is divided into 2 channels, named South Channel and North Channel, by Corregidor and Caballo Islands; both these channels are deep and clear of dangers in the fairway.

As a general rule, vessels use the channel which provides the shortest route into the bay. Entry is not recommended during darkness or periods of poor visibility if vessel is not equipped with radar.

Vessels entering Manila Bay through the North Channel shall pass midway between La Monja Island and Guardia Shoal and shall proceed directly through the middle of the channel between Corregidor Island and the mainland, steering 070° until 1 mile distance from the shore is cleared. The same route shall be followed by vessels when leaving Manila Bay through the North Channel.

Vessels entering Manila Bay through the South Channel should not approach any shore closer than 1 mile and shall keep South of the restricted area, South of La Monja, Corregidor and Caballo Islands, which is embraced within The North section of the following bearings: 296° from El Fraile Island and 236° from Caballo Island lighthouse. Furthermore, on the Southern side of the channel, they should not approach the line joining El Fraile and the N.W. point of Limbones Island closer than 1 mile. The same restriction applies to vessels leaving Manila Bay through the South Channel.

Deep draft laden crude tankers should always enter through the Southern Channel, which is wider and deeper.

After having entered the channel, vessels should make for the Pilots embarking point. Pilot boat usually waits 2 miles off Lokanin Point. During the approach to the above position, vessels should steer clear of land for at least 1 mile.

Many fishing boats are operating in the area and very often they are without lights and unable to move from their fishing position as they have nets laid down. Therefore, utmost caution should be exercised; radar watch and visual lookout should be maintained and a wide berth, to the maximum possible extent, should be given to any fishing boat.

When entering or leaving the port, especially during hours of darkness, we suggest to consider having the tanker preceded, at a close distance, by a service boat or a tug boat. This boat steaming right ahead of the vessel could clear the vessel's way of fishing boats or other craft or could at least warn the tanker in advance of any danger laying ahead.

ANCHORAGE: Vessels awaiting berth should anchor about half a mile S.E. of the Conventional Mooring Buoy (CB).

RESTRICTIONS: *Controlling Depth:* Entry Channel more than 66 ft. below MLLW. Approach Channel 64 ft. below MLLW. Alongside Berth 64 ft. below MLLW.
LOA Limitation: 1,000 ft.
Breadth Limitation: Unlimited.
Berthing and Unberthing: No particular restriction applies and vessels are berthed and unberthed at any stage of the tide; also during hours of darkness except during particularly severe metereological conditions. Following unberthing, ship is expected to move out, preferably with assistance of tugs instead of using her own power. The strong turbulence created by the ship's propellers tends to get the hoses entangled with each other.

MAX. SIZE: Below are the maximum vessel sizes that are acceptable at the BRC Crude Seaberth:

DWT	120,000 tons
LOA	890 ft.
Beam	135 ft.
Draft	52 ft.

However, crude tankers greater than 120,000 d.w.t. with LOA and beam up to 1,000 ft. and 160 ft., respectively, could be accepted at the seaberth if the tanker is partially loaded, such that draft does not exceed 50 ft. and if the prevailing climatic condition warrants safe berthing.

RADIO: Whilst at sea, vessel is to communicate with "Petrophil Manila", via Manila Radio. VHF Channel 13 is the working frequency of Luzon Stevedoring, owners of tugs and service boats assisting the mooring.

In the arrival message, Master to include: ETA, forward and aft drafts, confirmation that instructions contained in port information are understood and will be adhered to, any requirement.

It is most essential that vessel confirms ETA 72, 48 and 24 hours before arrival.

Communications between vessel, tugs, mooring gang and refinery are well established by various portable VHF sets supplied by the refinery and contractors and working is on several channels.

HEALTH: The Quarantine Doctor boards the vessel in the outer roads during her approach to the port. After pratique is granted, the Pilot, Customs and Immigration Officers, the Loading Master, the BRC representative, and the hose gang are allowed to board.

No radio pratique is contemplated.

The following documents to be ready prior to arrival of health officials:
Maritime Declaration of Health.
Vaccination Lists (4 copies).
Health papers of all ratings.

BERTHING: The sea terminal consists of 8 mooring buoys of 16 ft. dia.

Buoys 2, 3, 4, 6 and 8 are fitted with 1 self-releasing Pelican hook and buoys 1, 5 and 7 are provided with 2 Pelican hooks each.

Mooring/Unmooring: Currents usually set in a North-South direction at the berth, and vessel always approaches and enters the berth from South. However, berth is so designed that tankers, depending on prevailing wind and/or current direction, could enter from the North, if necessary. Mooring and unmooring may take place also during hours of darkness, provided meterological conditions are fair and visibility is good. Currents are weak and berthing or unberthing takes place at any state of the tide.

Berthing of vessels should be assisted by a Pilot, a Mooring Master, and a Radio Operator, the latter two of Luzon Stevedoring Company, which also provides the mooring gang. The Radio Officer brings along his own portable VHF radio set for communicating with the mooring crew and service boats.

Vessels usually approach the berth from a S.S.E. direction and are stopped some 3,000 ft. off the South end. From this point vessels proceed to and enter berth at dead slow speed between buoys 5 and 6. Just before entering, the starboard anchor is usually dropped. This anchor is dragged or paid out accordingly in order to check the vessel's bow. The bow is brought abeam of buoys 1 and 2 where the port anchor is dropped. Lines are then given ashore and the vessel is backed into final position approximately 40 ft. abeam of the floating beacon marking the pipe-end manifold. When using anchor, caution should be exercised so as not to foul the buoy legs or cargo pipes and hoses.

Usually, 3 powerful service launches are in attendance. These launches are suitable for handling the heavier wire ropes. Usually, 2 lines are run on buoys 1, 2, 7 and 8 and one to buoys 3, 4, 5 and 6. There is no particular requirement on whether ropes have to be of wire or nylon. Pilots indicated that they may require, at times when wind from S.E. is particularly strong, additional lines to be run to buoys 3 and 5.

Night berthing is carried out with the assistance of the service boats, which tie up alongside buoys 1, 7 and 8 and indicate quite effectively the approach and entry to the berth.

Vessels calling at the CBM should make use exclusively of wire ropes of suitable dimensions, quality and condition.

When leaving, vessel must be towed and engine of tanker shall be at standstill to prevent kinking of hoses caused by strong current generated by the tanker/vessel propeller.

HOSES: At present, 2 strings of hoses are used. Each string consists of 1 length of 20 ft. × 20 in. dia., 2 lengths of 30 ft. × 16 in. dia., and 3 lengths of 30 ft. × 12 in. dia. The 2 over-the-rail lengths are provided with a 12 in. ASA 150 p.s.i. hand-operated butterfly valves.

The end of each hose is marked by a buoy consisting of 2 cans welded together. When resting on the sea bed, the ends of the hoses are attached to these buoys by means of a chain. For lifting the hoses onboard, divers disconnect the chain from the cans and pass them to the vessel's derrick hook. The marker buoys remain on the water.

The hoses are connected and disconnected by a shore gang supplied by a contractor. It takes, on the average, about 1 hour 30 minutes to have 2 hoses connected and cargo started. Ullages and cargo calculations are carried out concurrently with connecting of cargo hoses. It takes about 30 minutes to 1 hour for disconnecting, but this is done concurrently with ballasting operations after discharge.

In order to expedite turnaround time, vessels should arrive with both derricks rigged for a minimum safe working load of 7 tons.

Blanks at 2 connections of the port manifold should be removed prior to arrival and 2 reducers, if available, should be installed to have the manifolds ready for the 12 in. ASA hose connections.

Safe working load and connections available should be notified to BRC prior to arrival.

Minimum acceptable manifold height above deck is about 20 in. Minimum spacing of ship's cargo manifold for connecting hoses to adjacent manifolds is about 18 in.

The hoses when in operation are not suspended from ship's gear but are fastened to the vessel's superstructure by means of chains.

There are no specific guidelines for disconnecting in emergency. The hose gang remains on stand-by throughout the operation and can be readily available.

Hoses are to be connected to the vessel's reducers with bolts and nuts fastened to every second hole of the flange.

The maximum pressure requested at the vessel's manifold is 150 p.s.i.

LOADING: *Description of Cargo System:*
Crude is presently received at the 8 buoy seaberth, located about 2,100 ft. off the end of the product pier. The current crude receiving facilities consist of a 28 in. dia. line. The line from the tank to the berth is about 4,700 ft. long. This includes the submerged section from the pier head to the berth of 2,040 ft. The end pipe-line manifold is fitted with 2 outlets. Each outlet is provided with a 20 in. butterfly valve, a 20 in. check valve and a 20 in. chicksan swivel joint where currently 2 strings of 1 × 20 in. dia. × 30 ft., 2 × 16 in. dia. × 30 ft. and 3 × 12 in. dia. × 30 ft. hoses are connected. The butterfly valves are manually operated by divers.

The pipe manifold is marked by a floating beacon, and in order not to put hoses under strain, the vessel's manifold should be abeam of this marker at a distance of about 40 ft.

FRESH WATER: Supply is by barge. Requirements should be included in arrival message. Ample notice is required if water is supplied by barges.

FUEL: Bunkering is by barge. Bunkering may take place concurrently with discharging operations. Ample advance notice required.

MEDICAL: The Agent will arrange for transportation to and from Manila for crew members requiring elaborate medical or dental attention; otherwise, they will be attended to in Manila.

REPAIRS: There are several repair firms in Manila that can undertake minor repairs. Requirements for repairs should be passed on to the Agent, and briefly outlined in ETA message. Major classification societies available.

GANGWAY: For vessels at the CBM, gangway to be prepared and rigged prior to arrival, on port side.

STORES: Stores and provisions can be supplied by ship chandlers in Manila. Master should radio requirements at least 36 hours before arrival to the Agent so that stores can be transported from Manila to the ship on time. Bonded stores are unavailable, except for local beer. Laundry requires a minimum of 36 hours.

WEATHER/WIND/TIDE: *General:* Although the Bataan Refinery is only 26 miles across the bay from Manila, rainfall data is not exactly the same for both of these locations. This is partially due to the mountain directly behind the refinery, which tends to precipitate the S.W. monsoon immediately as they come over the mountain, dissipating them to some extent by the time they reach Manila.

The average rainfall for the Bataan Refinery is about 98 in. per year varying from 56 in. to 136 in. per year. Maximum and minimum air temperature are about 102°F and 58°F respectively.

Wind and Typhoon: During the typhoon season, from June through September, the winds are predominantly from the S.W. and are known as the S.W. monsoons. In October through January, the winds are from the N.E. For the month of February, the winds are predominantly from the East and in March through May, from the S.E.

The typhoons are frequent during their season and bring with them high winds and heavy rains. The typhoons generally go up the East coast of Luzon, however, late in the year, they cross the land mass.

Range of Tide: For Lamao, data obtained from the coast and geodetic survey of the Philippines are:

Extreme High Water	5.6 ft. (58 year record)
Mean Higher High Water	2.99 ft.
Mean High	2.54 ft.
Mean Tide Level	1.41 ft.
Mean Sea Level	1.36 ft.
Mean Low Water	0.29 ft.
Mean Lower Low Water	0.00 ft.
Extreme Low Tide	2.00 ft.
Mean Tide Range	2.25 ft.

There are no unusual metereological conditions associated with these tides.

Intensity and Direction of Currents: A hydrographic survey in February and March, 1958 indicated that current, at its greatest strength, to be not exceeding 1 knot. However, there was sufficient indication that the current is of the reversing type; that is, tidal in nature. Current varies from day-to-day, principally in accordance with the range of tide, its diurnal inequality, and its daily routine, whether diurnal or semi-diurnal. The rising tide is counteracted, to some extent, by the water which enters Manila Bay from rivers, and thereby lessening its velocity. The ebb tide is assisted by this water and accounts for the maximum recorded velocity, which, however, seems always to be less than 3 knots.

Water Density: Salinity varies from a high of 36.1 parts per thousand to a low of 4.6 parts per thousand during a monsoon. The mean salinities are 14 in June, the lowest month, and 34 in May, the highest.

The surface temperature of the sea water adjacent to the site ranges from about 76°F to 90°F.

Tankers arriving at BRC in laden condition should not consider this density variation, which is very difficult to predict and to determine.

Waves: About 2 to 3 ft., based on information given by Pilots.

Sea Bottom: Upper layer of sea bottom is soft mud.

SECURITY: Serious security problems may arise during nightime and strict surveillance and alertness must be exercised at all times. Guards supplied by a local contractor and arranged by the Agent should be employed at all times. Stores and cabins should be kept under lock.

Vessel's Master, at all times, should take positive steps to prevent smuggling and keep native boats away from the ship and watch for pilferage while the vessel is approaching or is in port. We believe that security guards may be of help and we recommend Masters to use them at all times.

Shore leave may be arranged by Agent. Crews are ferried to and from the CBM to the near local village. Launch service is arranged by the Agent.

Crews of vessels moored at the product pier or LPG pier have also to go ashore by boat since nobody is authorized to pass through the refinery.

EMERGENCY PROCEDURES: BRC is not provided with an anemometer nor specific procedures to vacate the berth under severe metereological conditions. Should weather conditions deteriorate, the vessel's Master, in consultation with the Pilot, Mooring Master, and BRC representative, take the decision to vacate the berth.

A close watch should be maintained for typhoon and weather forecast. At all times, vessels should maintain a state of readiness and engines should be kept on standby and at short notice. No repairs or tank cleaning should be allowed alongside.

BRC REPRESENTATIVE: An employee of E. R. Sanderson & Co., (representing BRC) boards the vessel after quarantine clearance to co-ordinate unloading operations. A ship-to-shore portable radio is placed on board for communication and controlling ship's discharge only. The BRC representative remains onboard throughout discharge and liaises between shore and ship. During the pre-discharge, sounding and final inspection after discharge, a BRC operator boards and accompanies the E. R. Sanderson employee.

AGENT: A representative of "Petrophil" as Agent boards the vessel together with the Pilot and Authority. All matters concerning Authorities and outsiders should be handled exclusively through the Agent.

BATANGAS, Luzon (including Tabangao):
13.45 N. 121.03 E.

See "General" before first port.

PORT LIMITS: Batangas Harbour embraces all waters of Batangas Bay extending seaward up to an imaginary line connecting Cazador Point and Matuco Point.

DOCUMENTS: Upon arrival, the following papers should be forwarded to the authorities:
2 Crew lists (visaed).
3 List of Stores, Deck, Engine, Stewards Dept.
3 List of Stores, Firearms, Medicine and Narcotics.
6 Personal Effects Declaration.
6 Inward Manifest.
8 Ordinary Crew List.
Clearance from last port of call

PILOTAGE: Pilotage for shifting from quarantine anchorage, docking and undocking compulsory for all vessels engaged in foreign trade. The vessel is met by the harbour pilot approximately 2 miles South of the wharf. Pilotage for entering the Batangas harbour and anchoring in the quarantine anchorage is optional but pilotage for shifting therefrom or changing in the stream is compulsory for vessel engaged in foreign trade. At least 48 hours before ships arrival, advise ship's Agents of estimated time of arrival (ETA).

Visual Signals, "I need a Pilot" – The single hoist of the International Code flag "G".

Sound Signals – "I need a Pilot" – the International Morse Code "G" or 2 prolonged blast, followed by 1 short blast of the ship's siren.

Pilot Launch: 25 GRT white with a black "P" at both sides of bow and with International Code Flag "H" hoisted. At night time, all around white light on top of a red light in a vertical line, with green and red sidelights.

APPROACHES: "Suggested Approach" From the South between Matuco Point and Malajibomanok Islands, with an opening of 3.5 miles. White flashing beacon on Malajibomanok Island duration 0.3 seconds every 10 seconds visible for 8 miles in clear weather. Islands and point can be approached within 0.5 mile.

Landmarks and Coastal Lights: Government pier at Bo. Sta. Clara may be approached safely from either direction paralleling its face. Batangas church dome, Bauan church bell tower, refinery stacks and columns and wharves are good landmarks. Batangas lighthouse is Gp. Fl. (3) green every 5 seconds.

ANCHORAGE: All vessels entering Batangas harbour shall show their colours and signal letters shall be kept flying until the vessel is boarded by the proper officials within two (2) miles before arriving at the designated quarantine anchorage.

1.	13° 45′ 06″ N.	121° 02′ E.	Quarantine
2.	13° 45′ 13″ N.	121° 02′ 14″ E.	for vessels less than 1,000 g.r.t.
3.	13° 45′ 06″ N.	121° 02′ E.	for vessels over 1,000 g.r.t.
4.	13° 45′ 30″ N.	121° 01′ 55″ E.	for vessels over 3,000 g.r.t.
5.	13° 45′ 30″ N.	121° 01′ 42″ E.	
6.	13° 46′ N.	121° 01′ 15″ E.	for Caltex wharf
7.	13° 43′ 35″ N.	121° 02′ 50″ E.	for Shell wharf
8.	14° 42′ 54″ N.	121° 03′ 06″ E.	for Pacific flour mills pier
9.	14° 46′ 18″ N.	120° 58′ 15″ E.	for Batangas Bay Terminals, inc. pier.

MAX. SIZE: See "Berthing" and "Tankers".

TUGS: Tug service is not furnished by the two oil refineries. The use of a tug for berthing and unberthing is required. Although a tug is normally available at Batangas it may be necessary to dispatch a tug from Manila. Accordingly, it is important for Masters of vessels to provide at least 48 hours advance notice of ETA to ensure the availability of the tug boat.

BERTHING: Berthing may be done any time during the day or at night and Masters should exercise their own judgement in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Batangas Govt. pier:

	Length (m.)	*Width (m.)*	*Depth (m.)*
Pier I	127.5	15	9.00
Pier II	105.0	15	7.50 wharf
	48.0	12	
Pier III	84.0	15	2.67

Bauan and Mainaga pier:

Bauan: Latitude: 13° 46′ 48″ N.
Longitude: 121° 04′ 06″ E.
Mainaga: Latitude: 13° 35′ 48″ N.
Longitude: 120° 57′ 12″ E.

Alternative loading or discharging ports, but only in cases when there is congestion at the government piers at the Port of Batangas.

Pacific Flour Mill: Location: The area contained from the Southernmost pile of the Shell Refinery to the area West of Little Tabangao River extending 1 mile Westward.

Max. Size: LOA 492 ft., draft 45 ft.

Pier: Length 93 m. with 142.5 m. causeway, width 7.5 m., depth 14 m.

Special Regulations:

(A) That a navigational and mooring area of 0.5 mile from the Northernmost and Southernmost mooring dolphins of the PFM pier be free from fish traps and other fishing devices.

(B) That a freeway from incoming and outgoing vessels from the PFM pier be kept free from all fish traps of any forms, and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the PFM pierhead outside of the 50 ft. depth contour approach to the pier.

Batangas Bay Terminal, Inc: Pier facilities: 3 breasting dolphins 80 m. apart; 2 fender piles (wooden) and 2 mooring dolphins. Causeway 290 m. long.

Max. Size: LOA – 700 ft. Draft – 39 ft.

Location: The Batangas Bay Terminal, Inc. located at 13° 47′ 00″ N., and 120° 59′ 02″ E. It is in Bo. Bolo, Bauan, Batangas, the total area (shoreland) is 5.5 hectares and 18 hectares (foreshore) land.

Special Regulations:

(A) That the area contained between the S.W. site of the BBTI for a distance of 1 mile from shoreline North and South be entirely free permanently from all forms of fishing devices.

(B) That a distance of 100 yards around the pier be entirely free from all forms of fish traps, fish corrals, fish weirs, etc. and it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas underneath the said pier.

Luzon Stevedoring Corporation (Sta. Rita pier):

Max. Size: LOA – 340 ft. Draft – 14 ft. Pier: Length – 97 m. Width – 4.87 m. Depth – 18 m.

Luzon Stevedoring Corporation (Energy Base):

Max. Size: LOA – 426 ft. Draft – 25 ft.

All vessels proceeding to Batangas should radio either Caltex or Shell, whichever is their destination, their estimated time arrival at Batangas as early as possible, but not less than 96 hours before arrival, amending this ETA subsequently if it varies more than 2 hours from the original estimate in order to arrange towing gangs with the Luzon Stevedoring Corporation.

Vessels Loading Sugar: See "Iloilo – Shipmaster's Report".

STEVEDORES: Stevedoring is usually handled by Luzon Stevedoring Corporation.

MEDICAL: Both refineries have small hospitals for handling emergency cases. Should any ship's personnel need prolonged hospitalisation, arrangement will have to be made to transfer the patient to Manila or to the Provincial Hospital of Batangas where suitable medical attention is available. Dental treatment can be obtained from local dentists in the town of Batangas.

TANKERS: *Shell Refinery, Tabangao.* Jetty 1; two hoses of 10 in. diameter. Jetty 2; 4 arms of 12 in. diameter. Slops acceptable at 500 t.p.h. up to limit of 3,000 tons.

Two wharves with the following dimensions:

(a) Length 336 m. Concrete
Width 9 m.
Depth 15 m.

(b) Length 700 m. Concrete
Width 9 m.
Depth 15 m.

Crude oil is delivered by tankers of up to about 75,000 d.w.t.

Caltex Refinery Wharf. The Caltex Refinery including the island wharf is located North of the government pier and at night can be distinguished by illumination lighting on its structures and red aviation warning lights at the top of the columns. A gas flame at the top of the 150 ft. flare stack is also visible several miles from shore. The Caltex wharves are adequately lighted to facilitate night berthing or unberthing operations if desired. LOA – 755 ft. Draft – 41 ft. Jetty designed for 45,000 d.w.t.

Location: Lat. 13° 48′ 24″ N. Long. 121° 01′ 00″ E.
Lat. 13° 46′ 12″ N. Long. 121° 01′ 36″ E. (service wharf)

Construction: 2 wharves with the following dimensions:

T-Head: Length – 84 m. Width – 13 m. Depth – 14 m. with 2 mooring buoys 244 m. apart parallel to the berths facing the shoreline.

Island Wharf: 2 breasting dolphins 91 m. apart. Length – 16 m. Width – 12 m. Depth – 27 m. with unloading platforms installed in between the dolphins and provided with 2×125 ton quick release hooks and 2×125 ton bollards.

Crude oil is delivered by 200,000 to 300,000 d.w.t. supertankers.

Special Regulations:

(A) That a distance of 100 yd. around each of the 2 wharves (including island wharf) be entirely free from all forms of fishing devices such as "bonbons" fish corrals, fish weirs etc., and that it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas within the areas.

(B) That a navigational and mooring area of 0.5 mile North and South respectively of the limits stipulated be likewise free from fish traps and other fishing devices, but with option to fishermen to fish with hooks or with bancas within the said area provided that they do not come within 100 yd. around the jetty.

(C) That a freeway for incoming and outgoing vessels from the Shell Refinery piers be kept free from "bonbons" and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the jetty head outside of the 50 m. depth contour approach to the jetty.

DENSITY: 1026.

FRESH WATER: Fresh water is available to vessels loading, unloading or bunkering at Batangas Port. It is delivered to the vessel through hose connections. The water satisfies the physical and chemical requirements for drinking water.

FUEL: Bunkers are available from the 2 refineries. Prior advice should be given through the ship's Agent.

FIRE PRECAUTIONS: At both refineries smoking or open fires are prohibited on the wharves or on vessels alongside or within 100 yards of either wharf. Furthermore, each vessel's personnel is responsible for the safety of its own ship at all times.

CUSTOMS ALLOWANCE: Sufficient amount for crew's consumption while in port.

IDENTIFICATION CARDS: Not required in the Port of Batangas.

CONSULS: Consulates are stationed in Manila.

REPAIRS: Keppel, Philippines: (Finger Pier) Total berth of 300 m. with deep water, provides facilities for repair of vessels of up to 5,000 d.w.t.

Cranage: 1×5-ton travelling crane on floating deck; 2×37-ton crawler cranes; 1×12-ton mobile crane.

Hull shop: 80 m.×22 m. covered workshops equipped with 2 units 10-ton overhead travelling crane; 1×750 ton×6 m. long flanging press; 1×500-ton hydraulic portal press.

Machine shop: 80 m.×14 m. covered workshop equipped with 1×5-ton overhead travelling crane, 1×10 m. long×800 m. swing lathe, other lathes, milling machines, drilling machines, etc.

Electrical shop: Facilities for electrical repairs, rewinding, insulation repairs, etc., other shops are pipe and carpenter shop to give full range of services for new constructions and repairs.

DRYDOCKS: Keppel, Philippines has its floating dock with the following data of information: Max. length of vessels, 110 m.; Max. beam of vessels, 19 m.; Max. draft of docking, 5 m.

REPATRIATION: Pre-arrangement by ship's Agent and/or Master of the vessel and the Immigration Officer assigned on board the vessel.

AIRPORT: At Manila.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); R.P.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday the following day is observed as a holiday. Cargo handling work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: PPA Port Police: 725-2882. National Customs Police: 725-2971. Batangas City Police: 725—2125. Ambulance: 725-2890. Fire Department: 725-2470.

TELEPHONES: At present placing telephones on board foreign vessels is not available; however, telephone service is available on the jetty of both refineries.

GENERAL: Discharge of ballast: No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines. The refineries have provisions for off-loading a limited amount of oil water ballast. Rat Guards: Rat Guards shall be placed on all mooring lines to the wharves and piers.

AUTHORITY: Philippine Ports Authority.

BISLIG, Mindanao: 08.14 N. 126.22 E.

See "General" before first port.

PILOTAGE: Vessel should send direct advice to the Pilot or through its Agents 48 hours prior or at the very least 24 hours before ETA by commercial telegraphy.

There is no VHF operated by the Pilot.

Pilot boat is painted black (hull) and white (bridge and mast). International Code Signals used to call Pilot.

Pilot station is located at Lat. 8° 11.4′ N., Long. 126° 21.2′ E.

Pilot boat will be located (if by prior advice/arrangement by Master requiring specific service of meeting vessel outside of entrance and conducting vessel through channel to inner harbour) at Lat. 8° 16.85′ N., Long. 126° 26.50′ E. or 340°, 2.35 miles off Sanco Pt. Lighthouse.

Pilot will always board a vessel (outside of entrance) via the Pilot's or Jacob's ladder on the leeward side of the vessel.

ANCHORAGE: While waiting for a Pilot, the recommended anchorage (at entrance) is at Lat. 8° 16.1′ N., Long. 126° 26.1′ E. on or about this position and/or within an area of 0.5 miles radius from this point.

Quarantine anchorage or inner harbour is based on the point Lat. 8° 12.9′ N., Long. 126° 22.0′ E. to within 0.25 miles radius from this point as centre, otherwise 1 mile North of BBLCI Pier's end.

Working anchorage at stream. When vessel is through with all the port formalities, she has to go to a working area for loading/unloading operations, thus:

BBLCI. Vessels will anchor at least within a 0.5 mile radius from the tip of BBLCI pier.

PICOP. Is especially preferred during N.W. monsoon at least within a 0.5 mile radius from the foot/base of PICOP breakwater.

Bislig Bay. In general is bounded by a line from *(a)* Sanco Pt. to *(b)* Mawes I. to the N.W., thence to *(c)* the town of Bislig to the S.W., thence to *(d)* the village of Mangagoy to the S.W., and back to *(a)* Sanco Pt.

MAX. SIZE: 30 ft. at PICOP Pier.

HEALTH: Any vessel can be given free pratique if upon inspection everybody is healthy, vessel is clean and all certificates of vaccination are complete. However, if there is a suspicious quarantineable disease, a probationary pratique should be issued and after 6 days, if it was found out that there was no quarantineable disease at all, free pratique will be issued.

RADIO: RCPI, Clavecella and CRC.

TUGS: Tugs normally meet vessel with Pilot at the 5 miles limit and assist Pilot in docking, using ship's lines. 5 available. 4 at 225 h.p., 1 at 112 h.p.

BERTHING: Berthing is on a first-come first served basis. During the N.E. monsoon berthing is in daylight only for precautionary measures.

BBLCI and PICOP maintain 2 piers and 1 marginal pier.

BBLCI: Pier Position 8° 11′ 51″ N., 126° 21′ 55″ W. This is an all concrete pier 800 ft. long and 30 ft. wide with berthing space of 550 ft. on each side. Max. draft 28 ft. at seaward end, 22 ft. at shore end. Both sides are protected by dolphins constructed of pile fenders and large tyres as absorbers. Largest vessel to berth at pier at present is 18,500 tons gross. Lumber, veneer, plywood and logs are loaded at this pier.

BBLCI Marginal Pier. For vessels of less than 1,000 tons gross and 10 ft. draft.

PICOP Piers:

	Length (m.)	*Width (m.)*	*Depth (m.)*
Pier I (concrete)	244	8.0	8.8
Pier II	130	17.7	9.1

There are several patches of reefs projecting N.W. of the channel from Sanco Point to the fairway leading to the PICOP Piers. The port therefore should be entered only during daylight.

January, February and March, the season of the N.E. monsoon, makes it difficult for approaching and securing ship because of strong winds and heavy seas.

CARGO HANDLING FACILITIES: Both companies have ample equipment. Fork lifts, lighters, mobile cranes max. lift 50 ton (BBLCI), and 75 ton (PICOP), sideloaders, trucks and trailers.

STEVEDORES: ETA should be advised 2 days before ship's arrival stating workable hatches and gang requirement for berthing and gang arrangement.

20 gangs available, shifts change at 0600 and 1800 hrs. when port is full. If only few ships in port change at 0600, 1500 and 2300 hrs.

MEDICAL: It is necessary for the Agent to receive advance notice if there is serious medical attendance and hospitalisation. However, less serious medical attendance does not need notification. Port of Bislig has hospital facilities with complete smallpox, cholera, El Tor and typhoid vaccine available.

DENSITY: About 1.025 with tendency to become heavier during dry season and on flood tide.

FRESH WATER: Available at East end of BBLCI Pier. The connection is 2 in., situated 100 ft. from the approach, discharge rate 20 g.p.m.

FUEL: Small quantities available. BBLCI maintain 3 tanks for Caltex.

1. Bunker oil tank	30,000 bbls.,
2. Diesel oil tank	11,300 bbls.
3. Gasoline tank	5,100 bbls.

Tank trucks available to deliver oil and gasoline.

GANGWAY/DECK WATCHMEN: P1.00 per hour for at least 3 men.

OPENING/CLOSING HATCHES: Rigging of booms is done by ship's crew, while opening and closing of hatches is carried out by stevedores.

CUSTOMS ALLOWANCE: 200 cigarettes and 1 bottle liquor for each man.

IDENTIFICATION CARDS: Needed.

REPAIRS: May be made to ship's gear and equipment by arrangement with BBLCI. The company have an engine repair shop, machine shop and foundry.

AIRPORT: 5 kms. distant; daily flights.

TIME: Local Standard Time is 8 hours ahead of GMT.

HOLIDAYS: On Christmas Day; New Year's Day and Good Friday. Cargo work may be arranged.

GENERAL: Engineering supplies available from BBLCI and PICOP. Dunnage available through BBLCI. Provisions available through chandler or market 1 km. from BBLCI Pier.

DEVELOPMENTS: More berthing facilities are on the programme for the next 3 to 5 years when the pulp and paper mill is in operation. Installation of more log-processing plants to increase shipments.

SHIPMASTER'S REPORT: June 1978

Bislig Bay – East coast of the Philippines – 8° 15′ N., 126° 25′ E.

Apart from the B.A. Charts Philippine Charts 4627 and 4664 were used. (Available at Manila).

Directions: Experienced an insetting current along the coast before entering the bay. For High and Low water Bislig Bay see A.T.T. Hinatuan, No. 5057.

(a) The tower at Sancopoint has been destroyed though the foundation (5 m. high) is still visible when not obscured by trees when entering the bay.
(b) All buoys have disappeared.
(c) Beacon B was blown away but beacons A & C are conspicuous.
(d) Prominent Hill of 920 ft. in the direction of 230° was invisible because of morning mist.

Kept beacon "A" on bearing 205° till beacon "C" was 130° and the small island of Agonoy 270°. One way of keeping clear of the shallow depths near the entrance.

Altered course to 230° and steered for the Quarantine Anchorage when Agonoy was 320°.

There is one Pilot available. Pilotage is compulsory. He embarked halfway between Sanco Point and the anchorage from a prao, displaying a large H-flag.

Berthed starboard side to to the East side of the pier with starboard anchor one shackle in the water slacking away when necessary. Observed a noticeable swell on the other side of the pier.

Moored with 3 headlines and 1 spring forward. Two springs from Hatch VI leading forward and 2 lines from the fore-end of Hatch No. V, Hatch No. VI could not be accommodated alongside the wharf. Inferring not to stow any Bislig cargo in that hatch. It is possible but this hampers the despatch as cargo has to be driven by fork lift truck from the deck of Hatch VI to Hatch V.

Two small mooring boats assist in the berthing. On departure these 2 boats assisted in pushing the vessel around.

The normal Quarantine telegram, as for other countries, is not necessary for the Philippines.

Two cabins are required for Immigration and Customs.

Connection with shore: Via the offside gangway and prao. There is a curfew from midnight till 0600 hrs.

Cargo handling: The width of the wharf and the lack of fork lift trucks slowed down operations. Another factor is the presence of another discharging or loading vessel alongside the other side of the pier.

Agency: Agent from our Manila Office flew from Manila to assist the local offices.

Fruits and vegetables available.

AUTHORITY: Collector of Customs.

CAGAYAN DE ORO, Mindanao: 08.30 N. 124.40 E.

DOCUMENTS:

- Application for Berth.
- Vessel's Information.
- Inward and Outward Manifests.
- Passenger Lists.
- Oath on entering Vessel from Foreign Port.
- Oath of Clearance of Vessel.
- Crew Lists.
- Store Lists.
- Personal Effects Lists.

PILOTAGE: Pilotage is compulsory for vessels engaged in foreign trade of 100 tons or over, docking or leaving at or leaving the government wharf or any privately owned wharf in the Port of Cagayan de Oro.

Notice of ETA should reach the Pilot Association of Cagayan de Oro 24 hours before vessel's arrival. Approaching vessels are required to blow whistle (2 long and 1 short blast) stop the engine and wait for the Pilot to come. A foreign vessel is met by the Harbour Pilot approximately 2 miles from the wharf except for vessels docking at Philippine Sinter which requires the Pilot to meet the vessels 5 miles from the PSC wharf.

ANCHORAGE: The depth of safe anchorage is 60 fathoms, about 400 m. from the shore.

MAX. SIZE: Max. draft of 13 m. alongside, 80 m. from the Northern portion of the quay; the rest 8.5 m. along the quay side.

HEALTH: Foreign ships will clear quarantine on arrival at Cagayan de Oro Harbour. Quarantine officers will board the vessel before the pilot's boat meets the vessel.

RADIO: It is not wise to send ETA of vessel through the radio station. ETA could be best transmitted through the different telegram offices in the city such as RCPI, PT&T, Telefast, Clavecilla.

TUGS: Tugs for hire are not available at the government wharf. However, Resins, Inc. is maintaining 1 tug for hire which can be made available by arrangement.

BERTHING: Berthing may be done any time during the day or during the night. Max. permissible ship's draft along the 80 m. portion from the North of the quay is 13 m. and 8.5 m. along the rest of the quay. The present quay is 451.50 m. in length giving a total of 8 berthing spaces.

CARGO HANDLING FACILITIES: The Gold City Integrated Port Service, Inc. has 2 serviceable cranes with capacities of 25 tons and 10 tons; 38 forklifts, 1 with a capacity of 20 tons, 1 with 5 tons and the remainder 3 tons.

MEDICAL: Hospital facilities are available in the city of Cagayan de Oro.

FRESH WATER: The Philippine Ports Authority supplies water at the Cagayan de Oro Port, fresh water which is safe for drinking. Water is delivered through hose connections direct from PPA's underground tank. With a capacity of loading 40 t.p.h. for every outlet. There are 8 outlets with electric meters installed.

FUEL: Vessels are required to apply for bunkering at PPA and a bunkering fee of P15.00 is charged per vessel. Fuel oil is supplied by the local distributors of Petron, Caltex, Mobil and Shell.

REPAIRS: Minor repairs, not to exceed 2 hours, may be allowed for vessels at berth upon approval by the Philippine Ports Authority. Major repairs have to be done at the anchorage.

HATCHES: Opening and closing of hatches is carried out by the Gold City Integrated Service, Inc.

CUSTOMS ALLOWANCES: Sufficient amount for crew's consumption whilst in port.

AIRPORT: Lumbia Airport is 9 km. from the Macabalan Wharf and is served by regular airlines.

TIME: GMT + 8 hours.

HOLIDAYS: New Year's Day (January 1st), Holy Thursday, Good Friday, Labour Day (May 1st), Araw ng Kagitingan (May 6th), Independence Day (June 12th), Phil. American Friendship Day (July 4th), Bonifacio Day (November 30th), Rizal Day (December 30th).

Special Holidays declared by the President if the Philippines are included. If a legal holiday falls on a Sunday, the following day is a holiday. Normally, the integrated port service works on the vessel regardless of the day except for a 4 hour break in the afternoon of Good Friday, Christmas and New Year's Eve.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance: Tel. 35-01 (Northern Mindanao Regional Training Hospital). Fire: Tel. 112.

IDENTIFICATION CARDS: Seaman's Book and/or Passport, Shore Leave or Liberty Pass.

DEVELOPMENTS: Phase II of port development as proposed will provide: 415 m. quay extension with 10.5 m. draft; 10 hectares reclamation area; construction of 5,000 sq.m. open Transit Shed and 5,500 sq.m. of Container Freight Station, basic marshalling yard and control gate-parking complex.

SHIPMASTER'S REPORT: June 1978

Anchored 4.75 cables, 337° from the lighthouse. (F.R. 58 ft.) lowered 4 shackles into the water and after dropping slacked away to 7 shackles in the water in 50 fathoms of water.

Moored portside to owing to the distribution of the cargo in hatches Nos. V and VI. The Pilot prefers to berth starboard too.

Fore and aft springs, use nylon ropes (no wires, to facilitate the handling by the boatcrews). Small tugs push vessel alongside. Anchor lowered with 1 shackle in the water, slacking away when necessary.

Cargo handling was good. Pallets were nicely stacked on the wharf. Provisions, vegetables and fruit, available.

Recommendation: Arrivals at daylight only. Consult Agents before signing papers.

AUTHORITY: Philippine Ports Authority, Port Management Unit, Cagayan de Oro City. Bureau of Customs, Cagayan de Oro City.

CEBU, Cebu Island: 10.18 N. 123.53 E. **(See Plan Book)**

See "General" before first port.

GENERAL:

Port of Cebu City: General Description:

Situated at the city frontage between Cebu and Mactan Island. 4,474 m. of quayside (including international and domestic zones).

3 finger piers at 155×32.8 m. The international zone has a length of 451 m., excluding the 2 finger piers.

3 government transit sheds on each pier with a total area of 6,264 sq.m.

Total port area is 423,245 sq.m.

Further, Cebu Harbour has 3 Port Districts as follows:

Port District of Cebu:

(a) The National Main Port.
(b) The Ludo Private Port.

Port District of Mandaue:

(a) The Mandaue Municipal Wharf.
(b) The Ouano Private Wharf.
(c) The San Miguel Corp. Private Wharf.
(d) The Fil Oil Depot Private Wharf.
(e) The Matimco Private Wharf.

Port District of Mactan:

(a) The General Milling Corp. Private Wharf.
(b) The Opon Municipal Wharf.
(c) The Mobil Oil Depot Private Wharf.
(d) The Caltex Oil Depot Private Wharf.
(e) The Shell Island Depot Private Wharf.

PORT LIMITS: The Port Limits of Cebu define as: Cebu Harbour as that portion of the Strait between Mactan Island and the Island of Cebu within the following boundaries: an imaginary line extending from Bantolinao Point, Mactan Island, due North (true) to the Island of Cebu; and an imaginary line extending from Lauis Ledge, Mactan Island, to Lipata Point, Island of Cebu.

DOCUMENTS: *For Entry:*

7 Copies of the Inward Foreign Manifest listing therein all cargoes to be discharged in the port.
4 copies of the Cargo Stowage Plan.
3 copies of the Store List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition List.
3 copies of List of Drugs and Narcotics.
3 copies of Passenger List.
3 copies of Crew List.

The original copy of the manifest for all through cargo destined for other ports to be deposited with the Customs Inspector on board.

For clearance:

3 copies of Post Office Clearance (for mail discharged or loaded).
3 copies of Request for Clearance.
5 copies of B.C. Form 101 (Customs Inspector report on departing vessel).
5 copies of B.C. Form 98 (Clearance of Vessel to Foreign Port).
5 copies of B.C. Form 198 (Oath of Master).
3 copies of Quarantine Clearance.
1 copy of Plant and Animal Quarantine Clearance.
7 copies of B.C. Form 88 (Outward Foreign Manifest).
6 copies of B.C. Form 88–A (Statistical Supplement).
5 copies of Master's Oath covering list of officers on board.
5 copies of Crew List.

PILOTAGE: At least 48 hours before arrival, the shipmaster shall transmit to the ship's Agent in Manila through the Coastal Station, Manila Radio (DSZ, operated by the Association of International Shipping Lines), a message indicating the ship's position and the estimated time of arrival (ETA).

In turn, the ship's Agent shall pre-arrange the meeting time at the designated boat station through a telegram to the Cebu Harbour Pilots' Association.

Boat Station No. 1:

One mile off Black Buoy No. 1 in the vicinity of Bantolinao Lighthouse, Mactan Island for foreign vessels coming from the North of Cebu Harbour.

Boat Station No. 2:

One mile off Lauis Ledge, Mactan Island for foreign vessels coming from the South of Cebu Harbour.

For confirmation of arrival within the next 24 hours, the ship's Master may use Radio Marine Station "DYM" to contact the Harbour Pilots and the Port Authority, since VHF communication facilities are not available for the time being.

For possible contact with the harbour Pilots or the Port Authority of Cebu, the approaches are not covered by radar aid, nor by VHF communication, but by watchtower located at Cebu Customs Building.

Visual Signals: Request for Pilot. The single hoist of the international code flag "G".

Sound Signals: Request for Pilot. The international morse code "G" or 2 prolonged blasts, followed by 1 short blast of the ship's whistle.

Pilot Boats:

During night-time:

1. All around white light on top of a red light in a vertical line.
2. Side lights.

During daytime:

A motor launch of approximately 20 gross tons, with the single hoist of the international code flag "H".

ANCHORAGE:

(a) 1st Anchorage: In front of Pier 3 in position, Lat. 10° 17.8′ N., Long. 123° 54.90′ E. Depth MLLW=4 fathoms.

(b) 2nd Anchorage: In front of William Lines Warehouse in position, Lat. 10° 18.0′ N., Long. 123° 55.25′ E. Depth MLLW=5 fathoms.

(c) 3rd Anchorage: In front of Aboitiz Terminal in position, Lat. 10° 18.2′ N., Long. 123° 55.5′ E. Depth MLLW=6 fathoms.

South Stream:

(a) 1st Anchorage: Opposite Ludo Wharf in position, Lat. 10° 16.88′ N., Long. 123° 53.43′ E. Depth MLLW=6 fathoms.

(b) 2nd Anchorage: N.E. of Cawit Island in position, Lat. 10° 16.54′ N., Long. 123° 53.33′ E. Depth MLLW=8 fathoms.

(c) 3rd Anchorage: Lat. 10° 16.17′ N., Long. 123° 53.28′ E. Depth MLLW=6 fathoms.

(d) Explosive Anchorage: South of Lipata Point, West of Lauis Ledge.

Anchorage Instructions:

(a) Only 3 vessels of 600 ft. overall length can anchor at the anchorage with a safety margin for dragging and swinging during bad weather with 4 shackles in the water recommended for safe anchorage.

(b) For each vessel of 600 ft. overall length with 4 shackles of anchor chain in the water, approximate turning circle radius is 960 ft.

RESTRICTIONS:

1. Foreign ships are not allowed to pass the North Channel, due to the bridge between Madaue and Opon. However, ships of 80 ft. vertical height from MLW and length of 300 ft. may pass with utmost care.

2. Draft limitation of 40 ft. for Cebu Channel while port established berthing spaces vary from 10 ft. up to 30 ft.

3. Ballast, oil are prohibited to be discharged within the Cebu Harbour and Philippine waters.

MAX. SIZE: See "Berthing".

HEALTH: Pratique obtained after Quarantine personnel have boarded, mustered crew and passengers, and examined ship's health documents. Pratique automatic if vessel coming from another Philippine port.

RADIO: Globe Mackay & Radio Corp. *Call letters DZM. (Other call letters and frequencies available).*

Working frequencies: 4328 kc/s., 6492 kc/s., 8656 kc/s., 12984 kc/s.
Listening frequencies: 425 kc/s. and 500 kc/s.; 6258.5 – 6265.5 kc/s.; 8354–8374 kc/s.; 12531–12561 kc/s.

Master may contact Cebu Stevedoring Company through Channel 1 (156.7 Mc/s.) and Channel 2 (157.8 Mc/s.) VHF.

TUGS: The Cebu Harbour Pilots Association has available tugs of varying h.p. When additional h.p. is required, Cebu Stevedoring Co. can provide tugboat with h.p. ranging from 350 to 690 h.p.

BERTHING: Berthing may be done at any time during the day or at night and Masters should exercise their own judgment in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Port of Cebu: Berthing of vessels engaged in foreign trade are limited to moor only at the following berthing areas.

(a) National Main Port:

Berth Number	*Length of Berthing space (m.)*	*Draft Limitation (ft.)*
7	193	30
8	258	18
Pier 1 South side	153.65	25
Pier 1 North side	153.65	25
Pier 2 South side	155.65	25
Pier 2 North side	155.65	25

(b) Ludo Private Port: Berthing of vessels engaged in foreign trade at Ludo Private Port are moored to concrete dolphins running N.E. or S.W. of the Ludo pier. Draft limitation: 40 ft.

Port Establishment of Mandaue: Berthing of vessels engaged in foreign trade are not allowed at Mandaue. Draft limitation: 12 ft.

Port Establishment of Madan: Berthing of vessels engaged in foreign trade are allowed at General Milling Corporation Private Wharf, and Shell Island Depot Private Wharf.

Port District	*Draft Limitation (ft.)*
General Milling Corp. Pvt. Wharf	25
Opon Municipal Port	15
Mobil Oil Depot	25
Caltex Oil Depot	25
Shell Island Depot	30

Cebu is a principal port of entry open to both foreign and domestic trade.

The port of Cebu was taken over by the PPA in April, 1977.

Other Ports of Entry under PMU-Cebu.

I. Mactan. Another port of entry, N.E. of the Port of Cebu City. Considered as an industrial port, it has jurisdiction over all of Mactan, Shell and Olango islands. Average ship call is 145 vessels (foreign and domestic) per month.

Other ports of entry under the jurisdiction of PPA–Mactan but owned by private entities are:

General Milling Corporation – A 275 m. private marginal wharf with an average depth of 12.20 m. Foreign vessels usually carry raw wheat materials for processing at GMC mills.

Mobil Oil Philippines – 97 m. long with an average depth of 9.90 m. Has total storage capacity of 424,162 bbls. Used exclusively by tankers.

Caltex – Shell – 156.34 m. long with total storage capacity of 273.750 bbls.

II. Tagbilaran. Situated at the S.W. portion of the island-province of Bohol, the Tagbilaran Port has a total area of about 10,393.48 sq.m. Average depth is 3.28 m.

Pilotage is compulsory which is handled by the Tagbilaran Harbour Pilots Association.

Philippine Sinter Corporation (PSC) Private Port: Situated in Garcia Hernandez, S.E. of Bohol and is 53 km. from Tagbilaran City.

III. Other private ports which also serve as Ports of Entry.

Atlas Consolidated Mining & Development Corporation (ACMDC). Under the jurisdiction of the PPA Subport of Toledo, this private port caters to ocean-going vessels which unload imported machinery and equipment, anhydrous ammonia, sulphuric acid among others. While those exported are copper concentrates and pyrite cinders.

Durano Private Port in Danao, Cebu.

APO Cement Corporation Private Port in Tina-an, Naga, Cebu.

BRIDGES: The Opon-Mandaue bridge crossing the North channel is completed and open to traffic. According to Cebu Pilots Association, clearance is 76 ft. at HW and 80 ft. at LW.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary from Master.

Cranes, forklifts, trucks, tugs, barges and lighters are used for cargo handling and are mostly owned by private contractors.

MEDICAL: No advance notice to Agents needed. Hospital facilities available anytime.

TANKERS: See "Berthing".

FRESH WATER: Most berths supply by shore installation, otherwise by barge or trucks.

FUEL: Fuel oil can be obtained by arrangement with the different oil installation on Mactan Island.

FIRE PRECAUTIONS: Tankers discharging: smoking only allowed in saloon (officers), crew in the messroom.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary subject/Master's recommendation.

OPENING/CLOSING HATCHES: Stevedores, with aid of ship's crew.

CUSTOMS ALLOWANCE: (Tobacco) 1 carton a week for each crew member. (Wine and/or Spirits) 1 bottle a week for each crew member.

IDENTIFICATION CARDS: Required by Immigration Authorities.

CONSULS: Norwegian 9–77–20; Chinese 7–45–85; American 7–31–51.

REPAIRS: Minor repairs possible.

DRY DOCK: Cebu Shipyard – max. 1,000 d.w.t. only.

REPATRIATION: Facilities available.

AIRPORT: Distance 7 miles from port and regularly served by all domestic airlines.

TIME: Local time based on the 120° East meridian. GMT plus 8 hours.

HOLIDAYS: Cargo can be arranged during holidays, which are the following: New Year (January 1st); Maundy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Republic Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

DELAYS: Berthing on North side of piers depends upon tide and current. South side of piers, vessel can dock any time.

DEVELOPMENTS: Reclamation project at the North side of Cebu.

AUTHORITY: Philippine Ports Authority.

DADIANGAS (General Santos City): 06.06 N. 125.09 E. (See Plan Book)

PORT LIMITS: Port of General Santos embraces all that portion of Saranggani Bay bounded by an imaginary line extending across the bay from Tampuan Point to Sumpang Point, thence along the shoreline until the point of commencement (Latitude: 06° 06′ N., Longitude: 125° 09′ E.). This shall include all foreshore areas and delineated port area of Makar Wharf.

DOCUMENTS: Vessels calling at General Santos are required upon entry to submit to the Philippine Ports Authority the following: 2 copies of inward manifest, passenger and crew declaration list, 1 copy of cargo storage plan, and hatch list and vessel particulars.

PILOTAGE: Pilotage is compulsory for all vessels of foreign registry of 100 g.r.t. and over, and domestic vessels of 50 g.r.t. or over. The pilotage district covers the waters and harbours of the Port of General Santos, Mulbuk, Saranggani Bay, Glan, Kiamba and other ports of South Cotabato.

Pilot Boarding Ground: One mile East of Dole Pier by a red and white pilot launch flying the "H" flag. Privately owned pilot launches are used by the Harbour Pilots in serving vessels calling at General Santos. The pilot launches are painted white and red with the marking "Pilot" at their bows and fly a small Philippine flag and the red and white flags. These launches are stationed at the Western end of the quay.

One Pilot is on duty for 5 successive days on a 24-hour basis with one Harbour Pilot as reserve.

Docking Priority: As a general rule, the port has adopted the "first-come-first-served" basis in determining berthing priorities of vessels, subject to the exceptions hereinafter provided. Vessel's arrival means the time a vessel drops anchor at the Anchorage Area when there is no available area at the time a vessel reaches the port's Boarding Area when a berth is available.

Navigation Signals:

The following signals are recognised by all Pilots:
The pilot jack hoisted at the fore.
The international code signals or P.T.
The international code signal P.T. by flashing lights.

APPROACHES: At sea, navigating towards Dadiangas, there is only 1 navigational marker (Tinoca Point in Saranggani Strait) and that is an approach from the open Pacific, about 40 miles from Dadiangas. There are no buoys, beacons or other radar targets. The sea and harbour approaches are open and free of obstruction, and there is deep water almost to the beach, all the way into Saranggani Bay. The only apparent hazard on approach are the numerous fishing craft that are fishing at night and working along the traffic lane. Nevertheless, the fishing craft are well lighted.

ANCHORAGE: Vessels drop anchors at the designated area along the Saranggani Bay Cove near Barangay Bula Zone and just off the city. Vessels proceed immediately upon arrival to the anchorage area either to wait for berth at the public or private wharves or to wait for Customs boarding formalities and quarantine.

Anchorage of vessels is prohibited at the Fairway area, between the Dolefil Pier and Makar Wharf.

RESTRICTIONS: No restrictions on entering the harbour limits even at night time, but shipping Agents must notify and secure permits from the Authorities before incoming vessels are allowed to enter.

MAX. SIZE: See "Berthing".

HEALTH: Foreign vessels calling at the port are inspected by Immigration Officers to determine whether the vessels observe quarantine rules and regulations or whether the vessels are free from any quarantinable or communicable diseases.

RADIO: There is a privately owned radio installation in Dadiangas which should be listened to for special instructions and late priority needs.

Dadiangas – Dole/Stanfilco Marine
Call Sign – DXA2
Frequency – 8722
Power – 250 to 300 watts
Open – 0630 to about 0700 hrs. daily. Special arrangement can be made provided the station has been advised earlier.

When at anchorage, 1 hour's notice of berthing is to be given on VHF Channel 16 by the ship sailing into the wharf.

Estimated Time of Arrival (ETA) Notices:

The Master of the vessel sends a radio message to the ship's Agent in Manila containing advance shipping information as follows: name of vessel, port of destination, discharging/loading point (public or private wharf, at anchorage or at berth), ETA, LOA (length overall), estimated draft while alongside (in metres), nature and tonnage of cargo for discharging, and special berthing or cargo handling gear/equipment requirement.

The ship's Agent relays this shipping information at the earliest possible time to the shipping line branch/agency or Agent either by telegram, long distance or radio message which in turn, the branch Agent applies for berthing and/or anchorage allocation at the PPA, Port of General Santos. In the case of foreign or domestic vessel where it has no local Agent, messages are sent to the Harbour Pilot and to the government concerned agencies and its supervisor usually comes to arrange with agencies involved in the berthing/anchorage allocation of the vessel.

BERTHING: Berthing of vessel is done by Harbour Pilot and assisted by tugboat anytime during the day or night.

Generally, the length and breadth of a vessel entering the approaches of the Port of General Santos do not pose any problem. Vessels always berth head in, starboard side to.

On approach to the dock, walk the port anchor out until 1 shackle is at the water's edge. When about half a ship's length from the wharf, Pilot will order the anchor paid out.

	Length (m.)	*Width* (m.)	*Depth Alongside* (m.)	
Public Berth:				
Makar Wharf	561	20	8.5	MLLW
Private Berths:				
Dole Pier	145	18	11.5	
GMC Wharf	47	9	12.6	
Congson Pier	(still under construction)			

BULK CARGO FACILITIES: Bulk cargoes can be discharged/loaded at Makar Wharf, Dole Pier and GMC Wharf.

Port Services:

a. Port facilities servicing the banana, fish and pine industries with the use of refrigerated cargo container equipment are at the Dolefil Pier.
b. Port facilities servicing copra/by-products and other agricultural products are at Makar Wharf and GMC Pier.
c. Port facilities handling containers using the vessels' cranes or booms are at Makar Wharf, Dole Pier and GMC Pier.

SPECIALISED CARGO HANDLING FACILITIES: The port has no cargo handling facilities for Roll-on/Roll-off vessels or gantry cranes.

BRIDGES: None.

STEVEDORES: Agent of incoming vessel should advise and arrange gangs with cargo handling contractor at last 24 hours before arrival.

MEDICAL: There are three hospitals in General Santos City: Doctors' Hospital, St. Elizabeth Hospital and the General Santos Emergency Hospital. Shipping Agent makes arrangements with hospitals concerned in advance.

TANKERS: There are no available discharge facilities for tankers at the port except at the designated anchorage area where devices are installed by oil companies to allow vessels to discharge their cargo.

DENSITY: Variable.

FRESH WATER: Supply of fresh water is available alongside the quay. The Authority (PPA) has its own water system capable of supplying fresh water simultaneously to all vessels lying alongside the wharf. Present rate is P5.00 per ton.

FUEL: Supply of fuel or bunkering is done privately by local oil companies. A vessel shall be allowed to refuel at berth provided prior permit from the Authority is secured.

FIRE PRECAUTIONS: As a precautionary measure, vessels intending to refuel at the port are required to provide fire extinguishers for use in case of emergency.

CONSULS: None.

REPAIRS: Minor repairs at berth may be allowed provided that a permit is secured from the Authority.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Shipping Agents arrange with private security agencies the hiring of gangway/deck watchmen when the service is needed.

HATCHES: Stevedores usually open and close hatches. But when a vessel is of different model and the hatches are constructed differently, Crew members are requested to assist stevedores.

CUSTOMS ALLOWANCES: Quantity of goods permitted for each Crew member to be held out of bond are goods the crew can use personally, usually one or two bottles of wine and a pack of cigarettes.

CARGO GEAR: Special cargo equipment used in the discharge or loading of heavy lifts can be arranged with private contractor.

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration Office.

AIRPORT: There are two airports intended for domestic flights: Buayan Airport located 10.5 kms. N.E. from the port; and the Allah Valley Airport in Surallah, South Cotabato is located 75 kms. from Makar Wharf. The frequency of flight is twice weekly.

TIME: GMT plus 8 hours (Summertime GMT plus 9 hours – April to June).

HOLIDAYS: There are about 11 public holidays in the Philippines. Cargo work can be arranged with the contractor during any of these holidays.

POLICE/AMBULANCE/FIRE: Use telephone system. Contact is made through the operator.

SERVICES: Aside from the usual services rendered by the port, other ancillary services which are performed by private contractors are bunkering, re-watering, victualling, tug assistance, mooring, etc.

SHORE LEAVE: Crew members are allowed ashore provided that at all times there are sufficient personnel on board to attend in case of movement/shifting of vessel lying alongside the wharf.

IDENTIFICATION CARDS: Seaman's book or shore pass is sufficient.

REGULATIONS: PPA gate pass system is enforced to regulate and control the movement of vehicles and pedestrians in the port zone.

DELAYS: Work stoppages due to rain/inclement weather.

DEVELOPMENTS: Rehabilitation and upgrading of the existing 228 m. quay, construction of a 341 m. quay extension with alongside depth of 8.5 m.; dredging of about 260,000 cu.m. and reclamation of about 5.6 hectares; construction of concrete roads and pavements, open storage areas totalling about 55,000 sq.m.; PPA Administration Building, Fire Station, Amenity Blocks, Transit Sheds; water, electrical and drainage systems; and port perimeter fencing. This Port Development Project was completed in December, 1978.

GENERAL: The Port of General Santos is considered the country's first modern port and is equipped with the newly introduced cylindrical rubber fenders fixed to the wharf's cope line which serve as protectors to both berthing vessels and the wharf.

AUTHORITY: Philippine Ports Authority. Port of General Santos, General Santos City.

DAVAO: 07.04 N. 125.38 E. **(See Plan Book)**

See "General" before first port.

PORT LIMITS: Vessels enter the port through the Southern entrance of Pakiputan Strait. A vessel is considered to be an "arrived ship" and laytime will commence (subject to Charter-Party Terms) at the Pilot's boarding position located approximately 3 miles off the lighthouse at Sta. Ana Pier.

DOCUMENTS: Required on entry

The Philippine Ports Authority (PPA):
3 Inward Foreign Manifest
1 Cargo Stowage Plan and Hatch List
1 Passenger List
1 Crew Declaration List

The Bureau of Customs (BOC):
7 Inward Foreign Manifest
5 Cargo Stowage Plan and Hatch List
5 Stores List
5 Bonded Stores List
5 Firearms and Ammunitions List
5 Drugs and Narcotics List
5 Passenger List
5 Crew Declaration List
Clearance from last port of call.

PILOTAGE: The pilot station is furnished with a copy of the approved Application for Berthing/Anchorage Permit filed with the Port Authority 36 hours prior to ship's arrival, serving as a notice for meeting an incoming vessel.

ETA Notices: The Master of the vessel sends a radio message to the ship's Agent in Manila through the coastal radio station (DSZ) Manila, operated by the Association of International Shipping Lines containing the advance shipping information as follows:

Name of vessel.
Port of destination and discharging/loading point.
ETA.
LOA.
Estimated draft whilst alongside.
Nature and tonnage of cargo for discharging.
Special berthing or cargo handling gear/equipment requirement.

The ship's Agent in Manila consequently relays this shipping information to the local Agent at the Port of Davao either by long distance telephone, telegram or telex. Where the vessel does not have a local Agent, necessary messages are sent to the Harbour Pilot and Government Agencies directly involved; the supercargo normally comes a day ahead of the vessel's ETA.

Signals: The following signals are recognised by all Pilots:

To ask for Pilot by day:
The pilot jack hoisted at the fore.
The International Code Signals or P.T.

To ask for a Pilot by night:
The pyrotechnic light, commonly known as blue light, flashed every 15 minutes.
A bright white light, flashed or shown at short or frequent intervals just above the bulwark for about a minute at a time.
The International Code Signal P.T. by flashing lights.

Pilot Launches: A total of 6 launches are regularly used by the Harbour Pilots distinctively painted red and white with a number preceded by "P" at their bows and fly a small Philippine flag and a red and white flag. Three Pilots are posted to attend to all pilotage needs of vessels on an 8 hour shift scheduled for 24 hours. The pilot launches are stationed at Sta. Ana Pier, Sasa Wharf and Hijo Wharf.

The Pilot's boarding position is at 7° 02.0′ N., 125° 39.0′ E.

ANCHORAGE: General Anchorage.

Sta. Ana Anchorage: Vessels awaiting berth availability, anchor about 450 yards N.E. or S.E. of Santa Ana Pier in 12 fathoms, mud. The anchorage is well protected except during the S.W. monsoon.

Loading Anchorage.

Maco Anchorage: Anchor in 50 fathoms with the sawmill bearing 057°, the white plantation house near the mouth of Madaum River bearing 288°, and, the Western tangent of Bassa Point bearing 223°. The bottom is mud and evidently is good holding ground.

Tambungon Anchorage: Anchorage can be taken in 10 to 20 fathoms with good holding ground.

Bunawan Anchorage: Vessels anchor Eastward of the ruined pier in 8 to 15 fathoms.

Tibungco Anchorage: Vessels anchor Eastward of the ruined pier about 0.5 mile offshore in 12 to 15 fathoms.

Talomo Anchorage: Vessels anchor at the Southwestern part of the bay in 20 fathoms, mud bottom.

It is opened to the S.W. monsoon.

Daliao Anchorage: Vessels anchor about 300 yards Southeastward of the ruined pier in 8 to 15 fathoms. This anchorage is exposed to Easterly winds and sea.

Tagabuli Anchorage: A deep inlet, 0.9 mile long and about 500 yards wide, is 2.3 miles Northward of Digos Point. The anchorage is protected from winds, except those from E.S.E., is in the middle of the bay in 16 to 20 fathoms, mud bottom, where the width of the bay is about 400 yards between the edges of the reefs.

Malalag Anchorage: Anchorage for vessels of any size and with more protection is Northeastward of the pier in 16 to 19 fathoms, mud bottom. Vessels entering the bay for shelter will find good protected anchorage between the islet near the head of the bay and the North shore in 20 fathoms mud.

RESTRICTIONS: There are no particular restrictions in entering the harbour limits, even at night time, after prior advices have been served and prescribed berth/anchorage permit has been secured from the Port Authority.

MAX. SIZE: Generally, length and breadth of any vessel does not pose a problem in entering the approaches of the Port of Davao, however,

Name of Port Facility	Location	Controlling Draft (m.)	Length Overall (m.)	Approx. Heading	MLLW Elevation (Sea Level) (m.)	Remarks
A. Principal Ports. (Port of Entry).						
1. Sasa Wharf	Pakiputan Strait	N–14.8 C–11.0 S–13.5	515.0	007°/187°	3.6	General cargo.
2. Sta. Ana Pier	Sta. Ana	Inner end 10.0	N–104.4 S–88.5	270°	3.0	General cargo. Domestic.
B. Sub-port of Entry						
1. Mati Wharf	Mati, Dvo. Oriental	7.3	81.0	—	—	General cargo.
C. Private Ports. (Port of Entry).						
1. Caltex (Phil.), Inc. Jetty	Pakiputan Strait	7.0	66.0	030°/210°	—	Oil berth.
2. Mobil Oil	Pakiputan Strait	9.7	55.18	041°/221°	—	Oil berth.
3. Legaspi Oil Co. (Legoil) Wharf	Pakiputan Strait	9.3	205.0	042°/222°	4.3	Coco oil, general cargo.
4. National Warehousing Corp. (NAWACO), Wharf	Pakiputan Strait	8.5	99.0	032°/212°	3.2	General cargo.
5. Pilipinas Shell Petroleum Corp. Jetty	Pakiputan Strait	10.4	42.68	032°/212°	—	Oil berth.
6. Terminal Facilities & Services Corp. (TEFASCO) Wharf	Bo. Ilang	10.0	400.0	017°/197°	3.0	General cargo.
7. Maritime Co. of the Phil. (MCP) Wharf	Bo. Ilang	8.8	101.0	347°/167°	—	General cargo, banana berth.
8. Pacific International Terminal Facilities Inc. (PACINTER) Wharf	Bayawa, Panabo, Dvo. del Norte	12.0	110.0	050°/230°	3.6	General cargo, banana berth.
9. Tagum Agricultural Dev. Co., Inc. (TADECO) Wharf	Bayawa, Panabo, Dvo. del Norte	12.0	116.0	050°/230°	4.3	General cargo, banana berth.
10. Hijo Plantation Inc. (HIJO) Wharf	Madaum, Tagum, Dvo. del Norte	13.0	270.0	318°	4.3	General cargo, banana and conveyor berth.

berthing in individual ports varies on the ports' facilities and characteristics as listed: See table above.

HEALTH: Vessels arriving from foreign ports are subject to quarantine inspection at their first port of call in the Philippines. A vessel inspected and granted a pratique in a Philippine port is not subject to quarantine inspection at its next Philippine port of call except when during the trip there has been a case of illness or death on board or its last Philippine port of departure is infected with a quarantinable disease.

Vessels from the U.S.A., Canada, Australia, or New Zealand are permitted to enter a port, disembark and commence operations provided they have complied with the provisions of the Controlled Free Pratique.

The following are required from the Master:

1. Maritime Declaration of Health duly signed by the Master.
2. Crew List.
3. A valid deratting and/or exemption certificate.
4. Cargo Manifest.

For any suspected disease or fever on board, the following will apply:

1. For quarantinable disease, special measures by the Quarantine Medical Officer will be undertaken to prevent its entry.
2. For a non-quarantinable disease, patients should be disembarked and hospitalised and the local Health Officer notified. For non-landing patients, they should be isolated on board and treated.

RADIO: Other than those mentioned under "Pilotage", all messages from vessels to Agents can be sent via Apo Communication Service in Davao City, HF frequency DXF and VHF, DXF-6.

VHF: Radio communication facilities are not available linking vessel to landside operations. Maritime Company of the Philippines and Everett Steamship Corp. have VHF radio sets capable of connecting a ship in port to local office communication.

RADAR: No radar facilities available.

TUGS: There are no regular tugboats for vessels entering the port. Tugs may be availed of on pre-arranged conditions from Luzon Stevedoring Corp.

BERTHING: For details of available berths and types of cargoes handled respectively thereat, see table of port facilities under "Max. Size". Normally, discharging and loading of cargoes are by ship's gear.

CRANES: 30-ton cranes are available at LEGOIL and TEFASCO wharves; 20-ton cranes can be made available at Sasa Wharf and Sta. Ana Pier on pre-arranged conditions.

BULK CARGO FACILITIES: Bulk cargoes, if any, are handled at general cargo berths. Loading rate is from 10-20 tonnes per net gang hour at Sasa government wharf and various banana berths.

SPECIALISED CARGO HANDLING FACILITIES: There are none available, except for those mentioned as oil berths, all other ports are utilised as multi-purpose berths.

BRIDGES: The fairway is clear of bridges.

STEVEDORES: Upon arrival, the Arrastre Stevedoring Company is furnished a copy of the Application for Berthing Permit which is filed 36 hours prior to ship's arrival. Based thereon, gangs are mobilised as would be necessary to service the size of cargoes to be handled.

Conventional cargoes are worked at the rate of 14 tons per net gang hour at Sasa government wharf.

MEDICAL: There is 1 government hospital and 4 private hospitals in the area equipped with adequate medical services and facilities.

TANKERS: Diameter of discharge lines at oil berths range from 1.5 in. – 8.0 in.

DENSITY: Average salinity – 1025.

FRESH WATER: Fresh water is available and delivered either through tank lorries or barges; tank barges also service vessels worked at loading anchorages.

The following rates are prevailing:

Point of Delivery	Distance (Nautical Mile)	Minimum Delivery (Tons)	Manner of Delivery
1. Source	—	—	
2. Sta. Ana	10	50	Barge
3. Sasa	12	50	Barge Lorry
4. Panacan	16	50	Barge Lorry
5. Panabo	24	100	Barge
6. Madaum	29	100	Barge
7. Maco & Malalag	31	200	Barge

FUEL: All grades available – bunkering and other special fuel.

FIRE PRECAUTIONS: at the oil berths, there are no specific fire precautions other than the usual non-smoking precaution.

CONSULS:

Japanese Consulate	Tel. No. 7-37-81
Indonesian Consulate General	Tel. No. 7-84-86

REPAIRS: Engine overhaul; all types of deck repairs; underwater bottom cleaning.

DRYDOCKS: Temporarily non-operational; capacity – 1,600 g.r.t.

SURVEYORS: R. J. del Pan Mindanao Surveyors, Inc. representing Lloyds, A.B.S., N.K.K., Cargo and Marine Engineers, P&I Club, G.L. and Cargo Gear Bureau.

GANGWAY/DECK WATCHMEN: Watchmen recommended. Minimum cost per watchman – Philippine P.4.50 per hour.

HATCHES: Normally, opening/closing of hatches is carried out by the stevedores.

CUSTOMS ALLOWANCES: Crew members are allowed to bring out supplies to be held out of bond but not to cost more than P.10.00 per article. Generally, sufficient amount for crew's consumption while in port is permitted.

CARGO GEAR: Ship's gear usually used in loading and discharging. When shore cranes are needed, vessel's notice to Agent should contain the requirement.

REPATRIATION: The Immigration Station can effect crew changes and likewise, allow the disembarkation of alien seamen for repatriation to their countries of origin, provided, they possess valid travel documents. Final repatriation shall be effected in Manila after securing the necessary immigration clearances.

AIRPORT: Sasa Airport, 3 kms. from Sasa Wharf. Regular daily jet flights to Manila and other major cities. Turbo-prop service is available for other points.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Holy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Fil-American Friendship Day (July 4th); National Heroes Day (Nov. 30th); Christmas Day (Dec. 25th); Rizal Day (Dec. 30th). Special holidays declared by the President of the Philippines. Work can be arranged on any holiday with the shipping Agent.

POLICE/AMBULANCE/FIRE: Police Tel: No. 7-26-48; Ambulance Tel: No. 7-27-31; Fire Tel: No. 07.

TELEPHONES: No facilities for placing telephones onboard.

SERVICES: Cleaning on board is done either by stevedores or hired deckhands with the use of ship's equipment.
SHORE LEAVE: Crew members are issued shore pass by the Bureau of Immigration Officers.
IDENTIFICATION CARD: Seaman's Book is sufficient.
REGULATIONS: All vessel's movements and works thereof are regulated by the Port Authority.
DELAYS: Usual causes of delays are due to non-availability of berth and rain.
DEVELOPMENTS: Completed additional concrete quay of 405 m. at Sasa Wharf.
GENERAL: Sasa Wharf, St. Ana Pier, and Mati Wharf are government port facilities; the rest are privately-owned.
SHIPMASTER'S REPORT: September 1977.

Documents:
14 Copies Inward Foreign Manifest
12 Copies Crew List
8 Copies Passenger List
8 Copies Narcotic List
8 Copies Personal Effects List
10 Copies Store List
5 Copies Vessel's General Information
8 Copies Money List
8 Copies List of Arms and Ammunition
8 Copies Parcel List
1 Copy Clearance from last port
2 Copies Quarantine Declaration
8 Copies Plant List
8 Copies List of Animals

Note: Narcotic List, Money List, List of Ammunition and Arms, List of Plants and Animals may be on the same sheet.

Radio/VHF Communications:
APO Communications DXF and Marphil Radio. The Agents Maritime Company of Phil and Everett Steamship Company are equipped with VHF in their offices.

Berthing (for bananas):
1. Madaum Pier – Del Monte bananas (a new pier under construction)
2. Panabo Pier – Chiquita bananas
3. Bacnotan – Del Monte bananas
4. NIDC Pier – Dole bananas.

Berthing (for general cargo):
Max. draft North 24 ft. Centre 24 ft. and South 32 ft. max. length 555 m. A new pier for container vessel and general cargo under construction and expected to be ready in course of the next 12 months.
Medical/Hospital/Clinics: Davao Doctors' Hospital; San Pedro Hospital; Mt. Apo Hospital; Brokenshire Hospital; Davao Gen. Hospital (Government owned). All hospitals located in Davao City.
Identification Card: Not required.
Shore Leave: Curfew hour from 2400 (0000) up to 0400 hrs.
Repatriation: Expensive. Crew to be escorted by one Immigration Officer from Davao City to Manila and all expenses including overtime of Immigration Officer to be charged to Owner's account.
Holidays: New Year – Jan 1st; Bataan Day – April 19th; Labour Day – May 1st; Independence Day – June 12th; Fil-Am Day – July 4th; All Saints Day – Nov. 1st; Bonifacio Day – Nov. 30th; Christmas Day – Dec. 25th; Rizal Day – Dec. 30th.
Bunkers: Fuel, diesel and lube oils available but clearance takes a long time.
Shipchandler/Laundry: Available, prices reasonable.
Working Gangs for Painting Cleaning etc: Foreman: regular time – Peso 3.50/hour; overtime – Peso 5.25/hour. Ordinary workers: regular time – 2.90/hour; overtime – 4.35/hour.
Other charges: Meals. Foreman require 3 meals per day; ordinary require 2 meals per day. Transportation included in working hours.
Repairs of Ship's Instruments: Radar – any type; Radio – any type; Gyro – any type.
Ship Repairs: Minor.
Developments: At the Samal Island (North side) a large ship wharf is under construction.
Time: Standard time minus 8 hours on GMT (but 1977 was the first year with Summer time which commenced in March until September.)
AUTHORITY: Philippine Ports Authority, Port Management Unit (PMU), Port of Davao, Sasa, Davao City.

HONDAGUA, Luzon Island: 13.56 N. 122.14 E.

SHIPMASTER'S REPORT: 1974.
APPROACHES: B.A. Charts 3806 and 3475, neither of which are of very much assistance. There are no navigational marks by night, but the water is deep and we made a comfortable approach by Radar.
PILOTAGE: Minimum 12 hours notice required. Pilot boards at Siain, a village 10 miles West of Hondagua on the North coast of the mainland. Pilot boat is a small dug-out canoe fitted with outriggers and an outboard motor, and by day exhibits the pilot flag, and at night a single white light similar to a normal fishing canoe. Pilot shouts to attract attention when close to the vessel at night.
DOCUMENTS: Officials embark at Siain but not before 0630 hrs. due to curfew. Accommodation ladder required. All documents required as for first port of entry, excepting quarantine which is not performed twice.
10 Ships Store Lists.
8 Crew Personal Effects lists.
12 Crew Lists.
3 Health Declarations.
2 Visaed Crew Lists.
2 Plant Quarantine Lists.
2 Animal Lists.

Officials disembark again at Siain with the exception of the 3 Customs Officers, who remain on board and who require meals and accommodation.
TUGS: Not available.
BERTHING: One berth only, for grain discharge and for coastal tankers supplying fuel to the Mill. Berth lies East/West with approx. depth at LW East Dolphin 28 ft., Elevator about 34 ft. 6 in., and West Dolphin about 39 ft. The berth is thought not to be suitable for vessels exceeding 500 ft. L.O.A. The dolphins are of timber-pole construction, and the elevator is concrete. Arrival and departure from the berth is during daylight only. Mooring arrangement is 2 headropes to buoy, 2 breastropes to shore, spring-wire to bollard on elevator, 4 sternlines to concrete dolphin, and 1 spring-wire to bollard on elevator. An old landing-barge is used as a mooring boat, but this has only one engine on the port side and is not very manoeuvrable. A motorised dug-out canoe also assists, but is not powerful enough to pull a line very far. The elevator has two discharging suckers, but these are fixed and the vessel has to be shifted hatch to hatch. Combined capacity about 80 t.p.h. which could be improved, but foundations of conveyor-belt system damaged by earthquakes.
FRESH WATER: Available at berth but not of very good quality. Ship's hoses required.
AIRPORT: None. There is a train service to Manila, about a six-hour journey.
CURFEW: Area is under Martial Law. Curfew from 2300 to 0600 hrs.

ILIGAN: Mindanao. 08.14 N. 124.14 E. (See Plan Book)

PILOTAGE: Pilotage for docking and undocking at government and privately owned piers/wharves for foreign vessels is compulsory. For domestic vessels pilotage is necessary only when docking. The Harbour Pilot meets the vessel 1 to 2 miles N.W. of the pier. Vessels coming from foreign ports intending to dock at any of the private piers will first anchor at designated anchorage area for boarding formalities.
ANCHORAGES: Upon takeover by PPA in August 1977, anchorage areas were designated. Moreover, when private piers were turned over by the PPA in November 1977, some other anchorage areas were drawn to cope for the needs of foreign vessels. Anchorage areas are found at least 0.5 to 1 mile from beaches and wharves and the average depth varies from 37 m. to 56 m. The characteristics of the bottom near the beach is muddy. Beyond 0.5 mile is good holding ground of sand and gravel. In case of strong S.W. winds, vessels may resort to the natural protection of the mountains of Initao and Kiwalan.
RESTRICTIONS: See "Berthing".
MAX. SIZE: Max. LOA 150 m. Max. Draft 25 ft. and 15,000 d.w.t. at Pier No. 3 (For foreign-going vessels).
HEALTH: Vessels clear quarantine upon arrival from foreign port. Health Officer boards the vessel 2 miles off the pier at designated quarantine area.
TUGS: The Iligan Harbour Pilot's Association owns 2 tugs both serving the domestic and foreign vessels. The use of tug is necessary especially when docking and undocking foreign vessels on government and private piers. Additional tugs are also available if the Harbour Pilot thinks necessary. It is important that the Masters of vessels/shipping Agents notify the Harbour Pilot at least 48 hours in advance of vessels arrival to ensure the availability of tugs.
BERTHING: Berthing for domestic vessels may be done anytime of the day or night. Foreign-going vessels berth during daylight hours and undock at anytime.

	Length	*Width*	*Depth*
Pier No. 1 (Concrete)	96 m.	12 m.	4 m.
Pier No. 2 (Concrete)	96 m.	12 m.	3 m.
Pier No. 3 (Concrete)	240 m.	15 m.	6.5 m.

STEVEDORES: Domestic and foreign-going vessels proceeding to Iligan should cable their Agents or representatives as to their ETAs, at least 24 hours prior to arrival in order that the stevedoring company may assign sufficient number of gangs to the vessel. Later, if the ETA is revised, shipping Agent should immediately notify the arrastre and stevedoring firm of change. The arrastre and stevedoring firm that controls the government pier in Iligan is handled by the Iligan Merged Arrastre and Stevedoring Corporation (IMASCO).
FRESH WATER: Fresh water is available to vessels loading or unloading at Pier No. 1 and 3 which is equipped with connection direct from the City Waterworks.
FUEL: Bunkers are available provided prior notice is given through the ship's Agent.
IDENTIFICATION CARDS: Not required.
CONSULS: In Manila.
REPATRIATION: Local Immigration takes care of any repatriation or disembarkation provided advance notice and they are given names and destination of each crew member.
AIRPORT: Baloi Airport 15 km. Cagayan de Oro Airport 110 km.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday and Good Friday (movable); Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); Thanksgiving Day (September 21st); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the Prime Minister of the Philippines are also included. Legal holidays which fall on Sundays are observed the following day. Cargo work can be arranged on any or all holidays with the vessel's Agent.
POLICE/AMBULANCE/FIRE: Police Tel. 101. City Hospital Tel. 20593. Fire Dept. Tel. 103
GENERAL: It is necessary during berthing and unberthing that the ship's engines, tackle and all other gear be in an operating condition and in a state of readiness for use at the moment's notice as required.
TELEPHONES: Placing of telephones on board foreign vessels is not available at present except offices located inside the port zone.

SHIPMASTER'S REPORT: 1974

Approaches: B.A. Chart 3426. This is of not very much use as an approach chart as the scale is too small. However, the water is deep and therefore it does not matter too much. On this voyage we made an approach in darkness and solely on Radar. The only navigational light, a fixed red, being very hard to distinguish.

Pilotage: The Pilot boards about 1 mile N.W. of the piers. Pilot boat is a river-type launch about 50 ft. in length with a grey hull and a white funnel.

Anchorage: 2 cables from old-harbour piers. 7 shackles in 50 fathoms.

Radio: No VHF facilities.

Officials: Iligan is a Port of Entry. Officials board at the anchorage. Accommodation ladder required. Usual procedures take about 1 to 1 hour 30 minutes.

Documents:

20 Ship's Stores Lists.
14 Crew Personal Declarations.
3 Vaccination, and inoculation dates.
3 Ports of Call and dates for previous 3 months.

Immigration: Before leaving last foreign port for the Philippines, obtain 4 official Crew List Forms from the Philippine Consul. Complete these forms and have them visaed by the Consul who will retain 2, and return 2 to the ship. Passes are required for crew members going ashore.

Customs Allowance: 1 bottle and 200 cigarettes per person. 3 Customs officers live on board all the time, and require accommodation and meals.

Tugs: Up to 4 tugs available if required, but it is advisable to give notice of requirements well in advance, since these tugs may be engaged in towing barges elsewhere around the island.

Berthing: Quinalang Cove: 1 grain discharge berth. Depth at berth 40 ft. and ample room for a vessel of 600 ft. L.O.A. Discharge is by sucker direct to the Silo. There are 2 suckers with a combined average discharge rate of 100 t.p.h., but suckers are located in fixed positions requiring the vessel to be shifted hatch to hatch. Berth is well-fendered, with a shore gangway. Stevedores supply a good hatch-tent for working in the rain. 1 bulk-copra loading berth, 600 ft. in length and draft said to be 32 ft. 1 bulk-cement loading berth, reported to be capable of accommodating vessels of 25,000 g.r.t.

Camp Overton: Located South of Iligan, there is reported to be a steel-loading berth to accommodate vessels of 750 ft. length, and 36 ft. draft.

Fresh Water: Available at most berths.

Shore Leave: Crew members should take special care when proceeding ashore, and should not carry cameras or wear wristwatches etc. It is advisable to return aboard before darkness.

Airport: About 20 miles distant. Daily flights to Cebu and Manila.

Stores: Fresh fruit available, also good supply of seafood.

Repairs: Only very minor repairs can be undertaken.

Time: GMT plus 8 hours.

SHIPMASTER'S REPORT: September 1976.

Coconut Oil Berth: Located at "Quinalong Cove" Lat. 08.17 N. 124.15 E. Least depth of water in channel from sea to berth – 40 fathoms. Mean tidal range 5 ft. Density 1025. Nature of bottom at berth – mud. Vessels can berth in daylight only, unberthing anytime.

Anchorage: 3 cables S.W. of City Pier. Depth at LW 70 fathoms, cable should be "walked out".

Vessels hoses used, length of shoreline 300 m., size 12 in. No shore booster pumps used. Products handled, coconut oil and coconut products.

Pilotage: Compulsory. Pilot requires 24 hours notice and boards 1 mile N.W. of City Pier.

Max. size of vessel that can enter the port of Iligan is 100,000 d.w.t. and draft 45 ft. Keel clearance required, about 2 ft.

5 small and medium size tugs available.

Nearest consuls are in Manila.

Facilities available: Fresh water, 5 t.p.h. Fresh provisions. Laundry.

No slop tanks, surveyor, repair facilities, fuel.

Documents:

2 Visaed Crew Lists (Philippine) from previous port. If diverted at sea, a copy of the diversionary cable required.
6 Ordinary Crew Lists
6 Personnel Effects Lists
6 Store Manifests
6 Parcel Lists
6 Arms Lists
6 Mail Lists
6 Narcotics Lists
6 Animal Lists
6 Plant Lists
6 Cargo Manifests
6 Transit Manifests
6 List of Ports
6 Currency Lists

There is a cabin search by 4 Customs Officers, accompanied by 2 Ship's Officers. They collected an undeclared radio and two cameras. They did not impose any fine, as they said they had been courteously treated, and this was the vessel's first visit.

3 Customs Officers remain aboard, and have to be fed.

SHIPMASTER'S REPORT: June, 1978.

To avoid having to anchor in very deep and unsafe places organise the arrival time for daylight.

The wharf's construction has been completed though the depths alongside do not facilitate the berthing of large ships. Near the centre of the wharf is a patch of 15 ft. (see Plan).

An anchor is lowered to 1 shackle in the water and after dropping slacked away when necessary. This is to facilitate unmooring. A small tug assists. No. V and VI hatches overhung the quay.

AUTHORITY: Philippine Ports Authority.

ILOILO, Panay: 10.41 N. 122.35 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: Also see "Anchorage" – last paragraph. Iloilo Harbour is defined as that portion of Iloilo Strait within the following boundaries: an imaginary line extending from the Northern bank of Dumangas River, Island of Panay, across Iloilo Strait to Navalas Point on the Northern coast of Guimaras Island; thence along the N.W. and West shore of Guimaras Island to Luzaran Point thence along an imaginary line extending from Luzaran Point to the South bank at the mouth of Siuaragan River in the municipality of San Joaquin, Province of Iloilo, Island of Panay. Thence along the Southern shore line of the Island of Panay to the North bank of Dumangas River, the point of commencement.

DOCUMENTS:

Bureau of Customs:

1. On Arrival:
   7 Inward Foreign Manifests
   3 Crew Lists
   3 Personal Effect Lists
   3 Store Lists
   3 Arms and Ammunition Lists
   3 Narcotics Lists
   3 Mail Lists
   3 Bonded Stores Lists
   3 Passenger Lists
   3 Storage Plan (if vessel has cargoes to be discharged)
   2 Bills of Lading
   1 Clearance from last port of call.
2. On Departure:
   4 Statistical Supplement (for vessels leaving directly for a foreign port).
   7 Outward Foreign Manifests.

Philippine Ports Authority:

1. On Arrival.
   2 Inward Foreign Manifests
   2 Passenger Lists.
2. On Departure:
   2 Outward Foreign Manifests.

PILOTAGE:

1. Application (notice) for pilotage services is usually made by a shipping Agent at least 24 hours before the vessel's arrival. Notice may also be tendered via a commercial telegraph office addressed to Iloilo Harbour Pilot Association, Muelle Loney St., Iloilo City. the Pilot Association does not own any VHF radio.

2. The Pilot Association owns 5 standard-designed pilot boats, with one being utilized as water taxi for vessel's crew intending to go on shore leave.

3. Request for pilotage services may be done in either of the following ways:

(a) 2 long and 1 short blast of the vessel's whistle.
(b) Continuous flashing of blue light during night time.
(c) Display of the international "G" flag during daytime.

4. There are 2 Pilot stations where the Pilot may be taken aboard, namely:

(a) Sinapsapan Point at the South entrance, 8 miles from the port.
(b) Nabalas Point at the North entrance, 12 miles from the port.

5. With respect to the boarding and safety measures, the Pilot requires a sturdy and reliable pilot ladder.

ANCHORAGE: (proposed)

The anchorage of the Port of Iloilo is that portion of Iloilo Strait within the following boundaries: an imaginary line extending from Balabago Point, Island of Panay across Iloilo Strait up to Cabugao Point on the Northern Coast of the Island of Guimaras, thence along Northwest and West Shore of Guimaras Island to Bondulan Point; thence along Southern shore line of the island of Panay to Balabago Point, the Point of commencement.

Note: A vessel is considered "arrived" after it drops anchor at any point within the boundaries described above.

RESTRICTIONS: Generally, a vessel may enter the port from the Pilot station at any time of the day or night. However, said entrance of the vessel is restricted by the draft of the vessel and the tide at the time of entrance. At MLLW, only vessels with a maximum draft of 28 ft. may enter or depart from the port. At high water (5 ft.) vessels with a maximum draft of 33 ft. may enter or depart from the port.

MAX. SIZE: Foreign pier has a total length of 345 m., berth 2 (100 m.) has a controlling draft of 33 ft. alongside at MLLW.

HEALTH: The port has 1 Quarantine Doctor. Quarantine formalities are done while vessel is at the Quarantine Station. Notice for quarantine formalities is usually given by the shipping Agent 24 hours before the vessel's arrival.

The following documents are necessary for presentation to the Quarantine Officer on arrival.

A. On arrival:

1. Deratting Exemption Certificate. (If expired or about to expire, the same could be renewed at the port for a period of 6 months).
2. International Certificate of Vaccination. (If expired or about to expire, vessel crew could be vaccinated locally).
3. Maritime Declaration of Health. (Form to accomplish available locally).

Above documents are necessary for the issuance of Free Pratique.

B. On departure:

1. Quarantine Clearance for Outgoing Vessels. (A fee of P4.00 or approximately $0.53).

Free pratique is issued at the first port of call. It becomes automatic if the vessel intends to call at another port within the Philippines.

RADIO: Coastal Marine Radio Station:
Location: 10° 41.4′ N. 122° 32.8′ E.
Call Sign: DYV
Frequencies: 8632 kHz. 0000 GMT – 0400 GMT
0600 GMT – 0900 GMT
12948 kHz. 0900 GMT – 1130 GMT
VHF Channel 16

Also private telegraph companies with international relaying stations; Central Radio Communications, Radio Communications of the Philippines., Inc.

VHF: Retransco has a VHF radio. Frequency: Channel 1 – 156.8 mHz, Channel 2 – 156.65 mHz.

TUGS: Tugboats usually join vessels for docking and undocking operation. The services may be provided by the pilot's boat or tugboats of the Visayan Stevedoring & Transportation Corp. The charge is P150.00/tug during daytime and P180.00/tug during nightime.

BERTHING: Also see "Shipmasters Report".

The port has a foreign pier near the mouth of Iloilo River. It has a length of 345 m. divided into 3 berths of 115 m. each. The maximum draft alongside the pier at MLL is 28 ft. However, a vessel may be loaded up to the draft of 31 ft. (at MLL) with the use of a mule barge.

Usually, loading and discharging are done with the use of the vessels own gear, except catch-all nets and crane for heavy lift cargoes which may be provided by the Stevedore operator.

The arrestre operator is capable of handling general and heavy lift cargoes, cargoes in bags (like sugar, fertilizers, cements, copra cake, etc.). Bulk loading may be done also by "bleeding" cargoes in bags directly into the vessel's hold.

CRANES: 1 crawler crane with 15 ton capacity owned by private arrestre. The Ministry of Public Highways has 4 heavy-lift cranes of 25 tons capacity.

BULK CARGO FACILITIES: Within the harbour limit of the port is sugar bulk-loading installation situated at Jordan, Guimaras Island. The berth is capable of accommodating a vessel with a LOA of 182 m. and a draft of 35 ft. at MLL.

Loading is done with the use of a mechanical conveyor which has a rated capacity of 400-500 metric tons per hour. The discharging gear has a maximum height of 30 ft. above HWL.

Cargo handled in this berth is exclusively sugar in bulk.

SPECIALIZED CARGO-HANDLING FACILITIES: The port is *not* specially equipped for handling containers or roll-on/roll-off traffic.

LPG facilities at Petron.

STEVEDORES: An advice of 24 hours before the vessel's ETA is required to prepare the gangs necessary to perform stevedoring services. Stevedoring services can average at the rate of 900 – 1,000 metric tons of loading/unloading per 24 hours.

MEDICAL: The port itself does not own any medical facilities. However, within the City itself are 6 modern hospitals which could be used by the vessel's sick crew. Vaccinations and inoculations may be done by the Quarantine doctor who also issues corresponding certificates for the same.

TANKERS: Bunker is handled through 6 in. pipe-lines; however, Petron load bunker through a 4 in. pipe. "White oil products" are handled through 8 in. pipes. There are 2 privately owned oil-water separators.

Types of oil available: premium, regular, automotive diesel fuel oil, kerosene, and bunker C; rate of delivery: 10–12 t.p.h.

FRESH WATER: Fresh water can be supplied by a private supplier, Springwater Marine Services, Iloilo City. Water is supplied to the vessel while at anchorage or at berth from a water barge at the rate of 15–20 M.T./hour. cost is P16.00 ($2.13) per metric ton. Water is safe and potable.

FUEL: Bunker fuel and fuel oil (of any desired viscosity) are available and can be supplied by Philippine Shell Petroleum Corp., Lapuz, Iloilo City. It can be delivered either by barge or by road tanker at the rate of 10–12 t.p.h. An advance notice of 24 hours prior to delivery is necessary.

CONSULS: British, at Hongkong and Shanghai Bank, Ledesma Street, Iloilo City, tel: 7-50-86.

REPAIRS/SERVICES: The Iloilo Dock and Engineering Company offers the following major services: marine construction and repairs, conversion, machine shop, electronics navigational equipment installation and repairs, steel fabrication, sandblasting, engineering and project consultation. Other services offered: marine salvage, stevedoring and longshoring, lighterage, towing-harbour, inter-island and ocean warehousing and in-transit handling.

Radar: Repair of ships radar may be done by Louman & Sons Technical Service Inc. The company is capable of repairing radar, radio transmitter and receiver, fathometer and steering system. Usually contacted by the ship's Agent.

DRYDOCKS: Largest drydock at Ideco is Shipway 1: Length 587 ft., width 56 ft. depth (draft at MLLW, 10 ft. without keel blocks, capacity 2,500 L.T. there are 4 other smaller docks, and several side berths.

SURVEYORS: Local Marine Surveyor, Delpan.

WATCHMEN: Watchmen are optional, however if the Master so desires, watchmen can be hired.

HATCHES: Opening/closing of vessels hatches and securing the vessel's derricks, are usually done by the stevedores.

CARGO GEAR: Load/discharge is effected by ship's gear. There is no special cargo equipment except for heavy lift cranes.

CUSTOMS ALLOWANCES: Vessels crew are permitted an individual allowance of 1 bottle of whisky and 1 carton of cigarettes per week. However, if necessary, the Master may request the Collector of Customs through the Customs Inspector on board for a further issue within the week.

REPATRIATION: Crew changes and repatriation may be effected by the local Regional Office of the Immigration Commission with the approval of its head office in Manila.

AIRPORT: An all-weather airport situated about 7 kms. from the pier. Regular Iloilo – Manila flight is 3 times a day. Other flights Iloilo – Cebu, Iloilo – Davao.

TIME: GMT plus 8 hours.

HOLIDAYS: *Legal Holidays:* Sundays, January 1st, (New Year's Day); April 9th, (Bataan Day); May 1st, (Labour Day); June 12th, (Independence Day); July 4th, (Phil.-American Friendship Day); November 30th, (National Heroes Day); December 25th, (Christmas Day); December 30th, (Rizal Day).

Note:

1. Special Public Holiday may be issued by the Prime Minister.
2. Under Philippine Law, if a legal holiday falls on Sunday, the following day (Monday) is also a holiday.

Regular working days in the Philippines are Monday through to Friday. Holidays notwithstanding, the Master/Agent may request continuance of stevedoring work after proper notice has been made with the stevedoring company.

POLICE/AMBULANCE/FIRE: Police Tel. 7-55-21; Fire Tel. 7-30-11; 7-49-89; Ambulance Tel. 7-25-61; 7-24-41.

TELEPHONES: PLDT (Tel Co.) can install a telephone on board a vessel at berth with the following charges:

P200.00	Deposit for the instrument, refundable upon return of the instrument.
74.41	rate/month
45.00	for services
3.00	electrician's fee
322.41	Total charges

Port Authority Telephone Numbers: Managers Office: 7-69-45; Operations: 7-60-73; Administration: 7-76-43; Security: 7-29-79.

SERVICES: See "Repairs".

SHORE LEAVE: Shore leave is granted after the issue of shore passes by the local official of the Commission on Immigration.

IDENTIFICATION CARDS: Identification card is not necessary for the issue of shore passes. Visaed crew list will suffice.

DELAYS: Occasional congestion of the port may delay vessels berthing. Bunkering may be done whether the vessel is at anchorage or at berth.

DEVELOPMENTS: The proposed Iloilo Commercial Port Project has been approved in principle by the World Bank. Construction is scheduled to start on January 1981, to be completed by the end of 1983. It will be a container/foreign port. . . equipped with modern container facilities and with ample back-up area.

GENERAL: Vessel's ETA has to be relayed to Philippines Ports Authority, Iloilo at least 24 hours before arrival.

SHIPMASTER'S REPORT: 1977

There are 3 ports where bulk sugar loading facilities exist, Pulupandan (which see), Iloilo and Batangas Bay. Ships first call at Pulupandan on Negros Island, approximate position Lat. 10° 31′ 30″ N., Long. 122° 47′ 36″ E. and load up to a draft (SW) of 29 ft. The rate of loading by using 1 trimmer is about 300–400 tonnes per hour. Pilotage is compulsory and the Pilot boards in a position (approx.) Lat. 10° 27′ 24″ N., Long. 122° 46′ 12″ E. After completion of port formalities, the vessel is berthed alongside the Bulk Sugar Installation with a stationary conveyor.

The vessel then proceeds to Iloilo for loading upto 32 ft. This vessel, which is 675 ft. in length, loaded bulk sugar in hatches 2, 4, 6, 7 and 8. It was possible to load in hatch No. 1 also. The loading is done from a fixed conveyor with 2 trimmers and the loading rate is between 400–500 tonnes per hour. Finally the vessel proceeds to Batangas Bay and after the usual formalities, goes alongside the Batangas Bay Terminals Inc. (BBTI) at Bolo – Bauan – Batangas, where there is no draft restriction. The loading rate is about 300–400 tonnes per hour. Loading is done from a fixed conveyor with one manually operated trimmer. Pilotage is compulsory and ships awaiting Pilots can anchor either at Santa Rita or Santa Clara (Batangas City) or Tabangas.

The main sugar crop is brought to Iloilo, known locally as Sugar City, because it is the main sugar exporting port, from Negros Island, where most of the sugar farms and factories are situated. The sugar for export at BBTI is brought from factories around Laguna Bay by trucks. The Stowage Factor for bulk sugar worked out to between 40–41.

AUTHORITY: Philippine Ports Authority, Iloilo City.

JOLO: (Jolo Island) 06.03 N. 121.00 E. (See Plan Book)

See "General" before first port.

DOCUMENTS: 4 copies each of Crew Lists; Passenger List; Import Cargo Manifest; Oath of Master and a copy of Vessel's Information Sheet.

PILOTAGE: Pilots are stationed at nearby Zamboanga City. Advice of ETA at least 3 days before is requested to facilitate arrangement of pilotage service.

ANCHORAGE: Anchorage areas are N.W. of Jolo Wharf and West of Caltex Depot.

MAX. SIZE: Main wharf; Draft 4 m. LOA: 60 m. At Caltex, Mobil and Petron Oil depot: LOA: No limit; Draft: 6 m.

HEALTH: Ships will be cleared by quarantine officers upon arrival at anchorage.

RADIO: Local Port Authority is equipped with SSB radio linking all Port Authorities nationwide. Ships may send message through Radio Communications of the Philippines, Inc. which has international connections.

BERTHING: Berthing space at main wharf is reserved for large foreign vessels; Max. permissible draft at MLLW is 4 m. (SW); Cargo handling by ship's own gear; Cargo may be worked at open storage and direct delivery only.

STEVEDORES: 24 hours advice before ETA is required. Stevedores provided by Sulu Dockhandlers and Forwarders, Inc.

MEDICAL: 2 hospitals are available.

TANKERS: The private wharf of Sulu Agro Industrial Corporation within the port limit is due for completion in late 1979. It is designed to handle Crude coconut oil.

FRESH WATER: Supplied by Sulu Water Works Authority with 4 in. piping all along the main wharf.
FUEL: Supplied by Petron Philippines, Inc.
FIRE PRECAUTIONS: Dangerous cargoes are worked at assigned berthing area.
CONSULS: In Manila.
REPAIRS: Minor repairs maybe undertaken by and within the vessel itself after permission is sought and granted by the Port Authority.
GANGWAY/DECK WATCHMEN: Customs Guard and Customs Inspector are on routine and continuous guard.
HATCHES: May be opened by stevedores.
CUSTOMS ALLOWANCES: Minimum quantity for personal use permissible only on board.
TIME: GMT plus 8 hours.
AIRPORT: Jolo Airport, flights to Zamboanga only, 2 flights a day.
HOLIDAYS: Cargoes are worked on holidays.
POLICE/AMBULANCE/FIRE: Central telephone system connects port Authority with Police, Ambulance and Fire Departments.
SHORE LEAVE: Curfew hour is from 2200 to 0400 hours. Crew members are allowed ashore. Identification cards not necessary.
REGULATIONS: No discharge of ballast oil in any territorial waters of the Philippines.
DELAYS: Delays in cargo handling: Rain.
AUTHORITY: Port Manager, Philippine Ports Authority, Port of Jolo, Sulu.

JOSE PANGANIBAN, Luzon: 14.18 N. 122.40 E. (See Plan Book)

See "General" before first port.
DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a pilot flag.
ANCHORAGE: Within Tanay Strait but not less than 500 m. from existing wharf.
RESTRICTIONS: Present port facilities could only allow vessels at anchorage considering the draft limitation and length of the pier.
MAX. SIZE: LOA – 230 m. Draft – 30 ft.
HEALTH: Vessels clear quarantine on arrival at Jose Panganiban Harbour. Quarantine Officers will normally board the vessel 2 km. from the wharf.
BERTHING: Present port facilities have been damaged by typhoon. Only 75 m. of the wharf is usable for berthing purposes. Length of quay – 75 m. width – 12 m. Max. depth of water – 30 ft. Quay height above sea level – 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging – 18 tons per gang hour. Storage area – 1.15 hectares.
CRANES: The port is not provided with shore cranes. Each vessel calling at the port is required to use her own gear.
STEVEDORES: Bicol Port Services.
MEDICAL: 1 government hospital located in the town about 3 km. from the wharf.
FRESH WATER: Can be provided by means of lorries and pipe-lines.
FUEL: All grades except premium gasoline obtainable from major oil depots and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening and closing of hatches are part of stevedores work or at the Master's option.
REPATRIATION: All facilities available for crew changes; good land and air connections.
AIRPORT: At the capital town of Daet, Camarines Norte.
TIME: GMT plus 8 hours.
HOLIDAYS: New Years Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (Nov. 30th); Special holidays declared by the Prime Minister of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.
SHORE LEAVE: Crews are allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Repairing of damaged wharf and water pipe-lines.
GENERAL: Vessels intending to call at Jose Panganiban shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come-first-served basis.
AUTHORITY: The Supervising Officer, Philippine Ports Authority.

LEGAZPI: 13.10 N. 123.45 E. (See Plan Book)

See "General" before first port.
DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the harbour Pilot about 2 km. N.E. of the wharf aboard a boat displaying a pilot flag.
ANCHORAGE: Within the Albay Gulf outside the imaginary line within the vicinity of Legazpi Port from San Roque Lighthouse to the East breakwater with depths varying from 80 ft. to 100 ft. with good holding grounds. The bottom is generally of sand and coral.
RESTRICTION: Present port facilities allow for 1 vessel at a time considering the draft limitation and length of the pier.
MAX. SIZE: Legazpi Port: LOA – 120 m.; Draft – 25 ft. Leg Oil Company: LOA – 230 m.; Draft – 35 ft.
HEALTH: Vessels clear quarantine on arrival at Legazpi Harbour. Quarantine officers will normally board the vessel 2 km. N.E. of the wharf.
RADIO: Following Stations are normally used:

RCPI
TELEFAST
CRC
FILTEL
CLAVECILLA

TUGS: No tugs available. Motor launch is used to attend to mooring and unmooring.
BERTHING: Only the end of the wharf is usable by foreign vessels considering the draft limitation and constricted manoeuvring area. Legazpi Oil Company, Private Pier is, however, capable of accommodating vessels of any type and tonnage.
Legazpi Port: Length of quay 328 m. Width 30 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 15.95 tons per gang hour.
Legazpi Oil Company, Private Pier: Length of quay 100 m. Width 10 m. Max. depth of water 60 ft. Quay height above sea level 3 m. at high tide and 6 m. at low tide. Average rate of loading/discharging 83.33 tons per gang hour. Facilities are suitable for handling of bulk copra, pellets, copra cakes and copra crude oil by conveyor and pipe-lines.
CRANES: The port has no shore cranes. Each vessel calling is required to use her own gear.
STEVEDORES: *Legazpi Port:* Provided by Legazpi Arrastre and Stevedoring Corporation (LASCORP) Tel. 2295.
Legazpi Oil Company, Private Pier: Provided by NORLEINCO Arrastre Services.
MEDICAL: 1 government hospital and 6 private hospitals available.
FRESH WATER: Can be provided by means of lorries.
FUEL: All grades obtainable from oil depots and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening and closing of hatches are part of stevedores work or at the Master's option.
REPATRIATION: All facilities available for crew changes; good land and air connections.
AIRPORT: 5 km. from port area. Flights to Manila twice a day.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special holidays declared by the Prime Minister of the Republic of the Philippines is also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.
POLICE/AMBULANCE/FIRE: Police, Tel. 4222; Ambulance, Tel. 4432; Fire, Tel. 2333.
TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (MATELCO).
SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Dredging of the port basin to an average depth of 25 ft.
GENERAL: Vessels intending to call at Legazpi shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocated is on a first-come first-served basis.
AUTHORITY: The Port Manager, Philippine Ports Authority.

MANILA, Luzon: 14.35 N. 121.58 E. (See Plan Book)

See "General" before first port.
PORT LIMITS: Manila Harbour is defined as that portion of Manila Bay within the following boundaries:

A line extending from the Vitas Estero due West (270°) to its intersection with a line running South (180°) to Sangley Point Light, thence along this latter line towards Sangley Point Light until its intersection with a line running N.E. (075°) to the N.W. corner of the airport site to the shore to the mouth of the Vitas Estero, the place of commencement. (Philippine Coast Pilot, Part 1, Coast and Geodetic Survey, 1968 edition, p.5–92).

However, Port of Manila jurisdictional district includes that of the Pasig River and the Limay and Mariveles Sub-ports.
DOCUMENTS:

Passenger List
Crew List
Inward Foreign Cargo Manifest
Stowage Plan
Visa for Crew
Smallpox Certificate.

PILOTAGE: Pilotage in and out of Manila Harbour and to the piers and into the Pasig River is compulsory.

Agents or owners of vessels calling at the Port of Manila shall inform the Pilot of their vessel's arrival. Agents can contact the Pilots Association through Channel 13, 24 hours a day including Sundays and Holidays. Pilots are available day and night.

The pilot boat is a white vessel with a big letter "P" and the number of the boat painted red at the forward end of the vessel. It is usually located in the vicinity of quarantine anchorage where port formalities are conducted.

During bad weather, the pilot boat is located inside the breakwater upon the expressed permission of port authorities.

Foreign vessels are boarded outside the breakwater while inter-island vessels at buoy No. 1 near the entrance to the Pasig River and off the lighted buoy North of North breakwater.

Notice of vessel's arrival shall be made at least 24 hours before their arrival.

Lights exhibited when a vessel has a Pilot on board are white over red together with other regular navigational lights. Otherwise, only navigational lights are displayed.

During typhoons and bad weather, Pilots require vessels to rig the pilot or accommodation ladder on the lee side.

ANCHORAGES: Vessels which for any reason do not intend to enter either harbour or the river immediately on arrival may anchor anywhere outside of the entrance channel. There is also deep water anchorage inside the breakwater. Anchorage is regulated by the Harbour Operations, Port of Manila, Philippine Ports Authority.

Quarantine Anchorage: The Manila Quarantine Anchorage is bounded as follows: Beginning at the Manila Outer Harbour Lighted Buoy 1, approximate position Lat. 14° 33′ 09″ N., Long. 120° 54′ 04″ E. thence 000°, 2,360 yards to position Lat. 14° 34′ 23″ N., Long. 120° 54′ 00″ E., thence on a range of 076° 24′ (Customhouse in line with City Hall Tower), 4,000 yards to approximate position Lat. 14° 34′ 50″ N., Long. 120° 56′ 14″ N., Long. 120° 56′ 00″ E., thence 242° 30′, 4,440 yards to the Manila Outer Harbour lighted Buoy 1, the point of commencement.

Forbidden Anchorage: Anchorage is prohibited in that portion of Manila Bay known as the Cable Area which is defined as follows: From a point approximately at Lat. 14° 33′ 42″ N., Long. 120° 59′ 05″ E., the junction of the breakwater forming the South side of the Yacht Basin with the shore of Manila Bay, thence along the breakwater to its end, from its end 255° to 3.65 miles North of Sangley Point Light, thence 066° to the shore of Manila Bay.

Explosives Anchorage: Vessels having gasoline, dynamite or other highly inflammable or explosive compounds on board are not permitted to berth at piers or wharves until such cargo has been discharged. Such cargo must be discharged into lighters from vessels at the anchorage within the circle with a radius of 175 yards centered in Lat. 14° 35′ 15″ N., Long. 120° 54′ 05″ E.

Other Special Anchorages: Lighters, scows, cascos and similar craft are prohibited from anchoring East of the breakwater, Manila Harbour, except in the following designated places:

(a) South of the new Luneta, inside of vessels' anchorages, but only in cases of urgent necessity and with special permission from the Surveyor of the Port.

(b) Along the East side of the West breakwater and within 85 yards of it, and well clear of the fairway leading to the Engineer Island slipways and well clear of the manoeuvring space ordinarily needed by vessels docking or leaving the oil wharf. No craft shall moor along the breakwater beyond the sharp bend of the breakwater towards the gap.

(c) In the Inner Basin (Engineer Island) East and well clear of the fairway and then only in case of urgent necessity. It is provided that such craft during severe typhoon weather with special permission of the Surveyor of the Port, may anchor temporarily in the Inner Basin West of the fairway, but well clear of the vessels.

Others: 1. No vessel shall anchor or moor in any prohibited anchorage nor use an anchor in that area except for the purpose of assisting in berthing alongside or unberthing.

2. No vessel shall anchor in, or use an anchorage, other than for the purpose for which the anchorage is designated or intended.

3. No vessel shall anchor, berth, moor or lie:

- (a) in the approaches to a port.
- (b) In any principal fairway.
- (c) In such a manner as to obstruct the approach to anchorage or pier/wharf used by other vessels.
- (d) In a cable reserve area, or in any special anchorage indicated on the chart of the Port or Port district except for the purpose specified.
- (e) In a position which is likely to foul a vessel which is anchored, moored, or made fast to a buoy.

RESTRICTIONS: 1. No explosives or dangerous goods shall be loaded or discharged between the hours 1800 and 0600 without the permission of the Authority.

2. No vessel or harbour craft with explosives or dangerous goods on board shall remain alongside any other vessel or craft, pier or wharf or other physical landing place between the hours 1800 and 0600 without permission of the Authority.

3. No person shall smoke and no fire or naked light, other than navigation or signal lights prescribed by the Collision Regulations, shall be allowed on board any vessel or harbour craft which has or is about to receive on board any explosives or dangerous goods.

MAX. SIZE: The maximum permissible vessel size inside the port is 9.4 m. draft, 450 m. length and 220 m. breadth. Beyond these measurements, vessels can be allowed only during high tide.

Note: A Port Captain reported in October 1980 that the depth at the entrance to the inner harbour was in excess of 38 ft. at HW whereas the Authorities state a depth of 32 ft. to 33 ft.

HEALTH: There are three types of pratique that can be obtained at the port: Free pratique, provisional pratique and radio pratique.

Foreign vessels calling at the port are inspected by Immigration officers. When all the quarantine rules and regulations are complied with and the vessels found free of any quarantinable or communicable diseases, free pratique is obtained by the vessel.

On the other hand, if some of the conditions above are not satisfied, a provisional pratique is given by the Quarantine.

Radio Pratique is provided to army and navy ships on the following grounds:

1. A doctor is among the crew of the ship.
2. There is no member of the crew sick of any disease.
3. Vaccination certificates of the crew are in order and valid.
4. The vessel is not from a sick area.

For vessels calling at the Port of Manila, but already coming from another port of entry in the Philippines, pratique is automatic. However, if somebody aboard the vessel is sick during the voyage, pratique shall still be obtained.

RADIO: The particular radio station to be used by a vessel to route ETA cables to agent is at the discretion and selection of the vessel.

Radio Officer's Report: August 1980.

Radio: Intercom Manila Radio, call sign (DZF) operated by the International Radio Communication Philippines. Serving ship to shore and vice versa, domestic and international communications, on HF, MF, and HF radio telephone on 24 hours operation.

VHF: The only coastal station equipped with VHF radio telephone listening on Channel 16 international calling frequency. Simplex and duplex operations on working Channels, for a direct contact with Agents.

Also accepting radio calls on land locally and international link via their local telephone network (PLDT).

VHF: So far, VHF facilities are not yet available at the Port. However, vessels can use Channel 16, the International calling frequency through Radio Manila on the following schedules:

0730–2100 hrs. – on ordinary days
0730–1700 hrs. – on Sundays and Holidays.

RADAR: No existing Port Radar Service.

TUGS: Tugs normally join vessel inside the breakwater.

BERTHING: There are 5 finger piers at South Harbour.

Pier 3: 4 berths available. Depth of water: Berth No. 1, 2 and 3 – 30 ft. Berth No. 4 – 21–25 ft. cargoes handled – containerized cargoes and general cargoes.

Pier 5: 5 berths available: Berth 1 – 23–28 ft. Berth 2 – 28–31 ft. Berth 3: 31 ft. Berth 4: 28–31 ft. Berth 5: 24–28 ft. cargoes handled – general cargoes and containerized cargoes.

Pier 9: 5 berths available. Berth 1: 23–28 ft. Berth 2: 23–28 ft. Berth 3: 31–30 ft. Berth 4: 23–28 ft. Berth 5: 23–28 ft. cargoes handled – general cargoes and containerized cargoes.

Pier 13: 7 berths available. Berth 1: 27–28 ft. Berth 2: 28–30 ft. Berth 3: 31–32 ft. Berth 4: 32 ft. Berth 5: 25–32 ft. Berth 6: 27–28 ft. Berth 7: 23–28 ft. cargoes handled – containerized and general cargoes.

Pier 15: 5 berths available. Berths 1 and 2: 35 ft. Berth 3: 32 ft. Berth 4: 30–32 ft. Berth 5: 23–30 ft. cargoes handled – general and containerized cargoes.

Both self-sustaining and non-sustaining vessels can be accommodated at South Harbour.

The following are the quay lengths: Pier 3 – 802.53 m. Pier 5 – 825.25 m. Pier 9 – 873.62 m. Pier 13 – 950.28 m. Pier 15 – 888.46 m.

CRANES: None.

BULK CARGO FACILITIES: See "Berthing".

SPECIALIZED CARGO HANDLING FACILITIES:

1. One Roll-on/Roll-off ramp with 50 long tons capacity at Pier 13.
2. Three gantry cranes with 35 tons capacity. One at Pier 3. Two at International Port.
3. One Manitowoc Crane with 70 tons capacity.

Liquid cargoes are not handled at South Harbour.

BRIDGES: None.

STEVEDORES: Arranged by vessel's Agent prior to arrival.

MEDICAL: Notice from shipping Agents is required at least 24 hours in advance. There is one hospital clinic available at the port – the Roberto S. Oca Hospital Clinic located at Gate 4, South Harbour.

For quarantinable diseases, there is a 12-bed hospital, the Quarantine Isolation Centre is located at the airport.

With regards to certificates, only smallpox certificates are needed.

TANKERS: Tankers are very seldom accommodated at the Port. The Limay and Mariveles Sub-ports receive tankers.

Rosario: Filoil refinery sea berth: Is located at the entrance to Manila Bay position: Lat. 14° 26′ 30″, Long. 120° 46′ 40″. This position is 2.5 miles off the shore of Rosario, Province of Cavite.

The mooring area is marked by 6 mooring buoys. A ship's guide buoy marks the point where the ship's starboard anchor will be dropped upon entry into the berth. 4 other buoys inside the berth at midport mark the end of the submarine pipe-line, centre of ship's manifold and the hose ends respectively. The bearing of the centre of the berth is N. 65° E. The depth is 50 ft. at high tide and 45 ft. at low tide approximately.

The weather is quite good during the dry season, but is unfavourable during monsoon season (May to November). Wind and swells are mostly from a S.W. direction and usually prevalent during monsoon season.

It is emphasised that vessels moored at the berth must be in good condition to clear the berth immediately in case of an emergency. Ship's engines and gear must be ready with full power for immediate use. Ship's personnel should be at their stations at all times during mooring, unmooring and cargo unloading operations.

Radio: Filoil Makati office may be contacted by dialling telephone Nos. 87-40-61 and 87-40-71. The Rosario refinery may be contacted by dialling telephone Nos. 47-95-51 and 47-95-53.

Communication from the sea berth with the refinery, Filoil's launch and Filoil representative on board is through VHF radio. If VHF radio fails, the Filoil launch will be despatched to bring the message either way.

Filoil representative on board maintains a radio watch and constant communication with the shore for general purposes and emergencies.

Luzon Stevedoring Company tugboats also maintain a constant radio communication with their representative at the shore. In case of emergency, messages can be relayed via these tugs.

Ship's Agent: All vessels carrying crude or other cargoes for discharge at Filoil refinery sea berth must appoint their local ship's Agent who will provide them with the necessary ship husbandry services.

Notice of Arrival: They must report their estimated time of arrival to Filoil Refinery Corporation. cable address "Filoil", Manila, Philippines, 3 days after leaving port of loading and 72 hours before arrival at Manila.

Pilot and Boarding Parties: Pilots are arranged for by the ship's Agent. Generally, Pilots board the tanker at the Manila anchorage to assist the Master to moor in the berth and leaves at the sea berth after berthing.

Filoil representative boards the tanker 1 mile before the sea berth, but if it is the first voyage, he boards the tanker together with the Port and Government authorities at Manila anchorage.

Tugs: Tugboat service is arranged for by ship's Agent. Tugs generally come from Manila. Give at least 48 hours notice when ordering tugs.

Quarantine, Customs and Immigration: Manila is the port of entry for the Rosario sea berth. Therefore, entry and clearance must be arranged by the Ship's Agent at Manila. Boarding officers board the vessel in the Quarantine anchorage prior to arrival within the mooring area. Pertinent government officials should be given sufficient time,usually not less than 24 hours Monday to Friday, and 48 hours Saturday and Sunday. Generally, entry and clearance can be arranged by the Agent who should advise Customs well in advance of the vessel arrival.

Ballast, Bilge and Garbage Disposal: There are no ballast facilities at the refinery. Masters are advised that in Manila Bay, the Harbour-Pollution regulations are rigidly enforced. Therefore no bilge water, oil contaminated water, garbage or similar refuse which may pollute the sea water in any way, is to be discharged overboard while the vessel is within Manila Bay and approaches thereto. The staff at Rosario are required to report any violation of this Philippine Merchant Marine regulation.

Launch Service: Regular launch service for crew transportation is not available and has to be arranged through ship's Agent. The Luzon Stevedoring launch is used to run lines, assist in picking up cargo hoses, etc. Filoil's owned or hired launch is for the exclusive use of Filoil representative and personnel boarding the vessel; however, transportation may be arranged through Filoil representative in cases of emergency.

Medical: Medical attention can be arranged by the ship's Agent. There is a clinic at the refinery. The nearest hospital is 0.5 miles from the refinery.

Heading for the Sea Berth: As soon as government clearance (pratique) is granted, vessel lifts anchor and heads for Rosario sea berth, a distance of about 16 land miles from Manila anchorage.

Vessel Mooring Gears and Facilities: The vessel's bow is secured in the moorings by the use of both bower anchors. Therefore, ship must have both bower anchors ready for immediate use, each with a minimum of 150 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of heaving ship ahead with the chain or letting one chain go out on the run while heaving in on the other. Mooring buoy No. 6 can be used instead of port anchor if 3 mooring lines are hooked up.

Vessels must be equipped with 10 in. manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms in length of each line. 2 lines are required for each of 6 mooring buoys, 5 of which are aft to secure the ship's stern position. Therefore, 5 lines are to be available on the fantail for mooring to buoys Nos. 1, 2, 3, 4 and 5.

Vessels having wire moorings secured on warping winches with surge valve and brake are acceptable. Warping winches must be adequate to handle mooring line under heavy strain. Efficient stopper lines must be readily available to "stop" mooring lines for transfer from winch to bitts without loss of tension.

All chocks other than roller (if free) shall be fitted with chafing gear to protect lines before berthing operation commences, endeavouring to install chafing gear after the ship has been moored has proven impracticable. Old fire hoses or substitute is suggested.

If in the opinion of the Pilot, the vessel's mooring facilities lines and/or gear are inadequate, he will inform the Master and Filoil representative, and in such event the vessel will not be allowed to enter the moorings until such conditions are deemed satisfactory.

Docking procedure: To moor, the vessel approaches the mooring heading due South. When in proper position, the starboard anchor is dropped and the chain allowed to run until vessel crosses the mooring area to a point where the port anchor is let go or when the mooring lines are dropped to buoy No. 6. Then the engines are backed and the vessel with the assistance of the tug, manoeuvred into the mooring area where after lines are run to the 5 mooring buoys and then the anchor chains are brought tight simultaneously with the securing of the stern to the mooring buoys. The vessel is then heading due West parallel with the tide current flow.

When secured in the berth, vessel should not be closer than 10 m. from the end of the submarine pipe-line. Bower anchor chains should have spread of not less than 30° on either side of the ship's imaginary fore and aft line extended forward. Stern buoy moorings should be set as taut as possible and anchors form an approximate angle of 300° with water line.

Submarine Hose Lifting Gear and Manifold Connection: The derrick on the port side in way of the hose connection must be rigged to lift not less than 5 tons. The topping Lift shall be available to raise or lower the boom as required and the winch and whip shall be of a quality and nature to lift the hose exactly and evenly. The hose and fittings are considered to weigh 3 tons. The hose connecting gang and its supervisor are from Luzon Stevedoring Company and are under contract to Filoil. They will use the ship's machinery to raise the 2×10 in. hoses from the bottom and secure same to the ship's side. They will also disconnect the hoses and lower same to the bottom of the sea after completion of discharging of cargo. The ship's manifold must have 10 in. flanges for connection to 10 in. submarine hoses.

Safety Rules and Regulations:

Mooring lines must be in good condition and kept tight at all times.

Sparking smoke stacks must not be permitted. If for any reason a stack catches fire or emits live sparks, cargo operations must be stopped immediately on this and adjoining vessels.

Throw nothing overboard from deck or portholes while at sea berth.

During cargo and/or ballast operations, vessels shall show red flag by day and red light by night. No smoking amidships during cargo and/or ballast operations.

No chipping, repairs, welding or hot work is allowed on any vessel while at sea berth unless special permission is given and a safety permit obtained. The ship must always be ready to sail out at a moments notice.

Pumping crude oils must be stopped during electrical storms or if lightning appears in close vicinity.

In case of fire, shut down all pumping and sound alarm. Disconnect hoses so as to be ready to shift from berth. All vessels at berth must have main engines ready for use. Water, foamite and steam are never to be used on electrical fires. Use dry chemical or Pyrene. Use foamite, water fog, steam CO–2 or dry chemical on oil fires.

Avoid spilling oil on deck. If any oil is spilled, it must be cleaned immediately. Gasoline or naphtha is not to be used for cleaning.

Only Underwriter's laboratory approved flashlights permissible use in methane and air mixtures by the U.S. Coast Guard are to be used for loading, discharging, ballasting and/or repair work on vessels.

Ullage screens are to be kept in place during cargo and/or ballast operations.

Tugboats are not to be allowed alongside while discharging cargo or ballast.

No extension cord or portable cables which are connected to an electric power source shall be used on deck in way of cargo or fuel tanks unless vessel is certified gas-free.

Fire hose shall be laid out and suitable fire extinguishers available. Failure to comply with any of the above rules will result in the vessel being shut down. Sufficient copies are to be presented to the Master so that they may be posted in various places about the vessel. It is the Master's responsibility to see that these rules and regulations are enforced.

Discharge of Cargo; After hoses are connected the Filoil representative will, after communication with the refinery, advise commencement of pumping. In the beginning the rate is to be slow and the Filoil representative will advise when pumping rate is to be increased to maximum. Discharge of cargo may be stopped due to adverse weather conditions. In which event, the hoses are disconnected and the submarine hose lowered to the sea bottom. Cargo discharge will be resumed when the adverse weather moderates.

Crude oil discharge through 2×10 in. hoses 255 ft. long through a 10 in. check valve and 10 in. gate valve then into the 24 in. pipe-line which is 2.5 miles in length. The height of the shore tanks (foundation) above sea level if 15.5 ft. Pressure at the ship's side must not be less than 60 lb. Maximum pressure allowed is 120 lb. at the ship's side.

Stripping – Tank Draining: To keep a discharge time to a minimum, tanks should be stripped into one of the ship's tanks and the final stripping shall be from only one tank.

Board and Lodging Accommodation: Sufficient accommodation and meals are requested to be available and prepared for the Filoil's representative in the officers' quarters. He will remain with the vessel until casting off or until relieved to be of assistance to the crew.

DENSITY: Variable.

FRESH WATER: Fresh water is available from floating barges.

FUEL: This depends upon the requirement of the vessel. However, as to the quantity, the Philippine Government can only sell vessels sufficient for it to reach the next port of call.

FIRE PRECAUTIONS: Except for the "Absolutely Non-Smoking Area", there are no other regulations.

REPAIRS: Only minor repairs possible.

DRY DOCKS: No drydock at the Port of Manila. There is one however at a nearby sub-port, also within the jurisdictional area of the Port of Manila, at the Bataan Shipyard and Engineering Corporation.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: This service is available whenever needed.

HATCHES: Stevedores usually open and close hatches. In special cases, when the vessel is of a different model and the hatches are constructed differently, crew members are requested to assist stevedores.

CUSTOMS ALLOWANCES: The only allowable quantity of goods to be held out of bond is that which the member of the crew can use personally. Usually, one or two bottles of wine and a pack of cigarettes. Those brought out from the vessel beyond this will be considered for commercial consumption and will therefore be charged.

CARGO GEAR: See "Specialized Cargo Handling facilities".

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration.

AIRPORT: The nearest airport is the Manila International Airport, about 8 kms. from the Port of Manila. This is served by regular airlines.

TIME: GMT plus 8 hours (Summer Time GMT plus 9 hours April–June).

HOLIDAYS: There are about 11 national holidays in the Philippines. Working days are from Monday to Friday, for government employees, and Monday to Saturday, for private employees. However, the Port of Manila does not observe any of these holidays or non-working days. Operations at the port are on a day-to-day basis and no holidays.

POLICE/AMBULANCE/FIRE: Police: 59-90-11; 59-43-44; 59-63-36; 59-64-49. Ambulance: 59-60-61;50-30-11. Fire: 47-77-17; 88-00-58; 25-56-80; 87-21-20.

TELEPHONES: Arranged by vessel's Agent from the Philippine Ports Authority.

SERVICES: Apart from the usual services of the port, others are ship salvage, laundry and container leasing.

SHORE LEAVE: Crew members are allowed ashore as long as sufficient members of the crew are left on board to manage the vessel in case of unforeseeable incidents. This is necessary in order that the vessel can be removed from berth or anchorage.

IDENTIFICATION CARDS: Shore passes are issued by the Bureau of Immigration.

REGULATIONS: No particular or unusual regulations are observed at the port.

DELAYS: The expected delays are: During inclement weather, some difficulty may be encountered in berthing.

And when some of the specialized cargo handling facilities have failures.

DEVELOPMENTS: An additional three berths at the International Port (94 hectare area) will be in use by 1980. This will become the container terminal and bulk cargo complex for the port. It is expected to handle not less than 17,000 containers daily when in full operation.

Two giant gantry cranes have been installed at the International Port. A further gantry crane will be installed in the area by 1980.

AUTHORITY: Philippine Ports Authority (PPA).

MASAO (Including Nasipit): 09.06 N. 125.22 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: First proposal: From Bolo-bolo Point to Carmen, Agusan del Norte.

Granted: Bolo-bolo Point up to Diwata Point.

Note: Anakan area is now under the jurisdiction of the PPA, PMU, Port of Cagayan de Oro City.

DOCUMENTS:

4 Crew Lists
4 Passenger Lists
2 Store List
4 Stowage Plan
2 Personal Effect List
2 Inward/Outward Cargo Manifest
1 Ship's Information.

PILOTAGE: Compulsory. Telegraphic address: Masao Pilots Butuan City.

ETA: Ocean going vessels – 24 hours notice. Coastal vessels – 12 hours notice.

Pilot boat description: Upper structure white; lower structure, black with a letter "P" at the bow. During night time, when a vessel requires a Pilot, particular light used is permanent red at the uppermost portion of the boat and a flashing white light.

Location of Pilot Station: In Masao, Lumbocan, Butuan City, but they have office at San Francisco St., Butuan City near the Butuan R. C. Wharf.

For the Port of Masao, Lumbocan, Butuan City, there's no alternative area in the event of bad weather as it is an open sea. However, at the sub-port of Nasipit, vessels can seek shelter during bad weather because of its natural cove which protects the vessels against strong winds and heavy currents.

Location of anchorage for vessel awaiting a Pilot is at Quarantine Anchorage Area 9° 00′ 30″ N. and 125° 28′ 15″ E.

ANCHORAGES: Depth of safe anchorage: 75 m. deep along the shore line.

Masao Anchorage Berth:
Anchorage No. 1: 9° 01′ 05″ N., 125° 29′ 50″ E.
Anchorage No. 2: 9° 01′ 00″ N., 125° 29′ 40″ E.
Anchorage No. 3: 9° 00′ 55″ N., 125° 29′ 30″ E.
Anchorage No. 4: 9° 00′ 45″ N., 125° 29′ 20″ E.
Anchorage No. 5: 9° 00′ 35″ N., 125° 29′ 00″ E.
Anchorage No. 6: 9° 01′ 15″ N., 125° 29′ 45″ E.
Anchorage No. 7: 9° 01′ 10″ N., 125° 29′ 35″ E.
Anchorage No. 8: 9° 01′ 04″ N., 125° 29′ 25″ E.
Anchorage No. 9: 9° 00′ 55″ N., 125° 29′ 05″ E.
Anchorage No. 10: 9° 00′ 50″ N., 125° 28′ 55″ E.

RESTRICTIONS: None.

MAX. SIZE: Masao: No limit.

Nasipit: Maximum possible length of vessels is 550 ft., breadth, 65 ft., maximum mean draft is 25 ft.

TUGS: Tug assistance is only available at the port of Nasipit, if needed.

BERTHING: No berthing facilities available at the Port of Masao, Lumbocan, Butuan City. All vessels anchor at specified anchorage areas. Also see "Max. Size".

At the sub-port of Nasipit, foreign berthing space is available at the Nasipit government wharf and NALCO wharf.

CRANES: None owned by the Authority nor by any cargo handling operators, but can be hired from the Ministry of Public Works or from private companies.

BULK CARGO FACILITIES: None.

BRIDGES: None.

STEVEDORES: For the Port of Masao, Bo. Lumbocan, the Arrastre/Stevedoring Contractor is the Masao Integrated Port Services, Inc. (MIPSI), the area of operation of which starts at Masao anchorage and along the coastline of 125° 25′ East of the municipality of Buenavista, Masao, Lumbocan, Magallanes, Cabadbaran, Tubay up to Agusan-Surigao coastline boundaries including Magallanes Bay up to Kayukanan Creek.

The cargo handling operator for the sub-port of Nasipit is the Nasipit Integrated Arrastre and Stevedoring Services, Inc. (NIASSI) which jurisdiction starts at the Nasipit government wharf up to Longitude 125° 25′ West of Buenavista, then going Westward including the municipality of Carmen.

MIPSI, is likewise, the cargo handling operator for the sub-port of Butuan which cater mostly to domestic vessels.

ETA advice required to arrange gangs, at least four (4) hours before arrival.

MEDICAL: Hospital facilities available:

1. Government hospitals:
   a. Butuan General Hospital
   b. Butuan Maternity and Children's Hospital
   c. City General Hospital and Medical Centre.
2. Private hospitals:
   a. Butuan Doctors Hospital
   b. Santos Hospital
   c. Villanueva Poly-Clinic and Hospital.
   d. Our Lady of Fatima Hospital.

DENSITY: Average salinity of water in the port and surrounding anchorage area is 1.010–1.012.

FRESH WATER: At the Port of Masao, Lumbocan, Butuan City, the supply of fresh water can only be made possible through the use of barges.

Water supply is available at the sub-port of Butuan through its licensed operators. However, at the sub-port of Nasipit, water supply can be taken from the Nasipit Lumber Company.

REPAIRS: Only minor repairs can be undertaken.

GANGWAY/DECK WATCHMEN: Service of watchmen is optional.

HATCHES: Opening or closing of hatches is normally carried out by stevedores.

AIRPORT: A few kilometers from the city is the Bancasi Airport which caters to domestic flights to and from Cebu and Manila.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday and Easter Sunday; Labour Day (May 1st); Independence Day (June 12th); Fil-American Friendship Day (July 4th); Barangay Day (September 11th); Proclamation 1081 (September 21st); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

Cargo-handling operations, however, can still be arranged on these days.

POLICE/AMBULANCE/FIRE: Police: 115; Fire: 114; Ambulance: 24-14.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Ship chandling service available at Lumbocan, Nasipit and Butuan City by operators duly licensed by PPA. Mooring/Unmooring Services; Laundry; Water-Taxi.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: The Philippine Ports Authority; Port Management Unit; Port of Masao, Butuan City.

MASBATE: 12.35 N. 123.61 E. (See Plan Book)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 kms. from the mouth of the channel of Masbate Bay aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within Masbate Pass, but not greater than 500 m. from the mouth of the channel leading to Masbate Bay. The area within the Masbate Bay could only be used during emergencies and typhoons.

RESTRICTIONS: Present port facilities can only accommodate 1 vessel at a time due to draft limitation and physical length of the wharf.

MAX. SIZE: LOA – 300 m.; Draft – 28 ft.

HEALTH: Vessels will clear quarantine on arrival at Masbate harbour. Quarantine officers will normally board the vessel once it is inside Masbate Bay.

BERTHING: The entire berth length of the wharf could be utilised for the loading or unloading of cargoes. Length of quay 180.0 m. Width 10 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 4 m. at low tide. Average rate of loading/discharging 20 tons per gang hour.

CRANES: None available.

STEVEDORES: Provided by Masbate Consolidated Arrastre, Inc.

MEDICAL: One government hospital and three private hospitals.

FRESH WATER: Available by special arrangements.

FUEL: All grades obtainable from Caltex depot in the area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches are part of the stevedores work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good sea and air connections.

AIRPORT: Three kilometres from port area. One flight to Manila daily.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Public Holidays declared by the Prime Minister of the Republic of the Philippines is also included.

If any other legal holiday falls on a Sunday the following day is observed as a Holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and ambulance can be contacted through the local PPA office.

TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (PILTEL).

SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Officer.

DEVELOPMENTS: Extension of the wharf by 80 linear metres.

GENERAL: Vessels intending to call port at Masbate shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.
AUTHORITY: The Supervising Officer, Philippines Ports Authority.

PUERTO PRINCESA: 09.44 N. 118.43 E.
(See Plan Book)

See "General" before first port.
Puerto Princesa, a large irregular inlet between Bancaobancaon Point and Panagtaran Point, is 2 miles wide at the entrance, extending about 6 miles in a N.W. direction. Coral reefs about 0.5 mile wide making out on the entrance points narrow down the navigable width of the channel to about 1 mile, depths of 34 fathoms (62.2 m.), shoaling to 9 fathoms (16.5 m.) in the vicinity of the pier. The major portion of the Northwestern and Western part of the bay is mostly shoal. The shoreline is generally fringed with mangroves and fronted by mud flats. The surrounding land consists of extensive wooded plain, backed by a high mountain chain. Several small rivers navigable by launches and small boats empty into the bay. The inner part of the harbour is a good typhoon anchorage.
PORT LIMITS: About 1 mile South of the pier. This is the entrance to the inner harbour of Puerto Princesa.
PILOTAGE: Pilots can be contacted by radio message through the shipping Agent not less than 24 hours of ETA indicating among others the following information:

1. Name of vessel
2. Name of shipping lines
3. Country vessel is registered
4. Type of vessel
5. Overall length
6. Draft
7. GRT
8. Volume of cargo to be discharged and storage required
9. Nature of cargo
10. Passengers disembarking, transit and embarking if any.

When Pilot is aboard the pilot boat, an international flag "P" will be seen flying at her foremast.
ANCHORAGE: Vessels not going alongside the T-shaped pier may anchor Southwestward of Princesa Point in 12 to 16 fathoms (21.9 to 29.2 m.), mud bottom. A better protected anchorage may be had in 9 to 10 fathoms (16.5 to 18.3 m.) about 400 yards Northward of the end of the pier.
RESTRICTIONS: At night, in approaching Puerto Princesa from offshore, the lights in the vicinity of Canigaran, Northward of the entrance, may cause some confusion to strangers as they are visible long before the Puerto Princesa Light can be seen. The port light which is fixed red, visible 7 miles over an area of 041°, only becomes visible close in and just off the mouth of the harbour. At daytime a course Southward of the range Thumb Peak-Tidepole Point clears the reef on the North side of the entrance. Mount Beaufort on range with Tidepole Point clears the reef on the South side.
MAX. SIZE: Vessels not going to dock alongside the pier may anchor in 9 to 10 fathoms or 12 to 16 fathoms. For vessels going to dock alongside the T-shaped pier, permissible length and draft are the following: Length – 126 ft. (39.4 m.) draft – 27 ft. (8.2 m.)
HEALTH: Quarantine doctors are assigned in the Port to board the vessel and check any suspected disease or fever.
RADIO: Vessels at sea usually send their radio messages through the Association of International Shipping Lines in Manila to their Agents.
VHF: Not available.
RADAR: No radar station in the port.
TUGS: Tug service can be availed of by communicating with the local shipping Agent.
BERTHING: The town has a T-shaped concrete pier with a berthing face of 126 ft. (38.4 m.) Depths are 27 ft. (8.2 m.) alongside and 31 ft. (9.4 m.) about 6 yards off the face. The Northern and Southern ends of the "T" have depths of 11 ft. (3.3 m.) and 15 ft. (4.5 m.) respectively. The inshore arms of the T has depths of 11 ft. (3.3 m.) at each berth. Sailboats and other shallow vessels berth on each side of the concrete approach. The wooden piles, are 8 ft. (2.4 m.) and very close together, are about 120 yards N.E. of the offshore end of the pier. Vessels coming alongside should exercise caution to avoid these piles. Typhoon signals are exhibited from a pole at the foot of the pier.
CRANES: No cranes available.
STEVEDORES: Advise Agent on volume of cargo to be discharged, storage required and nature of cargo.
TANKERS: May drop anchor at anchorage area.
FRESH WATER: Water supply on a limited quantity.
FUEL: Diesel oil, gasoline and kerosene may be purchased in drums and tins.
FIRE PRECAUTION: No smoking is allowed when vessels are refuelling within a radius of 100 m.
CONSULS: Consuls from foreign countries in Manila.
REPAIRS: No repair facilities.
DRY DOCKS: For small boats only.
SURVEYORS: Lloyds and other classification societies in Manila.
GANGWAY/DECK WATCHMAN: Watchman can be hired from local Security Agencies of the Port.
HATCHES: Opening/closing of hatches is usually done by stevedores.
CUSTOMS ALLOWANCES: Quantity permitted for each crew member to be held out of bond are the following: Cigarettes – 5 packs. Liquor – 1 bottle.
CARGO GEAR: Loading/unloading is effected by ship's gear.
REPATRIATION: No facilities.
AIRPORT: The airport is about 2 miles from the pier with a schedule of two flights from Manila and back daily.
HOLIDAYS: The following are the Philippine National Holidays: January 1st – (New Year's day), Maundy Thursday, Good Friday, April 9th – (Bataan Day), May 1st – (Labour Day), June 12th – (Independence Day), July 4th – (Fil-Am Friendship Day), November 30th – (National Heroes Day), December 25th – (Christmas Day). Cargo handling operations may be arranged on these days at overtime rates.
POLICE/AMBULANCE/FIRE: Puerto Princesa town has all these facilities. There is a provincial hospital in Puerto Princesa. Private practising physicians and drugstores are available.
TELEPHONES: The town is connected to Manila by postal and radio communication but no telephone shore connection facilities for vessels docked at the pier is available.
SERVICES: No special services available.
SHORE LEAVE: Crew members are allowed ashore provided they always carry with them their Seaman's book or Passport.
IDENTIFICATION CARDS: Seaman's Book is sufficient for crews to identify them when ashore.
DELAYS: Due to lack of some Port facilities, delay in berthing, loading, discharging and bunkering is sometimes experienced.
DEVELOPMENTS: A proposed extension of 30 m. on the Northern end of the pier and 47.57 m. on the Southern end. Reclamation at the Southern foot of the causeway.
AUTHORITY: The Collector of Customs.

PULUPANDAN: 10.30 N. 122.46 E. (See Plan Book)

PORT LIMITS: The Pulupandan Pilotage District embraces the waters from the approach of the North and South channel to Pulupandan government wharf including Philippine Bulk Corporation wharf and also Banago wharf and approaches. (Please take note that this definition of port limits is for the coverage of Pulupandan Pilotage District).

The seaward boundaries of the port within which a vessel is considered to be an *arrived ship* is bounded from the South buoy at Latitude 10° 27′ North, Longitude 122° 46′ East and the North buoy Latitude 10° 33′ North, Longitude 122° 46′ East.

The "Notice of Readiness" is presented after quarantine and port formalities are completed after which acceptance laytime commences. Any deviation from this is subject to charter-party terms.
DOCUMENTS: The Master of the vessel should prepare the following documents in order to ensure a speedy clearance:

Clearance of a Vessel to a Foreign Port.
Oath on Entering Vessel to a Foreign Port.
Master's Oath.
Crew Lists.
Passengers Manifests (Disembarking and Embarking).
Cargo Manifests (Inward and Outward).
Advance Notice for ETA (Telegram).
Application for Berth.
Vessel's Information Sheet.
Identification Permit to PHILSUCOM (in case of exporting molasses and sugar).
Authority to Load (Telegram).
Guarantee Payment for Wharfage.
Charter Contract (Agreement of shipper and shipping company as to the activity of operations).

PILOTAGE: With the vessel's ETA, the Pilot can only presume that the incoming vessel is entering the port because most vessels usually wait beyond the harbour limits approximately 7 to 11 miles from the port. This is due to the restriction in the P.C. & G.S. Chart 4416 which is marked by red lines indicating "Anchorage Prohibited".

The area of "Anchorage Prohibited" is enclosed by the square red line bounded by Latitude 10° 30′ North to the North side and Latitude 10° 23′ North on the South side and Longitude 122° 40′ East to the West side and Longitude 122° 50′ East to the East side.

If a vessel anchors 10 miles from the pilot boat station, only the silhouette of the vessel can be seen so there is no guarantee that it is really the expected vessel. In this connection, the Agent makes assurances to the Pilot that it is the vessel expected in order for the Pilot to meet the vessel.

The telegraphic address is "Pulupandan Pilots", Pulupandan, Negros Occidental, Philippines. The required advance notice of ETA must be 48 hours before arrival. A follow-up notice of ETA must be sent 24 hours before arrival and if necessary an amendment of ETA if the vessel is further delayed. VHF is not available in the port of Pulupandan.

The pilot boat is 45 ft. in length with a wooden hull and superstructure painted white. The name "Pilot No. 3" painted in black on a white background is located at the upper portion port and starboard side.

At night time, a white light over the red light can be seen aside from the regular side lights. Sound signals requiring a Pilot are 2 long and 1 short blast on the whistle and/or a display of pilot flag "H" during daytime.
ANCHORAGES: Though the Pilot boarding point is within the enclosed area of "prohibited anchorage", the vessel can drop anchor at this point and wait for the Pilot, depth 9 fathoms. Another anchorage area recommended for awaiting a Pilot is at Latitude 10° 33′ North, Longitude 122° 46′ East. This point has a depth of 39 ft. Two miles North or West of this point is a good anchorage area, the depth ranging from 6 to 7 fathoms with a good holding ground.

The pilot boat is always stationed at the South end of the government pier South of Pandan Pt., for the look-out of incoming vessels. As soon as the expected vessel is sighted, the Pilot proceeds to the pilot boarding point Latitude 10° 27′ North and Longitude 122° 46′ East about 5 miles from the station. If the vessel cannot proceed to the boarding point, the Pilot will meet her beyond this point.

The specific requirement in boarding is a strong and well balanced Jacob's ladder to be placed on the leeward side of the vessel. A manrope is a necessity.
RESTRICTIONS: Entry to this port has no restrictions except in the case of bad weather when the pilot boat cannot proceed to meet the vessel.

Since the loading point of a foreign vessel is mostly at Philippine Bulk Corporation Wharf, the docking and/or undocking is scheduled according to tide and current.

MAX. SIZE: The max. permissible length of a vessel handled at this port area particularly docking at PBC wharf is 186 m. to 200 m. The controlling draft forward is 26 ft. and 30 ft. aft and after dredging a controlling draft of probably 30 ft. Vessels of this length are usually docked from slack to flooding and undocked from slack to ebbing.

HEALTH: Pratique procedure is a requirement for vessels calling at the port. The shipping Agent arranges pratique procedure with the Department of Health, Department of Animal Industry and Department of Plant Industry. If there is a disease on board, the doctor of the Department of Health and the Plant and Animal quarantine officers will take the necessary action in curing the disease and preventing the spread of an epidemic.

RADIO: There is no radio facility available in this port.

VHF: VHF radio facility is not available at this port, hence, there is no communication with vessels approaching the port and also when manoeuvring within the port area.

RADAR: Radar facility is not available.

TUGS: There is no tugboat available at this port that can be readily used in case necessity demands. The Pilot usually requests the Agent and/or Master to hire a tugboat for docking and/or undocking. In most cases, tugs cannot be taken from Iloilo or Cebu. If ever, tugs can be hired from Cebu, the vessel having to wait for 3 to 5 days.

In this regard, the Pilot will dock the vessel without tug assistance as requested by the Agent and/or Master in order not to delay the vessel. The Pilot encounters difficulties and risks in this situation but the Agent gives to the Pilot an additional bonus for his efforts.

BERTHING: The berth length of the government pier is 424 m., providing 241 m. as berthing space for the secondary vessels and 183 m. for the primary vessels. Secondary vessels usually handle molasses, sugar, lumber and fertilizers. Primary vessels handle as much as twenty-five commodities. Of these commodities, consumer goods, general cargo, metal and metal products, chemicals, live animals and empty bottles are the most common cargo handled.

CRANES: Cranes for cargo handling are not available.

BULK CARGO FACILITIES: The port area of Pulupandan includes the facilities and equipments of private piers of Philippine Bulk Corporation and Total Bulk Corporation.

The berth at PBC wharf measures 189 ft. and the quay measures 442.09 ft. Conveyor gantry is the berth equipment used in handling molasses and sugar in bulk for exports. The max. height of the discharging-gear above HW level is 128.4 ft. at the discharging rate of 600 t.p.h. Max. loading depends on the draft of the vessel and max. draft is 22 ft. (salt water).

The quay of TBC measures 19.201 m. It has 1 tanker berth 40 ft. depth at MLLW. It has 5 mooring fender piles spaced at 13 m. with 2 mooring bollards 58 m. from both ends of fender piles. 25 ft. is the max. permitted draft.

Cargoes handled for exports through pipe-lines are molasses and alcohol. Load/discharge lines for molasses are 10 in. diameter, 8 in. diameter and 6 in. diameter while that of alcohol is 4 in. diameter. Max. loading/discharging rate for molasses is 350 m.t./h. and for alcohol is 70 m.t./h.

SPECIALISED CARGO HANDLING EQUIPMENT: LPG and containerised cargo are also handled at the government pier but the port does not have facilities specially equipped for handling containers or liquid chemicals.

BRIDGES: There are no bridges in the harbour passage of Palupandan port.

STEVEDORES: The shipping Agent should arrange with the arrastre/stevedoring office regarding the arrastre/stevedoring service to be rendered to the vessel. This can be facilitated by giving to the arrastre/stevedoring operator the schedule of the vessel's ETA. After the Customs Formalities which vary from 3 hours to 2 days are completed, the Agent should give to the arrastre/stevedoring office notice of readiness to discharge/load. When the notice of readiness is accepted, the arrastre/stevedoring workers can discharge/load cargoes from/to the vessel. The monthly average cargo tonnage discharged per vessel is 300 m.t. and 95 m.t. for loaded cargo. Cargo loaded and discharged at the government pier is mostly cargo from domestic vessels.

MEDICAL: Hospitals are not available in the port area but government and private hospitals can be easily reached by public vehicle as they are located in Bacolod City, 30 km. from Pulupandan.

A vessel is not allowed to berth and its crew and passengers not allowed to go ashore should there be fever, epidemic or any suspected disease on board. Inspection undertaken by the doctor of the Department of Health and the quarantine officers of the Department of Animal Industry and the Department of Plant Industry, by whom medical attention is given when needed.

TANKERS: See "Bulk Facilities".

DENSITY: Average salinity of water in the port is 1.022-1.023.

FRESH WATER: Water can be supplied by NEPOTECO. Water from deep wells is delivered through a trucking service. The rate of delivery is 1 truckload per hour which costs P15.00 per ton.

FUEL: Fuel can be made available to the Master of a foreign vessel by notifying the shipping Agent of its need for fuel. The shipping Agent applies to the Department of Energy in Manila for the supply of fuel to a foreign vessel. If the application is approved, arrangement is made by the shipping Agent with the supplier.

FIRE: Fire extinguishers are required for every office and establishment in the vicinity of the port.

CONSULS: Consuls are not available in the port of Pulupandan.

REPAIRS: There is no drydock facility in the port.

SURVEYORS: The nearest surveyor is the Del Pan Sugar Surveyors in Bacolod City.

GANGWAY/DECK WATCHMEN: The need for the service of watchmen depends upon the discretion of the Master of the vessel. The cost of their service is P4.50 per hour for the Port District of Iloilo of which the Sub-port of Pulupandan is included.

HATCHES: Opening and closing of hatches carried out by both the crew and the stevedores.

CUSTOMS ALLOWANCES: The quantity of tobacco, wine and spirits allowed for each crew member to be held out of Bond must not be more than for personal consumption.

CARGO GEAR: The loading/discharge of cargo to/from the vessel is effected by the ship's gear.

REPATRIATION: There is no repatriation office in the port.

AIRPORT: The Airport is located in Bacolod City which is 30 km. from Pulupandan. Average number of flights is from 6 to 7 per day to different cities in the Philippines (Manila, Cebu, Iloilo and Davao).

All international flights commence at Manila International Airport.

TIME: GMT plus 8 hours. Daylight saving time is sometimes observed during Summer. This is implemented through a letter of instruction from the President.

HOLIDAYS: The following are National Holidays which are also observed in Pulupandan.

January 1st (New Year's Day), Holy Thursday and Good Friday (these religious holidays have no specific dates but often fall in March or April), May 1st (Labour Day), June 12th (Independence Day), July 4th (Fil-American Friendship Day), September 21st (Declaration of Martial Law), November 30th (Bonifacio Day), December 25th (Christmas Day, religious holiday), December 30th (Risal Day).

Official holidays of legal nature are usually working days for the port users due to the nature of work, while holidays of religious nature are often non-working days even for the port users.

POLICE/AMBULANCE/FIRE: The following are the telephone numbers of fire and police departments and government hospital where an ambulance can be made available.

Fire Department: San Juan 066, 2-31-91; Rodriquez Ave. 065; Lopez Jaena 064.

Police Department: 067; 062; 069.

Ambulance: 068; 2-30-96.

These departments are located in Bacolod City. There is a police department in this town but it does not have telephone facilities.

TELEPHONES: There is no telephone facility at this port.

SERVICES: Special services for tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, etc., are not available in this port.

SHORE LEAVE: Crew members are allowed to go ashore.

IDENTIFICATION CARDS: Identification cards are not required as shore passes.

REGULATIONS: Refer to PPA Port Rules and Regulations.

DELAYS: Delay in berthing is due to the draft limitation of the port and the position of the port in case of bad weather.

DEVELOPMENTS: There is regular dredging and maintenance of the port.

AUTHORITY: Philippine Ports Authority, Sub-port of Pulupandan, Port District of Iloilo.

SAN FERNANDO, Luzon: 16.37 N. 120.18 E.

(See Plan Book)

See "General" before first port.

APPROACHES: Vessels enter the harbour through a channel marked by 2 buoys and 2 range lights 144.5° (fixed green and red light flashing every 3 seconds.).

PILOTAGE: Pilotage is compulsory. Vessel is met at mouth of harbour by pilot boat that flies a red flag with letter "P" in white. Pilot then brings the vessel to Quarantine Anchorage. Conventional signals are used to call Pilots.

ANCHORAGE: Located at centre of the bay with 8 to 9 fathoms and good holding ground. In the event of rough weather or strong monsoon wind, vessels in the harbour are brought here for safety.

RADIO: No direct radio communication system with vessels at sea is available in the locality. Ship Masters report ETA to Agent in Manila who relay message to San Fernando by telex or commercial radiogram. The PMU San Fernando may be reached by Long Distance telephone 25-57 or SSB radio transceiver 8776.5 kHz.

Arrival Advice: 48 hours before ETA, ship Agent files request for berth at PMU office indicating: ETA, draft, LOA and breadth, consignee or shipper, type of cargo and stowage, dangerous cargo, (if any). Heavy lifts, (if any), number of hatches to be worked, vessel is self sustaining or not.

24 hours before arrival or earlier, upon receipt of Master's advice by telegram, a berthing schedule is issued by the PMU. Copies are furnished to: Pilot, consignee/shippers, Arrastre-stevedoring contractor, ship Agent.

MAX. SIZE: Size of vessels that could be serviced is controlled by depth along quay:

Pier	*Depth Pier Head*	*Depth Shore End*	*Length*	*Width*
Gov't. RC	54 ft.	12 ft.	600 ft.	60 ft.
Shipside, Inc.				
Timber	60 ft.	30 ft.	850 ft.	80 ft.
Philex Conveyor	32 ft.			

HEALTH: Immediately after vessel anchors at Quarantine Anchorage, Quarantine Officers board and clear vessel. Imported grain will be fumigated on board vessel at anchorage.

Boarding Formalities: Members of party are BOC inspector and guards, Immigration, Philippine Coast Guards, pratique is then issued to indicate vessel as "arrived" and subject to Charter Party terms, laytime will commence.

TUGS: 1 tugboat owned by Shipside, Inc. of 1,100 h.p. engine equipped with Kort Nozzle, is available for assisting, docking and undocking and launch service. Tug assistance during docking and undocking at the Shipside Pier is compulsory while its use at the Government and Philex Piers are at the option of the Harbour Pilot. A shipping company may bring in tugboat to assist its own vessel.

Tug lines are available at no extra cost. Conventional signals are used by Pilot and Master of tugboat.

Tug assistance rates: 0800 to 1700 hrs, regular time – others, overtime.

BERTHING: See "Max. Size".

STEVEDORES: Stevedores, longshoremen, checkers and watchmen for the 2 piers are provided by:

Government Pier – Northern Carriers Corp. Shipside pier – Shipside, Inc.

Stevedores, checkers, etc. are non-union members. Any number of gangs can be ordered on 3 hours notice. Stevedores work on 3 shifts:

1st Shift – 0000 hrs. to 0800 hrs.
2nd Shift – 0800 hrs. to 1600 hrs.
3rd Shift – 1600 hrs. to 2400 hrs.

Sundays, holidays and nights, stevedores are paid overtime rates. Christmas, New Year's Day, Easter Sunday, Good Friday and Maundy Thursday, stevedores will work on double pay.

TANKERS: The 4 oil terminals maintaining tank farms in the port zone are Petrophil, Caltex, Shell and Mobil. They operate a common set of pipe-lines for white and black oil product passing under the Government and Shipside Piers. PMU policy is 1 tanker discharging at 1 pier at a time. A "boom" is available at the quay side.

MEDICAL: 3 modern hospitals staffed by trained physicians and specialists and 6 clinics. These are open 24 hours.

FRESH WATER: Fresh water available at both piers alongside the quay via pipe-lines. Pumping rate: 8 t.p.h – Summertime. 12 t.p.h. – Rainy days.

Water samples are tested weekly at the Wallace US Air Force Station at Poro, San Fernando.

FUEL: Bunker and other, POL product obtainable and supplied by lorries.

FIRE PRECAUTIONS: Water pipe-line alongside the quay can be converted to a fire hydrant by manipulating the valves to suck sea water. The oil terminals in the area maintain chemical fire fighting equipment, a "boom" to contain oil spillage and "light water". Voice of America, Wallace US Air Force Station, and the Airport all within a 3 kms. radius to the piers, maintain modern fire trucks.

REPAIRS: Atlantic Gulf and Pacific Co. of Manila operates ship repair facilities including 2 drydocking slipways. A 100 ton floating crane and a fleet of mobile cranes from 25 to 80 tons capacity are among their equipment.

GANGWAY/DECK WATCHMEN: Available from Arrastre contractor upon request of ship Agent.

SURVEYORS: Available from Manila, 270 km.

OPENING/CLOSING HATCHES: First open and last close normally carried out by crew. Stevedores operate the hatches when it rains.

CARGO GEAR: Arrastre operators maintain complete loading/discharging gear for bulk, general cargo and heavy lifts. Also available are:

11 units — Forklifts, 1 to 8 tons capacity.
2 units — Mobile crane, 25 tons capacity.
1 unit — Floating crane, 100 tons capacity.

IDENTIFICATION CARDS: For control of persons inside the port zone and for security, I.D. should be available when requested by guards.

AIRPORT: San Fernando Airport is 3 km. South of Pier. Philippine Air Lines serve the port with 3 flights weekly.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday; Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); All Souls Day (November 1st); Bonifacio Day (November 30th); Christmas (December 25th); Rizal Day (December 30th).

POLICE/AMBULANCE/FIRE: Police, Tel. 25-77. Hospitals/Ambulance, Tel. 28-44, 23-55, 26-16; Fire Dept. Tel. 24-88; Phil. Constabulary Tel. 25-28.

TELEPHONES: Vessels docked at Shipside Pier may request telephone connection.

GENERAL: *Discharge of ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines.

Rat guards: Rat guards shall be placed on all mooring lines to the wharf.

Refuse: May be collected by a truck at P25.00 per trip.

Accessibility: Port is accessible by road, rail and air transportation.

Provisions: Fresh vegetables can be supplied directly from the vegetable capital of the Philippines (Baguio City).

Rest, Recreation: Beach resorts with miles of clean beach just minutes away by car. First class hotels with swimming pools, air conditioned rooms. Baguio City, Summer Capital of the Philippines is 70 kms. East and 5,500 ft. above sea level. A golf course at Camp John Hay, the R & R centre of US Servicemen can be used by civilians.

SHORE LEAVE: Crew members are allowed to go ashore without special permission.

AUTHORITY: PPA, PMU San Fernando.

TABACO: 13.41 N. 123.58 E. (See Plan Book)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advice should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 kms. from the wharf aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within the Tabaco Bay but not less than 500 m. from the existing facility.

RESTRICTIONS: Berthing space is limited due to its physical length and the existence of a shipwreck at the Northern end of the wharf.

MAX. SIZE: LOA – 300 m.; draft – 28 ft.

HEALTH: Vessels clear quarantine on arrival at the Tabaco Harbour. Quarantine officers will normally board the vessel 2 kms. from the existing wharf.

BERTHING: The existing facility can accommodate two foreign-going vessels of regular size at one time. Length of quay 270 m. Width 12 m. Storage area 2 hectares. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 22 tons per gang hour.

CRANES: 2 shore cranes available with capacities of 20 and 25 tons. For heavy lifts, vessels are required to use their own gear.

STEVEDORES: Provided by Tafworks Arrastre Corporation.

MEDICAL: 1 government hospital and 2 private hospitals.

FRESH WATER: Can be provided by pipe-line or hoses from the port facilities.

FUEL: All grades obtainable from major oil depots at Legazpi City which is approximately 27 kms. from the port area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches is part of the stevedores work or at the Master's option.

REPATRIATION: All facilities available for crew changes.

AIRPORT: At Legazpi City.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day; (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Holidays declared by the Prime Minister of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel. 222; Ambulance, Tel. 215.

TELEPHONES: Placing of telephones on board can be arranged with the branch office of the local telephone company (MATELCO).

SHORE LEAVE: Crew can be allowed ashore in company of an Immigrations Agent.

DEVELOPMENTS: Salvaging of the shipwreck at the Northern end of the wharf, extension of the existing facility by 120 m.

GENERAL: Vessels intending to call at the port of Tabaco shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.

AUTHORITY: The Supervising Officer, Philippines Port Authority.

TACLOBAN: 11.15 N. 125.00 E. (See Plan Book)

See "General" before first port.

DOCUMENTS: *Entrance Formalities:* For submission to PPA Harbour Section:

3 copies Inbound Coasting Manifest with enclosed or attached on each copy the following:

Crew list
Oath of Master
Passenger list (passenger vessels only)
Import declaration (foreign vessels only)
Pratique (foreign vessels only)

Roll book for presentation and clearance from last port of call also required.

Exit Clearance:

3 copies Outbound Coasting Manifest with attached or enclosed on each copy the following:

Crew list
Oath of Master
Passenger list (passenger vessels only)
Export declaration (foreign cargo vessels).

PILOTAGE: The following signals from vessels requiring a Pilot are:

By day:

a) The pilot jack hoisted at the fore.
b) The International code signals or P.T.
c) 2 long blasts followed by 1 short blast on ship's whistle.

By night:

a) The pyrotechnic light, commonly known as blue light every fifteen (15) minutes.
b) A bright white light, flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time.
c) The International code signals P.T. by flashing lights.

Telegraphic address is Tacloban Harbour Pilot's Association, Tacloban City. 24 hours notice of ETA is required before arrival of vessels. No VHF in pilot boat or pilot station.

All pilot boats in general are painted white above the waterline and black below, with the letter "P" not less that 12.5 cm. in length on both bows above the waterline.

During the day boat in use shall carry at the mast a red and white flag not less than 6 decimeters wide and 9 decimeters long.

The exact location where the Pilot has to be taken on board when entering Tacloban through San Juanico Strait is at Canauay Island about 2 miles Northwest of said Island, for vessels entering Tacloban

Port through San Pedro Bay, the Pilot may be taken on board a mile North of Mariquitdaquit lighthouse.

In case of bad weather, vessels are advised to drop anchor about 3 miles South of Dio Island when waiting for the Pilot.

With respect to safety measures while Pilot boarding vessels, it is suggested that the Master put his vessel to windward in a postion where the pilot boat is protected from big waves and strong winds. They must lower their accommodation ladder or rope ladder.

The location of anchorage for vessels awaiting a Pilot is either one (1) mile North of Mariquitdaquit or 2.5 miles Southeast of Dio Island.

ANCHORAGES:

Dio Island Anchorage:
Position – 2 miles S.E. of Dio Island
Depth – 6 – 7 fathoms
Area – 4 square miles

Basey Anchorage:
Position – 1.6 miles West of Jinamoc Lighthouse
(Lat. 11° 15′ 36″ North. Long. 125° 04′ 32″ East)
Depth – 4.5 fathoms
Area – 0.8 square miles

Tacloban Quarantine Anchorage:
Position – 0.5 miles South of Binatac Point
0.7 miles North of Panirungan Point
Depth – 4 – 5 fathoms
Area – 1 square mile.

RESTRICTIONS: Controlling draft for vessels entering Port of Tacloban via San Pedro Bay is 19 ft.

Due to numerous shoals, reefs and fish traps which abound in the area along the channel, vessels arriving at night must drop anchor either at the point 1.5 miles North of Mariquitdaquit or at the point 2 miles S.E. of Dio Island. The Pilot will conduct the vessels in at daybreak.

Tides in Tacloban show great inequality, mostly at high water. Mean range of tide is about 1.6 ft., whereas the Diurnal range is 2.3 ft. Flood current sets in a Northeasterly direction, while ebb current sets Southeasterly with a maximum velocity of 3 knots.

MAX. SIZE: See "Berthing".

HEALTH: Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.

RADIO: Radio communication of the Philippines, Inc., Manila.

TUGS: Tugs normally join the vessel when inside Tacloban Harbour. For docking, tugs usually use the vessel's lines.

BERTHING: Inform local office of Philippine Ports Authority at least 24 hours before ETA if vessel on scheduled voyage and 36 hours before ETA if a tramping vessel.

Length of quay – 1,048.8 m., with 217.3 m. allotted for foreign vessels, 585.5 m. allotted for domestic vessels and 246 m. allotted for pump boats.

Maximum permissible ship draft at low water (sea water), Foreign vessels – 6 m.; Domestic vessels – 4 – 6 m.

NOTE: Actual draft along berth for foreign vessel at low water, 7 m.; Domestic – 4 - 7 m.

Load/ Discharge – Usually by ship's own gear but shore equipment available for rent.

BULK CARGO FACILITIES: See "Berthing" for berth details.

Cargoes handled: Copra, grain, abaca, sugar, rattan, lumber, drinks, goods in cartons, crated products, heavy lifts, steel bars, etc.

Facilties: Rope nets, rope slings, cable slings, spreader sets, sliding boards and pallets.

STEVEDORES: ETA advices should be furnished to stevedores through ship's Agent.

MEDICAL: Advance notice of required medical attention to ship's Agent essential.

TANKERS: No facilities.

FRESH WATER: Fresh water available delivered by water-tank truck.

FUEL: Only available to domestic (small) vessels.

FIRE PRECAUTIONS: Fire station in port area.

CONSULS: None.

DRYDOCKS: None.

GANGWAY/DECK WATCHMEN: Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All documents required by International Shipping Rules and Regulations.

CUSTOMS ALLOWANCE: One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.

GARGO GEAR: Load/discharge affected usually by ship's gear but shore equipment available for rent.

IDENTIFICATION CARDS: Needed for inspection by Immigration Officer.

REPAIRS: Not possible.

REPATRIATION: Immigration Officer effects crew exchanges and arranging necessary repatriations.

AIRPORT: Distance from airport, 9 km., and is regularly served by airlines.

TIME: GMT plus 8 hours. No alterations during the year.

HOLIDAYS: Depending upon agreement with stevedores, work may be performed during holidays.

POLICE/AMBULANCE/FIRE: All departments are within one minute's call from the harbour.

TELEPHONES: Can be connected on board if required.

SERVICES: No special services available.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: No shore passes issued.

REGULATIONS: No unusual regulations.

DELAYS: Berthing: When all berths are occupied upon arrival. Loading/discharging: Limited number of available haulers due to simultaneous operations of vessels at berth. Bunkering: Simultaneous bunkering of vessels.

AUTHORITY: Philippine Ports Authority, Port Area, Tacloban City.

TANAUAN: 11.06 N. 125.01 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976

N.I.D.C. Coconut Oil Pier: Location of berth 11° 06′ 15″ N. 125° 01′ 30″ E. The berth is 7 miles from the Pilot boarding point. Least depth of water in channel from sea to berth, 32 ft. At berth bottom is mud and sand. Density 1025. Docking and undocking in daylight only at any stage of tide.

Anchorage 1.5 miles North of Mariquitdaquit Light. Terminal Information: Use shore hoses. Length of pipe-line – 3,000 ft. connection at manifold – 8 in. Shore-booster pump not used. No steam. Product handled, coconut oil.

Port Information: Pilotage compulsory. Pilot requires 12 hours and 24 hours notice. Pilot boards 1 mile North of Mariquidaquit Island and comes from Tacloban. It is unsafe to enter and leave after dark. Vessels can enter and leave any state of tide. Max. LOA 1,000 ft. Max. beam 90 ft. Max. draft 31 ft. No tugs available. Vessel able to berth and unberth without aid of tugs.

Facilities available: Fresh provisions available from Tacloban, a small town, 20 km away. Chandler requires payment in cash for goods.

Airport at Tacloban. Doctor and hospital available. Groceries, meats and laundry available.

No fresh water, repairs, Lloyds surveyor or fuel available.

VILLANUEVA: 08.35 N. 124.44 E.

SHIPMASTER'S REPORT: May 1980

LOCATION: The port of Villanueva is situated in Macajarlar Bay on the North coast of Mindanao Island in position 8° 34′ 45″ N., 124° 44′ 22″ E. and has a clear deep water approach.

PILOTAGE: The Pilot and possibly Quarantine Officials board in position 8° 35′ N., 124° 40′ E. by launch from Cagayan de Oro City.

APPROACHES: When approaching from the East, passage through the Surigao Strait creates no difficulties as there is deep water. There are good radar targets and no excessive tides or currents. Passage between Camiguen Island and the coast is also clear and deep. Numerous fishing vessels encountered throughout the area as well as frequent passings of coastal traffic.

ANCHORAGE: Although there is very deep water to close inshore there is an anchorage position, recommended by the Pilots, in position 8° 37′ N., 124° 44′ 30″ E. which is 1 mile offshore.

TUGS: There are at least 4 tugs to assist with berthing all modern efficient vessels of over 3,000 h.p. Tugs ropes used for towing.

BERTHING: Berth is in position 8° 34′ 45″ N., 124° 44′ 22″ E. and is aligned 050°/230°. The berth is 350 m. in length and fendered with 7 'Yokohama' balloon type fenders. Vessels of up to 300 m. in length berth port side alongside, vessels over 300 m. LOA berth starboard side alongside. Daylight berthing only but reported able to leave at any time. *Moorings:* Standard mooring equipment used, line boat used to run head and stern lines.

Moorings usually 4 head/stern lines, 2 breast lines and 2 springs at each end of vessel.

LOADING: Loading is carried out by 1 loading unit with a capacity of over 4,500 t.p.h. The product, sinter ore, is a finished product with a stowage factor of 23–24 cu.ft. per ton relatively clean and not much dust. The product can be loaded into holds previously containing coal without cleaning.

Discharge facilities exist on the same berth where there are 2 units using 60 ton grabs.

A thorough draft survey is carried out on arrival and again after loading completed.

GENERAL: After berthing the vessel is boarded by 14 port officials of various departments from plant quarantine to immigration, paperwork takes about 2 hours on arrival and again before departure after loading completed.

Fresh stores including fish are available of good quality and a reasonable price.

There is no VHF communication but telex service to Manila is reliable. Exchange rate was £1 = P.16.32.

While alongside 3 Customs Officers/Inspectors remain on board and require food and accommodation on a 24 hour basis.

ZAMBOANGA: 06.54 N. 122.04 E. (See Plan Book)

See "General" before first port.

PILOTAGE: Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimated time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta., Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.

ANCHORAGES: Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Caldera Bay, which is approximately 7 miles West of the anchorage area.

MAX. SIZE: No limits for anchoring. For berthing, up to 32 ft. draft.

HEALTH: Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues pratique, if and when he finds that there is no disease or fever on board. The pratique is valid until after the vessel departs to a foreign port.

RADIO: Universal Telecommunication Service, the Capitol Radio Telecommunication, the Telefast Radio Communication, the Radio Communications of the Philippines and the Telecom, operated by the National Government for receiving and transmitting radio messages. Night and day services.

TUGS: The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.

BERTHING: The Zamboanga Government wharf is about 800 ft. long with a depth at the latest survey of the following: East end 30 ft.; mid-section 25 ft. and West end 21 ft. There is a private wharf at Baliwasan and vessels of 15,000 g.r.t. can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

2 anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.

TANKERS: There are 4 oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.

STEVEDORES: The Master of the vessel shall wire to the local Agents of the vessel so that a contract could be made with the shipper to arrange gangs.

MEDICAL: It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.

FRESH WATER: Fresh water can be obtained only at night-time due to low pressure. If there is no available space at the Zamboanga Pier the vessel has to wait at the anchorage for a berthing space to get water supply.

FUEL: Fuel, diesel, and crude oil available.

FIRE PRECAUTIONS: Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary to foil looters from boarding the vessel.

OPENING/CLOSING HATCHES: Normally opening and closing of the hatches are done by the crew, and if the job is done by stevedores the vessel has to pay.

CUSTOMS ALLOWANCE: 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs authorities, and can be opened only upon permission granted by the Collector of Customs.

IDENTIFICATION CARDS: All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.

CONSULS: None available.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the foreign Embassy concerned.

AIRPORT: Distance from Zamboanga Pier to the airport is 3 km. Served by regular airlines. There is a daily flight from Zamboanga to Manila by Philippine airlines. Airport open to International flights.

TIME: Local Civil Time is 8 hours ahead of GMT. This time reckoning is constant throughout the year.

HOLIDAYS: Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.

POLICE/AMBULANCE/FIRE: Police Department, tel. 06; Ambulance, Zamboanga General Hospital, tel. 08; and Fire Department, tel. 00.

TELEPHONES: Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.

SERVICES: Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.

DEVELOPMENTS: Improvements are carried out every year to the local wharf adding additional berths and dredging to increase draft.

AUTHORITY: The Collector of Customs.

NOTES

Please also advise Shipping Guides Ltd.

Poland

GDANSK: 54.21 N. 18.39 E. (See Plan Book)

ICE: Efforts made to keep port open all year round. Only in very severe Winter are difficulties experienced.

DOCUMENTS:

12 Copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Maritime Declaration of Health.
Ship's Articles/Crew List.
Deratisation Certificate or exemption from Sanitary Certificates, covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo even if in transit.
2 Stowage Plans.

PILOTAGE: Compulsory. Boarding in Gdansk Roads. Gdansk Pilot Station available on VHF, Channel No. 14.

ANCHORAGE: Gdansk Roads up to buoys NP1, NP2. No tides.

RESTRICTIONS: Approaches 36 to 40 ft. depth.

MAX. SIZE: Max. size of vessels permitted to enter: draft, 33 ft. 06 in. brackish water; Max. LOA 220 m. Also see "Tankers" and "Bulk Handling Facilities".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease, the vessel should cable to "Quarantine Gdansk", or via Agents.

RADIO: Messages should be sent via Gdansk Radio.

RADAR/VHF: Port Radar Service acting with pilot station, contactable on VHF Channel No. 14.

TUGS: Join in Gdansk Roads. Vessel's lines must be used. Tugs compulsory for all vessels over 2,000 g.r.t.

BERTHING: Max. draft mentioned below is to be taken as normal water level. No tide.

Name of quay	*Length*	*Max. Draft*
King Wladyslaw IV Basin	1,190 m.	31 ft. 00 in.
Defenders of Westerplatte	1,442 m.	33 ft. 00 in.
Oliwskie	1,278 m.	31 ft. 00 in.
Defenders of Polish Post Office	330 m.	33 ft. 00 in.
Ziolkowski (Ro-Ro)	123 m.	20 ft. 00 in.
Iron Ore Quay	1,612 m.	32 ft. 02 in.
Coal Quay		33 ft. 02 in.
Administration Quay	80 m.	19 ft. 02 in.
Quay of the 20th Anniversary of the Republic	1,076 m.	32 ft. 00 in.
Timber Terminal	510 m.	25 ft. 09 in.
Chemist's Quay	250 m.	33 ft. 00 in.
Przemyslowe Quay	250 m.	18 ft. 08 in.

CRANES: Floating cranes of 26–100 tons capacity. Many portal cranes up to 16 tons capacity.

BULK HANDLING FACILITIES: Bulk and liquid sulphur handled at Post Office Defenders Quay.

Coal/Ore quays equipped with 7×16 ton cranes and 10 ore bridges of 15 tons capacity. Grain elevator at Quay of the 20th Anniversary of the Republic.

A conveyor system for fertilisers in bulk. 20 ton grab cranes at Chemists Quay.

In the event of no accessible berth and/or grain elevator not being available, such bulk cargoes discharged by grabs. Vessels should be suitable for grab discharge.

North Port Bulk terminal: Coal-handling facilities capable of receiving vessels up to 100,000 d.w.t. max. daily loading rate 50,000 tons. Max. draft 49 ft. 03 in.

STEVEDORES: As gangs for the following day must be ordered before 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

Stevedores work 24 hours per day, which is considered to be between 2300 to 2300 hrs. following day. First shift from 2300 to 0700 hrs., second shift from 0700 to 1500 hrs., third shift from 1500 to 2300 hrs. Port works Sundays, holidays and free Saturdays at premium rates. Free Saturdays being introduced from 1981.

MEDICAL: No special notice required. Full hospital facilities available.

TANKERS: Oil Terminal at North Port.

Location: Southern part of the Gulf of Gdansk, Latitude 54° 21′ N. and Longitude 18° 40′ E. approximately. Vessels to use the roads between the end of peninsula Hel and anchorage South of Latitude 54° 25′ N., approximately 0.5 mile North of the terminal. Imports crude oil, exports fuel and refined oils, as well as other products of the Gdansk Refinery. No facilities for handling liquefied gases.

Facilities: One L-shaped jetty for berthing consists of one main platform and four main dolphins, fitted with quick release hooks. The main platform is fitted with gangway tower and seven movable handling arms for loading and discharging purposes. Only one mooring place available. The jetty accessible for vessels having minimum 150 ft. (about 10,000 d.w.t.) and maximum 1,000 ft. (150,000 d.w.t.) length and 49 ft. 03 in. draft. For towing purposes there are available two 2,500 h.p. and two 1,650 h.p. diesel tugs, if necessary further 1,200 h.p. tugs are at hand. All tugs equipped with fire fighting equipment.

Cargo Handling Equipment: The seven mobile handling arms, Luceat Production, are used as follows: No. 2, 3 and 4 for discharging of crude oil, speed about 10,000 cu.m/hr. No. 1 and 5 for loading bunker oil and water, efficiency about 2,000 cu.m./hr. No. 6 and 7 loading liquid fuels and refined products 2,000 – 2,500 cu.m./hr. Loading pressure of vessels pumps should not exceed 14.5 kg./sq.cm. at any time.

Facilities for handling of vessels ballast water available.

Services: Marine diesel and fuel oil available at the jetty. Storage tanks located in the neighbourhood of the terminal and connected with central pipe-line system of Poland. Laboratory, for testing purposes and repairing facilities available.

DENSITY: Salt content: 0.54%

FRESH WATER: Available at hydrants.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, crew allowed to handle.

CERTIFICATES:

Load Line Certificate.
Cargo Gear Certificates.

CUSTOMS ALLOWANCE: For 3 days – 160 cigarettes or 30 cigars or 150 gm. tobacco per crew member. Master is allowed double ration. 1 bottle wine and 1 bottle of spirits per crew member for each 3 days. Master is allowed double ration.

IDENTIFICATION CARDS: Each member must be in possession of a valid Discharge Book/Sailor's Book, and will receive a separate shore permit issued by the Immigration Authorities, entitling him to go ashore within the area of Gdynia/Sopot/Gdansk.

CONSULS:

Chinese People's Republic Consulate General, tel. 41–64–76.
German Democratic Republic Consulate General, tel. 41–43–66.
Soviet Consulate General, tel. 41–06–13.

Specification of Dangerous Cargo (even if in transit).
2 Stowage Plans.

PILOTAGE: Compulsory. Boarding in Gdynia Roads. Gdynia Pilot station available on VHF in Channel No. 12. Traffic around the clock.

ANCHORAGE: Gydnia Roads at buoy GD, up to 200-500 m. off port entrance. No tides.

RESTRICTIONS: Depth in main entrance 46 ft.

MAX. SIZE: No limit on length, max. draft 39 ft. 04 in. at Helsinki Quay, also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease the vessel should wire "Quarantine Gdynia" or via Agents.

RADIO: Message should be sent via Gdynia Radio. Port Radar Service acting with the Pilot station, contactable on VHF, Channel No. 12 Gdynia. Contact Agent VHF Channel 7.

TUGS: Join vessel in Gdynia Roads. Vessel's lines must be used.

BERTHING: Max. draft is at normal water depth.

Name	*Length*	*Max. Draft*
Helsinki Quay No. 1	475 m.	39 ft. 04 in.
Helsinki Quay No. 2	170 m.	33 ft. 00 in.
Pomeranian Quay	629 m.	27 ft. 11 in.

Name	*Length*	*Max. Draft*
Silesian Quay	434 m.	26 ft. 11 in.
Swedish Quay	715 m.	30 ft. 06 in.
Danish Quay (Ro-Ro)	562 m.	26 ft. 11 in.
Dutch Quay	397 m.	33 ft. 06 in.
Finnish Quay	190 m.	32 ft. 02 in.
Polish Quay	1,130 m.	29 ft. 03 in. –34 ft. 09 in.
Rotterdam Quay (Ro-Ro)	310 m.	28 ft. 03 in.
Indian Quay	1,018 m.	30 ft. 02 in. –32 ft. 02 in.
Peace Fighters Quay	817 m.	30 ft. 02 in.
Czechoslovakian Quay	214 m.	28 ft. 03 in.
Romanian Quay	864 m.	31 ft. 06 in.
Hungarian Quay	215 m.	33 ft. 02 in.
French Quay (passenger terminal)	510 m.	37 ft. 04 in.
Wenda Quay	80 m.	27 ft. 03 in.
Yugoslavian Quay	183 m.	32 ft. 02 in.

CRANES: Container Terminal at Polish Quay equipped with 2×40 ton multi-purpose cranes; Container Terminal at Helsinki Quay equipped with 3×45 ton gantry cranes, 2×40 ton railway gantry, 7×40 ton pneumatic travelling gantry.

Ro-Ro berth at Danish Quay.

Ro-Ro berth at Rotterdam Quay.

Floating cranes of 26 – 100 tons capacity and many portal cranes up to 8 tons capacity. Also available cranes of 11.5, 15 and 16 tons capacity. Mobile cranes 12.5 – 35 tons available.

BULK HANDLING FACILITIES: Grain elevator at Indian Quay. A special terminal at the same quay for handling aluminium oxide in bulk, through floating elevators.

Bulk cargoes handled by grabs at other quays.

4 floating elevators available. 2×320 t.p.h. and 2×100 t.p.h.

STEVEDORES: Gangs for the next day must be ordered by 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

MEDICAL: No special notice required. Full hospital facilities available.

TANKERS: Berth in No. 3 basin. up to 35,000 d.w.t., brackish water.

DENSITY: Salt content: 0.73%.

FRESH WATER: Available ex-hydrants.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opening/closing hatches normally carried out by stevedores, but crew allowed to handle.

CERTIFICATES:

Load Line Certificate.

Cargo Gear Certificates.

CUSTOMS ALLOWANCE: For each 3 days – 160 cigarettes or 30 cigars or 150 g. of tobacco per Crew member. Master is allowed double ration. 1 bottle wine and 1 bottle spirits per Crew member for each 3 days. Master is allowed double ration.

IDENTIFICATION CARDS: Each member must be in possession of a valid Discharge Book and will receive a separate shore permit issued by the Immigration Authorities entitling him to go ashore within the area of Gydnia–Sopot–Gdansk.

CONSULS:

Belgian V. Consulate	tel. 20–39–83
Brazilian V. Consulate	tel. 21–61–31
Dutch Consulate	tel. 20–06–85
Finnish Consulate	tel. 51–50–52
Italian V. Consulate	tel. 21–51–15
Swedish Consulate (also represents Denmark and Norway)	tel. 21–62–16

REPAIRS: All types of deck and engine repairs performed by specialised ship repair yard. Container repairs performed by Radunia Repair Yard, branch office in Polska Street.

DRY DOCKS: 2 floating docks of a lifting capacity of 3,500 and 1,200 tons. 12 slipways of 150 tons lifting capacity each.

REPATRIATION: Crew change and repatriation arrangeable.

AIRPORT: Gdansk-Rebiechowo Airport, situated 35 km. from Gdynia.

TIME: Middle European Time, which is 1 hour ahead of GMT, kept throughout the year.

HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Corpus Christi (movable); National Holiday (July 22nd); All Saints' Day (November 1st); St. Barbara (only for workers loading coal) (December 4th); Christmas Day (December 25th); Second Christmas Day (December 26th). On Christmas Eve and New Year's Eve work is generally suspended at 1500 hrs. In justified and approved cases overtime on Sundays and holidays is arrangeable.

POLICE/FIRE/AMBULANCE: Police: Gdynia, Chrzanowskiego 6, tel. 21–61–12; Ambulance: Gdynia, Zwirki i Wigury 14, tel. 20–00–02; Fire: Gdynia, Chrzanowskiego 17, Alarm 20–68–86.

TELEPHONES: Available on most general cargo quays.

GENERAL: Cargo is handled around the clock in 3 shifts of 8 hours each. Saturdays are full working days. Sunday and holiday interruptions last from 2300 hrs. on Saturdays or days before holidays and terminate at 2300 hrs. on Sundays or holidays.

DEVELOPMENTS: Container terminal at Helsinki Quay to be extended to length 800 m. and depth 13.20 m.

SERVICES: Hold cleaning, container and watchmen provided by "Port Service", Celna Street 5.

AUTHORITY: Port of Gdynia Authority.

AGENTS: Morska Agencja, *Head Office*, Pulaskiego 8 – Gdynia. Tel. 20–76–71 (9 lines) – working from 0730 to 1530 hrs. Telex: 054–301. Cables: "MAG Gdynia".

Harbour Office Gdynia, Rotterdamska 3 – Gdynia. Tel. 20–37–04 (day and night service). Telex: 054–376.

SZCZECIN: 53.25 N. 14.32 E. Including Swinoujscie, 53.55 N. 14.15 E. (See Plan Book)

DOCUMENTS:

- 12 copies of Cargo Manifests.
- 2 copies B/Lading.
- Tonnage Certificate.
- 4 copies of Crew List.
- Passenger List.
- Maritime Declaration of Health.
- Deratisation Certificate.
- Specification of Dangerous Cargo (even if in transit).
- 2 copies Stowage Plans.

PILOTAGE: Contact pilot station, VHF Channel 12, Working. Channel 26 or 27, call sign Polbroker. Light and sound signals used according to international rules. The Pilot is taken on board at the anchorage. Pilot compulsory for all vessels over 1,500 g.r.t.

MAX. SIZE: *Szczecin:* Max. draft – 28 ft., Max. length – 220 m.

Swinoujscie: Max. draft – 42 ft., Max. length – 250 m.

HEALTH: All ships arriving Szczecin from South of Cape Finistere are subject to sanitary inspection.

RADIO: Szczecin Radio, SPE 2182 mHz. Medium frequencies.

TUGS: For ships over 1,500 g.r.t., 1 tug compulsory. Over 3,000 g.r.t., two tugs compulsory. Normally tugs join the vessel at the limits of the port of Szczecin to Kra quay.

BERTHING: Szczecin:

Name of Quay	*Length* (m.)	*Depth* (m.)	*Designation*	*Equipment*
Katowickie	434	10.0	Coal and bulk cargoes	4×7-ton cranes, 3×10-ton cranes, open storage 7,022 sq.m., cargo bins.

SHORE LEAVE: Allowed.

DEVELOPMENTS: The Szczecin port has been in the main developed as a general cargo port. A main investment effort has been directed toward an establishment of a modern general cargo potential. New berths and terminals working on the "roll-on/roll-off" and "lift-on/lift-off" system should be built. The investment will comprise: berths, storage space, cranes, trucks and the other equipment for transhipment of conventional and containerised general cargo.

The port of Swinoujscie is still being built up as a bulk cargo harbour, capable to serve the large vessels. Simultaneously the Swinoujscie port will be developing ferry services. A modern ferry terminal built up in 1972-1973 is under further development and a target project stipulates for 4 berths and 10 arrivals and departures per day.

AUTHORITY: Harbour Master, Szczecin-Swinoujscie Sea Ports Complex, Szczecin.

Harbour Master's Office of the Port of Szczecin: The Harbour Master's Office supervises the traffic of ships and the observance of harbour rules in the Port of Szczecin.

AGENT: Morska Agencja w Szczecin, 4 Batorego Square POB 70-207, Szczecin. Tel. 46948, 45235, Telex: 0422147, 0422148, 0422149.

Harbour Office at Szczecin – day and night service tel. 39113, 89742. Telex: 0422235.

Harbour Office at Swinoujscie – tel. 3821. Telex: 0422330.

NOTES

Please also advise Shipping Guides Ltd.

Portugal

AVEIRO: 40.39 N. 08.45 W. (See Plan Book)

PORT LIMITS: A vessel is considered "arrived" when she is 1 mile from the roads entrance.
DOCUMENTS:

5 Crew Lists.
4 Lists of Passengers Disembarked.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
1 Provision List and Spares.
2 Health Certificates.
2 Dangerous Cargo Lists (when applied).
2 Lists of Articles held by the Crew.

PILOTAGE: Send ETA to Agent by cable, 24 hours before arrival. Entrance depending on sea conditions and ship's draft. Contact Aveiro Pilots frequency 2182 and listen on frequency 2132 on the following periods: 0905/0915, 1105/1115, 1505/1515, 1705/1715 hrs. local time.

Pilots can be contacted by VHF Channel 16 during the same periods.

Pilot boat displays white flag, surrounded by narrow blue stripe, with black "P" in the centre. Pilot to be taken on board about 1 mile West of harbour entrance; vessel awaiting Pilot can anchor there, if weather permits.

Pilot station, located close to Aveiro lighthouse, hoists black cylinder on signal mast when entry not possible due to bad weather or any abnormal cause. Pilot boat has radar that can assist vessels during approach to harbour entrance.

ANCHORAGES: Anchor West of North Pier, at a distance of 1 mile.
RESTRICTIONS: Subject tide and bar conditions. Entering and sailing only during daylight.
MAX. SIZE: Max. draft between 20 to 22 ft. dependent on tide. Max. length 100 m.
HEALTH: Free pratique automatic for vessels coming from other Portuguese and Continental ports. Vessels coming from other countries; Health Certificate must be delivered to Agent.
RADIO: Call Aveiro Pilots during the hours above indicated, under "Pilotage". Radio station is Lisboa Radio.

Also call Aveiropesca on 2182 kc/s from Monday to Friday 0800 hrs. – 2000 hrs. if required.

TUGS: Two tugs, one of 240 h.p. and one of 500 h.p.

An additional tug of about 500 h.p. will be available in the near future.

BERTHING: A quay with 1,300 ft. length for handling general cargo; 10 gangways in concrete for ocean fishing boats; 6 electrical cranes of 3.6, and 12 tons and 14 mobile cranes for cargo-handling up to 10 tons.
SPECIALISED CARGO HANDLING FACILITIES: A terminal for handling wine, chemicals and turpentine, another for handling liquid combustibles and chemicals.
STEVEDORES: Advise Agent 24 hours before vessel's arrival.
MEDICAL: Hospital and clinics in town. Advance notice not required. Required vaccination certificate, and when ship comes from affected regions, also yellow fever certificate.
TANKERS: Private quay of GALP used by small-sized tankers.
DENSITY: About 1028.
FRESH WATER: Supplied by barges or tank-car or water net system. 20 t.p.h.
FUEL: Only diesel available. Smaller quantities supplied from trucks. Otherwise, from SACOR's private quay (pipe-line).
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Work usually done by crew.
CUSTOMS ALLOWANCE: 125 grams tobacco, and 1 bottle wine/spirits for each man.
CREW IDENTIFICATION CARDS: Crew members going ashore will need a special card issued by Customs Officer and Maritime Authority. Ship's agent takes these cards aboard, where they are filled in accordance with crew list. See "Lisbon".
CONSULS: Nearest Oporto, 60 km.
REPAIRS: All repairs can be carried out.
DRY DOCKS: 1 Drydock (100 m. × 18 m.) for vessels up to 3,000 d.w.t. and 1 floating dock for vessels up to 1,200 d.w.t.
REPATRIATION: No difficulties for crew repatriations.
AIRPORT: Pedras Rubras (Oporto Airport) at about 70 km., with 2 flights per day to Lisbon and 1 flight per week to London.

Lisbon Airport at 250 km. is served by regular airlines covering all the world.

TIME: From 1st October to 1st April – GMT. From 1st April to 1st October – GMT plus 1 hour.
HOLIDAYS: New Year's Day; Liberty's Day (25th April); Portugal's Day (10th June); Workers' Day (1st May); 12th May (Municipal Holiday); August 15th, (Religious Holiday); Corpus Christi (movable); Proclamation of the Republic (5th Oct.); All Saint's Day (1st Nov.); Independence of Portugal (1st Dec.); Immaculate Conception (8th Dec.); Christmas Day. No work allowed on Christmas Day and New Year's Day.
POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 115; Fire 22333.
TELEPHONES: None available on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: As a tidal port, arrivals and sailings are subject to tides. Delays may occur owing to bad weather especially during the Winter months.
DEVELOPMENTS: Dredging harbour entrance.
AUTHORITY: Capitania do porto de Aveiro. Junta Autonoma do Porto de Aveiro.

AGENTS: A. J. Goncalves de Moraes, Lda, 49 Av. Dr. Lourenco Peixinho, Aveiro. Tel. 24550. Telex 22690. Cables: Amoras. After hours Tel. 24666. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

FIGUEIRA DA FOZ: 40.09 N. 08.52 W. (See Plan Book)

DOCUMENTS:

Health Certificate (the Pilot supplies form).
5 Crew Lists.
4 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
Provision and Spares List.
2 copies each Bill of Lading.

PILOTAGE: Compulsory. Send ETA to Agent by cable 24 hours before arrival. Convenient try arrive 1 hour before high tide. Call Figueira-Pesca frequency 2182 and listen on frequency 1785 or 1834. Await Pilot 0.5 mile from the piers. VHF Channel 16 is being used experimentally.
ANCHORAGES: South of N.W. Azimuth of North Pier, at a distance of more than 0.5 mile.
RESTRICTIONS: No services during night.
MAX. SIZE: Max. draft 12.5 ft. – 13.0 ft. Max. length 65 m.
HEALTH: Free pratique authorised for vessels coming from other Portugese Continental ports. For vessels coming from other countries, Health Declaration supplied by the Pilot must be filled in.
RADIO: Figueira — Pesca listens on 2182 kHz permanently, except between 1900 hrs. (on Saturday) till 0100 hrs. (On Monday).
TUGS: 2 tugs available, 200 h.p. and 120 h.p.
BERTHING: The port is in the mouth of the Mondego River. The anchorage is on sand and outside the harbour.
Concrete Quay: Length 360 m. Depth 13 ft. – 14 ft. Cranage : 3 electric – 2×6 ton at 20 m. and 1×3 ton at 16 m. 4 mobile – 1×1.8 ton at 12 m. and 3×1.5 ton at 8 m.
Wood Quay: Length 140 m. Depth 3 m. Cranage: 1×6 ton crane.
Tidal Harbour: Water area 6 ha. Length of quayage 600 m.
Depths on Bar: M.H.W.S.T. 3.8 m. M.H.W.N.T. 3.00 m.
There is about 320 m. of quayage for small ships and fishing craft.
STEVEDORES: Advise Agent 24 hours before arrival.
MEDICAL: No prior advice is necessary. All medical facilities available.
DENSITY: About 1028.
FRESH WATER: Each quay has its own installations.
FUEL: Only diesel available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Work usually done by crew.
CUSTOMS ALLOWANCE: No limit, but must be declared.
IDENTIFICATION CARDS: See "Lisbon".
CONSULS: France, Spain and Great Britain.
REPAIRS: There is a shipyard and repair facilities, also a shipway for ships up to 4,000 tons.
REPATRIATION: No difficulty in crew repatriations.
TIME: From last Sunday in September till last Sunday in March (GMT) and the rest of the year GMT plus 1 hour.
HOLIDAYS: New Year's Day; Good Friday; 25th April; 1st May; Corpus Christi (movable); 10th June; 14th June; 15th August; 5th October; All Saint's Day (1st November); 1st December; 8th December; 24th December; 25th December.

Also holiday on 24th June.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 22122; Fire 22122.
SHORE LEAVE: Crew allowed ashore.
DELAYS: As a tidal port, arrivals and sailings subject to tides. Delays may occur owing to bad weather especially during Winter months.
DEVELOPMENTS: Dredging in progress.

AGENTS: A. J. Goncalves de Moraes, Lda., 262-Rua da Republica, Figueira da Foz — Portugal. Tel. 22584. Telex: 13207. Cables: Amoras. After office hours: 25016 and 24666 ("Aveiro" network). Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LEIXOES and OPORTO (Douro River): (See Plan Book)

Leixoes: 41.11 N. 08.43 W. Oporto: 41.09 N. 08.37 W.

DOCUMENTS:

Health Certificate.
5 Crew Lists.
Provision List — ship and individual.
Tobacco Declaration and Entrance Forms supplied by Agent on arrival.
5 Manifests and 2 copies of each B/L concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Pilotage is compulsory for entry and leaving, with the exception of coastal vessels and national flag craft up to 500 g.r.t., coastal and local fishing vessels and pleasure craft. Available day and night in Leixoes, but in Oporto only between sunrise and sunset, and then dependent upon sea conditions. Vessels must communicate their ETA a minimum of 12 hours ahead and confirm again 4 hours in advance. Departures must be communicated 2 hours ahead between 0800 and 1800 hrs. This must be done via the Radar Station.

Pilot boat recognition:

By day – black hull, with the letter "P" painted in white. Also a flag may be hoisted which is white, lined in blue, and with a black letter "P" in the centre.

By night – a white light at the top of the mast forward and lower down a red light.

Call-up signals by ship's siren:

To call Pilot – Letter "G" in morse, or Letter "O".
To call pilot launch – Letter "O" in morse.

APPROACHES: *Leixoes:*

By day: Vessels coming from the North should take due heed of the Orca Rock situated 1,300 m. beyond the Northern Quay on the parallel 41° 10′ 37″ N. and should pass to the South of the breakwater light.

By night: Vessels approaching the port should be guided by the lights of the breakwater and then by the lights of the lighthouse, positioned at the heads of the North and South Moles of the Port, placing the Leca lighthouse in the middle of them.

Entrance Channel: The width of the port entrance between the heads of the breakwaters is 220 m.; in the foreport the channel widens to 500 m., to 240 m. from the entrance and is reduced again towards the entrance of Dock No. 1 to 113 m. By dredging, the depths are maintained at 10 m. The width of the entrance to Dock No. 2 is 58 m.

ANCHORAGES: *Douro River:*

Outside the port: Vessels may await entry, anchoring to the North of the alignment of the bar entrance lights of the Douro River in an area defined by the alignments of the Leca lighthouse, and the N.W. side of the Leixoes mole. In this area the depths vary between 16 m. and 21 m.

The anchorage is not safe in certain weather conditions.

Inside the port: Vessels can anchor with 2 anchors at the bow and 1 small anchor at the stern, and even by passing lines ashore at the following points: Alfandega, Cabrea, Pedras, Bicalho, Gas, Lugan, Carbonifera, Gaia and Monchique.

Leixoes:

Outside the port: Vessels can await entry, anchoring outside a radius of half a mile from the head of the breakwater to the West, and with an Eastern limit as the alignment of the Leca lighthouse with the breakwater light itself.

Anchorage is not safe during bad weather.

Inside the port: Vessels can anchor in the foreport.

RESTRICTIONS: *Douro:* Subject tide and bar conditions.

The main alignments of the bar, are as follows:

1. Tres Orelhas (a pillar with 3 battlements on the upper part, located at Sobreiras) or Marca Nova do Mato, on the Anjo (an archway on the Tower of S. Miguel da Cantareira);
2. Tres Orelhas by Marca Nova da Cantareira (light on iron column).

Marking of navigation channel – The channel is defined by 7 buoys which conform to the uniform system as laid down by the International Petrograd Conference, of 1912 and its subsequent amendments.

MAX. SIZE: *Douro River:* Permitted draft on entering the port, variable with the state at the bar is from 18 to 19 ft. (HWST) and 16 to 17 ft. (HWNT.).

The height of the tide of the port is: Average during Spring tides 2.30 m; average during Neap tides 1.80 m.

At times and particularly during the months of January, February and December, normal movement of vessels is effected by the rough sea which in conjunction with the river current causes frequent variation, both in the width and in the depth of the access channel, and necessitates annual dredging in order to guarantee conditions of navigability.

Leixoes: Cargo vessels 31 ft. Also see "Tankers".

HEALTH: Free pratique authorised for vessels coming from other Portuguese Continental Ports. For vessels coming from other countries Health Declaration supplied by the Pilot must be filled in, and delivered to the Agent. Radio pratique also available.

RADIO: Leixoes Naval Radio Station listens 2182 kHz and works on 2182, 2097, 2566, 2657, 4474.5, 7510 kHz and VHF Channel 16 (Working 11, 13, 19, 39 and 60) or through Lisbon Radio Station.

RADAR/VHF: Estacao da Radar de Leixoes; range 18 miles. VHF. Range 50 miles. Channel 6, 8, 9, 10, 11, 12, 13, 14, 16 and 67.

TUGS: Normally join the vessel: *At Leixoes:* 6 tugs, 875–2,800 h.p. In the outer harbour up to 700 g.r.t., no tug required; from 700 up to 1,800 g.r.t. 1 tug compulsory. Over 1,800 g.r.t., 2 or more tugs required.

At Douro River: As a rule service necessary on arrival/sailings. Thus join the vessel after passing the bar.

BERTHING: *Douro River:* Gaia Quay: Length 280 m. Depth 18 ft. Estiva Quay: Length 80 m. Depth 11 ft. – 17 ft. Porta A Quay and Alfandega Quay are for small craft only.

In addition there are private facilities of Secil, Leiria Cement Company and Mobil.

Outer Harbour: The depth of water at the entrance and in the centre of the outer harbour is 10.00 m. at MLWST; Maximum rise of tides 3.99 m.; Minimum rise of tides 0.07 m.; Total water area 117.36 ha.; Breadth of entrance (harbour) 220.05 m.; Breadth of entrance (Dock No. 1) 113.00 m.

Dock No. 1: Length of North Quay 487 m.; South Quay 551 m.; Maximum draft 29 ft.

Dock No. 2: Length of North Quay 670 m. and South Quay 588 m.; Maximum draft 30 ft.

South Mole: Length of Quay 370 m.; Depth 22 ft.

Dock No. 2 South Container Terminal: This facility has a quay length of 125 m. with a depth of water alongside of 12 ft. – 31 ft. There is a total area of 5.5 hectares (13.59 acres) of which 4.5 hectares (11.12 acres) are used for container marshalling and storage. It is equipped with 1×30-ton Liebherr container gantry crane with an outreach of 24.38 m. (80 ft.), 4×30-ton Karricon 3043 straddle-carriers, capable of stacking 3 high, 2×35-ton side-loaders, capable of stacking 2 high, and 2×12-ton container transporters.

Also see "Developments".

CRANES: *Dock No. 1:* One 94-ton crane, two 5-ton cranes, eight 3-ton cranes and 1×15-ton crane.

Dock No. 2: 2×15-ton cranes and 31×5-ton cranes.

South Mole: 6×5-ton and 1× 2.5-ton crane.

Douro River: Gaia Quay: 2×1.5 tons,1×3 tons and 1×5 tons. Porta A: 3×2 tons and 2×3 tons. Alfandega: 1×1.5 tons, 1×2 tons, 1×7 tons.

BRIDGES: Bridge at Leixoes between Dock 1 and Dock 2 opening regularly.

STEVEDORES: Ordered by Agents according to berth and cargo.

FRESH WATER: Available alongside or by barge.

FUEL: Available from Shell, Petrogal, Mobil, Sonap and B.P.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance is required on board. Hospital facilities available.

TANKERS: *Terminal Operator:* Petroleos de Portugal E.P. (Petrogal).

Pier A: Max. d.w.t. 120,000 tons. Depth of water: 12.0 m. Max. draft: 43 ft. (liable to change with dredging). Max. length: 217 m. Daylight berthing only.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	10,000 disch/2,000 load	4×12
Gasoil	1,500 load	1×12
Fuel	2,000 load	1×12, 1×10

Pier B: Max. d.w.t. 27,000 tons. Max. draft: 29 ft. Max. length: 200 m. Berthing at night possible. Depth alongside 9.0 m. Depth in approaches 7.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	4,000 load	2×12
Gasoil	1,500 load	1×10
Fuel	2,000 load	1×12, 1×8
Gasoline	700 load	2×10
Petrol (Jet)	400 load	1×8
Luboil	300 load	1×6

Pier C: Max. d.w.t. 5,000 tons. Max. draft 19 ft. Max. length 100 m. Berthing at night possible. Depth alongside 5.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)
Fuel	2,000 load	2×8
Gasoil	1,500 load	1×8
Gasoline	700 load	2×8
Petrol (Jet)	400 load	1×8
Luboil	300 load	1×6
LPG	200 load	1×6

Moorings: Vessels are to be moored with following lines, as a minimum:

Pier	Head Lines		Breast Lines		Springs	
	Fore	Aft	Fore	Aft	Fore	Aft
A	4	4	2	2	2	2
B	3	3	2	2	1	1
C	3	3	–	–	1	1

DENSITY: 1026.

OPENING/CLOSING HATCHES: Work always done by crew.

CERTIFICATES:

Ship Register.
Safety Radio.
Safety Equipment.
Load Line and Derating Certificates.

IDENTIFICATION CARDS: See Lisbon.

REPAIRS: All types of deck engine and electrical repairs can be carried out.

DRY DOCKS: Only small dry docks available for fishing-boats.

REPATRIATION: No difficulties for crew changes or repatriations.

AIRPORT: Distances: Oporto 17 km., Leixoes 7 km. Airport served twice a day through Lisbon Airport.

TIME: GMT plus 1 hour and no alterations during the year.

HOLIDAYS: 1980.

Public Holidays: 1st January, 4th April, 25th April, 1st May, 5th June, 10th June, 15th August, 5th October, 1st November, 1st December, 8th December, 25th December. All the foregoing are obligatory holidays.

Local Holidays: 19th February, 27th May, 24th June.

Catholic Holidays: Observed on 20th February, 19th March, 30th March, 6th April, 15th May, 25th May, 5th June, 15th August, 1st November, 23rd November, 8th December, 25th December.

Some of these are variable, particularly regarding the Feasts connected with Easter and Pentecost.

POLICE/AMBULANCE/FIRE: Leixoes Police 9951706; Oporto Police 28266; Ambulance 115; Fire Brigade Oporto 484121, Leixoes 930018 or 932701.

TELEPHONES: Only available on certain quays.

SERVICES: Limited tank-cleaning may be performed. Discharge of tank washings subject port authorisation. Compass adjusting possible. Diver service available.

SHORE LEAVE: Crew allowed ashore.

DEVELOPMENTS: *Leixoes:* Construction of No. 4 Dock. Length 503 m. (North side) and 544 m. (South side). Width 120 m. Depth 12 m.

Surfacing and draining of open sea area North of No. 4 Dock.

Northern Container Terminal in operation with 2 quays. 1 quay – length 360 m., depth 10 m. for vessels up to 25,000 d.w.t. and equipped with 2 gantry cranes of 35 ton capacity. Second quay – length 145 m., depth 6 m. for vessels up to 5,000 d.w.t. which may be converted for Ro/Ro traffic if justified. Open areas adjacent to the quays will cover 6 hectares.

Routine dredging of the docks, Douro Bar and manoeuvring area and approaches to Tanker Berth "A".

AUTHORITY: Administracao dos Portos do Douro e Leixoes.

AGENT: A. J. Goncalves de Moraes, Lda., Rua da Nova Alfandega, 18 — POB 185 — Porto, Portugal. Tel. 28741 (14 lines) Telex: 22381/2, 22420. After office hours; 9620694. Cables: Amoras. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LISBON: 38.43 N. 09.11 W. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S. Juliao and the Torre of Bugio.

DOCUMENTS:
Health Certificate.
6 Crew Lists.
10 Passenger Lists.
2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.
2 Stores Lists.
All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – tonnage register, loading and navigation certificates. For vessels over 500 tons: – tonnage register; load line; radio; safety equipment and navigation certificates.

Cargo Documents:
10 Manifests.
3 sets of Bills of Lading.
For cargo in transit: 2 Manifests.

PILOTAGE: Compulsory on the East side of the Tower of Belém. Pilot boat anchored outside the river at Cascais Bay, but Pilot can also board vessel inside the river at Belém Station.

Pilots are to be requested not less than 4 hours prior to the ship's arrival, by a radiogram addressed to "Pilotos Lisboa" stating ship's name, estimated time of arrival at the pilotage area (ETA), the station where ship wishes to take a Pilot, vessel's draft and means for the Pilot's embarkation.

Any vessel failing to correct her ETA may have to wait at Cascais before a Pilot is available to board.

Pilots can be contacted by VHF Channels 6, 13, 16 (permanent watch) and 73, and by radio-telephone (watch) 2182 kHz replying on 2341 kHz.

MAX. SIZE: Depth alongside piers varying between 15 ft. and 42.7 ft.

HEALTH: Ordinary visit made at central area with vessel anchored, from 0800 hrs. to 1900 hrs. Master may ask for free pratique to get ship moored immediately on arrival. For this, necessary to cable the Health Authorities, addressing cable as follows: Sanidade Maritima de Lisboa, Rocha do Conde de Obidos, max./min. respectively 15/4 hours prior to the ship's arrival. Text of cable: "ship's name, nationality, code (MIBDU), day and time of arrival" signed by the Master.

RADIO: ETA to be advised by Master, to Agent, 24 and 12 hours before ship's arrival. Lisboa Radio: call sign CUL, medium and short waves by code 720, 22, 24. By VHF Channels 5, 9, 21, 16 and 19.

BERTHING: Subject to berth availability.

SPECIALISED CARGO HANDLING FACILITIES: *Container Terminal* at Santa Apolonia equipped with four container cranes of 30/33 tons each, side loaders, semi trailers, tractors, etc., depth 8.5 m. and 13 m.

Roll-on/roll-off Terminal at Alcantara for ferry boats and cargo.

Grain Elevators and Silos at Poco do Bispo operated by EPAC. Unloading by elevator up to 400 t.p.h. Also see "Shipmaster's Report".

Cement Storage Terminal: This is at Poco do Bispo and is operated by Secil.

STEVEDORES: Ordered by Agents according berth and cargo.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Shell and Petrogal berths exposed to 9 knots HWST current. Essential to use good new mooring lines.

Cabo Ruivo Terminal: This is operated, on a concession basis, by Soponata and has depths of 11 m., capable of mooring tankers up to 65,000 d.w.t. alongside its jetty.

Fuel Oil Facilities: The port of Lisbon fuel oil installations belong to private companies and are concentrated along both banks of the Tagus at the following points:

Sacavem and Cabo Ruivo (with oil refinery facilities), Montijo, Barreiro, Santa Iria, Porto Brandao, Porto dos Buchos.

DENSITY: 1025.

FRESH WATER: Usually supplied by barge unless vessel lying alongside a pier where water provided.

FUEL: Shell, Esso, Petrogal. These companies can supply through their own barges or alongside their private bunkering stations on pier.

IDENTIFICATION CARDS: Crew members going ashore will need a special yellow card issued by Agent and stamped with police visa. The cards are supplied by Agent to be completed on board in accordance with crew list particulars. With these shore passes crew members may circulate between Lisbon and Cascais, and Lisbon and Sintra.

Master and/or Owners will be fined Esc. $1,000 for any crew member found ashore without that card. A double fine will be imposed in case of recurrence.

Similar cards, but white, are required for passengers in transit.

CONSULS: Practically all countries are represented in Lisbon.

REPAIRS: There are several repair work-shops. The biggest is Lisnave Shipyard with several docks, one for vessels up to 300,000 tons and a new dock where vessels up to 1,000,000 tons can be repaired.

AIRPORT: Within the Lisbon area. Regular International services.

REPATRIATION: No difficulties for crew changes or repatriation.

POLICE/AMBULANCE/FIRE: Maritime Police 607732; Ambulance 115; Fire 322222.

TIME: September 24th–March 26th – GMT. March 26th–September 24th – GMT plus one hour.

HOLIDAYS: 1st January; 4th April; 25th April; 1st May; 25th May; 5th June; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

DEVELOPMENTS: The Santa Apolónia container terminal, whose enlargement was completed in 1979, consists of a wharf 840 m. in length with close surfaced areas of nearly 8 hectares and adjacent water depths of 8 m. and 13 m.

It is now equipped with modern and efficient units for loading, unloading, parking and transportation of all container types, namely: container cranes (4), transtainers (5), side loader stackers (3), front loader stackers (9), trailers and tractors.

Under Construction: In the zone of Alcântara-Rocha, a new wharf of 1,100 m. length extending 80 m. into the river from the existing wharf with close water depths of 11/12 m. which is for the handling of general cargo as well as ro-ro traffic and a new area of 9 hectares of surfaced ground is being created.

SHIPMASTER'S REPORT: July 1980.

Grain berths: All elevators and silos are now only used for discharging barges and handling small vessels in the coastal trade. All ocean-going bulk carriers are handled in deep water at the inner or working anchorage situated between 2.2 and 3.5 miles East of the overhead suspension bridge.

All vessels are discharged by means of a floating crane with a grab into barges, whether the vessel has its own cargo gear or not. The capacity of the grabs vary between 2 tons and 6 tons. The capacity of the barges range from 200 tons to 7,000 tons lighter ships.

Rate of Discharge: With 1 average floating crane 2,000 tons a day. With the maximum of 2 floating cranes, of which one is a big crane, an average of 5,500 tons per day is obtainable.

Anchorage: Holding ground is good, although care must be taken when floating cranes and many lighters are alongside.

Draft Restrictions: The draft depends on HW on the bar in the approaches to Lisbon.

Waiting Area: In case no berth is available at the working anchorage, vessels have to wait at an anchorage between 2 miles and 3 miles West of the suspension bridge along the North or South shore of the river.

A deep draft berth with an elevator is under construction on the South shore close to the suspension bridge.

AUTHORITY: Administracao Geral do Porto de Lisbon.

AGENTS: A. J. Goncalves de Moraes, Lda., 22, Rua do Alecrim – Lisbon-2. P.O. Box 2772. Tel. 364943–366671. After hours Tel: 2750594. Telex 12296/7/8. Cables: Amoras. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

SETUBAL: 38.30 N. 08.55 W.

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
Personal belongings of the Crew (portable radio, binoculars, cameras, etc).
Store List.
Health Declaration.

For cargo: Dangerous Cargo List. Cargo Manifest. Transit Cargo Manifest (if any). Copy of B/L.

PILOTAGE: The pilotage service is supplied exclusively by the "Corporacao de Pilotos do Rio e da Barra de Setubal" which runs a permanent service.

To assure prompt attention requests for Pilots must be made in the following manner:

Entries: To send at least 6 hours beforehand a radiotelegram or a radiotelephone message preferably on S.S.B./AM to Pilotos de Setubal giving the name of the ship, ETA and draft.

This information must be confirmed on VHF or I.F. two hours before the ship arrives at the bar.

Departures and movement in the River: Between 0800 hrs. and 1800 hrs. on weekdays and 0800 hrs. and 1300 hrs. on Saturdays. Sundays and holidays, to communicate by telephone or on VHF with the "Estacao de Pilotos de Setubal" at least one hour beforehand, giving the name of the ship, the time and place where the Pilot is required and the service needed.

Only in cases of emergency will requests be accepted outside these hours.

To effect requests for Pilots, the Corporacao de Pilotos de Setubal use the following means of communication:

VHF — Listening permanently on Channel 16 (156.80 m/cs.) being able to reply on any of the following Channels as requested: 6, 8, 13, 16, 18, 22, and 73.

I.F. — Listening in permanently on 2182 kc/s., replying Pilotos de Setubal on 2132 kc/s., their working frequency. Once contact has been established ships must change to this frequency. Communications can be made in SSB or AM according to the equipment of the ship.

Telephone of CTT — No. 22914.

The Pilots embark by motor launch based in Setubal and waiting near the fort at Portinho da Arrabida when necessary and the weather permits.

To increase speed and safety on embarking and disembarking, ships of more than 4,000 tons gross, when light, and those of greater capacity in any condition, unless they have a door in the side or other modern means for Pilots to board and leave, and if the weather permits, should lower the gangway to about 3 m. above sea level and fix a rope-ladder so that it stays alongside the lower platform of the gangway.

Bad weather from the South, causing breaking waves at the edge of the shoals, sometimes prevents the pilotage service from operating.

In such conditions, ship must contact the Pilotos de Setubal to discover the state of the bar and limitations imposed on the pilotage service.

ANCHORAGE: Only inside harbour with a Pilot aboard.

RESTRICTIONS: No restrictions on night entry. At low tide vessels only up to 22 ft. draft. Max. draft 27 ft., length/breadth no restrictions.

HEALTH: Free pratique automatically given when ships come from other Portuguese port. Otherwise, Health Certificate is to be handed over to Health Authorities during clearance procedures.

RADIO: Call through Lisbon Radio.

TUGS: 5 available.

STEVEDORES: Ordered by the Agent some time in advance.

MEDICAL: Prior to arrival and in order not to delay ship's clearance, Master should inform by radio if medical assistance required, this only in case of contagious or epidemic diseases.

TANKERS: Shell Maritime installation with private pier. Discharge lines 4 in., 6 in. and 8 in.

DENSITY: About 1026.

FRESH WATER: Supplied from shore to all piers.

FUEL: Ordinary fuel available at Shell Installation to ships holding contract with Shell; or fuel supplied from lorry if ship holds contract with other company.

FIRE PRECAUTIONS: No smoking on deck or piers.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By crew unless otherwise specified in C/P. Stevedores usually help.

CUSTOMS ALLOWANCE: About 200 cigarettes and 2 bottles of spirits per man.

CARGO GEAR: Supplied by stevedores.

IDENTIFICATION CARDS: Supplied and filled in by the Agent. Crew members cannot leave Three Castles area (Setubal-Palmela-Sesimbra) without a special permit from Customs Guards obtained through Agency.

CONSULS:

Finland	tel. 26018
France	" 24612
Spain	" 22018

REPAIRS: All types available. Lisnave Shipyard and Dry Docks at Lisbon within about 50 miles.

Developments: Setenave has built a Shipyard for new building and repairs for very large ships in the estuary of Setubal.

The facilities consists of: 1 dock for ships up to 700,000 d.w.t. 1 dock for ships up to 350,000 d.w.t. New building berth for ships up to 700,000 d.w.t.

REPATRIATION: All facilities.

AIRPORT: Nearest at Lisbon, about 50 miles away.

TIME: From September 26th to March 26th — GMT. From March 26th to September 26th — GMT plus 1 hour.

AUTHORITY: Junta Autonoma do Porto, Setubal.

AGENT: — A. J. Goncalves de Moraes, Lda., 281, Av. Luisa Todi-Setubal. Tel. 22399. Telex 16212. Cables: Amoras. After office hours: 2750594. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

SINES: 37.57 N. 08.52 W. (See Plan Book)

(Port under construction)

LOCATION: 95 miles South of Lisbon.

PILOTAGE: Available, arranged by Agent.

MAX. SIZE: Max. LOA 350 m. Max. draft 21 m.

TUGS: Available.

VHF: Port Administration on Channels 16, 9 and 12.

BERTHING:

Berth No.	*Max. LOA (m.)*	*Max. draft (m.)*	*Hoses (in.)*	*Remarks*
2	250/350	21.0	20 (Cargo) 12 (Bunker)	Draft restricted due to damaged breakwater
3	190/270	16.0	12 (Cargo) 10 (Bunker)	
4	150/280	17.0	12 (Cargo) 10 (Bunker)	
5	150/270	16.0	12 (Cargo) 10 (Bunker) 8 (LPG) 4 (Flushing)	Max. d.w.t. 60,000
6	70/100	9.0	6 (Cargo) 8 (LPG) 4 (Flushing)	

Berth No. 1: Not in use as adjacent breakwater damaged by storms. The berth is expected to handle vessels up to 480 m. LOA.

FRESH WATER: Available.

FUEL: Available.

REQUIREMENTS:

a) Vessel may adjust her arrival time in order to start berthing manoeuvre at daybreak.

b) The minimum draft on arrival and at all times during stay in the port is to correspond to 50 per cent of the deadweight.

c) Vessel to have ready a total of 20 lines for mooring. Of these at least 10 are to be synthetic fibre mooring lines of approximately 275 m. in length. Wires and lines are to have a synthetic fibre end piece of at least 10 m. in length.

d) Vessels are to arrive with sufficient bunkers and fresh water.

e) The Vessel's Inert Gas System to be operational.

f) Crude Oil Washing is not permitted during discharging operations.

g) VLCC's must arrive equipped with Doppler or similar equipment which indicates the vessel's true ground speed and lateral movement.

h) Vessels gangways to be rigged and in position on port *and* starboard side ready for use.

i) Vessel's main engines to be kept in readiness at all times whilst alongside.

j) No repairs or routine work are allowed which may interfere with the vessel's readiness to move at any time.

k) The vessel is to have on board at any time sufficient personnel to handle vessel in case vessel required to leave berth.

l) If it is necessary to supplement the port's tug fleet during manoeuvring operations additional tugs (2) of 35 tons bollard pull will come from either Setubal or Lisbon, Alternatively, owners may bring their own tugs from any port. In either case the charge for 2 tugs is to be paid by the owners.

DEVELOPMENTS: When construction is completed the following facilities will be available.

Berth No.	*Product Handled*	*Max. size (d.w.t.)*	*Max. draft (m.)*	*Depth (m.)*
1	Crude Oil	500,000*	28.0	37.0
2	Crude Oil	350,000	25.0	28.0
3	Crude/Products	138,000	17.0	18.0
4	Refined Products	100,000	18.0	18.0
5	Refined Products	60,000	17.0	18.0
6	L.P.G.	4,500	10.0	10.0
7	L.P.G.	4,500	10.0	10.0
8	Refined products	10,000	—	—

*This berth could be upgraded to 1,000,000 d.w.t. by extending the breakwater.

Planned storage capacity: 2,750,000 cu.m., 1,500,000 cu.m. will be allotted for crude oil.

Discharge Rates: 15,000 cu.m. per hour (crude).

Loading Rates: 4,500 cu.m. per hour for fuel oil and 2,000 cu.m. per hour for other products.

Products Produced: Propane, butane, chemical naptha, regular and premium petrol, jet fuel, kerosene, various grades of diesel and fuel oil, asphalt, residue and sulphur.

Services: Ballast treatment, sonar, fire-fighting.

Petrochemicals: Terminal with 2 berths (Berth Nos. 9 and 10) with depths up to 12 m. will be able to handle vessels with capacity of 20,000 cu.m.

Ore Terminal: In the initial stages 4 berths will be available for simultaneous berthing of vessels of 6,000; 25,000; 45,000 and 150,000 d.w.t. Max. depth (approx.) 18.0 m. Cargo to be handled is iron ore, iron scrap and finished products.

Other facilities will include a general cargo harbour, fertiliser complex, facilities for grain reception and facilities for pyrites treatment.

AUTHORITY: Administracao do Porto De Sines.

VIANA DO CASTELO: 41.41 N. 08.50 W. (See Plan Book)

DOCUMENTS: Health Declaration.

3 Crew lists.

Provision list (ships and individual).

Tobacco Declaration and Entrance Forms supplied by Agents on arrival.

2 Manifests and 1 copy of each Bill of Lading concerning cargo to be discharged.

1 Transit Manifest if cargo in transit exists.

PILOTAGE: Always compulsory. ETA should be given to Agent with ample notice. Signals; during the day Flag "G" of International Code, and at night 3 long whistles. Boats black with white cabins. Pilots to be taken on board in outer or inner harbour respectively with bad or good weather.

ANCHORAGES: Outer or inner harbour according to weather conditions.

RESTRICTIONS: Entering and sailing only during daylight unless exceptionally good weather.

MAX. SIZE: Max. draft 15 ft. on HWST and 13 ft. on HWNT, with good sea conditions. Max. breadth 13 m.

HEALTH: Free pratique authorised for vessels coming from other Portuguese Continental ports. For vessels coming from other countries Health Declaration must be filled in and delivered to the Agents.

RADIO: Call Viana do Castelo Pilots frequency 2182 kc/s. and listen on 2132 kc/s.

TUGS: No tugs.

BRIDGES: 1 bridge which allows entrance/sailing at any time.

STEVEDORES: Ordered by Agents 8 hours in advance.

MEDICAL: No prior advice is necessary.

FRESH WATER: Supplied by shore installations.

FUEL: Only small quantities of gas oil can be supplied.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCE: No limit, but must be declared.

IDENTIFICATION CARDS: Required.

CONSULS: France 22412. Spain 23018.

REPAIRS: All types of deck, engine and electrical repairs can be carried out.

DRY DOCKS: Three dry docks available.

	Length	*breadth*	*draft*
Dock 1	203 m.	34.0 m.	18 ft.
Dock 2	127 m.	18.5 m.	18 ft.
Dock Eng. D. Pacheco	104 m.	11.0 m.	16 ft.
Fitting Dock	190 m.	65.0 m.	21 ft.

No special equipment for tank washing is available.

REPATRIATION: No difficulties for crew repatriation.

AIRPORT: Nearest Oporto airport at 55 km.

TIME: From September 26th to March 26th – GMT. From March 26th to September 26th – GMT plus 1 hour.

HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; Corpus Christi; 10th June; 15th August; 5th October; 1st November; 1st, 8th, 24th and 25th December.

POLICE/AMBULANCE/FIRE: Tel. 115.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: Junta Autonoma dos Portos do Norte.

VILA REAL DE SANTO ANTONIO: 37.10 N. 07.26 W.

DOCUMENTS:
2 Health Certificates.
3 Crew Lists.
1 List of Passengers in Transit.
2 Lists of Passengers Disembarking.
2 Dangerous Cargo Lists.
1 Ship's Register.
1 Tonnage Certificate.

PILOTAGE: Black boat, wooden hull, white "P" at bow. Stationed near buoy No. 1 (harbour entrance). All sea-going vessels entering or leaving harbour are obliged to avail themselves of the services of a Pilot. Latest 24 hours before prior arrival cable "Corporacao dos Pilotos de Vila Real de Santo Antonio" or to Agent. Departing vessels should apply for their Pilots at least 6 hours before the time of departure.

MAX. SIZE: Entrance channel 4,000 m. long, has a depth of 4 m. (12 ft.) at LW. Vessels drawing up to 5.5 m. (16 ft.) can enter under normal circumstances 1 hour before HW, a keel clearance about 1 ft. will be maintained.

TUGS: Tugs up to 105 h.p. available.

BERTHING: 1 pier 300 m. long. Depth at pier 20 ft.

STEVEDORES: Ordered by Agents. ETA to stevedores is necessary. No work allowed on Sundays.

MEDICAL: Inoculations in hospital Marques Pombal - Vila Real de Santo Antonio.

FRESH WATER: Obtainable alongside quay.

FUEL: Gas-oil can be supplied in small quantities.

GANGWAY/DECK WATCHMEN: Compulsory.

OPENING/CLOSING HATCHES: Crew allowed to open and close.

CUSTOMS ALLOWANCE: About 200 cigarettes and 1 bottle of spirits per man.

CONSULS:
Britain, Rua Dr. Oliveira Salazar, No. 4
Netherlands, Avenida da Republica, 73
France, Avenida da Republica, No. 114
Finland, Avenida da Republica, No. 133
Greece, Avenida da Republica, No. 109
Italy, Avenida da Republica, No. 11

REPAIRS: There is 1 small ship repair yard at Vila Real de Santo Antonio.

HOLIDAYS: 1st January; Holy Friday; April 25th; 1st May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 66; Ambulance 202; Fire 202.

AUTHORITY: Junta Autonoma dos Portos and Delegacao Aduaneira de Vila Real de Santo Antonio.

NOTES

Please also advise Shipping Guides Ltd.

Puerto Rico

AGUADILLA: 18.26 N. 67.10 W.

DOCUMENTS:

1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ships in Transit Cargo Manifest.
Clearance from Last Port.

PILOTAGE: Mayaguez's Pilots provide service in Aguadilla. Advise ETA in good time to Aguadilla Terminal.

RESTRICTIONS: Open port, very deep, safe in good weather. Cold fronts from North cause very heavy swells. Cannot berth during this kind of weather.

MAX. SIZE: 600 ft. long, 36 ft. draft.

HEALTH: Advise arrival to Aguadilla Terminal Inc. for free pratique.

BERTHING: The Aguadilla Shipping Terminal operates a bulk sugar loading facility. Sugar loading vessels tie up on mooring buoys. There is 40 ft. or more depth at the outer end of the bulk sugar loading berth. Ship ties up to 4 buoys and two bollards at main tower. Spring lines needed for shifting. Terminal boat handles lines, no charge; ship's lines not less than 600 ft. long.

MEDICAL: 24 hours notice preferred; 90 miles for nearest hospital except emergencies.

TANKERS: Molasses tankers - 10 in. connection (loading only). Only sugar and molasses loaded at the only loading facility available. Rate 66 t.p.h. sugar; 500 t.p.h. molasses.

There is also a mooring buoys and pile clusters berth for the tanker traffic that supply aviation gas for Borinquen Airport.

FRESH WATER: Available. 2 in. pipe-line with meter.

GANGWAY/DECK WATCHMEN: Usually crew members are used.

OPENING/CLOSING HATCHES: Performed by stevedores.

CERTIFICATES/CUSTOMS ALLOWANCE: U.S. Customs regulations.

IDENTIFICATION CARDS: Required to go ashore.

CONSULS: No local representation.

REPATRIATION: Can be arranged.

AIRPORT: 20 minutes drive. Regular airlines.

TIME: Atlantic Standard Time, 4 hour less than GMT. No alterations during year.

HOLIDAYS: Refer to "San Juan".

SHORE LEAVE: Allowed.

DELAYS: No delays unless another ship is already berthed.

AUTHORITY: Puerto Rico Ports Authority, Harbour Master.

GUANICA: 17.57 N. 66.54 W.

DOCUMENTS/GENERAL INFORMATION: Refer to "Ponce".

PILOTAGE: Port operations are under the control of the Captain of the port. Pilot services are available day and night, by previous arrangement with Guayanilla Pilots.

ANCHORAGE: Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.

TUGS: Available from Guayanilla.

BERTHING: Pier facilities are owned by the Guanica Central and used for bulk sugar shipments and limited general cargo operations. On the East side of the harbour entrance there is a reinforced concrete bulkhead wharf 700 ft. long with depths of 28 ft. alongside for the handling of bulk fertilisers. Small craft landings and facilities are along the boulevard fronting the beach.

FRESH WATER: Available in limited quantities for emergencies only.

FUEL: Available by trucks from Ponce.

MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.

CONSULS: None available locally, nearest at Ponce, Puerto Rico.

AUTHORITY: Port Captain, Puerto Rico Ports Authority.

GUAYANILLA: 18.00 N. 66.46 W. (See Plan Book)

Oil Terminal owned and operated by Commonwealth Oil Refining Co.

DOCUMENTS: U.S. Customs and Immigration forms for foreign flag vessels or American vessels on foreign trade:

	Original	*Copies*
Master's oath (Form 1300)	1	0
General declaration (Form 1301)	1	0
Cargo manifest (Form 1302)	1	2
Ship's stores declaration (Form 1303)	1	2
Crew effects declaration (Form 1304)	1	1
Crew list (Form I-418)	1	3
Passenger list (if any) (Form I-418)	1	3
Clearance from previous port	1	0

Certificates:

Load line certificate.
Water pollution.
Ship's register.
U.S. tonnage tax certificates (if any).

Agents require (copies):

Bill of lading.
Certificate of origin.

PILOTAGE: Port operations are under the control of the Captain of the port and pilot services are available day and night. Pilots stand-by on VHF Channel 16 and operate on Channel 14. Arrangements should be made with at least four (4) hours advance notice.

ANCHORAGE: It is the largest hurricane harbour and one of the best in Puerto Rico. It has protected anchorage for five (5) vessels. Maximum draft permissible is 42 ft. It is protected at its entrance by extensive reefs which extend a mile or more offshore.

HEALTH: Pratique is not necessary. In case of continuous high fever or contagious disease, Agents must be notified prior to vessel's arrival. Agents will immediately contact Public Health for proper action.

RADIO: Chatham Radio (WCC) – Chatham, Massachussetts (equipped with RCA automatic land line circuit direct to New York, N.Y., San Francisco, California and Washington, D.C.).

TUGS: Available 24 hours daily, as requested by vessel.

BERTHING: The Union Carbide Company has berthing facilities for barge operations.

New port facilities for Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority.

Berths were recently dredged and actual restrictions are as follows:

**Refinery Dock – Guayanilla:*

DWT	80,000 tons	
LOA	830 ft.	
BCM	400 ft.	(Critical)
Draft	42 ft.	(South Face, Berth No. 5)
	42 ft.	(North Face, Berth No. 4).

**Petrochemical Dock – Guayanilla:*

DWT	50,000 tons	
BCM	449 ft.	
Draft	36 ft. 06 in.	(South Face, Berth No. 3)
	30 ft.	(North Face, Berths 1 & 2) Ships only
	28 ft.	(North Face, Berths 1 & 2) Barges only

*Commonwealth Oil Refining Co. Ltd. facilities.

FRESH WATER: Available whenever requested by the vessel. Water delivery very slow (3 to 5 tons per hour).

FUEL: Available only whenever arranged by owners of the vessel and/or charterers prior to arrival.

MEDICAL: Medical service is available; hospitalization at Ponce, which is only 15 minutes distance.

REPAIRS: Various marine contractors available in Ponce upon request. Minor repairs available in Guayanilla and Ponce. No drydock facilities in the area. For drydock facilities and other major repairs refer to "San Juan".

Radar: For radar technician contact your local Agent prior to vessel's arrival. Various technicians available in San Juan.

REPATRIATION: Arranged by ship's Agents.

AIRPORT: International Airport in outskirts of San Juan served by regular airlines. Small airport in Ponce connects with San Juan.

CONSULS: None available locally; nearest at Ponce, Puerto Rico. Consuls available in Ponce are: Norway, Venezuela, Honduras, Dominican Republic.

SHORE LEAVE: Foreign crew members are allowed to go ashore through U.S. Immigration.

IDENTIFICATION CARDS: Shore passes are sufficient for shore leave.

AUTHORITY: Commonwealth of Puerto Rico – Harbour Master. Dock facilities operated by the refinery.

JOBOS (Aguirre): 17.56 N. 66.13 W.

DOCUMENTS/GENERAL INFORMATION: Refer to "Ponce".

PILOTAGE: The Port of Jobos is served by the Pilots of Port Ponce. Services must be arranged in advance.

ANCHORAGE: A fine land-locked harbour, located on the South coast, approx. 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19–24 ft. soft mud bottom.

RESTRICTIONS: The principal entrance is from Westward between Morrillo Cay and Ratones Cay.

TUGS: No tug-boats available.

BERTHING: To the West of the sugar pier (not in use) is a concrete barge dock 632 ft. in length with a buoyed access channel for the receipt of fuel oils for the Water Resources Authority.

FUEL: No bunkers are available.

MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.

CONSULS: None available locally; nearest available at Ponce.

AUTHORITY: Puerto Rico Ports Authority.

LAS MAREAS: (Guayama) 17.55 N. 66.10 W. (See Plan Book)

The Puerto de las Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama.

All vessels calling at Phillips Puerto Rico Core Inc., Puerto de las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the port.

DOCUMENTS: The following documents are required by the Customs and Immigration Authorities for entry and clearance:

Master's Oath (original and 1 copy) entry and clearance.
General Declaration (original and 1 copy) entry and clearance.
Stores List (original and 2 copies) entry.
Crew Purchases List (Curio List) (original and 2 copies).
Cargo Declaration (original and 1 copy).
Crew List (1 copy certified and 2 copies not certified).
Clearance from last Port (if arriving on an international voyage).

Crewmen Landing Permits (for each crew member without the Plastic Form I-14).

Passenger List (if any passengers).

All permanent documents of the vessel.

The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de las Mareas. The ultimate destination of in-transit passengers must also be shown in the passenger list.

In most cases, outward clearance and cargo documents will be delivered on board by the ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office.

PILOTAGE: The use of Pilots is compulsory for all vessels. Vessel's Agent will arrange for Pilot, upon receipt of the arrival notice. Pilot will board inbound vessels off the entrance to the harbour about 1 mile off-shore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.

Note: Every vessel arriving or departing must provide, and properly secured, a pilot ladder which conforms to the standards of construction normally accepted by international safety standards.

APPROACHES: The harbour is entered through a channel 250 ft. in width and its narrowest portion, bearing 025.6° (T). It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40-ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40-ft. contour. The 250-ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250-ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 1,100 ft. The harbour has a depth of 38 ft. below MLW but the max. draft allowable for inbound and outbound vessels is 37 ft. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.

NAVIGATIONAL AIDS:

A. Lighted Buoy LM: This sea buoy is located 300 ft. West of the centre line of the channel, 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing Morse code letter "A". (0.5 seconds on, 0.5 seconds off, 2.0 seconds on, 0.5 seconds off). The buoy is painted with black and white vertical stripes and is fitted with a radar reflector. Water depth is 70 ft.

B. Channel Marker Buoys:

(1) Buoy 1: This buoy has 360° green light flashing 0.6 seconds on and 3.4 seconds off. It is painted black and has a green retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

(2) Buoy 2: This buoy has 360° red light flashing 0.5 seconds on and 2.0 seconds off. It is painted red and has red/orange retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

C. Channel Marker Navigation Lights: There are 4 channel marker navigation lights, 3 are located on piling, and 1 on the end of the rubble mound breakwater.

(1) Channel Marker Number 3: This marker is located on a single pile 400 ft. West from the centre line of the channel, 2,024 ft. inshore from the channel marker buoy No. 1. The light is located 25 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0.6 seconds on and 3.4 seconds off. The marker is fitted with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 3.

(2) Channel Marker Number 4: This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0.5 seconds on and 2.0 seconds off. The marker has 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark green reflective border, numeral 4.

(3) Channel Marker Number 5: This marker is located 175 ft. West from the centre line of the channel, 1,000 ft. inshore from the end of the rubble mound breakwater. It is on a single pile 25 ft. above MLW and displays a green light through 360° flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 5.

(4) Channel Marker Number 6: This marker is located 175 ft. East from the centre line of the channel, 1,295 ft. inshore from the end of the rubble mound breakwater on a single pile 25 ft. above MLW. It displays a 360° red light, flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark reflective border, numeral 6.

D. Obstruction Light: This light is mounted on the protective dolphin at 10 ft. above MLW and displays 3 fixed red lights through 360°.

E. Range Lights: LLNR 1380.55 front range light is mounted on a tower located on the centre line of the channel 3,500 ft. inshore from the end of the rubble mound breakwater. It consists of a quick flash white light 86 ft. above MLW and visible on rangeline only. The tower is fitted with a 6 ft.×12 ft. KRW dayboard, covered with red/orange reflective coating with an 18 in. white stripe down the centre.

LLNR 1380.56 rear range light is mounted 104 ft. above ground on a tower located on the centre line of the channel 5,500 ft. inshore from the end of the rubble mound breakwater. It consists of an equal interval, white, 3.0 seconds on and 3.0 seconds off. The tower is fitted with a 6 ft.×12 ft. KRW dayboard covered with red/orange reflective coating with an 18 in. white stripe down the centre.

RESTRICTIONS: The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. Hence vessels using the port are limited to a maximum draft of 37 ft. Vessels are required to have a minimum draft of 14 ft. forward and 24 ft. aft when entering or leaving the port.

HEALTH: Free pratique is not required for vessels arriving at Puerto de las Mareas, except when cases of communicable disease are on board. In such cases, U.S. Public Health Service doctors are available, and should be requested through the Agent 48 hours prior to arrival.

MAX. SIZE: Max. draft 37 ft.

RADIO: Agents of vessels or owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex No. 3853347 "Philcorgya".

Puerto Rico Communication Authority-Telex No. 347.

Telephone (809) 865-1515.

Incoming vessels should advise the Agent by radio 48 hours and again 24 hours before their expected arrival at the sea buoy. Coast stations available for such advice are:

Lantana Radio (WOE) - Lake Worth, Florida. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0005, 0205, 0405, 0605, 0805, 1005, 1205, 1505, 1605, 1805, 2005 and 2205. Transmits weather bulletins at (GMT) 0105 and 1600.

New York Radio (WNY) - New York City. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California, Washington, D.C.)

Transmits Traffic Lists at (GMT) 0010, 0210, 0410, 0610, 0810, 1010, 1210, 1410, 1610, 1810, 2010 and 2210. Transmits weather bulletins at (GMT) 1000, 1400, 1600 and 2200.

Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.

Chatham Radio (WCC) - Chatham, Massachusetts. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0050, 0450, 0850, 1250, 1650 and 2050. Transmits weather bulletins at (GMT) 0100, 1300 and 1700.

San Juan Radio (WCT) - Radio Corporation of Puerto Rico Marine Station, Transmits at 2530 kc/s., receives at 2134 kc/s., watch at 2182 kc/s.

In addition to the above commercial radio facilities, incoming vessels may contact the port through radio facilities on tug stationed at the port. These facilities are as follows:

VHF radio: range 30 miles. Channel 16 (156.8 Mc/s), working frequency Channel 14 (156.7 Mc/s).

SSB radio: 12 Mc/s, 8 Mc/s, 4 Mc/s.

Call letters: WA 6617 and WS 6560.

Vessels diverted to Puerto de las Mareas must furnish the required 48-hour and 24-hour notices of arrival, unless notice of diversion is received when less than 48 hours before anticipated arrival, in which case the notice of arrival will be given as soon as notice of diversion is received. In such cases, however, Phillips Puerto Rico Core Inc. reserves the right to refuse to load or unload such vessels if tankage is not available for the cargo, or if cargo is not available to loading.

TUGS: The use of tugs is compulsory for arriving and departing vessels. Two tugs are stationed in the harbour to assist in docking, undocking and turning. Arrangements for the use of tugs should be made through the Agent well in advance of the vessel's arrival.

BERTHING: The dock at the terminal consists of a finger pier approximately 800 ft. in length inside the harbour with a tanker loading berth on each side. The finger pier consists of a cargo platform 45 ft. by 90 ft., fitted with fender piling and dolphins (3 breasting dolphins, 2 mooring dolphins and 1 protective dolphin). The cargo platform is connected to shore by a driveway 12 ft. 6 in. wide. The mooring and breasting dolphins outboard of the cargo platform are connected to each other and to the platform by a walkway. No launches are required to handle mooring lines. The top of the cargo platform is 12 ft. above MLW level. Water depth alongside the finger pier is 38 ft. at MLW. There is no current at the dock or in the harbour.

Bollards for mooring lines are provided on the breasting dolphins, the mooring dolphins and the turning dolphins.

Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of the turning dolphin, is provided. The turning basin has a depth over its entire area of 38 ft. at MLW. Normal procedure will be for vessels to enter the harbour and turn prior to docking.

Vessels will be required to vacate berths promptly on completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

If the vessel fails to vacate the berth on the expiration of the allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Phillips Puerto Rico Core Inc., as a result of delays to other vessels waiting berths, or for any other consequence of its failure promptly to vacate the berth.

HURRICANES: The South coast of Puerto Rico is subject to winds of hurricane force, accompanied by abnormally high tides, during the late Summer and Fall. In the event of such abnormal conditions, vessels may be required to put out additional moorings, or if necessary, to suspend all operations and put to sea until normal conditions prevail.

MEDICAL: Medical assistance or hospitalisation arrangements should be made through the Agent. If hospitalisation is required for any crew member arrangements should be made through the ship Agent with hospitals located in the municipality of Guayama. Ambulance service can be furnished upon request to the Agent.

TANKERS: The various cargoes available at the Puerto de las Mareas terminal include motor fuel, cyclohexane, benzene, paraxylene, orthoxylene, mixed xylenes, paraffinic naphtha, and other special products. Feedstock for Phillips Puerto Rico Core Inc. facilities is naphtha, and there is a fuel oil unloading line. Cargo handling is accomplished through various sizes of lines, as follows:

Product	*Hose size (in.) (each side of dock)*	*Line size (in.)*	*Loading/ discharging rate with one pump*
Naphtha Feedstock	3 – 8	20	13,700 b.p.h.
Motor Fuel Regular	3 – 8	20	10,000 b.p.h.
Motor Fuel Premium	2 – 8	12	5,700 b.p.h.

Product	*Hose size (in.) (each side of dock)*	*Line size (in.)*	*Loading/ discharging rate with one pump*
Motor Fuel Unleaded	1 – 8	14	7,000 b.p.h.
Benzene	1 – 8	12	3,800 b.p.h.
Cyclohexane	1 – 8	10	4,000 b.p.h.
Paraxylene	1 – 8		5,000 b.p.h.
Orthoxylene	1 – 6	8	2,200 b.p.h.
LP-7 Raffinate	2 – 8	16	7,500 b.p.h.
Mixed Xylenes	1 – 6	8	2,000 b.p.h.
Toluene	1 – 8	8	800 b.p.h.
Fuel oil	1 – 8	12	3,500 b.p.h.
Ballast	1 – 8	12	6,000 b.p.h.
Domestic water	1 – 2	2	3 t.p.h.
Butane	1 – 6	16	2,000 b.p.h.

CONNECTING/DISCONNECTING HOSES: Service will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

READINESS: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels may tender notice of readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

BALLAST: Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de las Mareas. U.S. Coast Guard regulations are enforced for any discharge of dirty ballast, and any violations will be quickly detected and reported.

Ballast is pumped ashore through a 12 in. line, capable of receiving at a pressure at the ship's rail of 100 p.s.i. The ballast facilities are sufficient to accommodate 70,000 barrels of dirty ballast. Vessels are requested to arrive with minimum of dirty ballast.

FRESH WATER: Available at the dock in limited quantities.

FUEL: No bunkers are available at Puerto de las Mareas. However, arrangements for bunkering at any other ports in the island can be made through the Agents.

STORES: May be ordered through the ship's Agent for delivery at the terminal.

CONSULS: No consular representatives are located in the vicinity of Puerto de las Mareas. Some nations maintain consular representatives in San Juan. Further information can be obtained from the Agent.

REPAIRS: Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are availabe at Ponce. Requests for such services should be made through the Agent.

SURVEYORS: There are no classification society surveyors stationed at Puerto de las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

CUSTOMS: U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving or departing to a foreign port.

FIREARMS: All firearms and ammunition should be shown on the stores list and will be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

SAFETY: The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Subchapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good conditions must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of the cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

(8) The vessel must moor bow to seaward when feasible and be prepared to get underway on short notice. A towing cable shall be made ready forward and aft with the bight at waters edge.

(9) Each foreign flag vessel must be in possession of a valid Letter of Compliance issued by the Commandant, USCG for the carriage of the specific products to be loaded or discharged. All vessels must possess a Certificate of Financial Responsibility and be able to produce the same upon demand.

(10) Ship to ship transfer of cargo within the harbour is not permitted.

(11) All persons considered to be intoxicated or under the influence of drugs shall not be allowed to board the ships or enter the facilities during cargo operations.

Violations of these and other safety regulations, as described in Parts 35 of Subchapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazards removed.

POLLUTION: *Oil Spill Avoidance:* All vessels must comply with the latest Commonwealth and Federal laws and regulations regarding prevention of oil spills. Such laws absolutely prohibit any discharge overboard of oily water, oily ballast or oil in any form. Since the harbour is an enclosed area with no flow of water through it, any violations, no matter how small, will be quickly detected and reported to the U.S. Coast Guard. VIOLATORS WILL BE VIGOROUSLY PROSECUTED AND ARE LIABLE FOR HEAVY FINES.

Sanitary Regulations: Pollution laws and regulations concerning sanitation apply to the harbour of Puerto de las Mareas. Trash and galley waste will not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into the waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by crew members while their vessels are at the berth.

MAIL: Official and personal mail may be addressed to the vessel in care of the Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

SHORE LEAVE: When the vessel is berthed at Puerto de las Mareas there normally are no restrictions on shore liberty. In order to avoid delay in sailing, Masters are requested to ensure that all crew members are onboard their vessel at sailing time. There are no facilities to provide shore liberty from vessels at anchor awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore liberty.

GENERAL: *Charts:* The general area and the harbour of Puerto de las Mareas is shown in U.S. Hydrographic charts number 25677 and 25640.

Tides: Tides in the general area of Puerto de las Mareas have an average yearly range of 0.8 ft. from MLW to MHW.

AUTHORITY: Puerto Rico Ports Authority; port facilities operated by Phillips, P.R. Core, Inc.

MAYAGUEZ: 18.13 N. 67.12 W.

DOCUMENTS: If vessel staying less than 24 hours:

Crew List.
Stores List.
Cargo Manifest.
Crew Purchase List.
Valid Load-line Certificate.
Ship's Register.
Clearance from Previous Port.

Vessels working cargo. 2 sets of documents to be prepared as follows:

Original:

1 copy of Inward Foreign Manifest (U.S. Customs Forms 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.

Duplicate:

Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.

Agents require:

3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.

Certificates:

Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Ships Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours, of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of sea buoy depending on weather conditions. Pilot service available day and night.

ANCHORAGES: Close to the entrance channel and boundaries. Sufficient depths for larger vessels.

RESTRICTIONS: The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3.8 miles wide, and offshore is protected by shoals which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0.4 mile wide, with depths at the entrance of about 47 to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 to 29 ft.

MAX. SIZE: Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.

RADIO: Communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830-3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.

TUGS: Not used at Mayaguez Port.

BERTHING: Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width, 30 ft., and transit sheds. There are other berthing facilities in the port which are owned by the tuna packing plants.

STEVEDORES: Arrangements are made by the ship's Agents or representatives.

MEDICAL: The Agent should know in advance any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.

TANKERS: See "Port of Guayanilla". Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.

FRESH WATER: Available at pier facilities alongside the berth in 4 outlets to supply any amount required at any time. Hose connections of 2.5 in. or less, maximum pressure.

FUEL: All grades available.

FIRE PRECAUTIONS: Standard fire and safety precautions throughout. U.S. Coast Guard regulations.

GANGWAY/DECK WATCHMEN: Ship provides own gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Required to go ashore.

CONSULS: Dominican Republic, France, tel. 832-4322. Others at San Juan.

REPAIRS: Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.

REPATRIATION: Arranged by ship's Agents.

AIRPORT: Mani Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Refer to "San Juan".

POLICE/AMBULANCE/FIRE: Telephone numbers: Police, 343-2020, 832-2300; Ambulance, 832-0496, 832-3212; Fire, 343-2330, 832-2330.

TELEPHONES: Can be arranged by Puerto Rico Telephone Company.

SHORE LEAVE: Allowed.

DEVELOPMENTS: It is planned to locate a heavy lift crane on the berth facility.

AUTHORITY: Puerto Rico Ports Authority.

PONCE: 17.58 N. 66.37 W. (See Plan Book)

DOCUMENTS: If vessel staying less than 24 hours:
Crew List.
Stores List.
Cargo Manifests.
Crew Purchase List.
Valid Load Line Certificate.
Ship's Register.
Clearance from Previous Port.

Vessels working cargo: 2 sets of documents to be prepared as follows:
Original:
1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Stores List.
1 Crew Purchase List.
1 Passenger List (if any).
1 Crew List (U.S. Form 1-418).
1 copy of Ship's in Transit Cargo Manifest.
Clearance from Last Port.
Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.
Agents require:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.
Certificates:
Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Port operations are under the supervision of the Captain of the Port and pilot services are available day and night.

ANCHORAGE: Harbour is protected from the prevailing Easterly trade winds by enclosing reefs. To the Southward the harbour is exposed and for this reason is not safe in a hurricane.

RESTRICTIONS: Depths: Entrance channel 36 ft.; turning basin, 31 ft.; anchorage, 40 ft.

MAX. SIZE: Max. draft 29 ft.

BERTHING: The municipal pier is a concrete and steel construction 430 ft. long by 100 ft. wide, with a steel and cement transit shed. The municipality has also built a concrete bulkhead wharf extending East-West for 2,260 ft. from the pier. To the North of the bulkhead wharf there is a manoeuvring basin 30 ft. deep. Depth alongside: Pier 1A, 30 ft.; Pier 2, 29 ft. 6 in.; Pier 3, 30 ft.; Pier 4, 30 ft.; Pier 5, East-side, 33 ft.; Pier 5, West-side, 32 ft.

A Paceco Portainer crane, capacity 40 ton for handling 20 ft., 35 ft. and 40 ft. containers is installed at the Trailer Wharf.

FRESH WATER: Water is available whenever ordered in advance for 24 hour daily service or at request during office hours.

FUEL: Available by pipe-line: (Texaco only) diesel, gas oil, No. 6 fuel oil. By trucks (Chevron, Shell, Esso).

MEDICAL: Ambulance permanently available at dock area, hospital and doctors service available as requested to the Agent.

CONSULS:
Colombia
Denmark
Dominican Republic
France
Honduras
Holland
Panama
Spain
Sweden
Switzerland

REPATRIATION: Arranged by ship's Agents.

TIME: GMT minus 4 hours.

HOLIDAYS: Refer to "San Juan".

DEVELOPMENTS: The expansion of the 260 ft. N.-S. bulkhead is completed and length increased to 600 ft. There is a 76 ton gantry crane in operation.

The Port Board is working on the development of a dry dock for ship repair.

AUTHORITY: Captain of the Port. Port owned and operated by the Ponce Municipal Government.

SAN JUAN: 18.28 N. 66.07 W. (See Plan Book)

DOCUMENTS: Foreign vessel calling for fuelling purposes and staying less than 24 hours:
Crew List. (Form I–418).
Stores List. (C.F. 1303).
Cargo Declaration. (C.F. 1302).
Crew Effects Declaration. (C.F. 1304).
Valid Load Line Certificate.
Ship's Register.
Clearance from Previous Port.

No Customs formal entry or clearance is required if vessel departs before 24 hours and transacts no other business related to cargo or passengers.

Vessels working cargo. 2 sets of documents to be prepared as follows:
Original:
1 copy of Inward Foreign Manifest (U.S. Customs Form 5727-A), Cargo for San Juan.
1 Ship's Stores Declaration. (C.F. 1303).
1 Crew Effects Declaration. (C.F. 1304).
1 Passenger List (if any).
1 Crew List (U.S. Form I–418).
1 copy of Ship's in-transit Cargo Manifest. (C.F. 1302).
Clearance from Last Port.
Duplicate:
Same as original except the in-transit Cargo Manifest.
If vessel has on board cargo for another American port, an extra copy of the original Cargo Manifest is required.
Crew members to declare individually all articles such as souvenirs, etc.
Agents require:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchases List.
1 copy of Narcotics List.
1 copy of Passengers List.
U.S. Customs clearances: Documents required:
Cargo Declaration Outward with Commercial Forms C.F. 1302–A.
Crew List in duplicate (American vessels only).
(Functions of admeasurement and documentation of American vessels are performed by the office of Marine Inspection, U.S. Coast Guard Base, San Juan, Puerto Rico).
Consular clearances for the Dominican Republic:
5 copies of Crew List.
5 copies of List of Weapons and Ammunitions on board.
5 Lists of Passengers.
Consular clearances for Venezuela:
6 copies of Store List.
8 copies of Crew List.
7 copies of Passengers List.

Purser shall supply the Agents with necessary information to fill the inward and out bound cargo reports which have to be filled at Customs House after departure of the vessel.

Customs Inspector requires:
Valid Load Line Certificate.
Ship's Register.
U.S. Tonnage Tax Certificates (if any).

PILOTAGE: Compulsory. Pilots available day and night. Ships' Agents must make arrangements with pilot station well in advance (not less than 24 hours) of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside). Show the letter "P" on each bow. Pilots board 3 miles offshore of sea buoy. Call Pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

ANCHORAGES: Deep draft anchorage "E", on the S.W. shore of Isla Grande, is for vessels awaiting Customs or quarantine, and no vessel shall remain more than 24 hours without a permit from the Puerto Rico Ports Authority and U.S. Coast Guard Captain of the Port. Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. No vessel shall anchor without a permit from the Captain of the Port. Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

RESTRICTIONS: Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 42 ft. and 36 ft., respectively, there are 4 other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately 1 mile long and 300 ft. wide. Charted Depth in the Army Terminal Channel and alongside Piers 1 and 3 is 35 ft., safe draft 33 ft. Depth in other channels varies 30 to 32 ft. and alongside pier facilities 28-30 ft.

The Puerto Nuevo Channel, approximately 1 mile long, 300 ft. wide, with an average depth of 32 ft.

The Graving Dock Channel, approximately 1 mile long, 300 ft. wide, with an average mid-channel depth of 30 ft.

San Antonio Channel, approximately 1.5 miles long, 300 yards wide, mid-channel average depth 35 ft.

MAX. SIZE: Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker's berth, 36 ft.

RADIO: Radio communication to all points, including ships at sea, is available through commercial systems. Cables, Telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723-6170, San Juan, Puerto Rico.

The signal station at Fort San Cristobal in San Juan harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships traffic. Transmitting vessels can communicate with the station through 156.8 mHz (Channel 16) for call and reply and working Channel 14, 156.7 mHz.

Vessels approaching to enter San Juan Harbour shall remain outside not less than 3 miles Northerly of the harbour entrance to pick up the Pilot, and vessels about ready to depart shall inform the signal station via radio-telephone of their intentions.

TUGS: Caribe Tugboat Corp., tel. (809) 723–6164, and Port San Juan Towing Company, tel. 724-2360, operate a fleet of tug-boats. Tugs join vessel just inside harbour entrance. Tugs available day and night with sufficient notice.

Use of tug-boats compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

BERTHING: All vessels must request and obtain well in advance before arrival a berthing permit from the Ports Authority.

Pier 1: North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, 770 ft. long, double deck, cruise and passenger vessels terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

Ferry Terminal: Next Easterly to Pier 1. Ferry terminal for the San Juan-Catano ferry fleet.

Pier 3: North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourists ships terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.

Wharf No. 6: An extension of the open bulkhead Easterly of Pier 3 marginal wharf, 940 ft. long, accommodates cruise and passengers vessels. Water and light facilities available.

Pier 7: Northerly continuation of Pier No. 6; 472 ft. long, 1 berth, general cargo pier. 15,000 sq.ft. transit shed area.

Pier 8: East of Pier 7, finger pier, 3 berths, general cargo pier. Transit shed area and other covered storage 175,508 sq.ft. open area 40,000 sq.ft. Water and light facilities available.

Pier 9: East of Pier 8. Finger pier, 3 berths, general cargo pier. Net storage space pier shed 133,738 sq.ft. open area 40,000 sq.ft. Water and light facilities available. South berth is a tug–barge terminal.

Pier 10: North shore of San Antonio Channel. East of Pier 9. Finger pier, 1 berth, tug and barge terminal. No transit shed space. Water, fuelling facilities and light available.

Wharf No. 11: East of Pier 10, marginal wharf, 1 berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq.ft. ample back area. Water and light facilities available.

Wharf No. 12: An extension of Wharf No. 11 Bulkhead 550 ft. long, wide apron, 15,000 sq.ft. transit shed area, 37,000 sq.ft. open storage. General cargo wharves. Water and light facilities available.

Wharf No. 13: Prolongation of Wharf No. 12: 28,000 sq.ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.

Pier 14: Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq.ft. transit shed area, ample marshalling area. Water and light facilities available.

Frontier Base Pier: Navy facility operated by the Puerto Rico Ports Authority under contract. 2 berths for sea-going vessels. Depth alongside 30 ft. Principally used for berthing of cruise vessels and conventional ocean carriers handling open storage cargo.

Isla Grande Terminal: South shore of San Antonio Channel. General cargo wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq.ft. with 240,000 sq.ft. of paved open area. Easterly section of bulkhead for shallow draft vessels.

Container terminals:

(a) In Westerly section P.R. Maritime Shipping Authority lift-on-lift-off trailership terminal; bulkhead wharf 1,320 ft. long. Wide apron, ample trailers marshalling yards. 2×45 tons capacity container handling cranes. Paved marshalling area approximately 1,800,000 sq.ft.

(b) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's roll-on/roll-off operations. Shoreside concrete ramp extending out seaward. Tug-barge operation, loading and unloading through bow and side ramps. Max. draft approximately 18 ft.

(c) Inter-island Intermodal Inc. roll-on/roll-off shoreside ramp, barge-tug operation; loading and unloading at bow. Max. draft 18 ft.

U.S. Navy property under lease and operated by the Puerto Rico Ports Authority.

Pier 15/16: General cargo pier. Dry dock, floating dock, ship repairs, foundry. 1 wooden floating dry dock of 1,000 tons capacity. Floating crane 25 tons lifting capacity. 4 mobile cranes 45 tons capacity. Reinforced concrete graving dock. Fuel and water available. United States Navy installation under lease to Abarca Dry Dock and Marine Terminals for commercial ship repair and dry-docking operations. Bulkhead wharf and finger pier used by commercial vessels.

Puerto Nuevo Docks: Terminals "A" and "B" marginal wharves. 2×500 ft. berths. 102,000 sq.ft. transit shed area. 2 cargo sheds. 30 ft. depth alongside. General cargo piers. Limited open storage area.

Trailership Terminals: (3 at Isla Grande port zone, above, 10 at Puerto Nuevo port zone. Berths C, E, F, G, H, J, K, L, M and N and West side Army Terminal).

Berth "C": P.R. Maritime Shipping Authority's roll-on/roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 30 ft. depth alongside, approximately. Length 600 ft. Width of apron 40 ft.

Berth "D": 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping. Marginal wharf 40 ft. wide, 600 ft. long. Ample cargo shed used for distributing cargo coming in trailers for different consignees. Ample trailer marshalling yard. 30 ft. depth alongside, approximately.

Berths "E", "F", "G", "H", "J", "K", "L", "M" and "1/2 N": 600 ft. each, continuous bulkhead wharves, lift-on/lift-off operation. Max. draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25 ton capacity pierside cranes are installed at Berth "E" to "H".

Army Terminal Pier: Finger pier; 3 berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for roll-on/roll-off operation.

Isla de Cabras Pier: Explosives handling pier at Isla de Cabras. Ports Authority property.

Bulk Grain Handling Facilities: Berthing, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).

STEVEDORES: Arranged by the ship's Agents.

MEDICAL: Medical attendance and services are available for seamen at the United States Marine Hospital in San Juan (out-patients). The Presbyterian Hospital handles internal cases.

TANKERS: Caribbean Oil Refinery pile clusters berth, max. permitted draft 33 ft.; Navy Oil Pier, max. permitted draft, 29 ft.

FRESH WATER: Most of the piers have adequate installations to supply water.

FUEL: Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

REPAIRS: Abarca Dry Dock and Marine Terminals handles dry docking and major vessel's repairs. San Juan Shipyard and Marina, at Isla Grande, and Vaello Shipyard at La Puntilla, Catano, operate marine railways for dry-docking and repairs of small vessels. The Puerto Rico Lighterage Company handles minor ship repairs.

GANGWAY/DECK WATCHMEN: Ship provides own gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Required to go ashore.

AIRPORT: On outskirts of port area, served by regular airlines.

TIME: GMT minus 4 hours.

HOLIDAYS: *New Year's Day (January 1st); Three Kings' Day (January 6th); De Hostos Birthday (January 11th); Washington's Birthday (February, Third Monday); Emancipation Day (March 22nd); *Good Friday; De Diego's Birthday (April 16th); Memorial Day (May, Last Monday); *Independence Day (July 4th); Munoz Rivera's Birthday (July 17th); *Constitution Day (July 25th); Barbosa's Birthday (July 27th); *Labour Day (September, First Monday); Columbus Day (October 12th); Veteran's Day (November 11th); Discovery of Puerto Rico (November 19th); *Thanksgiving Day (November, Last Thursday); Elections Day (November every 4 years); *Christmas Day (December 25th). Any holiday falling on Sunday is observed on the following Monday.

*No cargo operations on these dates.

POLICE/AMBULANCE/FIRE: Police, 343-2020; Ambulance, 765-9700; Fire, 343-2330.

A Ports Authority ambulance stationed at Pier 14 is available for emergency service.

SHORE LEAVE: Possible, however, Form I–95 is to be prepared.

DEVELOPMENTS: 2 additional trailership berths are under construction at the Puerto Nuevo port sector.

AUTHORITY: Puerto Rico Ports Authority.

AGENT: Continental Shipping, Inc. P.O. Box No. S-2467 San Juan, P.R. 00903. Cable: Conship. Telex: R.C.A. (325) 2770. Tel. (809) 725-2532.

YABUCOA: 18.02 N. 65.48 W. **(See Plan Book)**

Man-made harbour and channel located at the S.E. corner of Puerto Rico. Berthing facilities for deep draft tankers and a barge dock. Port and shoreside installations for the receipt and shipment of fuel oils and liquid chemicals for the Puerto Rico Sun Oil Company, a petro-chemical complex and barge dock and shoreside facilities for Union Carbide Graphite of Puerto Rico.

Facilities consist of the following: Ship channel 500 ft. wide, 40 ft. depth. Turning Basin. Dock and operating platform for a max. of 100,000 d.w.t. tank vessels. Mooring, breasting and turning dolphins. Catwalks. Additional dock appurtenances (fire-fighting equipment, protective jetty, etc.). Pilot services available day and night and tugboats available.

AUTHORITY: Captain of the Port, Puerto Rico Ports Authority.

NOTES

Please also advise Shipping Guides Ltd.

Qatar

DOHA: 25.17 N. 51.32 E.

DOCUMENTS: The following documents will be required at this port:

8 copies of the Unfreighted Manifest.
2 copies of the Freighted Manifest.
2 copies of the Hatch List.
2 copies of the Stowage Plan.
2 copies of the Dangerous/Hazardous Cargo List
1 set of Bill of Lading.
1 set of Crew List.
A list of Food Stuff.
A list of Insecticides and any Poisonous Cargo.

Agents:
1 copy of the Arrival Report (Supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

Port Health:
1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy of the International Declaration of Health.

Immigration:
4 copies of Lists of Passengers Landing (if applicable).

Customs:
Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

PILOTAGE: Application for a Pilot should be made to the "Doha Port Control" through VHF (Channel 16), 24 hours prior to the arrival of the vessel at the pilot station (via Bahrain Radio).

Pilot station keeps a VHF watch 24 hours a day on Channel 16. Call sign DOHA PORT. Similar watch kept on R/T 2182 K/cs.

Pilot boat proceeds to the vicinity of the Doha Outer Buoy, position 25° 17′ 06″ N. 51° 41′ 26″ E. when the pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes. When the sea is calm and the vessel is at anchor the accommodation ladder may be used.

ANCHORAGES: Near the Outer Buoy and Southerly from it only. Min. depth of water 5 fathoms.

RESTRICTIONS: Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Depth of water in entrance is 27 ft. plus tide and the min. depth of water required under the keel for manoeuvring in the channel is 3 ft.

MAX. SIZE: Max. length 620 ft., max. breadth 80 ft. max. draft 28 ft. 6 in. on favourable high tide.

HEALTH: The International Flag signals for pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no automatic or radio pratique available.

RADIO: ETA and Agents messages should be routed through Bahrain Radio. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Working frequencies, 2638 kHz, 2738 kHz, 2570 kHz.

TUGS: 7 Government tugs are normally available to assist in berthing operations. The only exception being when the tug is under repair.

BERTHING:

5 Berths – Total length 956 m. (Deep Water Berths); Depth alongside 9.1 m.

4 Berths – Total length 745 m. (Shallow Water Berths); Depth alongside 7.5 m.

Outer and inner dredged approach channels, 8.2 m. and 9.1 m. Depth (C.D.). Wharves for smaller craft: West Inner Wharf 207 m., Collins Jetty 135 m.; Country Craft Jetty 287 m.; Fish Factory Wharf 60 m. Depths 2.5 m. to 6.0 m. (C.D.).

Mobile cranes 3 – 20 tons available. 25 ton side loader and 122 trailers available.

Transit storage areas at landward end of approach causeway with extensive paved open storage and transit sheds giving 16,722 sq.m. cover.

New transit storage area on extended main quay with extensive paved open storage, 5 transit sheds giving 30,000 sq.m. cover completed. Proposal for construction of 500 ton cold storage under review. Control tower for Doha Port also proposed.

Normally berthing and unberthing to and from the deep water jetty is not at any time without certain reservations:

(a) Draft and trim of vessel.
(b) Height of tide.
(c) Visibility from Navigation Bridge.
(d) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel at his discretion after consultation with the Senior Pilot, when the above mentioned conditions are unfavourable.

STEVEDORES: ETA advice is required on the number of gangs workable. Advance notice is required for any heavy lifts (say in excess of 10 tons) and the consignees name if possible as special arrangements have to be made for handling. Average discharge rate is 75 tons per hook day.

MEDICAL: Unless an emergency no advance notice is required. Hospital facilities do exist and a doctor will visit on request. Current Vaccination and Cholera Certificates are required.

DENSITY: The density of the water is salt (1025) at all states of the tide.

FRESH WATER: Fresh water is available in small quantities (50 tons) at the anchorage and larger quantities when alongside the jetty and is supplied by motor tankers.

FUEL: At present time no fuelling available.

GANGWAY/DECK WATCHMEN: The Public Security Department (Police) post a guard at each gangway, but it is advisable the ship also supplies a watchmen. Before landing *every* crew member must lodge his passport or seamen's identity card with the guard when alongside the jetty and at the dock Police Station when at the anchorage.

OPENING/CLOSING HATCHES: This work may be carried out by either crew or stevedores, but usually by the latter.

CUSTOMS ALLOWANCE: Qatar is "dry" and no official allowance is made. The bond is sealed on the ship's arrival.

CARGO GEAR: No additional requirements apart from those required by International Law.

IDENTIFICATION CARDS: Discharge Books or Passports are required to be handed to the Police before any crew member may proceed ashore.

CONSULS: The following countries maintain embassies in Qatar:

Bangladesh
Egypt
France
Gabon
Great Britain
India
Iran
Iraq
Japan
Jordon
Korea
Kuwait
Lebanon
Libya
Mauritania
Morocco
Netherlands
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
U.S.A.
W. Germany
Yemen

REPAIRS: All kinds of repairs can be carried out. Metal-locking, bottom brushing and underwater welding.

REPATRIATION: Crew changes can be carried out. The Agents will require to know the names, discharge book or passport numbers and necessary information of dates, etc. well in advance for the authorities. Repatriation is normally by air, but Asian crews can be repatriated to Pakistan and India by sea.

AIRPORT: It is about 3 miles from the port to the airport. There are regular flights to Europe, U.K. and India by British Airways, M.E.A. Air India, P.I.A. etc.

TIME: The standard time in Qatar is GMT plus 3 hours.

HOLIDAYS: The holidays in Qatar are usually religious and therefore fall on movable dates. As far as shipping is concerned there are only two days when work is not possible under any circumstances Idd Al Fitr and Idd Al Adna.

POLICE/AMBULANCE/FIRE: Dial 999.

TELEPHONES: Telephone available at the new Jetty. No. 25782.

GENERAL: Particular attention must be paid to:

(1)The Qatari flag must be flown at all times at the fore mast.

(2) Liquor is not allowed ashore and it is a serious offence to offer alcohol to a Qatari.

(3) Smoking is not permitted in any public places during the month of Ramadan.

SHORE LEAVE: Shore leave is permitted after the Immigration Authorities have cleared the ship and given permission, in writing, on the Crew List. Seamens' documents or passports must be deposited with the police at the gangway and retrieved on returning aboard.

AUTHORITY: Department of Ports, Ministry of Communications & Transport.

AGENT: Qatar National Navigation & Transport Co. Ltd., P.O. Box – 153, Doha. Telex: 4206 Melaha Dh. Cable: "Navigation" Doha. Telephone: 321175/9, 23684, 21213.

HALUL ISLAND: 25.38.55 N. 52.25.33 E.

Halul Terminal S.B.M. (See Plan Book)

FLAG: The Qatar national flag should be flown during hours of daylight.

DOCUMENTS: Master required provide 2 copies of crew list and show Light Dues receipt. All other necessary papers will be supplied on arrival, by Berthing Master.

PILOTAGE: The Berthing Master will board 2 miles East of Halul unless advised to the contrary by Halul Control or the mooring launch. Masters are requested to provide a good lee for the launch to facilitate the boarding of the Berthing Master and the lifting on board of the equipment.

The pilot ladder should be rigged on the starboard side of the vessel for both SBM's.

All tankers over 50,000 d.w.t. not equipped with an overside pilot hoist should rig a combination of pilot and accommodation ladder.

Upon completion of loading and unberthing, the Berthing Master will disembark from the vessel to the East of the berths and well clear of the submarine pipe-line area. Under no condition should a laden vessel navigate the pipe-line area South of Halul within a distance of 3 miles off the Island.

Approaches to the berth: From the open sea to Eastward of Halul Island. The mooring/pilot launch on Channel 6 will contact vessels for final rendezvous position if during adverse weather conditions or otherwise restricted the normal boarding position cannot be adhered to.

DEPARTURE: *Recommended departure course:* In order to assist deep drafted vessels departing from the SBM area 2 light buoys have been established as follows:

"H1" in position 102°, 4.0 miles from Halul lighthouse fitted with starboard hand top mark, painted black and white letter and figure "H1" and exhibiting a light with characteristic – group flashing (3) every 10 seconds.

"H2" in position 094°, 6.4 miles from Halul lighthouse fitted with port hand top mark, painted red with letter and figure "H2" in white and exhibiting a light with the characteristic – group flashing (4) red every 15 seconds.

Deep draft vessels are recommended to leave on a course of about 058° passing between these two buoys.

ANCHORAGE: To the Eastwards of Halul Island centred in a position with Halul lighthouse bearing 267°×2.3 miles. Depth about 80 ft. and bottom sand.

MAX. SIZE: SBM No. 1 up to 100 ft. draft (240,000 tons). SBM No. 2 up to 110 ft. draft (500,000 tons).

HEALTH: If sickness on board, details should be included in ETA message. No Doctor on Halul. In emergencies the services or advice of Company's Medical Officer based in Doha may be obtained. If Medical Officer or patient has to be flown to or from Doha, the tanker concerned will be charged for helicopter hire.

RADIO: Vessels should establish communications with Q.G.P.C. (Offshore Operations), Doha, at least 72 hours before arrival Halul Terminal, giving ETA local time and quantity of cargo required in metric tons. Message to "Qatoff Doha" via Bahrain Radio. The ETA should be confirmed or amended 24 hours before arrival via Bahrain Radio, or within range, through A7S (Alpha Seven Seirra).

Vessels nominated for Halul as *second loading port* should immediately after arrival at *first port*, when target for port time has been set, advise "Qatoff Doha" their ETA, Halul through agency channels if otherwise impossible.

A private radio station, call sign "A7S", operated by Q.G.P.C. (Offshore Operations) is situated in Doha. A continuous listening watch maintained on 500 kHz. Incoming tankers should listen for the "A7S" traffic list which is transmitted on 438 kHz at 0400, 0800, 1200 and 1600 hrs. GMT after first calling on 500 kHz. Other details shown in Admiralty List of Radio Stations Volume 1.

Standard information coded (in plain language) to vessels with (without) ship's private codebook will be passed to all incoming vessels by station A7S, advising which SBM will be used.

Ship's radio station must not be used while tanker moored to SBM.

VHF: A Company VHF station on Halul Island, call sign "Halul Control" maintains a continuous watch on Channel 16 and 6 (Channel 6 being the working frequency). The station has a range of approximately 50 miles and incoming tankers should establish communications with this station when within range.

Ship to shore communication during loading is by portable VHF Radio telephone with emergency shutdown system, provided by the terminal.

TUGS: Not available.

BERTHING: Approach is from the open sea, passing to the Eastwards of Halul. There are 2 single buoy moorings. No. 1 SBM in position 25° 38.5′ N., 52° 26.2′ E., fitted with 1×810 ft. and 1×840 ft.×16 in. floating hose strings and connected to 1×30 in. shore submarine and one double 15 in.×150 ft. nylon floating mooring lines from the buoy. This berth will primarily accommodate vessels up to 350,000 d.w.t. Loading rates of up to 8,000 cu.m. may be given. No. 2 SBM in position 25° 38′ 36″ N., 52° 27′ 35″ E. fitted with 1,000 ft.×24/20 in. floating hose strings (with 1×16 in. and 1×20 in. manifold connection) and connected to 2 double 15 in.×150 ft. nylon mooring lines from the buoy. This berth will accommodate vessels of over 120,000 d.w.t. with up to a draft of 110 ft. Loading rates of up to 15,000 cu.m. will be given. In both berths, mooring lines from the buoys are secured on the forecastle head using equipment provided by the terminal. A suitable messenger rope should be ready for use. No moorings are used aft. The Berthing Master will advise in detail the mooring procedure.

Hose Connections: No. 1 SBM amidships starboard side 2×16 in. hoses. Hose derrick should be rigged to lift at least 10 tons and 2×16 in. reducers should be fitted on the starboard side only.

No. 2 SBM amidships, starboard side 1×16 in. and 1×20 in. hose. Hose derrick must be rigged to lift at least 10 tons and 1×20 in. (forward) and 1×16 in. (aft) reducers should be fitted on starboard side only.

Hose connection carried out by ship's personnel with advice from Berthing Master assisted by a foreman.

Tankers *not* permitted to immobilise main engines or auxiliaries whilst moored to SBMs.

DENSITY: At berth, 1028/1030 (approximately).

CARGO: Flash point below 32° Fahrenheit.

H_2S content. Masters should refer to the International Oil Tanker and Terminal Safety Guide Section 1. 4. 2. on the subject quoted here for easy reference.

1.4.2. Hydrogen Sulphide – H_2S. Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, H_2S gas indicators should be provided.

It is important to realise that the concentration of H_2S can be measured and expressed in two different ways.

The p.p.m. in the liquid, by weight;

The p.p.m. in the air, by volume.

Producing and processing departments at terminal often use the liquid measure for H_2S content, and this could be confusing to tanker officers who usually think of H_2S as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. H_2S in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of H_2S into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of H_2S gives some indication of its dangers:

Measured in air by volume

50 to 100 p.p.m.	Eye and respiratory tract irritation after exposure of 1 hour.
200 to 300 p.p.m.	Marked eye and respiratory tract irritation after exposure of 1 hour.
500 to 700 p.p.m.	Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure.
700 to 900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.
1000 to 2000 p.p.m.	Death is apparently instantaneous.

Apparent death from H_2S is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains H_2S in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with noticeable H_2S content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pumproom should be avoided where possible to reduce the possibility of H_2S contamination of the pumproom atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pumproom without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which H_2S may have been drawn should be ventilated and checked before entry.

Persons overcome by H_2S should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodations at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodations or 50 p.p.m. on deck more than 10 ft. from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pumproom bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pumproom entrance, and at the entrance to any other space which could be affected.

MEDICAL: There is no doctor on Halul Island.

TIME: Local time is GMT plus 3 hours.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS/STORES/LAUNDRY: Not available.

TANK CLEANING: No facilities available and ships must arrive with clean ballast, lines and pumps.

CUSTOMS: Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

SHORE LEAVE: Not permitted.

AUTHORITY: Qatar General Petroleum Company (Offshore Operations).

UMM SAID: 24.54 N. 51.34 E. (See Plan Book)

DOCUMENTS: See "Doha".

BUOYED CHANNEL: All vessels wishing to navigate the Umm Said buoyed channel must obtain prior clearance from Umm Said Control who can be contacted on VHF Channels 14 or 16 or by Telex via Bahrain Radio, addressed to Petroqat Umm Said. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

PILOTAGE: Inward and outward pilotage is compulsory for all vessels carrying flammable, toxic and dangerous cargoes. Inward pilotage is also available for all other vessels if requested. A charge will be made for pilotage services.

Except on special request Pilots are not provided for the inward passage. Vessels should proceed to the appropriate anchorage, having first received clearance from Umm Said Terminal to enter channel. This is to ensure that all outward bound vessels are aware of traffic movements in channel. Pilot will board incoming vessels in the vicinity of (M) Mishut buoy, if requested.

Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A Pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend Pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

Automatic pilot hoists should not be used unless such use is agreed to by the Pilot. On no account should weighted heaving lines be used in the vicinity of the pilot boat or mooring launches.

Pilotage is compulsory for dry cargo ships bound for Umm Said anchorage. Pilotage performed by Doha Pilots.

APPROACHES:

Umm Said Approaches

NOTE: CHANGES OVER TO THE I.A.L.A. SYSTEM "A" ARE TO BE CARRIED OUT IN JANUARY 1981 – SEE "LATE REPORTS".

Light Buoys	*Latitude North*	*Longitude East*	*Shape*	*Colour*	*Light*

Approach to Umm Said Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) 'Kareinein' light buoy in position Lat. 25° 24′ 18″ N., Long. 51° 56′ 16.4″ E., thence 226°, 12 miles to (M) 'Mishut' light buoy in position Lat. 25° 15′ 51″ N., Long. 51° 46′ 43.4″ E.

From 'Mishut' light buoy steer 214° for a distance of 8 miles to (W) "Wakrah" light buoy, leaving this light buoy on the port hand.

From "Wakrah" light buoy steer 180° for a distance of 6.4 miles, to (H) "Hul" light buoy leaving this buoy to port.

From a position of two cables West of (H) "Hul" light buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel buoys, thence 158° 30′, 0.3 miles to pass between Nos. 3 and 4 Outer Channel buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel buoys, thence 191° 30′, 1.6 miles to pass between Nos. 9 and 10 Outer Channel buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel buoys.

From a position midway between Nos. 11 and 12 Outer Channel buoys, steer 157° for a distance of 2.2 miles, leaving "S.E. Arrif" buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving "S. Arrif" buoy on the starboard hand.

After rounding "S. Arrif" buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel buoy, thence 003°, 1.1 miles, passing close East of No. 2 inner Channel buoy.

From a position close East of No. 2 Inner Channel buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 inner Channel buoys thence 323° to round "Turning" buoy, leaving this buoy on the port hand.

From "Turning" buoy steer a course to enter the "Large Tanker Anchorage". The Northern limit of the Large Tanker Anchorage is a straight line joining the "Turning" buoy and "Fairway" buoy positions.

Masters of vessels anchoring at Umm Said are required to use the appropriate anchorage. With the exception of emergencies only, anchoring outside the designated anchorage areas or obstructing the fairway is *not* permitted.

Prohibited Area: A prohibited area enclosed by the pecked lines (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Authority.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Ras Abu al Mishut to Fasht al Arrif.
Admiralty Chart No. 3950 – Fasht al Arrif to Ras Laffan.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 buoys, 3 and 4 buoys and Nos. 9 and 10 buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between "S.E. Arrif" and "S. Arrif" buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the Channel and "Turning" buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the flood stream sets to the S.S.W. and the ebb stream to the N.N.E. the rate being up to two knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in the Northern part of the Outer Channel, between the Outer Channel and "S.E. Arrif" buoy and between "S. Arrif" buoy and the "Turning" buoy. It should be noted that at the Outer Channel entrance the flood stream continues to set to the Southward for some time after the tide has started to fall.

Tides: The tides in this area have a large diurnal component and at times there is only one high water and one low water in the twenty-four hours. This irregularity is more pronounced at Umm Said than at the Outer Channel entrance for which predictions are made.

In December the higher high water, or the only high water during periods of single day tides, occurs between 0500 and 1400 hrs.; in March between 2200 and 0900 hrs.; in June between 1800 and 0100 hrs. and in September between 0900 and 2100 hrs.

At Umm Said there are a few days in the year when the tide does not rise above 5 ft. (1.52 m.) and there are considerable periods each day when the predicted height of the tide is greater than 3 ft. (0.91 m.).

In the vicinity of Nos. 3 and 4 Inner Channel buoys, High Water occurs about 1 hour after High Water at the Outer Channel entrance and the rise of tide is slightly more than at the Outer Channel entrance.

The Higher High Water is normally 5 ft. (1.52 m.) or better rising to 8 ft. (2.44 m.) at exceptional Springs.

Abnormal Meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

ANCHORAGE: Eastern Anchorage. Depth 48 ft.

Prohibited Anchorage: A prohibited anchorage has been established in the vicinity of (W) Wakrah light buoy to protect submarine pipe-lines laid in the area. A spherical black and red buoy (Fl. 10 secs) has been laid in position 25° 13′ 42″ North, 51° 44′ 48″ East and a line drawn 073°/253° from the coast through this position marks the Northern boundary of the prohibited anchorage. A similar buoy (Qk. Fl.) has been laid in position 25° 8′ 18″ North, 51° 41′ 54″ East and a parallel line drawn through this position marks the Southern boundary of the prohibited anchorage.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

LNG Jetty: Mooring and unmooring operations are normally restricted to daylight hours.

MAX. SIZE: (Also see "Cargo Handling Facilities"). Draft of laden tankers leaving Umm Said controlled by depth at outer end of Outer Channel. This is 36 ft. (10.97 m.) below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is normally 37 ft. (11.28 m.) or more in the channel.

Experience shows that even under the worst weather conditions there is no appreciable movement on larger ships in Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in Outer Channel, there is very little "draw down". Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer buoys at higher high water for the Outer Channel entrance.

Subject to the under-keel clearances mentioned hereafter, in general the draft limitations are as follows:

(a) Ships drawing 34 ft. (10.36 m.) or less can sail at any time on any day.
(b) Ships drawing 35 ft. (10.67 m.) will rarely have to use tides.
(c) Ships drawing 36 ft. (10.97 m.) will usually have to use tides.
(d) Ships drawing 37 ft. (11.28 m.) always have to use tides.
(e) Ships drawing 38 ft. (11.58 m.) will occasionally be neaped.
(f) Ships drawing 39 ft. (11.89 m.) will be neaped 120 days ± a year.
(g) Ships drawing 40 ft. (12.19 m.) can sail occasionally. The best months are June and July.
(h) Ships drawing 41 ft. (12.50 m.) are not worth programming as on the few days when predictions indicate they could sail, meteorological conditions may well cut the tides.

Underkeel Clearance: The following table stipulates the *minimum* underkeel clearance for vessels using the Umm Said Channels.

Vessels up to 99,999 d.w.t.	–	3 ft. Clearance
Vessels from 100,000 to 149,999 d.w.t.	–	4 ft. Clearance
Vessels over 150,000 d.w.t. and 320,000 d.w.t.	–	5 ft. Clearance
(See "Terminal Information – Berth limitations").		
L.P.G. Carriers (all sizes)	–	5 ft. Clearance

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.
(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.
(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.
(d) Reduce to a minimum safe speed to pass over and near shoal areas.
(e) Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.
(f) Note that list can mean an appreciable increase in draft.
(g) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.P.P.A. Medical Officer when asked for by Master.

RADIO: When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Vessels are requested to inform Petroqat, Umm Said by cable of their ETA at (M) Mishut Light buoy and whether or not Pilot required, 72 hours and confirm 24 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, and the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable.

Except for Tankers, all vessels must contact Doha on VHF for ETA advice. Umm Said terminals should be contacted for channel clearance.

These cables should be addressed to Petroqat, Umm Said, and passed via the Bahrain Coast Radio Station.

VHF: The Umm Said Terminal is equipped to operate on five channels of the International Maritime Mobile Telephone Service as follows:—

Channel No.	Transmit/Receive Frequency mc/s
9	156.45
11	156.55
12	156.60
14	156.70
16	156.80

A continuous listening watch is maintained on Channels 16 and 9, the call sign being "Umm Said" and the range of station is approximately 50 miles.

Berth Radio Frequency: Tanker berthing/loading operations are carried out using Pocketfones on a frequency of 155.975 mc/s transmit and receive. These Pocketfones are classed intrinsically safe and also have the facility of use on Channel 9.

TUGS: Given sufficient prior notice a tug can usually be made available on request.

BERTHING: Pilots act in same capacity as Mooring Masters (24 hours notice in advance required) in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operation they act as company's representatives.

Vessel's crew are expected to assist with hose connecting.

North Berth is a Single Point Mooring in Position 24° 53′ 37.2″ N., 51° 34′ 54″ E. connected to the shore installation by a 36 in. submarine pipe-line. The seaward end of the pipe-line and buoy terminates in two 16 in./12 in. flexible floating hoses. Vessels are moored by a single hawser from bow to buoy.

The following equipment should be carried by each vessel:

(i) One 4 in. circumference × 40 fathom messenger rope ready for use at the bow together with mooring lines of suitable size ready for use.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) Derrick or crane rigged over the starboard side manifolds should be capable of lifting 16 in./12 in. floating hose to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(iv) Reducers or adaptors if necessary to be bolted to 2 ship's flanges so as to take 12 in. hoses.

Warning: Ship's anchors must never be used within 0.5 mile of this berth or the 36 in. submarine pipe-line and must therefore be well secured at all times.

The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipe-line. The seaward end of the pipe-line terminates in two 12 in. flexible hoses.

Vessels are moored at this berth by ship's anchors and mooring buoys. The following equipment should be carried by each vessel.

(i) Port and starboard anchors to be fitted with marker buoys and sufficient line. This will facilitate recovery of anchor in the event of loss.

(ii) 2 good boat ropes at least 200 ft. long ready for use on each side.

(iii) A good line by the pilot ladder for hauling on board equipment such as hose clamps, wrenches, reducers and elbows.

(iv) 4 good mooring lines aft, of a suitable size for the vessel on which they are used. Each line should consist of 120 fathom hawser, tailed by a similar hawser and ready to run out when required.

(v) 2 good mooring lines forward similar to the after lines for use on breast buoy.

(vi) 2 good rope stoppers to be available forward. 4 good rope stoppers to be available aft.

(vii) Derricks or cranes reaching over the hose connection should be capable of lifting 12 in. flexible hose from the sea-bed to a height of up to 30 ft. above deck (S.W.L. 5 tons).

(viii) Reducers or adaptors to be bolted to ship's flanges, so as to take 12 in. hose.

(ix) Carpenter's stoppers are provided on loan by Q.P.P.A. for use with Authority's 4.75 in. wires, and chain stoppers should not be used.

Note. Where a vessel has 2 or more loading connections, the ship's flanges should not be less than 4 ft. apart.

TERMINAL INFORMATION:

Berth	*Max. t.p.h.*	*Fixed sea-line*	*Overrail hoses*
North (SPM)	4,300	One – 36 in.	Two – 12 in.
South (CBM)	3,800	One – 24 in.	Two – 12 in.

Depth of water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	44 ft. (13.41 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth limitations:

North Berth (SPM) – 320,000 Summer d.w.t.
Bow to manifold 590 ft.

Large tankers loading at the SPM will be required to maintain a minimum of 20% of SDWT ballasted/loaded condition at all times and maintain an even trim.

South Berth (CBM) – 150,000 tons SDWT (approximately)
Head North – Max. length up to 900 ft.
Head South – Max. length up to 1,100 ft.

Larger ships may be berthed at the CBM depending on prevailing weather conditions at the time.

N.B. Other restrictions may be enforced at the discretion of the Terminal Operators.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.
